Mr. NELSON, from the Committee on the Judiciary, to which was referred the joint resolution (S. J. Res. 171) granting consent of Congress and authority to the Port of New York Authority to execute the comprehensive plan approved by the States of New York and New Jersey by chapter 43, Laws of New York, 1922, and chapter 9, Laws of New Jersey, 1922, reported it with amendments and submitted a report (No. 726) thereon.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. McCUMBER:

A bill (S. 3656) for the relief of Gustav A. Lieber; to the Committee on Claims.

A bill (S. 3657) to authorize surveys and investigations for irrigation projects in the State of North Dakota, and for other purposes; to the Committee on Irrigation and Reclamation.

By Mr. FRELINGHUYSEN:

A bill (S. 3658) for the relief of John O'Neil; to the Committee on Claims.

By Mr. PHIPPS:

A bill (S. 3659) to create the White House police force, and for other purposes; to the Committee on Public Buildings and Grounds.

By Mr. SMOOT:

A bill (S. 3660) to provide adjusted compensation for veterans of the World War, and for other purposes; to the Committee on Finance.

AMENDMENTS TO HOUSE RIVER AND HARBOR BILL.

Mr. JONES of Washington submitted an amendment providing that any work of improvement or public work on canals, rivers, and harbors heretofore adopted by Congress may be prosecuted by direct appropriations, by continuing contracts, or by both direct appropriations and continuing contracts, as may be provided in any act making appropriations to carry on such works, intended to be proposed by him to the bill (H. R. 10766) authorizing appropriations for the prosecution and maintenance of public works on canals, rivers, and harbors, and for other purposes, which was referred to the Committee on Commerce and ordered to be printed.

Mr. SHEPPARD submitted an amendment providing for improvement works at Corpus Christi, Tex., in accordance with the report submitted in House Document No. 321, Sixty-seventh Congress, second session, intended to be proposed by him to the bill (H. R. 10766) authorizing appropriations for the prosecution and maintenance of public works on canals, rivers, and harbors, and for other purposes, which was referred to the Committee on Commerce and ordered to be printed.

Mr. CULBERSON submitted an amendment providing for improvement works at Corpus Christi, Tex., in accordance with the report submitted in House Document No. 321, Sixty-seventh Congress, second session, intended to be proposed by him to the bill (H. R. 10766) authorizing appropriations for the prosecution and maintenance of public works on canals, rivers, and harbors, and for other purposes, which was referred to the Committee on Commerce and ordered to be printed.

RETURN OF AMERICAN ARMY EQUIPMENT FROM GERMANY.

Mr. FRELINGHUYSEN submitted an amendment intended to be proposed by him to the bill (S. 3562) to provide for the return from Europe of motor-propelled vehicles and other equipment used by the American forces in Germany for distribution to the State highway departments, and for other purposes, which was referred to the Committee on Military Affairs and ordered to be printed.

AMENDMENT TO WAR DEPARTMENT APPROPRIATION BILL.

Mr. FRELINGHUYSEN submitted an amendment proposing to appropriate $9,227.22 for payment to the Borough of Cresskill, N. J., of 50 per cent of the cost of the repair and restoration of the drainage canal, of Grant Avenue, and of the grounds around the railroad station in such borough, as compensation for all damages thereto resulting from the military occupation of Camp Merritt, intended to be proposed by him to House bill 10871, the War Department appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

Mr. LODGE. Mr. President, I know that nothing is in order but to call the roll on the appeal from the decision of the Chair. However, I have been examining the question with such care as I could since the Senate took a recess, and I should like very much if the Senate would grant me unanimous consent to say a few words upon the point of order.

The VICE PRESIDENT. Is there objection? The Chair hears none. The Senator from Massachusetts will proceed.

Mr. LODGE. The question of order which was raised upon the motion made by the Senator from Montana [Mr. WALSH] to substitute 15 per cent instead of 35 per cent as agreed to by the Senate, was taken up on Saturday and not completed. I desire to say a very few words upon that subject, to which I have given the best consideration I could.

It is not a question of precedent. I have no doubt different precedents might be found. It has seemed to me a question involving general parliamentary law. I have looked at the authorities, and I have two of the best from which I shall quote to the Senate.

This was the situation: The text of the bill before the Senate carried on this item a rate of 30 per cent. The committee reported an amendment making the rate 40 per cent instead of 30 per cent. That was the pending amendment, the committee amendment being first in order. The Senator from Utah [Mr. SMOOT] then moved to amend the amendment by striking out "40" and inserting "35." It was a motion to strike out and insert. When I spoke upon it, I called attention to the general and unquestioned parliamentary rule that when a body on a motion to strike out and insert inserted certain words, those words could not be changed at that stage of the bill; that is, they could not be changed as in Committee of the Whole. But it seemed to me, and I so argued briefly, that there was a distinction to be drawn between an amendment to the text and an amendment to an amendment, the motion being to amend by striking out and inserting.

The Senate agreed to strike out "40" and insert "35." That amendment was adopted. Then the question arose whether that amendment could be further amended after the action of the Senate, or whether the general rule applied. My impression was very strong at the time that the general rule did not apply to an amendment to an amendment.

The question is by no means a simple one nor is it free from difficulty. However, I turned to the authorities, to Cushing, which I take it is the highest authority or one of the highest. This is a recent edition, and on page 527, in section 1337, under the heading "Amendments by leaving out and inserting," it is said:

> If the first question is decided in the affirmative, all amendment or alteration of the words thus agreed to is precluded in the same manner as if the motion has been simply to leave out the same words. Nor can a motion be then made to leave out for the purpose of inserting the same, or even different words; the words of the original motion being already agreed to as they stand.

Now turning to "Amendment by inserting words," to which section 1337 refers, and reading section 1332, it is stated that—

> This is the second form in which amendments may be made; and when an amendment is proposed in this form, if it prevails, it can not be afterwards moved to leave out the same words or a part of them; but it may be moved to leave out the same words, with others, or a part of the same words, with others; provided these propositions are substantially different from the first.

I then looked at Reed's Rules. Mr. Speaker Reed was a very great parliamentarian and also a very distinguished lawyer and had had a very extended experience in dealing with parliamentary questions. I think there can be no higher authority. On page 102 he said:

SEC. 143. Motion to strike out and insert—effect of affirmative action—if the motion to strike out and insert prevails—

As it prevailed on the motion of the Senator from Utah to strike out "40" and insert "35"—

then the words inserted, or any of them, can not be stricken out.

This, however, does not preclude the insertion of the same with other words, or a part of the same words with others, or to strike out the same words with others, or part of the same words with others.

That is a repetition of Cushing.

To state this in another form, the prevalence of the motion to strike out and insert does not prevent further use of the motion to strike out and the motion to insert, but the decision of the assembly already made must not be overthrown, though it may be modified.

For example, this being, as I recall, an ad valorem rate, if a motion had been made to add at the same point a specific duty of 10 cents a pound, or whatever it may be, under the law as set forth in these authorities that motion or any similar motion which would modify, perhaps, the purport of the amendment adopted by the body would be in order, but the precise words adopted must remain. So I understand the law as laid down by Cushing and Reed.

The motion made by the Senator from Montana was to insert "15" in place of the precise words already adopted by the Senate. It was not a modifying motion, or one changing the purport of the amendment. It was a motion to strike out the precise words adopted by the body; and that motion, I am forced to think on studying the rules, was precluded. As after consideration I came honestly and frankly to that opinion, I thought I ought to state it with equal frankness to the Senate; and I am obliged to the Senate for permitting me to do so.

Mr. ASHURST. Mr. President——

The VICE PRESIDENT. Does the Senator from Massachusetts yield to the Senator from Arizona?

Mr. LODGE. Yes; I yield.

Mr. ASHURST. Mr. President, I have listened with interest and respect to the citation of the authorities presented by the distinguished Senator from Massachusetts [Mr. LODGE], but the reasoning in his short speech last Saturday evening, May 27, as found on page 7801 of the CONGRESSIONAL RECORD, is so conclusive that I am obliged to say that his views as there expressed have more weight with me than Cushing and Reed, because I am unable to overcome the force of the Senator's reasoning and I shall now read his views as found in the left-hand column of page 7801 of the CONGRESSIONAL RECORD. The Senator said:

In this case—

Referring to the amendment tendered by the Senator from Montana [Mr. WALSH] to the committee amendment which had already been amended—

In this case the body has reached no final agreement on the form of words. It is still dealing with an amendment. If the body had agreed to 35 per cent, it would not be open to amendment; but the body has not agreed to 35 per cent. It has only agreed to substitute it in preference to 40 per cent. The final vote is still ahead of us. The body has not finally agreed on 35 per cent; and therefore, this being an amendment, and no final agreement on the form of words having been reached, it seems to me that it is open to further amendment.

I should like to see the Senator from Massachusetts now stand by the reasoning evidenced by those words which he expressed on last Saturday evening. The force of the Senator's logic as applied Saturday is irresistible and unanswerable.

Mr. LODGE. Mr. President, the undoubted purpose of the general parliamentary law in precluding further amendment when a word or words have been adopted by the body is very clear. It is to carry out what must always be the main object of the parliamentary law, to bring the body to a decision, which leads to the transaction of business in accordance with the wishes of the body.

As I stated at the beginning, my view—in fact, the position I took in the words which the Senator from Arizona has just read—was that there was a distinction between the rule as applied to an amendment to the text where the action of the body would be final as to the words inserted and an amendment in the second degree to an amendment; but, Mr. President, after having studied the authorities, as I have, and having reflected upon the subject, it seems to me clear that the accepted practice is to apply to an amendment in the second degree the same general principle which is applied to a change of the text.

Mr. ASHURST. Mr. President——

The VICE PRESIDENT. Does the Senator from Massachusetts yield to the Senator from Arizona?

Mr. LODGE. I yield.

Mr. ASHURST. I feel a trepidation about engaging in a contest over a parliamentary question with the Senator from Massachusetts, whose experience and knowledge respecting parliamentary law are great; but I wish to show the Senator just where his philosophy of this morning would lead the Senate. We will assume, Mr. President, that the House of Representatives sends us a bill proposing to construct a railroad in Alaska and that that body fixed the mileage of the railroad at 30 miles. The proper committee of the Senate amends the House provision and provides that the number of miles shall be 40 miles—I am employing the same figures as are employed in the bill before us—and just as soon as the bill comes in here a member of the committee moves to strike out "40 miles," which the committee recommends, and to insert "35 miles," and that that amendment is agreed to, as was done in this case. Then, according to the philosophy the Senator from Massachusetts employs this morning, the Senate is precluded from changing that mileage, although it should be ascertained that the correct mileage would be 18 miles.

Mr. LODGE. Precluded at that stage.

Mr. ASHURST. Of course, the Senator will argue that when we left the Committee of the Whole and went into the Senate we may disagree to that.

Mr. LODGE. I should argue that when we reached the Senate the previous action could be reconsidered.

Mr. ASHURST. When we reach the Senate; but that would mean that the Committee of the Whole, set up by the parliamentary law and designed to whip bills into proper shape, would be deprived of one of the functions for which the Committee of the Whole is set up, and although we learned that the correct mileage would be 15, we should have to wait until we got into the Senate to make the correction.

I will use another illustration: Suppose, Mr. President, the House should send us a bill providing for the creation of a national park in Porto Rico, fixing the area at 30 square miles, but the Senate committee amends the numeral to read 40 square miles, and then some Senator obtained the floor and moved to reduce it to 35, which was carried. If then the Senate should learn that the proper number of square miles to be embraced in the park was 15, we would in that case be precluded from correcting the bill, according to the philosophy of the Senator.

If that should be held to be the correct practice, it would be destroying the very reason why we have a Committee of the Whole.

I am sorry the Senator from Massachusetts does not stand rigidly by his expression which I read, although there may be, Mr. President, a higher courage in changing one's mind when one thinks one is wrong than to stand by error; and, if the Senator believes that he was in error on Saturday night, I pay my tribute of respect to him for changing his mind; but I believe that if he should anchor himself fast to his view as laid down by him on page 7801 of the RECORD Saturday evening, he will find that the business of the Senate will be promoted.

Mr. LODGE. Mr. President, I am sorry to take up so much time, but I should like to emphasize the purpose which underlies general parliamentary law, which is to promote the transaction of business. For instance, it is universally forbidden in all parliamentary bodies to offer an amendment in the third degree. The object of that rule is to provide some limit, for if there were no limitation on the number of amendments which might be offered simultaneously there would be no——

Mr. ASHURST. Mr. President, will the Senator yield?

Mr. LODGE. I should like to finish my sentence—there would be no end to the offering of amendments, one on top of the other, and it would lead to confusion and delay. That is the purpose of the general rule. The question involved in this instance is much narrower. It is whether the general law, which is incontestable, applies to an amendment in the second degree as well as to an amendment to the general text. After examining the authorities as well as I could, I came to the conclusion that I was mistaken in the argument I made on Saturday, and that when the amendment offered proposed to change the precise words adopted by the body it fell under the general rule, just as much in the case of an amendment in the second degree as in the case of an amendment to the original text. Therefore, I thought it was only fair to state the conclusion at which I had arrived.

Mr. FLETCHER. Mr. President, may I ask the Senator a question before he takes his seat? Has this thought occurred to the Senator, on this state of facts:

The committee brings in a proposed amendment to the bill. The committee has the right to perfect its own amendment. It has the right to withdraw that proposal and submit another proposal.

Mr. LODGE. It has a right to do it until it has been laid before the body.

Mr. FLETCHER. Now, the committee lays that amendment before the body. The committee then comes in and proposes to change its own amendment; and what we have done is simply to allow the committee to change its own amendment.

Mr. LODGE. Oh, no, Mr. President; I beg the Senator's pardon. The committee amendment was the pending amendment. A member of the committee moved to strike out and insert.

Mr. FLETCHER. Was not that the action of the committee itself?

Mr. LODGE. It can not be distinguished. The right of modification ceases when the amendment is once laid before the Senate.

Mr. FLETCHER. I realize that; but my impression is that the Senator from Utah was acting on behalf of the committee when he was proposing a reduction to 35 per cent.

Mr. LODGE. He was, Mr. President, acting on behalf of the committee. He made a motion to strike out and insert, and the Senate voted on it and sustained his motion.

Mr. FLETCHER. Of course, he had the right to do it, anyhow.

Mr. LODGE. No; he had no right to do it except by vote.

Mr. DIAL. Mr. President——

Mr. LODGE. I yield to the Senator from South Carolina.

Mr. DIAL. Then, as I understand the Senator, the remedy would be to vote down the proposed amendment——

Mr. LODGE. That remedy, of course, we have.

Mr. DIAL. In this instance the one proposed by the Senator from Utah, until we get an amendment that suits us?

Mr. LODGE. Of course; and in a case which is not directly in point here, but which indicates the purpose of parliamentary law, where there are several figures for an appropriation for the length of a railroad or anything you please, there is provision in parliamentary law for those figures to be offered seriatim, beginning with the highest. That was not done in this case.

Mr. DIAL. I understand we have a remedy, then.

Mr. McCUMBER. Mr. President, it seems to me, as it seemed before, that the question is a very simple proposition; that when a legislative body stamps its legislative judgment upon a precise point, its judgment stands unless there is a reconsideration of the vote by which its judgment has been impressed. When the majority of the Senate inserts a word, that is the action of the Senate, no matter who makes the proposition to insert the word; and after the Senate has voted on it and declared in favor of that motion it is the action of the Senate until it is changed either by a reconsideration of the vote or modified, which can be done by some other modification without a change of the thing upon which the Senate has acted.

Let me give an illustration for the benefit of the Senator from Arizona [Mr. ASHURST].

Suppose we report an amendment, and the amendment contains the conjunctive word "and," but we afterwards consider that "and" ought to be changed and the disjunctive word "or" inserted; so we move to strike out the word "and" and we insert the word "or." When we have voted upon that, we have fixed the word "or."

Mr. ASHURST rose.

Mr. McCUMBER. Let me finish this statement, because I am giving the exception where you can change it. You can not take the word "or" out of that amendment without a reconsideration of the vote while it is before the Committee of the Whole; but you can add after the word "or" some modification, or certain conditions, and in that way you can secure a modification. You can not, however, take out the word "or," because the Senate by a majority vote has put it there, and if you did not want it there you should have had a majority vote against it. So that matter is fixed. It has been put in by the action of the Senate. Never mind the committee, because when the Senate acts upon it once it is a Senate action. The Senate, by a majority vote, says: "We want it 35 per cent ad valorem." That disposes of the question of the 35 per cent.

The Senator was complaining that a minority would have no opportunity. They have every opportunity. If they did not want "35 per cent" in the bill, they should have voted down the proposed amendment of 35 per cent. Then it would have been subject to a motion to make it 15 per cent, or 10 per cent, or any other per cent; but it has to be done by voting down the proposition, because the majority certainly have the right to determine what shall go into the bill; and having once expressed their opinion, under every principle of parliamentary law you can not change that opinion except by a reconsideration of the vote.

Mr. ASHURST. Mr. President, in reply to the Senator, his argument would be sound if the Senate had adopted the amendment as amended.

When the Senate adopted the amendment of the Senator from Utah, and struck out "40" and inserted "35," the Senate did not adopt the figure "35." The question still was pending, and the Chair must put it:

The question is on agreeing to the amendment as amended.

Here is where a great deal of difficulty has arisen: Senators believe that because an amendment was offered to an amendment and was adopted, any further amendment is an amendment in the third degree. Not at all.

I do not care to prolong this debate. I have made my view plain, and I am satisfied to have the record stand as it does.

The Senator says that if the committee brings in a bill with the word "and" in it, it may strike out "and" and insert "or," but that thereafter it may not insert "but" instead of "or." That is what the Senator argued——

Mr. McCUMBER. Mr. President, the Senator is mistaken. I simply say that when the Senate has agreed by a majority vote to insert the word "or," the word "or" must stay there, and that you can not without a reconsideration of the vote strike out "or." You can put in "but" after "or," if you want to; but the Senate having placed "or" there, that is the action of the Senate, and you can not vote on the same thing again without reconsideration.

Mr. ASHURST. The Senator can convince me if he will tell me when the Senate adopted the committee amendment as amended. If the Senate had adopted the committee amendment as modified by the Senator from Utah, that would be the end of it; but the question was still pending, and that was the question that the Chair put, and must put, to wit:

The question is on agreeing to the amendment as amended.

The Senate does not adopt it until it agrees to that amended amendment.

Mr. McCUMBER. Why, Mr. President, the Senate has not agreed to the entire amendment; no.

Mr. ASHURST. That is all I want the Senator to concede.

Mr. McCUMBER. Oh, certainly; but the Senate has agreed by a vote that "35" shall take the place of "40," and that is the only thing that the Senate has absolutely decided at this time; and my position is that it can reconsider the vote by a majority vote and change it again, but unless that vote is reconsidered it has to stand, and there can be no question about it.

Mr. ASHURST. Yes, Mr. President. A motion to reconsider can be made but once.

Mr. JONES of New Mexico. Mr. President, I should be glad to have some one explain to me the final result of such a ruling as is contended for by the Senator from Massachusetts. I have been inclined to agree with the general proposition as announced this morning by the Senator from Massachusetts [Mr. LODGE]; but I should like to inquire if such a position will preclude the Senate from getting a vote at any time, either in Committee of the Whole or in the Senate, on a different rate?

The Senator from Montana [Mr. WALSH] offered an amendment fixing the rate at 15 per cent instead of 35 per cent. It seems to me that somewhere in the proceedings the Senate ought to have a right to vote upon that question, and, if I understand the present position of the Senator from Massachusetts, the Senate would be precluded from doing that.

We are in this parliamentary predicament: The Senator from Utah moves to amend by striking out "40" and inserting "35." Those of us who think that the 40 per cent rate is too high would, or course, rather have the "35" than the "40," but we are also of the opinion that it should be lower than the "35." In voting for the "35," in order to avoid the "40," we preclude ourselves from getting an opportunity to vote for "15" and I should like to know if there is some way out of it, either by reserving a separate vote in the Senate or in some other way, whereby we can ultimately get an opportunity to vote on the rate of 15.

Mr. LODGE. Of course, a vote can be reserved in the Senate.

Mr. JONES of New Mexico. When we come into the Senate, then the question is on concurring in the rate adopted as in the Committee of the Whole.

Mr. LODGE. In the Senate an agreed-upon amendment is open to change, if you reserve it.

Mr. JONES of New Mexico. What do we reserve? Do we not simply reserve the right to have a separate vote?

Mr. LODGE. You reserve the right to have that question presented separately, and when it is presented it is open to amendment.

Mr. JONES of New Mexico. If that is the rule, it will relieve the difficulty.

Mr. LODGE. In the Senate not at this stage, and, of course, the amendment providing the lower rate would have been entirely in order if it had been offered first.

Mr. HITCHCOCK. Will the Senator permit a question? Suppose it comes up in the Senate and the question is on concurring in the amendment adopted as in Committee of the Whole; the Senator holds that then it would be open to any amendment?

Mr. LODGE. It would be open to any amendment.

Mr. HITCHCOCK. Suppose an amendment were offered to make it 30 per cent; would that, again, prevent anyone from offering an amendment making it 15 per cent?

Mr. LODGE. Yes; if it was adopted by the body.

Mr. HITCHCOCK. So it is a question as to the Senator getting the floor first. It is quite possible, then, to prevent a vote upon an amendment proposing 15 per cent in any event, if that is the correct ruling.

Mr. McCUMBER. It can always be voted down if the Senate wants to change it.

Mr. HITCHCOCK. There would be some disadvantage in the matter, even in the Senate, if the chairman of the committee or a member of the committee should first get the floor, and move to reduce it to 34 per cent; then it would be a question as to whether it should be 34 or 40 per cent, and if it should be carried at 34, according to the statement now made, it would preclude any Senator from offering 15 per cent as a substitute.

Mr. McCUMBER. Of course the Senator understands that in all such cases those who do not want 34 per cent but want less than that would vote against it, and seek to vote it down, and if they did not vote it down, then, of course, the 34 per cent rate would have to stand.

Mr. HITCHCOCK. It compels a person voting to decide between 34 and 40, then.

Mr. McCUMBER. Such situations arise as to all legislative matters.

Mr. HITCHCOCK. It seems to me that there should be an opportunity at some time to present the 15 per cent rate and have a vote on it.

Mr. LODGE. Mr. President, it is possible to use that which is laid down in Reed's Rules, and which I have heard ruled:

If, for example, it were proposed to put in various sums ranging from $1,000 to $5,000, and an amendment for $3,000 were put first, those who desired to have $5,000 appropriated might not dare to vote against $3,000 for fear that they might get less. But by putting the question first on the largest sum and then on the others the assembly stops where a majority of the voices agree.

Mr. JONES of New Mexico. It seems to me, then, Mr. President, that it is just a question of getting the floor first or who is recognized by the Chair first.

Mr. LODGE. The question is whether it is agreed to or not. There must be an end to amendments on the same words at some point. If the same words are adopted by the majority of the body, that is the opinion of the body. My attention has just been called to Jefferson's Manual, where I find the following:

In Senate, January 25, 1798, a motion to postpone until the second Tuesday in February some amendments proposed to the Constitution; the words "until the second Tuesday in February" were struck out by way of amendment. Then it was moved to add "until the 1st day of June." Objected that it was not in order, as the question should be first put on the longest time; therefore, after a shorter time decided against, a longer can not be put to a question.

Here a shorter can not be put in question, or a longer, either, after the body had agreed on 35 per cent; and those precise words, I think, can not be changed under general parliamentary law, though their purport may be modified, all the authorities say, by additions not touching those words.

Mr. JONES of New Mexico. I am rather inclined to believe that the precedents cited by the Senator are applicable.

Mr. LODGE. They refer to a date and not to a rate.

Mr. CURTIS. Mr. President——

The VICE PRESIDENT. Does the Senator from New Mexico yield to the Senator from Kansas?

Mr. JONES of New Mexico. I yield.

Mr. CURTIS. I merely wish to call the Senator's attention to a ruling in Jefferson's Manual which, it seems to me, settles this whole question:

But if it had been carried affirmatively to strike out the words and to insert A, it could not afterwards be permitted to strike out A and insert B. The mover of B should have notified, while the insertion of A was under debate, that he would move to insert B; in which case those who preferred it would join in rejecting A.

Mr. JONES of New Mexico. Mr. President, I am familiar with that citation, but it seems to me that we are in a very unfortunate parliamentary position. Of course, anyone who prefers the 15 per cent rate would prefer the 35 per cent rate to the 40 per cent rate, but not being satisfied with the 35 per cent would have to vote against the motion to insert "35" instead of "40," and would be put in the position of voting against a lower rate. Somehow, somewhere, it seems to me we should have an opportunity to record ourselves as in favor of a still lower rate. I presume, if this ruling is to obtain, those of us who want a lower rate would have to depend on the courtesy of the Senate to get the floor and debate a motion for a little lesser amount. It seems to me it is an awkward position that we are placed in, because we ought to have an opportunity somewhere, sometime, to record ourselves in favor of a lower rate, but this puts us in the attitude of actually voting for a higher rate than that which is proposed.

Mr. SMOOT. Mr. President, I call for the regular order.

Mr. UNDERWOOD. I hope the Senator will withhold his request for a moment, for I desire to say something in reference to this matter. I think it is of importance, and I hope the Senator will not insist on the regular order.

Mr. SMOOT. As soon as the Senator from Alabama concludes I shall ask for the regular order.

Mr. PITTMAN. Will the Senator from Alabama yield to me for a moment?

Mr. UNDERWOOD. I yield to the Senator from Nevada.

Mr. SMOOT. Does the Senator from Alabama yield for a speech by the Senator from Nevada?

Mr. UNDERWOOD. The Senator from Nevada is the proponent of this proposition and he has not had the floor. I intended to say something about it, and I want to say something; but if the Senator from Nevada can not get the floor otherwise, I will yield it to him.

Mr. PITTMAN. The only reason why I asked permission interrupt the Senator was on account of the discourtesy of the Senator from Utah, which I had no way of calling attention to except by the method I have adopted. He announced that as soon as the Senator from Alabama concluded he would call for the regular order. We have been proceeding by unanimous consent, and I do not think it has been time thrown away. I do not think it has been a filibuster on the part of the Senator from Massachusetts [Mr. LODGE]. I think it has been a very intelligent discussion, and this is a very close question of important parliamentary law.

I desire to say, however, that so far the debate has not really touched the question which has been before the Senate, except indirectly. It may embrace it, it is true, but the question is not upon the motion of the Senator from Montana to make the rate 15 per cent ad valorem. The question is on the motion of the Senator from Nevada to substitute a specific rate for the ad valorem rate, and while it may involve the same principle, it is worthy of some consideration for a few minutes, notwithstanding the great energy of the Senator from Utah.

I shall not interrupt the Senator from Alabama any further, but after he has finished I will also ask unanimous consent to be allowed to explain the amendment I have offered, and which now is under consideration on the point of order against that amendment; and if the distinguished Senator from Utah then demands the regular order, I shall discuss it after the vote is taken.

Mr. SMOOT. The Senator ought to have waited until he had asked unanimous consent before he charged the Senator from Utah with any discourtesy.

Mr. PITTMAN. The Senator stated that as soon as the Senator from Alabama was through——

Mr. SMOOT. I thought the discussion was over.

Mr. PITTMAN. The Senator went further, and asked if the Senator from Alabama was yielding to me for a speech. Why? It was for the very purpose of cutting off the speech. There was no other purpose, if there was any intelligence in it at all.

Mr. SMOOT. I wanted to know just exactly where it was going to lead. I did not know that the Senator was the proponent or the originator of this question. Of course, if I had, I would not have interposed.

Mr. PITTMAN. The point of order was made against the amendment of the Senator from Nevada, and that is the question pending now. I appealed from the ruling on that question, and I certainly should have the courtesy of being allowed to speak on it.

Mr. UNDERWOOD. Mr. President, as the Senator from North Dakota withdrew his motion to lay the appeal on the table, I do not understand it is not subject to discussion, because, as I understand, an appeal from a ruling of the Chair is open to discussion, and, therefore, I think the debate has not been closed. But I am not raising that question. I think this matter is of too much importance not to allow those who desire really to express their viewpoint on the question to be heard.

I am not at all critical of the impatience of those in charge of the bill. I realize, as I have said many times before, that they have a very trying situation to handle. They bear the burden of putting the bill through, and having to stay here from 11 o'clock in the morning until 10 at night and carry this load, I do not criticize them at all for wanting to hurry the bill along or thinking that many motions are made to kill time. Of course, from their viewpoint they think that if we offer an amendment for 35 per cent, and it is voted on, and then offer one for 15 per cent, we might offer one for 5 per cent and vote interminably on one proposition. That is due to the fact that we have no cloture rule in the Senate. In any other parliamentary body, when those in the majority get ready, they can move a cloture and close the debate and close the consideration of the amendment. That power the Senate does not possess.

My desire to discuss this question now is not because I want to delay the passage of this bill. As I have said before, I think the bill should be carefully discussed, and then we should vote on it. It is a great economic measure, which should be properly considered. It is also a political measure, and from the standpoint of politics I have never had any doubt as to the effect of the passage of this bill. I think it is a complete asset to those in opposition to it.

Looking at the question now strictly before the Senate, this amendment has not been agreed to by the Senate. The pending question is as to whether the Senate will agree to the amendment. The proposed amendment has been modified. It makes no difference in its parliamentary status as to whether it comes from the committee or from an individual, except that by unanimous consent we agree that nothing but committee amendments should be considered at this time. That is the only difference. An amendment is proposed, and some one offers to amend the amendment. The amendment is amended, and then the question pending before the Senate is, Shall the Senate agree to the amendment as amended?

If the action on the amendment to the amendment settled the question, and it could be amended no further, why should we vote on it again? When they substituted the 35 per cent for 40 per cent, why was that not final, if that is the only action the Senate can take? Why should we go through the formality of taking two votes instead of taking only one?

I contend that that is not final, and that after the amendment to the amendment has been agreed to it is open to further amendment, and that is conceded by the argument of the Senator from Massachusetts [Mr. LODGE] to-day, when he says that in certain cases the amendment carrying the greater amount should be presented first.

But, Mr. President, as the Senator from Nevada has just pointed out, the pending amendment is not a question of changing figures. The figure "35" was voted on by the Senate as an amendment to an amendment. Now, the Senator from Nevada proposes to change the manner of taxation, to substitute for an ad valorem rate of 35 per cent, a specific rate of so much per pound. Mr. President, that is an entire change in the form of taxation. It is an entire difference in theory. On some articles it is found that it is better to levy a specific rate of so much a pound. On other articles it is found that it is more advantageous from a revenue collection standpoint to levy an ad valorem rate, and let the rate follow the substance in value.

Now, to say that when the Senate agrees to the proposition of amending an amendment as to amount it ends the right of action by the Senate to say that we will not have an ad valorem rate, but we want to tax this commodity under a specific rate, it seems to me avoids all opportunity for amendment or debate. I do not charge Senators on the other side with attempting to gag the Senate, because I know that is not their purpose. They have become weary and tired of the long drawn out fight on the tariff which always comes in the Senate. When the present law came over from the House, it came before the 1st of May and it went to conference, I think, on the 22d day of September; at any rate late in September. Then the political situation was reversed. The same thing happened with reference to the Payne-Aldrich law, and every other tariff bill that has come from the House. It tries the patience of us all, but that does not mean that there is an effort to filibuster or unduly delay.

Mr. SHEPPARD. Mr. President, may I ask the Senator a question?

Mr. UNDERWOOD. Certainly.

Mr. SHEPPARD. Does the Senator think there ought to be a rule against amendments in the third degree?

Mr. UNDERWOOD. Yes; I think so, because otherwise it would bring confusion; but I was coming to that question. I have heard here repeatedly when an amendment was pending to a committee amendment and another amendment was offered some one say, "That is an amendment in the third degree and you can not offer it now," and the Chair would reply, "When the pending amendment to the amendment is voted on, then the Senator can offer his amendment as an original proposition."

Mr. SHEPPARD. It can be voted down and——

Mr. UNDERWOOD. Whether the first amendment is voted down or agreed to, it does not settle the question. I ask the Chair to bear with me for a moment because I am very earnest about the matter. I am not arguing from the standpoint of political debate. I fear that if the ruling of the Chair on the amendment proposed by the Senator from Nevada to change this rate from an ad valorem to a specific rate is sustained by the Senate, it will become a precedent that will not only hamper us in the consideration of this bill, but in all future efforts of the Senate to express its own viewpoint when someone can propose an amendment and get a majority to vote for and cut off the consideration of other amendments. That is not in accord with the present ideas of the Senate so far as its rules are concerned.

Mr. SIMMONS. Mr. President, will the Senator yield?

Mr. UNDERWOOD. Certainly.

Mr. SIMMONS. Under this ruling I do not mean to say that the chairman of the Finance Committee would, but he could come in every morning and, if an item were called, he could offer to reduce the rate 1 cent and have a vote on it and no one else could then move to reduce it any further until the bill got into the Senate.

Mr. UNDERWOOD. Undoubtedly. I want to call the Chair's attention to one or two items which this would affect.

The House in one of the paragraphs of the bill fixed a rate of 10 per cent on graphite. The Senate committee struck that out and in place of it inserted a paragraph providing 10 per cent on amorphous graphite and 20 per cent on crystalline graphite and other provisions in the amendment. The Senator from Michigan [Mr. TOWNSEND] some days ago announced that he thought this ought to go on the free list, and when the time came, thinking there would be a time, that he proposed to move to strike out the action of the committee and to put the item on the free list. If the Chair holds, because that amendment has been adopted in place of the House text, that it is not subject to further amendment, how can we strike it out and place it on the free list?

Let me call attention to another item. The Senate adopted an amendment to the iron and steel schedule in paragraph 301. The House had scrap iron and pig iron taxed at $1.25 a ton, but in order to lower the duty on scrap the Senate committee inserted the words "$1.25 per ton" after pig iron and then changed the rate on scrap iron. That has been agreed to by the Senate, not merely amending an amendment, but as amended it has been agreed to by the Senate. Yet I stated when that question was under debate that when the proper time came I would move to strike out the rate entirely and to place it on the free list.

Now, is that rate adamant, and can it not be changed? Of course, the reason why I could not move to put it on the free list the other day was because, through courtesy to the chairman of the committee, we had granted him the right to have the committee amendments considered first. Of course, we could have objected and insisted on having all amendments considered in confusion, but he asked for his own purposes that only committee amendments be first considered. When we voted in the rate of $1.25 upon the pig iron under the pending agreement in the Senate, I could then go no further, but I gave notice that when the proper time came I desired to strike out $1.25 and put the article on the free list. I can not see much difference between striking out "35" and making it "15" and striking out "$1.25" and making it nothing.

I think if the Chair sustains the point of order—and I do not say this in criticism either of the Chair or the other side of the Senate—the effect of what it will do in reference to the bill will be to gag the Senate in its effort to really express its viewpoint. I do not care to offer any amendment by courtesy of the other side—not that I object to their courtesy. The other side of the Chamber has always treated me with great courtesy, and I appreciate it, but when I am on the battle line fighting I do not want to fight by leave of my opponent. I want the privilege of fighting on my own feet. When the time comes, if the Chair shall sustain this point of order, then anybody on the other side of the Chamber would have the right, when I move to strike out "$1.25" and put the product on the free list, to say, "I make the point of order that that rate has been adopted, that it is adamant, and it can not now be changed." Then we would have to go to the country that way. I realize on this particular bill it would not make any difference. Of course, I know the majority side of the Senate are going to keep the bill

as it is, but I think I am entitled to the right, when the time comes, to test the sentiment of the Senate and to go to the country on it. That is the purpose of these amendments. This is a great issue. There has been a vast change of sentiment in the country in regard to customs legislation, and that question is going to the country in the approaching campaign. Senators on both sides of the Chamber have a right to have the roll called on their amendments so that all Senators may be put on test as to their position. That is one of the rights of the minority even under the House rules. I served under Mr. Reed when he was called the Czar of the House, and yet I have never known the time when Tom Reed, of Maine, denied the right to the minority to propose an amendment in an instance of this kind and to have a vote on it. He cut off debate; he cut off dilatory tactics; but on the fundamental question of presenting their viewpoint to the country the minority had the opportunity to do that; yet this ruling, if insisted upon, will undoubtedly deprive the minority of the opportunity of making the test before the country on very material questions, involving many amendments more material than the question of whether or not pig iron should be on the tax list at $1.25 a ton or on the free list. In this instance the motion involves not merely the changing of the rate, but it goes to the question of whether or not this article of wire shall be taxed at an ad valorem rate or at a specific rate. That is the real question which is involved in the controversy.

Mr. McCUMBER. Mr. President——

The VICE PRESIDENT. Without objection, the Senator from North Dakota will proceed.

Mr. McCUMBER. Mr. President, in the 23 years during which I have been a Member of the Senate I do not think there has ever been a single instance where the Senate has directly voted to change a rate after striking out a particular rate and inserting something else except upon a reconsideration of the vote by which in the first instance the rate was agreed to or by unanimous consent.

Mr. PITTMAN rose.

Mr. McCUMBER. Just let me finish the sentence. It will only take a minute. I want to make this point clear.

The Senator from Alabama [Mr. UNDERWOOD] has tried to argue that under the ruling of the Chair the minority will not get its rights. The right of the minority is to have a vote upon the question which is presented; and if that question does not present the contention in the right way the minority have, or any Senator has, a right to argue that that ought to be voted down so that they may offer an amendment fixing some other rate.

As the amendment came into the Senate it proposed to fix 40 per cent ad valorem as the rate; a motion was made to strike out "40" and to insert "35." That motion brought that specific point before the Senate for its decision. Those who wanted 15 per cent could argue to the Senate and say, "Let us vote down the 35 per cent rate so that we may offer an amendment providing for a 15 per cent." If they succeeded in convincing the majority that the rate ought not to be 35 per cent, they could then offer their amendment proposing to fix the rate at 15 per cent. While we were discussing the amendment proposing to fix the rate at 35 per cent, they could have argued that, instead of an ad valorem rate of 35 per cent, there should be a specific rate of 1½ cents a pound. They had the right to argue that and to present that as one of the reasons why 35 per cent should not be adopted as the rate. In this case they did that; at least, some Senators argued the point, and there was put directly to the Senate the question, Shall we adopt 35 per cent ad valorem rather than the other rate?

Mr. UNDERWOOD. Will the Senator allow me to interrupt him for just a moment?

Mr. McCUMBER. I yield.

Mr. UNDERWOOD. I will not take much of the time of the Senator. The Senator says that we have a right to a vote, but that is not what I am contending for. Of course we have a right to a vote; nobody can change that; the right, according to the Senator's contention, is to vote on our adversary's amendment—in this case the Republican amendment—but we have got more than that. We are entitled to a vote on our proposal as to what is right as well as on the Republican proposal; and that is what this ruling will cut us off from. It cuts us off from presenting our proposal and having a vote on it. That is what I contend for. Under any parliamentary law, unless under an automatic gag rule such as is sometimes adopted in the House of Representatives by special rule from the Rules Committee, the minority has the right to present its viewpoint and to have a vote on it. This ruling, however, would cut that off.

Mr. McCUMBER. I should like to have the Senator from Alabama present to me a single instance in the whole history of the Senate where the Senate has ever taken that view. The correct view is that we must some time settle a question. If when the Senate has settled that a rate shall be 35 per cent some Senator may move that it be 15 per cent, and after the proposition to make it 15 per cent has been carried the matter is still not conclusive, but some other Senator may then move to make the rate 15.01 per cent, and the vote on that is not conclusive, we may vote on 10,000 different motions, and none of them will be conclusive.

Mr. President, that is not correct parliamentary law. The Senate has a right to vote down a proposed amendment, and then any Senator has a right to propose another; but the right does not exist first to vote in an amendment as a body and then attempt to vote it out again, and to do that as many times as any Senator desires to raise the question. In this case Senators on the other side of the Chamber had their day in court; they will have it twice in this case, because in the Senate they will have the right to another vote. If the committee amendment is not right and it is believed that the rate should be 1¼ cents per pound, Senators may still vote on it again when the bill reaches the Senate from the Committee of the Whole.

Mr. UNDERWOOD. The Senator from North Dakota has stated that he would like to know where I find any precedent for saying that the minority have a right to present their viewpoint.

Mr. McCUMBER. Oh, they have that right, of course.

Mr. UNDERWOOD. I know of no precedent in the Senate heretofore where it has ever been contended that the minority did not have the right to present their viewpoint and to take a vote on it.

Mr. McCUMBER. That is not the question. The question is whether or not the Senator can find a precedent to the effect that where we have adopted a specific amendment, then we can immediately knock that out and put something else in its place.

Mr. UNDERWOOD. Does not the Senator from North Dakota recognize the difference between a specific rate and an ad valorem rate? The pending motion is to strike out an ad valorem rate and to insert a specific rate.

Mr. McCUMBER. But the question the Senate voted on was to insert a 35 per cent ad valorem rate. That is not a specific rate.

Mr. UNDERWOOD. Then the Senator admits what I contended a while ago, that if the ruling is correct, and if a paragraph has been amended and the amendment has been agreed to, when we go into the Senate and the time comes to offer amendments we can not do it. We are permitted——

Mr. McCUMBER. Oh, yes; you can, or you can vote down our amendments. Of course, if you can not vote down our amendments, you are not entitled to have a different amendment adopted.

Mr. UNDERWOOD. Of course, then you apply the gag rule. The minority has no rights that it can exercise when it has got to outvote the majority, because it has not got a majority.

Mr. McCUMBER. The Senator from Alabama might as well say that a majority vote is a gag rule, because it settles the question; but that is not gag rule.

Mr. UNDERWOOD. Not at all.

Mr. McCUMBER. It is majority rule.

Mr. UNDERWOOD. I contend that in this body the minority has a right to present its position to the country and to have a vote on it. But if this ruling is correct, as enlarged by what the Senator from North Dakota has just admitted, then, in the case of graphite, for instance, because an amendment has been adopted, when we get through the committee amendments and have an opportunity to offer amendments ourselves we are precluded because the Senate by a majority vote has already acted on it. There is nothing of that kind in the rule. Of course, the majority can always adopt its proposition; a majority can always do that; and the rules are no defense of or protection to the minority whatever.

Mr. McCUMBER. Of course, we can not change the 10 per cent that has been put in unless when the bill gets into the Senate the amendment is disagreed to, but when the amendment is disagreed to any other amendment may be offered.

Mr. PITTMAN. Mr. President——

The VICE PRESIDENT. Without objection, the Senator from Nevada is recognized.

Mr. PITTMAN. Mr. President, I think the whole difference arises over the question as to what we are considering. We are considering House bill 7456, and the Senate has adopted no amendment to House bill 7456. That is all there is to it. If by a vote the Senate had adopted the amendment under consideration, then the ruling that is urged by the Senators on the other side would be good. If we should adopt the pending

amendment, which is the committee amendment, as amended, after that we could not change it in the Committee of the Whole, but we are not in that position. I think all of the citations have been based upon the supposition that the Senate has amended the bill under consideration. The Senate has not amended the bill under consideration; that is the very question before the Senate now: Shall we amend House bill 7456? Senators on the other side insist the Senate has already acted, whereas it has not acted. A majority of this body may vote not to amend the House provision. There is nothing at all so far acted upon by the Senate, they have merely expressed themselves as preferring 35 per cent to 40 per cent; that is all. There has not been an amendment to the bill under consideration with reference to this particular item.

Just before this whole parliamentary situation arose the Chair stated, "The question is now upon the committee amendment as amended." The question at that time was whether we would amend the House bill which was before us for consideration; but the Senate has never had a chance to vote on that question, and never has voted on it.

The vote on the amendment of the Senator from Utah was not a vote on an amendment to the bill under consideration; it was simply an expression of preference on the part of the Senate that they would rather have a rate of 35 per cent than a rate of 40 per cent as an amendment to the House bill; but it has not been acted on. The Senate has merely expressed its preference for 35 per cent over 40 per cent. I offered an amendment testing the sentiment of the Senate to see whether it would not rather have a rate of 1 cent per 10,000 pounds than 35 per cent ad valorem.

However, the Senator from Alabama covered every question I desire to cover in connection with this matter. I simply did not desire the argument of the Senator from Massachusetts to go without a word from me. I do not think there is any question that if House bill 7466 had been amended by the vote of the Senate we could not change the amendment in Committee of the Whole, because it would be the action on the bill under consideration whenever it reached that point, but it has not reached that point, and that is the difference that I think exists now between the proponents of the two constructions of the parliamentary rules.

Mr. SIMMONS. Mr. President, may I interrupt the Senator?

Mr. PITTMAN. Certainly.

Mr. SIMMONS. Mr. President, it seems to me that about all we have done by the vote we have taken is to permit the committee which brought in the bill to modify their amendment. Ordinarily, the mover of an amendment has a right to modify it at any time before a vote is taken upon the amendment. The committee brought in an amendment providing for a rate of 40 per cent, but the committee before action by the Senate asked the Senate for permission to change that amendment from 40 per cent to 35 per cent.

Mr. LODGE. Mr. President——

Mr. SIMMONS. Just a moment, please. Ordinarily that is done by unanimous consent; but we seem to have done it in this case by a vote. The amendment which is now pending is the committee amendment, which, with the consent of the Senate, has been changed from 40 per cent to 35 per cent.

I am not discussing the parliamentary situation, because I do not profess to be a parliamentarian. I am simply looking at it from the standpoint of ordinary logic and what seems to me to be common sense. We are in this situation: If this practice is to prevail here the committee in charge of this bill, with 2,000 amendments pending, can practically cut off all opportunity on the part of any Senator on either side of the Chamber to offer and secure a vote upon any amendment whatever. They can come in each morning and as an item is reached they can move to amend by slight increase or a slight reduction in the rate, and then an amendment to that would be held to be an amendment in the third degree and therefore incompetent. The result would be that no Senator would have an opportunity to offer an amendment at all.

I think that would be a very unfortunate situation, especially in connection with a bill carrying 2,000 amendments; and yet that would necessarily follow if every time the committee wants to change an amendment proposed by it we must take a vote, and when we take a vote as between the original proposition of the committee and the substitute proposition of the committee we can take no other vote. Therefore we are confined absolutely to select one or the other of the rates proposed by the committee. I do not see any justice or common sense in that proposition.

Mr. PITTMAN. Mr. President, the Senate has under consideration House bill 7456. It is a tariff bill; it came over to the Senate; it has been reported to the Senate, and the committee reporting it here has recommended certain amendments. The amendment under consideration is one of them, but it has not yet been adopted by the Senate. Whenever it is adopted by the Senate, the parliamentary rules read by the Senator from Massachusetts apply, but not until then. At the present time the Senate has done nothing except to consider what amendments it will accept in lieu of certain provisions of House bill 7456; that question we have not decided as yet; the Senate has only decided that it prefers, in this instance, a 35 per cent ad valorem rate to a 40 per cent ad valorem rate. I have asked the Senate by my amendment if they would not prefer to have a specific duty to an ad valorem duty. If they should adopt the amendment that I have offered, it would not yet be an amendment to the bill; it would only be a proposal to the bill. The vote of the Senate adopting the amendment of the Senator from Utah, making it 35 per cent instead of 40 per cent, does not affect H. R. 7456, the bill we have under consideration. It has not been adopted as a part of the bill. It was only adopted as a suggestion to be offered as an amendment, but the Senate has not yet voted on it.

I have offered another suggestion to the Senate to see whether they would not prefer a specific duty of so much a pound to an ad valorem duty of 35 per cent. We certainly should have a right to decide that question before the amendment is offered as an amendment to the bill under consideration, because undoubtedly after we adopt the amendment to the bill under consideration that ends it. That is the very reason why we should have the right, and that is the very reason of the rule that an amendment may be amended before it is offered to a bill. If that is not done, we get into this parliamentary inconsistency that everyone admits.

There was no intention on the part of the framers of the rules governing legislative bodies that any such absurd proposition should arise. Of course, the Senator from Massachusetts [Mr. LODGE] is absolutely right when he states that the Senate once having adopted an amendment to a bill, the vote on that question should end; but he knows that we have not adopted any amendment to the bill. We are only acting on what amendment we will adopt to the bill. It has been said that the Senate has acted on the amendment of the Senator from Utah, reducing the rate from 40 to 35 per cent. It has not. There never was a 40 per cent ad valorem rate in the bill, and it is not there now. It was 20 per cent ad valorem, and it is unchanged in the bill that we have under consideration. The committee proposed to raise it to 40 per cent. The Senate proposed, by adopting the Smoot amendment, to raise it to 35 per cent, and the Senate has not acted on either one of them, and to-day the rate stands in the House bill which we are now considering as 20 per cent. Meanwhile, before we have acted upon the House bill, I propose to the Senate to substitute, instead of 35 per cent ad valorem, a specific duty of 1 cent for every 10,000 pounds. The Senate has had no opportunity to vote on that subject. It is an entirely different question from any that it has had under consideration, and yet it is claimed that under the rules we can not bring that to the consideration of the Senate, that we can not reduce the 35 per cent, and that the Senate must now stop thinking. That is the whole situation.

No such thing was ever anticipated in the rule. Not only that, but the very rule which the Senator from Kansas [Mr. CURTIS] cited—he did not cite it all—goes on and says, further:

> After A is inserted, however, it may be moved to strike out a portion of the original paragraph, comprehending A, provided the coherence to be struck out be so substantial as to make this effectively a different proposition.

The Senator from Kansas did not read that, of course.

Mr. McCUMBER. The Senator from Kansas admits that. We all admit it. The Senator can reach just what he wants by first sustaining the Chair, and then he can add, after the "ad valorem," if he wants to, "not exceeding 1 cent per 10,000 pounds."

Mr. PITTMAN. Oh, but this rule says that you may strike out certain parts of it, comprehending the A that you put in, the 35 per cent.

Mr. McCUMBER. It does not say that you can strike out A, though.

Mr. PITTMAN. I will read it again to the Senator.

> After A is inserted, however, it may be moved to strike out a portion of the original paragraph, comprehending A, provided the coherence to be struck out to be so substantial as to make this effectively a different proposition.

Mr. McCUMBER. Yes; but it does not say that you can strike out A.

Mr. UNDERWOOD. It says "comprehending A."

Mr. McCUMBER. The whole paragraph that comprehends A, but not the amendment itself.

Mr. PITTMAN. Apparently, without a vote on this matter, we are to be bound not to consider further whether the duty shall be ad valorem or specific, just because the Senate has recommended by a vote that "35" be offered as an amendment to the House bill instead of "40." That is where we stand. The Senator from Massachusetts was entirely right Saturday, when he said that we were not dealing with an amendment to the bill under consideration, but we were considering solely what we should offer as an amendment to the bill. That is the whole problem.

It is said that it is an endless proposition. What has that to do with it? We have endless debate in this body, too—unlimited debate. We have never tried to limit debate here so far. I do not know whether we will or not. In the House, except for the rule providing for calling for the previous question, Members could go on offering amendments without limt. There is no doubt of that.

Mr. LODGE. If the amendment is rejected, that can be done.

Mr. PITTMAN. Here, however, we have a rule which says that an amendment in the third degree can not be offered. That means this:

The Senate committee offers an amendment to the House bill to raise the rate from 20 per cent to 40 per cent. The Senator from Utah offers an amendment to the amendment of the committee making it "35" instead of "40." Under ordinary circumstances, the minority would have the right to offer 15 per cent in lieu of the 35 per cent offered by the Senator from Utah; but we are debarred from doing that under the rule that it is in the third degree, and we can not go that far. We are debarred from getting any remedy in that way; and having debarred us from getting the remedy in that way, you say that having voted on the second amendment, which is better than the first amendment, we are forever stopped from going any further.

That might be true if the second vote were on an amendment to the bill, but it is not on an amendment to the bill. The very question that is pending now before the Senate, outside of this parliamentary question, is whether or not we shall adopt the Smoot amendment as a substitute for the House provision. If we do adopt the Smoot amendment as a substitute for the House provision, then the parliamentary rule that the Senator from Massachusetts raised applies. The only difference between us is that the parliamentary rule applies to an amendment to the question under consideration, which is a bill originating either here or in the other House. It does not apply to the perfection of an amendment offered to the bill.

The VICE PRESIDENT. The question is, Shall the decision of the Chair stand as the judgment of the Senate? On this question the yeas and nays have been ordered. The Secretary will call the roll.

The Assistant Secretary proceeded to call the roll.

Mr. FRELINGHUYSEN (when his name was called). I transfer my general pair with the Senator from Montana [Mr. WALSH] to the Senator from Oklahoma [Mr. HARRELD], and will vote. I vote "yea."

Mr. JONES of New Mexico (when his name was called). I transfer my general pair with the Senator from Maine [Mr. FERNALD] to the Senator from Missouri [Mr. REED], and ask that this transfer may stand for the day. I vote "nay."

Mr. McCUMBER (when his name was called). I transfer my pair with the junior Senator from Utah [Mr. KING] to the junior Senator from Maryland [Mr. WELLER], and will let this announcement of transfer stand for the day. I vote "yea."

Mr. CURTIS (when Mr. NORRIS's name was called). I have been requested to announce the absence on official business of the Senator from Nebraska [Mr. NORRIS].

Mr. SUTHERLAND (when his name was called). I transfer my general pair with the senior Senator from Arkansas [Mr. ROBINSON] to the junior Senator from Oregon [Mr. STANFIELD], and will vote. I vote "yea."

Mr. WARREN (when his name was called). I have a general pair with the junior Senator from North Carolina [Mr. OVERMAN]. In his absence I transfer that pair to the senior Senator from Pennsylvania [Mr. CROW] and ask that that transfer may stand for the day. I vote "yea."

Mr. WATSON of Georgia (when his name was called). I transfer my general pair with the Senator from Arizona [Mr. CAMERON] to the Senator from Texas [Mr. CULBERSON], and will vote. I vote "nay."

Mr. WILLIAMS (when his name was called). I transfer my pair with the Senator from Indiana [Mr. WATSON] to the Senator from Nebraska [Mr. HITCHCOCK], and will vote. I vote "nay."

The roll call was concluded.

Mr. CURTIS. I desire to announce the following pairs:

The Senator from New York [Mr. CALDER] with the Senator from Alabama [Mr. HEFLIN];

The Senator from Rhode Island [Mr. COLT] with the Senator from Florida [Mr. TRAMMELL];

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN]; and

The junior Senator from Ohio [Mr. WILLIS] with the senior Senator from Ohio [Mr. POMERENE].

Mr. HALE. I transfer my pair with the senior Senator from Tennessee [Mr. SHIELDS] to the junior Senator from Delaware [Mr. DU PONT] and vote "yea."

Mr. ERNST. I transfer my general pair with the senior Senator from Kentucky [Mr. STANLEY] to the senior Senator from New Hampshire [Mr. MOSES] and vote "yea."

The roll call resulted—yeas 37, nays 22, as follows:

YEAS—37.

Ball	Gooding	McLean	Poindexter
Broussard	Hale	McNary	Rawson
Bursum	Johnson	Nelson	Smoot
Capper	Jones, Wash.	Newberry	Spencer
Curtis	Keyes	Nicholson	Sterling
Dillingham	Ladd	Norbeck	Sutherland
Elkins	Lodge	Oddie	Warren
Ernst	McCormick	Page	
France	McCumber	Pepper	
Frelinghuysen	McKinley	Phipps	

NAYS—22.

Ashurst	Harris	Pittman	Underwood
Brandegee	Harrison	Ransdell	Walsh, Mass.
Caraway	Jones, N. Mex.	Sheppard	Watson, Ga.

Culberson	King	Robinson	Weller
Cummins	Lenroot	Shields	Williams
Dial	McKellar	Shortridge	
du Pont	Moses	Stanfield	
Edge	New	Stanley	

The VICE PRESIDENT. On this vote the yeas are 37 and the nays are 22. So the decision of the Chair stands as the judgment of the Senate.

APPOINTMENTS BY EXECUTIVE ORDER.

Mr. HARRISON. A parliamentary inquiry, Mr. President.

The VICE PRESIDENT. The Senator will state his inquiry.

Mr. HARRISON. On March 16 I offered a resolution in the Senate calling on the President of the United States "to furnish to the Senate the name of every person appointed by Executive order since March 4, 1921, whose appointment is by such order excepted from the civil-service rules, and to furnish to the Senate the reasons therefor."

There was discussion upon the resolution on several occasions, and on the legislative day of April 20, the calendar day of April 24, the resolution unanimously passed the Senate, calling on the President for that information.

I thought at that time that a great many of these appointments had been made by Executive order, in post offices and various other places, but I assumed that 10 days would be a reasonable time in which to make a response to the resolution. Notice was served on the President, I take it, some five weeks ago to get the information. There has been no answer up to this good hour. So my parliamentary inquiry is, How long must the Senate wait to get that information?

Of course, if there are so many of those appointments by Executive order that it would take six months to get the information, that may be a reasonable excuse for making the Senate wait, but I submit that five weeks after the request was made for that information the President should send it to us. I know that a great many important problems are at his desk to be solved. I know that there are many engagements which are pressing upon him which he must fulfill, social, political, and otherwise. I know that at times he must necessarily glide down the waters upon the *Mayflower* to keep up his associations with his friends. But this is a matter of importance. The country is interested in knowing how many Executive orders have been promulgated by the President, how many persons have been appointed in this country since the 4th of March through Executive order, and five weeks' time is enough, it seems to me, in which to formulate the data and send it to the Senate. So my parliamentary inquiry is, If the Vice President does not think it is long enough?

THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

The VICE PRESIDENT. The question is on agreeing to the committee amendment as amended.

Mr. SIMMONS. The vote we are about to take is upon the adoption of the rates proposed by the committee as amended.

The VICE PRESIDENT. It is. The Secretary will state the amendment as amended.

The ASSISTANT SECRETARY. The question now is upon striking out "30" and inserting "35" on page 60, line 16, so as to read:

Wire rope and wire strand, 35 per cent ad valorem.

Mr. SIMMONS. I understand that under the ruling of the Chair it is not permissible for me to move to substitute 20 per cent for 35 per cent.

The VICE PRESIDENT. That is the decision the Senate has just made.

Mr. SIMMONS. Then I ask for the yeas and nays on agreeing to the amendment of the committee as amended.

The yeas and nays were ordered, and the Assistant Secretary proceeded to call the roll.

Mr. ERNST (when his name was called). Making the same announcement as before, I vote "yea."

Mr. FRELINGHUYSEN (when his name was called). Making the same announcement as before, I vote "yea."

Mr. HALE (when his name was called). Making the same announcement as before, I vote "yea."

Mr. WARREN (when his name was called). Making the same announcement as to my pair and its transfer as on the previous vote, I vote "yea."

Mr. WATSON of Georgia (when his name was called). Making the same announcement as before, I vote "nay."

Mr. WILLIAMS (when his name was called). Repeating the announcement of my pair and its transfer as on the last roll call, I vote "nay."

The roll call was concluded.

Mr. CURTIS. I desire to announce the following pairs:

The Senator from New York [Mr. CALDER] with the Senator from Alabama [Mr. HEFLIN];

The Senator from Rhode Island [Mr. COLT] with the Senator from Florida [Mr. TRAMMELL];

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN]; and

The junior Senator from Ohio [Mr. WILLIS] with the senior Senator from Ohio [Mr. POMERENE].

Mr. SUTHERLAND. Making the same announcement as before with reference to my pair and its transfer, I vote "yea."

The result was announced—yeas 37, nays 24, as follows:

YEAS—37.

Ball	Johnson	McNary	Ransdell
Brandegee	Jones, Wash.	Nelson	Rawson
Bursum	Kellogg	Newberry	Smoot
Curtis	Kendrick	Nicholson	Spencer
Elkins	Keyes	Norbeck	Sterling
Ernst	Ladd	Oddie	Sutherland
France	Lodge	Page	Warren
Frelinghuysen	McCumber	Pepper	
Gooding	McKinley	Phipps	
Hale	McLean	Poindexter	

NAYS—24.

Ashurst	Fletcher	La Follette	Smith
Borah	Gerry	Myers	Swanson
Broussard	Glass	Norris	Underwood
Capper	Harris	Pittman	Walsh, Mass.
Caraway	Harrison	Sheppard	Watson, Ga.
Dial	Jones, N. Mex.	Simmons	Williams

NOT VOTING—35.

Calder	Fernald	New	Stanley
Cameron	Harreld	Overman	Townsend
Colt	Heflin	Owen	Trammell
Crow	Hitchcock	Pomerene	Wadsworth
Culberson	King	Reed	Walsh, Mont.
Cummins	Lenroot	Robinson	Watson, Ind.
Dillingham	McCormick	Shields	Weller
du Pont	McKellar	Shortridge	Willis
Edge	Moses	Stanfield	

So the amendment of the committee as amended was agreed to.

MEDICAL REPORTS IN THE CASE OF CHARLES W. MORSE.

Mr. LODGE. I ask unanimous consent to have printed in the RECORD, in 8-point type, an official statement issued by the Department of Justice May 27, as published in the newspapers of Sunday, May 28, giving a summary of certain medical reports in the case of Mr. Charles W. Morse.

There being no objection, the statement was ordered to be printed in the RECORD in 8-point type, as follows:

[An official statement issued by the Department of Justice on Saturday, May 27, as published in the newspapers of Sunday, May 28, giving a résumé of certain medical reports in the case of Mr. Charles W. Morse.]

The record in the case of the commutation of the sentence of Charles W. Morse as disclosed in the official files, indicates beyond any question that Mr. Morse was released from confinement in the Federal penitentiary at Atlanta, Ga., upon reports of reputable physicians and United States Army surgeons showing him to be suffering from a serious illness. The release came as the culmination of, probably the most remarkable public demonstrations on behalf of any Federal prisoner ever convicted in the courts of the United States. Thousands of people had petitioned the Government for the pardon of Mr. Morse before action was finally taken resulting in his release on January 18, 1912, upon the medical reports of his physical condition.

Among the thousands who signed the petitions for the release of Mr. Morse were men of national reputation, many of them occupying positions of responsibility and trust under the Government itself. Despite the high character of those who thus disclosed their sympathy for Mr. Morse, it was not in response to any public demonstration, strong as that was at the time, that Mr. Morse was released, but solely upon the reports of the medical examiners. Chief among these were the distinguished officers of the Medical Corps of the United States Army, comprising an Army medical board, who found that Mr. Morse was suffering from chronic valvular disease of the heart, chronic nephritis, commonly known as Bright's disease, and slight arteriosclerosis. The officers constituting this board were Col. H. P. Birmingham, president; Maj. P. C. Fauntleroy; and Maj. F. F. Russell, recorder. This board, under date of December 30, 1911, expressed the opinion that while Mr. Morse was not in any immediate danger of death, the complication of diseases from which he was suffering was incurable and that on account of the psychic element in his case an improvement under existing conditions could not be hoped for.

So much misinformation has recently been made public with respect to the Morse case that it will be perhaps of some public interest to have at this time a brief résumé of the various proceedings in this case as disclosed in the official files. A report of James A. Finch, who at that time was, and who still is, pardon attorney of the Department of Justice, made to the Attorney General on February 20, 1911, states:

An overwhelming number of petitions and papers have been filed in this case.

Probably 20 per cent of the petitions, the report shows, asked for an investigation of the case, and if the man had not had full justice that a pardon be issued. Mr. Finch's letter states it is claimed that the petitions in Mr. Morse's case were signed by 70,000 persons, among them 429 State senators; 823 governors, mayors, and public officials; 1,675 judges and lawyers; 1,361 bankers; 865 newspaper men; 876 clergymen and physicians; and a large number of manufacturers, merchants, and business men. The petitions on file are voluminous.

Among the petitioners appearing in the lists of the official files of the pardon attorney are to be found the names of some of the most distinguished men in the country, evidence at this late date of the unusual and widespread interest then taken in Mr. Morse by people in all walks of life. Among the names listed are those of Senator Eugene Hale, of Maine; Senator Stephen B. Elkins, of West Virginia; Senator John H. Bankhead, of Alabama; Senator William O. Bradley, of Kentucky; Senator Thomas H. Carter, of Montana; Senator George E. Chamberlain, of Oregon; Senator Moses E. Clapp, of Minnesota; Senator Alexander S. Clay, of Georgia; Senator W. Murray Crane, of Massachusetts; Senator Chauncey M. Depew, of New York; Senator Charles Dick, of Ohio; Senator Duncan U. Fletcher, of Florida; Senator Frank P. Flint, of California; Senator Wiliam P. Frye, of Maine; Senator Jacob H. Gallinger, of New Hampshire; Senator H. D. Money, of Mississippi; Senator Henry B. Burnham, of New Hampshire; Senator Lee S. Overman, of North Carolina; Senator Robert L. Owen, of Oklahoma; Senator Nathan B. Scott, of West Virginia; Senator William J. Stone, of Missouri; Senator Robert L. Taylor, of Tennessee; Senator Charles A. Towne, of Minnesota, and others.

The names of a great many of the most prominent Members of the House of Representatives at that time appear as petitioners in behalf of Mr. Morse in the official files of the pardon attorney, of whom it is necessary and possible to mention only a few, including such distinguished men as John A. M. Adair, of Indiana; Joshua W. Alexander, of Missouri, afterwards a

member of the Cabinet in the administration of President Wilson; Andrew J. Barchfeld, of Pennsylvania; Richard Bartholdt, of Missouri; Charles L. Bartlett, of Georgia; Robert L. Broussard, of Louisiana; Walter P. Brownlow, of Tennessee; Edwin C. Burleigh, of Maine; Joseph W. Byrns, of Tennessee; William J. Cary, of Wisconsin; Frank Clark, of Florida; Henry D. Clayton, of Alabama; Ralph D. Cole, of Ohio; Michael F. Conry, of New York; Harry M. Coudrey, of Missouri; Charles H. Cowles, of North Carolina; Charles A. Crow, of Missouri; William A. Cullop, of Indiana; S. H. Dent, jr., and Richmond P. Hobson, of Alabama; Martin Dies, of Texas; Albert Estopinal, of Louisiana; Oscar W. Gillespie, of Texas; Carter Glass, of Virginia; Henry M. Goldfogle, of New York; George W. Gordon, of Tennessee; Thomas W. Hardwick, of Georgia; Robert L. Henry, of Texas; William Hughes, of New Jersey; Cordell Hull, of Tennessee; Ollie M. James, of Kentucky; J. Warren Keifer, of Ohio; Daniel F. Lafean, of Pennsylvania; John Lamb, of Virginia; James T. Lloyd, of Missouri; Harry L. Maynard, of Virginia; D. H. Mays, of Florida; Joseph F. O'Connell, of Massachusetts; George A. Pearre, of Maryland; John C. Floyd, Ben Cravens, and Joseph T. Robinson, of Arkansas; William W. Rucker, of Missouri; Swagar Sherley, of Kentucky; James L. Slayden, William R. Smith, and John H. Stephens, of Texas; Stephen M. Sparkman, of Florida; William Sulzer, of New York; J. Thomas Heflin, of Alabama; James M. Cox, of Ohio, and many others.

The records in this case show that despite the widespread public sympathy with Mr. Morse and the extraordinary number of petitions signed in his behalf, the action of the President was based entirely and solely upon reports of the Department of Justice and medical authorities who were called in to examine Mr. Morse.

Briefly, these examinations were made by civilian physicians and by officers constituting a special board of the medical department of the United States Army. Under date of November 1, 1911, Dr. E. C. Davis, of Atlanta, Ga., made a report to Hon. W. H. Johnson, United States marshal at Atlanta, based on an examination of Mr. Morse which he had made at Mr. Johnson's request. Doctor Davis reported symptoms indicating changes, probably indicating a beginning of Bright's disease, and said as to Mr. Morse:

I do not believe, in his present condition, with the influence of mental worry added to his physical ailments, that he would ordinarily live more than one or two years unless treated with extreme care and thoroughly protected from arduous work and exposure.

His diet ought also to be looked after carefully on account of evidences that were found of the beginning of Bright's disease.

Under the same date a report was made to Mr. Johnson by Dr. W. S. Elkin, of Atlanta, the concluding paragraph of which was as follows:

I do not believe that Mr. Morse is suffering from any serious organic trouble, nor is his health being materially affected by his present confinement. The nervous strain that he has been under for the past three years would easily account for his loss in weight. I do not think that further confinement will materially shorten the prisoner's life or permanently or seriously impair his health.

During November, 1911, constant reports were made to the Attorney General by J. Calvin Weaver, physician at the Atlanta Penitentiary under the last administration, on Mr. Morse's condition.

The Department of Justice was kept constantly advised of the condition of Mr. Morse by William H. Moyer, warden of the Atlanta Penitentiary, to whom reports were made by Maj. David Baker, post surgeon at Fort McPherson, Ga., where Morse was removed for treatment on November 26, 1911. Mr. Moyer on December 23, 1911, reported to the Attorney General, from Atlanta, by telegraph, as follows:

At 11.45 this morning Major Baker, post surgeon at Fort McPherson, telephoned the following report to me: "After four weeks' observation I believe that the physical condition (Morse's) is deteriorating. I regard his condition as very grave. I believe that further imprisonment will be injurious."

On December 28 1911, Warden Moyer was informed of the action of President Taft declining to exercise Executive clemency in the case. On the day following Mr. Moyer reported to the Attorney General by telegraph as follows:

Major Baker, surgeon of the post at Fort McPherson, reports over the telephone, at 10.47 a. m. to-day, as follows regarding the physical condition of Charles W. Morse, register No. 2814: "C. W. Morse is weaker, with more blood in his urine this morning than lately."

Under date of December 30, 1911, Major Baker reported as follows, in writing to the commanding officer at Fort McPherson, on the physical condition of the prisoner:

FORT MCPHERSON, GA., *December 30, 1911.*

REPORT OF THE PHYSICAL CONDITION OF FEDERAL PRISONER CHARLES W. MORSE.

He was admitted to this hospital the 26th of last month.

He has been examined daily since that date by the undersigned.

Diagnosis: Arteriosclerosis, with—

(a) Myocarditis, chronic ("mitral insufficiency, relative," used in my report of the 16th instant, expresses, in other words, my opinions).

(b) Renal sclerosis.

The last two are but phases in the progress of the first affection, noted when the heart and kidneys have become seriously involved.

(a) Myocarditis, chronic, is an affection of the heart muscle in which actively contracting muscle fibers are replaced by inert fibrous tissue. The progress is one of steady deterioration to a point where the heart is no longer able to empty itself, when it fails, either suddenly, with little or no premonition, or gradually, with accompanying dropsy. My statement of a relative mitral insufficiency in my report of the 16th instant was founded on the assumption of myocarditis, chronic, and was based on the physical signs which were then, as now, present, namely, a soft blowing murmur at apex of the heart, which is displaced to the left nipple line, and accentuated aortic second sound and dilatation, with loss of heart force. Myocarditis, chronic, is characterized by a higher percentage of sudden deaths than is any other chronic ailment. The general appearance of the patient is not indicative of the stage of the disease.

(b) The affection of the kidneys is a sclerosis, or contraction of the kidneys, choking out the normal tissues and replacing them with fibrous tissue which can not excrete urine. This is one of the forms of Bright's disease. It is a constant danger to the patient, as in this disease not enough urinary solids are excreted and thus eliminated from the system. In this case about two-thirds only of the normal amount has been excreted daily for a period of several weeks. This keeps the patient in danger of sudden or gradual development of uremia, which carries an enormous death rate. These dangers—sudden heart failure, from myocarditis, and uremia, from failure of the kidneys to eliminate—are constant in this case and can not, with due regard for the medical authorities, be minimized. The urine of this patient is not only decreased but it daily contains blood, and usually casts and albumen.

Other dangers of arteriosclerosis are the apoplexies, particularly the cerebral form.

Present condition: The patient is extremely weak, sitting up in bed only when propped for a short time—has not exceeded one and one-half hours at one time—when he complains of vertigo and faintness. His heart has lost force and its action is irregular. His circulation is poor. His kidneys do not eliminate sufficiently.

Prognosis: This malady is incurable. It is spoken of in the singular for the reason that his affections constitute one affection—arteriosclerosis—with special involvement of the heart and kidneys. In my opinion, he has not very long to live. This is rather indefinite, I realize, but forecasts of death in chronic disease are, at best, only approximations. That death comes on very suddenly in a large per cent of this disease is of itself enough to stamp it as one of the very gravest chronic affections known. As a life-insurance risk I would not recommend this patient for the short period of 30 days. His sudden death is constantly probable.

Effect of further imprisonment: All authorities are one in agreement that mental strain and worry aggravate this disease. For that reason, supporting my knowledge of the case, I unhesitatingly state that further imprisonment will be injurious if not speedily fatal. I have set forth my views of this case at some length for the reason that my previous reports may not have been full enough, though I thought them clear.

DAVID BAKER,
Major, Medical Corps, United States Army.

Under date of December 30, 1911, Surg. Gen. George H. Torney, of the United States Army, submitted to The Adjutant General of the Army the report of the board of medical officers which was sent to Fort McPherson, Ga., to investigate the physical condition of Charles W. Morse. This report is more than four typewritten pages in length, and comprises a complete diagnosis of the condition of Mr. Morse. The report sets forth that the urine had shown blood in diminishing quantities since admission and always more or less albumen, the amount at that time being not much more than a trace; that at Fort McPherson the prisoner had never been unconscious, although it had been reported by the prison authorities that he was, following the appearance of blood in the urine while in the prison. The report then concludes:

"From careful consideration of the history and the examination made the board is of the opinion that Charles W. Morse is suffering with chronic valvular disease of the heart, chronic nephritis—commonly known as Bright's disease—and slight arteriosclerosis. He has recently had a severe acute conges-

tion of the kidney, due probably to an infarct—the result, in all probability, of a cardiac embolus lodging in the kidney—during which he passed and still passes blood in his urine, although in diminishing quantities.

"The board is further of the opinion that, under the conditions surrounding him at present, there is not any immediate danger of death, but the complication of diseases from which he is suffering is incurable, and that on account of the profound psychic element in his case an improvement under existing conditions can not be hoped for.

"The most favorable place for treatment would be where he could have the full benefit of a well-equipped hydrotherapeutic establishment such as Hot Springs, Ark., and if he were in the military service the board would recommend that he be sent there.

"H. P. BIRMINGHAM,
"*President, Colonel, Medical Corps.*
"F. F. RUSSELL,
"*Recorder, Major, Medical Corps.*
"P. C. FAUNTLEROY,
"*Member, Major, Medical Corps.*"

In his letter transmitting this report, Surgeon General Torney said:

"The board returned from Fort McPherson yesterday and handed its report to me this morning. In view of the clear and nontechnical language in which this excellent report is written, no interpretation of it by this office seems to be necessary. It may be said, however, that it is the opinion of the board, in which I concur, that in view of the mental depression of the prisoner, all recuperative power being in abeyance, no improvement under existing circumstances can be hoped for; his death may be expected unless the depressing influence of confinement be removed."

ROCK RIVER BRIDGE.

Mr. JONES of Washington. I have two bridge bills to report from the Committee on Commerce for the Senator from New York [Mr. CALDER]. The Senator from Illinois [Mr. MCKINLEY] is very much interested in having the bills passed promptly, and I shall ask unanimous consent for their present consideration. They are just the ordinary bridge bills.

From the Committee on Commerce I report back favorably without amendment the bill (H. R. 11408) granting the consent of Congress to the county of Winnebago and the town of Rockton, in said county, in the State of Illinois, to construct, maintain, and operate a bridge and approaches thereto across the Rock River, in said town of Rockton. I ask that the bill be put upon its passage.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, and it was read, as follows:

Be it enacted, etc., That the consent of Congress is hereby granted to the county of Winnebago and the town of Rockton, in said county, in the State of Illinois, to construct, maintain, and operate a bridge and approaches thereto across the Rock River, at a point suitable to the interests of navigation, in said town of Rockton, county of Winnebago and State of Illinois, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

FOX RIVER BRIDGE.

Mr. JONES of Washington. From the Committee on Commerce I report back favorably without amendment the bill (H. R. 11409) granting the consent of Congress to the city of Ottawa and the county of La Salle, in the State of Illinois, to construct, maintain, and operate a bridge and approaches thereto across the Fox River, and I ask unanimous consent for its present consideration.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, and it was read, as follows:

Be it enacted, etc., That the consent of Congress is hereby granted to the city of Ottawa and the county of La Salle, in the State of Illinois, their successors and assigns, to construct, maintain, and operate a bridge and approaches thereto across the Fox River at a point suitable to the interests of navigation at or near Main Street, in the said city of Ottawa, in accordance with the provisions of an act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

ATTORNEY GENERAL DAUGHERTY—THE MORSE CASE.

Mr. CARAWAY. Mr. President, it seems the Attorney General, Harry M. Daugherty, and Charles W. Morse have gone to sea. The papers so inform us. If it would not be offensive, I should like to know if they are going outside the 3-mile limit to settle their differences about whether Morse paid Daugherty his fee. The Attorney General went to sea with the President on Saturday, and Mr. Morse, with his son, according to the dispatch in the morning papers, either sailed Sunday or was to sail on that day. There may be, of course, nothing in the fact that they chose the same time to leave the country. So far as the American people are concerned, there is not much concern when they shall return.

But before the Attorney General gets entirely outside the sphere where we may communicate with him I want to call attention to one fact. In his letter of the 26th instant, written to the Senator from Indiana [Mr. WATSON], he uses this language:

I never received anything from Mr. Morse personally. All I ever received from anybody in connection with the Morse cases, both civil and criminal, was about $4,000 advanced to me by Mr. Felder, and was about half enough to pay my necessary expenses and disbursements connected with over a year's active investigation, preparation, and service in the cases.

It has been said, and I rather think it is true, that there is none so poor a witness as a lawyer. He usually mixes his facts. The Attorney General, Mr. Daugherty, made his contract with Mr. Morse for "services" to be rendered on the 4th day of August, 1911. Morse's sentence was commuted on the 18th day of January, 1912. Therefore, the entire period covered by the employment was five months and two weeks, and not "over a year," as stated by the Attorney General. Of course these are little inaccuracies, as was the Attorney General and the Senator from Indiana misunderstanding each other. The Attorney General wrote the Senator from Indiana [Mr. WATSON] and said: "You misunderstood me. I never said I did not have anything to do with the Morse case." And "you did not understand me to say I did not get anything for my services," although the Senator from Indiana was positive about both of those statements.

The Senator from Indiana has vindicated the good opinion I entertain of him, because he is quoted under a Rushville, Ind., headline of May 27 as saying this:

Attorney General Harry M. Daugherty and I understood each other perfectly.

That is, when the Attorney General states to the Senator from Indiana, "You did not understand me," the Senator from Indiana answers, "I understood you perfectly." That, if it means anything at all, means "you said just what I said you said." When the Attorney General and Mr. Morse went to sea to settle their differences, they ought to have included the Senator from Indiana, and let him have a chance likewise to adjust misunderstandings. I am pleased, however, to say that the Senator from Indiana has done what I thought he would do. He is standing up like a man and saying, "The Attorney General told me what I said the Attorney General had told me." That is, that the Attorney General said he had absolutely nothing to do with the Morse case and never received a penny in connection with it.

There is another feature of this particular case to which I want to call attention. Sunday there appeared in the papers a statement from the Department of Justice. Incidentally, I understand that a local paper has loaned the defendant a reporter to be its publicity agent during this controversy. I do not know who pays him. However, there appeared a statement disclosing a very large number of very reputable men and women who had signed the petition for Morse's release. Unfortunately for any effect that it may have been expected to have, Mr. Daugherty and former Attorney General Wickersham, as well as Charles W. Morse himself, the three men most interested in the transaction, are all on record as saying that the petition had absolutely nothing to do with the granting of the commutation of sentence.

I read from the letter of the Attorney General, Mr. Daugherty, appearing under date of May 26, in which he said this:

Morse was released upon the recommendation of Attorney General Wickersham, who based his recommendation upon the reports of eminent physicians of the Government, including the Surgeon General of the Army, and the records in the department show all the facts pertaining to the physical condition of Morse when he was released, which was the sole ground for Executive clemency.

Now, therefore, all of the names of the gentlemen who signed the petition of Morse under a representation that Morse was about to die, and all this great demonstration that the local

paper said was had in behalf of Morse, are shown by the letter of the person chiefly responsible for Morse's release, Mr. Daugherty, to have had nothing to do with his release because he said he was released solely on the showing made as to his health.

Under date of May 21 the press reported that—

Mr. Wickersham added that Mr. Morse was "perfectly truthful" in his statement published to-day, in which Morse said that the commutation of his sentence was due solely to President Taft and Mr. Wickersham, acting on the report of doctors who examined Mr. Morse.

Therefore, these petitions which Daugherty has thrown out as a buffer are shown by the statement of Attorney General Harry M. Daugherty and former Attorney General Wickersham to have had nothing to do with the commutation of sentence. On May 4 I received a telegram from Charles W. Morse—I shall not burden the Senate by reading it all again—in which he made this statement:

If the press has correctly quoted you, you have been misinformed regarding my physical condition at Atlanta at present time. The commutation accorded me was based wholly on my physical condition.

The three men who had most to do with this commutation—Harry M. Daugherty, who got the President to commute the sentence; Mr. Wickersham, the then Attorney General, who recommended it; and Charles W. Morse, who was the beneficiary—all had testified, unfortunately, before this buffer thrown out Sunday was published, and each one of them declares that the commutation was based solely upon a representation as to Morse's health.

Therefore, the publication of the alleged petition, according to the testimony of everybody who testified and everybody who knows about it, had nothing to do with the commutation of sentence. Why, then, was it published?

Mr. WATSON of Georgia. Mr. President, some complaint has been made by the Senator in charge of the tariff bill, because extraneous matters have been introduced into the debate. That has been done quite as often by Senators on the other side as by Senators on this side of the aisle. But it seems to me that the honor of the Government, the purity of the administration of justice, should be as important to Senators on both sides as any item of the tariff bill.

It would be a most unfortunate thing, if the American people lost confidence in the Department of Justice. It would be a most unfortunate thing if any Attorney General or any judge could be handed down to posterity branded as Alexander Pope branded Chancellor Bacon, "the wisest, brightest, and meanest of mankind." That country is on the brink of ruin and its system is about to fall in when its judges are corrupt, when its administration of justice is venal, when the rich man is all-powerful before the courts, and the poor man has no chance. It is not a pleasant thing, Mr. President, to contrast the treatment given to this rich criminal, Charles W. Morse, and that given to those poor creatures who are languishing in prison, after having served year after year, for having said something in criticism of the war policies of the former administration, and thereby having technically violated the espionage law. It is not alleged that they stole anything from anybody; it is not alleged that they caused a single man to refuse to enlist; it is not alleged that they really harmed the Government or contributed anything to the comfort of the enemy; yet, because they are poor and friendless, they languish year in and year out in the penitentiaries. When their little children come here and lift their tiny hands and try to reach the President with their plea of mercy they are coldly shut out; but when the wife of Charles W. Morse came here some years ago she was listened to by Senators, by Representatives, and by prominent men all over the country.

The Attorney General has made mistake after mistake in this case, but he has made no greater mistake than he made on Sunday when he sought to screen himself behind the names of those prominent men who, out of sympathy for Mrs. Morse and believing that her husband was in a dying condition, signed her petition for a pardon. What man can resist a woman in tears? What man wants to argue a case of that sort with a wife who is broken in grief and who is pleading with him with tears in her eyes to help her get out of prison the father of her sons?

The petition was numerously signed, by some of the best men in the country, but those men were deceived into believing that the man was in a dying condition. The very fact that 70,000 names were obtained shows the extent of the propaganda, and what it probably cost. Nobody will ever know, perhaps, how many thousands of dollars were spent by Morse in that campaign. He put his wife forward to plead for him, just as he now is putting forward the men who yielded to her entreaties and signed her petition.

However, Mr. President, it is a remarkable thing that these certificates which are published by the Attorney General are far from substantiating his case. The matter has assumed national importance. It may disrupt the Cabinet; it may overthrow an administration; it can not be longer ignored. Morse has again become a national issue, and that issue will not down until Daugherty gets out of the Cabinet. Here is one of these certificates:

"Dr. E. C. Davis, of Atlanta, Ga., made a report to W. H. Johnson, marshal at Atlanta, based on an examination of Mr. Morse. Doctor Davis reported symptoms indicating changes, probably indicating a beginning of Bright's disease, and said as to Mr. Morse:

"'I do not believe in his present condition, with the influence of mental worry added to his physical ailments, that he would ordinarily live more than one or two years unless treated with extreme care and thoroughly protected from arduous work and exposure.

"'His diet ought also to be looked after carefully on account of evidences that were found of the beginning of Bright's disease.'"

Everybody knows that by dieting and the drinking of mineral waters Bright's disease, in its incipiency, may be cleansed from the system in two weeks. It is only in the later stages when the complexion turns yellow and the whole body becomes debilitated, that the disease is practically incurable; but this doctor does not say Morse had the disease in that stage; and yet this is one of the certificates.

Then this astonishing Attorney General, this so-called lawyer, who is not much more of a lawyer than is Felder—he seems to practice law in about the same way as Felder does; he lobbies with folks, he pulls invisible wires, he swims in "imperceptible water"—furnishes this statement:

"Under the same date a report was made to Mr. Johnson by Dr. W. S. Elkin, of Atlanta, the concluding paragraph of which was as follows:"

Now let us read this amazing testimonial:

"I do not believe that Mr. Morse is suffering from any serious organic trouble."

And this Attorney General, who evidently did not read what he himself was putting in the newspapers, sets that out as an excuse for that pardon. Is it not amazing? Not only does he not read law books nor decisions, but he does not even read his own testimony:

"I do not believe that Mr. Morse is suffering from any serious organic trouble, nor is his health being materially affected by his present confinement."

Think of that being put into the newspapers on yesterday by Mr. Daugherty, who was off on the *Mayflower* at the time, presumably talking with the President as to whether to get down and out or not.

Now here is another one from Mr. Moyer, who was the keeper of the penitentiary at the time. On December 23, 1911, he telegraphed the Attorney General from Atlanta as follows:

"At 11.45 this morning Major Baker, post surgeon at Fort McPherson, telephoned the following report to me: 'After four weeks' observation I believe that the physical condition (Morse's) is deteriorating.'"

Well, most of us would deteriorate in prison; nearly everybody does. I have not the slightest doubt that those political prisoners to whom I have referred are not now so robust as they were when they went in. One of them served four years for repeating a speech that I made. I made it in open court. It was read to the Supreme Court here in Washington. I was too ill at the time to come myself, and my associate counsel read it. Because this political prisoner circulated that speech, which was made by me in open court at Mount Airy before Judge Emory Speer, of the Federal district court, David T. Blodgett, of Des Moines, Iowa, served for more than four years in the Atlanta Penitentiary. I got him pardoned out just before Christmas last, but the business of that department is so badly conducted that the pardon papers went to Fort Leavenworth, and to my astonishment I found that he was still in the penitentiary about the middle of January.

Here is a report from Major Baker:

"FORT MCPHERSON, GA., *December 30, 1911.*

"Report of the physical condition of Federal prisoner Charles W. Morse: He was admitted to this hospital the 26th of last month. He has been examined daily since that date by the undersigned. Diagnosis: Arteriosclerosis, with (a) myocarditis, chronic ('mitral insufficiency relative,' used in my report of the 16th instant, expresses, in other words, my opinions); (b) renal sclerosis.

"The last two are but phases in the progress of the first affection, noted when the heart and kidneys have become seriously involved.

* * * * * * *

"Other dangers of arteriosclerosis are the apoplexies, particularly the cerebral form.

"Present condition: The patient is extremely weak, sitting up in bed, only when propped, for a short time—has not exceeded one and one-half hours at one time—when he complains of vertigo and faintness. His heart has lost force and its action is irregular. His circulation is poor. His kidneys do not eliminate sufficiently.

"Prognosis: This malady is incurable; it is spoken of in the singular for the reason that his affections constitute one affection—arteriosclerosis—with special involvement of the heart and kidneys. In my opinion, he has not very long to live."

That was 11 years ago, Mr. President.

Mr. ASHURST. Outside of that, he was all right?

Mr. WATSON of Georgia. Yes; outside of that, he was a well man.

"Effect of further imprisonment: All authorities are one, in agreement that mental strain and worry aggravate this disease. For that reason, supporting my knowledge of the case, I unhesitatingly state that further imprisonment will be injurious."

Then, the most delicious thing is the report of the Surgeon General of the Medical Corps. Under date of December 30, 1911, Surg. Gen. George H. Torney, of the United States Army, submitted to The Adjutant General of the Army the report of the board of medical officers.

"In his letter transmitting this report Surgeon General Torney said:

"The board returned from Fort McPherson yesterday and handed its report to me this morning. In view of the clear and nontechnical language in which this excellent report is written no interpretation of it by this office seems to be necessary."

Yet the nontechnical language is partly this:

"From careful consideration of the history and the examination made the board is of the opinion that Charles W. Morse is suffering with chronic valvular disease of the heart, chronic nephritis (commonly known as Bright's disease) and slight arteriosclerosis. He has recently had a severe acute congestion of the kidney, due probably to an infarct (the result in all probability of a cardiac embolus lodging in the kidney) during which he passed and still passes blood in his urine although in diminishing quantities."

Mr. President, I now read from the New York Tribune of Saturday last. The leading editorial headed:

"Daugherty doesn't answer.

"A correspondent of the Tribune asks whether Attorney General Daugherty, in his defensive explanation of May 23 of his connection with the Morse pardon, answered or dodged the only questions involved in Senator CARAWAY's charges, to wit:

"No. 1. Did he accept employment to make a legal argument for the release of Morse or did he make such an argument? This would have been ethical even if his fee had been ten times $25,000.

"No. 2. Was he retained because of his personal intimacy with President Taft and did he capitalize his political influence to his pecuniary advantage? If so, is this not unworthy of a reputable member of the bar, besides being a fraud on his friend?

"No. 3. Did Mr. Daugherty, after discovering that Morse had malingered, expose the facts and make an honest effort to have the mistake rectified, or did he confine himself to endeavoring at private interviews to induce Morse to pay him the agreed-on sum?

"The Tribune has carefully examined Mr. Daugherty's first statement. It is unable to discover refutation of the Caraway charges. He devotes himself mainly to the labor of trying to drag in extraneous issues. He thus must be enrolled among the dodgers.

"The Attorney General's letter to Senator WATSON"—

Of Indiana, of course—

"given out yesterday leaves matters much as they were before. He admits 'over a year's active investigation, preparation, and service in the cases,' but he ignores the matters on which the public wishes light.

"To date no sufficient reason is given why Mr. Daugherty should not write his resignation or why the President should not demand it if not voluntarily tendered. The letters written by Mr. Taft and Mr. Wickersham seem to have little bearing on the present controversy. Of course, these gentlemen were not aware of the conspiracy if they were its victims."

Mr. President, as every one knows, that is a Republican paper that was founded by Horace Greely, and it always has had great influence with the Republican Party. It has defended the administration in nearly everything defensible. It has fought the battles of the administration where any honorable person could fight. It now calls upon Mr. Daugherty to relieve the administration of embarrassment by tendering his resignation, and it says that he has made out no defense for himself. A severer arraignment was not made by the Senator from Arkansas [Mr. CARAWAY] or by anyone else.

I myself on last Friday called the Attorney General's attention to four specific cases in which it is insinuated that there was corrupt action, defeating justice, bringing the law into contempt, and showing that a rich man can not really be punished at this time, while this administration is in power:

"Add to what you have already said that the district attorney's office in New York recommended criminal prosecution and confiscation of cargo, yet Daugherty wired to release ship *J. M. Young* is a matter of record in the district attorney's office, and it might be a good idea to ask Major Clark, who is handling the case in the district attorney's office, for the facts in the congressional inquiry."

What congressional inquiry? I must not allude to the efforts that have been vainly made for an inquiry in the other House, but the inquiry here has been conducted in the open, where all could hear, where there was a free field for a fair fight, if one was wanted. This British ship, the *J. M. Young*, was loaded with liquor and came into the port of New York to violate the Federal law. The honest dry agents got hold of the facts, seized the whisky, libeled the ship, and arrested those in charge of her. They employed Felder, and he came here to Washington; he saw the Attorney General, and the Attorney General telegraphed to have those proceedings dismissed and the whisky restored to those from whom it had been taken. The facts warrant the question, "Are Felder and Daugherty farming on shares?"

Great public affairs like this can not be trifled with. The whole country is taking notice of it, and the whole country is contrasting the difference between the deal which the poor man gets in court for speaking a few indiscreet words and the deal which the rich man gets when he and his sons robbed the Government during all the months of the war.

How did Morse keep his sons out? Well, Felder may be in on that and Daugherty may be in on it.

"2. Wine seizure: The case referred to is the Continental Wine Co., of which Nathan Musher has been indicted only last Saturday in Philadelphia for conspiracy to violate the national prohibition act. Why did Mr. Daugherty cause the $200,000 worth of wine to be released?"

That is a fair question. What was the reason that prevailed with the Attorney General and had that $200,000 worth of wine restored after the dry agents had a complete case against those who were violating the Federal law? What were his reasons? The country is entitled to know, the press is entitled to know, the Senate is entitled to know, the House is entitled to know. Can it be passed by in silence when action of this kind is ordered from the Attorney General's office at the instigation of such a man as Felder, who is even now under indictment in South Carolina, so that he does not dare to go through that State when going north from Atlanta to Baltimore, for instance? I say the whole country wants to know why the Attorney General is so thick with a man like Felder that he will take his word and throw around violators of the law immunity when he ought to be prosecuting the violators of law.

"3. Director Harold H. Hart, Thomas Ready, and Michael Lynch in New York, in the Federal prohibition department there, were indicted last November for a conspiracy to violate the Volstead Act. They released illegally 2,000,000 gallons of liquor.

"When they were arraigned in court, Felder appeared for them. Since this time there has been nothing heard of the case and criminal prosecution has come to a stop."

Is it any wonder that the country laughs to scorn Daugherty's statement that he is going to prosecute those who defrauded the Government during the years of the war? Is it any wonder that his promises, made from week to week and month to month, are treated with derision and contempt? Is it any wonder that the whole country is seething with indignation about his conduct of the Department of Justice?

"4."—

And last—

"There seems to be a good bit of discussion about the George Myers pardon, multimillionaire of Ohio, who was sent to Atlanta for violation of the Mann Act."

My information is that the man in the case is 50 years old and is worth many millions of dollars; that the woman in the case was a girl 15 years old. Can any decent man think of an

act involving more moral turpitude than that? Why should that man have been pardoned? Did he have heart trouble and Bright's disease? Was confinement at Atlanta injurious to his health? If we turn out these rich criminals because they do not like to stay in and because their health declines, what is the use in prosecuting them at all? Just let them do as they please, run off with little 15-year-old girls and debauch them, fling defiance at the law, bring in British cargoes of whisky, and then employ Felder to have them released. But if you can find a poor little nigger bootlegger or a poor white bootlegger carrying a flask in his hip pocket, run him in for a year or two. They are doing it all over the country, picking up the little fellows and letting the big ones break through the net. It is bad enough to have them break through, but when the Attorney General helps them do this it becomes a national scandal.

Here is the Philadelphia Record of this morning, Mr. President. I do not know the politics of this paper. I know that it is one of high standing. Perhaps the Senator from Utah [Mr. SMOOT] can tell me the politics of the Philadelphia Record.

Mr. SMOOT. No; I can not tell the Senator. I think it is an independent paper, but that is a matter of impression and not of knowledge.

Mr. WATSON of Georgia. On the editorial page, in the first column, I find this paragraph:

"When a convict has neither money nor political influence he may have all the ills to which Morse laid claim, and a dozen more, and the probability of confinement putting a speedy end to his life will not shorten his term by one day. That is the plain, unvarnished truth, and all prison authorities know it. The real scandal in the Morse case is not the connection of the present Attorney General of the United States with the successful effort to hoodwink a President of the United States into releasing a man who was not as ill as represented, but the demonstration that a rich man behind the bars enjoys privileges and gains sympathy denied to a poor man under precisely the same circumstances. Every discrimination of justice between the rich and the poor is grist for the mill of the forces of discontent and lawlessness, and those who are responsible for such discriminations strike at the very foundations of our Government. The higher and more honorable their places the more serious is their offense in setting a dangerous example."

In the New York World of this morning, in the second column of the editorial page, I find this:

TO MR. DAUGHERTY'S RESCUE.

"If President Harding is led through personal loyalty to stand behind Mr. Daugherty, he may help his Attorney General to escape a congressional investigation. But by demonstrating again his trustfulness and good nature, he will in no way clear Mr. Daugherty of the charges directed against him in the House and Senate. He can not free Mr. Daugherty of reproach merely by revealing the purpose of the White House to befriend him for personal or political reasons.

"The Attorney General might have relieved the administration of embarrassment by offering to resign or demanding an investigation by Congress. He has done neither. The administration may imagine that in going to Mr. Daugherty's aid it will manage to brazen through the present unpleasantness. It can not be done. The Daugherty issue can not be suppressed.

"It is useless for the President to attempt to wipe out ugly facts merely by closing his eyes to them. It will not work with Congress or with the public. Whatever obligation the President may consider himself to be under to Mr. Daugherty, he is under an immensely higher obligation to the American people to see that the administration of justice shall deserve public respect and confidence. Mr. Daugherty's fitness to hold his high office has been challenged in Congress and a strong case has been made out against him. He has evaded answering his accusers. Is the administration so blind as not to see not only the political consequences of shielding the Attorney General against investigation but the immeasurable wrong it commits against the public in retaining at the head of the Department of Justice a man whose honor and probity are questioned?"

Mr. President, so long ago as May 12 of this year the Morning Telegraph, under the name of Mr. E. B. Smith, of its Washington bureau, carried an article headlined as follows:

"Daugherty to act in war-fraud charges."

The editorial specifically mentions J. L. Phillips, the Republican referee of Georgia, who has been charged on the floor of the House by Congressman WOODRUFF and by Congressman JOHNSON with having stolen $1,800,000 from the Government under a lumber contract after the armistice.

J. L. Phillips has not voted in Georgia in nine years. He owns no property in Georgia; he pays no taxes in Georgia; he was not a registered voter until January 28, 1921. He did not vote for Harding and Coolidge. He did not vote for anybody. He was here in Washington robbing the Government of $1,800,000, and now these two Republican Congressmen, WOODRUFF and JOHNSON, say that unless Mr. Daugherty prosecutes J. L. Phillips they will impeach Mr. Daugherty. They were not Democratic Congressmen who made those charges. They were good Republicans, who were serving under the flag during the war, while Phillips was here in Washington stealing the Government's lumber.

In this morning's issue of that great independent paper, the Baltimore Sun, on the editorial page, the second column, will be found an editorial headlined, "Cruel 'dog days' in Washington." It deals with the hot times Mr. Daugherty is having and those hotter which he is going to have. I ask unanimous consent that that may go into the RECORD in 8-point type as a part of my remarks, and that the extracts which I have read be likewise printed in 8-point type.

The PRESIDING OFFICER. Without objection, it is so ordered.

The matter referred to was ordered to be printed in the RECORD in 8-point type, as follows:

CRUEL "DOG DAYS" IN WASHINGTON.

"It is going to be an extremely hard, torrid, and trying summer in Washington. Whether the political humidity is going to hang more heavily and discouragingly over the Capitol than over the White House remains to be determined. In Congress the veritable slavery of driving an unpopular and dynamite-laden tariff bill through to passage faces a lot of distracted, disgusted, highly worried legislators. There is also the soldier-bonus nightmare, which seems to have produced utter demoralization among the Senate leaders. As for the Lasker ship subsidy bill, which President Harding seems to want as soon as he can get it, there is no telling what a dragging and maddening debate it will produce, making Washington, at the peak of the 'dog days,' the scene of political chaos almost without precedent in recent history.

"As for the other end of Pennsylvania Avenue, it can not remain calm and cool in the face of current developments. The disclosures regarding Attorney General Daugherty are not mere headline material for an edition or two. They may well give the administration real anxiety and concern. When a conservative Republican newspaper like the New York Tribune calls upon the Attorney General to resign, when the demand is echoed by the New York Herald and other important Republican journals, it is high time for the President to appraise the damaging effect that the revelations have had upon the country and to ascertain whether the administration of the Department of Justice is in the hands of persons likely to command public confidence.

"Nor can the President view the disruption in the Treasury Department without wincing. The disgraceful efforts of Elmer Dover, Assistant Secretary of the Treasury, to turn the department over to spoilsmen have been checked by the courageous stand taken by Secretary Mellon and several of his subordinates. The fight, however, has not ended, but is only beginning, and there is no assurance that it will not yet result in the retirement of Mr. Mellon from the Cabinet, who may well decide, in view of the badgering and nagging he has received from pelf-hungry Senators and Representatives, that the political game is not worth the candle.

"In a few months the issue over the Fall policies in the Interior Department will come to a crisis. There is no longer any question as to what Secretary Fall intends to do with the public resources if he can. He persuaded Secretary of the Navy Denby to give him jurisdiction over the naval oil reserves, and a large portion of them are now under lease to private interests; he is striving with might and main to get a grip upon the Forest Bureau with its vast domain of timber in Alaska and elsewhere, with untold mineral wealth beneath it. It is little wonder that the Fall policies have become a storm center of politics. If Congress is asked to confirm a plan of reorganization involving the transfer of the Forest Bureau to the tender mercies of the Secretary of the Interior, one of the bitterest legislative fights of a decade is in prospect.

"Congress, however, carries the major burden. It has the ugliest kind of forebodings about the McCumber tariff bill, which in its heart it knows to be a political and economic blunder; but how can it retreat now? Sheer inertia is carrying the bill forward; there is no vitality in the leadership that is handling it. There is a panicky feeling among Republicans about many of its features, such as the duties on hides, wool, sugar, steel, and a host of manufactured articles. But there is no way of smashing the 'tariff bloc,' apparently, save by a revolu-

tionary expression of public opinion. So far as the soldier bonus is concerned, Senate vacillation and irresolution upon it have now been reduced to folly and absurdity. In desperation Senator McCUMBER wants to call in the Democrats of the Finance Committee and place the onus of a bonus decision upon them. Of course, they will refuse to fall into the trap. The Democrats of the committee were kept outside the door while the Finance Committee was planning and building its own cul-de-sac on the bonus question, and it is not their duty to act as a relief expedition now.

"With such a fearsome summer ahead, the administration is preparing to go before the country next November and ask for a vote of confidence in the wake of a record of negation, folly, and reactionary policies."

Mr. WATSON of Georgia. Again, in the North American, of Philadelphia, an independent paper, there is a double-column editorial on the same subject, the headline being, "Mr. Daugherty should resign." I ask unanimous consent that that also may be put in as a part of my remarks in 8-point type.

There being no objection, the matter referred to was ordered to be printed in the RECORD in 8-point type, as follows:

MR. DAUGHERTY SHOULD RESIGN.

"When Republicans accused A. Mitchell Palmer, Attorney General in the Wilson administration, of failure to prosecute war profiteers, Democratic spokesmen defended him with the retort that the attacks were inspired by partisan politics. Now that his successor, Attorney General Daugherty, after 14 months of inaction, is assailed with similar charges from the Democratic side, Republican spokesmen feel that they have disposed of the case by asserting that the complaints are made for partisan purposes.

"It may be assumed that in each case the accusers would have been much less agitated if the Attorney General they were criticizing had been of their own party. But that circumstance obviously provides no sound defense for official dereliction. Indeed, it is precisely the vigilance of partisanship that is commonly cited as one of the merits of party government; the argument is that under such a system strong adherents of a party are always ready to expose the misdoings of their opponents, and that thereby the public interest is safeguarded.

"For several weeks charges of a serious nature have been made in both branches of Congress, involving the professional career of Attorney General Daugherty and his administration of the Department of Justice. They have been reiterated and amplified, and in some instances have been fortified by documentary evidence, but he has offered no defense beyond the issuance of statements of evasive generalities. At the outset Senator WATSON of Indiana made a misguided attempt to refute the charge that Mr. Daugherty had participated in the notorious pardon case of Charles W. Morse. But on the following day Senator CARAWAY produced documentary proofs so unanswerable that WATSON was forced to admit that he had had merely the Attorney General's denial, which was shown to be baseless. Now, Mr. Daugherty denies that he made any denial. The whole matter is of such grave import that the facts disclosed by the records should be studied by the public.

"Morse, an audacious and unprincipled operator in high finance, was convicted several years ago and sentenced to the Federal penitentiary at Atlanta. After his family had vainly endeavored to obtain a pardon the case was taken up in 1911 by Thomas B. Felder, an adroit attorney, and he engaged Harry M. Daugherty as the most useful partner he could choose for the difficult enterprise. Daugherty was not, perhaps, the ablest lawyer in the United States, but he was an influential politician in the pivotal State of Ohio, and by his political activities had earned the gratitude of President Taft and Attorney General Wickersham.

"On August 4, 1911, Felder and Morse signed a contract at the penitentiary setting forth the terms of 'the employment of Hon. H. M. Daugherty and myself.' Morse agreed to pay Daugherty a $5,000 retaining fee and expenses, and in all matters to follow implicitly the advice of his counsel. 'We are to receive,' said the contract, 'in the event we secure an unconditional pardon or commutation for you, the sum of $25,000, which is to be in full compensation for services rendered in connection with your application for pardon.' Subsequently, it appears, he sought to stimulate their efforts by promising to pay many times that sum for his release. A letter written by Felder in 1917, reviewing the whole extraordinary transaction, was read last week in the Senate. Felder wrote:

"'His (Morse's) release was secured by and through the efforts of Hon. H. M. Daugherty and myself, and by no other individual, corporation, or group of individuals. We have richly earned all that Morse agreed to pay, viz, the expenses, the $25,000, the $100,000, or whatever is involved in his assurance, "I will make you both rich."'

"When Daugherty and Felder saw Morse at the penitentiary they told him President Taft had refused to pardon him, but might reconsider the case later. During the conversation, Felder's letter shows, they got a 'cue' in the prisoner's physical appearance, and obtained from a prison doctor a diagnosis of Bright's disease. Thus armed, they went to Washington and got assurances from Taft and Wickersham that if Morse was in danger of dying in confinement he would be released. The lawyers hastened back to Atlanta and had him examined by a board of physicians, who reported that his condition was not serious. But his invalidism evidently became more pronounced, for the indefatigable attorneys enlisted the services of another board of physicians, who reported him so ill that an order was obtained transferring him to a hospital outside the penitentiary. Felder's letter of 1917, in explaining why the lawyers hesitated to sue Morse for the unpaid fee, gives this explanation of the pathological mystery:

"'We were informed that the Department of Justice was in possession of evidence to show that after physicians were appointed to examine Morse, and before they appeared on the scene, soapsuds or chemicals or something would be taken by him to produce hemorrhage of the kidneys, and that as soon as the examination was over the patient would recuperate rapidly.'

"Even after all the details had been worked out and the necessary records made the pardon was delayed, and ultimately Daugherty and Felder sought the aid of John R. McLean, a newspaper publisher, 'a warm personal friend of Mr. Daugherty, also a friend of both President Taft and Attorney General Wickersham.' Mr. McLean sent a trusted agent to Mr. Wickersham, the two went forthwith to the White House, there was a long telephone conversation between President Taft and the publisher, and presently the messenger brought back the $25,000 pardon.

"Morse and his sons were profuse in their thanks to the attorneys, but eventually the pardoned financier sailed for Europe without paying the agreed fee, to say nothing of the promised $100,000. Upon his return they pressed him for a settlement, and finally got from him what Felder calls some 'soap-wrapper' securities in one of his flotations. Felder took his share, but Daugherty indignantly rejected the stocks, and in April, 1913, wrote Morse reminding him sharply that 'there was a balance due of $25,000 when you were commuted.' Felder in his letter very candidly told why he and Daugherty hesitated to sue their defaulting client:

"'I have always felt apprehensive that if we brought suit immediate steps would be taken by the Department of Justice to secure an annulment of the Executive order and the return of Morse to the penitentiary. I have not been unmindful of the damaging evidence secured by the department in its investigations to ascertain whether or not a fraud had been perpetrated; that we were not connected therewith, but that the disclosure and publicity would be embarrassing.'

"As a matter of fact, the Department of Justice moved more than once to reopen the case, but the attorneys took energetic measures to avert such action and always succeeded. They had a double reason for intervening—by protecting Morse's liberty their claim upon him was increased, and at the same time they prevented exposure of a transaction which Felder said had given them all the notoriety they could stand. On one occasion, at least, Daugherty went to Washington himself and presented to the Attorney General arguments against revoking the order of release.

"The Morse pardon had created a nation-wide scandal when it was announced, and the story was revived by Morse's spectacular operations after this release and by the deplorable appointment of Daugherty as Attorney General. A few months after taking office Daugherty initiated vigorous investigation and prosecution of Morse and his associates for alleged irregularities in contract operations with the United States Shipping Board. The Attorney General's activity in this matter, contrasted with the department's inaction concerning other cases involving frauds against the Government of scores of millions, caused Morse and his friends to charge that he was being persecuted by his former counsel, and it is probable that they furnished the deadly documentary evidence which has been read into the Senate records.

"The scandal has been widened by new revelations concerning the failure to prosecute the Bosch Magneto Co., a German-owned concern, which was sold to a client by former Attorney General Palmer under circumstances which led to demand for a congressional investigation. Felder, who was Daugherty's

partner in the $25,000 Morse pardon case, is attorney for the Bosch concern. Furthermore, the chief Government witness in the Bosch case was recently dismissed from the Department of Justice by Daugherty because he had given information to Members of Congress; and he declares that Felder, at Daugherty's suggestion, has since offered him a salaried position with the accused company.

"The disclosures have been a stunning blow to the Republicans, who had hoped that they had heard the last of the too-familiar story of Daugherty's connection with the Morse scandal. The Democrats are correspondingly elated, because they believe, with good reason, that the administration and the Republican Party can not escape besmirchment in the unsavory mess.

"President Harding himself is more than indirectly involved, because Daugherty was his personal appointment as Attorney General. The smooth Ohio lawyer-politician was the Harding political manager in 1920, and was credited with having maneuvered the nomination at Chicago. Mr. Harding knew exactly what kind of man he was putting at the head of the Department of Justice, and knew the sordid story of the Morse pardon. The announcement of the selection was a shock to the public, and was denounced by scores of newspapers which had supported the Harding candidacy. The North American merely expressed a widespread view when it declared the appointment 'reckless and wicked':

"Reckless because Mr. Daugherty's political repute is such that his official actions and motives will always challenge suspicion; wicked because it puts a premium upon the practice of unprincipled politics, and because it intrusts the enforcement of law to one whose associations have been largely with forces striving to circumvent law.

"For Daugherty President Harding is personally responsible; yet the party must bear its share of the burden, too, because the Republican Senators, though fully aware of the appointee's record, ratified the nomination.

"If the administration leaders and party managers in Washington imagine they can smother this scandal by obstructing the demand for a congressional investigation, made in resolutions offered many weeks ago, they are cherishing a dangerous delusion. It has features which easily may make it the most deadly case brought against a national administration in many years. The Ballinger episode, which led to the undoing of Taft and the overwhelming defeat of the Republican Party, affected only administrative policies; the Daugherty charges involve the Department of Justice, and the American people will not be tolerant of scandal in that department, the conduct of which touches the rights of every citizen and the execution of the laws of the land.

"If Attorney General Daugherty retains a shred of regard for the President and the administration, he will resign without delay an office which has been put under a cloud by his incumbency. But the responsibility goes higher. President Harding owes it to himself, to his administration, and to the country to force the severance of an association which is no longer defensible."

THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

The next amendment of the Committee on Finance was, on page 60, line 17, to strike out "30" and insert in lieu thereof "40," so as to read:

Spinning and twisting ring travelers, 40 per cent ad valorem.

Mr. ROBINSON obtained the floor.

Mr. SMOOT. I desire at this time to give notice that I shall move to strike out "40" and insert "35."

Mr. ROBINSON. Mr. President, this paragraph has been discussed at great length. I do not intend to repeat the discussions which were had on the paragraph on Saturday, but the reduction which the Senator from Utah proposes to make in the rate as reported by the Committee on Finance, namely, from 40 per cent ad valorem to 35 per cent ad valorem, in my opinion is not adequate. There is very little information furnished the Senate respecting ring travelers. They are used, as everyone knows, in cotton spinning. The importations are not large, and the figures of the domestic production are not available.

I move to strike out "40," in line 18, and to insert in lieu thereof "20," so that it will read "20 per cent ad valorem." I am ready for a vote.

The PRESIDING OFFICER. The question is on agreeing to the amendment to the amendment.

The amendment to the amendment was rejected.

Mr. SMOOT. I move to strike out "40" and to insert in lieu thereof "35."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment of the committee was, on page 60, line 19, to strike out "30" and insert in lieu thereof "40," so as to read:

Wire heddles and healds, 25 cents per 1,000 and 40 per cent ad valorem.

Mr. SMOOT. I shall ask that that amendment be disagreed to.

Mr. ROBINSON. The Senator from Utah announces that he will ask that this amendment be disagreed to. That, of course, will improve it from my standpoint. However, I think the rate ought to be further reduced, and I move, in line 19, to strike out "30" and insert in lieu thereof "20," so that it will read "20 per cent ad valorem."

The amendment to the amendment was rejected.

Mr. SMOOT. I ask that the amendment be disagreed to.

The amendment was rejected.

Mr. SMOOT. The Senator from North Dakota [Mr. McCUMBER] gave notice that he would like to have taken up next the paragraphs in Schedule 1 which were passed over.

Mr. ROBINSON. Why not let us finish paragraph 318, unless there is some one not now present who wants to discuss it. The Senator will remember that that went over on Saturday.

Mr. SMOOT. Yes; there was a request that it should be passed over.

Mr. ROBINSON. Does the Senator remember who requested that it should go over?

Mr. SMOOT. I do not recall, but some Senator wanted it to go over.

Mr. ROBINSON. This paragraph went over on Saturday, and I would like to get action on it, if there is not some substantial reason for delay.

Mr. SMOOT. As I stated, the Senator from North Dakota gave notice that he would like to take up schedule 1 this morning and proceed with the paragraphs which have been passed over, in order to get action upon all the paragraphs in that schedule.

Mr. ROBINSON. Will the Senator be good enough to furnish us with a list of the paragraphs in schedule 1 which remain undisposed of?

Mr. SMOOT. I will give the Senator the numbers of the paragraphs.

Mr. ROBINSON. The clerk of the committee has just furnished me with a list.

Mr. SMOOT. Paragraph 7 was the first paragraph passed over, and I think the Senator from North Carolina [Mr. SIMMONS] had an understanding with the Senator from North Dakota [Mr. McCUMBER] that it should go over until we reached paragraph 1635. I understand that the junior Senator from Utah [Mr. KING] is not prepared to go on with paragraphs 25 and 26, paragraph 25 being the paragraph dealing with dye intermediates, and paragraph 26 being the paragraph dealing with coal-tar products.

Mr. SIMMONS. The junior Senator from Utah informs me that he will be able to return to the Senate Chamber Wednesday morning.

Mr. SMOOT. Then it is the understanding that on Wednesday morning we will take up paragraphs 25 and 26.

Mr. SIMMONS. That is my understanding.

Mr. FRELINGHUYSEN. Mr. President, I understand the Senate is considering what paragraph it will take up next.

Mr. SMOOT. Yes; and the question we were discussing related to paragraphs 25 and 26.

Mr. FRELINGHUYSEN. I ask the Senator from North Carolina if he knows whether the junior Senator from Utah [Mr. KING] will be ready to take up those paragraphs on Wednesday morning.

Mr. SIMMONS. The junior Senator from Utah has been quite indisposed since he left the Senate over a week ago. I called him up this morning and he stated that he was under the impression that these paragraphs were to be taken up to-morrow; but we are not to have a session to-morrow, which I explained to him, and my understanding is that he expects to be here Wednesday morning.

Mr. FRELINGHUYSEN. When we passed over those paragraphs, at the request of the junior Senator from Utah, I think he asked for three days' extension. He undoubtedly was ill, and has been ill ever since, but I think the time has come when the Senate should dispose of these paragraphs. I shall ask the Senate on Wednesday, if it is agreeable to the Senator,

to take them up definitely, and have it understood that we will debate them definitely at that time.

Mr. SIMMONS. I think there will be absolutely no trouble about it. The junior Senator from Utah says he is sure that he will be able to come here on Wednesday. But the Senator from New Jersey has had some courtesies when he wanted to be away, and I rather think that he ought not to be impatient.

Mr. FRELINGHUYSEN. Mr. President, I am not impatient, but the Senator knows that the committee is very anxious to have these paragraphs disposed of.

Mr. SIMMONS. I am very anxious, too. I have stated what the Senator from Utah told me, and I rely upon it.

Mr. SMOOT. I only ask that the Senate proceed to the consideration of paragraph 33a, the item of cyanide.

Mr. SIMMONS. I notice that there are very few Senators on either side of the Chamber. I know there are a number of Senators interested in this paragraph, but I do not know where they are, and I make the point of no quorum.

Mr. SMOOT. The Senator has no objection to our proceeding to the consideration of the paragraph?

Mr. SIMMONS. No; not at all; but I make the point of no quorum, so that Senators may come in.

The PRESIDING OFFICER (Mr. JONES of Washington in the chair). The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ashurst	Fletcher	McCormick	Rawson
Ball	France	McCumber	Robinson
Borah	Frelinghuysen	McKinley	Sheppard
Brandegee	Hale	McLean	Simmons
Broussard	Harris	Myers	Smoot
Bursum	Harrison	Nelson	Spencer
Capper	Johnson	Newberry	Sterling
Culberson	Jones, N. Mex.	Nicholson	Sutherland
Cummins	Jones, Wash.	Norris	Swanson
Curtis	Kendrick	Oddie	Underwood
Dial	Keyes	Page	Walsh, Mass.
Dillingham	Ladd	Pepper	Watson, Ga.
Elkins	La Follette	Pittman	
Ernst	Lodge	Poindexter	

Mr. SIMMONS. I wish to announce the unavoidable absence from the city of my colleague [Mr. OVERMAN].

The PRESIDING OFFICER. Fifty-four Senators having answered to their names, there is a quorum present. The Secretary will state the pending amendment.

The READING CLERK. On page 18, after line 2, the committee report to insert a new paragraph, as follows:

PAR. 33a. Cyanide: Potassium cyanide, sodium cyanide, all cyanide salts and cyanide mixtures, combinations, and compounds containing cyanide, not specially provided for, 10 per cent ad valorem.

Mr. ODDIE. Mr. President, I move to amend, on page 18, by striking out paragraph 33a and inserting at the proper place in schedule 15 of the bill the following:

Cyanide: Potassium cyanide, sodium cyanide, all cyanide salts and cyanide mixtures, combinations, and compounds containing cyanide.

This is the same amendment I offered on the floor of the Senate on April 18.

On May 5 I made some extended remarks in the Senate on this question. I requested that the product be placed on the free list. I explained that a duty on cyanide violates the principles of protection in that it deals a blow to the gold-mining industry, which to-day can not stand any additional operating costs. I have carefully followed the debates in the Senate. My friend the Senator from New Jersey [Mr. FRELINGHUYSEN] has made a very earnest plea for a duty on cyanide, but I think that when he has studied the question carefully he will find that the gold-mining industry is entitled to free cyanide. I shall not go into the matter in detail again, as I have already covered it at length on May 5; but I hope the Senate will adopt the amendment which I have proposed, putting this product on the free list.

Mr. FRELINGHUYSEN. Mr. President, I oppose the amendment offered by the junior Senator from Nevada to the amendment of the committee, because I believe, for several reasons, that we should protect the industry. I shall speak only very briefly.

A great deal has been said in the Senate upon this question. The senior Senator from Nevada [Mr. PITTMAN], in the course of his speech, said:

This concern is one of the great and powerful corporations in the State of New Jersey. There is not any doubt that it has been a very generous and patriotic contributor to the Republican Party in New Jersey. A Republican Senator will run for reelection in New Jersey in the approaching fall campaign, and, if reports may be believed, he will need help and will need it badly.

That was in a speech in which the senior Senator from Nevada refers to the Roessler & Hasslacher Co. I wish to state that, so far as I can secure any information, the Roessler & Hasslacher Co. have never made contributions to any campaign fund, and that my motive in asking for a duty on the product is not to secure any campaign contributions or help in the coming campaign. I will say further that, as far as my own expenses are concerned, I expect to take care of them, and I do not ask for the imposition of tariff duties for the purpose of securing campaign contributions.

Mr. President, in the course of this speech and in the course of other speeches reference was made to the fact that the Roessler & Hasslacher Chemical Co. were German owned and were not loyal during the war. I ask at this point to insert in the RECORD a telegram from the Perth Amboy Chamber of Commerce in which they resent the charges made and state that those who know the facts and the war record of the company and its employees know that it is a record to be proud of.

The VICE PRESIDENT. Without objection, it is so ordered.

The telegram referred to is as follows:

PERTH AMBOY, N. J., *May 15, 1922.*

Hon. JOSEPH S. FRELINGHUYSEN,
United States Senator, Washington, D. C.:

We resent charges made on floor of Senate against patriotism of the Roessler & Hasslacher Chemical Co. We who know the facts know that the war record of that company and its employees is one to be proud of. We continue to support their efforts to secure tariff protection for their manufactured article. The company is one of the largest taxpayers in the country. They paid their Perth Amboy employees during full-time operation in one year over $900,000. Help us to keep this industry going.

PERTH AMBOY CHAMBER OF COMMERCE,
ISAAC ALPERN, *President.*

Mr. FRELINGHUYSEN. I also ask to have printed in the RECORD a telegram from the State senator from that county, in which he speaks of the fact that the president of the company, an American citizen, resident of his own city, not only had his oldest son but his son-in-law serving in the war against Germany.

The VICE PRESIDENT. Without objection, the telegram will be printed in the RECORD.

The telegram is as follows:

PERTH AMBOY, N. J., *May 15, 1922.*

Hon. JOSEPH S. FRELINGHUYSEN,
United States Senate, Washington, D. C.:

I am advised that the Roessler & Hasslacher Chemical Co. has been attacked on the floor of the Senate by persons who assert that this company is controlled by Germans and have intimated that its officers were not patriotic during the war. Both charges are absolutely untrue. The story of German control is completely refuted by the statement of January 7, 1922, by Thomas W. Miller, Alien Property Custodian, which you have already seen regarding the loyalty of company's officers. I am well acquainted with its president. He is an American citizen and a resident of my own city. He has taken an active part in every patriotic movement here for over 30 years, including the war period. His oldest son served in our Army in France. His son-in-law made the supreme sacrifice at the close of the war. This company was officially decorated by the War Department for distinguished service rendered in the prosecution of the war.

MORGAN F. LARSON.

Mr. FRELINGHUYSEN. I also ask to have inserted in the RECORD a communication dated January 28, 1919, signed by Capt. E. P. Vergé, chief of the French Powder Mission, in which he takes advantage of the opportunity to express his sincere appreciation of the spirit of cooperation which the Roessler & Hasslacher Chemical Co. manifested, that company having conducted business relations with the French Powder Mission during the war.

The VICE PRESIDENT. Without objection, it is so ordered.

The communication is as follows:

REPUBLIQUE FRANÇAISE,
COMMISSARIAT GENERAL DES AFFAIRES DE GUERRE FRANCO-AMERICAINES,
New York, January 28, 1919.

To the ROESSLER & HASSLACHER CHEMICAL CO.,
100 William Street, New York.

GENTLEMEN: I beg to advise you that I expect to leave very shortly for France. During my absence the duties of the head of the French Powder Mission will be transferred to Lieut. L. A. Mulsant, who up to the present time has acted as my assistant.

I am taking this opportunity to express to you my sincere appreciation of the spirit of cooperation with which you have conducted business relations with the French Powder Mission during the war and with me personally while I managed it.

Faithfully yours,
E. P. VERGÉ,
Chief of French Powder Mission.

Mr. FRELINGHUYSEN. I also ask to have inserted in the RECORD a statement in the Chemical, Color, and Oil Record of May 15, 1922.

The VICE PRESIDENT. Without objection, it is so ordered.

The article referred to is as follows:

DOES THE SENATE MAJORITY KNOW WAR IS OVER?—PETTY PREJUDICIAL PARTISANSHIP SHOWN IN TREATMENT OF BIGGEST AMERICAN CYANIDE MAKER.

Political influences at Washington are apparently lined up against the largest producer of cyanides in this country, judging from the aftermath of reports that have reached the press. Such statements that the Roessler & Hasslacher Chemical Co. was taken over by the Alien Property Custodian and its affairs administered by the Government do not

represent the whole truth. Assertions that the concern paid 900 per cent dividends and profiteered on cyanide of soda are also without foundation. Cyanide of soda was not materially different from many other chemicals during the war. Manufacturers made one price and speculators another. Our records show no first-hand prices of cyanide of soda that were above 37 cents per pound, although second-hand pressure forced the market at intervals to the neighborhood of $2 per pound. It is difficult to comprehend how the largest producer had anything to do with the abnormal advance in quotations.

This concern quoted the Record during these pyrotechnics 35, 36, and 37 cents for contracts of cyanide of soda, and emphatically stated they were taking care of their customers to the best of their ability. These high prices naturally tempted importations, and the field once tapped has remained fertile among certain interests. There is no disputing the superiority of the R. & H. product over the imported. Scarcely a consumer will not admit this. The Record knows of instances where the consumer has purchased imported cyanide for trial and has been forced to discard it and has made urgent calls for American cyanide for replacement.

It emphasizes the weakness of this particular case when Congress starts to playing politics against an essential branch of the chemical industry and attempting to sway tariff opinion. The maintenance of cyanide production here means much to our newly born chemical industry. No less than 15,000,000 pounds of caustic soda and 6,000,000 to 7,000,000 pounds of ammonia are used in the manufacture of cyanide yearly. The old slogan about more business and less politics should have more consideration while this tariff jig is on at Washington.

Mr. FRELINGHUYSEN. Mr. President, prior to the enactment of the Underwood tariff law the duty upon cyanide of potassium was 12½ per cent. When that duty was taken off the manufacture of cyanide potassium in this country was stopped to a large extent. When the war broke out we were completely dependent upon this company for our supply of cyanide of potassium. I have in my possession letters, which I shall not introduce in the RECORD, from manufacturers all over the country who desire that we should have an independent supply of this product in the country, not only from the standpoint of its commercial uses but also from the standpoint of our being independent in the event of another war.

What would have become of the citrus industries of California if they were unable to procure sodium cyanide for the development of hydrocyanic acid gas for the period of four or five years? Have the people of California so soon forgotten the service rendered them by the Roessler & Hasslacher Chemical Co. and its subsidiaries when cyanide could not be purchased from any other source?

The manufacturers of arms, equipment, and ammunitions in the United States not only supplied our own Army but those of the Allies. Cyanide was necessary in every one of the industries engaged in the manufacture of such arms, equipment, and ammunition. The metal parts of every airplane built in this country was rust proofed with a solution of zinc cyanide. Zinc cyanide solution was the only solution found to be satisfactory in coating the "detonators" and "boosters" used in the shells manufactured in this country. The arms and equipment manufacturers required cyanide in the heat treating of their steel, and other manufacturers used it for electroplating. The manufacturers of automobiles and tractors used large quantities of cyanide in their manufacturing processes.

All of this cyanide was manufactured by the Roessler & Hasslacher Chemical Co. in the United States from American raw material and with only American labor.

Mr. President, not only does this concern the Roessler & Hasslacher Chemical Co. but it also concerns the manufacturers of caustic soda and other products running into millions of pounds. There is no danger of a monopoly, because the patents have expired and anyone can manufacture cyanide of potassium. The question is not one as to whether an industry in the State of New Jersey is to be protected, but it is a question as to whether we are to have an independent industry in this country using the raw materials which were manufactured so extensively throughout the war, and also, and paramount, whether we shall be independent of any foreign country in event of needing this product in war again. That is the question. Up to 1913 this commodity was protected, but when the high duty was taken off we shared the business with Germany.

The duty of 10 per cent is a moderate duty. It will not embargo Canada, but it will protect the industry against the competing country. If Senators believe in the protection of American industries, it is the duty of every Senator to vote for the imposition of this moderate duty.

Mr. PITTMAN obtained the floor.

Mr. STERLING. Mr. President——

Mr. PITTMAN. I will yield to the Senator from South Dakota if he desires. I have twice spoken on this subject, and if the Senator from South Dakota desires to speak on it now I yield the floor to him with pleasure. I only have a few words to say.

Mr. STERLING. Mr. President, I desire to speak very briefly upon this question. It is a question which affects very materially certain interests in my own State, and I am primarily led to speak on the question because of those interests.

I wish to say, Mr. President, that while I am a protectionist and a thorough believer in the principle of protection, as I think my votes on the various items of the pending tariff bill will show, it is because I believe in protection that I am in favor of the amendment proposed by the Senator from Nevada [Mr. ODDIE]. I think it may happen sometimes, in order that the full measure of protection may be afforded to certain industries in this country, that certain other articles should be on the free list. I regard cyanide as one of those articles. I think it is proper for us to consider the most important uses of cyanide in order to determine whether or not the putting of cyanide on the free list will in itself be a protection to certain other vital and important industries.

I have before me, Mr. President, the Summary of Tariff Information relative to the pending bill, and I am interested in learning what the Tariff Commission has to say in regard to the uses of cyanide of potassium and sodium cyanide. "Description and uses" is the title of the paragraph which is found on page 1416 of the summary, and which reads:

Description and uses: Potassium cyanide is a white crystalline solid, readily soluble in water, and extremely poisonous. Sodium cyanide, much cheaper and having a higher percentage of cyanide, has practically replaced potassium cyanide, which is made either by fusing potassium ferrocyanide with potassium carbonate and carbon or by fusing cyanamide with potassium chloride and carbon.

Now, as to its uses:

Its principal use is for the extraction of gold and silver from their ores; also for fumigation (notably that of citrus fruits), as a solvent for electroplating baths, and as a flux in assaying and metallurgy.

Mr. President, the Tariff Commission has in substance repeated this description of the uses of cyanide in two other pamphlets. Here is the special pamphlet entitled "Tariff Information Survey" on the articles in paragraph 64 of the tariff act of 1913, in which there is a brief reference to potassium cyanide at page 33, as follows:

Uses: Its principal use is for the extraction of gold and silver from their ores. Potassium cyanide is also used extensively for fumigating, especially in the culture of citrus fruits.

I turn to a more complete statement of the Tariff Commission's Surveys, and I find on page 47 of the pamphlet I now hold in my hand the following:

The two biggest uses for sodium cyanide are the "cyanide process" of extracting precious metals from their ores and fumigation.

Those are the two great uses of sodium cyanide. My position, Mr. President, is that by having cyanide on the free list we shall protect the great industries here mentioned which are the principal users of cyanide.

I think we all recognize something of the difficulties under which the gold-mining industry has labored from 1915 down to the present hour, and why it is that the gold production of this country has fallen off more than one-half. I do not think it should be the policy of Congress to put any additional burdens upon that industry, but that it should, indeed, instead of putting an additional burden, adopt a policy of relieving the industry from some of its present burdens. It is estimated that one mine in my State, the Homestake Mining Co., will, under this bill, have to pay $8,000 because of the proposed tariff duty of 10 per cent upon cyanide.

This industry, Mr. President, in the Black Hills section of South Dakota has heretofore produced nearly $7,500,000 of gold and silver—principally gold—each and every year for a long period of years, and which employed at one time, I think, prior to 1915, about 3,500 men; has employed during the last three or four years about 1,600 men. That is some indication of the decline of the gold industry the country over and the unemployment of labor arising therefrom, and that it is all due to the great cost of producing gold during the last five or six years.

Mr. President, the gold producer is not like any other producer; he is not like the manufacturer who can pass the tariff upon the raw material on to the consumer to whom he sells. The price of gold is fixed, and there is no chance to pass a tax or a tariff of any kind on to any consumer or to any user of gold.

What is always the vital and important consideration in fixing of a tariff designed to protect an industry? The one great consideration always emphasized, to which we always revert, is not how to protect those who own and operate the industry, but how shall we protect those who labor in the industry, and by our system of wages provide for that higher standard of living to which we think the American workingman is entitled. That is the great question. Take that into account, and then weigh the benefits, so far as labor is concerned, of a tariff upon cyanide and the benefits that will accrue from having cyanide on the free list. How many men are engaged in this one cyanide plant in the United States, that of Roessler & Hasslacher Co.

in New Jersey? It is reported, I think, that they number 250 men; at any rate, that statement appears in the hearings two or three times.

Mr. FRELINGHUYSEN rose.

Mr. STERLING. One moment, if the Senator will excuse me. I heard the Senator from New Jersey state in some remarks which he made some time ago that 500 men were employed by the Roessler & Hasslacher Co. I am willing to admit that 500 men may be employed by that company, but how many men are employed in the gold-producing industry as workmen in that industry throughout the United States? There are at least 20,000 men so employed, and here it is proposed to impose a tariff for the benefit of 500 laborers instead of putting the article on the free list, which will in turn benefit 20,000 men who are engaged in the gold-mining industry alone.

I have said that the next and second most important use to which cyanide is put is that of fumigation, especially in the citrus industry. This is shown by the report or survey of the Tariff Commission from which I have read.

Mr. FRELINGHUYSEN. Mr. President——

The VICE PRESIDENT. Does the Senator from South Dakota yield to the Senator from New Jersey?

Mr. STERLING. I yield.

Mr. FRELINGHUYSEN. Will the Senator from South Dakota state just how great a burden the proposed duty will impose upon the individual miner? Has he figured that out?

Mr. STERLING. No; I have not figured that out. Has the Senator from New Jersey figured out just how much the individual worker with the Hasslacher Co. will be benefited by the tariff of 10 per cent ad valorem?

Mr. FRELINGHUYSEN. Yes; I have. It means his continued employment.

Mr. STERLING. I will say that, while I am not able to state how much the individual gold miner may be benefited, Mr. President, yet I can say that I think in many mines the miner would be benefited to the extent that he would run the risk of having the industry in which employed closed down if the proposed rate on cyanide were imposed, because the industry would be unable to pay the tariff added to the other excessive costs involved in the production of gold. As I have stated, it would cause one mine in the State of South Dakota, the Homestake Mining Co., to pay at least $8,000 if the tariff of 10 per cent ad valorem is added to the cost of production. Only 2 out of 12 or 14 mines in the Black Hills region are now operating.

All the others are closed down because of the excessive cost of production. The great Homestake is barely able to run, and is running on short time and with a reduced force, and the Trojan is the only other mine in operation in the Black Hills country. We can not in these great, vital industries, which are indispensable to the welfare of the country and of the world, add further to the cost of their production.

As I was about to say, the next highest use to which sodium and potassium cyanide are in fumigation, "Notably," says the Tariff Commission, "of citrus fruits," and so forth.

Do we want to add an additional burden to the thousands upon thousands of citrus-fruit growers of this country, those in California and along the western coast and in Florida? I do not think so. Measured again by the same standard used in connection with the production, namely, the labor employed, how many laborers in the citrus-fruit industry will be affected by the proposed duty? Of course, it requires thousands of them properly to fumigate the citrus-fruit trees in the orchards and on the fruit farms of California and Florida. Do we want to unnecessarily add this burden to their costs and to the continual risks which the citrus-fruit growers are compelled to assume year after year? I think not.

Mr. President, when we come to consider the question upon the basis of labor—the number of men employed—I think the principle to be observed is "the greatest good to the greatest number"; and you surely will affect beneficially a greater number by far by putting this product on the free list than you will by imposing a tariff for the protection of this one industry in all the United States—the Roessler-Hasslacher Co.

The Senator from New Jersey [Mr. FRELINGHUYSEN] has alluded to the German antecedents of this company. He has denied, on behalf of the company and its ownership, any pro-German proclivities. I am not questioning his statement in that regard, Mr. President, but I do have reason to believe, from the evidence furnished the Committee on Finance, that in addition to its being the only producer in the United States of sodium cyanide and potassium cyanide, it has its intimate connection with the German and the English interests. I think the evidence fully shows that between the Roessler & Hasslacher Chemical Co., standing alone as the only manufacturer in this country and acting in conjunction with its English and German allies, controls, aside from what is done by the American Cyanamid Co. on the Canadian side of the St. Lawrence River, not only the cyanide production in this country but the importations from other countries as well.

We have letters here in the hearings before the committee showing that when inquiry was made of those engaged in the industry in Great Britain and in Germany, the inquirers were referred invariably to the Roessler & Hasslacher Chemical Co. in the United States for their information, as though the product could not be bought nor negotiations be carried on in regard to its purchase unless, indeed, they consulted the Roessler & Hasslacher Co. What does that argue? Nothing else—it is the inevitable conclusion—than that, first, the Roessler & Hasslacher Co. is a monopoly, existing by virtue of the fact, first, that it is the only company manufacturing in the United States, and, second, it determines what shall come to the United States from foreign countries.

So, Mr. President, here is a case where I think, protectionist as I am, that the principle of "the greatest good to the greatest number" ought to prevail. We should protect the 20,000 persons engaged in the gold-mining industry, and protect the many thousands who are engaged in the citrus-fruit industry in this country, as against not exceeding 500 in the cyanide industry. The one appropriate means of protection, so far as this bill is concerned, will come from putting cyanide on the free list. I hope the amendment of the Senator from Nevada will prevail.

Mr. FRELINGHUYSEN. Mr. President, I understand that, as has been stated, the mining companies of Nevada now have a 25-year contract with the Canadian company, the American Cyanamid Co.

I have before me a telegram referring to a speech made by General Fries, in which he said:

> I consider sodium cyanide of very great importance. It is used extensively during peace time for electroplating and heat-treating of steel, for the recovery of rare metals, and on a large scale for fumigating orchards, and incidentally for exterminating animal and insect life in granaries, on board ships, etc. A certain percentage of it is also used in the dye industry. In time of war it may be used to electroplate our shells and boosters with zinc. It is also the basis of our second most effective tear gas, brombenzylcyanide, and other gases, such as cyanogen bromide and cyanogen chloride and diphenylcyanarsine, which were actually used or closely studied in the World War.
>
> Have received over 500 letters from customers addressed to their respective Senators commending us for keeping prices of cyanide low during the war.

That is from P. Samuel Rigney, who was connected with the company.

I have no interest whatsoever in this company. I never heard of them prior to the hearings of this committee, but I do feel, in regard to this product, that we should at least protect it and allow its manufacture to continue.

The Senator from South Dakota [Mr. STERLING] spoke of 250 employees, but he forgot to mention the related industries that supply the materials for the 16,000,000 pounds of cyanide of potassium that are produced every year, which takes 15,000,000 pounds of caustic soda, 7,000,000 pounds of American-burned charcoal, and 6,000,000 pounds of ammonia. All of these are products that require extensive manufacturing processes, and undoubtedly they employ labor, and it affects them; but far above that is the consideration as to whether or not we are going to allow the manufacture of cyanide of potassium in this country to continue, and upon that ground I am urging this duty.

The Senator from South Dakota spoke of the great burden on the laboring man. The Homestake Mining Co. estimated that a duty of 33⅓ per cent would increase the cost of treating a ton of ore 1.6 per cent. This is a duty of 10 per cent ad valorem—one-half a cent per ton increase in cost.

Mr. STERLING. Mr. President, will the Senator permit me to interrupt him?

Mr. FRELINGHUYSEN. I will allow the interruption; yes.

Mr. STERLING. The testimony shows that the Homestake Mining Co. crushes 4,000 tons of ore a day, and that the rate provided for in the bill in the first place—33⅓ per cent—would add $25,000 per annum to their cost of production.

Mr. FRELINGHUYSEN. Let the Senator read the statement of the Homestake Mining Co. when their stock was selling at 200, 300, 400 per cent; let him look at the dividends of the Homestake Mining Co. during the time when the duty of 12½ per cent ad valorem was imposed, and then answer me whether there was any greater burden on the miners or the Homestake Mining Co. Look at the dividends in 1918 and 1919 of the Tonopah Co., when it is shown that they made 23 per cent, and tell me whether unjust and undue burdens are placed upon the miners of the country when we impose a duty of half a cent a ton for concentrating the ore.

Mr. ODDIE. Mr. President, I should like to answer the Senator from New Jersey [Mr. FRELINGHUYSEN] by stating that his figures in regard to the increase in the cost of producing gold are not clear. There may be some individual mines, such as those in the Black Hills, where a large proportion of the values are extracted by the amalgamation process and a small proportion by the cyanide process—in other words, without the values extracted from the tailings by the cyanide process many of these properties would be forced to shut down.

Mr. President, in my State of Nevada I will give some figures taken from the cost sheets of one of our mills, the Belmont mill, in 1916. The cyanide consumption was 3.52 pounds per ton, costing $0.601. That means that the cyanide cost was 28 per cent of the milling cost. All mill purchases were $1.318 per ton, including cyanide.

In another mill in my State, the Churchill mill, in 1916 the cyanide cost was $0.375 a ton. All supplies consumed in the mill cost $1.445, and the cost of cyanide was therefore 25 per cent of the cost of all supplies. The total labor cost was 85.7 cents, therefore the cost of cyanide was 43 per cent of the total labor cost.

Mr. President, as I have said, there may be some mines which can afford an increased cost of cyanide, but the great majority of the gold mines of this country can not afford it. The gold production of our country has been cut more than in half since 1915, as the Senator from South Dakota has stated. The industry is suffering, and we need more gold. We may have a surplus of gold in our Treasury to-day, but we must look at the matter from a world standpoint.

Mr. President, I want to say a word for the prospector and the humble miner. There are others besides the very rich mines. The mountains in our western country have the hard-working prospectors — undergoing great hardships — climbing over them day after day and month after month and year after year, and in most cases unsuccessful. Now and then they discover something of great value, and they have to go through hardships which the people in this eastern country can not comprehend. I speak from experience, because I have been through them. I know that the burden of largely increased cost of production that has been imposed on the gold-mining industry during the last five or six years is unbearable; and it means, furthermore, that the investment of millions and millions of dollars in that industry is to-day lost to the investors.

I ask for justice. I ask that this matter may be looked at in a fair manner, and that Senators present will see that my request and the request of others, that no duty be imposed upon cyanide, will enable a fundamental and necessary industry to live.

Mr. PITTMAN. Mr. President, I have already spoken on this subject. I simply want to state this: I may not understand what the protection policy of the Republican Party is. The Senator from South Dakota [Mr. STERLING] has stated that the protection policy is against protection on cyanide under the condition of the facts in this case. I do not believe that that has been denied yet by the Senator from New Jersey; but in spite of that fact he wants a duty on cyanide.

There are certain undisputed facts in this matter which we might just as well try to remember. One of them is that the United States Government contends that the Roessler & Hasslacher Chemical Co. is still owned by foreigners. The control of the stock is now in the possession of the Alien Property Custodian. There is not any doubt about that. It is also undisputed, mind, you, that the Roessler & Hasslacher Chemical Co. was organized by two men sent here by a German syndicate. There is no question about that. It is also undisputed that this concern, the Roessler & Hasslacher Chemical Co., has never had any opposition in the United States since it was first established here in 1885. That is the fact. This concern has not only always had and now has the exclusive manufacture of cyanide in this country, but it has the exclusive distribution of it. It is simply a part of the German concern. It manufactures at this end of the line when it pays to manufacture here, and it simply sells to us here the German stuff when it pays better to sell the German stuff. That is all there is to that.

Mr. STANLEY. Mr. President——

The VICE PRESIDENT. Does the Senator from Nevada yield to the Senator from Kentucky?

Mr. PITTMAN. I do.

Mr. STANLEY. Does this company operate by virtue of a patent?

Mr. PITTMAN. It does.

Mr. STANLEY. Is it a patented process?

Mr. PITTMAN. It is a patented process.

Mr. STANLEY. Is that a German patent taken out in this country?

Mr. PITTMAN. Taken out in this country; yes.

Mr. STANLEY. Then we have the case of an absolute monopoly, controlled by a patent German owned and in the hands of the Alien Property Custodian, producing the entire product, and given a bonus under this bill?

Mr. PITTMAN. Yes; that is it exactly.

Mr. FRELINGHUYSEN. Mr. President——

The VICE PRESIDENT. Does the Senator from Nevada yield to the Senator from New Jersey?

Mr. PITTMAN. I yield to the Senator.

Mr. FRELINGHUYSEN. The statement I have is that the stock is in the hands of the Alien Property Custodian, has been advertised for sale, and was purchased, and at the present time an investigation of that sale is going on, but that a large portion of the stock is owned by American citizens and is now in the control of American citizens; that there are no patents; that the patents have expired, and that anyone can make cyanide under the process which was formerly patented.

Mr. PITTMAN. Mr. President, of course just before we went into the war there was not any question about the German concern owning this plant, but there was a sudden sale of a few shares so as to give the German-American citizens apparent control. The validity of that sale was attacked and the Alien Property Custodian took possession of that transferred stock. Where it is now I do not know, but that is immaterial. The fact remains that when mine operators in this country or growers of fruit trees try to buy cyanide in Germany, as they have tried to do, they are referred back to the Roessler & Hasslacher Chemical Co. as the sole and exclusive agents for the sale of cyanide in the United States. That is the evidence here admitted by the witnesses who appeared on behalf of the Roessler & Hasslacher Chemical Co.

There is but one place you can buy this material in the United States, and that is from this concern. The Senator says anybody can use the patent. The Senator must know he is not advised rightly in that, when the United States Government, in seeking patents throughout the world to make this cyanide, had to seek other patents and used what they called the Buscher patent, and it proved an absolute failure.

Of course, there are a lot of these patents they started on which have expired by limitation entirely, but, as any attorney knows, there are constant additions and improvements made to patents which, in effect, extend their life, and to-day those parties are afforded protection.

The fact remains that this is a German concern, and no one in this country who has engaged in business with them doubts it. That is what I am getting at. When the Mine Operators' Association of the State of Nevada applied to the German concern direct for cyanide, what were they told? They were told, in the first place, that the British Government had an embargo and would not allow the shipment, and when this Government agreed that it could be shipped, then they found out that this German concern had turned it into gas to fight our soldiers with, and now, after the war is over and this same operating association undertakes to buy cyanide from Germany, what are they told? They are told, "You can not buy a pound of cyanide from us. You go to the Roessler & Hasslacher Co., who are our exclusive agents in the United States."

If you go into Great Britain, where they make sodium cyanide, and try to buy a pound, what will they tell you? They will say to you, "We are not selling sodium cyanide in the United States. We are selling it solely in South Africa. We have an agreement with the German concern to divide up the world. We have our agencies in South Africa. The German concern has its agencies in the United States and Mexico."

The situation is simply this: They have made enormous profits on this chemical, and no one has attempted to deny that they have made enormous profits. They made those enormous profits when getting a rate not so very much above the rate they are charging at the present time. There is but one thing to this. It is a monopoly in this country which desires to continue to have a monopoly, and for the first time since 1895 there is opposition threatened to it, which comes from an American concern that was compelled to go across the river at Niagara Falls because it could get power cheaper over there. That American concern compelled this very trust to come down from 24 cents to 20 cents a pound on cyanide less than three months ago, and they never would have come down except for that.

Give them this advantage over this American concern, give them a 10 per cent ad valorem advantage, and they will start in to kill that concern. That is what they desire to attempt.

This question now appears in a different form from what it did originally, and I am afraid some Senators will not understand the form in which it is presented now. The House put cyanide on the free list. After the most careful and complete investigation the House found that there was no justification for placing any duty on cyanide. That is the way the bill came to the Senate. The Senate Committee on Finance has offered an amendment to place a duty on cyanide of 10 per cent ad valorem. That is the way the matter has been pending here during all of the debate.

To-day my colleague from Nevada [Mr. ODDIE] has offered an amendment to strike out the proposed amendment of the Finance Committee and to place cyanide on the free list. The result would be exactly the same as if a vote were taken on a motion to disagree to the committee amendment. If you strike out the proposed amendment of the Senate committee placing cyanide upon the dutiable list, it naturally goes back to where it was in the bill as it passed the House on the free list. But the junior Senator from Nevada thinks, possibly, that it would not only be well to strike out the proposed amendment of the Finance Committee, but to affirmatively say that we place it on the free list. I have no objection to that form of expression, although it may mean the same thing as the other. At least, those who are urging this duty of 10 per cent think it is on the free list in the bill as it passed the House.

Those, therefore, who are in favor of having cyanide on the free list must vote yea in the form in which the question is now placed by the amendment of the junior Senator from Nevada, because his amendment is to strike out the proposed duty of the Committee on Finance and substitute a paragraph stating that it shall be placed upon the free list.

If that amendment is defeated, then it comes back to the committee amendment providing a duty of 10 per cent. I take it the vote on that will be no. However, it raises the same parliamentary question which came up the other day, as to whether you will not have voted on it twice.

Mr. STANLEY. Mr. President——

The VICE PRESIDENT. Does the Senator from Nevada yield to the Senator from Kentucky?

Mr. PITTMAN. I yield.

Mr. STANLEY. In the hearings before the Committee on Agriculture and Forestry touching the production of cyanogen, which is a product similar to this, made by the same process, I understand, it developed that the world's supply of this product was produced by a German monopoly, with subsidiary companies in the United States and Great Britain. From what the Senator from Nevada has said as to the replies from the English producers, that they did not sell in the United States, and referring them to the German company, it is perfectly manifest that this company, whatever its nominal ownership may be, is a subsidiary company of a parent organization in Germany. In that event, this duty would be a bonus in favor of a German producer, and against a concern owned by American citizens who were forced to go across the line at Niagara Falls because of the fact that they could not get power in this country.

Mr. PITTMAN. I may say that practically all of the raw material used by the Cyanamid Co. across on the Canadian side is purchased in the United States. Its capital is all American capital, and practically all they get on the other side is hydroelectric power, according to the testimony. The materials come from this side. Of course, as far as the nitrogen is concerned, that comes out of the air, but otherwise it is practically as I have stated.

I have nothing personally against Mr. Roessler or Mr. Hasslacher. I am not discussing whether they were patriotic or unpatriotic during the last war. I know nothing about it. I am only discussing the case from the evidence. The evidence discloses that this thing is a trust, has been a trust; that it is an absolute monopoly, always has been, and always will be, unless you can break it down through this American concern operating at Niagara Falls.

I never said anything harsh against this company, but the Senator from Utah did. The Senator from Utah stated they were robbers during the war. I never said that, because I am not dealing in such personalities. I did, however, read from the RECORD disclosing how much they made, what profits their companies made, and that has not been denied.

In some of their subsidiary companies they made as high as 800 per cent, and in one as high as 1,000 per cent. This poor, weak institution, which has had no opposition since it started here, in 1895, is here now crying for a bonus, and that bonus is to come out of the pockets of gold and silver producers in this country, and out of the pockets of the fruit growers of this country. It is to come out of the buyers of cheap automobiles, because they use cyanogen in case hardening cheap automobiles. It is to be given deliberately to this concern as a bonus.

They say that the only reason why they want this power is to be sure they will have that concern here always in case of another war. That is the idea—just so that we will have it here in case of another war. In the first place, we are not ever to have any more wars. We settled that at the recent conference in Washington. But if we should have another war, let us remember that the Cyanamid Co. is an American concern, at Niagara Falls, and that the Cyanamid Co. did its part during the last war just as strongly and as efficiently as did the Roessler & Hasslacher Chemical Co. But I take it, it will be a pretty expensive proposition if we are to pay these people a bonus right along for the sake of having them here when the next war takes place.

Mr. LODGE. Is the Senator referring to the company at Niagara Falls?

Mr. PITTMAN. That is the Cyanamid Co.

Mr. LODGE. I am not sure that I know the name.

Mr. PITTMAN. There are two—one on one side of the Falls and one on the other.

Mr. LODGE. Which of the companies is it of which one-third is owned by the Roessler & Hasslacher Co. and another third by the German concern—two German concerns owning two-thirds and the British the rest. Is that the one on the Canadian side?

Mr. PITTMAN. No; that is the one on the American side. That is the Niagara Electro Chemical Co., a subsidiary of the Roessler & Hasslacher Chemical Co. In the division of the cyanide trade of the world between the British and the Germans, the British not only took their part of the world and gave the Germans this part of the world but they went further and said that as far as the particular institution which was to manufacture cyanogen, which is made at Niagara Falls, on this side, was concerned, they demanded a third interest in it, and they got a third interest in it, with the result that a third interest in it is owned by the British concern, a third interest by the German concern, and a third interest by the Roessler & Hasslacher Chemical Co.

Mr. LODGE. That is the one on this side?

Mr. PITTMAN. It is the one on this side.

Mr. LODGE. Where is the Cyanamid Co.?

Mr. PITTMAN. That is right across the Falls, on the Canadian side.

Mr. LODGE. Is that an American company?

Mr. PITTMAN. Every man in it is an American. It is an American corporation, organized in Maine. It buys all its material in the United States.

Mr. LODGE. Supposing there is no protection, that it is all free, where would the competition which is to keep the price down come from?

Mr. PITTMAN. The competition would come from the Cyanamid Co., which is on the Canadian side of the Falls.

Mr. LODGE. Owned by Americans?

Mr. PITTMAN. Owned by Americans. That is where the competition would come in. It has already come in. It has come in to such an extent that when bids were put out by the Mine Operators' Association for cyanamid for the ensuing year the Roessler & Hasslacher Co. asked 24 cents a pound. Heretofore they could get whatever they wanted, because this is the first year that the Cyanamid Co. ever attempted to sell cyanide for mining. It came in and bid 20 cents a pound. It underbid them 4 cents a pound on cyanide. Now the Roessler & Hasslacher Chemical Co. are asking leave to meet that 20 cents a pound to-day in the field and are meeting it, but when they had a monopoly they were charging 4 cents a pound more. That is what we have been up against all the time.

Mr. LODGE. Then, as I understand the Senator's statement, the increase in this duty will benefit the German interests.

Mr. PITTMAN. Undoubtedly.

Mr. LODGE. The American interests are on the Canadian side so far as the stockholders are concerned.

Mr. PITTMAN. I do not know it to be true, but I think Mr. Roessler and Mr. Hasslacher are now naturalized citizens of the United States. They have always held a substantial interest in this company, coming here as agents of the German concern.

Mr. LODGE. They are agents of the great German concern, the name of which I have forgotten?

Mr. PITTMAN. Yes. I have the name of it.

Mr. LODGE. They are a branch of that great concern?

Mr. PITTMAN. Yes.

Mr. LODGE. They are its selling agents here?

Mr. PITTMAN. They have the exclusive selling agency of the United States.

Mr. SMITH. Mr. President, may I ask the Senator a question?

Mr. PITTMAN. Certainly.

Mr. SMITH. Is there any other plant on this continent which produces cyanide save the one just across the river in Canada?

Mr. PITTMAN. There is not another plant on this continent and there is not another sales agency on this continent, except the Cyanamid Co., which is trying to break into this business.

Mr. WILLIAMS. The Senator means the Canadian company?

Mr. PITTMAN. I mean the American company on the Canadian side of the Falls.

Mr. McCUMBER. Mr. President, as my State is neither a producer nor to any extent a consumer of this product, I can not be charged with being biased as to whether a duty should be levied from that standpoint at least, or, if one is levied, what it should be. But I think it quite proper that the Senate, before passing upon the question, should get a general view of the whole subject. I am afraid that we have so particularized that possibly we have lost sight of the general aspect of the question.

I agree with the Senator from Nevada in that I do not think it worth while to take into consideration whether the people who have the stock in the Roessler & Hasslacher Chemical Co. were loyal during the war or whether they were not. The evidence before us, I think, is now to the effect that the stock is owned by Americans, if the sale is confirmed and not set aside. But whether it is or not, here is the situation: We have on this side of Niagara Falls an American concern or a single concern, and it is practically the only concern, which is manufacturing this product in the United States. We have on the other side another concern, the stock being held by an American company, which is manufacturing the same product on the other side. The product which is manufactured on the Canadian side is one-half the strength of that manufactured upon the American side, but inasmuch as the product is sold, of course, according to the 100 or 98 per cent strength, that would make no difference because it is sold on the basis of the sodium content.

Mr. PITTMAN. The Senator does not mean to say that because it is half the strength, it is imposing any fraud on the buyer?

Mr. McCUMBER. Oh, no; I explained that it is sold according to its sodium content, and therefore it makes no difference.

Mr. PITTMAN. None at all. It is only the cyanide in the mass that counts for anything.

Mr. McCUMBER. Certainly; the Senator is exactly right, and that was merely explanatory of the way they were doing business. So far as the consumer is concerned, there are practically only two sources on this side of the Atlantic where he gets his cyanide, one from the American company producing cyanide on the Canadian side and the other from another company producing it on the American side. The Canadian, by reason of having to pay only about one-half the sum the American pays for the water power which is used for the product, is enabled to manufacture cheaper than it can be manufactured on the American side. The estimate made by the committee is that about 10 per cent would equalize the difference in the cost of the manufacture—that is, 10 per cent of 10 cents a pound, which would be equivalent to about 1 cent per pound. I think that is substantially correct.

I do not know that it would make much difference to the American people whether they are held up by one organization or whether they are held up by another organization. If we drive one out of existence, of course then we are subject entirely to the other. The duty that we place upon the product seemed to us to just about balance the matter of production, putting the product into the American market. If both were kept running, there would be at least competition. If one of them was closed, if our duty was so high that it would close the Canadian mill or factory, of course we would suffer by it. But if it were just sufficiently high to allow the Canadian to come in and compete upon equal terms, there would be sufficient competition, we believe, to keep them both going.

When we turned back to the war time and prior to the time that we were producing it in quantities in this country, we found that the price went up to 56 cents per pound. Immediately after the war it dropped down as low as a little over 6 cents per pound, and it is now quoted generally at about 10 cents per pound. So I think it is to the interest of the consumer that both these producers shall be continued in business, as there seems to be quite keen rivalry between the two. I do not believe that the 10 per cent ad valorem is going to stop the importation for a single day from the Canadian side. Remember, as the Senator from Nevada has said, our principal competition comes from Canada. Of about 8,000,000 pounds imported in 1921, over 5,000,000 pounds came from Canada. The other imports were divided between countries of Europe, with Germany considerably in the lead, but the probabilities are that the real contest and competition will be between the American-owned Canadian company and the American-owned American company.

As to the cost, according to the testimony of the witness for the Homestake Mining Co., if 33⅓ per cent duty were added to the cost of the product—and that was assuming that the 33⅓ then proposed would add so much to the cost of the cyanide—it would cost his company 1.6 cents per ton in addition. Then if we divide that by one-third it would cost about 5 mills per ton, or one-half of 1 cent per ton, for the use of the cyanide in extracting gold. Of course, Mr. President, I do not think that will amount to a great deal or that it will seriously affect the output of the Homestake Mining Co.

The Senator from South Dakota [Mr. STERLING], speaking on behalf of and for the Homestake Mining Co. in his State, called attention to the fact that while only 400 or 500 men were employed in the American factory to produce cyanide, there were 20,000 or more men, if I understood him correctly, employed in extracting gold from the ore. Assuming that to be the case—the Senator and I are both protectionists—and while both of us will vote for protection upon our cattle and upon beef, I call the attention of the Senator from South Dakota to the fact that where there is one beef producer there are millions of beef consumers in the United States. We are both going to vote for a protection upon flour, and I call his attention again to the fact that while there are millers in number, and while their employees are infinitesimal compared with the entire American public, still we as protectionists will vote a protection upon the flour as we do upon the wheat. We might take any one of the great concerns of the country which produce less than 50 per cent of all that is consumed, and the argument that is applied by the Senator from South Dakota would apply in different degree.

I do not think this will add materially to the cost of cyanide. I think if both companies operate they will compete with each other. I do not for one minute believe that the added duty of 10 per cent, which is equivalent to 1 per cent or less on cyanide, will drive the American company, which is producing on the Canadian side, out of business, nor am I doubtful, even if we had less than that, if it would drive the other company out entirely.

It will have this effect: The American company—that is, the one producing on the American side—also produces a great many other products. Its products are not exclusively cyanide. It can drop its cyanide business, and if the Canadian competition was too strong it would drop its cyanide business and continue with its other products. The moment that was done, then I am inclined to think that there would be quickly an understanding between the Canadian, the British, and the German, and we would pay very dearly for not allowing the American concern to continue in business.

Mr. CUMMINS. Mr. President, I would like to ask a question of the Senator from North Dakota, if he is willing.

The PRESIDING OFFICER (Mr. LADD in the chair). Does the Senator from North Dakota yield to the Senator from Iowa?

Mr. McCUMBER. Certainly.

Mr. CUMMINS. Why is it that the manufacturers upon the American side must pay more for their power than the manufacturers upon the Canadian side?

Mr. McCUMBER. I will read from the testimony which I have here, if the Senator will allow me to do so. This is the statement of Mr. Rigney, who represents the Roessler & Hasslacher Chemical Co. It is not denied, and those who represent the other side admit, they get their power cheaper. This is what Mr. Rigney says:

> Our Canadian competitors just across the Niagara River gets its hydroelectric power at about one-half the price we are obliged to pay on the New York side. Canadian power companies enjoy what is practically a Government subsidy, in that they are not obliged to pay either Dominion or local taxes. Hydroelectric energy is a very important factor in the production of cyanide, and is a large element in its production cost.

They have investigated this question, and, while there was a claim to the contrary, I think those representing the Canadian side of the industry admitted that there was a difference of about 1½ cents a pound in their favor. However, we gave only the equivalent of 1 per cent ad valorem.

Mr. CUMMINS. I do not yet quite understand who is responsible for that difference in the cost. Who fixes the cost of the power on the American side?

Mr. McCUMBER. It is fixed, I suppose, by the commission that has to do with the production of power on the American side, and the Canadian cost is fixed under the Canadian laws; and under the Canadian laws the company is exempted from the taxes to which reference has been made. Therefore they secure the power more cheaply than it can be obtained on the American side. I can hardly answer the Senator from Iowa as to why that is so.

Mr. CUMMINS. If the commission could fix the rate for power on the American side so as to equalize that cost, then the two companies would be able to compete with each other on even terms.

Mr. McCUMBER. I might say that I am informed by the expert that the Canadian process—whether it is a patented process or not I do not know—is a somewhat cheaper process, in addition to their power being cheaper.

Mr. FRELINGHUYSEN. Mr. President, a great many statements have been made in reference to the German ownership of the Roessler & Hasslacher Co. It is true a portion of the stock of that company—I think some 3,800 shares—were owned by German interests and were taken over by the Alien Property Custodian. I understand that those shares have been offered for sale, but that the sale fell through, and that the Alien Property Custodian is still holding them. The company was inaugurated by German interests which came here in 1897 and settled at Perth Amboy. There was also a large American investment in the company. They manufactured chemicals prior to the war. They were a reputable concern, as were many of the other German concerns which came here and established industries, and during the war they were managed by American citizens and not by the Alien Property Custodian.

They manufactured cyanide of potassium, which was much needed during the war. They kept their prices uniform, as is shown by the scale of prices which I introduced in the record some time ago at about 30 cents per pound, I think, or perhaps 2 or 3 cents above or below that price.

I have written a good many of the industries in my State asking what their experience with this concern was, and they have stated that they were treated very fairly by the company during the war; that the company did not profiteer when the supply of cyanide from Germany was cut off; and that they were enabled to get the product which they used and utilized in their industries at a very reasonable price.

The situation is this: The large mining companies in the West do use 1,000,000 or 1,250,000 pounds of cyanide of potassium, but the American consumption is 17,000,000 pounds a year. It is utilized in many of the industries in my State, which are willing that cyanide should be protected because they feel that they should be independent of foreign countries. Besides that, 15,000,000 pounds of caustic soda and charcoal and ammonia are used, and those American products are utilized.

The question is whether we are going to protect this industry or are going to destroy it simply because the Homestake Mining Co. or the Tonapah Mining Co., which are making probably as large profits as do the Roessler & Hasslacher Co., want to cut down their costs of gold mining. That is the point. The question is one of protecting the American industry as against a Canadian industry, into which American capital has gone, in order to secure lower water-power rates, and which employs Canadian labor and uses Canadian raw materials, as I am informed. The whole principle of protection to American industry will be destroyed in this instance if this article is placed on the free list, when prior to 1913, as I understand, it had a protective tariff higher than the duty now proposed to be imposed by the Finance Committee.

Mr. NORRIS. Mr. President, the Senator from Iowa [Mr. CUMMINS] has asked a very interesting question, namely, Why is the hydroelectric power cheaper on the Canadian side than it is on the American side? The Senator from New Jersey [Mr. FRELINGHUYSEN] has just said that American capital went over into Canada across the river, where it could get cheaper hydroelectric power.

Not long ago a great many corporations engaged in the production of hydroelectric power in America appointed a very noted engineer to investigate the cost to the consumer of hydroelectric power in Canada and in America. The Canadian hydroelectric energy comes from governmental operation. In America it is privately owned. It was to the interest of those interested to show that privately owned concerns supply the consumer with electricity cheaper than public concerns over in Canada, and the noted engineer to whom I have referred made that kind of a report after a full investigation, and concluded that the consumers in America were supplied with hydroelectric power cheaper than it was supplied to the Canadian people by the government-owned operations. That was when they were trying to prevent Government operation of hydroelectric plants on our streams and to foster the idea of having such operations conducted by privately owned concerns. When it is looked at from that viewpoint they are able to demonstrate from expert testimony that private concerns furnish the power cheaper and that we have cheaper electricity on this side than on the Canadian side. When, however, for the purpose of a tariff it is to their interest to show that electric power is cheaper in Canada, they reach the opposite conclusion, and we are told that this corporation went to Canada, where they could buy their electric energy cheaper than they could in America. So Senators can take their choice; it is "heads I win and tails you lose."

Mr. STANLEY. Mr. President, did the same experts reach a different conclusion at the same time?

Mr. NORRIS. No; that would make an argument that would be too easily refuted; there were different experts, of course.

Mr. ODDIE. Mr. President, I think it will be found on investigation that the American Cyanamid Co. uses practically twice the amount of power for manufacturing their product as is used by the concern on the American side; so it is necessary that they have cheaper power.

I should like further to emphasize the fact that the American Cyanamid Co. which manufactures its products on the Canadian side buys all of its raw material from Pennsylvania and other of our States.

Mr. HITCHCOCK. Mr. President, I think this case presents a most delightful specimen of the possible absurdities of the protective tariff system. The Niagara River flows between Canada and the United States; the people living on the Canadian side of the river are very much like the people living on the United States side of the river; the same water gives power on each side of the river; but now we are told that it is necessary to have a protective tariff enacted in order that a factory on the American side of the river shall be able to compete with a factory on the Canadian side of the river, although each factory derives its power from the electric current generated by the same stream of water at the same time.

Mr. WILLIAMS. Probably they have pauper water on the Canadian side and pauper labor.

Mr. HITCHCOCK. Yes; as the Senator from Mississippi suggests, they have probably pauper water and pauper electric current on the Canadian side of the river and that may make a difference.

Mr. STANLEY. Mr. President, I am very much surprised at the argument of the Senator from Nebraska, who is a great scholar and a great statesman. Does he not know that hydroelectric power is derived by force of gravity acting upon a cubic foot of water falling a certain distance, and does he not know that there is a different law of gravitation on the Canadian side than that which prevails on the American side? Does he not further know that we are bound to equalize the difference in the operations of a natural law on the one side of the Niagara River as against the other, or the law of gravitation will bankrupt everybody on this side?

Mr. HITCHCOCK. There seems to be a very violent dispute between the tariff law and the law of gravitation in this case.

Mr. ODDIE. Mr. President, will the Senator yield?

Mr. HITCHCOCK. I yield to the Senator.

Mr. ODDIE. I should like to suggest to the Senator that the American Cyanamid Co., which manufactures this product on the Canadian side, pays practically the same wages that are paid in the United States. There is also another principle involved here: The Senator knows that the price of gold has been fixed by the Government, and the Senator knows that a duty on cyanide will add an increased burden on the gold-mining industry which can not be passed on to the consumer, because the Government has fixed the price.

Mr. HITCHCOCK. Mr. President, I must say I view the position of the Senator from Nevada [Mr. ODDIE] with somewhat mixed feelings. I would sympathize with his position, as representing the mines of Nevada, if he had the same interest in protecting the American consumer in other schedules of this outrageous tariff bill that he now manifests when it hits particularly a special interest of his own constituents. This tariff duty levied against this particular article, cyanide, is not any more iniquitous, so far as the consumers of cyanide are concerned, than many of the other rates are against the plain, ordinary garden variety of consumers—the American citizen. I notice that a number of Republicans over there who are very ardent for imposing outrageous duties for the protection of their industries and for the extortion of higher prices from the American consumers seem to see a new light when a tariff duty is imposed in such a way as to increase the cost of certain articles for particular industries in their States, and yet the principle is exactly the same.

Seriously, however, I intended when I rose to refer to the fact that testimony taken before the Committee on Foreign Relations some years ago, when that committee had under consideration the question of hydroelectric power on the Canadian side of the river and the United States side of the river did not reveal that there was any difference in cost to speak of. There may be a little exemption from taxation, which has already been commented upon by the Senator from Iowa, but that is more than overcome by the fact that the factory on the Canadian side of the river not only pays the same for labor on that side that the power-house pays on this side of the river but it purchases in the United States many of the materials which it uses; and to bring in here as an excuse for the imposition of this tariff the fact that there is a fractional difference in the cost of power on the Canadian side of the river and on the American side is to my mind absurd.

Mr. President, as I understand, this is the history of the power situation along the Niagara River: We entered into a treaty with Canada for the purpose of preserving Niagara Falls. We were the moving party. The United States was active in bringing about the treaty; and in order to induce Canada to consent to a limitation of the water power to be taken out of the Niagara River, we agreed that the United States would consume less of that power than we accorded to Canada the right to consume. The actual fact is to-day that we are using all of our power on this side of the river, and not only that, but we are bringing power from Canada over to the United States side by wire and are actually using Canada's hydroelectric power on the United States side of the river in competition with the power which we take out on this side of the river.

Mr. CUMMINS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Iowa?

Mr. HITCHCOCK. I yield to the Senator.

Mr. CUMMINS. The Senator from Nebraska was in error when he said that I commented upon the exemption from taxation upon the Canadian side, for I knew nothing about it. That was a statement made by the Senator from North Dakota [Mr. MCCUMBER]. What I was interested in was in finding out, if I could, why it costs more for power upon the American side than upon the Canadian side. I knew that some years ago the very unfair arrangement was made between the United States and Canada that allowed Canada to use a greater proportion of the power developed by Niagara Falls under that arrangement than was permitted in the United States. I suppose there is no way of avoiding that unjust arrangement, as I regarded it at the time, and still regard it; but who determines what the manufacturer on either side of the river shall pay for the power developed? That is what I want to know; and the Senator from Nebraska, having been very familiar with the arrangement made between the United States and Canada, may be able to answer that question.

Mr. HITCHCOCK. I am not certain that I can, Mr. President. I have the impression, however, that the New York Legislature has assumed jurisdiction to regulate in some way the charge for the power or the distribution of the power in the State of New York. I know that the War Department has had some authority in licensing those who take water power from the supply, but I think the New York Legislature has placed some limit upon the charge.

Mr. CUMMINS. Then the Senator thinks that it is the Government—either the New York government or the United States Government—that determines what the American manufacturer upon this side shall pay for the power which is developed in his factory, whatever business he may be in; and it must be the Canadian Government that fixes the rate which shall be paid for power developed upon the other side.

Mr. HITCHCOCK. I think that is probable.

Mr. CUMMINS. What is the difference between the two? That is what I am trying to find out. The statement read by the Senator from North Dakota does not satisfy me at all, because, whoever the gentleman is, he refers to the effect upon the output rather than to the terms under which each of the companies is operating.

Mr. HITCHCOCK. Mr. President, of course I do not know. I think the burden of proof is upon the committee, if it proposes to impose this barrier against this import from a single factory on the other side of the river, to show why it is done and what the difference is. The only thing that the chairman of the committee has stated is that the Canadian Government makes some exemption from taxation. That would be explained by what my colleague [Mr. NORRIS] has said, that on the Canadian side the Government has erected the power plant and sells the power at a moderate cost, probably, to the consumers there. I am advised, however, that there is an excess of power on the Canadian side of the river, and that the power on the United States side of the river is fully consumed, so that under a license it has already happened that power has been brought from the Canadian side of the river by wire over to the American side and sold to the establishments on the United States side of the river.

If that is the case, I suggest to the chairman of the Committee on Finance at this time that a tariff ought to be imposed against that pauper electric current coming over from the Canadian side and being sold in competition with the United States current on this side. If we are actually getting pauper electricity from the Canadian side of the river, there ought to be a tariff imposed against it for the protection of the electricity of the United States.

But, Mr. President, how about the Republican doctrine of the infant industry? Here we have been told that the manufacture of cyanide in this country is a monopoly; that it is allied with the German monopoly; that it is a part of it; that it has been in existence since 1885; that it is a long-established and a wealthy monopoly, making a profit so great that it runs up into the hundreds of per cents, as I understood the Senator from Nevada to say. It has been in operation 38 years, and is making enormous profits. On the other side of the river, the Canadian side, the only competition is from an establishment only built during the war, which has only just barely begun to enter the American market; and yet it is necessary against that infant on the other side of the river to impose this tariff for the protection of this giant, this rich and prosperous concern, upon the United States side of the river.

Mr. FRELINGHUYSEN. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from New Jersey?

Mr. HITCHCOCK. I yield to the Senator.

Mr. FRELINGHUYSEN. Does the Senator know who owns the American Cyanamid Co.?

Mr. HITCHCOCK. I understood that the ownership had been pretty well established so far.

Mr. PITTMAN. Mr. President, the testimony—and that is all I am going by—is to the effect that the stock is owned by American citizens, that it is a Maine corporation, and that all the material it buys, except the water power, is bought in the United States.

Mr. HITCHCOCK. What I say, Mr. President, and then I have not anything more to say, is that this is really the height of absurdity. This is carrying the old idea of protection to an absolutely absurd point.

Mr. WILLIAMS. Mr. President, I want to say just one word.

This is the newest theory for the justification of a tariff tax that I have ever heard. I have heard the infant-industry theory. I know it by heart. I have heard the pauper-labor theory. I know that nearly by heart. I have heard of the independence-of-industry theory. I know that tolerably well. This, however, seems to be an effort to protect ourselves or our industries against greater taxes in the United States than exist in some other countries—in other words, to vote out of the Treasury a certain amount of money collected by taxation in order to make up for the inefficiency of the Government of the United States in levying taxation of another character.

Surely the water is not pauper. The taxation may be pauper because it is less than ours, as wages are said to be pauper whenever they are less; but to begin this brand-new theory that wherever taxation in another country is less than it is in America we ought to have a tariff to equalize the burdens which our own State or National Legislatures have laid upon our own industry is the newest brand-new thing that has ever been suggested to a political economist.

Mr. ASHURST. Let us have the yeas and nays, Mr. President.

Mr. MCCUMBER. Mr. President, the Senator from Mississippi [Mr. WILLIAMS] is almost always absolutely fair in his discussion of every subject, and if he breaks away from his good rule once in a lifetime I can easily excuse him for doing it.

Mr. President, we are not attempting to make the taxation basis, any more than we are attempting to make the law of gravity, the rule by which we are to determine whether a thing costs more or less on the Canadian side. Freedom from taxes, relief from taxes, may enable a company upon the Canadian side to sell its power cheaper than one on this side which has to pay taxes; but, after all, it is a difference in the cost of the hydroelectric power without reference to what was the cause of making it cheaper on the one side or on the other.

Mr. WILLIAMS. That is all I have said; and if I am mistaken in the statement that there is a desire to equalize our

overtaxation with the Canadian undertaxation as compared the one with the other, then I got the information, as I thought, unless I misheard him, from the Senator himself a moment ago. I thought he said that the fact that these people could undersell us in their power was owing to the fact that they were taxed less; in other words, they were exempt from certain taxes in Canada to which the power on this side was subjected. Is not that true? Is not that what the Senator said?

Mr. McCUMBER. The real thing that is true is the fact that they sell their power to produce the cyanide on the Canadian side cheaper than the same power can be bought on this side.

Mr. WILLIAMS. Then we come to just what I said.

Mr. McCUMBER. The Senator asked me why that was so, and, of course, I had to tell the Senator why it was so, and that was one of the elements entering into the reason.

Mr. WILLIAMS. I did not ask the Senator why it was so. I merely made the statement that, according to the Senator's statement, he wanted this tariff tax because the power paid less taxation in Canada than it did on the American side.

Mr. McCUMBER. No, Mr. President; the Senator is mistaken.

Mr. WILLIAMS. Then I made the further statement that that was a brand new theory, to the effect that we must equalize between the undertaxation of a foreign country and the overtaxation of our own; in other words, that if we were, compared to a foreign country, inefficient and uneconomical as a governmental agency, then we must levy a tax upon all the people, who were not to blame for the legislation, in order to equalize the inequality thereby produced.

Mr. McCUMBER. The Senator was mistaken, because, of course, I took no such view. I stated that it cost more for the hydroelectric power on this side of the river than it cost upon the other, and, as that is used in the production of cyanide, it must necessarily cost more to produce upon this side than upon the other, other things being equal. It made no difference to me what the causes were which entered into a higher charge being made upon this side than upon the other side, but, inasmuch as the Senator from Iowa asked me for the reasons, I proceeded to give him one of the reasons, which was that on the Canadian side the Canadian producer, which is really the Government, is not subjected to any taxation whatever, whereas on the American side the producer does have to pay his taxes.

But there is another reason I want to give, in addition to that, which the Senator from Mississippi and myself always agree is one of the governing factors in fixing prices, and that is the law of supply and demand. On the American side the amount of power allotted has been used up, and you can not get any more power from the American side at the present time. They have sold all of the power they have, and have nothing more to sell, and can hold up their prices, whereas on the Canadian side they have more power than they have customers for, and therefore, in order to sell the power, they can sell cheaper.

Taking that in connection with the fact that they are not subjected to taxes, they actually do sell their power cheaper, and, as I understand, it stands in the ratio of about 12 to 8—that is, 12 on the American to 8 on the other side—and that makes a material difference in the cost of production. So we tried by our duty to about equalize the cost of production on the one side and on the other.

Mr. WILLIAMS. Mr. President, I would like to ask the Senator this question, for I have the highest admiration and respect for his intellectual integrity: Does not the Senator really think that the difference in price at which these two companies can sell their products is more owing to the superiority of patents of the company which is operating on the Canadian side to the patent of the company operating on this side than to any other one cause?

Mr. McCUMBER. I gave the three. I mentioned that as one of the elements.

Mr. WILLIAMS. Does the Senator think that the taxing power of the United States ought to be used for the purpose of overcoming intellectual inferiority in methods pursued on our side of the Niagara River?

Mr. McCUMBER. After a patent is once obtained by a company the question of intellectual superiority on inferiority does not enter into it to any extent. The other company can not use the patent, while the company which owns it can use the patent.

Mr. WILLIAMS. But one is using the more intellectual process than the other, a superior process, and that is a grade of intellectual comparison.

Mr. McCUMBER. But the three elements enter into the question, and the fact remains that the Canadian does produce cheaper.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Nevada [Mr. ODDIE] to the committee amendment.

Mr. ASHURST. May we have the amendment stated again so that we will understand the particular question to be voted on?

The PRESIDING OFFICER. The Secretary will state the amendment to the amendment.

The ASSISTANT SECRETARY. The Senator from Nevada moves to strike out the committee amendment where it appears on page 18, known as paragraph 33a, and to insert the same words, down to the word "cyanide," on line 5, at page 220, after line 11, as paragraph 1560a, or in the free list.

Mr. PITTMAN. As I understand it, an affirmative vote means to put it on the free list, and a negative vote means 10 per cent ad valorem?

The PRESIDING OFFICER. That is correct.

Mr. HARRISON. I ask for the yeas and nays.

The yeas and nays were ordered, and the Assistant Secretary proceeded to call the roll.

Mr. FRELINGHUYSEN (when his name was called). Making the same announcement as before, I vote "nay."

Mr. HALE (when his name was called). Making the same announcement as before, I vote "nay."

Mr. SIMMONS (when Mr. OVERMAN's name was called). I desire to announce that my colleague [Mr. OVERMAN] is unavoidably detained from the Senate. I ask that this announcement may stand for the day.

Mr. WARREN (when his name was called). Making the same announcement as to my pair and its transfer that I made earlier in the day, I vote "nay."

Mr. WATSON of Georgia (when his name was called). Making the same announcement as before, I vote "yea."

Mr. WILLIAMS (when his name was called). I have a general pair with the Senator from Indiana [Mr. WATSON]. I transfer that pair to the Senator from Louisiana [Mr. RANSDELL] and vote "yea."

The roll call was concluded.

Mr. JONES of Washington. I wish to announce the following pairs:

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN];

The Senator from Rhode Island [Mr. COLT] with the Senator from Florida [Mr. TRAMMELL];

The junior Senator from Ohio [Mr. WILLIS] with the senior Senator from Ohio [Mr. POMERENE];

The Senator from Indiana [Mr. NEW] with the Senator from Tennessee [Mr. McKELLAR]; and

The Senator from New York [Mr. CALDER] with the Senator from Alabama [Mr. HEFLIN].

The result was announced—yeas 46, nays 14, as follows:

YEAS—46.

Ashurst	Hitchcock	Myers	Simmons
Bursum	Johnson	Nelson	Smith
Capper	Jones, N. Mex.	Newberry	Spencer
Cummins	Jones, Wash.	Nicholson	Stanley
Dial	Kellogg	Norbeck	Sterling
Elkins	Kendrick	Norris	Swanson
Ernst	Keyes	Oddie	Underwood
Fletcher	Ladd	Phipps	Walsh, Mass.
Gerry	La Follette	Pittman	Watson, Ga.
Glass	Lodge	Rawson	Williams
Harris	McKinley	Robinson	
Harrison	McNary	Sheppard	

NAYS—14.

Ball	Frelinghuysen	McLean	Sutherland
Brandegee	Gooding	Page	Warren
Dillingham	Hale	Pepper	
France	McCumber	Smoot	

NOT VOTING—36.

Borah	du Pont	Moses	Shortridge
Broussard	Edge	New	Stanfield
Calder	Fernald	Overman	Townsend
Cameron	Harreld	Owen	Trammell
Caraway	Heflin	Poindexter	Wadsworth
Colt	King	Pomerene	Walsh, Mont.
Crow	Lenroot	Ransdell	Watson, Ind.
Culberson	McCormick	Reed	Weller
Curtis	McKellar	Shields	Willis.

So Mr. ODDIE's amendment to the committee amendment was agreed to.

Mr. HARRISON. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. HARRISON. Is it in order for the Secretary to tell us how many Republicans failed to vote on the roll call just had?

The PRESIDING OFFICER. It is not in order at this time.

Mr. McCUMBER. In order to see whether it is necessary for any protection in placing this product upon the free list,

I ask the Secretary to read the proposed amendment which was just agreed to.

The ASSISTANT SECRETARY. It is proposed on page 18 to strike out all of the committee amendment and to insert the same words, down to and including the word "cyanide" printed on line 5, at page 220. after line 11, as follows:

PAR. 1560a. Cyanide, potassium cyanide, sodium cyanide, all cyanide salts and cyanide mixtures, combinations and compounds containing cyanide.

Mr. McCUMBER. I understand that is all included in the one motion?

The PRESIDING OFFICER. The Senator is correct.

Mr. McCUMBER. I wish to suggest to the mover of the amendment that we ought to have in it, after the word "cyanide," the words "not specially provided for." I ask if it was his desire to eliminate that?

Mr. ASHURST. Mr. President, a point of order. That may not be done under the precedent established to-day. We are falling into the very trap against which some of us warned Senators. The Senate having adopted an amendment to the amendment it can not further amend the provision under the precedent set to-day.

Mr. McCUMBER. The Senator is entirely wrong.

Mr. LODGE. This was a rejection.

Mr. ASHURST. No; it was not a rejection.

Mr. PITTMAN. As I understand it, we have now adopted an amendment to the committee amendment. Is not the question now upon the adoption of the committee amendment as amended?

Mr. McCUMBER. My query was whether it is the desire of the Senator from Nebraska to eliminate the words "not specially provided for,' because there are so many of the products that are specially provided for that, in order to make the matter certain, these words should be included, as the item is carried over into the free list.

Certainly no one is claiming for a single moment that we can change the vote which has been had and which has stricken this item off the dutiable list and put it upon the free list, but of course we can amend in a manner which does not change that, and perfect it as it goes into the free list. I wanted to get the opinion of the two Senators from Nevada, who have taken a strong interest in this item, as to whether that usual provision should go in at the end of the paragraph.

Mr. WILLIAMS. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. WILLIAMS. I may have misheard, but I understand that the only thing done was to strike out the duty fixed by the committee. If that be the case, the question arises whether the product is dropped into the basket clause or whether it is left upon the free list.

Mr. McCUMBER. The Senator is mistaken. I understand the motion was to strike it from the dutiable list and insert the same in the free list.

Mr. WILLIAMS. Then I was mistaken.

Mr. McCUMBER. But in the motion there were not included the words "not specially provided for."

Mr. PITTMAN. I think we can take that matter up after the question is voted on finally. I am perfectly sure that we can take that matter up, and if there is anything to be eliminated along that line we can do it then.

Mr. McCUMBER. There is no question that we can.

Mr. PITTMAN. I now ask for a vote upon the amendment as amended.

Mr. McCUMBER. I have no objection. I only desired to get the Senator's wish, because when we reach it in the Senate, or otherwise, the usual clause should be inserted.

Mr. PITTMAN. Yes; that is very true.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment as amended.

The amendment as amended was agreed to.

The PRESIDING OFFICER. What item does the Senator from North Dakota wish to take up next?

Mr. McCUMBER. I desire now to go to page 20, paragraph 47.

The PRESIDING OFFICER. The Secretary will report the amendment on that paragraph.

The ASSISTANT SECRETARY. On page 20, paragraph 47. Magnesium: Carbonate. The committee proposes, in line 18, to strike out "three-fourths" and insert "one-half," so as to read:

Chloride, one-half of 1 cent per pound.

Mr. SMOOT. Would it not be better to take up paragraph 204a?

Mr. JONES of Washington. My colleague is not here, and I know that he expects to take up that paragraph after the dye proposition is disposed of.

Mr. SMOOT. He told me he would be ready to go on with it to-day.

Mr. JONES of Washington. I spoke to him about it on Saturday, and he said he would be ready to take it up after the dye proposition was discussed.

Mr. SMOOT. I spoke to the Senator's colleague to-day right after we convened, and he said he could go on with it to-day if we reached it.

Mr. JONES of Washington. He is not here, and he ought to be here when it is taken up, because he has given it special attention. I think he is absent on committee work, but I do not know exactly where he is.

Mr. McCUMBER. Let me first explain the situation as indicated by the question of the Senator from Utah. The committee proposes to strike out, on line 22, the words "and calcined magnesite, including dead burned and grain, three-fourths of 1 cent per pound; and magnesite, crude or ground, one-half of 1 cent per pound." Then in lieu of that they propose to insert, on page 33, in paragraph 204a, the words, "Crude magnesite, five-sixteenths of 1 cent per pound, caustic calcined magnesite, five-eighths of 1 cent per pound," and so forth. That is, to take it out of the chemical schedule where it is placed now and put it into the earthen schedule where it belongs, and to change it to some extent. So it does not make very much difference which one we take up first. Inasmuch as I do not think it belongs in this schedule, we should first decide to take it out of this schedule, and when we reach it in the proper place then we can determine what the rate should be.

Mr. JONES of Washington. What my colleague desires, and I know what I desire, is to defeat the amendment on page 20 and leave the rate as the House provided.

Mr. SMOOT. I think it would be very much better to take up paragraph 204a, crude magnesite, first.

Mr. McCUMBER. It does not make a bit of difference to me. We have both before us, and if it is more convenient to Senators I will ask that we take up paragraph 204a, on page 33.

Mr. JONES of Washington. Mr. President, I am not prepared to say that we want to take that up now. My colleague is on the way here, and he has made special preparation to take up the subject. It seems to me proper to take up the amendment on page 20. I know that would be my preference, so far as I am concerned. My colleague is on the way now and will be here in just a few moments, so if there is anything else we can take up, probably it would be well to do so. He will be here inside of two or three minutes.

Mr. McCUMBER. Can not the senior Senator from Washington discuss the matter?

Mr. JONES of Washington. My colleague is specially prepared to discuss it, and I would prefer that he should do it.

Mr. McCUMBER. I understand the Senator's colleague is at the Attorney General's office. So he can hardly get here in a few minutes. However, I will see if I can find another paragraph. Can we proceed to paragraph 319, the metal schedule, anchors?

The PRESIDING OFFICER. The paragraph will be reported.

The ASSISTANT SECRETARY. On page 61, paragraph 319, in line 16, the committee proposes to strike out "25" and insert "30," so as to read:

Iron or steel anchors and parts thereof; forgings of iron or steel, or of combined iron and steel, not machined, tooled, or otherwise advanced in condition by any process or operation subsequent to the forging process, not specially provided for, 30 per cent ad valorem.

Mr. ROBINSON. My colleague the junior Senator from Arkansas [Mr. CARAWAY] has looked into this subject and he is not in the Chamber just now. He left here with the understanding that other paragraphs in the schedule passed over would be taken up. Is there not something in the other schedules that might be considered now? What about brick?

Mr. McCUMBER. We have agreed that we will not act upon brick until we get through with magnesite, because it enters into brick.

Mr. ROBINSON. It may be appropriate to postpone it. I had not entered into any such agrement, however. It went over at the request of Senators on the other side of the Chamber for several days because they were not prepared to take it up. I was not informed of any such agreement.

Mr. McCUMBER. There is so much confusion in the Chamber that I can not understand what is going on. Does the Senator object to taking up paragraph 319?

Mr. ROBINSON. I have just stated that my colleague [Mr. CARAWAY] had looked into that paragraph and had expected to discuss it. He is on his way over here now, I am told.

Mr. SIMMONS. I understand the Senator from Texas [Mr. SHEPPARD] has some other matter which he was looking after that he is ready to take up now.

Mr. SHEPPARD. Paragraphs 351, 352, and 353 might be disposed of without any considerable discussion. No changes have been made by the committee in paragraphs 351 and 352, and there is only one amendment that I desire to offer to paragraph 353.

Mr. McCUMBER. Very well.

The ASSISTANT SECRETARY. On page 71, paragraph 353, fountain pens, in line 15, the committee proposes to strike out "valued at not more than $2 per dozen, 72 cents per dozen; valued at more than $2 and not more than $6 per dozen, $1.50 per dozen; and in addition thereto, on all of the foregoing, 25 per cent ad valorem" and to insert "72 cents per dozen and 40 per cent ad valorem," so as to read:

Fountain pens, fountain penholders, stylographic pens, and parts thereof, 72 cents per dozen and 40 per cent ad valorem: *Provided*, That the value of cartons and fillers shall be included in the dutiable value.

Mr. SHEPPARD. Mr. President, while the committee has not attempted to amend paragraph 351, I think it well to submit a few comments upon it.

Mr. McCUMBER. Mr. President, the Senator's argument may read very well to-morrow in the RECORD, but it is of no advantage to us here unless we may hear it, if we are going to vote on the question to-day.

Mr. SHEPPARD. No vote can be taken on this paragraph, because the committee has made no change in it; and I merely want to submit a brief comment on it preparatory to offering an amendment when an amendment shall be in order.

Mr. LODGE. The Senator from Texas is speaking about paragraph 351?

Mr. SHEPPARD. I refer to paragraph 351.

Mr. LODGE. There is no amendment to paragraph 351, and only amendments to committee amendments are now in order.

Mr. SHEPPARD. I understand that; but I merely wish to make certain comments on this paragraph and the following one before proceeding to paragraph 353. My remarks will be brief; they will not take up much time.

Mr. McCUMBER. All I desire to do is to hear the Senator from Texas.

Mr. SHEPPARD. Mr. President, I wish to say a word with reference to paragraph 351, which reads as follows:

Pens, metallic, not specially provided for, 12 cents per gross; with nib and barrel in one piece, 15 cents per gross.

It should be said that this paragraph repeats the action of the House without change, and reproduces without change the provisions relating to these articles in the Payne-Aldrich bill of 1909. The rates carried in this paragraph as it reaches the Senate, and as they appeared in the bill as passed by the House and in the Payne-Aldrich enactment, involve an increase over existing Democratic duties of about 25 per cent. The increase is not justified. In 1919 the home production of these pens had a value of $1,706,000, exports a value of $569,239, and imports a value of about $277,000.

In 1920 the imports amounted to about $400,000, and during the first nine months of 1921 to $170,000, approximately.

The exports had a value in 1920 of $489,826, and during the first nine months of 1921 of $83,165. So we see, Mr. President, that under the existing Democratic rate the domestic industry is not only meeting domestic needs, but that there is a considerable volume of exportations from year to year.

In 1919 the principal countries to which these articles were exported were the United Kingdom, British India, Brazil, and Cuba, and in 1920 the United Kingdom, Brazil, British India, and Cuba.

As to the next paragraph, paragraph 352, dealing with "penholder tips, penholders and parts thereof, gold pens, combination penholders comprising penholders, pencil, rubber eraser, automatic stamp, or other attachments, it may be said that under the existing Democratic rate there was in 1919 an output valued at $1,801,000. The imports in that year amounted to only about $7,000 and the exports to $200,354, yet the pending bill proposes a substantial advance over the present Democratic tariff of 25 per cent ad valorem.

I may say here that home production under the existing rate grew from a value of $642,461 in 1914 to $1,801,000 in 1919, showing that the industry is making steady progress under the existing tariffs, and that, therefore, there can be no good reason for so pronounced an increase as is proposed by the bill as it came from the other House.

The imports in 1920 had a value of $12,000 and during the first nine months of 1921 of about $8,000.

The exports in 1920 had a value of $222,376 and during the first nine months of 1921 a value of $146,243.

The principal countries to which exports of these articles were sent in 1919 were the United Kingdom, Canada, Brazil, and Argentina, and in 1920 the United Kingdom, Canada, Argentina, and British India. There again, Mr. President, the fact that the domestic industry is not only supplying all the needs of the American people but is exporting considerable amounts in addition, while imports remain so small, is certainly an argument against any increase in the duties.

Now we come to paragraph 353, which reads as follows:

PAR. 353. Fountain pens, fountain-pen holders, stylographic pens, and parts thereof, valued at not more than $2 per dozen, 72 cents per dozen; valued at more than $2 and not more than $6 per dozen, $1.50 per dozen; and in addition thereto, on all of the foregoing, 25 per cent ad valorem: *Provided*, That the value of cartons and fillers shall be included in the dutiable value.

The duty on these articles in the existing Underwood-Simmons Act is 25 per cent ad valorem. It might be well to call attention here to the fact that under the existing Democratic duty this industry has grown from a total capital of $3,269,809 in 1914, with an output valued at $6,865,074, to a total value of output in 1919 of $15,997,000, showing a healthy and remarkable development.

The imports in 1919 amounted to but $12,169, and during the first nine months of 1921 to but $51,482, the proportion of imports to home production being remarkably small, and certainly not large enough to justify the claim that importations are threatening the domestic industry.

Let me call attention to the fact that a considerable volume of exportations has occurred in connection with this industry. In 1919 the exports had a value of $409,517; in 1920 of $518,410; and during the first nine months of 1921 of $197,569. Certainly, Mr. President, an increase in the duty can not be supported when we take these facts into consideration.

I therefore move, in lieu of the amendment recommended by the Senate committee, to insert the words "25 per centum ad valorem," that being the existing rate, the rate under which the industry is making such satisfactory progress. I ask for the yeas and nays on the amendment to the amendment.

The PRESIDING OFFICER. The amendment proposed by the Senator from Texas will be stated.

The READING CLERK. In the committee amendment, on page 71, at the beginning of line 19, it is proposed to strike out "72 cents per dozen and 40 per centum ad valorem" and to insert "25," so as to read "25 per centum ad valorem."

Mr. SHEPPARD. I also wish to strike out the other part of the amendment recommended by the committee.

The READING CLERK. It is also proposed to strike out after the word "thereof," in line 15 down to and including the words "ad valorem," on line 18.

Mr. SHEPPARD. That is correct.

The PRESIDING OFFICER. The Secretary will call the roll.

The reading clerk proceeded to call the roll.

Mr. WARREN (when his name was called). Announcing the same pair that I announced earlier to-day, I vote "nay."

Mr. WATSON of Georgia (when his name was called). Repeating the announcement that I made before, I vote "yea."

The roll call was concluded.

Mr. HALE. Making the same announcement as before, I vote "nay."

Mr. DILLINGHAM. I have a general pair with the junior Senator from Virginia [Mr. GLASS]. Observing that he has not voted, I transfer my pair to the junior Senator from Oklahoma [Mr. HARRELD] and will vote. I vote "nay."

Mr. FRELINGHUYSEN. Making the same announcement as before, I vote "nay."

Mr. WILLIAMS (after having voted in the affirmative). I find that the Senator from Indiana [Mr. WATSON], with whom I have a pair, has not voted. I transfer that pair with him to the Senator from Montana [Mr. MYERS] and will let my vote stand.

Mr. STERLING (after having voted in the negative). I transfer my pair with the Senator from South Carolina [Mr. SMITH] to the Senator from New Hampshire [Mr. MOSES] and will let my vote stand.

Mr. CURTIS. I have been requested to announce the following pairs:

The Senator from New York [Mr. CALDER] with the Senator from Alabama [Mr. HEFLIN];

The Senator from Rhode Island [Mr. COLT] with the Senator from Florida [Mr. TRAMMELL];

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN];

The Senator from Indiana [Mr. NEW] with the Senator from Tennessee [Mr. MCKELLAR]; and

The Senator from Ohio [Mr. WILLIS] with the Senator from Ohio [Mr. POMERENE].

The result was announced—yeas 21, nays 38, as follows:

YEAS—21.

Ashurst	Harrison	Robinson	Walsh, Mass.
Caraway	Hitchcock	Sheppard	Watson, Ga.
Dial	Jones, N. Mex.	Simmons	Williams
Fletcher	La Follette	Stanley	
Gerry	Norris	Swanson	
Harris	Ransdell	Underwood	

NAYS—38.

Ball	Frelinghuysen	McCumber	Phipps
Brandegee	Hale	McKinley	Rawson
Broussard	Johnson	McLean	Shortridge
Bursum	Jones, Wash.	McNary	Smoot
Capper	Kellogg	Nelson	Spencer
Curtis	Kendrick	Newberry	Sterling
Dillingham	Keyes	Norbeck	Sutherland
Elkins	Ladd	Oddie	Warren
Ernst	Lodge	Page	
France	McCormick	Pepper	

NOT VOTING—37.

Borah	Glass	Nicholson	Townsend
Calder	Gooding	Overman	Trammell
Cameron	Harreld	Owen	Wadsworth
Colt	Heflin	Pittman	Walsh, Mont.
Crow	King	Poindexter	Watson, Ind.
Culberson	Lenroot	Pomerene	Weller
Cummins	McKellar	Reed	Willis
du Pont	Moses	Shields	
Edge	Myers	Smith	
Fernald	New	Stanfield	

So Mr. SHEPPARD's amendment to the amendment of the committee was rejected.

The PRESIDING OFFICER. The question now is on agreeing to the committee amendment.

The amendment was agreed to.

Mr. MCCUMBER. I ask that we may proceed now to the consideration of paragraph 354.

The ASSISTANT SECRETARY. Paragraph 354: Penknives, pocketknives, clasp knives——

Mr. JONES of New Mexico. Mr. President, I had an understanding on Saturday that those paragraphs relating to cutlery would go over until Wednesday. There was no announcement in the Chamber, but the chairman of the committee doubtless will recall our conversation on the subject.

Mr. MCCUMBER. I will say to the Senator that there are so everlastingly many of these requests that I can not keep them all in mind without putting them down. Certainly if I so agreed, it will go over.

Mr. ROBINSON. We shall be glad to take up paragraphs 319 and 320 now, if the Senator desires to do so.

Mr. MCCUMBER. Very well, Mr. President; then we will return to paragraph 319.

The PRESIDING OFFICER. The amendment of the committee will be stated.

The ASSISTANT SECRETARY. On page 61, line 16, the committee proposes to strike out "25" and insert "30," so as to make the paragraph read:

PAR. 319. Iron or steel anchors and parts thereof; forgings of iron or steel, or of combined iron and steel, not machined, tooled, or otherwise advanced in condition by any process or operation subsequent to the forging process, not specially provided for, 30 per cent ad valorem.

Mr. ROBINSON. Mr. President, I offer the following amendment:

On line 16, strike out "30" and insert in lieu thereof "15," so that, if amended, it will read: "15 per cent ad valorem."

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Arkansas to the amendment of the committee.

Mr. ROBINSON. Mr. President, I will make a brief statement in connection with the amendment.

The present rate is 12 per cent ad valorem. The House incorporated in the bill a rate of 25 per cent, and the committee proposes by its amendment to raise that to 30 per cent ad valorem. A brief investigation of the facts in connection with this item does not appear to justify the committee rate.

Two general classes of products are embraced within the paragraph, namely, anchors and forgings. The manufacture of anchors is a very simple process, and the importations heretofore have been quite small. The value of the importations for consumption for the year 1917 was only $2,611; for 1918 the value was $1,616; for 1919, $7,216; for 1920, $3,127; for 1921, $2,036. There were, however, additional importations for vessel supplies and for the repair of vessels, the amount of which was somewhat in excess of the importations for consumption. No exports are recorded as to anchors.

The provision relating to forgings covers a vast number of articles. Some of them are of very common use. The importations are quite small, as appears from page 415 of the Summary of Tariff Information, whereas the production and exports are very great.

In view of these facts, I do not believe the comparatively high rate proposed by the committee is justified. I submit the amendment already stated, and ask for a vote on it.

Mr. MCCUMBER. Will the Senator repeat the amendment, please?

Mr. ROBINSON. Where the committee amendment proposes to insert "30" I propose an amendment reducing it to "15," which, I think, is entirely adequate, in view of the fact that the rate is only 12 per cent at present, and the production and exports upon the whole item are many, many times, both in quantity and value, the amount of the imports.

Mr. MCCUMBER. Mr. President, I do not recall that any evidence was submitted to the committee upon that amendment. We seem simply to have changed the House rate of 25 per cent ad valorem on the American valuation to about its equivalent on the foreign valuation. I think the 25 per cent on the foreign valuation is sufficient, but under present conditions I do not think that 12 per cent is sufficient.

Mr. ROBINSON. Mr. President, 12 per cent is the present rate.

Mr. MCCUMBER. Yes.

Mr. ROBINSON. And that, of course, is on the foreign valuation.

Mr. MCCUMBER. Yes.

Mr. ROBINSON. The rate, even as the committee now propose to reduce it, would still be more than twice the present rate. While of course I should prefer the amendment which the committee now propose to make to the one that the committee reported, I still think that that would leave the rate too high; and I shall ask for a vote on my amendment, 15 per cent.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Arkansas to the amendment of the committee.

The amendment to the amendment was rejected.

Mr. MCCUMBER. I now ask, unless the Senator wishes first to make some other motion, that the committee amendment be rejected.

Mr. ROBINSON. Will the Senator accept an amendment of 20 per cent? I propose to strike out "30" and insert in lieu thereof "20."

Mr. MCCUMBER. That would leave it out of proportion to steel and other articles, and it would require an adjustment of others. I think that "25" would leave the relation about right to the prices of steel.

Mr. ROBINSON. Mr. President, my attention has been called to the fact that some of the Senators think that 20 per cent would occasion a disproportion with reference to the rate as applicable to forgings, but an examination of the facts as submitted by the Tariff Commission does not appear to me to justify that conclusion.

I ask leave to put into the RECORD the paragraphs on pages 413 and 414, showing the uses and the character of articles that are embraced within forgings, the quantity of production, the value of exports, and also the amount and value of imports for the various years. I ask that that be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it will be included in the RECORD.

The matter referred to is as follows:

FORGINGS.

(See Survey C–5.)

Description and uses: Forgings are metals which have undergone the process of hammering or pressing into special shapes while hot. Originally forging was solely a hammering process, but with large masses to be treated, pressing has come into use, especially for making heavy forgings of steel.

Many small articles of common use, such as balls, screws, rivet blanks, nuts, nails, etc., are forged by machinery. Many articles of intricate patterns are drop-forged, i. e., a heated piece of metal is put on a lower die placed on the anvil of a drop hammer which, falling from a height, carries the upper die and stamps the plastic metal into shape. Such drop forgings are largely used in motor vehicles for levers, treadles, connecting rods, and the like.

The "finishing process" consists in annealing or tempering the forged material and then machining it.

Production: Forgings represent a vast variety of articles. According to the American Metal Market the country's output of forged work done in rolling mills and steel works amounted to 1,295,566 gross tons in 1918 and to 534,346 gross tons in 1919. This product involves such items as anchors, armor plate, axles, eyebars, gun carriages, etc

Imports of ordinary forged iron and steel, i. e., not finished or advanced beyond the forging process, are not large. In 1917 they amounted to only $37,302. Later statistics follow:

Calendar year.	Quantity.	Value.	Duty.	Ad valorem rate.
	Pounds.			*Per cent.*
1918		$394,566	$47,348	12
1919	351,045	51,312	6,157	12
1920	184,096	35,103	4,212	12
1921 (9 months)	141,364	23,618		

In addition to these imports other forgings for the construction and equipment of vessels, for the United States Government and for diplomatic officers came into the country free of duty. In 1919, 485,777 pounds, valued at $79,152, were imported for the construction and equipment of vessels; 6,583,124 pounds, valued at $754,706, for the Government of the United States; and in 1918, 43,383,685 pounds, valued at $2,576,831, for diplomatic officers.

Exports: Exports since 1917, by calendar years, have been as follows: 1918, $27,679,680; 1919, $1,881,814; 1920, $1,833,925; 1921 (9 months), $358,299. Some of the important countries receiving this exported material are Canada, France, the United Kingdom, Japan, Italy, Spain, and Mexico.

Mr. ROBINSON. I also move to amend by striking out "30" and inserting "20." I shall not ask for a record vote.

The PRESIDING OFFICER. The question is on the amendment proposed by the Senator from Arkansas to the committee amendment to strike out "30 per cent" and to insert "20 per cent."

The amendment to the amendment was rejected.

The PRESIDING OFFICER. Now, the question is upon agreeing to the committee amendment.

Mr. McCUMBER. I ask that the Senate reject the committee amendment.

Mr. JONES of New Mexico. I would like to make the suggestion that by disagreeing to the committee amendment you agree to the House rate, and that would leave nothing in conference by which you can adjust any of these rates if it is thought best to do so.

Mr. SMOOT. That would be true no matter what the valuation was.

Mr. JONES of New Mexico. That would be true regardless of the valuation, and it seems to me that you are apt to tie your hands when you may not want that done, when you begin to consider these rates in relation to other rates in the schedules. I simply make the suggestion for whatever it is worth. It seems to me that by doing this you would be absolutely tying up the matter in conference, and it would prevent any readjustment of rates with other items in the schedule.

Mr. McCUMBER. I do not agree that it would be tied up in conference, even though the figures appear the same, because one is based upon the American valuation and the other is based upon the foreign valuation. Twenty-five per cent on the American valuation is considerably higher than 25 per cent on the foreign valuation. So the minds of the two Houses have not met, although the figures are the same.

Mr. JONES of New Mexico. If that is the correct view of it, of course, it throws these figures open to adjustment in conference.

Mr. McCUMBER. I really think they would be. Of course, if we got it as low as either House wanted it, I do not think the conferees could go any lower, and if we went as high as either fixed it, I do not think we could go any higher, but within those limits there would be no question in my mind but that the conferees could adjust the rates irrespective of the fact that the figures are the same.

Mr. JONES of New Mexico. If the Senator is sure of that, then, of course, the suggestion I have made is of no importance.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The amendment was rejected.

Mr. JONES of Washington. Mr. President, I want to ask a question. Are we to understand that when this bill goes to conference all of these rates can be changed by the conferees, no matter whether the Senate has acted upon them or not?

Mr. SMOOT. No.

Mr. JONES of Washington. I gathered that from what the chairman of the committee stated. The House rate is based on one valuation and the Senate rate on another, and when they get in conference the minds of the two Houses have not met on them, and the conferees could change the rates, according to his statement. If that is the case, we can not know what will come out of the conference. It seems to me that should not be the situation.

Mr. McCUMBER. We can not change that situation. When the House says that it will levy a rate upon a certain valuation and the Senate says that it will levy a rate upon a different valuation the two Houses have not agreed, even though they have fixed on the same figures, and there can be no question but that the minds of the two Houses must agree on the final result of their action.

Mr. JONES of Washington. I understand we have just receded from a committee amendment and left the House language in this paragraph as it passed the House. There is nothing in that paragraph to indicate that the rate is based upon any different valuation from that which the Senate considered.

Mr. McCUMBER. But elsewhere in the bill there is.

Mr. JONES of Washington. That may be true; but I do not see how the conferees can go back and change the rate fixed in that paragraph. I am satisfied it would be subject to a point of order, at least in the House, if it went back after they attempted to do that.

Mr. McCUMBER. That is a parliamentary question, of course, which is going to arise. I have my view, and I have submitted it to our parliamentary experts upon this side of the Chamber, and they agree with me that the minds of the two Houses must meet. As long as there is the difference between the two Houses, of course there is something in conference between the two. Let us suppose, for instance, that the foreign price of an article is $1 and the American price of the same article is $2. The House says, "We will levy a duty of 25 per cent," which will be based upon the $2. That is what the House has done. The Senate says, "We will levy a rate of 25 per cent"; but it will be based upon the $1, which is the foreign valuation. It takes an awful stretch of imagination to say that the two Houses have agreed upon what the rate of duty shall be; and, after all, the thing we are getting at is not so much the rate, but what duty will be levied to bring an article into the United States. If it is clear that it is $1 in Europe, the place of exportation, and $2 here, the minds of the two Houses have not met.

But we might discuss that from now until doomsday and perhaps would not get any further along. Sooner or later we shall have to settle it, but we can not settle it now.

Mr. ROBINSON. That is entirely correct. Any discussion of the question now is more or less academic. Nevertheless, it has a practical importance. When this bill passes the items which will go to conference will be the Senate amendments striking out the American valuation and inserting the foreign valuation, and no items as to simple rates of duty which the Senate has not amended will be before the conference, in my opinion.

If it is desirable to get provisions in conference as to rates of duty, it will be necessary for the Senate to make amendments to the House provisions touching the rates of duty. I think the Senator from Washington is correct about that, because we will first have in conference the question of the American valuation and the foreign valuation. One or the other will be agreed to. Whichever is agreed to will result in bringing the minds of the two Houses together, and there will exist no difference between them as to rates of duty concerning which no amendments have been made in the Senate.

Mr. JONES of Washington. For instance, there is no amendment made in paragraph 352. If we accept it just as it reads, it does seem to me that the conference committee could not rewrite those rates.

Mr. ROBINSON. But the Senator, of course, understands that after we have disposed of committee amendments the paragraph will be subject to amendments offered from the floor.

Mr. JONES of Washington. But I am assuming that it will go through just as it reads here.

Mr. ROBINSON. I think the Senator from Washington probably will be held to be correct, although I believe a further discussion of the matter would be academic at this time.

Mr. McCUMBER. If I may make a suggestion to the Senator, I think the very first thing to be decided in the conference before we go one step further is as to whether we will adopt the American valuation of the House or the foreign valuation of the Senate. If that is decided in favor of the foreign valuation as fixed by the Senate, then all our rates, so far as we are concerned, will have been fixed upon that basis, even though the House fixed those rates upon the other valuation. But until that question arises we shall not have to cross the bridge, and I sincerely hope and really expect that we shall not have to cross it.

Mr. FLETCHER. Suppose in the conference the House recedes and accepts the Senate's foreign valuation, does the Senator believe it will then be entirely competent for the conferees, after all the amendments have been made in the Senate, and where the Senate committee's proposals have been reduced, to open up that whole question, and either raise or lower the duties, irrespective of the action the Senate has taken?

Mr. McCUMBER. Of course, I can not say what the contention of the House will be, but if it accepts the foreign valuation, then our rates are all fixed upon that. I concede that the House may say, "Yes; while we fixed those rates at that time you have made those rates much less by adopting that valuation"; but when they agree to that they agree to those rates upon that valuation. At least, I hope they will take that view, and I think we will get over that difficulty.

Mr. ROBINSON. But that is a change which will be accomplished by modifying other language than the language immediately imposing the rates. Where a bill passes the House of Representatives, and the Senate does not modify a paragraph, by the unanimous decision of both Houses it is not subject to change in conference. But so far as I am concerned, I do not care to discuss it further. If anyone else desires to, he is at liberty to do so.

The PRESIDING OFFICER. The Secretary will state the next amendment.

The next amendment was, in paragraph 320, page 61, line 18, to strike out "plates" and insert the word "plates" with a comma.

The amendment was agreed to.

The next amendment was, in line 20, to strike out "30" and insert in lieu thereof "45," so as to make the paragraph read:

PAR. 320. Electric storage batteries and parts thereof, storage-battery plates, and storage-battery plate material, wholly or partly manufactured, all the foregoing not specially provided for, 45 per centum ad valorem.

Mr. SIMMONS. Mr. President, I will detain the Senate for only a few minutes on this matter, although it seems to be a matter of considerable importance.

These electric storage batteries and parts are very extensively used in this country now as the result largely of the introduction of the automobile. I read from the Tariff Commission Summary:

In storage batteries the electrodes are commonly lead plates surrounded by dilute sulphuric acid. During the discharge lead sulphate is formed on the plates, the action being similar to that of the primary battery. The action of the storage battery is, however, reversible, since, by passing a current through the battery in the opposite direction, the plates are restored to their original state, and are again capable of delivering a current.

* * * The automobile industry is a large user of storage batteries. The manufacture of plates and connections for storage batteries has become a very important outlet for lead.

Outside of the acid, lead is almost the only material in these batteries.

In 1919 the production of storage batteries was valued at $56,000,000, in round figures, and of parts for storage batteries at $3,000,000, about $60.000,000 in all. The corresponding figures for 1914 were $10,000,000 and $2,000,000, so that during the period from 1914 up to the present time this industry has multiplied five times under the present rate of duty.

As to imports, the Tariff Commission report says there are none recorded. On the other hand, the exports of these batteries for recent calendar years were, in round numbers:

1918	$3,000,000
1919	6,000,000
1920	6,333,000

In the nine months of 1921, $3,267,000. These exports were chiefly to Great Britain, Argentina, Australia, and Cuba.

That is the situation with reference to this product, upon which the committee proposes to put a duty of 25 per cent. I am unable, myself, to understand upon what principle that duty is proposed, and I will ask the Senator from North Dakota if he will enlighten the Senate.

Mr. McCUMBER. Mr. President, I will give the Senator the principle on which the duty is imposed. It will be noticed that in the lead schedule we have levied a duty of 2⅛ cents a pound on lead. Lead sells for a little over 4 cents a pound. Therefore, our duty upon the lead is about 50 per cent. These batteries are almost wholly composed of lead, perhaps 90 per cent of their content being lead. No matter what we put in as a rate on lead, we ought to have a duty upon the battery that would be as high as the duty upon the lead of which it is composed, otherwise they could import the lead in the shape of a battery and get it in cheaper than the lead itself.

I think we have the rate too high, and I am going to ask that it may be reduced from 45 to 40 per cent, as I think that is adequate, as I have looked over the figures. In some of these instances, the pressure being pretty hard at the time to hold the House rates, they were converted into about an equivalent on the foreign valuation, and that is what was done in this case. But I think we can reduce this rate 5 per cent, and in that way we shall get about the proper relation between the two.

Mr. SIMMONS. Let me ask the Senator if he does not think his calculation is a little faulty. I understand him to say that lead is worth about 4½ cents a pound.

Mr. McCUMBER. A little over 4 cents.

Mr. SIMMONS. And he has put a duty of 2½ cents a pound on lead.

Mr. McCUMBER. Two and one-eighth cents a pound.

Mr. SIMMONS. Does the Senator know how many pounds of lead there are in one of these storage batteries?

Mr. McCUMBER. No; but I understand about four-fifths of the cost of it is in the lead. I think very much more than four-fifths of it is lead. It is nearly all lead.

Mr. SIMMONS. I would not suppose that the lead in it amounted to very many pounds. It is not solid lead.

Mr. McCUMBER. The cells and metallic parts are of lead. There is nothing but lead in it.

Mr. SIMMONS. There is the top part and the bottom part, and then there are the little pillars connecting the two.

Mr. McCUMBER. But that is the box containing the battery, and we are giving practically only an ad valorem rate, not on the weight of it. The whole of the battery itself, the battery proper, is composed of lead.

Mr. SIMMONS. But let us work it out. I had occasion to buy one of these ordinary batteries the other day. It is not more than a square foot in size.

Mr. McCUMBER. But if the Senator should take a big electric battery, he would find it very much heavier. It would take several men to lift such a battery.

Mr. SIMMONS. I am talking about the small size, such as we use in automobiles. It certainly would not weigh more than 20 pounds, but let us assume that it weighs 25 pounds.

Mr. McCUMBER. I think in a small car it would weigh at least 50 pounds, but that does not make any difference.

Mr. SIMMONS. Very well; assume that it weighs 50 pounds. The lead in it at 2½ cents a pound would be $2.25. The little batteries I speak about sell in the city of Washington for thirty-odd dollars. The Senator is proposing to put 45 per cent upon that thirty-odd dollars as a compensatory duty for 50 pounds of lead worth only $2. I think there is wherein the position of the Senator is wrong. I understand the Senator says this is put on as a compensatory duty, and there is no other justification for it.

Mr. McCUMBER. I did not say there is no other justification; but I am speaking now of the compensatory part.

Mr. SIMMONS. Assuming that there are 50 pounds of lead in it, and I do not think there is half of that in the smaller ones that are selling for thirty-odd dollars, there we have a total value of $2.25. Now, because of the 2½ cents a pound on that 50 pounds of lead, the Senator proposes 45 per cent on a battery that sells for $30.

Mr. McCUMBER. I do not know what they may sell for. I think a little one like that would be much less; but they may sell, as we know, for 10,000 per cent more than they ought to sell for. I can not say how that would be. I am endeavoring to get an ad valorem rate that will just about equal the lead content upon the value basis.

Mr. SIMMONS. But the Senator's ad valorem rate here applies to the commercial value of the battery.

Mr. McCUMBER. Of course, there is a great deal of work to make one of them, independent of the lead content, but I am taking the lead into consideration, the labor into consideration, and the difference in the cost of manufacture into consideration. Taking all of the elements that make up the difference between the cost at home and abroad, which, first, is the lead; second, the labor; and, third, other matters that enter into it, like transportation, altogether I think they should have about 40 per cent ad valorem.

Mr. SIMMONS. There are none of these things that are imported into this country except possibly some lead. The Senator proposes to give a duty on lead upon the theory that there is some imported into this country. My understanding is there is no justification shown for 45 per cent, except for the purpose of compensating for the duty of 2½ cents a pound on the lead. Two and one-fourth cents a pound on 50 pounds of lead would be a little over $1, and 45 per cent upon the price of one of these instruments would be $10 or $15. Of course, I know nothing about the factory price. I am only speaking about the retail price. I was trying to find a place where I could buy one of these batteries the other day cheaply. I found a place where they said they would sell me one of these little Ford batteries for $22, but for a 7-passenger car they were about $30, and at some other places they were between $35 and $40.

Mr. McCUMBER. I think this statement will explain it. While, of course, we include electric storage batteries on the assumption that there may be conditions in which the entire battery would be imported, as a matter of fact the batteries complete are not imported at all on account of the breakable character of the glass, plates, and so forth, but they come in

entirely in the plates and parts which are put together here. Those are exclusively lead and it is almost like selling lead in a certain form in another way.

Mr. SIMMONS. I am quite sure if the Senator would investigate this from the standpoint of the compensatory duty he would find the duty he proposes is too high. However, I do not care to prolong the discussion further.

Mr. McCUMBER. In the tariff hearings there appears a statement which I wish to read. It is as follows:

5. Lead and lead oxide constitute over 98 per cent of a storage battery plate. Pig lead for the 14 consecutive years prior to the World War averaged 3.17 cents per pound in Europe, while for the same period the United States price averaged 4.54 cents per pound, or 43 per cent higher in the United States than in Europe. Lead oxide, having a greater labor content, runs at least 48 per cent higher in the United States than in Europe.

That is why 45 per cent was asked, but I think we can safely reduce it to 40 per cent.

Mr. SIMMONS. I think the Senator could safely reduce it much more than that.

Mr. McCUMBER. I doubt it. I think the lead could come in that form under a less rate of duty.

Mr. SMOOT. Mr. President, the Senator will notice that not only the Payne-Aldrich duty but the existing duty was imposed according to the component material of chief value, and, therefore, it always was on the basis of the lead, whether imported in parts or whether it was imported as a battery.

Mr. SIMMONS. Has the Senator any information as to what is the value of the lead parts that might be imported?

Mr. SMOOT. Yes. Ninety-eight per cent of all the batteries would be imported in the shape of lead at 40 per cent ad valorem.

Mr. SIMMONS. Does the Senator mean lead manufactured?

Mr. SMOOT. In the form of batteries. They are of lead parts. Then the lead oxide is used in the battery, too, and of course we increase the lead oxide rate on account of the increase in the rate on the lead.

Mr. SIMMONS. Can the Senator furnish any information at all outside of his statement that there are any imports of this manipulated lead made in the form of these batteries? It is stated, I understand, that there are no imports of record.

Mr. SMOOT. They have not kept the statistics. They could not keep them because the articles came in according to the component material of chief value. There are no statistics kept.

Mr. SIMMONS. Mr. President, I move to amend the committee amendment by reducing the rate to 15 per cent.

The ASSISTANT SECRETARY. In line 20, in the committee amendment, the Senator from North Carolina proposes to amend by striking out the numerals "45" and inserting in lieu thereof the numerals "15."

The amendment to the amendment was rejected.

The VICE PRESIDENT. The question is on the amendment of the Senator from North Dakota to the committee amendment proposing to strike out "45" and insert "40."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The VICE PRESIDENT. The next amendment will be stated.

The ASSISTANT SECRETARY. The next amendment has been agreed to on May 26, page 62, line 1, railway fishplates——

Mr. ROBINSON. Was paragraph 321 disposed of?

Mr. SMOOT. Yes; it was agreed to.

Mr. McCUMBER. Mr. President, I was going to ask that we return to page 33 and take up magnesite, as the junior Senator from Washington [Mr. POINDEXTER] is here now. It was passed over until he might be present.

Mr. POINDEXTER. Assuming that consent is granted to take up that paragraph as asked by the Senator from North Dakota, I am going to move to strike out the rates proposed by the committee in section 204a and to insert in place of them the rates fixed by the House and carried in the House bill on these substances, although they are carried in a different paragraph. I submit the following amendment.

The VICE PRESIDENT. The Secretary will report the amendment.

The READING CLERK. On page 33, paragraph 204a, line 1, the Senator from Washington proposes to strike out "five-sixteenths" and insert in lieu thereof "one-half."

Mr. POINDEXTER. That is on crude magnesite. It amounts to a rate, if the amendment I propose is adopted, of $10 per short ton on crude magnesite in the place of a rate of $6.25 per short ton as proposed by the committee amendment.

My amendment corresponds with the rate fixed in the House bill. It also corresponds with the rate that was at one time favorably reported by the Senate Finance Committee in a special bill covering crude and dead-burned magnesite.

My purpose in proposing the amendment is to obtain, if possible, by the favorable action of the Senate, a sufficient rate upon crude magnesite and also upon dead-burned magnesite, as I shall propose by an amendment to follow this one, to protect the industry.

The rates provided by the Senate committee are not sufficient to afford protection to the industry. Prior to the entry of the United States into the European war, practically all the magnesite consumed in this country, with such exceptions as scarcely to be worth noticing, was imported from foreign countries—most of it from Austria, some of it from Greece, a little of it from Canada, and a still smaller quantity from South America. During the war great deposits of magnesite were discovered in this country, principally in the State of Washington. They were developed very successfully, and the entire American trade was supplied from domestic sources during the war because foreign importations were automatically cut off by the conditions of the war.

Magnesite is an earthy deposit, something like limestone. In fact, the great deposits in the State of Washington at one time were supposed to be marble; they looked like marble and were mined for marble. An attempt was made to use them for the purposes for which marble is used; but when the exigencies of the war cut off our supply of magnesite, inquiries were made of the Geological Survey as to possible sources of supply in the United States, and reports were found referring to the magnesite in the State of Washington. Upon examination it was discovered that this substance was not marble at all, but was a very high grade of magnesite and that it existed in very large quantities. It is estimated that there is in sight sufficient magnesite in those deposits, which constitute mountains of magnesite, to supply the trade of this country for 50 years at the present rate of consumption.

This substance is used for various purposes, but the chief purpose for which the form in which I am interested and to which the amendment which I propose to offer refers, is used in making a specially high grade fire brick, with very high refractory qualities, a great quantity of which is used in the lining of smelters, electric furnaces, iron furnaces, and copper smelters because of its powers of resistance to heat. The principal market for magnesite for that purpose is in the vicinity of Pittsburgh, the center of the great steel industry of the country. Some 40 per cent of the consumption is in that district; 20 per cent is in the territory west of Chicago; 20 per cent is on the Atlantic coast; and the remainder in the intervening territory.

In order to compete upon equal terms with the Austrian magnesite it is necessary for us to get into the Pittsburgh market; and if we get a rate of three-fourths of a cent a pound, which my amendment proposes, it will enable us to get into the Pittsburgh market upon equal terms with the importers of magnesite from Austria, those importers really being the great steel industry itself, which has promoted a company which mines magnesite in Austria and gets the benefit of labor at 60 cents a day in gold as compared with wages of $4.50 a day in gold, which are the ruling wages in the mines of the West.

If this industry is to be allowed to exist it is necessary to have an adequate tariff duty to put it upon equal competing conditions with the foreign article in the principal markets of the country. Such a duty not only will sustain and build up that industry, giving employment to thousands of men—and now it is closed down like a dead city—but it will give to this country all the incidental benefits that are appurtenant to every great industry, although not immediately connected with it.

All of the supplies that are necessary to carry on this work will find a market there if this industry can live. Consequently, it will benefit the people who furnish those supplies and the laborers who are engaged in producing them. If this industry is allowed to live by giving it an adequate tariff rate, there will be a market in the operation of these mines and of the machinery connected with them for large quantities of coal. That will increase the business of coal miners; that will make wages for the people who are employed in the coal mines in distant States, who may not know that they are affected in any way by or derive benefit from this industry, but nevertheless they do. Electrical supplies and electrical machinery will have to be used; men will have to be employed to manufacture them; and they will get the benefit of this industry if it is a living industry and a going concern, instead of one, as it was before the war discovered it and gave it an opportunity to get upon its feet, and converted it from a condition of quiet and inactivity into a condition where hundreds and thousands of men are employed at good wages.

Mr. HITCHCOCK. Mr. President, will the Senator yield to me?

The VICE PRESIDENT. Does the Senator from Washington yield to the Senator from Nebraska?

Mr. POINDEXTER. I yield.

Mr. HITCHCOCK. Has the Senator from Washington the statistics of production for the year 1921?

Mr. POINDEXTER. There was no production at all in the year 1921 so far as Washington is concerned, and, so far as dead-burned magnesite is concerned, the production is still closed down.

Mr. HITCHCOCK. The paragraph also refers to crude magnesite, does it not?

Mr. POINDEXTER. Yes; it covers crude magnesite.

Mr. HITCHCOCK. Has production ceased now?

Mr. POINDEXTER. Production has entirely ceased in all of the mines of Washington. There is a small quantity of crude magnesite produced in California, which is converted into calcined magnesite and used for plastic purposes, so called, in building. That is another use to which a certain form of magnesite is put.

Mr. HITCHCOCK. I notice the figures for 1920 do not indicate a bad condition. The production for that year was 275,000 tons and the imports were 37,000, which would indicate that the American supply was practically covering the market. I have not the figures for 1921; and I wondered whether or not the Senator himself might have them.

Mr. POINDEXTER. I have the figures here. They are as follows:

Imports of crude magnesite are from Canada, Austria-Hungary, Greece, Mexico, and Venezuela. Prior to the war they were fairly constant at about 16,000 tons annually, but in 1917 they reached a maximum of 89,646 tons, valued at $748,951. Imports of calcined magnesite prior to the war reached a maximum of 172,661 tons, valued at $1,731,443. They decreased to only 4,724 tons in 1917. Statistics since 1917 are as follows:

Calendar year.	Quantity.	Value.	Unit value.
Crude magnesite:	*Tons.*		
1918	4,319	$71,871	$16.64
1919	5,697	103,311	18.13
1920	29,955	406,204	13.56
1921 (9 months)	37,789	412,930	10.93
Calcined magnesite:			
1918	17,539	855,384	48.77
1919	8,456	270,721	32.02
1920	13,196	373,165	28.28
1921 (9 months)	4,697	179,561	38.23

Mr. HITCHCOCK. I think perhaps I made a mistake in attributing the 37,000 to 1920, whereas they should have been attributed to the nine months of 1921.

Mr. POINDEXTER. Yes; to nine months in 1921.

Mr. HITCHCOCK. What was the production in this country during the period when we had 37,000 tons of imports?

Mr. POINDEXTER. I do not know that I can give the production. It was very small. There was no production at all of dead-burned magnesite, which is used for fire brick in the steel industry. That business was closed down; it existed nowhere in this country.

Mr. HITCHCOCK. That was not due to the imports, was it? The closing down was due to the general depression that afflicted the whole country.

Mr. POINDEXTER. It was due to some extent, of course, to the general depression of the steel industry, which curtailed the consumption of dead-burned magnesite; but the industry was closed down because of the impossibility of competing with the Austrian product.

Mr. HITCHCOCK. That would hardly have closed down mines turning out 275,000 tons in 1920 when the imports in 1921 were only 37,000 tons. Certainly that volume of importations would not have closed down an industry of that great extent.

Mr. POINDEXTER. It did close it down, and it is closed down now.

Mr. HITCHCOCK. That must have been due to depression; it could not have been due to the imports.

Mr. ROBINSON Mr. President, will the Senator from Washington yield to me for a question?

Mr. POINDEXTER. I yield.

Mr. ROBINSON. What is the value per pound approximately of crude magnesite?

Mr. POINDEXTER. The cost of it at the mine in Washington is $20 per ton.

Mr. ROBINSON. Twenty dollars a ton?

Mr. POINDEXTER. Yes; $20 a ton.

Mr. ROBINSON. That is about a cent a pound, then?

Mr. POINDEXTER. That is on a basis of 2,000 pounds to the ton; that is, the dead-burned magnesite, which requires about 3 tons of the crude material. All of the ore is not magnesite; it has to be sorted.

Mr. ROBINSON. What would be the approximate ad valorem equivalent of five-eighths cent a pound on crude magnesite?

Mr. POINDEXTER. The ad valorem equivalent, if you take the import value at the place of import, is about 60 per cent.

Mr. FLETCHER. As I figure it, five-sixteenths of a cent a pound on the crude magnesite would be about $7 a ton?

Mr. WILLIAMS. I will ask the Senator from Washington if he has any figures as to exports?

Mr. POINDEXTER. I have no figures as to exports, because there are practically no exports from this country.

Mr. ROBINSON. Under the amendment raising the duty to five-eighths of a cent a pound, the Senator from Washington states that the ad valorem equivalent is about 60 per cent.

Mr. FLETCHER. My information is that a duty of five-sixteenths of a cent a pound on the crude would amount to about $7 per ton, and a duty of four-tenths of a cent a pound on the dead burned magnesite would amount to about $8.96 per ton on the dead burned grade.

Mr. POINDEXTER. It would amount to about $6.25 on the crude and $8 on the dead burned on the short ton.

Mr. FLETCHER. There has heretofore been no duty on raw magnesite.

Mr. POINDEXTER. No; it has been on the free list. The only way that this industry ever was enabled to start was on account of the war cutting off foreign importations.

Mr. JONES of Washington. Mr. President——

Mr. POINDEXTER. I yield to my colleague.

Mr. JONES of Washington. I was just going to call attention to the table on page 1077 of the hearings, on magnesite, Exhibit E, purporting to come from "The Mineral Resources of the United States." It confirms what my colleague said; it gives the domestic production and the imports up to 1920, and then there is what appears to be a note, which says:

1921: During the first six months of 1921 the mines in the United States have been practically idle, while the imports from Austria are about 7,000 to 9,000 tons per month.

Mr. POINDEXTER. Mr. President, the only pressure that I know of against the rates that we are asking for, which I believe to be fairly adequate rates, comes from the consumers of magnesite brick, as was to be expected. They are the steel industry, and you can imagine the power that they have. The best information we have is that the rate that is proposed in my amendment—which, I repeat, is the House rate, and I should also like to emphasize that it is the same rate that was once favorably reported by the Finance Committee of the Senate in a special bill about a year ago, and then recalled—will have the effect, even if the entire tariff is added to the cost of the magnesite brick used in the steel industry, of increasing the cost 3½ cents on a ton of steel. That is the only result of it; but, as a matter of fact, everybody knows that the entire amount of the tariff is not added to the cost of the product. There is no doubt that it does increase the cost in many instances, perhaps in most instances, but it is very seldom, if ever, that the entire tariff rate is added to the cost.

It could not be the case here, because there is competition. If this industry is developed and allowed to have an opportunity to stand on its feet and improve its methods of production, the cost of production possibly could be decreased; and in time to come, under the machinery provided in this bill, if it should be found after they have had an opportunity to establish themselves that the rate should be reduced there would not be any objection to reducing it. What they are asking for now is an opportunity to live, an opportunity to carry on this industry long enough to introduce the most improved methods by which they can produce this material and put it on the market.

There is one other benefit to the country in which everybody is interested that will come from preserving this industry that I have not mentioned, and that is the business it will give to the railroads of the country. It will take the business away from foreign ships plying between the port which is very near to the Austrian mines and the United States and give it to our railroads, which carry it from the western mines to Chicago and Pittsburgh and the other markets, the freight amounting to some $3,000,000 a year. It will help to sustain these great transportation systems, and go toward making it possible to reduce freight rates in general.

My theory of a protective tariff—and I do not want to discuss it in general—is that in order to justify it at all it must be of uniform application. You can not justify a protective tariff as a special favor to one industry.

The only way in which it can be justified at all is as a public benefit. The only way in which it can be a public benefit is to give everybody, regardless of his stature, the size of his

business, or his political or personal influence, the benefit of this principle; and that is all that we are asking.

I am not captious with the committee. The committee has allowed some protection. It has allowed rates that may be considered substantial; but the statistics to which I will call attention in detail very briefly show that the rate allowed by the committee will be of no benefit at all, because it will not enable the American product to get into the chief American market. Unless you make the rate high enough to put it at least upon equal competitive conditions with the foreign importations, you might as well not have a rate at all.

Mr. HITCHCOCK. Mr. President, the Senator states that the American market is in the neighborhood of Pittsburgh.

Mr. POINDEXTER. That is the principal American market.

Mr. HITCHCOCK. Then let me ask the Senator where this 275,000 tons went in 1920. Did that go from the Senator's State to Pennsylvania?

Mr. POINDEXTER. What 275,000 tons does the Senator refer to?

Mr. HITCHCOCK. The production in the United States in 1920 was 275,000 tons.

Mr. POINDEXTER. In 1920 the foreign mines had not come into full operation again; and, as I stated before, the figures which the Senator has there relate very largely to calcined magnesite, used for building purposes, for which the principal market is in Chicago.

Mr. HITCHCOCK. What was the production of the magnesite under consideration in 1920?

Mr. POINDEXTER. In 1920 there was an increase of 275,000 tons.

Mr. JONES of Washington. Mr. President, my colleague will find on page 1078 of the hearings that the total domestic production of crude magnesite in 1920 was 303,767 tons, of which the Northwest Magnesite Co., which is in our State, produced 141,817 tons.

Mr. HITCHCOCK. What I am asking is, where did that go?

Mr. POINDEXTER. It went all over the country, and a part of it went to Pittsburgh, because, as I stated a while ago, the foreign industry was not reestablished at that time.

Mr. HITCHCOCK. So that there will be no increase in the transportation of magnesite over what it has been, because at that time the imports amounted to only 20,000 or 30,000 tons, and the production was approximately ten times as large.

Mr. POINDEXTER. We would be perfectly satisfied, and the country would be very greatly benefited, even though there should be no increase, if we could go back to the conditions that existed during the war and immediately following the war. Then we had the American industry; but there will be an increase, of course, with the increase of industry in general.

Mr. JONES of Washington. Our mine is closed now. This mine that produced 140,000 tons in 1920 is now absolutely closed.

Mr. POINDEXTER. Absolutely closed. I wish the Senator from Nebraska would go there and see the dead village that grew up around this industry, around the mills, and around the mines, closed down, with nobody there but caretakers, and, of course, producing nothing.

Mr. HITCHCOCK. Of course, the copper mines have been closed, too, for nearly a year, but that was not on account of the tariff. These productive enterprises have been closed on account of the depression, which is not only national but is world-wide, and they certainly could not have been closed by reason of the introduction of 20,000 or 30,000 tons from abroad; and that was all that was imported.

Mr. POINDEXTER. There was a great deal more than that imported in 1921. We have not the figures for the closing months of 1921. The amount imported is constantly increasing, and all that is consumed will be imported, because the domestic product can not compete with it.

Mr. JONES of Washington. The statement I read a moment ago shows that from Austria we imported in 1921 from seven to nine thousand tons a month, which would be over 100,000 tons a year.

Mr. HITCHCOCK. That was in 1921?

Mr. JONES of Washington. Nineteen hundred and twenty-one.

Mr. HITCHCOCK. The figures given for the first nine months are 37,000 tons from every place. Of course, that could not have destroyed an industry that was producing two or three hundred thousand tons.

Mr. JONES of Washington. I do not know what figures the Senator has.

Mr. HITCHCOCK. I have the Tariff Commission figures.

Mr. JONES of Washington. I read here from what purports to come from "The Mineral Resources of the United States, 1921, Part II," and it has the following note:

1921: During the first six months of 1921 the mines in the United States have been practically idle, while the imports from Austria are about 7,000 to 9,000 tons per month.

Which would be at the rate of over 100,000 tons a year.

Mr. HITCHCOCK. Those figures do not correspond with the figures given by the Senator's colleague, nor with the figures given in the Tariff Information Summary. I suppose these are official.

Mr. POINDEXTER. Mr. President, I think there is no discrepancy between those figures. The figures that I gave I read from the Summary of Tariff Information for 1921.

Mr. HITCHCOCK. They are undoubtedly correct.

Mr. POINDEXTER. Those were the figures that I gave. The fact remains that the steel industry is going on consuming large quantities of magnesite, that the American mines are closed down, producing nothing at all, and that the concerns engaged in the steel industry are obtaining their entire supply from abroad. The exact quantities that they are obtaining at the present time, except for the figures given by my colleague, are not obtainable, because it is difficult to get these statistics strictly up to date. The figures for the first nine months of 1921 are the latest figures that are given in the Summary of Tariff Information; but when you have personal knowledge of the actual situation, the exact figures and quantities become immaterial, when all that is consumed is being imported. The only mines that are in operation in this country, and those only to a very limited extent, are the mines in California that are producing calcined magnesite to be used in building, which is here also asking for an adequate tariff rate for its protection.

We have been partly through the iron and steel schedules in this bill. I have not had an opportunity to examine them. I have heard them debated here on the floor. I heard them challenged as being high. They are high. I do not know whether they are too high or not; but I notice that the Finance Committee in its report has very generally increased the rates in the iron and steel schedule over those provided in the House. They receded from some of these amendments and went back to the House rate, but in few if any cases did they reduce the House rate.

That industry, which is getting the benefit of an adequate protection—an unquestionably adequate rate, said in many instances to be more than adequate—is the only industry that is seriously objecting to an adequate rate of duty upon magnesite, the so-called raw material which they consume in their industry, notwithstanding the fact that the steel industry has attained its present proportions and its great size by reason of the enjoyment of a protective tariff.

The pre-war price of magnesite on the Atlantic seaboard was from $15 to $17, and around $20 at Pittsburgh. The Austrian magnesite producers admitted before the Finance Committee and before the Tariff Commission that their pre-war cost was only $12 f. o. b.

I have reports here from a German industrial expert, who is quoted as saying that magnesite, dead burned, sold in Germany at $8 a ton. Ours cost $20 a ton, paying the wages we do, on board the cars at the mines; and we have to pay the freight rates in order to get into the market.

Pre-war ocean freight to the Atlantic seaboard was $2 per short ton, a total of $14 on the Atlantic seaboard for the Austrian magnesite delivered there. Representatives of the Austro-American Magnesite Co. have made the statement that prior to the war their cost at the mine was $8.

The above figures show a profit on even a $15 selling price at the Atlantic seaboard. There is no doubt that Austrian magnesite can be produced at the present time at the same cost, or even lower than the pre-war cost.

So far as we know, the Austrian producers have not furnished the Finance Committee with any statements of costs, either pre-war or post-war.

Domestic costs have been furnished to the utmost detail. The books of the company have been exhibited to the Finance Committee, showing the entire operation from the beginning to the end, exactly the constituent elements of the cost of the production.

The German to whom I referred was Dr. Kurd Endel, ceramic engineer, Technical University, Berlin, who stated that dead-burned magnesite was selling in Germany in March of 1920 at 1,600 paper marks, which at that time equaled $8 per long ton of 2,240 pounds, now equivalent to about $6 at price of German marks. The Austrian magnesite at the same time was selling in this country at $20 to $24 on the Atlantic seaboard.

It will be readily seen where the profit was. It is selling in Germany at $8, is brought across with a freight charge of $2 per ton, and is sold on the Atlantic seaboard at $20 to $24. The fact of the case is, however, that this Austrian company,

I am informed, is very largely promoted by those who are interested in the steel industry in this country; consequently whatever prices they charge go to themselves. It is a matter of indifference what figures are given out.

With a $15 per ton duty, if the cost were raised to the consumer that much it would amount to $0.0375 (3¾ cents) per ton of steel. With steel selling at $40 per ton the duty would mean nine one-hundredths of 1 per cent of the selling price.

The average consumption of brick magnesite lining in an open-hearth steel furnace is about 5 pounds of dead-burned magnesite per ton of steel, so a $15 tariff per ton equals $0.0075, and multiplied by 5 equals 3¾ cents per ton of steel.

The Austrian production is practically a monopoly. The prices now being obtained by foreign producers are nearly double pre-war prices in many instances, although, as I said a moment ago, the cost of production is about the same.

A gold United States dollar is worth more in Austria to-day than it ever was, and Austrian costs are no more to-day than pre-war, and it is reported they are less.

The foreign selling price is kept only below the point at which domestic material could be delivered. It will cost the consumers but a small proportion of the duty if a sufficient rate is provided to allow the domestic industry to be rehabilitated.

The imported material is sold on the long-ton basis, or 2,240 pounds, and our figures on costs of production and delivery at consuming points are on the basis of the short net ton of 2,000 pounds; therefore, we are at a still further disadvantage of 10 per cent as against the foreign producers, as their selling price at Atlantic seaboard of $15 is for 2,240 pounds, and would make a further difference in their favor of $1.50 per ton.

These figures are important, because they relate to a long ton in Austria, while our figures relate to a short ton, which is the custom of the trade in this country.

Prof. Bailey Willis, dean, geological department, Stanford University, California, spent three months in examination of mines of Stevens County, Wash., in 1920, and reported 8,000,000 tons of commercial magnesite in sight, which would be sufficient for 25 years for total consumption.

There is a great deal more of it there than Professor Willis examined. Much of it has been discovered since. Under a $15 tariff we could not expect to furnish over one-half of the consumption, hence resources now developed would last 50 years.

Mr. FLETCHER. Is it not true that about half of that 8,000,000 tons, as estimated, is unfit for commercial use? I have some information to that effect.

Mr. POINDEXTER. One-fourth of it is not fit for commercial use, and consequently has to be sorted out. Three-fourths of it is high-grade crude magnesite, and it takes 2.2 tons of the crude magnesite to make 1 ton of the dead-burned magnesite, out of which the brick for the lining of the furnaces is made.

As to the cost of production in this country, I want to give some figures to justify the rate we are asking, calling attention, in passing, to the claim that is made by those who have made the most careful study of this matter, that even with the $15 a ton rate we can only expect to get about one-half of the market; that is, we will be upon competitive terms at Pittsburgh with the foreign producers, and at a slight disadvantage there; and all along the Atlantic seaboard east of Pittsburgh they will have a very marked advantage over the domestic producers, on account of the latter's location in the extreme western part of the country, so that there is very far from being a monopoly established. It is demonstrated very clearly that it would be impossible, even with the rate we are asking, to completely occupy the American market.

The mine having the lowest cost of production in the United States is the Northwest Magnesite property. A sworn statement of cost shows $21.09 per ton, dead burned, f. o. b. cars Chewelah, Wash., for 1920, since which time all magnesite mines have been closed. It is believed this company can produce now at $20 f. o. b. Chewelah.

It takes about 2.2 tons of sorted crude to make 1 ton dead burned. Of the crude mined about 25 per cent is eliminated as waste. The actual cost of mining 1 ton of crude sorted material is $1.13, so the actual mining of 1 ton of ground broken, before sorting out the waste, would be 85 cents per ton.

There was some question raised by one of the members of the committee as to the high cost of mining the domestic product, as claimed by the domestic producer, but that was due to a confusion of the finished dead-burned product with the original native rock they dig out. When you examine the cost of that, it seems to me they have reduced it to a very low figure—85 cents a ton for the crude material as they find it and $1.13 a ton for the product as it is sorted before it is combined in order to make 1 ton of dead burned.

I want to give the items which go to make up this cost. The total cost of producing 1 ton of dead-burned is as follows:

SORTED AND CRUSHED.

CRUDE.

Mining, crushing, electric power, superintendence, development, etc	$2.73

DEAD-BURNED.

Mining, crushing, electric power, superintendence, development, etc	6.14
Dead-burning in reduction plant	9.42
Tramway from mine to Chewelah	.93
Administration and general expense	.61
Taxes, insurance, and interest	1.33
Depreciation	1.51
Depletion	1.15
Total	21.09

They have discounted that and estimated the cost at $20 a ton.

Of the total cost in 1920 of $21.09 per ton dead-burned f. o. b. Chewelah, there was a direct labor cost of $3.57 on crude and $8.76 on dead-burned, making a total of $12.33 per ton, or about 60 per cent for labor.

I have spoken somewhat of the location of the market. It is estimated that 20 per cent of the material is sold in Chicago and west of Chicago; in the Pittsburgh territory, 60 per cent; and east of Pittsburgh, 20 per cent. The cost of delivering the Austrian magnesite and the domestic magnesite at Pittsburgh are indicated by the following: The selling price at the seaboard of the Austrian magnesite is $15 a ton. The freight rate to Pittsburgh is $4.80 a ton, making $19.80 a ton the selling price, which means, mind you, a 100 per cent profit, probably, on the Austrian magnesite. We have not been able to get the cost of mining a ton of magnesite in Austria, but I have cited the report of an industrial engineer in that country to the effect that it was actually sold in Germany at $8 a ton. But, allowing them $15 a ton—pre-war price—at the seaboard in this country and $4.80 freight from the seaboard to Pittsburgh, they deliver it at Pittsburgh at $19.80, whereas it costs $38.40 to deliver a ton of dead-burned magnesite from Chewelah, Wash., which represents the production cost and freight added. So the difference between the cost in Pittsburgh of Austrian magnesite and of American magnesite, according to those figures, is $18.60. We are asking a tariff of only $15, hoping for some reduction in the freight rate and some possibility of cutting down the cost of production, so that it might be possible for us to compete upon equal terms at Pittsburgh, where 60 per cent of the market exists.

In Chicago, where 20 per cent of the market is found, the pre-war selling price at the seaboard was $15 on Austrian magnesite; freight from seaboard to Chicago via New Orleans, $7.20; making $22.20 for Austrian magnesite delivered in Chicago. The domestic magnesite cost on board the cars at Chewelah was $20; railroad freight to Chicago, $16.50; making $36.50; and the difference between the cost of domestic and Austrian magnesite delivered in Chicago was $14.30. I believe these figures to be the best figures which can be obtained, and they have been scrutinized with the utmost care by both those who were friendly and those who were unfriendly to the rate we were asking. According to these figures, at the rate we are asking, Austrian magnesite would simply have a disadvantage of 70 cents a ton in Chicago, while it would have an advantage of $3.60 in Pittsburgh.

Using foreign selling price—pre-war—as against our cost price to deliver at Pittsburgh, even on a $15 per ton tariff, before we can reach that market the railroad freight or other costs must be reduced $3.60 per ton.

In compiling these figures the short tons of dead-burned magnesite have been reduced to short tons of crude in order to show the consumption of crude ore.

These figures show that before the late war the average annual consumption of dead burned was an equivalent of 300,000 short tons of crude, of which the domestic production was 10,000.

In 1920 the consumption of dead burned and calcined equaled the equivalent of 366,877 short tons, of which 303,767 short tons, or 80.3 per cent, were domestic production.

Since the end of 1920 the Washington mines have been entirely closed down. There has been no domestic production there at all. I have here, though it is not necessary to read it, a detailed statement of the wages paid to skilled and unskilled workmen in Austria, given by the week in crowns. I am not going to put all the figures in the RECORD, but metal workers, skilled workmen received 20,000 to 30,000 crowns per week, and unskilled workmen 8,000 to 13,000 crowns per week. Estimating a miner's pay at 20,000 crowns per week, the people engaged in the mining of magnesite for a 6-day week would receive in wages the equivalent of 50 cents a day in gold, which I believe is what they are getting now for pro-

ducing magnesite in that country. There are no wages in the magnesite mining of Washington, because the mines are closed down, but as nearly as can be ascertained by comparison with similar industries in the West, the wages paid to miners are $4.50 to $5 here as compared with 50 to 60 cents a day paid by the Austrian producers.

I am not going to read the schedule to show the rates that are given the steel industry, which, as I said, have nearly all been increased, they being the only ones who are objecting to the rates we ask here, which would make an increase admittedly of only 3¾ cents in the production of a ton of steel selling at about $40 a ton, even though the entire tariff rate were added to the cost, which we all know would not be the case.

The rates were fixed by the House after a long and careful investigation by the Ways and Means Committee as to what they believed would comply with the principles upon which the Republicans base a protective tariff, namely, to bring about fair competitive conditions, or, as is sometimes stated, to cover the difference in the cost of production in the United States and abroad.

After that sort of examination by the Ways and Means Committee they fixed a rate upon dead-burned magnesite at three-fourths of 1 cent per pound. That is all we are asking. Not only have the Ways and Means Committee of the House examined this matter once but they have examined it twice. They reported out something like two years ago a special bill for this industry indicating a desire that they had—an honorable and legitimate and earnest desire on their part—to preserve in this country a great industry that had sprung up through the exigencies of the war. That bill came to the Senate and went to the Finance Committee. It was examined by that committee with the utmost care, and they made a favorable report to this body upon that rate. That is the rate we are asking, which I think we have demonstrated is necessary in order to give to this industry that degree of protection which the Republican Party advocates and which can not be sustained upon any principle or theory unless we make it uniform in its application and give it to everybody who comes within the terms and conditions under which a protective tariff theory is established.

I merely wish to say a few words further. I am speaking of this matter not from theory, not from what I have read, nor from what I have heard from witnesses, but from what I have seen with my own eyes. Not many months ago I had an opportunity to visit my home State, and I went to Chewelah to this great mine and saw mountains of the crude material and the beginnings which had been made in excavating it to bring it to the factories some 4½ miles from the mines on the Great Northern Railroad. That built up the town around the industry. When I was there it was closed down. As this report says, it has been closed down since the end of 1920. It is closed down now. It will continue closed down unless a rate is given sufficient to enable it to meet this imported material upon something like equal terms. That is what we are asking for.

If you give this industry that rate you will see those unoccupied buildings reoccupied. This factory that has nobody there but a watchman will be a teeming hive of industry. Those mines will afford the means of sustenance and life for hundreds and thousands of good American citizens. If you want to do it, grant this rate. I can understand thoroughly why a Democrat who does not believe in a protective theory—though I know some Democrats do believe in it—should vote against a protective tariff bill, but I do not see any principle which would induce a Democrat to vote against an item in a tariff bill which would give to that item and to that particular industry the benefit of this system, if the system is going to be adopted. Then you can vote against the bill and the whole system and defeat it, and that leaves everybody on an equal basis.

But if you are going to vote protection, give it to the West as well as to the East. We have been long enough the servitors to the wealth of the great manufacturing States of the East, grown great through a system of high rates upon manufactured products and free trade in raw materials. This is not a raw material, because it is the product of the labor of men. It may be a raw material to the steel industry that uses it, but it is not a raw material to those men whose enterprise and industry have gone into the mountains and dug it out of the earth and conveyed it to the railroads and taken out the dross and burned it until it is in that condition in which it can be used for fire brick in the manufacture of the metals of the country. It is their finished product and, as such, the product of their industry, and is entitled to the benefit of the protection to which every American citizen is entitled if this is going to be the policy of the country.

Mr. KELLOGG. Mr. President, will the Senator yield for a question?

Mr. POINDEXTER. Certainly.

Mr. KELLOGG. On page 136 of the Summary of Tariff Information I notice that the principal imports are from Canada, Austria-Hungary, Greece, Mexico, and Venezuela. Has the Senator a statement of the amount imported from each country?

Mr. POINDEXTER. I have not that at hand, but I can say to the Senator that the amount imported from Venezuela is negligible. There is a very small quantity imported from Canada. The only imports of importance are those from Greece and Austria.

Mr. KELLOGG. Where does the Canadian product come from?

Mr. POINDEXTER. There is very little comes from Canada. I do not know from what part of Canada it comes. It is practically negligible.

Mr. FLETCHER. Mr. President, I can only furnish in reference to this item such information as has come to me from people who are very trustworthy and reliable. I would make particular reference to the data submitted to me by the representatives of the Magnesite Mining & Manufacturing Co. This is a Delaware corporation with headquarters in New York. It is composed of American citizens who have invested very considerable money in Venezuela, on the island of Margarita, just off the coast of Venezuela, and also in mines and railroads and expensive machinery, scows, tugboats, and equipment of that sort.

It seems to be an American concern. They are greatly interested in the matter of imposing a duty upon magnesite. They claim that if this duty is imposed as provided in the bill—five-sixteenths of 1 cent per pound—it will completely put them out of business. They estimate that five-sixteenths of a cent per pound would amount to $7 a ton on crude magnesite, and that a duty of four-tenths of 1 cent would amount to $8.96 per ton of dead burned and grain magnesite not suitable for manufacture into oxychloride cement.

It appears this is quite an important article. The uses have been developed to a very good extent and it covers now quite a broad field. It seems that magnesite in one form or another, according to the statement of these gentlemen, is used in the following industries and for the following purposes:

First. The building industry and the production of sanitary and fireproof flooring, wall and window slabs, artificial marble, stone, ornaments, stucco work, and for many other building material purposes.

Second. In the steel industry, for manufactures of refractory brick, also in the copper-smelting industry for lining converters. It seems the steel industry is only interested in a very small portion of the uses in which this article is employed.

Third. Manufactures of sulphate of magnesium, known as Epsom salts, for medicinal, technical, and commercial purposes.

Fourth. In the manufacture of carbonic acid gas.

Fifth. Fireproofing and fire-protection purposes.

Sixth. Paint industry, especially fireproof paints for airplanes, and so forth.

Seventh. In the manufacture of magnesium chloride.

Eighth. In the manufacture of millstones.

Ninth. An antidote against arsenic poisoning.

Tenth. Many other articles of great commercial value can be produced from magnesite, as, for instance, asbestos wood switchboards, steam-pipe insulation, refrigerator insulation, and so forth.

So it seems to be quite an important article.

The representations made to me—and I shall put this letter in the RECORD after I have finished commenting on it—are that all of the factories manufacturing magnesite brick are located in Pennsylvania and Maryland, and the imposition of a prohibitive duty on the raw material will simply put those brick plants out of business and result in the establishment near the domestic raw material of new plants to replace them, which would mean that the goods would be manufactured to a large extent in foreign countries.

The argument is further made that the reserves of magnesite in the United States are entirely too small to justify considering a duty that would be prohibitive. They say that, according to the Geological Survey estimates, the California reserves are almost insignificant, amounting to only 750,000 tons, and the Washington reserves are estimated to be about 7,000,000 tons, half of which is unfit for commercial use.

The American Refractories Co. have over $2,000,000 invested abroad in magnesite operations—perhaps that is in Austria or Greece, though I am not advised where that is—which is many times the total of unamortized investments in magnesite

investments in the United States. The Magnesite Mining & Manufacturing Co.—that is, this Delaware corporation with offices in New York—has $1,500,000 invested, which it is contended would be destroyed by placing a duty on magnesite; and that means any duty at all, I take it, from these representations.

There is a large calcining plant at Runyon, in the State of New Jersey, which represents American money to the extent of $500,000, engaged entirely in manufacturing building materials, and if a duty is placed on raw magnesite that plant would be destroyed and a large number of persons would be thrown out of employment——

Mr. POINDEXTER. Let me ask the Senator a question.

Mr. FLETCHER. Just a moment and I will finish the sentence—and the many pottery industries, for which New Jersey is famed, would be required to pay a higher rate for the magnesite they use, which would seriously injure their business and in numerous instances cause failures. That is the representation which is made with respect to the imposition of any duty at all.

Mr. POINDEXTER. Mr. President, that shows how utterly unreliable are the views of a man who makes an article out of magnesite and sells it as to what is good for him and his business, because one of the chief advocates of the increase in this rate is the largest manufacturer of that kind in the United States. He wants an increase of duty on magnesite.

Mr. FLETCHER. What manufacturer is that? Will the Senator give his name?

Mr. POINDEXTER. He is in Chicago; I have his name here, which I can furnish to the Senator. The principal market of the country for plastic building material is in Chicago and tributary to Chicago.

I merely want to make a further suggestion to the Senator from Florida. He can see for himself, it seems to me, that the fears and apprehensions of this manufacturer in New Jersey could not possibly be realized; that this proposition could not ruin his industry because all that he would have to do in case there were an increase in the price of the finished product by reason of the tariff—which is almost infinitesimal when it is applied to the finished product—would be to increase his price to that extent to the consumer. That is the theory on which the protective tariffs are based; that there might be a slight increase to the consumers, but that they can afford to pay that slight increase in order to promote the industries of the country, give employment to the people, and furnish a market to the producers.

Mr. FLETCHER. This increase, while it is quite small as provided in the figures of five-eighths of a cent a pound, and so forth, is quite a considerable item when it is estimated in the ton, and will run into $7 or $8 a ton on the raw material; so I take it that would have a very considerable bearing on the business of the gentlemen who are engaged in importing it from their mines in Venezuela or on the island adjacent to Venezuela.

Mr. POINDEXTER. Of course, when it comes to the importer, the man who has a mine in Venezuela, I can understand his interest in opposing this tariff; but in this case, as in other cases, we want to protect the American laboring man, if we are going to have protection at all, against the competition of cheap labor, so as to enable our men to be employed and to put our producer upon an equal basis.

As the Senator from Florida has stated, the duty amounts to a considerable sum per ton; but when the application of that is made to the ultimate consumer it becomes an infinitesimal sum—3¾ cents increase in the cost of a ton of steel. The same principle would apply when it is used in building material.

Mr. FLETCHER. Mr. President, there is a very important product called zenitherm, which is stated in the circular to be "the ideal building material for exterior and interior use for castle or cottage." I have here quite a lengthy description of what the material is. It is important as a building material, and, of course, we are all more or less concerned about that.

What these gentlemen claim seems to be borne out, if not conclusively, at least very strongly, by certain affidavits which they submit and which I will ask to have printed in the RECORD, including one by Emil Rueff, who resides at Highlands, N. J., and who is president of the Magnesite Mining & Manufacturing Co. He says:

> Said corporation has extensive long leases on mining properties on the island of Margarita, Venezuela, from which for many years it has been mining crude magnesite and importing the same into the United States.

Now, without taking up time to define all their holdings, they pass on to this particular point:

> The proposed duty of five-sixteenths cent per pound of crude magnesite would mean a complete loss to the Zenitherm Co. of its investment in the calcining plant at Runyon, N. J.; it would also mean a complete loss to the Magnesite Mining & Manufacturing Co. of its investment and business in Venezuela and would necessitate a shutting down of the mines and a complete abandonment of the entire proposition, at a great loss of American money to American citizens who have invested in these magnesite mines in perfect good faith. The further mining of magnesite and the importation of crude magnesite to the United States could not possibly be continued under such a duty—

That is, the duty of five-sixteenths of a cent a pound—

> As a result, the business of calcining the raw magnesite and importation by said company into the United States would likewise come to an end.

Then he proceeds to say, further:

> It take from 2 to 2⅝ tons of crude magnesite to produce 1 ton of calcined magnesite. The only other sources of supply of magnesite that are of any importance are certain mines on the western coast of the United States and mines in Greece. Magnesite mined in California and other Western States can be calcined there and shipped to the Eastern States and other parts of the country without being subjected to any duty, the freight rates being based on 1 ton of calcined material, which, as before stated, is the result of from 2 to 2⅝ tons of the raw material, while raw material imported from Venezuela and calcined in the United States will be required to pay duty on 2 tons and upward of the raw material and freight on the same amount before it can be delivered to the factory for calcining, and if any duty is added, magnesite can not be imported. This duty and freight are so high that the resulting cost of Venezuela magnesite calcined in the United States is very much in excess of the price which the California and other western magnesite, calcined there, can be delivered in competition with the Venezuela magnesite.

Then further details are set out, showing the consequences and results of the imposition of such a duty on the investment in the mines and also on this industry at Runyon, N. J.

Attached also is an affidavit from Mr. Sonderhof, who says:

> I * * * reside in the city of New York. My business is that of commission merchant, and my special line of work has for a great many years past been the sale of magnesite and products and heavy chemicals. I have been actively engaged in the purchase and sale of magnesite for upward of 25 years in the United States, my headquarters having been in both New York and Chicago.

He says he is—

> thoroughly familiar with the prices of both crude and calcined magnesite coming from all these various sources and now being sold in the markets of the United States. By reason of my thorough knowledge of the magnesite market, I know that during recent years and under present conditions, to wit, the importation of both crude and calcined magnesite from foreign countries without duty, the calcined magnesite coming from California has been and is actually being sold in competition with the calcined magnesite imported from Greece and with the crude magnesite imported from Venezuela and calcined in the United States and sold in the eastern territory of the United States. In other words, the cost of producing the calcined magnesite in California and paying the freight thereon to the eastern part of the United States nevertheless makes it possible to sell the California calcined magnesite at prices similar to the Grecian calcined magnesite and the Venezuela crude magnesite calcined in the United States and still leave the California producers a margin of profit. Consequently it is my opinion that the imposition of a duty on crude magnesite from Venezuela and calcined magnesite from Greece is not necessary to enable the California producers to sell their product in the eastern part of the United States. I know of several cases where a user of calcined magnesite on the eastern coast of the United States is now purchasing calcined magnesite coming from the California mines, even though the raw magnesite from Venezuela and the calcined magnesite from Greece is likewise being offered for sale in this same territory.

I think that is also true as to Washington.

> In the Middle West—that is, points west of Cleveland, Pittsburgh, etc.—is the greatest market for calcined magnesite. The price at which California magnesite, calcined, can be delivered in that territory is such that Grecian calcined magnesite and the Venezuela crude magnesite, calcined in the United States, can not compete in price with the California product. This is the fact even under present conditions, where neither crude nor calcined magnesite coming into the United States has to pay any duty.
>
> I am reliably informed that the Magnesite Mining & Manufacturing Co., which mines magnesite in Venezuela and has been importing the crude magnesite to the United States, would be compelled to abandon its mines and cease the importation of crude magnesite into the United States in case the proposed duty of five-sixteenths of 1 cent per pound is levied. Such action would very seriously affect the business of the Zenitherm Co. to the extent that such company would be compelled to abandon its calcining plant, which was especially established for the purpose of calcining magnesite which the company expected to purchase from the Magnesite Mining & Manufacturing Co. from its mines in Venezuela, thereby causing many workingmen to lose employment, the calcining plant would remain idle, and the investment of the Zenitherm Co. in this part of its business become an entire loss.

That statement is sworn to by this gentleman, who has been for 25 years engaged in the business.

Mr. POINDEXTER. Mr. President——

Mr. FLETCHER. I yield to the Senator from Washington.

Mr. POINDEXTER. The advocate of the Venezuela mine from whom the Senator from Florida has quoted said that if this rate goes into effect they will be compelled to close down the Venezuela mine, as I understood the reading of the paper. I should like to ask the Senator from Florida if this result would not also follow, that when the supply is cut off from Venezuela, an equal amount being consumed in this country, it would not have the effect of starting the industry in the United States to produce that same amount here instead of in Venezuela? Would the Senator prefer to have it produced by American labor in the United States or to have it produced in Venezuela?

Mr. FLETCHER. I should prefer to have it produced in the United States if we have it here and if at the same time we can supply the markets of the whole country. For instance, this argument here is, according to the experience of these gentlemen, that the mines on the west coast—he refers specifically to California, but I take it that the statement would apply also to Washington—can mine this material there and calcine it and supply the market from Pittsburgh west under present conditions and successfully compete with the people on the eastern seaboard, like New Jersey, who can calcine the material brought in from Venezuela, even though now the material is without duty, and the calcined product is likewise without duty. In other words, we may be able to serve both halves of the United States, or both coasts, by meeting the wishes of both parties here. The western industry can survive and flourish and serve all west of Pittsburgh, while this industry might well serve the people east of Pittsburgh.

Mr. POINDEXTER. Mr. President, that statement is just a general statement, as I understand from a reading of it, and it is just a guess or a prediction as to what would happen in case this rate went into effect. I have cited here in detail the specific items going to make up the necessary cost of production in Washington, adding to that the cost of delivering it in the various markets to which the Senator has referred, and comparing that with the most reliable information that is obtainable, and which I believe to be entirely reliable, as to the selling price—not the cost of the Austrian magnesite, because we could not get that, but the selling price of the Austrian magnesite at the seaboard—and the same thing would apply to the Venezuelan magnesite, which includes, of course, the profits of producers. Add to that their cost of reaching Pittsburgh and Chicago, and the result is entirely different from the predictions made by the party making the affidavit from which the Senator read. That shows that on the Atlantic coast the foreign importer would have a great advantage; at Pittsburgh he would still have an advantage to the extent of $3.60 a ton; and at Chicago he would practically be on even competitive terms with the American producer. Under those conditions the only way in which the American producer could hope to share the principal market with him would be by getting a reduction in freight rates in the future and by scientific management of his mines, so that after the industry gets on its feet it might be able to cut down the cost of production to some extent. That is a very different situation, as shown by the actual figures, from the estimate given by this importer whom the Senator is quoting.

Mr. FLETCHER. It seems to me there is a danger, perhaps, if you make the duty too high and make it prohibitive as to the importations of magnesite from abroad, that you will force all calcining to be done in Venezuela and Greece, and you will force the manufacture of the products of that material into those countries, because I doubt very much if the supply in Washington can be brought clear over to the Atlantic coast, on account of the high freight rate, and serve the Atlantic coast—the seaboard States on this side—as against the products that may be manufactured in foreign countries.

Mr. JONES of Washington. Mr. President——

The PRESIDING OFFICER (Mr. SHORTRIDGE in the chair). Does the Senator from Florida yield to the Senator from Washington?

Mr. FLETCHER. I yield to the Senator.

Mr. JONES of Washington. Judging from the statement which the Senator has read, this gentleman seems to be very closely connected or very intimately acquainted with the Venezuelan magnesite.

Mr. FLETCHER. Yes.

Mr. JONES of Washington. I wonder if he states in that paper how much of the Venezuelan magnesite comes into this country.

Mr. FLETCHER. I have not the figures as to that. They give the amount of the investment in this company.

Mr. JONES of Washington. My thought is that it is very significant to find that in 1921 we imported from Venezuela only 1,000 tons of the crude magnesite.

Mr. FLETCHER. That was in what year?

Mr. JONES of Washington. Nineteen hundred and twenty-one. That is, according to the report of the Department of Commerce; so that gentleman seems to be very closely connected with the Venezuelan import.

Mr. FLETCHER. They state:

The Magnesite Mining & Manufacturing Co. has $1,500,000 invested which would be destroyed by placing a duty on magnesite.

Mr. JONES of Washington. Here is our official statement of the imports for 1921, showing just 1,000 tons of not purified Venezuelan magnesite.

Mr. FLETCHER. It may be a comparatively new business. I am not advised as to that. It is probable that they have not very long since closed their leases and put in their plant over there, invested in railroads and equipment for mining, and all that sort of thing, and it is possible that it is comparatively new.

Mr. JONES of Washington. Is this gentleman interested in the Venezuelan company?

Mr. FLETCHER. Yes; the affidavit which I read says that he is the president of it.

Mr. JONES of Washington. Oh, I see; I did not catch that.

Mr. FLETCHER. He says:

I reside at Highlands, N. J., and am the president of the Magnesite Mining & Manufacturing Co., a Delaware corporation.

It is this corporation that has the investment in Venezuela; and the last affidavit I read was from this gentleman, who has been in the business of importing for some 25 years.

There is another affidavit submitted here by Mr. R. B. Sutter, who says he resides in Newark, N. J., and he is president of this Zenitherm Co., which has an office in the city of New York and a factory at Runyon, N. J. The Zenitherm Co. relies upon the Delaware corporation operating in Venezuela for its supply of the raw material.

Said company manufactures a building material which it calls "zenitherm," the main ingredient of which is calcined magnesite. It is mainly used as a building material in the form of building cement.

That is this "zenitherm" that is made out of the magnesite.

A few years ago my said company formulated plans for the manufacture of its magnesite cement, having found that it could purchase the crude material coming from the mines in Venezuela at satisfactory prices to enable it to be calcined at the company's plant in New Jersey. The plant of the company at Runyon, N. J., now represents a value in excess of $500,000, and the business of the company is entirely that of manufacturing building materials. In view of its previous experience, the company finally decided that in order to assure a uniform product on which it could depend under all circumstances, it was necessary to import the crude material and calcine the same in its own factory and under its own control. These plans for calcining were also formulated as the then existing tariff law which provided that crude magnesite could be imported free of duty. At that time, after careful inquiries, it was found that the United States practically depended upon the importation of magnesite for the supply of its raw material.

I have been in the business of manufacturing this product for a great many years and am thoroughly familiar with magnesite, its uses and preparation, and also with general market conditions throughout the United States. As president of my said company I have made it my business to be thoroughly acquainted with all available magnesite sources. It takes in excess of 2 tons of crude magnesite to produce 1 ton of calcined magnesite. It has been my experience that magnesite imported as crude from Venezuela and calcined in the eastern part of the United States can not compete with California calcined magnesite in the Middle West; that is, points west of Cleveland, Pittsburgh, etc., which is the largest market for magnesite in the United States. This is the case even when it is considered that at the present time magnesite is imported into the United States free of duty.

Of course, I take it the same thing would apply to Washington as to California.

The capacity of the Zenitherm Co.'s plant at Runyon, N. J., is approximately 250 tons of calcined magnesite per day. The effect of the proposed duty of five-sixteenths cent per pound on crude magnesite would be that California calcined magnesite and Grecian calcined magnesite could be sold in the eastern part of the United States at a lower figure than the Zenitherm Co. could produce calcined magnesite made from crude magnesite at its factory. As a consequence the Zenitherm Co. would have to abandon all operations connected with the calcining of magnesite at its said plant in New Jersey.

As president of a company which is largely engaged in the calcining of magnesite from Venezuela in the United States and employing a plant and labor for that purpose, I respectfully request that crude magnesite be continued on the free list.

Mr. President, I ask to have this letter and these affidavits inserted in the RECORD.

There being no objection, the matter referred to was ordered to be printed in the RECORD, as follows:

WASHINGTON, D. C., *April 19, 1922.*

Hon. DUNCAN U. FLETCHER,
United States Senate, Washington, D. C.

DEAR SIR: Paragraph 204a of H. R. 7456, this session of Congress, known as the tariff bill, provides a duty of five-sixteenths of 1 cent per pound (which amounts to $7 per ton) on crude magnesite, and a duty of four-tenths of 1 cent per pound (or $8.96 per ton) on the dead-burned and grained magnesite not suitable for manufacture into oxychloride cements. Heretofore there has been no duty on crude or dead-burned and grained magnesite. Many times representatives of the companies producing magnesite in the State of Washington appeared in favor of a proposed tariff and as many times representatives of companies manufacturing refractory products opposed the bill, and practically all of the witnesses representing manufacturers of composition floors and other users of imported magnesite opposed the bill, it resulting that the committees were heretofore satisfied that to place a duty on such character of magnesite would be harmful to the industry of manufacturing and to the many users. To place a duty on crude or dead burned and grained magnesite now would be to destroy large investments of American money which were made based on the fact that there was no duty on raw magnesite.

We represent the Magnesite Mining & Manufacturing Co., a Delaware corporation with headquarters in New York, composed of American citizens who have invested the money in leases, for long periods, on magnesite mines on the island of Margarita off the coast of Vene-

zuela, and have invested very much money in mine railroads, expensive machinery, scows, and tugboats.

The rapid growth in the number of these industries using magnesite in the last few years has been phenomenal, and as yet the use of these articles seems to be still in its infancy. Magnesite in one form or another is being used in the following industries for the following purposes:

1. Building industry. (In the production of sanitary and fireproof flooring, wall and window slabs, artificial marble, stone, ornaments, stucco work, and for many other building material purposes.)
2. Steel industry. (Manufacture of refractory bricks; also in the copper-smelting industry for lining converters.)
3. Manufacture of sulphate of magnesium, known as Epsom salts, for medicinal, technical, and commercial purposes.
4. Manufacture of carbonic acid gas.
5. Fireproofing and fire protection purposes.
6. Paint industry (especially fireproof paint for airplanes, etc.).
7. Manufacture of magnesium chloride.
8. Manufacture of millstones.
9. An antidote against arsenic poisoning.
10. Many other articles of great commercial value can be produced from magnesite, as, for instance, asbestos wood switchboards, steam-pipe insulation, refrigerator insulation, etc.

All of the factories manufacturing magnesite brick are located in Pennsylvania and Maryland, and the imposition of a prohibitive duty on the raw material will quickly put those brick plants out of business and result in the establishment near the domestic raw material of new plants to replace them, which would mean that goods would be manufactured to a large extent in foreign countries.

Reserves of magnesite in the United States are entirely too small to justify even considering a prohibitive duty on imports the effect of which would be to exhaust our reserves in a very few years. Particularly is this true when we consider that this exhaustion would be largely for the benefit of one concern in the far West, which has already profited to the extent of many times its original investment. The Geological Survey estimates the California reserves at the insignificant quantity of 750,000 tons, and in Washington the survey estimates a total of about 7,000,000 tons, half of which is unfit for commercial use.

The American Refractories Co. has over $2,000,000 invested abroad in magnesite operations, which is many times the total of all unamortized investments in magnesite in the United States.

We do not believe that it was intended by the committee to deliberately recommend the destruction of investments by supporting a complete embargo against importations.

The Magnesite Mining & Manufacturing Co. has $1,500,000 invested, which would be destroyed by placing a duty on magnesite, and there is a large calcining plant at Runyon, in the State of New Jersey, which represents American money to the extent of $500,000, which is engaged entirely in manufacturing building materials, and if a duty is placed on raw magnesite this plant would be destroyed and a large number of persons thrown out of work; and the many pottery industries, for which New Jersey is famed, would be required to pay a higher rate for the magnesite they use, which would seriously injure their business and in numerous instances cause failures.

We are sending herewith an affidavit from Emil Rueff, president of the Magnesite Mining & Manufacturing Co., and one from G. A. Sonderhof, a commission merchant whose special line of work has been for a great many years past the sale of magnesite, and another affidavit from Roser B. Sutter, a resident of Newark, N. J., and president of the Zenitherm Co., with offices in New York City, owners of the calcining plant at Runyon, N. J. These affidavits are made by men experienced in the purchase, manufacture, and sale of magnesite in all its forms and are unusually capable from their long experience to judge of the effect of a duty on magnesite, both upon the companies which they represent and upon the users of either the raw or manufactured magnesite. Their affidavits plainly point out the great harm to be done to the magnesite industry if any duty whatsoever is placed upon the raw, dead burned, and grained magnesite.

We would ask, on behalf of those citizens whom we represent, that you offer an amendment to the tariff bill that no duty whatsoever should be placed upon imported magnesite.

Respectfully submitted.

STRICKLAND & TITTMANN,
By CHARLES T. TITTMANN.

In the United States Senate, re duty on magnesite, section 204 A, H. R. 7456, Sixty-seventh Congress, second session.

STATE OF NEW YORK, *County of New York, ss:*

Emil Rueff, being duly sworn, deposes and says:

I reside at Highlands, N. J., and am the president of the Magnesite Mining & Manufacturing Co., a Delaware corporation.

Said corporation has extensive long leases on mining properties on the island of Margarita, Venezuela, from which for many years it has been mining crude magnesite and importing the same into the United States. Said leases were sought and obtained, and are only of value in consideration of crude or raw magnesite being brought into the United States free of duty. This crude magnesite was then calcined in factories in the United States and used here. None of this crude magnesite is being calcined in Venezuela, as there are no facilities there to burn the magnesite, and to establish a calcining plant has been found to be quite impracticable, aside from depriving the American laborer of wages which would then be paid to foreign labor.

I am also the president of the American Carbonate Co., a New York corporation, which for upward of 20 years manufactured carbonic acid gas from crude magnesite, which it imported partially from Greece and partially from the mines of the Magnesite Mining & Manufacturing Co. in Venezuela. This gas could not be manufactured at the mines and imported to the United States, and sold there as cheap as it could be made in America. I personally had charge of the business and affairs of both the above companies, and am therefore thoroughly familiar with all the details both of the magnesite mining and its importation, calcining, and use.

The magnesite company has invested large amounts of American capital in the mining properties in Venezuela for the proper exploitation of mining there, consisting of a mining railroad, docking facilities, and mining equipment. The mines were leased and the entire arrangements made for the sole purpose of exporting the magnesite to the United States, and in view of the fact that the United States levied no duties on the importation of crude or raw magnesite.

One of the principal customers of the magnesite company is the Zenitherm Co. of Runyon, N. J., to whom the crude magnesite is sold and who has established a large calcining plant at Runyon, N. J., for the purpose of calcining magnesite. The proposed duty of five-sixteenths cents per pound of crude magnesite would mean a complete loss to the Zenitherm Co. of its investment in the calcining plant at Runyon, N. J. It would also mean a complete loss to the Magnesite Mining & Manufacturing Co. of its investment and business in Venezuela, and would necessitate a shutting down of the mines and a complete abandonment of the entire proposition, at a great loss of American money to American citizens who have invested in these magnesite mines in perfect good faith. The further mining of magnesite and the importation of crude magnesite to the United States could not possibly be continued under such a duty. As a result the business of calcining the raw magnesite and importation by said company into the United States would likewise come to an end.

My thorough knowledge of the magnesite business for many years makes me positive of this result, and for the following reasons:

It takes from 2 to 2¾ tons of crude magnesite to produce 1 ton of calcined magnesite. The only other sources of supply of magnesite that are of any importance are certain mines on the western coast of the United States and mines in Greece. Magnesite mined in California and other Western States can be calcined there and shipped to the Eastern States and other parts of the country without being subjected to any duty, the freight rates being based on 1 ton of calcined material, which, as before stated, is the result of from 2 to 2¾ tons of the raw material, while raw material imported from Venezuela and calcined in the United States will be required to pay duty on 2 tons and upward of the raw material and freight on the same amount before it can be delivered to the factory for calcining, and if any duty is added magnesite can not be imported. This duty and freight are so high that the resulting cost of Venezuela magnesite calcined in the United States is very much in excess of the price which the California and other western magnesite, calcined there, can be delivered in competition with the Venezuela magnesite.

The Greek magnesite likewise can be calcined in Greece and will then be shipped to the United States at freight rates which are equivalent to the freight rate on 1 ton of crude magnesite. Consequently it is impossible for the American company, the Magnesite Mining & Manufacturing Co., to deliver its crude material to the factories in the United States for calcining at a price which will enable said factories to calcine the crude material and have it ready for sale at a price which will enable it to compete in any manner with the very much cheaper calcined magnesite from Greece. In this connection it must be borne in mind that the labor necessary for calcining magnesite in Greece is very much lower than the wages paid American laborers, and, furthermore, Greece has the advantage of the lower rate of exchange which can fairly be presumed to continue for many years to come.

The result of the foregoing situation is:

1. The consumer of calcined magnesite would get an inferior quality of calcined magnesite. This product is used very largely for building purposes, particularly as a cement, and the nature of the product is such that it is in its best condition if used within a short time after it has been calcined and at or very near the place where it is calcined.

Calcined magnesite readily absorbs moisture and therefore loses its caustic quality and consequently should not be shipped long distances. This absorption of moisture and loss of caustic quality causes a serious deterioration of the calcined magnesite, inasmuch as the cement made from it will not set and cement as quickly or effectively as the calcined magnesite in its fresh condition. This results in a considerable loss of time, as builders are always anxious to use floors and similar structures in which cement is used as soon as possible. A considerable loss of time in the construction of buildings results, and it can readily be seen that this involves a handicap in completing buildings, which are most urgently needed. It also results in payment of higher prices for buildings.

2. If magnesite in its crude form could be imported to the United States from Venezuela without payment of any duty, it could be calcined at the factories in the United States, which would mean employment of American labor at prices prevailing here; it would mean the continued employment of capital invested in the calcining plants, such as the one at Runyon, N. J.; it would mean a fair return on the American capital invested in the Venezuelan mines; it would mean income in the nature of freight to be paid American vessels for shipping the raw material from Venezuela to New York; and, finally, it would mean a possibility of offering to the American public a calcined magnesite at a cheaper price than the calcined magnesite imported from Greece.

EMIL RUEFF.

Subscribed and sworn to before me this 18th day of April, 1922.

[SEAL.] ALFRED H. ERICHSON.

(Notary public, Kings County, N. Y., No. 87; New York County, No. 29; New York County register's No. 3031; Kings County register's No. 3013; commission expires March 30, 1923.)

In the United States Senate. In re duty on magnesite. Section 204 A, H. R. 7456. Sixty-seventh Congress, second session.

STATE OF NEW YORK,
County of New York, ss:

G. A. Sonderhof, being duly sworn, deposes and says:

I am of mature age and reside in the city of New York. My business is that of commission merchant, and my special line of work has for a great many years past been the sale of magnesite and products and heavy chemicals. I have been actively engaged in the purchase and sale of magnesite for upward of 25 years in the United States, my headquarters having been both in New York and Chicago.

In the course of my business I have handled magnesite coming from Greece, India, Venezuela, Canada, and California, and I have made it my business to become thoroughly acquainted with every known source of supply of magnesite, its use, the persons actually purchasing the same, and the conditions under which it was produced, shipped, and sold.

As a consequence, I am also thoroughly familiar with the prices of both crude and calcined magnesite coming from all these various sources and now being sold in the markets of the United States. By reason of my thorough knowledge of the magnesite market, I know that during recent years and under present conditions, to wit, the importation of both crude and calcined magnesite from foreign countries without duty, the calcined magnesite coming from California has been and is actually being sold in competition with the calcined magnesite imported from Greece and with the crude magnesite imported from

Venezuela and calcined in the United States and sold in the eastern territory of the United States. In other words, the cost of producing the calcined magnesite in California and paying the freight thereon to the eastern part of the United States nevertheless makes it possible to sell the California calcined magnesite at prices similar to the Grecian calcined magnesite and the Venezuela crude magnesite calcined in the United States and still leave the California producers a margin of profit. Consequently, it is my opinion that the imposition of a duty on crude magnesite from Venezuela and calcined magnesite from Greece is not necessary to enable the California producers to sell their product in the eastern part of the United States. I know of several cases where a user of calcined magnesite on the eastern coast of the United States is now purchasing calcined magnesite coming from the California mines even though the raw magnesite from Venezuela and the calcined magnesite from Greece are likewise being offered for sale in this same territory. In the Middle West—that is, points west of Cleveland, Pittsburgh, etc.—is the greatest market for calcined magnesite. The price at which California calcined magnesite can be delivered in that territory is such that Grecian calcined magnesite and the Venezuelan crude magnesite calcined in the United States can not compete in price with the California product. This is the fact, even under present conditions, where neither crude nor calcined magnesite coming into the United States have to pay any duty.

I am reliably informed that the Magnesite Mining & Manufacturing Co., which mines magnesite in Venezuela and has been importing the crude magnesite to the United States, would be compelled to abandon its mines and cease the importation of crude magnesite into the United States in case the proposed duty of five-sixteenths of 1 cent per pound is levied. Such action would very seriously affect the business of the Zenitherm Co., to the extent that such company would be compelled to abandon its calcining plant, which was especially established for the purpose of calcining magnesite which the company expected to purchase from the Magnesite Mining & Manufacturing Co. from its mines in Venezuela, thereby causing many workingmen to lose employment, the calcining plant would remain idle, and the investment of the Zenitherm Co. in this part of its business become an entire loss.

G. A. SONDERHOF.

Sworn to before me this 18th day of April, 1922.

[SEAL.] ALICE WEAVER,
Notary Public, Queens County.

(Certificate filed in New York County.)

—

In the United States Senate. In re duty on magnesite. Section 204 A, H. R. 7456. Sixty-seventh Congress, second session.

STATE OF NEW YORK,
County of New York, ss:

Roser B. Sutter, being duly sworn, deposes and says:

I am of mature age and reside in Newark, N. J., and am the president of the Zenitherm Co., which has an office in the city of New York and a factory at Runyon, N. J.

Said company manufactures a building material which it calls "zenitherm," the main ingredient of which is calcined magnesite. It is mainly used as a building material in the form of building cement.

A few years ago my said company formulated plans for the manufacture of its magnesite cement, having found that it could purchase the crude material coming from the mines in Venezuela at satisfactory prices to enable it to be calcined at the company's plant in New Jersey. The plant of the company at Runyon, N. J., now represents a value in excess of $500,000, and the business of the company is entirely that of manufacturing building materials. In view of its previous experience, the company finally decided that in order to assure a uniform product on which it could depend under all circumstances it was necessary to import the crude material and calcine the same in its own factory and under its own control. These plans for calcining were also formulated as the then existing tariff law provided that crude magnesite could be imported free of duty. At that time, after careful inquiries, it was found that the United States practically depended upon the importation of magnesite for the supply of its raw material.

I have been in the business of manufacturing this product for a great many years and am thoroughly familiar with magnesite, its uses and preparation, and also with general market conditions throughout the United States. As president of my said company I have made it my business to be thoroughly acquainted with all available magnesite sources. It takes in excess of 2 tons of crude magnesite to produce 1 ton of calcined magnesite. It has been my experience that magnesite imported as crude from Venezuela and calcined in the eastern part of the United States can not compete with California calcined magnesite in the Middle West; that is, points west of Cleveland, Pittsburgh, etc., which is the largest market for magnesite in the United States. This is the case even when it is considered that at the present time magnesite is imported into the United States free of duty.

The capacity of the Zenitherm company's plant at Runyon, N. J., is approximately 250 tons of calcined magnesite per day. The effect of the proposed duty of five-sixteenths cent per pound on crude magnesite would be that California calcined magnesite and Grecian calcined magnesite could be sold in the eastern part of the United States at a lower figure than the Zenitherm company could produce calcined magnesite made from crude magnesite at its factory. As a consequence the Zenitherm company would have to abandon all operations connected with the calcining of magnesite at its said plant in New Jersey.

As president of a company which is largely engaged in the calcining of magnesite from Venezuela in the United States and employing a plant and labor for that purpose, I respectfully request that crude magnesite be continued on the free list.

ROSER B. SUTTER.

Sworn to before me this 18th day of April, 1922.

[SEAL.] EFFIE V. REDMOND,
Notary Public, No. 310, New York County. Reg. Office No. 4338.

Mr. FLETCHER. This statement is sworn to. All of these are affidavits, sworn to before a notary public, and certified to be true. I do not question but that they are true; and if they are true it would seem that California and Washington can very successfully compete in the markets and control all the markets west of Pittsburgh, and compete in any other markets in the country—in fact, take away the market of this country, even where there is no duty on raw magnesite.

Mr. JONES of Washington. Mr. President, will the Senator permit me to suggest that whatever the theory may be, whatever the ideas of this man may be, we know that our mine is closed, absolutely.

Mr. FLETCHER. That is for the mining of raw material. As I understand, that operation out there never has included the calcining of the magnesite at all. It is just simply handling the raw material.

Mr. JONES of Washington. I think it is calcined, too. They burn it, I think, as the Senator from Utah says. That was my impression, that they burn it. They invested millions of dollars during the war. Now the plant is absolutely closed.

Mr. FLETCHER. I take it, if these statements are true, that all they have to do is to go on with their industry and calcine this magnesite and put it to the same use and find a market. They simply have to develop their market, and they can do that, on account of the freight rates and conditions, and they can have the whole market west of Pittsburgh for their product, it would seem, even if there is no duty at all on magnesite. Therefore, under these circumstances, I feel constrained to oppose even the duty that is included in the bill, and certainly the amendment that is offered by the Senator from Washington.

Mr. GOODING. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The roll was called, and the following Senators answered to their names:

Ball	Harris	McKinley	Sheppard
Borah	Harrison	McLean	Shortridge
Brandegee	Johnson	McNary	Simmons
Broussard	Jones, N. Mex.	Newberry	Smith
Bursum	Jones, Wash.	Nicholson	Smoot
Capper	Kellogg	Norbeck	Spencer
Cummins	Kendrick	Oddie	Sterling
Curtis	Keyes	Page	Sutherland
Ernst	Ladd	Pepper	Walsh, Mass.
Fletcher	La Follette	Phipps	Warren
Frelinghuysen	Lodge	Pittman	
Gooding	McCormick	Poindexter	
Hale	McCumber	Robinson	

The PRESIDING OFFICER. Forty-nine Senators having answered to their names, a quorum is present.

Mr. McCUMBER. Mr. President, if I can have the attention of the Senate a very few moments, while we have 49 Senators present, I think at least we can shed a little light on this matter, which becomes one of the material things we have to consider in the tariff bill.

In a colloquy between the Senator from Iowa [Mr. CUMMINS] and myself on Saturday, in discussing the question of the rate to be fixed on any given commodity, I took occasion to say at that time, in answer to his query, that there would be many instances in which the committee had to consider the matter of freight rates, and often they had to consider the question as to whether the freight rate should be taken into consideration in the matter of fixing the tariff, or whether we would have to give up any attempt to make a tariff rate high enough to protect the industry where the freight rates were excessively high. This is one of those cases which is at least within the twilight zone of such a condition.

I trust Senators will not conduct separate arguments in different parts of the Chamber while I am proceeding. I, of course, shall be gratified if Senators have made up their minds on this question and are ready to vote on it without any further consideration. We have taken this product off of the free list and have given a rate of $8 a ton. The only question is whether we should increase that rate to about $15 a ton. I am considering the dead burned product, which has been discussed by the Senator from Washington [Mr. POINDEXTER].

The committee agreed with the Senator from Washington regarding the desirability of maintaining the American industry. It considered that the war-time cost was somewhat higher than at the present time, and in view of the extreme importance of the product, and also since the number of producers in the United States was very limited, it did make a most careful analysis of the situation. It found that the American costs should be somewhat lower than those submitted by the United States producers.

It was found that the cost of the most important of these products, coming from Czechoslovakia, Austria, and other European countries, was somewhat above the pre-war cost, and not something below the pre-war cost.

We had to take into consideration the costs in those foreign countries, and the cost of production in the United States. The Senator from Washington stated that he was unable to get the cost of production in the foreign countries; but the committee did get that cost, at a very recent date, and we got the figures

on every item of cost in the foreign country and in the United States, and very latest costs that we could get.

Mr. POINDEXTER. If the Senator will pardon me, not being able to get reliable figures as to the cost of production in the foreign countries, we had to take the selling price of the foreign product in American ports, which was greatly to the advantage of the foreign producer, of course.

Mr. McCUMBER. Mr. President, the committee was not limited to that. The committee did obtain, through its experts, the costs of production in the foreign countries, and the many items making up those costs of production, and the freight rates to the different points of consumption in the United States.

It appears that under present conditions the cost of producing dead-burned magnesite, f. o. b. at domestic plants in Washington, is approximately $17 per ton, as compared with a landed cost of foreign magnesite of similar quality at $18 per ton f. o. b. Atlantic ports.

Assuming these costs to be correct, and adding the transportation cost by the cheapest routes, the comparative costs of domestic and Austrian or Czechoslovakian dead-burned magnesite delivered at important consuming centers are given in the figures I have in my hand.

I have the details of all of those costs, which I could put into the RECORD, but I shall not lumber the RECORD with them now. I want to give, in round figures, just what they amount to.

The domestic cost per 2,000 pounds of this product landed in Pittsburgh, via the Panama Canal and by rail, which is the cheapest route, the combined route, is $31.50. The foreign cost per 2,000 pounds landed in Pittsburgh is $23.20, leaving a difference of $8.50 per ton of 2,000 pounds in favor of the importer.

Mr. POINDEXTER. May I ask the Senator from what source he obtained those figures?

Mr. McCUMBER. I obtained the figures which I will give from the experts, who were requested by the committee to ascertain the costs, and they have given them in full, and I can put them into the RECORD.

Mr. POINDEXTER. One of the experts I heard testify before the committee said he had produced magnesite in the State of Washington and was interested in the steel industry, and he was doing everything he could to prevent the increase of the rates.

Mr. McCUMBER. These are not the experts of any producing company but the experts of the Tariff Commission.

Mr. POINDEXTER. If the Senator will pardon me, I will say that the figures which I gave, showing a cost of more than $20 a ton f. o. b. cars in Washington, were taken from the books which were opened up for the examination of the committee by the company that was operating.

Mr. McCUMBER. I do not think we are very far apart on the American cost of production. I have taken it now at the latest date and the cost of labor of the latest date, and not at the highest point in 1920, and the difference is not very great. I think the Senator put it at about $20 a ton and this gives it at $17 a ton.

Now, I will take the Chicago market. The domestic cost to put 2,000 pounds down in Chicago, which, of course, would be all rail from the west coast, is $33.70. The foreign cost to put 2,000 pounds down in Chicago would be $27.60, leaving a difference of $6.10 in favor of the foreign importer.

Now, Mr. President, we have given a rate of $8 per ton. That rate of $8 per ton would give the western manufacturer an advantage in the Chicago district and all points west thereof. It will give the importer some advantage in points east of the Chicago section; in other words, in the Pittsburgh district. Considering the importance of the industry the committee came to the conclusion that it would be better to give a rate which, under the cost of production at home and abroad and taking into consideration the enormous cost of bringing the product all the way from the west coast to the eastern coast, would be a very heavy burden upon the consumer. It was one of those cases where, because of the heavy freight rates, which are always an ugly feature of the situation when we have to bring a heavy product from ocean to ocean, it was believed best to put a rate that would still allow the western producers practically the control of the Chicago market and everything west of Chicago, and would, of course, still give the importer an advantage in the markets around Pittsburgh and east of Pittsburgh.

That, Mr. President, I think, presents the matter in a nutshell.

Mr. JONES of Washington. Mr. President, I am not going to take very much of the time of the Senate. My colleague [Mr. POINDEXTER] has covered the matter very fully, and I shall do nothing more than probably emphasize one or two points that he made.

It seems to me that this item very strikingly illustrates the principles of protection; at least it does to my mind. My idea of protection is such encouragement as will develop, build up, and maintain an industry in this country if there is a possibility of doing so and if the establishment of such an industry is desirable.

It is admitted by everyone that this is a very important product. It is very necessary to some of the great industries of the country. Of course, it is very natural that those great industries should desire to get the product as cheaply as possible, and yet it does seem to me that sometimes we allow our own special interests to blind us to the broader questions which may be involved. While it may be desirable, for instance, that the steel industry should secure magnesite at a cheap rate for the time being, in the broader sense and in the lapse of years it may be the very worst thing that could happen to that industry itself.

Everybody concedes that magnesite is very necessary to the steel industry. We have taken care of the steel industry in pretty good shape. We have given it ample protection. We have probably gone further than we should have gone. I remember in the last few days it has been contended, and with a great deal of force, that some of the tariff rates affecting the steel industry are absolutely unnecessary, and yet we have put them on. I do not believe any injury will come from it. I was willing to vote for the items out of a superabundance of caution.

I want to say that I have no fault to find with the committee. I do not believe that anybody has any cause of complaint against the industry and the desire of the committee to do what they think is the right thing. No one, aside from those of us who are here, can appreciate the difficulties under which the committee has labored and under which a committee in framing a bill of this kind must labor. But it seems to me that the chairman of the committee, the Senator from North Dakota [Mr. McCUMBER], took a position a little different from what I would have taken. It appears to me he has taken the minimum position with reference to this industry, where I think I should take more nearly the maximum. It may be that I am influenced, of course, by the local situation. He has given the benefit of the minimum rate rather than of a higher rate. He has given the importer an absolute, positive advantage. I think that we should have resolved any doubt in favor of the domestic industry and that the twilight zone should have extended so as to take care of the domestic industry.

What was the situation with respect to this industry? In 1913 we were producing in this country only 10,000 tons of magnesite. We had just one mine in operation in all the United States. They were importing into the country, I think, about 160,000 or 170,000 tons of magnesite. One hundred and forty and odd thousand tons of that came from Austria, a country with which we soon became involved in war. When the war came on it acted as a high protective tariff; it acted really as an embargo, and what was the result? This one mine was magnified into 65 mines producing magnesite throughout the country. The 10,000 tons of magnesite production was increased to over 300,000 tons. Of course, they had the home market, which was given to them by the war. Our people went into the industry and developed the mines and put in their money.

Out in my State, as my colleague has pointed out, millions of dollars were invested in the development of the mines. We produced in 1920 some 141,000 tons of magnesite. The war stopped, importations began to come in, and what was the result? With general depression throughout the country, added to by the importations into this country, our mine is closed down, absolutely closed. I just desire to read briefly from the hearings, which speak more eloquently than my words, to my notion, as to the situation. Mr. Bishop was the manager of our mine, I think. In the course of his testimony he said:

> I wish to state to the committee that in the four years' operation our gross receipts have been $6,210,951.18. We have passed to net surplus $1,043,498.11. We now have on hand $40,000, and every cent of our surplus except this $40,000 has been invested in plant and improvements necessary to produce the magnesite required. We are closed down and nine men are watching our property for the insurance companies.
>
> There has not been one dollar of dividends paid, not an officer of the company has received compensation except myself. I have drawn a moderate salary, as I have devoted a large part of my time to active affairs of the company.

So this company, which started the development of this mine under the needs and impetus and demands of war, investing five or six million dollars, declaring no dividends, is now absolutely closed down, with but a few men to watch the plant.

While there has been widespread depression, yet, as a matter of fact, imports since the war closed are increasing, and increasing very largely. I have here a statement of the imports of merchandise into the United States by the Department of

Commerce, an official report. It gives the imports of magnesite for 1913 as a total of 154,098 tons.

In 1918 the imports were 18,636 tons and in 1919 14,153 tons. But note, Mr. President, in 1920 the imports were 43,154 tons, or over three times the imports of 1919. In 1921 the imports were 52,483 tons, or nearly four times the imports of 1919. Mark you, the country that was sending to us in 1913 the greatest part of the imports of magnesite did not send us any in 1920 and 1921, to wit, Austria.

We have a statement in the hearings that in the beginning of 1921 Austria was beginning to ship to this country. We know the conditions over there. According to reports in the hearings their labor only gets 30, 40, or 50 cents a day. Our labor gets $4 or $5 a day. When business revives in this country, instead of a revival in the magnesite industry in this country, it will continue closed, and the imports will keep coming in from the other countries. The Austrian magnesite will begin to come in and take the place that it had when the war began.

Suppose we had not had the capital that would go into this industry when the war came on. We can not conceive of the injury to the steel industry, if you please, that would have had its supply of magnesite shut off entirely. Suppose we allow this foreign magnesite to come in and our mines are shut down and stay closed, and they are abandoned and the machinery gone to wreck and the buildings ruined, and all that sort of thing, and then we should get into trouble again. I do not anticipate it soon—I hope it will not come—but it is possible. Then we would be dependent upon some foreign country for our supply of magnesite. It might be a country, just as was true in the last war, from which the importations would be stopped by the war. Then we would have to start from the bottom, with all the waste and all the expense, not only to the individual but to the Government itself.

It seems to me it is the part of wisdom to use all the necessary means which are required to develop this industry and put it upon a stable and permanent basis. There can not be any question as to the supply of magnesite in this country. If we get it developed, as my colleague pointed out, it means the investment of capital, it means the employment of labor, it means a market for the various productions of the manufacturer as well as the farmer and the producer of the country. The benefits that would come are the benefits which protectionists, at any rate, have claimed would come from a protective policy. It is difficult for me to see just why a protectionist should not be willing to go as far as may be necessary in order to establish the industry.

I know the committee have gone far and the rate seems to be high. The rate of percentage is high, but, Mr. President, it took the embargo of war to develop the industry. It requires a little higher rate in order to get it upon a permanent basis. The time will come in the very near future when we shall have to revise this tariff as to many items. Then if this industry is developed and put upon a permanent basis we may lower the rate. I think it is the part of wisdom to impose such a rate in this case as will insure the development of the industry which has been brought into being by the war.

I am not going to take further time, except I merely wish to call attention to the committee report on the emergency magnesite tariff bill which passed the other House. As has been pointed out, the House passed a bill as an emergency measure, fixing a certain tariff rate on magnesite. That bill came over to the Senate and it went before the Finance Committee. That is the same committee which has reported the pending bill; the committee has almost the same membership now as at that time.

The committee investigated the matter carefully and submitted a report, which is found on page 1072 of the Senate hearings. The committee took a position that appeals to me very strongly; it is in harmony with my views of a protective tariff and of the application of the protective tariff principle. They stated:

> The object of the bill is to protect the magnesite industry of the United States, to enable American consumers to procure the product from American magnesite mines.

Then they go on to state the conditions when the war broke out; that there was only one mine producing only 10,000 tons of crude magnesite per year and that we were importing 172,591 tons, principally from Austria. They say further:

> The war virtually stopped the importation, and in the year 1917 there were only about 4,000 tons imported, and this came largely from Canada. The needs of the steel mills and the smelting works were so great that the industry was greatly developed in this country, and in 1917 there were over 300,000 short tons produced from the mines in the United States. The production of 1917 was as much or more magnesite than was ever used in this country in any one year, and it is perfectly evident that our needs can be supplied from American mines. Magnesite is used in every steel mill and in all the smelting works in this country, and the consumers in the United States have been taking from 50 to 60 per cent of the total magnesite production of the world.
>
> Prior to the war only about 3 per cent of the product consumed in this country was produced from our own mines, while last year nearly all the magnesite used in this country was produced here. So it may be said that the Great War developed this very important industry.

Then they go on to point out the cost of production in this country and Austria, and so forth. I want to read this:

> The evidence disclosed that prior to the war there were less than 50 men employed in the production of magnesite in the United States. In the years 1917 and 1918 there were about 2,000 men directly engaged in the magnesite industry in this country. They were receiving an average wage of $5 per day. These men, with their dependents, made about 10,000 citizens directly dependent upon the magnesite industry.
>
> The hearings before the House committee disclose, however, that Austrian labor in the magnesite industry received from 20 to 40 cents per day, and that the American Refractories Co. stated that Austrian labor received $1.10 per day. In considering the labor question it should be remembered that in Austria they work 12 hours per day, while in America they work 8 hours per day. It is estimated that the direct and indirect labor charge in the magnesite industry in this country is from 75 to 80 per cent of the cost of production.
>
> Your committee, therefore, recommends the passage of the House bill 5218 without amendment.

Mr. President, I ask that this entire report—it only occupies a little over a page—may be printed in connection with my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

The matter referred to is as follows:

EXHIBIT A.

[Senate Report No. 458, Sixty-sixth Congress, second session.]

DUTY ON MAGNESITE ORES.

The Committee on Finance, to whom was referred the bill (H. R. 5218) to provide revenue for the Government and to establish and maintain the production of magnesite ores and manufactures thereof in the United States, having considered the same, report favorably thereon with the recommendation that the bill do pass without amendment.

The object of the bill is to protect the magnesite industry in the United States, to enable American consumers to procure the product from American magnesite mines.

Up to 1913 there was but one magnesite mine operating in the United States, and it produced about 10,000 tons of crude magnesite per year. In the year 1913 there was imported into the United States 172,591 short tons of magnesite, of which 163,715 tons came from Austria.

The war virtually stopped the importation, and in the year 1917 there were only about 4,000 tons imported, and this came largely from Canada. The needs of the steel mills and the smelting works were so great that the industry was greatly developed in this country, and in 1917 there were over 300,000 short tons produced from the mines in the United States. The production of 1917 was as much or more magnesite than was ever used in this country in any one year, and it is perfectly evident that our needs can be supplied from American mines. Magnesite is used in every steel mill and in all the smelting works in this country, and the consumers in the United States have been taking from 50 to 60 per cent of the total magnesite production of the world.

Prior to the war only about 3 per cent of the product consumed in this country was produced from our own mines, while last year nearly all the magnesite used in this country was produced here. So it may be said that the Great War developed this very important industry.

Prior to the war magnesite was imported from Austria at a cost of $15.75 per ton. It was stated that the cost at the mines in that country was about $7 per ton. The railroad rates and dock charges amounted to about $2 per ton, and the ocean rates to Atlantic ports were about $2 per ton. The average cost of that produced in the United States at the mine is about $25 per ton, and the freight is from $10 to $16 per ton, depending upon destination, so it will be seen that it will require a tariff of at least 1½ cents per pound to cover the differential.

Sworn cost statements, plus $2 ocean charges.

	At mine.	At Trieste.	At United States Atlantic ports.
Average United States	$25.13	.....	$41.20
Austrian	17.69	$21.94	23.94
Difference in costs	7.44	.....	17.26

Let us in a similar manner show in parallel columns the sworn statement of the Austrian cost and the sworn statement of the lowest American producers.

Sworn cost statements, plus $2 ocean charges.

	At mine.	At Trieste.	At United States Atlantic ports.
Lowest United States	$21.09	.....	$37.22
Austrian	17.69	$21.94	23.94
Difference in costs	3.40	.....	13.28

For many years the magnesite produced in this country came from California, and the greater part of that used by our consumers came from Austria, but the needs brought about by the war caused the deposits in Washington and California to be developed, and by the building of works, exploration of mines, and the liberal expenditure of money some 65 mines were being operated in 1917 and enough magnesite was produced in the two States to supply the entire demand of this country, but to-day there are only 30 magnesite mines being worked, and more will be closed if the industry is not protected, and this country will again be dependent upon Austria for its magnesite, but, with proper protection, our mills will be independent of any foreign producer.

Magnesite, both crude and calcined, has been on the free list since 1883. The pending bill places a duty on magnesite and commercial ore, either crushed or ground, of one-half of a cent per pound; magnesite, calcined, dead burned, and grain, three-fourths of a cent per pound; magnesite brick, three-fourths of a cent per pound and 10 per cent ad valorem.

The evidence disclosed that prior to the war there were less than 50 men employed in the production of magnesite in the United States. In the years 1917 and 1918 there were about 2,000 men directly engaged in the magnesite industry in this country. They were receiving an average wage of $5 per day. These men, with their dependents, made about 10,000 citizens directly dependent upon the magnesite industry.

The hearings before the House committee disclosed, however, that Austrian labor in the magnesite industry received from 20 to 40 cents per day, and that the American Refractories Co. stated that Austrian labor received $1.10 per day. In considering the labor question it should be remembered that in Austria they work 12 hours per day, while in America they work 8 hours per day. It is estimated that the direct and indirect labor charge in the magnesite industry in this country is from 75 to 80 per cent of the cost of production.

Your committee, therefore, recommends the passage of the House bill 5218 without amendment.

Mr. JONES of Washington. That is about all that I am going to say. As I have stated, I have no criticism of the committee; I know that the chairman of the committee is just as strong a protectionist as am I. He looks at this matter from the same standpoint that I do. I recognize that we on the Pacific coast are at a great disadvantage because of our distance from the market and that freight rates are a great handicap; but I feel that as to such an important industry as is this, involving a product so important in so many different lines of manufacturing industry, we may well afford to stretch a point and try to compensate for those disadvantages as much as we can in order to supply our home market by our home people rather than to depend on the foreign producer, and especially for something that is of so great importance in case we shall ever become involved in war.

Mr. McCUMBER. Mr. President, I merely desire to say in reply to the Senator from Washington that, as I previously suggested, we are giving the Washington producers practically everything as far east as the Chicago market. Of course, that would include Indiana and Michigan, with their great iron and steel establishments.

Mr. GOODING. Mr. President——

Mr. McCUMBER. Just one word further. The way that we have computed it would give everything east of Pittsburgh practically to the importer. I appreciate, and I know that Senators all appreciate, the difficulties due to the great cost of transportation. If the transportation cost becomes materially less, I think the western product, with this $8 per ton duty may reach as far east as the Chicago district, but, of course, that is yet to be determined.

I rose at this time particularly to ask that the statement and the tables on which I made my argument a short time ago in favor of the $8 per ton differential may be inserted in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The matter referred to is as follows:

DOMESTIC COSTS.

The only domestic production comes from Stevens County, in the State of Washington, the shipping point being Chewelah. Cost figures in detail are available only from one main producer, the Northwest Magnesite Co. Owing to some question in regard to the distribution between operating and capital expenditures and wide fluctuations in actual operating costs resulting from the abnormal conditions that existed during the period in which the plant was operated, it is impossible to accept the cost statements without certain reservations. From the latest Bishop report two estimates are possible—one based upon the total operations of the company from its inception, May 4, 1917, to December 31, 1920, when the plant was shut down. During this period a total of 451,332.85 tons of crude magnesite were mined or purchased, of which 374,829.78 were mined by the Northwest Co. The ratio of crude ore to dead-burned magnesite is obtained by dividing the total tonnage delivered to the kilns by the production of dead-burned magnesite. The figures are 368,098 and 171,261, respectively, thus establishing the basic ratio of 2.15 tons crude required to produce 1 ton of dead-burned magnesite. In addition to the above, 8,530,000 tons of iron ore were required, which increased the ratio of raw mix to 2.2 tons.

Detailed costs for the 11-month period June 1, 1918, to May 1, 1919, have also been presented by the Northwest Magnesite Co. These figures indicate a direct operating expense of $7.33 per ton of crude, which is equivalent, according to this ratio, to $15.65 per ton of dead burned; but this statement includes an allowance of 81 cents on "Finch mine development expense." This item has been noted by Mr. Bishop, who explains that it was incidental to the development of the ore actually mined during that period. Analyzing this cost, however, it appears that out of $77,883 charged under this item, $60,472 is classed as "miscellaneous" and only $13,161 as "labor." These figures indicate, in the absence of further explanation, either excessive repairs to equipment or the inclusion of expenditures more properly classed as capital expenditures, or at least expenses, that should be distributed over a much longer period of operation. Adjusting this figure from 81 cents to 20 cents, or approximately 50 per cent more than the labor item, reduces the direct operating expense for the period to $6.72 per ton of crude or $14.45 per ton of dead-burned product.

On the basis of operations from May 4, 1917, to December 31, 1920, the total operating expenses charged under the three main items can be calculated into cost per ton of dead-burned product, as follows:

Labor	$5.95
Material and supplies	6.60
Miscellaneous	2.00
Total	14.55

The above figures represent the average cost as ascertained from the total expenses throughout the entire period of operation of the company's plant, and show a surprising correspondence with those obtained from an analysis of the 11-month period when operations were probably on a more nearly normal level than at any other period in the history of the company.

In addition to direct operating costs, it is only fair to make reasonable allowances for general charges. While it may be argued that the Northwest Magnesite Co. has been practically the only operator in the past and that this company has already had its capital investment returned out of profits, the American Mineral Production Co. is a probable producer and there is a possibility that other producers might later enter the field. After a careful examination of the data relative to the actual capital invested in the Northwest enterprise, it seems proper to make the following allowances per ton for dead-burned product:

Administration and general expense	$0.50
Taxes, insurance, and interest	1.00
Depreciation	.50
Depletion	.50
Total	2.50

The total cost, using the above figures of general expenses in each case, figures out at $17.05 per ton for the entire operations or $16.95 per ton on the basis of the 11-month period (corrected).

As a further check upon the probable cost, it is of interest to refer to the arbitrary estimate prepared by Mr. A. F. Greaves-Walker and published in Senate hearings, part 2, January 13, 1920, on H. R. 5218. This estimate, based upon Mr. Walker's experience in Washington and knowledge of the Northwest Company's operations, is $14.51 per ton. Another theoretical estimate prepared by the committee's experts indicates the following approximate distribution:

Domestic costs (Washington).

MINE.

Quarrying expense per ton of sorted crude	$1.25
Crushing per ton of sorted crude	.20
Tramway per ton of sorted crude	.30
Total per ton of sorted crude	1.75

REDUCTION PLANT.

Magnesite (2¼ tons) per ton of dead burned	$3.90
Iron ore (3 units at 20 cents) per ton of dead burned	.60
Coal (0.33 ton at $7) per ton of dead burned	2.30
Labor per ton of dead burned	1.50
Repairs and supplies per ton of dead burned	2.50
Power per ton of dead burned	.50
Overhead per ton of dead burned	2.00
Total operating per ton of dead burned	13.30
Administrative, etc., per ton of dead burned	.50
Taxes, insurance and interest per ton of dead burned	1.00
Depreciation per ton of dead burned	.50
Depletion, per ton of dead burned	.50
Total per ton of dead burned	15.80

The above estimates are admittedly based upon numerous assumptions, but the evidence clearly indicates that the present-day cost of producing dead-burned magnesite f. o. b. Chewelah, Wash., should not exceed about $17 per ton, and should eventually be reduced to $15 or under.

Foreign costs: It is even more difficult to make any accurate estimate of probable costs in either Austria or Czechoslovakia, in view of the abnormal conditions that have existed in both of those countries since the war. The following estimate, however, has been prepared as being fairly representative of present-day conditions:

Raw material, 2.5 tons, at 50 cents	$1.25
Fuel, four-tenths ton, at $7	2.80
Labor	.50
Works expense	1.00
Power	.30
	5.85
General expenses (Austria and United States)	2.50
	8.35
Depreciation on $4,000,000 investment	1.60
Depletion, 20-year life	.50
Interest, 6 per cent on $3,000,000	2.40
In bulk, f. o. b. Radenthein	14.45

It will be noted that the actual operating expenses, including certain general charges, is given as $8.35. It is also stated by interested parties that Czechoslovakia magnesite has recently been offered freely at $8 per ton f. o. b. works in Czechoslovakia. If we neglect for a moment the operations of the American company, whose expenditures were calculated in United States dollars, it would appear that allowance for depreciation and depletion, when converted into American dollars, can be practically neglected when dealing with the operations in what was formerly Austria-Hungary. It, therefore, seems that a f. o. b. cost of about $10 per ton can be estimated for the foreign product.

In support of this figure it may be further argued that the product was billed before the war at $15.75 per ton f. a. s. Philadelphia, Pa., after paying transportation charges amounting to fully $5 per ton.

TRANSPORTATION.

Since the main consumption of magnesite refractories is in basic open-hearth steel plants, almost all of which are located east of the Mississippi River, transportation is one of the outstanding factors in the cost of magnesite at the points of consumption. The center of gravity of steel production has probably moved west of Pittsburgh. While it is doubtful if it has gone as far west as the Ohio-Indiana State line as estimated by some persons, it seems desirable to show the delivered costs of domestic and foreign magnesite both at Pittsburgh and at Chicago with the assurance that the line that bisects the American consumption of magnesite is somewhere between these two limits. Under present conditions, while brick plants are all located in the East, the consumption by copper smelteries and most of that by firms manufacturing steel castings west of the Mississippi actually must be classed as being eastern consumption.

Delivered cost per short ton at Pittsburgh.

DOMESTIC—ALL RAIL.

Freight on board Chewelah	$17.00
Rail freight to Pittsburgh	18.40
Total	35.40

DOMESTIC—RAIL AND CANAL.

Freight on board Chewelah	$17.00
Chewelah to Pacific port	5.50
Canal rate to Baltimore (on large contract tonnage might be reduced to $3 per ton)	$5.00–8.00
Baltimore to Pittsburgh	4.20
Total	31.70–34.70

FOREIGN—AUSTRIAN OR CZECHOSLOVAKIAN.

Freight on board Radentheim (or Czechslovakian plant)	$10.00
Bags (domestic product shipped in bulk—foreign bagged. 10 bags per ton)	1.50
Rail freight to port (scaled down from Austrian estimate of $4 to cover rail freight (150 miles) and handling into and out of storage at Trieste. Probably about the same from Czechoslovakian plant to Hamburg)	3.00
Ocean freight (Trieste-Baltimore or Hamburg-Baltimore or Philadelphia)	3.50
Transfer charges at Atlantic port	1.00
Rail freight to Pittsburgh	4.20
Total foreign cost	23.20

Delivered cost per short ton at Chicago.

DOMESTIC—ALL RAIL.

F. o. b. Chewelah	$17.00
Rail freight to Chicago	16.70
Total	33.70

FOREIGN.

F. o. b. Radentheim	$10.00
Bags	1.50
Rail freight to port	3.00
Ocean freight	3.50
Transfer charges in United States	1.00
Rail freight to Chicago (via Baltimore, freight Philadelphia to Chicago $8.80 per ton)	8.60
Total	27.60

In order to calculate the delivered cost at other points of consumption, the following freight rates may be taken into consideration:

Chewelah, Wash., to—per 100 pounds:	Cents.
Chicago, Ill	83.5
St. Louis, Mo	83.5
Youngstown, Ohio	92.0
Pittsburgh, Pa	92.0
Cleveland, Ohio	92.0
Birmingham, Ala	92.0
Tacoma, Wash	27.5
Seattle, Wash	27.5
Baltimore, Md., to—per 100 pounds:	
Pittsburgh, Pa	21.0
Youngstown, Ohio	24.0
Chicago, Ill	43.0
St. Louis, Mo	51.0
Cleveland, Ohio	25.0

The rates from Philadelphia points are not equalized and are higher than those from Baltimore, the rate from Philadelphia to Pittsburgh, for example, being 22.5 cents, or 1½ cents per 100 pounds higher than that from Baltimore to Pittsburgh. There has been no movement by way of New Orleans, and the rail rates from that port to most of the consuming centers are practically as high as those direct from Pacific coast points.

Mr. SIMMONS. Mr. President, may we not now have a vote on this magnesite proposition?

Mr. GOODING. I wish to say merely a word; I shall occupy only a minute.

Mr. President, the chairman of the Committee on Finance has been very generous in his statement as to the market which is going to be given to the American miners of magnesite. They are going to be allowed to sell their product as far as Chicago, and possibly to the steel mills of Indiana. As I understand, for a period of two years we produced in this country all the magnesite ore which was needed by the great steel mills. Now we produce less than half of the requisite quantity, and that product is not to be allowed to come any further east than Chicago. In other words, it is proposed to destroy an industry in order to give the steel mills a little cheaper ore which they may bring in from Austria, Czechoslovakia, and other countries.

Mr. President, it seems to me that if we are going to protect the industries of this country we have got to protect them all alike, and if we are going to furnish a market for the manufacturers of the East for what they produce, we have got to permit the West to develop. It can not develop if we are going to say to the industries of that great section, "You can come half way with the products but no further," and that is the notice which has been served by the chairman of the Finance Committee. I wish to say that the time may come when we shall allow the manufactured products of the East to go only half way west. It seems to me we do not want to draw any dead line in this country and turn half of it over to foreigners when we can produce the commodities in America. We produced magnesite at a time when it was almost essential to the very preservation of the Government so far as that is concerned. It is a war necessity as well as a peace necessity, and we ought to go clear through with it and protect it adequately.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Washington to the amendment reported by the committee.

Mr. POINDEXTER. On that question I ask for the yeas and nays.

The yeas and nays were ordered, and the Assistant Secretary proceeded to call the roll.

Mr. HALE (when his name was called). Making the same announcement as heretofore with reference to my pair and its transfer, I vote "yea."

Mr. LODGE (when his name was called). I transfer my pair with the senior Senator from Alabama [Mr. UNDERWOOD] to the senior Senator from New Hampshire [Mr. MOSES] and vote "yea."

Mr. PHIPPS (when his name was called). I transfer my pair with the Senator from South Carolina [Mr. DIAL] to the junior Senator from Oklahoma [Mr. HARRELD] and vote "yea."

Mr. WARREN (when his name was called). Making the same announcement as to my pair, I vote "nay."

Mr. WILLIAMS (when his name was called). I transfer my pair with the Senator from Indiana [Mr. WATSON] to the Senator from Texas [Mr. CULBERSON] and will vote. I vote "nay."

The roll call was concluded.

Mr. JONES of Washington (after having voted in the affirmative). Has the senior Senator from Virginia [Mr. SWANSON] voted?

The PRESIDING OFFICER. He has not voted.

Mr. JONES of Washington. I have a pair with him for the day. He is necessarily absent. I find that I can transfer that pair to the Senator from Minnesota [Mr. NELSON], and I do so, and will allow my vote to stand.

Mr. CURTIS. I have been requested to announce the following pairs:

The Senator from New York [Mr. CALDER] with the Senator from Alabama [Mr. HEFLIN];

The Senator from Rhode Island [Mr. COLT] with the Senator from Florida [Mr. TRAMMELL];

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Virginia [Mr. GLASS];

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN];

The Senator from Indiana [Mr. NEW] with the Senator from Tennessee [Mr. MCKELLAR];

The Senator from Ohio [Mr. WILLIS] with the Senator from Ohio [Mr. POMERENE]; and

The Senator from New Jersey [Mr. FRELINGHUYSEN] with the Senator from Montana [Mr. WALSH].

The result was announced—yeas 29, nays 22, as follows:

YEAS—29.

Ashurst	Gooding	McCormick	Poindexter
Ball	Hale	McKinley	Shortridge
Brandegee	Johnson	McNary	Spencer
Broussard	Jones, N. Mex.	Newberry	Sterling
Bursum	Jones, Wash.	Nicholson	Townsend

So Mr. POINDEXTER's amendment to the amendment of the committee was agreed to.

Mr. POINDEXTER. Mr. President, in order to make the other magnesite schedules conform to the one just adopted by the Senate, I move to strike out "four-tenths" and insert "three-fourths" on page 33, paragraph 204a. That is the clause referring to dead-burned magnesite.

Mr. SMOOT. Does the Senator want to strike out "five-eighths of 1 cent" in the case of the calcined magnesite?

Mr. POINDEXTER. I have no objection to that. I think that ought to be done.

Mr. SMOOT. It will have to be done if we are going to balance this schedule.

Mr. POINDEXTER. Let us get this disposed of, if there is no objection to it.

Mr. ROBINSON. What is the proposal?

Mr. SMOOT. I suggested that we do the same for this that we did for the other.

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The ASSISTANT SECRETARY. On line 4 of the committee amendment, page 33, it is proposed to strike out "four-tenths" and to insert "three-fourths," so that, if amended, it will read:

Dead-burned and grain magnesite, not suitable for manufacture into oxychloride cements, three-fourths of 1 cent per pound.

Mr. McCUMBER. I should like to have the yeas and nays on that.

Mr. SMOOT. Just a moment. The Senator knows that we do not want to more than double the rate we adopted on the previous vote. It takes just 2 pounds to make 1.

Mr. POINDEXTER. This is not more than double. This makes it just one-fourth more. It makes it three-fourths instead of one-half.

Mr. SMOOT. This is the dead-burned magnesite?

Mr. POINDEXTER. The dead-burned magnesite. It is not double; it is only 25 per cent more on the dead-burned than on the crude, if this is adopted.

Mr. SMOOT. It was three-tenths before, and now it is four-tenths. Four-tenths would be $8 and three-fourths would be $15.

Mr. McCUMBER. Mr. President, I simply thought that when we changed a rate and raised it from $8 to $15 we ought to have a record vote on it; that is all. If Senators do not want a record vote on it they need not have it, but I just want to show what it means.

Mr. ROBINSON. I ask to have the amendment stated.

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The ASSISTANT SECRETARY. In the committee amendment at the top of page 33, line 4, it is proposed to strike out "four-tenths" and to insert in lieu thereof "three-fourths," so that, if amended, it will read:

Dead-burned and grain magnesite, not suitable for manufacture into oxychloride cements, three-fourths of 1 cent per pound.

Mr. McCUMBER. I should like the yeas and nays on that, Mr. President.

The yeas and nays were ordered, and the Assistant Secretary proceeded to call the roll.

Mr. HALE (when his name was called). Making the same announcement as before, I vote "yea."

Mr. JONES of Washington (when his name was called). Making the same announcement as before with respect to my pair and its transfer, I vote "yea."

Mr. LODGE (when his name was called). Making the same announcement as before as to my pair, I vote "yea."

Mr. PHIPPS (when his name was called). Making the same announcement as before with regard to my pair and its transfer, I vote "yea."

Mr. WARREN (when his name was called). Repeating the announcement heretofore made, I vote "nay."

Mr. CURTIS. I have been requested to announce the following pairs:

The Senator from New York [Mr. CALDER] with the Senator from Alabama [Mr. HEFLIN];

The Senator from Rhode Island [Mr. COLT] with the Senator from Florida [Mr. TRAMMELL];

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Virginia [Mr. GLASS];

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN];

The Senator from Indiana [Mr. NEW] with the Senator from Tennessee [Mr. MCKELLAR];

The junior Senator from Ohio [Mr. WILLIS] with the senior Senator from Ohio [Mr. POMERENE]; and

The Senator from New Jersey [Mr. FRELINGHUYSEN] with the Senator from Montana [Mr. WALSH].

The result was announced—yeas 27, nays 23, as follows:

YEAS—27.

Ashurst	Gooding	Lodge	Phipps
Ball	Hale	McKinley	Poindexter
Broussard	Johnson	McNary	Shortridge
Bursum	Jones, N. Mex.	Newberry	Spencer
Capper	Jones, Wash.	Nicholson	Sterling
Curtis	Keyes	Norbeck	Townsend
Elkins	Ladd	Oddie	

NAYS—23.

Borah	Harris	McLean	Smith
Caraway	Harrison	Page	Smoot
Cummins	Kellogg	Pepper	Stanley
Ernst	Kendrick	Robinson	Sutherland
Fletcher	La Follette	Sheppard	Warren
France	McCumber	Simmons	

NOT VOTING—46.

Brandegee	Gerry	New	Trammell
Calder	Glass	Norris	Underwood

du Pont	McKellar	Reed	Williams
Edge	Moses	Shields	Willis
Fernald	Myers	Stanfield	
Frelinghuysen	Nelson	Swanson	

So Mr. POINDEXTER's amendment to the amendment of the committee was agreed to.

Mr. POINDEXTER. In order to make the rest of the paragraph conform with the two rates which have just been adopted by the Senate, I move to strike out, in line 2, on page 33, "five-eighths" and insert "three-fourths."

The VICE PRESIDENT. The Secretary will state the amendment to the amendment.

The ASSISTANT SECRETARY. On page 33, in the committee amendment, line 2, the Senator from Washington proposes to strike out "five-eighths" and insert "three-fourths," so as to read:

Caustic calcined magnesite, three-fourths of 1 cent per pound.

Mr. POINDEXTER. That will give to calcined magnesite the same rate just adopted by the Senate on dead-burned magnesite. The rates ought to be the same.

Mr. SMOOT. I ask for the yeas and nays.

The yeas and nays were ordered, and the Assistant Secretary proceeded to call the roll.

Mr. HALE (when his name was called). Making the same announcement as before, I vote "yea."

Mr. JONES of Washington (when his name was called). Making the same announcement as before, I vote "yea."

Mr. LODGE (when his name was called). Making the same announcement as before regarding my pair and its transfer, I vote "yea."

Mr. PHIPPS (when his name was called). Making the same announcement as on the previous vote, I vote "yea."

Mr. WARREN (when his name was called). Making the same announcement as to my pair and its transfer, I vote "nay."

The roll call having been concluded the result was announced—yeas 28, nays 21, as follows:

YEAS—28.

Ashurst	Elkins	Ladd	Oddie
Ball	Gooding	Lodge	Phipps
Brandegee	Hale	McCormick	Poindexter
Broussard	Johnson	McKinley	Shortridge
Bursum	Jones, N. Mex.	McNary	Spencer

Underwood	Walsh, Mont.	Weller	

So Mr. POINDEXTER'S amendment to the committee amendment was agreed to.

Mr. POINDEXTER. There is one remaining item the rate on which, in order to make it correspond to those just adopted, should be changed. It is on page 31, lines 10 and 11.

The VICE PRESIDENT. The question is first on agreeing to the committee amendment as amended.

The amendment as amended was agreed to.

Mr. SMOOT. Will not the Senator allow the item of magnesite brick to go over, as that paragraph is now before the committee for consideration? We shall have to make a change in the rate on the brick, and while we are doing that there are some other changes in the paragraph which the committee would like to make while it is before it for consideration.

Mr. POINDEXTER. As long as we are on this subject of magnesite, I would like to have action on just one more item—magnesite brick—which is the higher form of manufacture. This is the last amendment to affect this product. The amendment is to strike out "four-tenths" and to insert "three-fourths," on page 31, line 11.

Mr. SMOOT. The Senator simply wants to have the Senate disagree to the committee amendment?

Mr. POINDEXTER. The Senator may put it that way—simply to disagree to the committee amendment.

The VICE PRESIDENT. The Secretary will state the committee amendment.

The ASSISTANT SECRETARY. In paragraph 201, page 31, line 10, at the end of the line, the committee proposes to strike out "three-fourths" and insert "four-tenths," so that if amended it would read:

Magnesite brick, four-tenths of 1 cent per pound and 10 per cent ad valorem.

Mr. ROBINSON. Is it desired to take up this brick paragraph?

Mr. SMOOT. Just this part of the brick paragraph.

Mr. ROBINSON. We will not take up the brick paragraph by piecemeal. The Senator from Kentucky [Mr. STANLEY] and I have been waiting and ready to take up the brick paragraph for at least a week, and I insist that if we take up this paragraph or any part of it we shall take it up as a whole and dispose of it.

Mr. POINDEXTER. Mr. President, I think the attitude of the Senator from Arkansas is a very reasonable one, except for the fact that there is contained in this brick paragraph one form of manufactured magnesite which is the subject on which the Senate has just been voting, and it seems to me that there is some inconsistency in the classification.

Mr. ROBINSON. We can discuss that when we reach it in the consideration of the brick paragraph.

Mr. POINDEXTER. Of course, if the Senator insists on his objection, I shall not urge it. The only reason I asked it was because the whole matter has just been debated, and the Senate has just voted on two items.

Mr. ROBINSON. As a matter of fact, the brick paragraph was debated at great length on another day, but it went over at the request of Senators who were not able to be present, and it is very confusing to take up a single proposition within that paragraph. I have no objection whatever to taking up the brick paragraph right now. I have been ready for a week to do it, and would like to do it, and in all probability we shall reach it in regular course in a short time.

Mr. SMOOT. We might as well take up the brick paragraph at this time.

Mr. POINDEXTER. If we do take up the brick paragraph, has the Senator from Arkansas any objection to taking up the magnesite brick item in the paragraph first?

Mr. SMOOT. There is a committee amendment which I desire to offer. I ask the Senator from Arkansas to allow a vote to be taken on the magnesite brick item. I want a yea-and-nay vote on the amendment of the committee at that point.

Mr. ROBINSON. Mr. President, I dislike very much to decline to oblige either the Senator from Washington or the Senator from Utah. I have risen here during the last week six or eight times and asked to take up the brick paragraph. No reason was ever given me for not proceeding except that the committee had under consideration the question of revising the brick paragraph and were not ready to report on it. I learn that during my absence the statement was made that some provisions in the brick paragraph are directly connected with the rates on magnesite, and that is one of the reasons why the brick paragraph has been held in abeyance.

Mr. SMOOT. If the Senator does not object, I would like to read the amendment which the committee will offer. In fact, I would like to offer it now.

Mr. ROBINSON. Very well. Let the amendments be reported.

Mr. SMOOT. On page 31 I desire to withdraw all the committee amendments in paragraph 201, to strike out all of paragraph 201, and to substitute in lieu thereof the following:

PAR. 201. Bath brick, chrome brick, and fire brick, not specially provided for, 25 per cent ad valorem; magnesite brick, four-tenths of 1 cent per pound and 10 per cent ad valorem.

Of course the Senator from Washington will offer an amendment to that.

Then on page 217, after line 5, I move to insert a new paragraph to read as follows:

PAR. 1535a. Brick, not specially provided for: *Provided*, That if any country, dependency, Province, or other subdivision of government imposes a duty on such brick imported from the United States, an equal duty shall be imposed upon such brick coming into the United States from such country.

Mr. ROBINSON. Mr. President, that is a complete revision of the paragraph, and a very important one. If the issue is to be so radically changed, I think it might be very well to let the amendments be printed and have the whole matter go over until Wednesday so that we may have a chance to study the matter.

Mr. SMOOT. I have no objection; but the Senator from Washington would like to have his amendment voted upon, and I think more than likely that would be the best thing to do.

Mr. POINDEXTER. Mr. President, will the Senator from Arkansas yield to me for just a brief statement?

Mr. ROBINSON. Certainly.

Mr. POINDEXTER. I do not know whether the Senator has considered what the item is and the relation it bears to the vote we have already had. We voted just now to restore the rates of the House on crude magnesite and on dead-burned magnesite and on calcined magnesite. Magnesite brick are made out of dead-burned magnesite and of course there ought to be equally as high a rate on magnesite brick, which is a further form of manufacture, as on dead-burned magnesite. The Senate having voted three times on the principle involved, it occurs to me that it ought to vote on the other item.

Mr. ROBINSON. I am bound to say, in reply to the statement of my friend, the Senator from Washington, that I do not see where any principle was involved in the vote on dead-burned magnesite or other forms of magnesite. The fact of the matter is that when we consider the votes upon the amendments of the Senator from Washington and the effect upon other paragraphs in the bill, it is difficult to account for the fixing of so high rates on dead-burned magnesite as are carried in the amendments of the Senator from Washington.

I can not understand why the amendments offered by the Senator from Utah have not been printed, so that the Senate could have an opportunity to study them. I suppose they were all contingent upon the adoption of the Poindexter amendment.

Mr. SMOOT. That is what the committee was waiting for, or else they would have been printed before. As long as we have voted three-fourths of a cent on dead-burned magnesite, those who voted for that rate can not vote for less than three-fourths of a cent on magnesite brick.

Mr. ROBINSON. No; but they might reconsider their votes on dead-burned magnesite if they had a little time to think over it. I believe we had better let this paragraph go over until Wednesday. I request that the amendments proposed by the Senator from Utah be printed, so that we may have them available for examination.

The VICE PRESIDENT. The amendments will be printed and lie on the table.

Mr. SMOOT. Mr. President, I call attention now to paragraph 47 to see if we can not dispose of that now. I will say to the Senator from North Carolina [Mr. SIMMONS] that all the items in paragraph 47 were voted upon and agreed to, with the exception of the last amendment, which imposed a duty upon calcined magnesite, including dead burned and grain. Of course, that has been stricken out and transferred to paragraph 204a, so that by agreeing to all the amendments now as the committee has reported them, it will leave paragraph 47 complete with one exception.

The VICE PRESIDENT. The Senator is reminded that the Senate reconsidered the votes by which all those amendments were agreed to.

Mr. SMOOT. They were reconsidered, and they all have to be voted upon at this time, but if we agree to vote upon them I do not think it will lead to any discussion whatever. In the

rate on epsom salts there is no amendment, but now that we have doubled the rate on magnesite ore, of course, the rate provided for epsom salts is not a sufficient compensatory duty. In fact, the rate is a quarter of a cent less than on the raw material. When the committee amendments are finally disposed of, unless an amendment is brought in before that time, the epsom salts rate in this paragraph will have to be changed.

Mr. SIMMONS. We can not change it now.

Mr. SMOOT. No; I made that statement. I ask now that the amendments in paragraph 47 as reported by the committee be agreed to.

Mr. SIMMONS. The first amendment is to strike out "three-fourths of 1 cent" and reduce it to "one-half of 1 cent." It is not proposed to increase that rate?

Mr. SMOOT. No; just the amendments as they are now in the printed bill.

Mr. SIMMONS. Very well. Let us have a vote on them.

The ASSISTANT SECRETARY. On page 20, in line 18, in paragraph 47, the committee proposes to strike out "three-fourths" and insert "one-half," so as to read:

Magnesium: Carbonate, precipitated, 2½ cents per pound; chloride, one-half of 1 cent per pound.

The amendment was agreed to.

The ASSISTANT SECRETARY. On line 20, after the word "oxide," the committee proposes to insert the words "or calcined magnesia," so as to read:

Oxide or calcined magnesia, medicinal, 7 cents per pound.

The amendment was agreed to.

The ASSISTANT SECRETARY. On page 20, line 21, before the word "calcined," and the semicolon, the committee proposes to insert "Oxide or," so as to read:

Oxide or calcined magnesia, not suitable—

And so forth.

The amendment was agreed to.

The ASSISTANT SECRETARY. On page 22, after the word "use," the committee proposes to insert "three-fourths of 1 cent per pound," so as to read:

Oxide or calcined magnesia not suitable for medicinal use, three-fourths of 1 cent per pound.

The amendment was agreed to.

The ASSISTANT SECRETARY. The committee proposes to strike out, beginning in line 22, the remainder of the paragraph, as follows:

And calcined magnesite, including dead-burned and grained, three-fourths of 1 cent per pound; and magnesite, crude or ground, one-half of 1 cent per pound.

The amendment was agreed to.

Mr. SMOOT. I understand the Senators who are to discuss manganese ore and ferro-alloys are not prepared to proceed. I ask that we now proceed to paragraph 322, railway fishplates.

The ASSISTANT SECRETARY. At the top of page 62, paragraph 322, the committee proposes after the words "splice bars" to insert the words "tie-plates," so as to read:

Railway fishplates or splice bars, tie-plates, made of iron or steel, one-fourth of 1 cent per pound.

Mr. SIMMONS. I have no objection to a vote on the amendment.

The amendment was agreed to.

The ASSISTANT SECRETARY. Before the words "all other," in line 2, the committee proposes to insert "rail braces, and," so as to read:

Rail braces and all other railway bars made of iron and steel, and railway bars made in part of steel, T-rails, and punched iron or steel flat rails, seven-fortieths of 1 cent per pound.

The amendment was agreed to.

Mr. SMOOT. I ask now that we proceed to paragraph 325, jewelers' and other anvils.

The ASSISTANT SECRETARY. In paragraph 325, page 62, line 23, the committee proposes to strike out the word "anvils" and insert "jewelers' and other anvils weighing less than 5 pounds each, 45 per cent ad valorem; all other anvils," so as to make the paragraph read:

PAR. 325. Jewelers' and other anvils weighing less than 5 pounds each, 45 per cent ad valorem; all other anvils of iron or steel, or of iron or steel combined, by whatever process made, or in whatever stage of manufacture, 1½ cents per pound.

Mr. SIMMONS. The Senator from Arkansas [Mr. ROBINSON], I think, wishes to discuss this paragraph.

Mr. ROBINSON. Mr. President, the committee amendment to this paragraph imposes a duty of 45 per cent ad valorem on jewelers' and other anvils weighing less than 5 pounds each. On all other anvils of iron or steel, or of iron and steel combined, by whatever process made, or in whatever stage of manufacture, a duty of 1½ cents is imposed. The present duty on anvils is 15 per cent ad valorem.

The production of wrought anvils in the year 1911 is said to have been about 2,600,000 pounds. An increase in domestic production has followed the declining imports since the beginning of the war and the demand created by military operations. Imports of anvils were something more than 727,000 pounds in 1914. Later statistics show that in 1918 something more than 10,000 pounds were imported, valued at a little more than $1,000 and paying a duty of $174. In 1919 more than 88,000 pounds, valued at something more than $14,000 and paying a duty of a little more than $2,000, constituted the importations.

In 1920 there were 275,805 pounds imported, valued at $33,820, and the duty collected was $5,073. In the first nine months of 1921 the importations were only 34,650 pounds, valued at $3,471.

In view of those facts, Mr. President, it seems that the rate in the committee amendment is excessive. The present rate is only 15 per cent ad valorem, but it is proposed to advance the duty to 45 per cent.

As to jewelers' and other small anvils, this duty, I think, is not justified by the facts. I therefore move to amend by striking out "45 per cent ad valorem" and inserting "20 per cent ad valorem."

The VICE PRESIDENT. The question is on the amendment of the Senator from Arkansas.

Mr. SMOOT. Just a word. Of course, the 45 per cent rate applies only to the very small jewelers' anvils. They weigh less than 5 pounds. The rate in the Payne-Aldrich law was 1½ cents per pound and the present rate, as the Senator from Arkansas has stated, is 25 per cent ad valorem.

Mr. ROBINSON. May I ask the Senator from Utah a question?

Mr. SMOOT. Just a moment. The Tariff Commission states:

Duty at the rate of 1½ cents a pound on jewelers' anvils would be practically negligible.

The rate which the House imposed of 1½ cents per pound is a little less than 10 per cent. Ten per cent on jewelers' anvils, of course, would be simply ridiculous, because, as every Senator knows, jewelers' anvils are of the very finest kind of material, and most of them are not over about 3 inches long. They are very expensive indeed. The Tariff Commission says a duty of 1½ cents a pound would be absolutely negligible.

Mr. ROBINSON. I have not offered any amendment to the provision that will be applicable to a larger anvil because, under the parliamentary status, I am not permitted to do so. The Senate committee did not recommend a change in the figures of 1½ cents a pound on the larger anvils, but merely proposed to advance the duty on a certain class of anvils to 45 per cent ad valorem.

I repeat my former statement that I think 45 per cent ad valorem is not justified by the demands of the industry, even from the standpoint of protection. I therefore move the amendment which I have heretofore offered.

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from Arkansas to the amendment of the committee.

The amendment to the amendment was rejected.

The VICE PRESIDENT. The question is on agreeing to the committee amendment.

The amendment was agreed to.

Mr. SMOOT. I ask now to take up paragraph 332, relative to rivets, and so forth.

Mr. SIMMONS. Mr. President, why not take up paragraph 329?

Mr. SMOOT. I will say to the Senator that paragraph 329 went over for the consideration of the committee. The committee expected to consider that paragraph this morning, but the Senator was in the committee and knows that the whole time of the committee was taken up by the consideration of the bonus bill, and we could not reach paragraph 329.

Mr. SIMMONS. How about considering paragraph 331?

Mr. SMOOT. The same statement applies to that paragraph.

Mr. FLETCHER. My understanding was that paragraphs 329 and 331 went over at the suggestion of the committee.

Mr. SMOOT. Yes.

Mr. FLETCHER. Now it is proposed to take up paragraph 332?

Mr. SMOOT. Yes.

The VICE PRESIDENT. The committee amendment in paragraph 332 will now be stated.

The ASSISTANT SECRETARY. On page 66, paragraph 332, line 3, the Committee on Finance proposes to strike out "25" and to insert "40," so as to make the paragraph read:

PAR. 332. Rivets, studs, and steel points, lathed, machined, or brightened, and rivets or studs for nonskidding automobile tires, 40 per cent ad valorem; rivets of iron or steel, not specially provided for, 1 cent per pound.

Mr. FLETCHER. Mr. President, on that amendment I wish to submit some comments. Under the act of 1913 the duty on those articles was fixed at 20 per cent ad valorem; under the act of 1909 the duty was fixed at 45 per cent ad valorem; and under the bill as it came from the other House a duty was provided of 25 per cent ad valorem. Now, the Committee on Finance proposes to make that duty 40 per cent. The description of these articles as found in the Summary of Tariff Information is as follows:

Description: A rivet is a headed pin or bolt of metal used to unite two or more pieces by passing it through them and heading the plain end. Ordinary bolts of iron or steel are provided for in paragraph 123.

That is another article.

A stud is a small pin or rod for holding members together or fitting parts to one another. The term steel points is nontechnical and self-explanatory.

The production, it seems, is rather difficult to get at because the rivets, studs, and so forth, are not separate from the general class of bolts, nuts, washers, and rivets. We had those up under paragraph 330.

The imports since 1917 have been as follows: Rivets, studs, steel points, and so forth, in 1918, 1,519 pounds, valued at $344; the amount of the duty collected was $69, the rate being 20 per cent ad valorem. In 1919 the imports were 60,355 pounds, valued at $3,709, the duty being $742. In 1920, 3,330 pounds were imported, the value was $681 and the duty $136. For the first nine months of 1921 the imports were 3,900 pounds, of the value of $325. It is not a very great industry, and I shall not take up much time with it.

Of the rivets of iron or steel not specially provided for the imports amounted in 1918 to 48,481 pounds, of a value of $4,887, the duty collected being $977; in 1919 the imports were 65,900 pounds, valued at $5,928, and the duty was $1,186. In 1920 the imports were 25,600 pounds, valued at $2,718, the duty being $544. For the first nine months of 1921 the imports were 6,566 pounds, valued at $544. The exports are not recorded and there is no information in regard thereto.

The situation is that importations have been very slight and the amount of duty which we have been realizing almost negligible, because of the slight importations, although the rate of duty has only been 20 per cent.

Mr. JONES of New Mexico. Mr. President——

The VICE PRESIDENT. Does the Senator from Florida yield to the Senator from New Mexico?

Mr. FLETCHER. I yield.

Mr. JONES of New Mexico. I call to the Senator's attention the statement relative to the production of bolts, nuts, rivets, and washers. The Senator has just made the statement that the production of rivets is not given separately and that is true; but in the class where we find that character of production the quantity is very large. In 1914 the production was over $23,000,000, and that is found on page 431 of the Tariff Summary of Information which the Senator from Florida holds in his hand relative to paragraph 330.

Mr. FLETCHER. But that refers to paragraph 330, on which we have already acted.

Mr. JONES of New Mexico. Well, the statistics in connection with paragraph 330 also cover rivets, and there is given the production of those four different items as being over $23,000,000.

Mr. FLETCHER. Yes; the production is very large.

Mr. JONES of New Mexico. There were large exports also, and I take it that rivets go along with the other items mentioned there, and that there would be no greater necessity for a duty upon rivets than for a duty upon nuts and washers and bolts.

Mr. FLETCHER. I should not think so, and under that paragraph the statement is made that the imports are small compared with the exports, and since 1914 have been very slight. The chief feature is that the production of that class of materials is large; that the exports very greatly exceed the imports, and the imports have been slight; but under the paragraph covering these particular items the exports are not given, although the imports, as we have just seen, are very small.

Mr. JONES of New Mexico. The Senator will find the statement of the exports of the same four items on page 432, showing that several million dollars worth of those items are exported.

Mr. FLETCHER. Yes; of bolts, nuts, rivets, and washers since 1917 the exports have been all the way from 63,000,000 pounds in 1918, valued at $5,687,000, to 89,000,000 pounds in 1919, valued at $7,769,893; and in 1920, 87,233,028 pounds, valued at $7,274,411. Those are the exports, as shown on page 433 of this summary, of bolts, nuts, rivets, and washers. The exports of rivets, studs, steel points, lathed, machined, or brightened, and so forth, are not given. The point which I wish to make especially is that, according to the statistics the importations of these articles have been inconsequential. The actual amount of duty yielded to the Government has not exceeded $500, except in one or two years. In 1920 it was $1,186—that is the highest—and in 1918 it was $69.

That is the amount of duty, with a rate of 20 per cent ad valorem. The proposal here is to raise this rate to 40 per cent ad valorem. I submit that it is doubling the rate of duty under which now these articles are very largely excluded, with practically no importations, and it simply means that this rate will be prohibitive, and we will get no duty at all. The industry is not in need of that sort of duty for purposes of protection, even if we stood for protection as protection, independent of any question of revenue.

Mr. President, I move that "40" be stricken out and "20" be inserted in its stead, so that the rate will remain as it is now, 20 per cent ad valorem.

The VICE PRESIDENT. The amendment to the amendment will be stated.

The ASSISTANT SECRETARY. In lieu of the sum proposed to be inserted by the committee on page 66, line 3, the figures "40," it is proposed to insert "20."

The VICE PRESIDENT. The question is on agreeing to the amendment offered by the Senator from Florida to the amendment of the committee.

Mr. FLETCHER. I ask for the yeas and nays on it, Mr. President.

The yeas and nays were ordered, and the Assistant Secretary proceeded to call the roll.

Mr. HALE (when his name was called). Making the same announcement as before, I vote "nay."

Mr. LODGE (when his name was called). Making the same announcement as before as to the transfer of my pair, I vote "nay."

Mr. McKINLEY (when his name was called). I transfer my pair with the Senator from Arkansas [Mr. CARAWAY] to the Senator from Oregon [Mr. STANFIELD] and will vote. I vote "nay."

Mr. WARREN (when his name was called). Repeating the transfer of my pair, I vote "nay."

The roll call was concluded.

Mr. JONES of Washington. Making the same announcement as before with reference to my pair and its transfer, I vote "nay."

Mr. PHIPPS. Making the same announcement as before with reference to my pair and its transfer, I vote "nay."

Mr. FRELINGHUYSEN. Making the same announcement as before, I vote "nay."

The result was announced—yeas 14, nays 38, as follows:

YEAS—14.

Ashurst	Harrison	Robinson	Stanley
Cummins	Jones, N. Mex.	Sheppard	Walsh, Mass.
Fletcher	La Follette	Simmons	
Harris	Ransdell	Smith	

NAYS—38.

Ball	Johnson	McLean	Rawson
Bursum	Jones, Wash.	McNary	Shortridge
Capper	Kellogg	Newberry	Smoot
Curtis	Kendrick	Nicholson	Spencer
Elkins	Keyes	Norbeck	Sterling
Ernst	Ladd	Oddie	Sutherland
France	Lodge	Page	Townsend
Frelinghuysen	McCormick	Pepper	Warren
Gooding	McCumber	Phipps	
Hale	McKinley	Poindexter	

NOT VOTING—44

Borah	du Pont	Moses	Stanfield
Brandegee	Edge	Myers	Swanson
Broussard	Fernald	Nelson	Trammell
Calder	Gerry	New	Underwood
Cameron	Glass	Norris	Wadsworth
Caraway	Harreld	Overman	Walsh, Mont.
Colt	Heflin	Owen	Watson, Ga.
Crow	Hitchcock	Pittman	Watson, Ind.
Culberson	King	Pomerene	Weller
Dial	Lenroot	Reed	Williams
Dillingham	McKellar	Shields	Willis

So Mr. FLETCHER's amendment to the amendment of the committee was rejected.

Mr. SMOOT. Mr. President, I move to strike out "40" and insert "30."

The VICE PRESIDENT. The amendment to the amendment will be stated.

The ASSISTANT SECRETARY. On page 66, line 3, it is proposed to strike out "40" and in lieu thereof to insert "30."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. McCUMBER. I ask now to go to paragraph 217, on pages 38 and 39.

The VICE PRESIDENT. The amendment of the committee will be stated.

The ASSISTANT SECRETARY. On page 39, in paragraph 217, line 11, it is proposed to strike out "28" and to insert "50," so that if amended it will read:

PAR. 217. Plain green or colored, molded or pressed, and flint, lime, or lead glass bottles, vials, jars, and covered or uncovered demijohns, and carboys, any of the foregoing, filled or unfilled, not specially provided for, and whether their contents be dutiable or free (except such as contain merchandise subject to an ad valorem rate of duty, or to a rate of duty based in whole or in part upon the value thereof, which shall be dutiable at the rate applicable to their contents), shall pay duty as follows: If holding more than 1 pint, 1 cent per pound; if holding not more than 1 pint and not less than one-fourth of a pint, 1½ cents per pound; if holding less than one-fourth of a pint, 50 cents per gross: *Provided*, That none of the above articles shall pay a less rate of duty than 50 per cent ad valorem—

And so forth.

Mr. JONES of New Mexico. Mr. President, this is one paragraph among several relating to glassware. The amendment proposed provides for nearly 100 per cent increase in the present rate. I suppose the Senator from New Jersey is prepared to justify the increase in these rates. If so, I am sure we should all be very glad to hear what he has to say on the subject.

Mr. FRELINGHUYSEN. Mr. President, is the Senator addressing me?

Mr. JONES of New Mexico. I understood that the Senator from New Jersey was going to represent the committee on these glassware paragraphs.

Mr. FRELINGHUYSEN. No; I am going to speak on chemical glassware.

Mr. JONES of New Mexico. Then is there no one to justify this increase in the rate on paragraph 217?

I must confess some little astonishment that there is no one who is willing to volunteer a justification for this increase in the rate.

Mr. McCUMBER. I try to accommodate Senators, and when Senators said they wanted to take up paragraph 217, I shifted to paragraph 217. If anyone wants to take it up, if the Senator who has charge of that paragraph on this side is not present, we can still go on with it.

Mr. JONES of New Mexico. I did not ask to have that paragraph taken up. I am perfectly willing to have it taken up, however.

Mr. McCUMBER. Very well, we will take it up.

Mr. JONES of New Mexico. But I did not ask to have it done; I have no particular ax to grind; but I wanted to call attention to the fact that this is a very great increase in the rate of duty on this item of glassware, bottles, and jars, used in every home in the land. It is proposed to increase the duty from 30 per cent to 50 per cent, and I supposed that there would be somebody on the committee ready and willing, and it would seem to me they should be anxious to justify this rate.

Mr. FRELINGHUYSEN. Mr. President, if the Senator wants to go on I will suggest to the chairman of the committee that we proceed with paragraph 218.

Mr. McCUMBER. Very well. I try to accommodate Senators. I would just as soon take up paragraph 218, and I understand the Senator from New Jersey is ready to go on with it.

Mr. JONES of New Mexico. I do not see how we can very well consider paragraph 218 and ignore paragraph 217. They cover parts of the same industry; they are necessarily interlocked, so far as the facts are concerned, and I think there is just as much reason for the increase in the one case as there is in the other.

Mr. McCUMBER. Let me say to the Senator that the paragraphs cover entirely different matters. There is quite a little difference between the ordinary glass bottle and the chemical glassware, which requires a great deal of work. Paragraph 218 relates to the chemical glassware, and, of course, it is an entirely different proposition.

Mr. JONES of New Mexico. There is some chemical glassware mentioned in paragraph 218, but that paragraph does not comprise chemical glassware only. It contains a very large number of different items, and the chemical glassware is the very smallest part of it.

Mr. FRELINGHUYSEN. Mr. President, do I understand that the Senator from New Mexico is willing that we shall proceed with paragraph 218?

Mr. JONES of New Mexico. I am not going to be insistent on any special order at all, but I was just suggesting that the more logical way to begin would be by taking up paragraph 217, because that necessarily will be considered in connection with paragraph 218, and I see no reason for passing over paragraph 217. I should like to have that considered along with the other. It follows in natural sequence, and I can not understand why anyone would insist on going ahead with paragraph 218, with paragraph 217 undisposed of.

Mr. McCUMBER. I will state, if the Senator will allow me, that the Senator from West Viringia [Mr. SUTHERLAND] wants to be present when we discuss paragraph 217, and the Senator from West Virginia is absent. I try to accommodate Senators where it is possible to do so.

Mr. JONES of New Mexico. I think the whole subject had better go over now, and that all paragraphs relating to it should be discussed at the same time. The whole glassware industry is involved, and if there is anyone who wants to be heard upon the glassware industry, I think he should be here, because all these paragraphs relate to the same thing. So if there is no one here prepared to go ahead with paragraph 217, I would like to have the whole glassware subject go over until we can take up together all the paragraphs relating to it.

Mr. McCUMBER. I see no reason why we can not allow the Senator from New Jersey to go on and discuss what he desires upon that paragraph.

Mr. FRELINGHUYSEN. Mr. President, the Senator well knows that these two paragraphs are entirely different. Paragraph 217 relates entirely to products used commercially—bottles, vials, jars, and demijohns—and has no relation whatsoever to paragraph 218. Paragraph 218 covers biological, chemical, metallurgical, pharmaceutical, and surgical articles, an industry which never existed in this country prior to the war. It is strictly a war-time industry, and has reference only to products which are used in laboratories, educational institutions, and in all of the laboratory work in the various large industrial establishments in the country. It is known as chemical glassware.

The production of biological, chemical, metallurgical, pharmaceutical, and surgical glassware is the master-key industry of America. It is absolutely essential to every producing interest in this country, large or small, through laboratory test and analysis, in which this ware is used, the scientific control of such varied industries as iron, steel, raw and refined sugar, packing-house products, fertilizers, rubber manufacture, Portland cement, soap, oil refining, water works, textiles, chemicals, explosives, dyes, and drugs is accomplished.

In each of the foregoing industries the entire process of manufacture is controlled by a laboratory where a very few men using chemical glassware, costing an insignificant amount, guide the production of billions of dollars' worth of materials.

Prior to 1914–15 practically all of this ware was imported from central Europe, namely, Austria and Germany. The blockading of the Central Powers by the Allies found America without any source of supply for such goods. Not only were there not any factories making this ware, but there were no workmen to be found with the proper talent, experience, and ability to do the work.

The manufacturers of glass were appealed to unofficially by heads of governmental departments to do their share in establishing this limited but extremely important industry in America. At a meeting at the outbreak of the war with Germany this duty was allotted them as their share of the successful prosecution of military operations by the Council of National Defense. Plants had to be remodeled, enlarged, and, in some instances, originated; workmen had to be schooled in an entirely new technique. The manufacturers asked for no promises; they simply went ahead and did what they realized was a necessity.

At the signing of the armistice there were in operation 10 established plants making factory blown ware, such as beakers, flasks, tubing, and blanks, and as many plants manufacturing lamps, blown, and volumetric ware.

To-day there are less than half of these plants operating at all, and these at such reduced capacities hardly warranting their continuance. These specially trained workmen are walking the streets or drifting into other industries.

LABOR.

It would be in order to say a word at this time in reference to the attitude of the workmen in the chemical-glass industry. There has been some misconception as to the wages and working conditions in this industry. While it is true that a part of this

trade is organized, on the other hand a larger part is worked on the open-shop basis.

As far back as 1910 the workers realized the necessity of developing the chemical glassware trade in the United States. After thorough investigation, however, both manufacturers and workers found this to be impossible, due to the fact that over half of the chemical glassware used in this country for educational and instrumental purposes was imported free of all duty. The opportunity sought in 1910 was offered in 1914–15 by cessation of importations from central Europe.

In the factory blown or hollow ware department, at the peak of the war the wages of skilled men ranged from $5 to $9 per day. The $9 per day men were the highest skilled workmen in the country, and when compared with skilled workers in other industries, this can not be claimed excessive.

In August, 1921, these workmen accepted a voluntary reduction in wage of 17½ per cent, and increased the working moves on many items; that is to say, increased the number of pieces per day, so that the reduction, instead of being 17½ per cent came nearer to 25 per cent.

This wage was to be effective for one year. Unable to cope with the German competition, these same men, in the hope of securing the college trade for the spring and coming summer, accepted an additional reduction of 10 per cent on all items known as chemical glassware, used by colleges and educational institutions.

In the lamp blown and volumetric departments practically the same action was taken, namely, in February, 1921, wages were reduced 15 per cent, and an additional 15 per cent reduction was accepted in September of the same year.

CAPITAL.

It is a matter of record, and has been so published by the official organ of the American Chemical Society, that the manufacturers have passed this entire reduction to the consumer, notwithstanding his cost of production has not been reduced in proportion, due to his inability to operate his plants on a production basis because of the cheap importations from central Europe.

Mr. President, I ask that this editorial from the Journal of Industrial and Engineering Chemistry of November, 1921, entitled "Square dealing," showing the parallel reductions of prices following the wage reductions, be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

SQUARE DEALING.

Why bother about strict editorial practice when your heart is full over good news bearing upon American chemical independence? Why speak in impersonal vein about men who are playing the game fairly and squarely and who are making history. If it be considered free advertising, then let it go at that; but we want every American chemist to know exactly what we learned in a conference in this office this afternoon.

The visitors were Mr. E. E. Kimble and Mr. Otis, of the Kimble Glass Co., Vineland, N. J., and Mr. R. T. Will, of the Will Corporation, Rochester, N. Y. From Mr. Kimble we learned a story of the attitude of union labor to the chemical glassware industry which is a veritable ray of bright sunshine, in contrast with the lowering clouds of the threatened railroad strike announced yesterday. At our request Mr. Kimble placed these facts in the form of a letter.

OCTOBER 17, 1921.

DR. CHARLES H. HERTY,
1 Madison Avenue, New York City.

MY DEAR DOCTOR HERTY: In February, at the solicitation of the American Flint Glass Workers' Union, the union met the Chemical Glass Manufacturers at the Hotel Walton, Philadelphia, and the union volunteered to give a 15 per cent reduction in wages to meet the foreign competition with which they were confronted. A further voluntary reduction of 15 per cent was granted the manufacturers in August, 1921, in this same department.

The Chemical Glassware Blowers, an allied division of the Glass Workers' Union, accepted in August a voluntary reduction in wages of 17½ per cent, and increased the working move on many items—that is to say, increased the number of pieces per day—so that the reduction instead of being only 17½ per cent will come nearer to 25 per cent.

The action of these divisions of the American glass workers was highly commendable, and to our mind shows the true American attitude, in that the glass worker has shown himself willing to help reduce the price of American-made glassware to come within reasonable competitive figures with imported ware.

Very truly yours,

E. E. KIMBLE.

That was fine—"But," we asked Mr. Kimble, "have you given the consumer the benefit of that lowering of cost?" "Every bit of it," he replied, "and for confirmation I refer you to Mr. Will." He, in turn, promptly confirmed the statement. Fine, again! "But, Mr. Will [the dealer], have you given the consumer the benefit of your cheaper purchases?" Quick as a flash, he turned to his printed prices in the 1921 issue of the Chemical Catalogue lying near by and showed us the new prices on standard chemical glassware and the prices of the same in his 1920 lists. Lowered, all along the line! To get the matter in more general form we immediately wrote Mr. C. G. Fisher, of the Scientific Materials Co., Pittsburgh, Pa., and asked his current prices on the same items. Here are the prices resulting from the joint attitude of labor, the glass manufacturer, and the dealer:

	1920		Current prices.	
	Will Corporation.	Scientific Materials Co.	Will Corporation.	Scientific Materials Co.
Mohr's buret for pinch cock 50 cc. in 1/10..	$0.70	$0.65	$0.42	$0.45
Liebig's condenser, sealed in coil 250 mm. length	2.70	2.05	1.30	1.15
Extraction apparatus, Soxhlet, 100-cc. capacity, ground joints	6.70	7.00	4.80	6.00
Volumetric flask, glass stoppered, with mark on neck graduated, 1,000 cc	1.25	1.40	.90	1.20
Funnel, separatory, globe shape, stoppered long stem, 500 cc	2.65	2.10	1.75	1.65
Funnel tube, straight thistle top, 250 mm.	.11	.11	.10	10

That is the completed story. The lowering of labor's wages has been completely passed by the manufacturer and the dealer to the ultimate consumer, the chemist in the laboratory. It is a fine instance of square dealing.

During the recent exposition we met Herman Coors, of Golden, Colo. "How about it, old man? What are you doing in chemical porcelain manufacture in these dull times?" "Never busier," he replied, "twice as many orders as in any previous year and doing business under the same motto." The reference was to a bit of advice we gave him several years ago—"Improve the quality of your goods every year, cut down the cost of production, be content with small earnings, and give the consumer the benefit of every possible lowering of costs."

These men, and others like them, have been able to stay in business because the greater number of American consumers have stood loyally by them, recognizing the difficulties of this trying postwar period and determined that in the future America shall be independent in such matters.

Mr. FRELINGHUYSEN. Now, just a word about these exhibits which I have before me on my desk. This article I hold in my hand is a boiling flask. That is an American manufacture. It is resistant glass for boiling chemicals. It is produced at a price, free on board at the factory, of 12 cents. This is the German ware, a similar article, landed, free on board New York, at 7.3 cents. They are practically the same thing.

Here I show a graduated cylinder used for measuring in chemical laboratories. This is the German article, landed free on board New York, for 17 cents. Here is the American article, landed free on board at the factory, for 32 cents.

Here is a funnel separator, manufactured in Germany for 59 cents, and I call the Senate's attention to the workmanship required in this valve, made entirely of glass. Here is the American article, free on board the factory, 94 cents.

Here are comparable measuring pipes, the German 15 cents, the American 21 cents.

I have a letter from Surgeon General Ireland, of the United States Army. In this letter to me, dated May 24, 1922, he said:

WAR DEPARTMENT,
OFFICE OF THE SURGEON GENERAL,
Washington, May 24, 1922.

Senator JOSEPH S. FRELINGHUYSEN,
Senate Office Building, Room 405, Washington, D. C.

MY DEAR SENATOR FRELINGHUYSEN: With reference to telephone conversation with you this date, I am in favor of a protective tariff covering chemical glassware, which tariff should be sufficient to preserve the present American industry.

Upon entry of the United States into the World War great difficulty was experienced in obtaining the requirements of the Medical Department in this commodity. This difficulty continued up to the time that the American industry was developed to the extent of meeting the Army requirements, and thereafter no difficulty was experienced.

It is believed that the development of the American industry on essential war items is one of the important factors in carrying out the policy of national defense.

Very sincerely yours,

M. W. IRELAND,
Surgeon General, United States Army.

I also have a letter from Mr. Charles L. Parsons, secretary of the American Chemical Society, Washington, D. C., dated May 23, 1922, which reads as follows:

AMERICAN CHEMICAL SOCIETY,
OFFICE OF THE SECRETARY,
Washington, D. C., May 23, 1922.

Hon. JOSEPH S. FRELINGHUYSEN,
United States Senate, Washington, D. C.

DEAR SENATOR FRELINGHUYSEN: I take pleasure in writing you that after very careful consideration the American Chemical Society has unanimously expressed its opinion that the development of American-made glassware, chemicals, and chemical apparatus should be encouraged in every possible way.

Accordingly it is a pleasure, as I am personally in hearty accord with this idea, to write you that under the stress of stern necessity an industry of real importance has been built up in the United States for the production of glassware for use in our chemical laboratories and chemical industries. Previous to the war there was no real chemical glassware industry in America.

During the last six years an industry producing glassware second to none in quality has been developed which is now offering chemical apparatus to the American public at a reasonable price. One line of glassware especially has become famous as having no superior in any country, and when life is taken into consideration there is no cheaper

glassware made. There are now in America four large houses making beakers, flasks, tubing, and blanks, and five houses doing extensive lamp glassware blowing and graduating volumetric ware.

With the exception of some 5 to 8 per cent of especially molded glassware, such as large aspirator bottles, Wolff bottles, and gas generators, the American demand can be fully supplied from homemade material of excellent quality.

I sincerely trust that you will be successful in your efforts to see that proper support is given to this important new American industry.

Very truly yours,

CHARLES L. PARSONS, *Secretary.*

Mr. JONES of New Mexico. May I ask the Senator from what he has just been reading?

Mr. FRELINGHUYSEN. I read from a letter addressed to me by the secretary of the American Chemical Society.

Mr. JONES of New Mexico. May I see the letter?

Mr. FRELINGHUYSEN. Certainly. I understand that this society represents over 13,500 college professors and chemists in the United States.

In the testimony of Mr. Eimer, before the Ways and Means Committee of the House in 1919, he said:

We maintain that the chemical glassware and porcelain ware, in connection with other chemical and scientific apparatus, was absolutely essential to the key industries; in fact, to all the important manufacturing industries. We will demonstrate that these key industries can not be started or even maintained without chemical and scientific apparatus. For example, take dyes: Before we can manufacture them we must first develop them in the research laboratory. Then the next step in order after that is to work out the manufacturing method and processes, and that is also done in the laboratory. Then, finally, after the product has been put on a manufacturing basis, the processes must be controlled by what is known as the controlling laboratory. The controlling laboratory is the heart of the modern manufacturing plant. If this laboratory is prevented from operating, the plant is forced to shut down. In the case of the manufacture of guncotton, powder, and explosives, an interruption of laboratory tests would probably result in the blowing up of the whole plant. The laboratory must not be interrupted; the tests have to be carried out continuously.

Mr. President, I know what was accomplished by these industries during the war. I know how, through the energy of the American manufacturer, through the ability and genius of the glass blowers who had never undertaken this class of glass blowing before, they took these models and produced in this country a product practically equal to that of Germany. Germany and Austria, by reason of the low wages paid there, can land this technical glassware in this country at a much lower cost than we can manufacture it here, and unless we protect the industry with a differential between these production costs the industry here must close down.

The question is whether it is worth while for us to have the industry in this country or not. That is the point of view which the committee has taken, that the industry as the key industry should be maintained and protected. Upon that record of American energy and genius I rest my case.

Mr. CUMMINS. Mr. President, I would like to ask the Senator from New Jersey a question, if he will permit me.

Mr. FRELINGHUYSEN. Certainly.

Mr. CUMMINS. The Senator began his statement by saying, as I understood him, that the paragraph relates only to the kind of glass or glass production which he has described. I am very much impressed with his argument in favor of a duty, a very substantial duty, upon this kind of glass. But the paragraph upon which he spoke contains a very large number of other productions than chemical or laboratory glass. What has he to say about those?

Mr. FRELINGHUYSEN. I only spoke of that portion of the paragraph which relates to chemical glassware and said that it had no relation whatsoever to paragraph 217 as far as the biological glassware was concerned.

Mr. CUMMINS. In that the Senator was quite right, but after the first clause of this paragraph, which closes by attaching a duty of 70 per cent, the paragraph proceeds:

illuminating articles of every description, including chimneys, globes, shades, and prisms, incandescent electric light bulbs, with or without filaments, for use in connection with artificial illumination, all of the foregoing, finished or unfinished, composed wholly or in chief value of glass or paste, or a combination of glass and paste, 70 per cent ad valorem.

Then, omitting one clause, it proceeds:

table and kitchen articles and utensils, and all articles of every description not specially provided for, composed wholly or in chief value of glass or paste, or combinations of glass and paste, blown or partly blown in the mold or otherwise, or colored, cut, engraved, etched, frosted, gilded, ground (except such grinding as is necessary for fitting stoppers or for purposes other than ornamentation), painted, printed in any manner, sand-blasted, silvered, stained, or decorated or ornamented in any manner, whether filled or unfilled, or whether their contents be dutiable or free, 65 per cent ad valorem; table and kitchen articles and utensils, composed wholly or in chief value of glass or paste, or a combination of glass and paste, when pressed and unpolished, whether or not decorated or ornamented in any manner or ground (except such grinding as is necessary for fitting stoppers or for purposes other than ornamentation), whether filled or unfilled, or whether their contents be dutiable or free, 50 per cent ad valorem.

I would like to have some information with regard to the ordinary commercial articles. The Senator has convinced me with regard to the production of which he has just spoken, but what about the remainder?

Mr. FRELINGHUYSEN. I was simply dealing with the subject of chemical glassware in my statement. The other part of the paragraph, I believe, the Senator from West Virginia [Mr. SUTHERLAND] understands, and he will defend the duty of 70 per cent ad valorem as absolutely essential to the protection of that glassware. While the Senator from Iowa is right in that the paragraph deals with several types of product, none of them relates to paragraph 217, because that is the bottle paragraph, and really relates to an entirely different branch of the industry. I think the Senator from West Virginia can clearly establish the justification for the other rates.

Mr. CUMMINS. I understood the Senator from West Virginia was to give his opinion with regard to paragraph 217, but paragraph 217 does not cover the articles mentioned in the last part of paragraph 218.

Mr. FRELINGHUYSEN. No; the Senator is correct about that.

The VICE PRESIDENT. What is the pending question?

Mr. FRELINGHUYSEN. Paragraph 218.

The VICE PRESIDENT. What does the Senator desire as to that paragraph?

Mr. FRELINGHUYSEN. I call the attention of the Senator from New Mexico [Mr. JONES] to the fact that under this paragraph, following the chemical glassware paragraph, which products show an increase in importations, the chimney importations have grown from practically a negligible importation in 1918 to $142,000 for nine months of 1921.

The chimneys for gas lamps and tubing have increased from $133,000 in 1920 to $451,000 for nine months of 1921. Globes and shades for gas and electric lights have grown in importations from nothing in 1918 to $371,000 in 1921 for nine months. Tableware and bar glass importations have increased from $31,000 in 1918 to $910,000 in 1919.

All other articles in the basket clause have increased from $2,000,000 in 1918 to $4,815,000 in 1919. The same increase applies to bottles and decanters, from $258,000 in 1918 to $2,473,000 in 1920, and for nine months of 1921, $1,266,000. Candlesticks, candelabra, and chandeliers increased from $1,000 in 1918 to $52,000 in 1919. A progressive increase is shown all the way through. If the testimony of the glassware men is to be believed, the whole industry is menaced by the low cost of production abroad.

Mr. McCUMBER. Mr. President, the Senator from Iowa [Mr. CUMMINS] asked, I think, a very pertinent question, and inasmuch as it does not seem to have been answered directly, I will take a little time to give the results of the investigation that was made in reference to these prices and show to the Senate that while these rates seem rather high they are very much less than the Reynolds report would indicate would be required in order to equalize the difference between the foreign and the American prices.

Now, reverting to paragraph 218, I will take 10 items of electrical glassware. These articles are made in Czechoslovakia and the prices are per dozen. The foreign value is $2.13 per dozen; the landed charges, 85 cents; while the selling price of the imported article in the United States is $5.80. The selling price of the comparable domestic article is $7.49, so the rate required to equalize the difference, allowing a reasonable profit—and we have allowed a profit of 33⅓ per cent—to the foreigner would be 123 per cent. The committee has given 70 per cent.

The next item is electrical glassware from Germany costing $1.64. The landed charge is 74 cents; the selling price of the imported article in the United States is $5.17; the selling price of the comparable domestic article is $6.44. Allowing 33⅓ per cent to the importer, it would require 150 per cent to equalize the foreign with the American selling price.

The next two items are glasses made in England, and per dozen the foreign value is 58½ cents; the landed cost, 6 cents; the selling price of the imported article, $1.48; the selling price of a comparable domestic article, $1.92. The rate required, allowing 33⅓ per cent profit, would be 136 per cent.

Now I will skip over some and take five classes of blown-glass tableware made in Holland. The foreign value per dozen is $5.60; the landed cost, $1.68; the selling price of the imported article is $12.98; the selling price of the comparable domestic article in the United States is $19.73. Allowing 33⅓ per cent profit to the foreigner, it still would require 134 per cent to equalize the difference. The committee has given 65 per cent.

I will next take blown-glass tableware from Belgium, a dozen pieces. The price is $5.94 in Belgium; landed cost, $1.21; the

selling price, $10.50; the selling price of the comparable American article is $9.04. Therefore, it would take only 2 per cent to cover the difference in that one article.

Now we come to the ornamental, and here is where the widest differences occur. Take four items of blown-glass ornamented tableware from Italy. This is by single items. The cost, $1.77; the landed cost is 43 cents; the selling price in America is $4.94; the selling price of the comparable American article is $7.94. Allowing 25 per cent profit, which is the usual charge allowed in those cases, it would require 302 per cent in order to equalize the foreign with the American selling price. The committee have allowed 65 per cent.

Without going into details, the chemical glassware items range from 260 to 472 per cent to equalize the difference, and we have given but 75 per cent.

Mr. President, I could run all of these down and demonstrate that the duties which we have actually allowed are scarcely in any case as much as half of what is absolutely required or was required at the time the report was made, but after making allowance for a decline in American price and other conditions we believe that the industry may be continued in the United States with from 65 to 75 per cent ad valorem duty.

Mr. CUMMINS. Mr. President, I have just one question to present to the Senator from North Dakota for information to assist me in making up my mind in relation to this matter. The Senator from North Dakota has said that in computing the selling price of the foreign article the committee have allowed the importer a profit of either 25 per cent or 33⅓ per cent, as the case may be.

Mr. McCUMBER. Yes.

Mr. CUMMINS. Did the Reynolds Commission report what the profit to the American producer was in establishing the American selling price?

Mr. McCUMBER. Mr. President, they neither reported upon the profit of the American producer nor did they report upon the profit of the foreign producer. What they were required to do was to ascertain the duty which should be levied under the American valuation plan. Of course if we were going to adopt the basis of the American selling price, we had to get the difference between the foreign selling price, the one standard of valuation, and the American selling price, the other standard of valuation, which was proposed.

The experts of the department have informed us that upon the two prices the profits average about the same; in other words, where they have examined into the cost of production, that cost on the opposite side of the water, and the cost of production of the like article on this side of the water were in about the same proportion to each other as were the selling price on the other side of the ocean and the selling price in the United States. That was as near as we could get it.

Mr. CUMMINS. The conclusion from that statement I take it that the committee is of the opinion that 33 per cent is about the average profit of the American producer, based upon the American selling price.

Mr. McCUMBER. The Senator does not understand me. There is allowed a very much greater percentage in landing a product and selling it here than is allowed between the cost of production in the foreign country and what the foreign producer sells the article for in the foreign country. What we are getting at is what we had to compete with in the American market, and therefore we add to what it costs actually to purchase the article in the foreign country, without respect to what the manufacturer there made upon it, the profit which must be allowed to the importer to induce him to take the chances of destruction, pay the insurance, to land it in this country, and to sell it; and we have estimated the usual profits that go to the importer.

There are some lines in which the profits run about 25 per cent—that is the usual profit right along—while in others they go as high as 33 per cent where the cost and the risk involved in the importation is greater.

Mr. CUMMINS. I think I understood the Senator from North Dakota. The point that I have not clearly in my mind is this: How much, if any, reduction could the American producer make and still have a fair profit?

Mr. McCUMBER. What I tried to make clear was that the best evidence that we could secure was that the foreign producer has about the same profit between what it costs him and what he sells it for in his own country—not what he sells it for in this country—as the American has between what it costs him to produce it and what he sells it for in this country. The percentage would be about the same in each instance.

Mr. CUMMINS. At any rate, the committee is of the opinion that these duties are necessary in order to enable our producers to continue in business?

Mr. McCUMBER. I do not think they could continue at all unless they had a duty equivalent to about from 50 to 75 per cent. I can not imagine, with the prices at which the articles are produced abroad, how it would be possible for the American producer to continue in business otherwise.

Mr. SUTHERLAND. Mr. President, in connection with these items relating to flint-glass production, I desire to read a portion of the letter which was written to the President by Thomas W. McCreary, superintendent of the Phoenix Glass Co., and William P. Clarke, president of the American Flint Glass Workers' Union of North America. These two men, one of them representing the operating side of the glass industry, covered by the several paragraphs now under consideration, and the other representing all the workers in the industry, were appointed a committee to go abroad and to examine into all the conditions of this industry on the other side of the water. When they returned they made a very valuable report. Those who are interested in that report may find it in the hearings before the Committee on Finance in relation to the special and administrative sections of the bill, beginning on page 5197. The letter, however, addressed by these gentlemen to the President, part of which I will read, gives succinctly some of the points relating to this industry. I quote from the letter, which is dated Washington, D. C., January 17, 1922, as follows:

SIR: We solicited the honor of personally placing before you for your consideration facts and figures showing the true and actual conditions existing in the flint-glass industry of Europe and the United States. Our knowledge of these facts are personal and is the result of a joint investigation, covering a period of five months, made by us between October, 1920, and March, 1921, during which time we visited the principal glass-producing countries of Europe. Our information was secured from the people actually engaged in the industry, the manufacturers, and workmen and working women of the various countries visited.

We visited the homes of the workmen. We partook of their food in their homes. We observed their living conditions, and also visited the factories and saw the people at work.

Mr. Clarke represented the workmen and Mr. McCreery represented the manufacturers of the flint-glass industry of the United States in the joint investigation made. Each fact as developed was carefully noted, and where a doubt existed in the mind of either, a further investigation was made and the doubt eliminated, with the result that the separate report each made to the respective bodies, the manufacturers and workmen, agreed in every essential.

We will not impose upon you a long citation of figures, but will confine ourselves to a few illustrations showing the difference in the skilled labor cost in Europe and the United States with the belief they will be sufficient to carry conviction. If they are not sufficient we will gladly supply additional facts and figures along the same line.

In Belgium we found the skilled glass worker received 50 cents per 100 pieces, while in the United States the skilled labor cost for 100 pieces of the same article is $2.72. Here we also learned that glass companies made lines of glassware exclusively for the United States trade.

These lines would have no commercial value in the Belgian markets and consequently would be imported into this country at a low valuation, thereby placing the American manufacturers and workman under a double handicap, namely, a low wage rate and an undervaluation import value, when this line of ware could be made in these United States.

In Germany we saw glassware produced at a skilled labor cost of 26 cents per 100 pieces, while the skilled labor cost of producing 100 pieces of the same ware in the United States was $4.26.

We saw factories in Germany and Czechoslovakia, the major part of whose product was and is made for the markets of the United States, and the boast was made to us that they could pay the import duty and place the glassware in the markets of the United States at less cost than it could be manufactured here. We were informed that our import duties could be increased to 100 per cent and yet they could put the glassware into our country at less than our manufacturing cost.

Our observations have confirmed us in the opinion that the foreign manufacturers have as a fixed policy the purpose of keeping wages of all classes of labor, skilled and unskilled, at the lowest possible point, in order to give them a decided advantage in the markets of other countries, where a high wage rate prevails. This is particularly true of the markets of the United States.

When it was suggested to representatives of the manufacturers, which we did, that it would be better for the country, their industry, and all those engaged in it, both manufacturers and workmen, if a higher rate of wages was established and steps taken to develop a home market for their products, we were informed that a home market could not be developed, and the workmen must work for small wages, as that enabled the manufacturers to sell their products in foreign markets. At the same time the information was volunteered that 80 per cent of the glassware produced in Czechoslovakia is exported.

We have brought with us four pieces of domestic produced glassware, used for lighting purposes, in order to demonstrate more clearly the enormous advantage the foreign glass manufacturer has over the American glass manufacturer and workmen.

These articles are staple and are fairly representative of the staple line of illuminating glassware. They are imported very extensively. The skilled-labor cost of producing 100 pieces of the 10-inch chimney is:

Czechoslovakia	$0.07
Germany	.12
United States	2.11

On the 12-inch chimney:

Czechoslovakia	.10
Germany	.14
United States	2.96

The skilled-labor cost of producing 100 pieces of the small white inverted globe is:

Czechslovakia	$0.05
United States	1.66

The skilled-labor cost of producing 100 pieces of the 10-inch white reading shade is:

Germany	$0.26
United States	4.23

Enormous quantities of these articles, foreign produced, enter our markets to the detriment of the American industry.

The ultimate private consumer does not receive the full benefit of the low prices at which these goods are imported. The imported goods are sold to him at a price which is just far enough below the price at which the American manufacturers can put them on the market that domestic producers are driven out of the competition.

It is safe to say the only persons benefited by the importations of foreign glassware under our present system of determining invoice values are the foreign manufacturers and their workmen and those directly interested in their success.

That these goods are frequently invoiced below the value at our ports of entry is proven by our investigation conducted in 1904, when it was ascertained that during that season there was entered at the port of New York 500,000 dozen of the above-mentioned 10-inch white reading shade at a value ranging from 36 to 43 cents per dozen. This was below the cost of the glass material alone to the American manufacturer.

The facts set out in the other report, the complete report made by these men, are very much more exhaustive, but all to the same point, showing the scale of wages in all these countries now being paid or quite recently being paid to their workmen in comparison with the rate of wages paid in the United States. They asked for substantially this ad valorem rate of duty, based upon an American valuation; but while the committee realized that the rates given in the bill now before you are not really adequate, because, as stated in this letter, an ad valorem rate of 100 per cent can be put upon these goods and still the foreign manufacturers can get their goods in here, at the same time it is hoped that these rates will afford a fairly adequate degree of protection for our working people and yet will not entirely shut off foreign competition.

Mr. JONES of New Mexico. Mr. President, I shall not attempt to-night to enter into a general discussion of this question, but shall content myself with saying just a few words in regard to the points which have been touched upon by the Senator from New Jersey [Mr. FRELINGHUYSEN], the Senator from West Virginia [Mr. SUTHERLAND], and the Senator from North Dakota [Mr. MCCUMBER].

The Senator from New Jersey gave us some very interesting data regarding chemical glassware, but he did not supply us with all of the data, by any means. If I recall the substance of what he said, it amounted to about this: That during the war the industry was built up in the United States; that it was an important industry, one which should be encouraged and sustained. I have no objection to considering the matter from that point of view.

Until about the time of the war no chemical glassware of any consequence was made in this country. Most of it came from Germany and Belgium; but during the war our people engaged in the glassware industry began to produce it. They not only succeeded but they succeeded in producing an article much better than had ever before been produced, and, as stated in the letter read by the Senator from New Jersey, in some of these lines, and the most important line, the American product to-day, at present prices, is cheaper than the foreign product at the foreign price. It is so stated in that letter which the Senator read:

One line of glassware especially has become famous as having no superior in any country, and, when life is taken into consideration, there is no cheaper glassware made.

The Tariff Commission in its examination of the subject reached the same conclusion and made substantially the same statement. The foreign chemical glassware was very easily broken. It could not stand or did not stand the wear; and I want to make the statement that when the Tariff Commission examined this subject and inquired of manufacturers as to the amount of duty which they wanted to have, the manufacturers said that the existing duty was sufficient.

In the first place—

The ordinary equipment of a glass factory for the blowing of bulbs and bottles suffices for the production of chemical hollow-blown ware. Molds, blowpipes, and furnaces constitute the principal equipment, and are the same in all countries.

Then, speaking of the methods and processes, the Tariff Commission say:

Methods and processes: The making of hollow blown chemical ware is similar to that of incandescent lamp bulbs and bottles. Lamp-blown and volumetric ware made from tubing, and often according to designs of laboratory scientists, and from the factory blanks, is the work of specially trained artisans. There are less than 250 workmen of this class in the United States—

That was in 1916—

for the most part brought from the Thuringian factories of Germany. Since the war one American firm has developed the use of machinery to do in part what was laboriously done by hand in Germany in the manufacture of the great variety of products coming under the head of "lamp-blown and volumetric ware."

Here is what is said about the amount of the duty:

The manufacturers that have established this new industry in the United States since 1914 are satisfied with the existing rate of duty of 45 per cent ad valorem, but urge that the provision in paragraph 573, which admitted about half of the total chemical ware imported free of duty, be repealed and that all chemical ware be made dutiable at 45 per cent ad valorem. They state that this is necessary in order to encourage and build up their new industry; that large quantities of the ware used in educational institutions are not required to be of a high grade, and therefore the cheaper ware will be imported free of duty when normal trade conditions are restored; and that while they can compete under the existing rate of 45 per cent, they can not compete with duty-free ware.

That was the question which was presented to the Finance Committee by the manufacturers of this ware. Under section 573 of the existing law this class of ware is duty free to colleges and to institutions of learning, and it was that which the manufacturers were complaining against. They were not complaining as to the rate of duty now existing on it. They did not ask that the duty be increased from 45 per cent to 75 per cent, as this bill increases it, but they asked that these instruments intended for the institutions of the country be put on the dutiable list, and that is a very interesting piece of the tariff history of our country.

Mr. SMOOT. The Senator must know that in the testimony the witnesses testified that 45 per cent on the American valuation was sufficient. That is what they were asking for in the American valuation.

Mr. JONES of New Mexico. The Tariff Commission does not say anything about 45 per cent on the American valuation.

Mr. SMOOT. The Senator said it was the testimony of the manufacturers themselves.

Mr. JONES of New Mexico. I have just read that the Tariff Commission reports that that is what the manufacturers said. It is not what was said before the committee. Here is the report of a commission appointed by the United States Government to ascertain just such facts as these.

Mr. SMOOT. I understood the Senator to say that the manufacturers testified before the Finance Committee that 45 per cent was all they wanted.

Mr. JONES of New Mexico. No; I said that the Tariff Commission found that that was all the manufacturers of this country wanted.

Mr. LA FOLLETTE. They were not talking about American valuation at all.

Mr. JONES of New Mexico. They were not talking about American valuation; on the contrary, they said the existing duty was sufficient, which is 45 per cent ad valorem on the foreign valuation.

Mr. SMOOT. I misunderstood the Senator.

Mr. JONES of New Mexico. Yes; the Senator did. What they complain of is having the chemical glassware, used in the educational and scientific institutions of the country, come in free of duty, and that is really a most interesting bit of the tariff history of the country. The bill proposes to take that scientific glassware and put it in this paragraph, in the dutiable list; it proposes to do everything the manufacturers of the country said they wanted done, and then, after having done that, increase the duty on the whole business from 45 to 75 per cent. It can not be possible, it seems to me, that anyone has given careful consideration to this subject.

Mr. SMOOT. The Senator was reading from the report made by the Tariff Commission in January, 1918, at a time when the mark was not as it is to-day.

Mr. JONES of New Mexico. No; this is since the war.

Mr. SMOOT. I read from the Tariff Information Survey, which says:

At the Pittsburgh conference of the Tariff Commission in January, 1918, manufacturers who began the making of this ware when our supply was cut off from Germany, and who are now supplying the domestic demand, strongly objected to the importation free of duty of laboratory ware for educational institutions.

The mark was quite different in 1918. At that time no one had ever thought there would be the competition which has developed since 1918 in this ware.

Mr. JONES of New Mexico. I am a little astonished at the statement of the Senator from Utah about the competition in this ware. There is very little of the ware coming in at all.

Mr. SMOOT. That is a question we can discuss when we reach it. I am simply calling attention to the fact that the statement by the Tariff Commission does not apply to-day at all. It was made in 1918, during the war.

Mr. JONES of New Mexico. What the Tariff Commission said in this survey has been corroborated by everything that has occurred since it was made. There has been no flood of imports of any glassware into this country.

Mr. SMOOT. The Senator does not say that the importation has not been increasing since 1918?

Mr. JONES of New Mexico. Of course, in 1918 none of it was imported.

Mr. SMOOT. That is when this statement was made.

Mr. JONES of New Mexico. I am taking the record prior to the war, and the last information we have on the subject.

Mr. SMOOT. We never made it in this country prior to the war.

Mr. JONES of New Mexico. But I am taking the importations of it.

Mr. SMOOT. We imported all that was used in this country.

Mr. JONES of New Mexico. That is true; but the Senator has no information showing any great flood of imports of this ware, or any other glassware.

Mr. SMOOT. All the information I have is what is shown by the Tariff Commission.

Mr. LA FOLLETTE. What are the imports?

Mr. SMOOT. It is divided up in different sections. The imports of chemical glassware in 1918 were $33,786; in 1919 they were $62,181; in 1920 they were $190,624. Up to 1918 there was an absolute embargo on account of the war, and we never made any of it before the war. There was none made in this country.

Mr. FRELINGHUYSEN. Mr. President, I understand the Senator calls the Senate's attention to the fact that optical and chemical glass men asked 45 per cent in 1918. Is that true?

Mr. JONES of New Mexico. I read from the survey of the Tariff Commission to that effect.

Mr. FRELINGHUYSEN. The value of the mark in 1918 was, I am informed, 24 cents. I do not think it was as high as that. I think it was about 12 to 14 cents. To-day it is worth a quarter of a cent. It makes a big difference in the rate asked. I call the Senator's attention to page 5271 of the hearings before the Finance Committee, in which they asked for 60 per cent ad valorem on the American valuation.

Mr. JONES of New Mexico. I understand that finally some of the parties in interest went before the Finance Committee and made these claims, and I understand further that upon the basis of the claims stated the proposed duty is entirely inadequate. The statement which the Senator holds in his hand proves too much. It is based on one or two factors which, if taken alone, would show that it would be absolute folly for anybody in the United States, even under a 75 per cent duty, to undertake to produce any of the chemical glassware in the United States. It is based simply upon the difference in the price of labor in Germany and the price in this country. It does not take into consideration the many other things which must be considered in the discussion of this subject.

If you base your rate of duty upon those facts alone which were stated in the testimony which the Senator has, you will find that we get nowhere with a 75 per cent duty. Only the partial truth has been told.

Moreover, the facts as stated in that testimony were all true at the time, and with reference to the time when the subject was being investigated, but that takes into consideration nothing regarding the great change in conditions in Belgium, Germany, and Czechoslovakia. The Senator must know that there are other factors entering into the question; that the labor wage has increased enormously since the statement which he has in his hand was made, since the investigation to which it refers was made.

The Senator must take into consideration other factors—that this industry has been built up in the United States; that to manufacture glassware requires fuel in great quantities, and of the best kind. Those countries are handicapped in that regard. Belgium has not recoverd from the war. These countries are not producing. The imports are small compared with the period prior to the war, and nowhere does any witness mention anything which has not changed for the better since it was made, and in favor of the industry in the United States.

It does seem to me that we ought not to make this tariff solely because of conditions which exist in Germany. We hear Germany upon every hand. I think by this time Senators have come to realize that when reference is made to Germany, it is made not for the purpose of giving a reason for these duties, but for the purpose of affording an excuse. If these things can be produced in Germany with the relatively low costs which have been constantly called to our attention, why is not this country flooded with these commodities? If they can be produced two or three hundred per cent cheaper than in this country, why do they not come here? Will Senators longer seriously accept reference to the German situation?

Mr. President, last year the total importations from Germany were less than $90,000,000, but our exports to Germany were nearly $400,000,000. Because of that paltry $89,000,000 Senators would seriously rise here and undertake to frighten us with respect to practically every item in the tariff bill. It seems to me that the patience of serious-minded people would soon pass away. Why do you want to listen to such talk as that when you know we are not doing business on any such basis? But that is all. When we seek for reasons they furnish us excuses.

Mr. President, I observe it is the usual time for taking a recess, and I know that Senators are anxious to get away. I wish to discuss the subject on Wednesday in a rather connected way. So if it is satisfactory to the Senator from North Dakota I will stop now.

EXECUTIVE SESSION.

Mr. McCUMBER. To-morrow being a holiday I had hoped that we might possibly run until 12 o'clock to-night. However, there seems to be some disinclination among Senators to hold that late. Therefore I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After eight minutes spent in executive session the doors were reopened and the Senate (at 10 o'clock and 10 minutes p. m.), under the order previously entered, took a recess until to-morrow, Tuesday, May 30, 1922, at 1.25 o'clock p. m.

NOMINATIONS.

Executive nominations received by the Senate May 29 (legislative day of April 20), 1922.

ASSISTANT REGISTER OF THE TREASURY.

Frank A. DeGroot, of Michigan, to be Assistant Register of the Treasury, to fill an existing vacancy.

COLLECTOR OF CUSTOMS.

Jennie P. Musser, of Salt Lake City, Utah, to be collector of customs for customs collection district No. 48, with headquarters at Salt Lake City, Utah, in place of Estelle V. Collier, resigned.

APPRAISER OF MERCHANDISE.

W. O. Jackson, of Springfield, Ohio, to be appraiser of merchandise in customs collection district No. 41, with headquarters at Cincinnati, Ohio, in place of Thomas Butterworth, resigned. This nomination is to take the place of the one heretofore sent in the name of Oscar W. Jackson and is to correct the name.

APPOINTMENT IN COAST AND GEODETIC SURVEY.

Angus Raymond Jessup, of Virginia, to be aid, with relative rank of ensign in the Navy, in the Coast and Geodetic Survey, vice Benjamin Galos, removed.

PROMOTIONS IN THE NAVY.

The following-named midshipmen to be ensigns in the Navy from the 3d day of June, 1922:

Harold L. Fudge.
Carl R. Brown.
William H. Egan, jr.
Beverly M. Coleman.

POSTMASTERS.

CALIFORNIA.

Fred A. Lindley to be postmaster at Pismo, Calif. Office became presidential January 1, 1922.

Frances L. Musgrove to be postmaster at Arbuckle, Calif., in place of F. L. Musgrove. Incumbent's commission expired April 8, 1922.

John L. Childs to be postmaster at Crescent City, Calif., in place of J. M. Hamilton. Appointee declined.

Jennie Kinney to be postmaster at San Quentin, Calif., in place of M. G. Mails. Name changed by marriage.

CONNECTICUT.

Henry F. Hanmer to be postmaster at Wethersfield, Conn., in place of H. W. Crane, resigned.

GEORGIA.

Philetus D. Wootten to be postmaster at Abbeville, Ga., in place of P. D. Wootten. Incumbent's commission expired March 21, 1922.

Gordon G. Ridgway to be postmaster at Royston, Ga., in place of R. C. Ayers. Incumbent's commission expired April 8, 1922.

HAWAII.

Carl Spillner to be postmaster at Makaweli, Hawaii, in place of B. D. Baldwin, resigned.

Jacintho S. Medeiros to be postmaster at Puunene, Hawaii, in place of J. S. Medeiros. Incumbent's commission expired January 24, 1922.

MARYLAND.

Charles W. Glasgow to be postmaster at Street, Md. Office became presidential April 1, 1921.

MINNESOTA.

Emil Kukkola to be postmaster at Finlayson, Minn. Office became presidential July 1, 1920.

Arthur L. Hamilton to be postmaster at Aitkin, Minn., in place of John Svedberg. Incumbent's commission expired July 21, 1920.

Asa R. Woodbeck to be postmaster at Brookpark, Minn., in place of L. L. Johnson. Incumbent's commission expired August 7, 1921.

Lawrence J. Nasett to be postmaster at Robbinsdale, Minn., in place of J. I. Nasett, resigned.

Harry M. Logan to be postmaster at Royalton, Minn., in place of W. L. McGonagle. Incumbent's commission expired January 24, 1922.

Irving J. Jandro to be postmaster at Waverly, Minn., in place of J. F. McDonnell, resigned.

MONTANA.

Jack Bennett to be postmaster at Plentywood, Mont., in place of I. A. Oakes, resigned.

NEBRASKA.

Marie A. Lybolt to be postmaster at Brunswick, Nebr., in place of M. A. Lybolt. Incumbent's commission expired February 4, 1922.

NEW YORK.

Seward Latham to be postmaster at Central Bridge, N. Y. Office became presidential October 1, 1920.

Frank S. Duncan to be postmaster at Lawrence, N. Y., in place of T. D. Mulcahy. Incumbent's commission expired May 24, 1920.

Violet Breen to be postmaster at Roslyn Heights, N. Y., in place of J. K. Stillwell. Appointee declined.

NORTH CAROLINA.

Luther J. Tucker to be postmaster at Maxton, N. C., in place of B. F. Nicholson. Incumbent's commission expired March 8, 1922.

OHIO.

Joseph E. W. Greene to be postmaster at Newport, Ohio. Office became presidential April 1, 1921.

Julius R. Bruns to be postmaster at St. Henry, Ohio. Office became presidential January 1, 1921.

Cleona M. Dunnick to be postmaster at Ashville, Ohio, in place of S. C. Allison. Incumbent's commission expired January 31, 1922.

OKLAHOMA.

George F. Cutshall to be postmaster at Cement, Okla., in place of A. C. Melton, resigned.

OREGON.

Charles M. Crittenden to be postmaster at Hubbard, Oreg., in place of C. M. Crittenden. Incumbent's commission expired April 30, 1922.

Thomas J. Warren to be postmaster at McMinnville, Oreg., in place of W. L. Hembree, resigned.

PENNSYLVANIA.

Albert D. Karstetter to be postmaster at Loganton, Pa. Office became presidential April 1, 1922.

Emery E. Thompson to be postmaster at Elizabeth, Pa., in place of C. L. Sadler, resigned.

SOUTH CAROLINA.

Ralph W. Wall to be postmaster at Campobello, S. C., in place of E. L. Fagan. Incumbent's commission expired April 30, 1922.

TEXAS.

Henry E. Cannon to be postmaster at Shelbyville, Tex. Office became presidential April 1, 1921.

Bert J. McDowell to be postmaster at Del Rio, Tex., in place of F. M. Brady, resigned.

Daisy M. Singleton to be postmaster at Marble Falls, Tex., in place of C. E. Smith. Incumbent's commission expired January 24, 1922.

Ada A. Ladner to be postmaster at Yorktown, Tex., in place of C. F. Hoff, resigned.

WEST VIRGINIA.

Charles J. Parsons to be postmaster at Sabraton, W. Va., in place of L. H. Jones, resigned.

WISCONSIN.

Peter O. Virum to be postmaster at Junction, Wis. Office became presidential January 1, 1921.

CONFIRMATIONS.

Executive nominations confirmed by the Senate May 29 (legislative day of April 20), 1922.

PROMOTIONS IN THE NAVY.

MARINE CORPS.

To be second lieutenants.

Biehl, Frederick Wagner.
Birthright, Frank Burroughs.
Brown, Charles Campbell.
Coffman, Raymond Paul.
Conradt, Pierson Ellsworth.
Crisp, Charles Frederick.
Deese, Rupert Riley.
DeWitt, Ralph Birchard.
Donehoo, John Curling, jr.
Dunkelberger, Harry Edward
Forsyth, Ralph Edward.
Godin, Richard James.
Huff, Howard Reid.
Jerome, Clayton Charles.
Larson, Emery Ellsworth.
McHugh, James Marshall.
Miller, Lyman Gano.
Mitchell, William Montgomery
Orr, William Willard.
O'Shea, George Joseph.
Price, Eugene Hayden.
Riseley, James Profit.
Skidmore, Robert Louis.
Taylor, Edward Dickinson
Weaver, John Buxton.

POSTMASTERS.

CALIFORNIA.

Edward D. Mahood, Corte Madera.
Attilio C. Martinelli, Inverness.
James E. Power, San Francisco.

GEORGIA.

SENATE.

TUESDAY, *May 30, 1922.*

(Legislative day of Thursday, April 20, 1922.)

The Senate met at 1.25 p. m., on the expiration of the recess.

THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

The VICE PRESIDENT. The Secretary will state the pending question.

The ASSISTANT SECRETARY. The pending amendment is, on page 39, after line 18, to strike out paragraph 218 and to insert a new paragraph 218.

RECESS.

Mr. LODGE. Mr. President, in accordance with Senate Resolution 291, heretofore agreed to, I move that the Senate take a recess until to-morrow morning at 11 o'clock a. m.

The motion was agreed to; and (at 1 o'clock and 30 minutes p. m.) the Senate, under the terms of Senate Resolution 291, took a recess until to-morrow, Wednesday, May 31, 1922, at 11 o'clock a. m.

SENATE.

WEDNESDAY, *May 31, 1922.*

(Legislative day of Thursday, April 20, 1922.)

The Senate met at 11 o'clock a. m., on the expiration of the recess.

ADJUSTMENT OF ARMY AND NAVY PAY—CONFERENCE REPORT.

Mr. WADSWORTH. Mr. President, I present the conference report on House bill 10972, commonly known as the service pay bill, and I ask unanimous consent for its immediate consideration.

The VICE PRESIDENT. The Secretary will read the conference report.

The reading clerk read the report, as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 10972) to readjust the pay and allowances of the commissioned and enlisted personnel of the Army, Navy, Marine Corps, Coast Guard, Coast and Geodetic Survey, and Public Health Service having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendments of the Senate numbered 3, 4, 5, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, and 42, and agree to the same.

Amendment numbered 1: That the House recede from its disagreement to the amendment of the Senate numbered 1, and agree to the same with an amendment as follows: In lieu of the language inserted by the Senate insert the following: ", except those whose promotion is limited by law to this grade and who are not entitled under existing law to the pay and allowances of a higher grade"; and the Senate agree to the same.

Amendment numbered 2: That the House recede from its disagreement to the amendment of the Senate numbered 2, and agree to the same with an amendment as follows: In lieu of the language stricken out by the Senate insert the following: "Nothing contained in the first sentence of section 17 or in any other section of this act shall authorize an increase in the pay of officers or warrant officers on the retired list on June 30, 1922"; and the Senate agree to the same.

Amendment numbered 6: That the House recede from its disagreement to the amendment of the Senate numbered 6, and agree to the same with an amendment, as follows: In lieu of the language inserted by the Senate, insert the following: "on June 30, 1922, there shall be included in the computation"; and the Senate agree to the same.

Amendment numbered 7: That the House recede from its disagreement to the amendment of the Senate numbered 7, and agree to the same with an amendment, as follows: In lieu of the language inserted by the Senate, insert the following: "and service as a contract surgeon serving full time; and also 75 per cent of all other periods of time during which they have held commissions as officers of the Organized Militia between January 21, 1903, and July 1, 1916, or of the National Guard, the Naval Militia, or the National Naval Volunteers since June 3, 1916,"; and the Senate agree to the same.

J. W. WADSWORTH, Jr.,
TRUMAN H. NEWBERRY,
DUNCAN U. FLETCHER,
Managers on the part of the Senate.
JOHN C. MCKENZIE,
JAMES F. BYRNES,
Managers on the part of the House of Representatives.

Mr. WADSWORTH. It may perhaps hasten matters if I make a brief explanation.

Mr. HARRISON. Will the Senator from New York yield, that I may suggest the absence of a quorum?

Mr. WADSWORTH. Is it necessary at this time?

Mr. HARRISON. There are no doubt some Senators on this side of the Chamber interested in this legislation and they are not now here.

Mr. WADSWORTH. Very well.

The VICE PRESIDENT. The Senator from Mississippi suggests the absence of a quorum. The Secretary will call the roll.

The reading clerk called the roll and the following Senators answered to their names:

Ashurst	Harris	McKinley	Robinson
Borah	Harrison	McLean	Sheppard
Bursum	Hitchcock	McNary	Simmons
Calder	Johnson	Moses	Smoot
Capper	Jones, N. Mex.	Nelson	Sutherland
Culberson	Jones, Wash.	New	Townsend
Curtis	Kellogg	Newberry	Underwood
du Pont	Kendrick	Nicholson	Wadsworth
Edge	Keyes	Norbeck	Warren
Ernst	King	Oddie	Watson, Ga.
Fletcher	Ladd	Page	Watson, Ind.
Frelinghuysen	Lenroot	Poindexter	
Gooding	Lodge	Ransdell	
Hale	McCumber	Rawson	

The VICE PRESIDENT. Fifty-three Senators have answered to their names. A quorum is present.

Mr. WADSWORTH. Mr. President, just a brief word of explanation. The only difference in the bill as now reported from the conference is that the conferees have agreed that those officers who are now upon the retired list in the several services shall not receive the benefit of the increased pay due to the revision of the pay of officers on the active list, but that hereafter the officers who are retired shall have the benefit of the new schedule.

Mr. ROBINSON. Mr. President, what is the subject matter the Senator is discussing?

Mr. WADSWORTH. The pay bill conference report.

Mr. ROBINSON. Has the Senator asked unanimous consent for its consideration?

Mr. WADSWORTH. I have.

Mr. ROBINSON. It has been granted?

Mr. WADSWORTH. The conference report has been read, showing the action of the House in receding.

Mr. ROBINSON. Has a full agreement been reached?

Mr. WADSWORTH. A full agreement.

Mr. ROBINSON. It was impossible to hear the Senator's first statement because of the numerous conversations in progress in the Chamber, particularly about the Senator from New York. I ask for order. On the other side of the Chamber everyone seems to be engaged in conversation.

The VICE PRESIDENT. The Senate will be in order.

Mr. ROBINSON. I ask the Senator from New York if a full agreement has been reached on the conference report?

Mr. WADSWORTH. It has.

Mr. ROBINSON. Will the Senator state the effect of the agreement?

Mr. WADSWORTH. The matter in difference between the two Houses at the time the Senate passed the House bill was as to the pay of retired officers. The House had proposed that certain grades of retired officers, the upper grades, to be exact, should not receive any increase in pay, if such were possible, due to the revision of the pay schedule of those on the active list. The Senate struck out that restriction and passed the bill in such a form as would permit retired officers to receive an increase. In conference the Senate conferees yielded on that matter with an amendment, the effect of which is that officers now upon the retired list of the six services shall receive no increase in pay, but officers hereafter retired shall, of course, be retired on the basis of 75 per cent of the pay they are receiving at the date of retirement.

Mr. ROBINSON. In other words, the provision is not made retroactive?

Mr. WADSWORTH. It is not. By that change about $500,000 additional will be saved.

Mr. SPENCER. Mr. President, will the Senator from New York tell me if this was the only point in conference?

Mr. WADSWORTH. It was the only point upon which there was disagreement. Two other matters were not in actual disagreement, but the conferees drew better language to cover the points involved. There is no essential change except in the matter of retired officers.

The VICE PRESIDENT. Is there objection to the immediate consideration of the conference report? The Chair hears none. The question is on agreeing to the conference report.

The report was agreed to.

SCHOOLS FOR AERONAUTICS.

The VICE PRESIDENT laid before the Senate a communication from the Acting Secretary of the Navy, transmitting in further response to Senate Resolution 266, agreed to April 5,

1922, information relative to the establishment of an academy of aeronautics at the Naval Academy and the manufacture of aircraft at naval stations, etc., which was referred to the Committee on Naval Affairs and ordered to be printed.

PETITIONS AND MEMORIALS.

The VICE PRESIDENT laid before the Senate a resolution adopted by the Mid-City Citizens' Association, of Washington, D. C., favoring the passage of the concurrent resolution (S. Con. Res. 23) creating a joint committee to determine the indebtedness of the United States to the District of Columbia or of the District of Columbia to the United States growing out of relations existing since the organic act of 1878, which was referred to the Committee on the District of Columbia.

He also laid before the Senate a resolution adopted by Honolulu Lodge, No. 1245, I. A. of M., and the Honolulu Trade and Labor Council, American Federation of Labor, both in Hawaiian territory, favoring the manufacture of all war equipment and Government supplies in Government-owned shops and plants, namely, the arsenals, navy yards, torpedo stations, equipment shops, powder factories, aircraft plants, etc., which was referred to the Committee on Territories and Insular Possessions.

Mr. CAPPER presented a resolution adopted by Kansas City (Kans.) High School Club, favoring the enactment of legislation creating a department of education, which was referred to the Committee on Education and Labor.

Mr. ROBINSON presented a petition of sundry citizens of Pine Bluff, Ark., praying that only a moderate duty on kid gloves be imposed in the pending tariff bill, which was referred to the Committee on Finance.

He also presented a letter in the nature of a memorial from J. H. Reynolds, president Hendrix College, of Conway, Ark., remonstrating against the proposed duty on scientific instruments for educational institutions in the pending tariff bill, which was referred to the Committee on Finance.

He also presented a memorial of sundry citizens of Russellville, Ark., remonstrating against the proposed duty on vegetable and animal oils in the pending tariff bill, which was referred to the Committee on Finance.

Mr. WILLIS presented the memorial of Mrs. E. C. Beach and sundry other citizens of Bolling Green, Ohio, remonstrating against the enactment of legislation providing for compulsory Sunday observance in the District of Columbia, which was referred to the Committee on the District of Columbia.

He also presented petitions of sundry citizens of Latchie, Genoa, Millbury, Stony Ridge, Lemoyne, Waterville, and Toledo, all in the State of Ohio, praying for inclusion in the pending tariff bill of a duty of $2 per 100 pounds on Cuban sugar, which were referred to the Committee on Finance.

REPORTS OF COMMITTEES.

Mr. McCUMBER. I report back favorably without amendment from the Committee on Finance the joint resolution (H. J. Res. 270) authorizing the Secretary of the Treasury to establish a credit with the United States for the Government of Liberia, and I submit a report (No. 727) thereon. I will state that we may offer on the floor some unimportant amendments to the joint resolution.

The VICE PRESIDENT. The joint resolution will be placed on the calendar.

Mr. WADSWORTH, from the Committee on Appropriations, to which was referred the bill (H. R. 10871) making appropriations for the military and nonmilitary activities of the War Department for the fiscal year ending June 30, 1923, and for other purposes, reported it with amendments and submitted a report (No. 728) thereon.

ENROLLED BILL PRESENTED.

Mr. SUTHERLAND, from the Committee on Enrolled Bills, reported that May 27, 1921, they presented to the President of the United States the enrolled bill (S. 2263) to amend the Federal reserve act approved December 23, 1913.

BILLS AND JOINT RESOLUTION INTRODUCED.

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. CAPPER:

A bill (S. 3661) for the prevention and removal of obstructions and burdens upon interstate commerce in grain, by regulating transactions on grain future exchanges, and for other purposes; to the Committee on Agriculture and Forestry.

By Mr. McNARY:

A bill (S. 3662) authorizing and directing the Postmaster General to investigate conditions arising from contracts in the star-route, screen-wagon, and other vehicle service for the fiscal years ended June 30, 1915, June 30, 1916, June 30, 1917, and June 30, 1918, and to make a report of his findings to the Congress; to the Committee on Post Offices and Post Roads.

By Mr. NELSON:

A bill (S. 3663) to appoint Christopher C. Andrews, formerly a brigadier general and brevet major general of volunteers in the Civil War, to the grade of brigadier general on the retired list of the Army; to the Committee on Military Affairs.

By Mr. BURSUM:

A bill (S. 3664) granting a pension to John Lannon; to the Committee on Pensions.

By Mr. WADSWORTH:

A joint resolution (S. J. Res. 202) to authorize and regulate details in the executive or administrative service of the Government (with accompanying papers); to the Committee on Appropriations.

AMENDMENT TO HOUSE RIVER AND HARBOR BILL.

Mr. SHEPPARD submitted an amendment providing for improvement work at Turtle Bayou, Tex., in accordance with the report submitted in House Document No. 1010, Sixty-sixth Congress, third session, intended to be proposed by him to the bill (H. R. 10766) authorizing appropriations for the prosecution and maintenance of public works on canals, rivers, and harbors, and for other purposes, which was referred to the Committee on Commerce and ordered to be printed.

CONFERENCE ON LIMITATION OF ARMAMENT.

Mr. POINDEXTER. Mr. President, I ask unanimous consent to have printed in the RECORD in 8-point type a brief article by Hannis Taylor upon the recent arms limitation conference and the treaties that grew out of it. That great event was the first example in the history of the world in which great nations voluntarily agreed to limit armaments. As an appropriate supplement to that agreement this conference produced also the great pact between the Pacific nations for peace and mutual respect of national rights in the Pacific Ocean, which has already had the effect of bringing to an end the constantly increasing talk of war which so ominously threatened that section of the world.

There being no objection, the article was ordered to be printed in the RECORD in 8-point type, as follows:

[Reprinted from the National Republican, Washington, D. C., 1922.]

THE TRIUMPH OF AMERICAN DIPLOMACY—A STUDY OF THE COMPLETED WORK OF THE CONFERENCE ON LIMITATION OF ARMAMENT FROM A WORLD POINT OF VIEW; WAR-PREVENTING AGREEMENTS, NOT ENTANGLING ALLIANCES, THE OUTCOME—AMERICA'S NEW PLACE IN THE FAMILY OF NATIONS.

THE BRANDEGEE RESOLUTION RENDERS ALL ATTEMPTS TO TORTURE THE FOUR-POWER PACT INTO AN "ALLIANCE" IMPOSSIBLE.

In order to illustrate the importance, from an historical point of view, of President Harding's epoch-making offer to arbitrate between Europe and Asia the Hon. Hannis Taylor has prepared this monograph, in which our diplomatic history, now covering nearly a century and a half, is unfolded as a stirring drama in six acts. In the first is described the organization of the family of nations at the time our infant Republic became an humble member of it; in the second is described our first contribution in the form of the modern and existing law of neutrality; in the third is traced the origin and growth of the Monroe doctrine; in the fourth is noted the extension of that doctrine to the Pacific Ocean; in the fifth is explained the circumstances under which our supreme arbitrating power in this hemisphere was defined; in the sixth is set forth the real nature of the first international conference ever held on the soil of the New World in which this Republic assumed the rôle of supreme arbitrator between Europe and Asia. Only in the light of its historical antecedents can that crowning triumph of American diplomacy be fully understood.

The works of Mr. Taylor as an expounder of constitutional and international law have been crowned by the Universities of Edinburgh and Dublin and the Institute of France. As a practical diplomatist his career as minister plenipotentiary to Spain, marked by a continuous residence in that country during stormy times of four years and a half, without a single return to his own country, received the unqualified praise of Presidents Cleveland and McKinley. Throughout the prolonged controversy between this country and the Republic of Colombia, culminating in the recent treaty, Mr. Taylor acted as counsel for Colombia.

What do we mean when we speak of the family of nations? When did it originate? Where does it abide? What does it embrace? The answers to those questions must be found in the record of a diplomatic and political evolution whose progressive development has been regulated by permanent, uniform, and universal law. There is no fact that stands in isolation; there is no institution that is not the natural, perhaps inev-

itable, outcome of its antecedents. Only by the aid of that process of reasoning is it possible to grasp the comprehensive thought embodied in the phrase "the family of nations." Without some knowledge of its historical antecedents it is impossible to describe the vast diplomatic organization, broad bottomed on international law, which now shelters within its fold the civilized nations of the world of to-day.

THE FAMILY OF NATIONS IN ITS CHILDHOOD.

The separate nationalities, each with its own character, language, and institutions, which arose out of the wreck of the empire of Charles the Great, passed through a long childhood under the protecting wings of an institution known as the Holy Roman Empire that illustrated for centuries the enduring power of a political theory. The chiefs of that comprehensive society were the Roman Emperor and the Roman pontiff, the one standing at its head in its temporal character as an empire and the other standing at its head in its spiritual character as a church. The Roman Empire and the Roman Catholic Church were, according to medieval theory, two aspects of a single Christian monarchy whose mission it was to shelter beneath its wings all the nations of the earth. No matter to what extent the Holy Roman Empire may have failed as an international power, whether arbitrating on its spiritual side through the pope and the canon law or on its temporal side through the Emperor and the imperial law, the fact remains that for centuries it was the one bond of cohesion holding Europe together under the spell of a theory that assumed to provide a complete system of international justice and a supreme tribunal adequate to the settlement of all controversies that could possibly arise between Christian nations.

THE EARTHQUAKE KNOWN AS THE REFORMATION.

No matter whether the Holy Roman Empire was a theory or an institution, not until the conception of a united Christendom it embodied was wrecked by the Reformation was the field cleared for the growth of international law as now understood.

For the older form of a universal faith uniting Christians of all nations the Lutheran states substituted the principal of territorial religion which acknowledged the right of each nation to determine the form of belief that should prevail within its own bounds. From that premise were drawn the two fundamental postulates of the new international system; first, that each state is sovereign and independent, and as such coequal with all the rest; second, that territory and jurisdiction are coextensive. Such was the practical outcome of the terrible 30 years' war closed in 1648 by the peace of Westphalia. "That peace set the final seal on the disintegration of the world empire at once of pope and emperor, and made possible the complete realization of the doctrine of Grotius, the doctrine of the sovereignty of states. The peace of Westphalia did not create international law, but it made a true science of international law realizable." Such was the general character of the treaty settlement made during the year 1648 in the first body that can be called a diplomatic congress in the modern sense of that term—a settlement that survived without a break as the public law of Europe down to the French Revolution.

GROTIUS AND THE NEW INTERNATIONAL SYSTEM.

The postulate that each state as a member of the family of nations is sovereign and independent, and as such coequal with all the rest, settled the fact that no one of them could be made to bow to a common superior save through its own consent. As the common superior furnished by the holy Roman Empire had been swept away by the Reformation, the Dutch jurist, Grotius, placed upon the vacant throne as a substitute for him a book published in 1625 called "De Jure Belli ac Pacis." The laws of war and peace embodied in that compilation had been drawn from a single source. The epoch-making work of Grotius, brilliant as it was, simply involved an application of one branch of Roman private law known as the jus gentium—the law common to all nations—to states instead of to individuals. His genius consisted entirely of his ability to extract from that body of rules known as the jus gentium, applied by the Romans only between man and man, a code adequate for the regulation, by common consent, of the new international relations established between the Christian states of western Europe after the holy Roman Empire had ceased to be an international bond between them.

CONCERT OF EUROPE AND THE BALANCE OF POWER.

After the peace of Westphalia had established the existence of the family of nations as a fact, and after Grotius had furnished it with a code of family law whose rules it agreed to observe, it was discovered that it could not operate as a going concern without the direction of a governing committee, known as the concert of Europe, whose main business it has ever been to preserve what is called the "balance of power." The theory that the equality and legal rights of the greatest and smallest states are identical has never been carried out in practice. Such rights and such equality have always been subject to the irresistible power vested by the higher or conventional law in a committee composed of the representatives of a few of the greater states acting in behalf of the whole. Down to the Great War nothing was better understood in European diplomacy than the fact that a primacy or overlordship was vested in the concert composed at last of Great Britain, France, Germany, Russia, and Austria, a combination into which Italy was admitted in 1867. That primacy or overlordship gradually developed outside of the written treaty law since the peace of Westphalia represented the common superior who actually succeeded to the place made vacant by the collapse of the holy Roman Empire as an international power.

ENTRY OF THE UNITED STATES INTO THE FAMILY OF NATIONS.

Only in the light of such a preface is it possible to understand the conditions under which our infant Republic, situated upon the eastern shores of the mainland of the Western Hemisphere, became a member of the family of nations whose habitat was and is in the western section of the Eastern Hemisphere. By the mighty ocean dividing the Old World from the New the entire after history has been profoundly impressed. Before the close of the American Revolution the Congress of the United States, which under the Articles of Confederation possessed jurisdiction over all questions arising under the law of nations, in its ordinance of December 4, 1781, concerning maritime captures, professed obedience to that law "according to the general usages of Europe"; and by the terms of the second Federal Constitution of 1789 treaties were made the supreme law of the land, binding the Nation as a whole and all subordinate authorities and judges of every State.

AMERICA'S CONTRIBUTION TO THE LAW OF NEUTRALITY.

All who study the growth of law in a scientific way understand that physical geography is ever a prime factor in the history of its development. Out of the isolated position assigned us by physical geography have arisen our contributions to the law of neutrality. That law, incompatible with the theory of the medieval empire, and which supplied no rule as to neutral duty in the sixteenth century, had made so little progress by the end of the first quarter of the seventeenth that it may be said not to have advanced up to that time beyond the stage of theory.

In the words of the English publicist, Hall: "In 1627 the English captured a French ship in Dutch waters; in 1631 the Spaniards attacked the Dutch in a Dutch port; in 1639 the Dutch were in turn the aggressors, and attacked the Spanish fleet in English waters; again in 1666 they captured English vessels in the Elbe, and in spite of the remonstrance of Hamburg and of several other German States did not restore them; in 1664 an English fleet endeavored to seize the Dutch East India squadron in the harbor of Bergen, but were beaten off with the help of the forts; finally, in 1693, the French attempted to cut some Dutch ships out of Lisbon, and on being prevented by the guns of the place from carrying them off, burnt them in the river." In 1793 the French frigate *Modeste* was captured in the harbor of Genoa by two English men-of-war, and it was neither restored nor was an apology made for the violation of Genoese neutrality.

In the very year in which Genoese neutrality was thus ruthlessly violated by the greatest of sea powers an infant Republic, with an interest and ambition to be a sea power, resolved to bring about a revolution by adding a new chapter on neutrality to the law of nations. The war then raging between Great Britain and revolutionary France opened up an enticing opportunity to the famous clipper ships of New England which President Washington, guided by the diplomatic hand of Jefferson, promptly improved by the issuance of his epoch-making neutrality proclamation of April 22, 1793. In that pronouncement the Government of the United States undertook to define what it considered to be the obligations then incumbent upon neutrals, representing by far the most advanced existing opinions as to what those obligations really were. And in some particulars it went even further than authoritative international custom has up to the present time advanced.

When the French minister, Genet, attempted to violate the neutrality of the United States, as thus defined, President Washington insisted upon his recall; and at a later day far graver consequences resulted to Napoleon, whose fall was brought about through his invasion of Russia, a desperate enterprise into which he was driven at last by the refusal of Alexander I to uphold his oppressive "continental system" of blockade through the exclusion from Russian ports of the neu-

tral flag of the American merchant marine. Thus it has been said that it was the prows of the clipper ships of New England that caused the imposing fabric of Napoleonic statecraft and diplomacy to collapse like a house of cards in 1812, 1813, and 1814. And to the same source may be traced the War of 1812 that grew out of the assertion upon the part of Great Britain of a claim of visitation and search entirely incompatible with the neutrality code proclaimed by Washington in 1793.

ORIGIN AND GROWTH OF THE MONROE DOCTRINE.

Just as the physiography of North America preordained the new American doctrine of neutrality, it preordained what is generally known as the Monroe doctrine. The two new chapters thus introduced into the modern law of nations were drafted by the same statesman—Thomas Jefferson. As Europe, Asia, and Africa are confined within the limits of the Eastern Hemisphere, it is not strange that one great central and powerful State should have established its hegemony or overlordship over the western. The beginnings of that overlordship were prompted directly by the action of Great Britain, eager to secure to herself the permanent possession of certain commercial interests in Latin American trade which she had taken during the Napoleonic wars from a continental rival. All of the European nations that planted colonies in the New World regarded them simply as plantations whose trade was the absolute possession of the mother State. Therefore with the rich and fruitful plantations founded by Spain in this hemisphere Great Britain had no right to trade so long as they were subject to the political sovereignty of their mother country. Not until after that sovereignty had been repudiated, not until after the Spanish colonies in America had established their independence, was Great Britain able to rush in and add that new domain to her everwidening commercial empire.

In the summer of 1823, after that rich prize had been thus secured, the Holy Alliance notified Great Britain that so soon as France should complete the overthrow of the revolutionary government of Spain a congress would be called for the purpose of terminating the revolutionary governments of South America. In order to defeat that design, fatal to the interests of the British merchants who had built up a great trade with Spain's revolted colonies as independent communities, Canning, who had succeeded Castlereagh, began to correspond with Mr. Rush, the American minister at London, as to the advantages of a joint declaration by Great Britain and the United States against the threat of the alliance to extend its interference to Spain's relations with her colonies in this hemisphere. With consummate art, perhaps unnecessary, Canning suggested that nothing could be a greater indignity to this Republic than the overthrow, by a combination of European monarchs, of the group of revolutionary governments whose right to independence rested upon the same foundation as our own. And he added that if the United States should determine to resist such an aggression every man in the British Army and every ship in the British Army would be at our disposal.

After Mr. Rush had forwarded this momentous correspondence to President Monroe, he did not waste a moment in placing it for action in the hands of the lonely old statesman at Monticello who for 24 years was really President of the United States. In assuming a task which Monroe admitted was entirely beyond his abilities, Jefferson, in his famous letter of October 24, 1823, deemed it proper to say to him: "The question presented by the letters you have sent me is the most momentous which has been offered to my contemplation since that of independence. That made up a nation; this sets our compass and points the course which we are to steer through the ocean of time opening on us. And never could we embark upon it under circumstances more auspicious. Our first and fundamental maxim should be never to entangle ourselves in the broils of Europe; our second, never to suffer Europe to intermeddle with cis-Atlantic affairs. America, North and South, has a set of interests distinct from those of Europe and peculiarly her own. She should, therefore, have a system of her own, separate and apart from that of Europe."

He then proceeded to say: "One nation, most of all, could disturb us in this pursuit; she now offers to lead, aid, and accompany us in it. By acceding to her proposition we detach her from the bands, bring her mighty weight into the scale of free government, and emancipate a continent at one stroke, which might otherwise linger in doubt and difficulty. Great Britain is the nation which can do us the most harm of any one or all on earth, and with her on our side we need not fear the whole world. With her, then, we should most sedulously cherish a cordial friendship, and nothing would tend more to knit our affections than to be fighting once more side by side in the same cause. * * * But we have first to ask ourselves a question. Do we wish to acquire to our confederacy any one or more of the Spanish Provinces? I cordially confess that I have ever looked on Cuba as the most interesting addition which could ever be made to our system of States. The control which, with Florida Point, this island would give us over the Gulf of Mexico and the countries and isthmus bordering on it, as well as those whose waters flow into it, would fill up the measure of our political well-being."

After the epoch-making letter to President Monroe had been completed, it was cordially approved by ex-President Madison, who was near at hand at Montpellier, and also by Calhoun, then Secretary of War, who declared that he believed that the alliance "had an ultimate eye on us; that they would, if not resisted, subdue South America. * * * Violent parties would arise in this country, one for and one against them, and we should have to fight upon our own shores for our institutions." The new American system as thus outlined by Jefferson, primarily for the protection of American institutions against European interference, passed to the Congress of the United States through President Monroe as a conduit, and in passing took his name. In his seventh annual message, delivered December 2, 1823, he said that "in the wars of the European powers, in matters relating to themselves, we have never taken any part, nor does it comport with our policy to do so. It is only when our rights are involved or seriously menaced that we resent injuries or make preparations for our defense. With the movements in this hemisphere we are of necessity more immediately connected, and by causes which must be obvious to all enlightened and impartial observers. The political system of the allied powers is essentially different in this respect from that of America. * * * We owe it, therefore, to candor and to the amicable relations existing between the United States and those powers to declare that we should consider any attempt on their part to extend their system to any portion of this hemisphere as dangerous to our peace and safety."

PURELY A CREATION OF EXECUTIVE POWER.

Such was the beginning of the new and unique chapter in the law of nations, called the Monroe doctrine, which has been written into it by the pens of American Presidents and Secretaries of State—it is purely a creation of Executive power. And like every other institution that has been the result of growth, it did not attain its full stature in a night; it did not spring into life fully armed. Its present dimensions are the result of a century of persistent and progressive development. Pending the controversy with Great Britain as to the Oregon Territory, and in the face of possible intervention by European powers on account of the annexation of Texas, President Polk, in his message of December 2, 1845, greatly widened the protest of President Monroe against future colonization by any European powers when he said that "it should be distinctly announced to the world as our settled policy that no future European colony or dominion shall, with our consent, be planted or established on any part of the North American Continent." And when in 1865 it became necessary for the United States to terminate the intervention of France in the internal affairs of Mexico, notice was then given that friendship with that country must cease, "unless France could deem it consistent with her interest and honor to desist from the prosecution of armed intervention in Mexico to overthrow the domestic republican government existing there, and to establish upon its ruins the foreign monarchy which has been attempted to be inaugurated in the capital of that country." More complete expression was given to the aspirations of the United States on this subject by Mr. Fish when in his report of July 14, 1870, to President Grant he said: "This policy is not a policy of aggression, but it opposes the creation of European dominion on American soil or its transfer to other European powers, and it looks hopefully to the time when, by the voluntary departure of European governments from this continent and the adjacent islands America shall be wholly American."

OUR SUPREME ARBITRATING POWER IN THIS HEMISPHERE FIRST DEFINED IN VENEZUELAN CASE.

Not, however, until the opportunity was given by the boundary controversy between Great Britain and Venezuela was the inevitable declaration finally made that the same reasons that impel the concert of Europe to guard the balance of power in the Old World prompt the Government of the United States to maintain its primacy in the new. In the words of President Cleveland, who first gave to the Monroe doctrine complete and scientific definition, "If the balance of power is justly a cause for jealous anxiety among the governments of the Old World and a subject for our own absolute noninterference, none the less is an observance of the Monroe doctrine of vital concern to our people and their Government."

To that a great Secretary of State, Richard Olney, added: "To-day the United States is practically sovereign on this continent and its fiat is law upon the subjects to which it confines its interpositions." Thus, in a clear and consistent form, was finally reached the conclusion that the same supreme directing and arbitrating power, which in the Old World is vested in the concert of Europe, is in the new vested in the Government of the United States acting alone. In the words of a distinguished English publicist, T. J. Lawrence: "The supremacy of a committee of States and the supremacy of a single State can not be exercised in the same manner. What in Europe is done after long and tedious negotiations and much discussion between representatives of no less than six countries can be done in America by the discussion of one Cabinet discussing in secret at Washington." When the Government of Great Britain justly and wisely conceded the right of arbitration thus asserted by the United States, solely by virtue of its primacy or overlordship in the New World, a final settlement was made of the place of this Republic in the family of nations.

EXTENSION OF MONROE DOCTRINE TO PACIFIC WORLD.

Almost at the outset of his famous message of December 2, 1823, President Monroe, prompted by a controversy then pending as to unsettled boundaries in the Northwest that grew out of a ukase issued by the Czar of Russia in September, 1821, in which he had asserted exclusive territorial rights from the extreme northern limit of the continent to the fifty-first parallel of north latitude, had undertaken to extend the new American system as outlined by Jefferson to the Pacific world. Against the ukase of the Czar, proposing a territorial establishment on the northwest coast of this continent, President Monroe had presented substantially the same protest he had made against the intervention of the Holy Alliance in the affairs of South America. When Russia proposed an amicable settlement of the matter John Quincy Adams, then Secretary of State, said to the Russian minister at a conference held on July 17, 1823, "That we should contest the right of Russia to any territorial establishment on this continent, and that we should assume distinctly the principle that the American continents are no longer subjects for any new colonial establishments." On July 2 Mr. Adams had written to Mr. Rush, our minister at London, that a "necessary consequence of this state of things will be that the American continent henceforth will no longer be subject to colonization. Occupied by civilized nations, they will be accessible to Europeans and each other on that footing alone; and the Pacific Ocean, in every part of it, will remain open to the navigation of all nations in like manner with the Atlantic."

THE PACIFIC WORLD AS IT WAS LESS THAN A CENTURY AGO.

When we include within it that part of our own domain which lies west of the Mississippi, it is hard either to grasp or to portray the vast transformation that has taken place in the Pacific world during the last 75 years. As late as 1850 the great territory stretching from the Mississippi to the Pacific was still almost an unknown land; in that year there was no railroad track (excepting 80 miles in Louisiana) or telegraph line west of the Mississippi, in the United States; nor in any of the other countries in or surrounding the Pacific. As late as 1860 there were only 23 miles of railroad west of the Rocky Mountains, and not until 1861 did the first telegraph line from the East reach the Pacific, in many parts of which steamships were still a curiosity. Not until 1867 was a regular steamship service established between San Francisco and the Atlantic coast; and not until 1870 was steam communication established between San Francisco and Australia. As late as 1852 the only States west of the Mississippi were Louisiana, Arkansas, Texas, Missouri, and California, the last named a string of mining camps which had just entered the Union with a population of little over 90,000.

The Pacific States of South America, Central America, and Mexico, which had emerged successfully from their wars of independence with Spain, were still hampered with internal dissensions and traditionally incompetent commercial methods inherited from the old Spanish colonial system; Hawaii was known chiefly as a supply station for the whaling fleet owned almost exclusively in New England; New Caledonia, New Guinea, Samoa, the Fijis, and the other islands composing "no man's land," were still under the almost absolute sway of savages and cannibals, while the Australian colonies were just beginning to give a suggestion of the wealth, commerce, and development they have since achieved; China had but recently been forced at the cannon's mouth reluctantly to open a few of her ports to foreign commerce; from the "sealed mystery," known as Japan, foreigners were rigorously excluded, it being a capital offense for any native to leave the country; not until 1857–58 were the ports of Kanagwa, Nagasaki, and Hakodadi opened to foreigners; British Columbia, then an obscure British colony, remained so until the completion of the Canadian Pacific Railroad; Alaska, destined to become one of the brightest jewels in our crown, and the Siberian coast of Asia, still remained in the undisturbed possession of the seal and the Eskimo, save when the awful solitude was broken by a few adventurous traders who came to purchase furs in exchange for firewater and trinkets.

In the light of what has gone before it will be possible to visualize, to some extent at least, the vast and growing greatness of the Pacific world as it appeared to William H. Seward, when, from his place in the United States Senate, he looked out upon it with a prophetic eye in July, 1852. While debating at that time a bill providing for the "Survey of the whaling grounds and routes of commerce on the Pacific," he said: "Even the discovery of this continent and its islands, and the organization of society and government upon them, grand and important as those events have been, were but conditional, preliminary, and ancillary to the more sublime result, now in the act of consummation—the reunion of two civilizations, which, having parted on the plains of Asia 4,000 years ago, and having traveled ever afterwards in opposite directions around the world, now meet again on the coasts and islands of the Pacific Ocean. Certainly no mere human event of equal dignity and importance has ever occurred upon the earth. It will be followed by the equalization of the condition of society and the restoration of the unity of the human family. * * * As to those who can not see how this movement will improve the condition of Asia, I leave them to reflect upon the improvements in the condition of Europe since the discovery and colonization of America. Who does not see, then, that every year hereafter, European commerce, European politics, European thoughts, and European activity, although actually gaining greater force, and European connections, although actually becoming more intimate, will, nevertheless, ultimately sink in importance, while the Pacific Ocean, its shores, its islands, and the vast regions beyond will become the chief theater of events in the world's great hereafter."

Fifteen years after this prophet-statesman had thus forecasted the inevitable aftergrowth of the Pacific world he made our stake in it vastly larger when, as Secretary of State, he purchased in 1867 from Russia, for a song, the princely domain of Alaska, one-third greater in size than the Atlantic States from Maine to Florida. After the purchase we stood out for all that Russia had claimed in 1822–1825, but such claims were overruled by the international tribunal that sat at Paris in 1893, which held that Bering Sea, as a part of the high seas, was no one's preserve; that the seals, feræ naturæ, were no one's property. As with the growth of the American Navy there was an increasing need of coaling stations and positions advantageous to our sea power in the Pacific, by a tripartite treaty made in 1889 the Samoan Islands were placed under the joint control of the United States, England, and Germany, and in 1898 the Hawaiian Islands were annexed.

THE SPANISH-AMERICAN WAR AND THE TREATY OF DECEMBER 10, 1898.

The commercial importance of Cuba, its commanding position with reference to the Gulf of Mexico, and the approaches to the Panama Canal, its menace as a breeding ground for yellow fever, had made it for a long time an important factor in the foreign policy of the United States. Jefferson, who said that "the control which, with Florida, this island would give us over the Gulf of Mexico and the countries and isthmus bordering on it, as well as all those whose waters flow into it, would fill up the measure of our political well being," had declared that if Spain relinquished it it must not fall into the hands of another European power. American intervention, which for many years had been imminent, because inevitable in the course of the revolt which broke out in 1895, involving as it did grave commercial injury to the United States.

The war which followed President McKinley's intervention was terminated by the treaty of Paris in December, 1898, under which Porto Rico, Guam, and the Philippines were for a certain consideration ceded outright to the United States. By that large acquisition in the Pacific we became immediately involved in the diplomatic situation created by the efforts of certain European nations to divide China into spheres of influence or of actual possession. That policy, to which our new position in the Philippines, as well as our interests in China's trade, made us hostile, drew from Secretary of State Hay his best efforts as a diplomatist and statesman. In order to preserve the integrity of China and the "open door" for trade, he drew such replies from the aggressive nations as compelled them to

moderate their demands; and when the Boxer insurrection broke out in 1900, and the legations were besieged at Peking, it was largely through his efforts that China received a less rigorous treatment.

THE GREAT WAR AND THE MEANING OF OUR REJECTION OF THE TREATY OF VERSAILLES.

Such, in general terms, was the nature of our diplomatic relations with the Atlantic world, the Pacific world, and the rapidly growing Latin American world to the south of us when the earthquake, known as the Great War, began to shake the earth as a whole. No attempt will be made herein to discuss either the abnormal and temporary conditions produced by the Great War in the internal policy of the United States, or the abnormal and temporary conditions produced by the Great War in the foreign relations of the United States. Suffice it to say that at its close the American people, true to their conservative instincts, were mastered and overcome by the desire to return to what President Harding has been pleased to call "normalcy." Everybody, the romantic as well as the practical, understood that we had been suddenly swept, in a moment of great excitement, into an unprecedented adventure whose costs had been stupendous, and whose unsettling influences had been profound. There was therefore a universal desire to return as quickly as possible to "normalcy"; that is, to the old systems of policy, internal and external, which had made us happy and great.

The most startling outcome of that Great War with which we were first brought face to face was embodied in the fact that the old European diplomatic system, based upon the balance of power as a fundamental concept, was a total wreck. By the elimination of Germany, Austria, and Russia the concert of Europe, which had existed in various forms since the peace of Westphalia had been forced to yield to a new Holy Alliance, composed, as its predecessor had been, of only three European powers—Great Britain, France, and Italy. That triumphant combination proposed to reorganize the diplomatic system not only of Europe but of the world by reviving the old idea of a League of Nations, first formulated by St. Pierre in 1713, and then revised by Bentham in 1786–1789 and by Immanuel Kant in 1795. That long-discarded scheme was made the basis in 1911 of Dr. Timothy Richards' "League of Nations to Enforce Peace with Arms," elaborated by Viscount Grey in 1918 and completed by Lord Robert Cecil in 1919.

THE SUPERSTATE WHICH AMERICAN PEOPLE REJECTED BY A POPULAR MAJORITY OF 7,000,000.

The builders of the superstate first designed by St. Pierre in 1713 and completed by Lord Cecil in 1919, began by denying absolutely that physical geography is the primary basis of the world's politics and diplomacy. After eliminating the mighty oceans by which the hemispheres are divided from each other, the builders of the new fabric saw in their mind's eye all of the nations of the earth, great and small, huddled together in a narrow area as the Greek States were huddled together in the days of Thucydides and Polibius. Under such conditions it was hoped that the old pride of nationality, which has ever been the mainspring of patriotism, would be greatly weakened if not extinguished. Under such conditions it was certain that our peculiar American system, our Gibraltar known as the Monroe doctrine, would never again be permitted to plague the world. In the great superstate the American commonwealth was to be submerged; it was curtly asked to bow its head and vote along with Canada, Australia, and the other British colonies. For a moment the American people were stunned by the immensity of the indignity thus offered them; and in that moment they stooped to consider whether such a condition of servitude would be tolerable, if mitigated by certain reservations. Then it was that the national conscience awoke; then it was that the reaction came like the thunderclap at Marengo. During the storm that ensued President Harding was swept into power upon a tidal wave of 7,000,000 popular majority.

But the battle is not over; the end is not yet. Governor Cox, the defeated candidate for President in 1920, is now giving public notice that the fight is to be fought over again. He says that the American Commonwealth must abdicate the proud and commanding place in the family of nations which fortune and our own efforts have given us; he says that it must inevitably bow its head and pass beneath the yoke which the League of Nations has prepared for us. He even contends that we must, in any event, accept the permanent court of international justice, set up and controlled by the league, which is to be armed with a coercive jurisdiction which would enable European judges to annihilate those international rights which are especially dear to us. So long as we are menaced by such threats every patriotic American must sleep with arms in his hands.

OUR NORMAL DIPLOMATIC RELATIONS WITH EUROPE AND ASIA RESUMED.

The results of the last presidential election made it plain, even to the man in the street, first, that the American people have irrevocably resolved not to become a member of the new political and diplomatic fabric devised for the government of Europe and known as the League of Nations; second, that they have resolved to resume their normal diplomatic relations with Europe and Asia with the Monroe doctrine intact in all its parts. Such resolves do not imply, however, that we are to become a hermit nation, or that we are to shirk any of the vast responsibilities that manifest destiny has cast upon us. We could not, if we would, eliminate the fact that nature has placed us midway between Europe and Asia in a vast and fruitful land which stands out like a fortress guarded against both by two inviolate oceans which make a successful attack from either impossible. With ever-increasing and intimate relations with Europe and Asia, seething with tumults and difficulties that invite the interposition of a neutral and independent friend, the American Commonwealth would fail in its duties to both and humanity if, at this turning point in the world's history, it should fail to assert its full arbitrating power.

PRESIDENT HARDING'S EPOCH-MAKING OFFER TO ARBITRATE BETWEEN EUROPE AND ASIA.

With a great jurist and statesman at his side as Secretary of State, President Harding resolved, in the summer of 1921, to embark upon an uncharted sea by inviting Europe and Asia to arbitrate certain grave questions affecting both in the first international conference ever held on the soil of the New World. At a later day the President made it clear that he was moved to action by the possibility of wars in the near future in the Pacific that might arise out of a conflict of principles and policies to be followed by certain great powers in their relationship with China. Our interest in the matter, he said, grows out of "our traditional friendship for the ancient empire, our continued friendship for the new Republic, our commitment of more than 20 years to the open door, and our avowed concern for Chinese integrity and unimpaired sovereignty." That China and her problems embodied the question of questions to be settled was made plain by the formal invitation of the President sent by the Secretary of State on August 11, 1921, in these terms: "The President invites the Government of the Republic of China to participate in the discussion of Pacific and far eastern questions, in connection with the conference on the subject of limitation of armament, to be held in Washington on the 11th day of November, 1921.

In order to induce the three leading European powers and Japan to enter more heartily into the conference the President wisely coupled with his basic idea a proposal for the limitation of armament, whose ever-increasing cost is a universal burden. In the formal invitation sent to Great Britain, France, Italy, and Japan, on August 11, 1921, this language is used: "The President is deeply gratified at the cordial response to his suggestion that there should be a conference on the subject of limitation of armament, in connection with which Pacific and far eastern questions should also be discussed. Productive labor is staggering under an economic burden too heavy to be borne unless the present vast public expenditures are greatly reduced." On October 4, 1921, invitations in that form were sent to Belgium, the Netherlands, and Portugal, with this addition: "It is the earnest wish of this Government that with the facilities afforded by a conference it may be possible to find a solution of Pacific and far eastern problems by a practical effort to reach such common understandings with respect to matters which have been and are of international concern as may serve to promote enduring friendship among our peoples."

CONFERENCE OPENED BY ADDRESSES FROM PRESIDENT AND SECRETARY OF STATE.

After the conference had assembled in the city of Washington on November 12, with a full attendance of the delegations from the United States, Great Britain, France, Italy, Japan, China, Holland, Belgium, and Portugal, the President made an address in which he said:

"Speaking as official sponsor for the invitation, I think I may say the call is not of the United States of America alone; it is rather the spoken word of a war-wearied world, struggling for restoration, hungering and thirsting for better relationship; of humanity crying for relief and craving assurances of lasting peace. * * * A world staggering with debt needs its burden lifted. Humanity, which has been shocked by wanton destruction, would minimize the agencies of that destruction. Contemplating the measureless cost of war and the continuing burden of armament, all thoughtful peoples wish for real limi-

tation of armament and would like war outlawed. * * * Gentlemen of the conference, the United States welcomes you with unselfish hands. We harbor no fears; we have no sordid ends to serve; we suspect no enemy; we contemplate or apprehend no conquest. Content with what we have, we seek nothing which is another's. We only wish to do with you that finer, nobler thing which no nation can do alone."

After Secretary of State Hughes had been chosen permanent chairman, he began his address, the first part of which gave but little indication of what was to come. Following an explanation why the invitation to the armaments discussion had been limited to the five allied and associated powers, while China, Holland, Belgium, and Portugal had been invited to discuss far eastern questions, came the statement that the two subjects would be considered simultaneously so far as practicable. Then, after emphasizing the fact that the present moment was opportune because the power to disarm the world lay in the hands of comparatively few nations, the speaker startled his audience by this declaration:

"It would seem to be a vital part of a plan for the limitation of naval armament that there should be a naval holiday. It is proposed that for a period of not less than 10 years there should be no further construction of capital ships. I am happy to say that I am at liberty to go beyond these general propositions, and, on behalf of the American delegation, acting under instructions of the President of the United States, to submit to you a concrete proposition for an agreement for the limitation of naval armament. Four general principles have been applied:

"1. That all capital-ship building programs, either actual or projected, should be abandoned.

"2. That further reduction should be made through the scrapping of certain of the older ships.

"3. That, in general, regard should be had to the existing naval strength of the powers concerned.

"4. That the capital-ship tonnage should be used as the measurement of strength for navies, and a proportionate allowance of auxiliary combatant craft prescribed."

The end of one epoch and the beginning of another was marked by the approval and acceptance by the Governments concerned of the bold and concrete American proposals thus put forward ere they had ceased to echo around the world.

PRESIDENT'S PATRIOTIC WISDOM IN APPOINTING SENATORS LODGE AND UNDERWOOD AS DELEGATES.

Despite certain constitutional difficulties, which should not be entirely ignored, the President, in view of the epoch-making work in which the conference was to engage, manifested patriotic wisdom in selecting the majority and minority leaders of the Senate as delegates. Certainly it was of paramount importance that in the first international conference in which the American people were to exercise their arbitrating power in the family of nations its representation should be, in the highest sense of the term, American and national, and not sectional or partisan. It was eminently proper that the North and the South, now irrevocably united in the bonds of a mutual love, a mutual interest, and a mutual honor, should have been represented by a Republican from Massachusetts and a Democrat from Alabama. Par nobile fratrum. As no practical result could have been reached without the approval of the Senate, the President was wise in taking into his confidence the leaders of the two great parties who compose it. In asking the Senate's approval of the completed work of the conference the President said:

"I had occasion to learn of your very proper jealousy of the Senate's part in contracting foreign relationships. Frankly it was in my mind when I asked representatives of both the majority and minority to serve on the American delegation. It was designed to have you participate. And you were ably represented. We have no rivalries in our devotion to things we call American because that is a common consecration."

THE SIX TREATIES IN WHICH THE WORK OF THE CONFERENCE WAS EMBODIED.

The completed work of the conference was embodied in six treaties with the following titles:

(1) A treaty between the United States of America, the British Empire, France, Italy, and Japan with respect to the limitation of naval armament.

(2) A treaty between the same powers in relation to the use of submarines and noxious gases in warfare.

(3) A treaty between the United States of America, the British Empire, France, and Japan relating to their insular possessions and insular dominions in the Pacific Ocean. An explanatory declaration accompanies this treaty.

(4) A treaty between the same powers supplementary to the above-mentioned treaty in relation to insular possessions and insular dominions in the Pacific Ocean.

(5) A treaty between the United States of America, Belgium, British Empire, China, France, Italy, Japan, the Netherlands, and Portugal relating to policies in matters concerning China.

(6) A treaty between the same nine powers relating to the Chinese customs tariff.

All of the above-mentioned treaties were signed on February 6, 1922, with the exception of the treaty between the United States of America, the British Empire, France, and Japan relating to their insular possessions and insular dominions in the Pacific Ocean, which was signed on December 13, 1921.

Why was that treaty, generally known as the "four-power pact," signed nearly two months in advance of the five that followed it? Until that question of questions has been answered, it is impossible to grasp the real meaning of the proceedings of the conference viewed as a connected whole.

EARLY ADOPTION OF FOUR-POWER PACT MADE POSSIBLE THE SUCCESS OF THE CONFERENCE.

Everybody understood that the primary purpose of the conference was to arrive at such "a common understanding with respect to principles and policies in the Far East," or, in other words, to make such sacrifices and to arrive at such rearrangements as would so reduce the possibilities of war in that quarter as to justify the great powers in limiting their armaments without jeopardizing themselves or those dependent on them. Or, to state the matter in a still narrower compass, unless some way could be found, in advance, by which the probabilities of war in the Far East could be materially reduced there was no chance whatever of inducing the great powers specially concerned to make any reduction in their armaments. The vital far eastern question most likely to cause war was embodied, of course, in the grievances which China had suffered through a military weakness that had resulted in her being stripped of her chief seaports, in "spheres of influence" being established in her richest Provinces, in the extortion of monopolies for building railroads and exploiting her coal and iron ores, and in the subjection of the administration of her post offices, her customs duties, and to a considerable extent even the administration of justice itself to foreign control. In order to rescue China from such conditions, threatening little less than complete dismemberment of the country, it was necessary that certain powers represented in the conference should undertake radical action.

What was actually done, with the avowed purpose of removing the causes of war in the Far East, was embodied in the four-power treaty, supplemented by the other treaties, especially the two between the nine powers relating to policies in matters concerning China and the Chinese customs tariff. The four-power treaty itself, which, with the formal parts eliminated, contains but little more than 200 words, rests upon the basic assurance that "the high contracting parties agree as between themselves to respect their rights in relation to their insular possessions and insular dominions in the region of the Pacific Ocean," an assurance which simply reaffirms the primary principles of international law. In the two supplementary treaties relating to China the nine powers express a purpose "to adopt a policy designed to stabilize conditions in the Far East, to safeguard the rights and interests of China, and to promote intercourse between China and the other powers upon the basis of equality of opportunity." The contracting powers, other than China, then agree, "(1) to respect the sovereignty, the independence, and the territorial and administrative integrity of China; (2) to provide the fullest and most unembarrassed opportunity to China to develop and maintain for herself an effective and stable government." Strong declarations were then made in favor "of the open door or equality of opportunity in China for the trade and industry of all nations," and in favor of increasing the revenues of the Government of China through the making of a treaty providing for "the revision of the Chinese customs tariff and cognate matters."

BRILLIANT SUCCESS OF THE HUGHES PLAN FOR REDUCTION OF ARMAMENT.

Only in the light of the foregoing is it possible to understand that not until after the adoption of the four-power treaty, supplemented as it was by the special agreements designed to remove the causes of future wars as to China, did the Hughes plan for the reduction of armament have any chance of success whatever. That fact is put beyond all question by the report of the American delegation submitted to the President February 9, 1922, in which it is said that "competitive armament, however, is the result of a state of mind in which a

national expectation of attack by some other country causes preparation to meet the attack. To stop competition it is necessary to deal with the state of mind from which it results. The negotiations which led to the four-power treaty were the process of attaining that new state of mind, and the four-power treaty itself was the expression of that new state of mind. It terminated the Anglo-Japanese alliance and substituted friendly conference in place of war as the first reaction from any controversies which might arise in the region of the Pacific; it would not have been possible except as part of a plan including a limitation and a reduction of naval armaments, but that limitation and reduction would not have been possible without the new relations established by the four-power treaty or something equivalent to it."

Thus we know for certain that not until the hope of peace in the Far East had been assured in advance by the four-power treaty was it possible for the bold and self-denying Hughes plan to be driven on to victory. But before that end was reached that plan had passed through a crisis to which a brief reference must be made. At the very outset its author cut off all debate as to the size of a navy each nation was theoretically entitled to by assuming that all calculations must be based on actual navies as they existed on the day of meeting, November 12. That basis gave to Japan a navy whose strength was as 6 compared to 10 for Great Britain and 10 for the United States. Against that ratio of "10-10-6," or its equivalent "5-5-3," Japan protested. But after a struggle, in which Great Britain and the United States stood side by side, Japan yielded, with the proviso that she should be permitted to retain, for sentimental reasons, her brand-new 38,800-ton *Mutsu*, while earmarking her 20,800-ton *Settsu* for the scrap heap. That concession was the only change made at any time in the Hughes plan as to capital ships. He had proposed that the United States should join with Great Britain and Japan in destroying or suspending the building of nearly 2,000,000 tons of capital ships, more than half of the combined capital-ship tonnage of their existing navies. As that plan was carried out without material change, it may be said, in the words of an able critic, that "Mr. Hughes may claim to have destroyed more warships in tonnage than all the sea fighters from Themistocles to the German and British admirals in the Jutland fight."

It is hard to overestimate the grandeur of the achievement. When we pause to meditate upon the far-reaching effects of an international agreement, suddenly made, under which the three greatest of the world's sea powers are to eliminate, by destruction or suspension of building, more than half of the combined capital-ship tonnage of their existing navies, it is hard not to be mastered and overcome by the grandeur of the achievement. Who can measure its effects upon the world's great hereafter? What patriotic American, no matter what his party politics, will be so narrow-hearted as to deny to the President and Secretary of State the praise due to them for an achievement which in the time to come must be viewed as the crowning triumph of American diplomacy? The importance of such an act can not be estimated as an isolated event; it can not be severed from the century and a half of progressive diplomatic history out of which it has been evolved and of which it is a fitting consummation.

NO UNWORTHY PRICE PAID FOR WHAT HAS BEEN ACHIEVED.

Every form of democratic government necessarily implies an "opposition," whose never-ending duty it is to present for public condemnation every measure of the ruling majority to which even plausible objections can be made. After exhausting their efforts to find even plausible objections to the outcome of the Limitation of Armament Conference its critics have been able only to intimate, rather than assert directly, that the price of it all has been the making of an entangling alliance with three European powers entirely at variance with the national tradition.

Devoted as the writer has always been to that part of our policy first defined by Washington, by whom all such alliances were so justly condemned, devoted as he has always been to our peculiar American system known as the Monroe doctrine, which must survive so long as this Republic endures, he would be the first to condemn, in no uncertain terms, the outcome of the conference if any such crime could be laid at its door. The fact is there is no basis whatever for the charge that has been made; it loses even the semblance of plausibility the moment we pause to consider the nature of an "alliance" as defined by international law.

AN "ALLIANCE" AS DEFINED BY INTERNATIONAL LAW.

Naturally enough "alliances" are defined with the greatest fullness by Vattel (bk. 3, ch. 6), the famous Swiss publicist, whose treatise on the law of nations appeared in 1758 at a time when alliances, "offensive and defensive," were leading factors in European diplomacy. It was to such military alliances as Vattel defines that Washington and Jefferson were specially opposed. The Cyclopedic Law Dictionary has thus condensed the views of Vattel into a narrow compass: "Alliances are defensive or offensive. (1) Defensive alliances are those in which a nation agrees to defend her ally in case she is attacked. (2) Offensive alliances are those in which nations unite for the purpose of making at attack, or jointly waging war against another nation. Alliances may be at the same time offensive and defensive; and most offensive alliances are of this character." According to Grotius (II, ch. 15, sec. 13) and other text writers, the casus foederis of a defensive alliance does not arise in the case of an unjust war of aggression begun by the power who has only stipulated for aid in another contingency. The difficulty in such cases is to determine what constitutes a just or defensive war, since certain wars, offensive in form, are actually defensive both in spirit and substance.

As it thus appears that there can be no such thing as an "alliance," as that term is understood in international law, unless the contracting nations agree generally to cooperate in hostilities against some power specially named, or against any power with whom the other party may become involved in actual war, it is only necessary to place side by side, with the foregoing definitions, the four-power treaty (no other has been accused) in order to expose the utter emptiness of the charge that has been made against it. The very brief terms of that treaty (about 200 words) are as follows:

I.

"The high contracting parties agree as between themselves to respect their rights in relation to their insular possessions and insular dominions in the region of the Pacific Ocean.

"If there should develop between any of the high contracting parties a controversy arising out of any Pacific question and involving their rights which is not satisfactorily settled by diplomacy and is likely to affect the harmonious accord now happily subsisting between them, they shall invite the other high contracting parties to a joint conference to which the whole subject will be referred for consideration and adjustment.

II.

If the said rights are threatened by the aggressive action of any other power the high contracting parties shall communicate with one another fully and frankly in order to arrive at an understanding as to the most efficient measures to be taken, jointly or separately, to meet the exigencies of the particular situation."

THE BRANDEGEE INTERPRETATION CLAUSE.

Those who are bold enough to charge that the four-power treaty embodies an "alliance," entangling or otherwise, are frank enough to admit that no trace whatever of such a thing can be found in its terms. Their contention is that an alliance may be *inferred*, that it may be tortured out of the terms used by implication. As one of the most acute and distinguished of its opponents has expressed it: "It is said that there is no military force lurking anywhere in and about this treaty. I grant you that in the language itself it is not provided for." In order to prevent any such method of interpretation, whereby a meaning may be extorted from a treaty which its language does not express, international law long ago invented what is known as an "interpretation clause." In this case we have such a clause carefully embodied in the Brandegee resolution, which reads as follows: "*Resolved* (*two-thirds of the Senators present concurring*), That the Senate advise and consent to the ratification of Executive N, Sixty-seventh Congress, second session, a treaty between the United States, the British Empire, France, and Japan, relating to their insular possessions and insular dominions in the Pacific Ocean, concluded at Washington December 13, 1921, subject to the following reservation and understanding which is hereby made a part and condition of this resolution of ratification: The United States understands that under the statement in the preamble or under the terms of this treaty there is no commitment to armed force, no alliance, no obligation to join in any defense." All contrary implications have thus been made impossible.

SUMMARY.

From what has now been said it clearly appears: (1) That the United States, acting as an arbitrating power between Europe and Asia, has done much to secure the peace of the world for the next 10 years by removing the probable causes of conflict in the Pacific Ocean; (2) that by removing such causes of conflict, through the making of the four-power treaty, it has been able to bring about a tremendous reduction in the

naval armament which is likely to extend to land armament; (3) that in order to accomplish such momentous results it has not been necessary to enter into any alliances, entangling or otherwise; (4) that such engagements as have been entered into are simply war-preventing agreements carefully designed to forestall future conflicts by removing in advance the causes out of which such conflicts might otherwise have arisen.

LETTER FROM SECRETARY HOOVER.

Mr. LENROOT. Mr. President, on May 25 last the Senator from Georgia [Mr. WATSON], in the course of the speech that he made, referred to the confirmation of the members of the Cabinet at the special session of the Senate immediately following the inauguration of President Harding, and used this language:

Mr. President, who came in here from the east portico and personally took his stand there by yourself, sir, and embarrassed Senators by asking them to confirm at once and without debate such Cabinet officers as the Englishman, Herbert Hoover, and the man who in violation of law is holding the position of Secretary of the Treasury, Mr. Mellon, Morgan's partner, and Secretary Fall, and Harry Daugherty, of whom I am going to say something else before I take my seat? Had the President not come here in person and made that appeal to our forbearance and our courtesy there would have been objection, prompt and strong, to the confirmation of Hoover, the charity broker, who never publishes any accounts or any vouchers of what he does with the hundreds of millions of American money that he has handled.

It is that phrase to which I call attention—

Who never publishes any accounts or any vouchers of what he does with the hundreds of millions of American money that he has handled.

The privileges of debate enables Senators to use their own judgment of what they say upon this floor. They may make statements that have no foundation whatever; some of them sometimes do. It so happens that this statement is without any foundation whatever, and I ask unanimous consent that there be read from the desk a letter from Secretary Hoover.

The VICE PRESIDENT. Is there objection?

Mr. WATSON of Georgia. There is, Mr. President.

Mr. LENROOT. Very well; I desire to read the letter.

Mr. WATSON of Georgia. Mr. President, I desire to take the floor in my own right.

Mr. LENROOT. I desire to read the letter.

Mr. WATSON of Georgia. Have I the floor, Mr. President?

The VICE PRESIDENT. The Senator from Georgia has not the floor. The Senator from Wisconsin has the floor.

Mr. LENROOT. The letter of Secretary Hoover is as follows:

DEPARTMENT OF COMMERCE,
OFFICE OF THE SECRETARY,
Washington, May 27, 1922.

Hon. IRVINE L. LENROOT,
United States Senate, Washington, D. C.

MY DEAR MR. SENATOR: I notice in the CONGRESSIONAL RECORD for May 25 a statement by Senator WATSON of Georgia to the effect that I have never published any accounts or any vouchers as to what has been done with the hundred millions of American money that has been handled in charity under my direction.

This statement appears to be based on the most absolute misinformation, and it seems to me desirable that it should not stand uncorrected. As a matter of fact, the two relief associations with which I have been associated—namely, the Commission for Relief in Belgium and the American Relief Administration—have not only published their complete accounts annually—and at some periods semiannually—and distributed them to the press and to other persons interested, but beyond this these accounts have been subjected to searching audit by independent firms of accountants and certified to as correct.

Wherever these associations have handled funds belonging to the United States Government, the whole of the accounts and vouchers have of necessity been deposited in the United States Treasury in order to obtain payment of appropriations. As a matter of fact, a large part of these accounts have actually been reprinted in the CONGRESSIONAL RECORD itself.

These associations have also handled sums of money for foreign Governments and in each case the accounts have been investigated and approved by these Governments. Furthermore, each of these associations was presided over by directors of high standing in the community, they have always operated under the treasurership of important bankers, and in every instance of their disbursements and receipts have been so organized as to require combined action of numbers of men.

It is only due to these men who have given these services in the interest of humanity and in the spirit of the best of America that these misstatements should be corrected.

Yours faithfully, HERBERT HOOVER.

Mr. President, I am not surprised that the Senator from Georgia objected to the reading of this letter. A Senator comes in on this floor and makes charges against a man that have not the slightest foundation. This man or any man against whom such charges are made has not the privilege of the floor and can not make answer to such charges except in a communication to some Senator, and yet the Senator from Georgia, after making such charges, objects to the party against whom he makes the charges putting a letter into the CONGRESSIONAL RECORD stating the facts. I have no comment to make, Mr. President. I have read the letter, and the country will judge between the Senator from Georgia and the Secretary of Commerce, Mr. Hoover.

Mr. WATSON of Georgia. Mr. President, this is about the third time the insolent junior Senator from Wisconsin [Mr. LENROOT], who voted for the Esch-Cummins bill, one of the worst bills that ever was rushed through the Senate, has risen here and personally attacked the junior Senator from Georgia. On one occasion that Senator in his arrogance demanded that the junior Senator from Georgia be compelled by the Senate to answer elsewhere than on this floor to what he had said here in this Chamber. I defied him then; I defy him now. I defy him on the floor of the Senate and I defy him outside. I am not in the least afraid of him here or elsewhere, and the sooner the arrogant Senator learns that the better it will be for him and for me.

The VICE PRESIDENT. The Chair will have to warn the Senator from Georgia to proceed in order.

Mr. WATSON of Georgia. In what manner have I violated the rule?

The VICE PRESIDENT. In using words derogatory to another Senator.

Mr. WATSON of Georgia. The Senator from Wisconsin, Mr. President, was not admonished by the Chair, though he was exceedingly rough in his language toward me. The Senator from Georgia is in full command of himself, and he knows exactly the words he is using, but he will take his seat if the Chair says he is out of order.

Mr. HARRISON. I ask unanimous consent that the Senator from Georgia be permitted to proceed in order.

The VICE PRESIDENT. The Chair did not call the Senator to order. The Chair merely warned the Senator to proceed in order, and he has a perfect right to proceed.

Mr. WATSON of Georgia. Mr. President, I have never willfully violated the proprieties of the Senate. I have lived now for some years; I think a gentleman should know how to demean himself; and I think I am a gentleman; but when a Senator virtually accuses me of having told a falsehood, although he cloaks his language in such a way that it can not be objected to, I nevertheless feel the sting and I resent it. I have been charged with telling a falsehood, and the Senator who charged me with that will have to answer to me for it.

Mr. President, this Englishman, Herbert Hoover, has never published any vouchers and account statements in American newspapers. Even now he alludes to statements that he has published in foreign newspapers. We do not read those papers, Mr. President. We have to secure our knowledge of public affairs from American newspapers.

Every word I said in regard to the unprecedented way in which the Cabinet nominations were presented to the Senate was true. There would have been objection to Herbert Hoover; there would have been objection to Senator Fall, and there would have been objection to Mr. Mellon, who is holding his office in violation of one of the first laws ever passed by the very first American Congress.

When I objected, Mr. President, to the reading of the letter, it was not because I was afraid of its contents, but because I did not wish it to go to the country that there was unanimous approval of that self-given coat of whitewash by Herbert Hoover. The letter has been read; it proves nothing. Herbert Hoover has never published in America the vouchers and statements of the vast sums of money that he has been handling, and he has been accused constantly of having appropriated $10,000 a month of that money to his own personal use, and of having paid extravagant salaries to men and women who did nothing but go around Europe in limousines and have a good time.

Mr. President, the Senator from Wisconsin is well known on this side as a bitter hater of the South. We do not love him; we make no secret of it. We ourselves are not ashamed of our section, of our blood, or our race, and we of the South are ready to meet any man in this Chamber or elsewhere who tries to slur the record of the South, or of any of the typical men of the South.

THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

The VICE PRESIDENT. The question is on agreeing to the amendment of the committee.

Mr. McCUMBER. I ask that the Secretary restate the amendment.

The VICE PRESIDENT. The Secretary will state the amendment.

The ASSISTANT SECRETARY. On page 39, after line 18, it is proposed to strike out paragraph 218 in the following words:

PAR. 218. Bottles, and all articles of every description, composed wholly or in chief value of glass or paste, blown or partly blown in the mold or otherwise, colored, cut, engraved, etched, frosted, gilded, ground (except such grinding as is necessary for fitting stoppers or for purposes other than ornamentation), painted, printed in any manner, sand-blasted, silvered, stained, or decorated or ornamented in any manner, whether filled or unfilled, or whether their contents be dutiable or free, 40 per cent ad valorem: *Provided*, That the foregoing containers of merchandise subject to an ad valorem rate of duty or to a rate of duty based in whole or in part upon the value thereof, shall be dutiable at the rate applicable to their contents, but not less than the rate provided for in this paragraph: *Provided further*, That for the purposes of this act bottles with cut-glass stoppers shall with the stoppers be deemed entireties.

And to insert a new paragraph 218, as follows:

PAR. 218. Biological, chemical, metallurgical, pharmaceutical, and surgical articles and utensils of all kinds, including all scientific articles, utensils, tubing, and rods, whether used for experimental purposes in hospitals, laboratories, schools and universities, colleges, or otherwise, all of the foregoing, finished or unfinished, composed wholly or in chief value of glass or paste, or a combination of glass and paste, 75 per cent ad valorem; illuminating articles of every description, including chimneys, globes, shades, and prisms, incandescent electric light bulbs, with or without filaments, for use in connection with artificial illumination, all of the foregoing, finished or unfinished, composed wholly or in chief value of glass or paste, or a combination of glass and paste, 70 per cent ad valorem; all glassware commercially known as plated or cased glass, composed of two or more layers of clear, opaque, colored, or semitranslucent glass, or combinations of the same, 70 per cent ad valorem; table and kitchen articles and utensils, and all articles of every description not specially provided for, composed wholly or in chief value of glass or paste, or combinations of glass and paste, blown or partly blown in the mold or otherwise, or colored, cut, engraved, etched, frosted, gilded, ground (except such grinding as is necessary for fitting stoppers or for purposes other than ornamentation), painted, printed in any manner, sand-blasted, silvered, stained, or decorated or ornamented in any manner, whether filled or unfilled, or whether their contents be dutiable or free, 65 per cent ad valorem; table and kitchen articles and utensils, composed wholly or in chief value of glass or paste, or a combination of glass and paste, when pressed and unpolished, whether or not decorated or ornamented in any manner or ground (except such grinding as is necessary for fitting stoppers or for purposes other than ornamentation), whether filled or unfilled, or whether their contents be dutiable or free, 50 per cent ad valorem: *Provided*, That any of the articles specified in this paragraph, if containers of merchandise subject to an ad valorem rate of duty or to a rate of duty based in whole or in part upon the value thereof, shall be dutiable at the rate applicable to their contents, but not less than the rate provided for in this paragraph: *Provided further*, That for the purposes of this act bottles with cut-glass stoppers shall with their stoppers be deemed entireties.

Mr. JONES of New Mexico. Mr. President, on Monday night we were discussing chemical glassware. It will be recalled that the present rate on chemical glassware is 45 per cent, and that the committee amendment proposes to increase that to 75 per cent. There was some discussion regarding that item, and the Senator from New Jersey [Mr. FRELINGHUYSEN] presented some arguments devoted chiefly to the cost of production in the United States and in Germany. No other factor entering into the question of competition was stated by him, as I recall. Later the Senator from North Dakota [Mr. MCCUMBER] quoted some prices of August last year, as found in the Reynolds report, showing that there was a difference. Later I called attention to the fact that we should consider some other questions, and stated that the facts which had been presented alone would not enable us to judge as to the competition. I suggested at the time that this country was not being flooded with importations and that that really was the most important fact to be taken into consideration; in other words, that it was evident that the difference in wages and even the difference in prices in Germany and in the United States last August were not sufficient to justify us in becoming alarmed at the situation. When I suggested that the importations were small, the Senator from Utah [Mr. SMOOT], as I inferred from the manner in which he made his statement, wanted us to believe that the importations were still quite large.

I read from the report of the Tariff Committee that the chemical-glassware industry was one which was brought into existence in the United States during the war; that the manufacturers of that glassware thought that the present rate of duty was sufficient; and in that connection I referred to the importations. The Senator from Utah did not at that time give us the full facts regarding the importations. He did say, however, that there was $190,000 of importations, and wanted to leave the inference that that was a very large relative proportion. The facts are that prior to the war we were importing from $1,200,000 to $1,500,000 worth of chemical glassware, and the importations since the war have been as follows:

During the last six months of 1918 they amounted to $33,786, and during 1919 to $62,181. Imports increased during 1920, and in the first half of that year amounted to $121,809; but for the whole year 1920 they amounted to only $190,624, which shows that during the last half of the year 1920 the importations very greatly decreased.

We have not full statistics regarding 1921, but for the nine months of 1921 they were $133,866, showing that there is no great flood of these importations. They have fallen from $1,500,000 to less than $200,000, only about from 10 to 15 per cent of what we were importing prior to the war; and, mind you, these importations are thus limited under existing law, and if we study the report of the Tariff Commission I am satisfied that it will appear to a reasonable mind that there is no necessity for any increase of duty.

The Tariff Commission has made a very exhaustive survey of the development of this industry in the United States. Of course, the chemical glassware industry should be considered in connection with the whole glassware industry. It is a part of it. It is merely one item, and there are other factors which might well be considered.

The glassware industry of this country has prospered, and according to the last information we have regarding it, it has prospered more than in any previous year. I believe that at this point I will give a statement regarding the profits of the glassware industry of the country. These figures are obtained from the Internal Revenue Department of the Government, from the official returns of these corporations made in connection with the income-tax requirements.

I find that during the years 1911, 1912, and 1913 the average percentage of profit was 13.6 per cent. In 1918 it was 21.2 per cent. In 1919 it was 22.4 per cent. In 1920 it was 28 per cent. In the year 1920, the second year after the war, the percentage of profit had increased more than 100 per cent above the prewar profits. These concerns were earning at that time 28 per cent on their invested capital; and, by the way, the invested capital had increased from $21,000,000 prior to the war to $47,000,000 in 1920, and the information I have is that that increase in capital represented undistributed earnings.

Mr. SIMMONS. Mr. President——

Mr. JONES of New Mexico. I yield to the Senator.

Mr. SIMMONS. I understood the Senator to say that the profit of the glass industry in 1920 was 28 per cent.

Mr. JONES of New Mexico. That was the statement I made.

Mr. SIMMONS. I wish to call the Senator's attention to the fact that 1920 was the year in which we had the great slump in the prices of certain industries of the country. Certain industries of this country, representing probably half of the people of the country, instead of having any profit at all had enormous losses.

Mr. HITCHCOCK. Does not the Senator mean 1921?

Mr. SIMMONS. No; it commenced in the fall of 1920. When we marketed the crop of 1920 we got less than a third of what we had been getting, and it continued in 1921.

Mr. JONES of New Mexico. The Senator has made a valuable statement in this connection. Not only that, Mr. President, but I call attention to the fact that since the industries of the United States began the manufacture of chemical glassware they have exported more than has been imported.

Mr. FRELINGHUYSEN. Mr. President——

The PRESIDING OFFICER (Mr. JOHNSON in the chair). Does the Senator from New Mexico yield to the Senator from New Jersey?

Mr. JONES of New Mexico. I yield to the Senator.

Mr. FRELINGHUYSEN. That is perfectly true. We not only supplied the home market, but we also supplied the Allies with chemical laboratory glassware when the supply of the Allies from Germany was cut off.

Mr. JONES of New Mexico. But I will state to the Senator that our export of this ware has been much larger since the war than it was during the war. In 1918, the last year of the war, our exports were a little over $179,000. In 1919 they were over $200,000. In 1920 they were $262,000, and in 1921 they were $231,735. For the very last year, 1921—and I have before me now the available statistics for the whole year 1921—the imports amounted only to $175,807, while our exports for the same year amounted to $231,735.

Mr. FRELINGHUYSEN. Mr. President, the Senator is perfectly right in regard to the exports. Prior to the war this industry was not established in this country. We did not know how to make this laboratory glassware, and our workmen learned how to make it. They became very efficient, and not only that but they made a very durable type of chemical glassware, and they manufactured it and accomplished the production toward the middle or the end of the war; and I am informed that a great deal of this exportation was to the Allies, to the laboratories of England and France, and our factories furnished the supply that had been shut off from Germany. The point that I made the other night in my speech was that this industry having been established in 10 factories in this country, and with now the menace of German and Belgian and

Czechoslovakian competition, I thought it was a fair proposition in view of the great need of this glassware that we should protect the American industry and be independent of importations. That was the point I made.

Mr. JONES of New Mexico. Mr. President, I will state that the Senator's recollection regarding this export trade or foreign trade in chemical glassware is not in accord with that furnished us by the Tariff Commission. In regard to our exports of chemical glassware the Tariff Commission says:

> For the first time in its history the United States has become an exporter of domestic chemical glassware. During the calendar year of 1918 chemical glassware, valued at $179,682, was exported to 17 specified foreign countries and to others not specified. Canada, Cuba, Mexico, and China, in the order named, were the destinations of about 60 per cent of the total. During the six months ended December 31, 1917, the value of exports of this ware was $65,336, this being the first export recorded. It is believed that a shortage of the ware in these countries, formerly buyers from Europe, was the cause of the exports, and that the bulk of this trade will not be permanent.
>
> The export movement continued in increasing volume during the first nine months of 1920. Exports during the third quarter amounted to $69,579, as compared to an average of $51,842 during the preceding four quarters.

Of course, when Europe shall get back to normal conditions, this export trade of the United States may be interfered with; but I read this as evidence of the fact that up to the present time there is no very acute competition regarding this particular item, with the rates in existing law as they are. According to the very latest information we have, in the year 1921 we actually exported more than we imported.

Mr. HITCHCOCK. In other words, the Senator objects to the enormous rate of 75 per cent imposed in the proposed schedule, because, like many other rates in the schedules of the bill, it is not based upon ascertained facts but on dubious prophecy.

Mr. JONES of New Mexico. The Senator is quite right. The proponents of these very high duties seem to be scared about something. There is no particular basis for it that I can ascertain, yet they conjure up these ghosts from day to day and wonder what can be done which is not being done.

Mr. HITCHCOCK. Can the Senator, as a member of the committee, state what prophet is employed by the committee? Statisticians seem to be useless, as far as the committee are concerned. How do they go out and find a prophet? Evidently these schedules are based on prophecy and anticipation. I would like to know who is the official prophet of the Committee on Finance.

Mr. JONES of New Mexico. So far as I have been able to observe, the official prophet is the one who is particularly interested in the particular industry——

Mr. HITCHCOCK. That is, each industry furnishes the committee with its own prophet and its own prophecy?

Mr. JONES of New Mexico. And the member of the committee who is closest in touch with those people. I understand, so far as pottery and glassware are concerned, the Senator from New Jersey is the prophet, because his constituents seem to be more directly interested in those commodities than are the constituents of other Senators.

Mr. KELLOGG. Mr. President——

The VICE PRESIDENT. Does the Senator from New Mexico yield to the Senator from Minnesota?

Mr. JONES of New Mexico. I yield.

Mr. KELLOGG. I am not on the committee, and I am trying to get at some of the facts pertaining to this chemical-glassware matter. What was the duty under the Underwood law?

Mr. JONES of New Mexico. Forty-five per cent.

Mr. KELLOGG. What was the duty before that?

Mr. JONES of New Mexico. Under the Payne-Aldrich law it was 60 per cent.

Mr. KELLOGG. Was there any chemical glassware manufactured in this country before the war broke out?

Mr. JONES of New Mexico. There was not, so far as I am advised.

Mr. KELLOGG. Why was there not?

Mr. JONES of New Mexico. It was because our people were engaged in manufacturing other kinds of glassware. The quantity of this ware was comparatively small. The total supply to the United States amounted to about $1,500,000, and about half of that was used in the scientific and educational institutions of the country; and under the law practically all the time from 1790 down to the present these articles were imported free of duty.

Mr. KELLOGG. Could the American manufacturer compete under those duties with the German manufacturers?

Mr. JONES of New Mexico. We do not know anything about that, because there was no attempt made to produce these wares in this country. I intend to read to the Senator before I conclude a statement of conditions under which this industry is operating in the United States to-day, and I think the fair inference from the study which the Tariff Commission has made is that the manufacturers of this glassware can compete with the world without any tariff. I think that is a fair deduction from the information which the Tariff Commission has furnished us and which I shall now present to the Senate.

Mr. FRELINGHUYSEN. Mr. President——

The VICE PRESIDENT. Does the Senator from New Mexico yield to the Senator from New Jersey?

Mr. JONES of New Mexico. I yield.

Mr. FRELINGHUYSEN. Of course, I am not going to reply to the satire of the Senator from Nebraska [Mr. HITCHCOCK] or the Senator from New Mexico [Mr. JONES] regarding this question.

Mr. JONES of New Mexico. It was good-natured satire, I will say to the Senator.

Mr. FRELINGHUYSEN. But they ask who made these prophecies. I want to say to the Senator that if he had read the hearings he would have found that the workingmen themselves, who during the war accomplished this great achievement in supplying us with this laboratory glassware, which was so necessary to life and health, came here and made the prophecy that unless they were protected they could not continue in the manufacture of this highly technical ware.

That is where the prophecy came from. If the Senator had read further he would have found also that prior to the war practically every bit of this glassware used in this country was purchased from abroad; and he would have ascertained further that these skilled workingmen in this country developed a higher and a better type of glassware, so much so that many of the manufactures of this high type of glassware have been exported because it is more durable.

Mr. JONES of New Mexico. I agree with much the Senator has said. The industry in this country has developed to such an extent that we make a far better grade of this ware than is made anywhere else in the world, and, as we will find out by further consideration of the report of the Tariff Commission, that fact alone justifies the belief that the United States manufacturers are able to compete with the world to-day.

As to the other factor, about the labor organizations appearing before the committee, I was present when they were testifying before the Finance Committee, and the report of their testimony is found in the appendix of the Senate Finance Committee hearings. It would really be interesting to anyone who cares to weigh the testimony which was presented to us at that time to read those hearings. In questioning the witness who was there and presenting those facts, I suggested to him that there were many other things to be considered than the mere difference in the wages paid to the foreign workmen and those paid to workmen in the United States; that the efficiency of labor, the cost of material, and many other things should be considered; but all he undertook to cover in the oral discussion of the matter before the committee was merely the difference in wages.

It developed that in 1920 a committee from organized labor engaged in this industry in the United States, together with representatives of the manufacturers, went over to Europe to study this question, and they brought back to us, in rather an exhaustive report, some very valuable information. But in that report itself is to be found the very criticism which I have been suggesting here, and I want to read to the Senate just a few words regarding it. In this report, on page 5199 of the hearings, under the general heading "Difficulties in preparing this report," I find the following statement:

> In the preparation of this report it would be impracticable to even attempt a detailed review of all that attracted our attention abroad, nor would it serve the purpose that prompted the investigation. This investigation was intended to be centered upon the flint-glass industry alone; nevertheless one must not lose sight of the fact that numerous things which have a direct bearing on the relation of the glassworker to the glass industry must be comprehended in order to even remotely understand the industry as it is conducted in the Old World.
>
> The subjects of fuel, power, materials, shipping facilities, location, peculiar construction of plants, child labor, natural advantages, equipment, money, exchange, communication, packing, language, measurements, weights, capacities, production, selection, skill, methods of producing, market for ware, taste, good will, ingenuity, necessity, and determination constitute but a few of the many things that could be treated in this report were it not for the fact that it would mean a document so voluminous that it would not be read.

There the people who prepared that testimony and made a report on wages suggested the other factors surrounding this industry which must be taken into consideration.

There is no one in this Chamber who has a greater sympathy and consideration for those who toil than have I, but I know that the workingmen of this country do not want to be used as tools for the purpose of creating monopolies and letting a few industries profiteer on the people of this country. If I were permitted to express my sentiments here, the people who

continually talk about labor would be characterized in a way which I am afraid would not be becoming in the Senate, but it would be expressive of the conditions which exist.

Mr. President, in the name of labor we would exploit the people of the country, we would build up these large industries, allow them to make extortionate profit, allow them to accumulate undistributed profits and add to their capital. Since prior to the war their capital had more than doubled at the end of 1920 and upon that doubled capital they have been making more than twice the earnings which they made upon the more modest capital prior to the war. Again I say that no one is justified in rising in this Chamber and using the holy name of labor as an excuse for sinister purposes.

Mr. SIMMONS. Mr. President——

The VICE PRESIDENT. Does the Senator from New Mexico yield to the Senator from North Carolina?

Mr. JONES of New Mexico. I yield.

Mr. SIMMONS. I think apparently the committee did not have the differential in the labor cost here and abroad of producing this product, but we have information as to the average labor cost paid in the glass industry and the production of the various fabrications of glass which our manufacturers make in this country. It appears from those statistics that the average labor cost in the glass industry is somewhere around 33 per cent of the value of the product. That is the total labor cost. Now, the duty that is imposed is intended not to cover the total labor cost, but the difference between the labor cost here and abroad; yet there is a duty proposed in the pending bill which is twice as great as the entire average labor cost in the glass industry in the country.

Mr. JONES of New Mexico. That is true as to this article of manufacture and it will be found to be the case practically throughout the bill. The duties are levied not merely upon the labor cost which goes into the foreign production but are levied upon the labor cost, the cost of the material, the costs of every kind, the fuel, the raw material. They are levied upon the transportat on cost and they are levied upon the profits of the foreign producer.

Mr. SIMMONS. I do not understand that there is any particular contention in connection with this item or the glass schedule that the material cost is very different as between this country and competing countries, but the Senator from New Jersey makes the point that this duty is asked for by the laboring men. I assume that if the laboring men ask for anything at all, they could not ask in conscience for anything more than a sufficient duty to cover the difference in the labor cost here and abroad. Certainly labor can not ask for this duty. Labor certainly can not come here and say "We want a duty on this product wh ch not only measures the difference but which is twice as much as the entire American labor cost."

Mr. JONES of New Mexico. I am sure that must be the position of the laboring men in this country who are the workers in these industries. Most of them are skilled men in their line, and they are intelligent men. I do not believe they are going to be fooled by all the protestations of sympathy here for the labor ng men of the country. I want the laborers in this country to live as well as anybody. I want them to receive good wages and to become prosperous and healthy citizens of the country and to raise their families in splendid environments. But that is not the real purpose here. Every one of these industries is trying to beat down the cost of labor, trying to reduce wages, as they have been doing since the war and in the face of the greatest profits which the industries have ever known.

Now, in regard to the chemical ware I am sorry we did not take up the subject in its logical order, but I believe at this point I will give some general information regarding the industry for the purpose of showing the amount of labor which goes into the manufacture of glassware. We have the Federal census report upon the industry for 1914, and that is illustrative of the situation in the industry. I am not sure that I have all the various items compiled for the year 1919, but I have most of them at any rate. I will state the condition of the industry in 1914.

The number of establishments was 348. The persons engaged in the industry numbered 78,804. The proprietors were 93. The salaried employees were 4,209. The wage earners were 74,502. The primary horsepower employed was 163,139. The capital was $153,925,876. The salaries and wages paid were $55,204,723. The salaries amounted to $6,548,904 and the wages to $48,655,819. The amount paid for contract work was $150,185. The cost of materials was $46,016,504. The value of the products was $143,085,019. The value added by manufacture was $77,068,515.

Mr. McCUMBER. Mr. President, will the Senator state what year he is quoting?

Mr. JONES of New Mexico. The year 1914.

Mr. McCUMBER. It is 1914 and not the present basis?

Mr. JONES of New Mexico. Yes.

Mr. McCUMBER. Let me ask the Senator another question while I am on my feet. Is the Senator now referring to the entire glass business?

Mr. JONES of New Mexico. Yes.

Mr. McCUMBER. He is not referring to the chemical glassware, where the labor cost is very much higher.

Mr. JONES of New Mexico. If the Senator would honor me with a little closer attention I am sure he would not have to ask me to repeat. I made the statement in the beginning that it was the entire industry. By the way, I am sure the Senator was engaged with his expert, and that is the reason why he did not hear my statement in the first place.

Mr. McCUMBER. I apologize to the Senator if I did not hear him. Often I have to confer with the experts.

Mr. JONES of New Mexico. The statement I made was in regard to the year 1914.

We have the statistics, I think, for the whole year of 1919. I do not appear to have that document at hand at the moment, but it is in just about the same proportion of increase in every line. The cost of material and the cost of production have increased from $123,000,000 to more than $261,000,000 in 1919. So the industry is not a poverty-stricken one by any means. It has had a continuous growth for half a century. Not at any time has there been a decrease in the output of its product, not a decrease in capital, not a decrease in the amount added to the cost of production by manufacture. It has been an increase all the time under all the laws which we have had and under the present law since the war. No one can point to any extended period in any era of its history when it has not prospered, when it has not increased its production, and at the present time it has enormously increased its prices and profits.

Now, in regard to the chemical ware: After giving a description of it under the present duty the Tariff Commission gives us the domestic production and shows its very great increase. Then here is what it has to say regarding the prospects of the industry under the existing law. First it tells us about the equipment that is necessary, as follows:

> The ordinary equipment of a glass factory for the blowing of bulbs and bottles suffices for the production of chemical hollow-blown ware. Molds, blowpipes, and furnaces constitute the principal equipment, and are the same in all countries.
>
> Methods and processes: The making of hollow-blown chemical ware is similar to that of incandescent lamp bulbs and bottles. Lamp-blown and volumetric ware made from tubing, and often according to designs of laboratory scientists, and from the factory blanks, is the work of specially trained artisans. There are less than 250 workmen of this class in the United States, for the most part brought from the Thuringian factories of Germany. Since the war one American firm has developed the use of machinery to do in part what was laboriously done by hand in Germany in the manufacture of the great variety of products coming under the head of "lamp-blown and volumetric ware."
>
> Organization and capitalization: There are no factories engaged exclusively in the production of chemical hollow glassware, and in the large, well-organized, and long-established factories where it is made it is not a major product. Its manufacture is dependent upon the existing organization and capitalization of the factory.

The domestic production and consumption are given.

> Since 1915 there have been no imports of chemical glassware, and the domestic production at this time—

This particular part of the report was written in February, 1919—

> is fully equal to the demands of domestic consumption. The exports of this ware, though small, indicate that the existing factories are meeting our requirements. The shortage of the highly skilled labor required for the making of lamp-blown and volumetric ware makes it doubtful if American shops can meet the domestic requirements for this class of ware.
>
> The following table shows the production of chemical glassware in the United States for the period 1915–1918.

It ranges from $748,000 in 1915 to $1,910,000 in 1918.

Then comes the question of exports, and it is shown that we are exporting more than we are importing at the present time. Those are the latest data upon the subject, and they include the whole of the year 1921.

Mr. SIMMONS. Mr. President, if the Senator will pardon me, I desire to say that this is a new industry only in the sense that the article is manufactured by new capital which has been brought into existing business concerns. It is a mere extension of the operations of the great glass industry which is already established in this country. Is not that correct?

Mr. JONES of New Mexico. Yes; that is precisely the situation.

Mr. SIMMONS. So that it is not one of those infants that it has been claimed should be nurtured by the tariff until it is

strong enough to stand upon its own feet. I want to ask the Senator if it is not true that wherever we have entered upon the manufacture of glassware of any kind in a very short time we have shown our ability to hold our own in competition with the world? Is it not a fact, leaving out for the present this chemical glassware, that as to all the other glassware which is produced in this country the manufacturers are able to produce it so cheaply and so abundantly that we have supplied the domestic demand, and there have been practically no imports or only negligible imports for years past? Is that not true?

Mr. JONES of New Mexico. The Senator from North Carolina is quite right about that.

Mr. SIMMONS. If we have been able wherever we have undertaken to make a particular product out of glass, very soon to reach the point where we were able to supply the domestic market, and at such reasonable prices as to keep out imports, what is the reason for supposing that this great organized industry, which has recently gone into a new field, can not do the same thing with reference to the chemically produced glass? The statistics which the Senator has read indicate that the manufacturers of that glassware already are able to supply the domestic demand, and that the imports, while larger than of some other qualities of glassware, are not now so large as are the exports. If we have been able to do this with reference to the whole glass industry of this country, is there any reason to suppose that we can not do exactly the same thing with reference to this new development of the glass industry?

Mr. JONES of New Mexico. The Senator undoubtedly is thinking along correct lines. This chemical-glassware industry is merely a new item of production undertaken by existing glassware concerns of the country during the war. Now, here is what the Tariff Commission has to say about competitive conditions:

> Domestic chemical glassware has not as yet been compelled to face extensive foreign competition. High-quality German glass is now being imported, but the amount reaching the domestic market has not been sufficient to affect prices to any extent——

Mr. FRELINGHUYSEN. What is the date of that statement?

Mr. JONES of New Mexico. The Senator has a copy of this report, and he can find out—

> and this is the only weapon remaining in the hands of a foreign competitor. Certain domestic brands will sell on a quality basis at prices considerably above those obtainable for even the best foreign ware because the greater durability lowers the ultimate cost to a level which the foreigner can not attain.

Bearing in mind that statement, the question of duty does not make any difference. It says that the producers of this country manufacture a quality which is so much superior to the great mass of the foreign chemical ware that there is really no competition between them.

Mr. FRELINGHUYSEN. Mr. President——

The VICE PRESIDENT. Does the Senator from New Mexico yield to the Senator from New Jersey?

Mr. JONES of New Mexico. Before yielding I desire to make some further statements along the same line.

Mr. FRELINGHUYSEN. Mr. President, I hope the Senator at that point will do me the courtesy of yielding. I yielded to him while I was discussing the matter.

Mr. JONES of New Mexico. I yield to the Senator.

Mr. FRELINGHUYSEN. I merely wish to suggest that the Senator will find from further investigation that the glassware of this type which is being manufactured in the United States is limited to the highest-priced article, the general run of which is about the same as the German importations. In relation to the suggestion of this being a highly organized industry, I wish to say that the industry is not highly organized, that it is competitive, and that the employees of one concern in my State—the Kimball Glassware Co.—have twice within the last year accepted a reduction in their wages in order that the Kimball Glassware Co. might continue to meet competition from Germany in this type of glassware. I thank the Senator for his courtesy.

Mr. JONES of New Mexico. Mr. President, the Senator again gives us some very partial information and makes a statement which, if taken alone, might influence some; but I will say to the Senator that the foreign cost of this chemical ware has been greatly increased during this year and even during the last month or two. I will give him some figures regarding that before I conclude; but I wish to proceed regarding the question of competition:

> The great durability of domestic glassware makes it the cheapest in the final analysis. Institutions which sell at actual cost will no doubt find it to their advantage to use this material regardless of the price of foreign ware, because, although the first cost is high, the replacement cost is low and smaller reserve stocks can be carried. Those institutions, on the other hand, which plan on obtaining a profit from the sale of glassware to students will find it to their advantage to use the fragile foreign material. In this case heavy breakage increases the turnover and therefore the profit.
>
> A comparison of the foreign and domestic wares clearly shows the economy resulting from using the latter. In one large commercial laboratory all the foreign glassware (best grade Jena) on hand August, 1914, was broken before February, 1915.

That is, all of it was broken in six months.

> A large percentage of the domestic ware bought to replace it was in active service three years later. There was some breakage due to carelessness, but the breakage resulting from physical and thermal shock, incurred during routine operation was negligible. This does not do full justice to the high quality of the domestic ware, because, for the sake of increased speed in the laboratory operations, it was subjected to shocks which would have been disastrous to any foreign ware ever sold in the domestic market.

It seems to me that under those circumstances there can not be very much harm come from competition even without any duty whatever. The fact that the foreign product is not coming into this country, it seems to me, demonstrates that under existing law there is no great competition in this country; and the fact that the American ware has so much greater durability must make for the prosperity of the American industry. The fragile foreign ware can not compete with any of the domestic ware in this country when the people of this country who use this commodity come to understand the difference in actual cost of the American product as compared with the foreign product.

Mr. SIMMONS. Mr. President, will the Senator permit me at that point to read a brief statement from the Drug and Chemical Market, which is issued every Wednesday, and which is a weekly business paper for those who make, sell, or buy chemicals, dyestuffs, and drugs, essentials, and fatty oils?

Mr. JONES of New Mexico. I will be glad to have the Senator read it.

Mr. SIMMONS. The statement is valuable because it comes from a large dealer in drugs and chemicals who has just made a visit to Europe, Mr. R. H. de Greeff, of R. W. de Greeff & Co., of New York. Mr. de Greeff says:

> Generally speaking, I do not consider the proposed tariff drawn on scientific lines as a tariff should be. Rates in many instances appear to me to be needlessly prohibitive. After a recent survey of conditions in Europe, I am of the opinion that the cost of production in all countries, including Germany, particularly on technical chemicals, has risen to such an extent that competition from Europe is likely to be much less active than before 1914. I am therefore inclined to believe that the effect of the proposed tariff will be to raise prices in this market considerably, in many cases to several times pre-war levels, and that the result as regards revenue will be very disappointing.
>
> Speaking from the exporter's point of view—

Not the importer's but the exporter's point of view—

> in which I am principally interested, I am afraid that as chemicals are in many instances raw materials, these prices here will handicap us in export business in such materials as might still be shipped from here. I admit adequate protection is justified on many pharmaceutical products and on dyestuffs.

That is reported in this trade journal, the Drug and Chemical Market.

Mr. JONES of New Mexico. Mr. President, that is fortified by a letter which I have in my hand which gives a good deal of information bearing directly upon German prices. This letter states:

> I have prepared Schedule A, showing six popular items of surgical glassware giving the price in German marks in the year 1913 and the mark prices in Germany to-day; and as an example of how the prices are going up I inclose a quotation which we received from Germany dated November 29, 1922, on a number of ordinary graduates made of glass; also a copy of our order for these graduates and a copy of a letter from Germany dated May 2, 1922, in which they are advancing prices 150 per cent, which compels us to cancel the order, as we could not possibly afford to pay these prices subject to the present tariff of 45 per cent duty.

The letter from which I am reading is dated May 23, 1922.

> We also give you a copy of a letter from Germany proposing to furnish us with glass jars (proposal dated February 2, 1922); a copy of our order, dated ———, ———; and a copy of subsequent correspondence stating that they can not accept the order only at the prices prevailing at the time of shipment; and a copy of the invoice on which we have received these jars, showing an advance of 33⅓ per cent and 45 per cent since we placed the order.
>
> (The three items on the bottom of Schedule A, marked with red check, show these present-day prices on glass jars just mentioned.)
>
> Size 4 by 4 inches cost us in Germany in 1913 7.1 cents; in 1921, 7.2 cents.
>
> Size 6 by 6 inches cost us in Germany in 1913, 12 cents; in 1922, 13½ cents.
>
> Size 8 by 8 inches cost us in Germany in 1913, 24 cents; in 1922, 26.4 cents.
>
> You will, therefore, see that although the rate of exchange of the German mark is low, it has absolutely nothing to do with the cost of merchandise, as they advance their mark prices according to the rate of exchange.
>
> Schedule B gives a synopsis of the expenses of transportation of hollow glassware in 1913, as compared with three invoices in 1922.
>
> This synopsis is exemplified by a list of details in C, D, and E; one invoice of 3 cases and one invoice of 8 cases which arrived on the steamship *Panaman* April 26—

Giving the customs entry numbers—
and one shipment which arrived May 3—
Giving that customs entry number.

From this you will see that in 1913 we figured 25 per cent transportation charges, insurance, etc., in addition to customs duties; whereas in this year the costs vary from 47½ to 111½ per cent, according to the bulk of the goods and their value.

In regard to those costs of transportation, I want to insert some of these exhibits.

On the three cases of small glassware the items of expense in transportation are given, and it shows that in the case of the first invoice 47½ per cent of the net merchandise value was required to pay those transportation charges, not including any duty; in the case of the second invoice 64 per cent, and in the case of the third invoice 111½ per cent of the net merchandise value.

Mr. President, without reading those exhibits I should like to have them inserted in the RECORD.

The VICE PRESIDENT. Without objection, it is so ordered.

The matter referred to is as follows:

THE KNY-SCHEERER CORPORATION OF AMERICA,
New York, May 22, 1922.

Import expenses on 3 cases of small glassware #1955–1957. S/S. "Panaman" arrived April 26th, 1922. Customs entry #8/6337–2478. Tuttlingen invoice #402 of February 9, 1922.

Value of merchandise without packing: M 6663.00 at $0.0034=$22.65.
Packing: M 260.00=$0.88=4 per cent of net merchandise value.
Inland freight to Hamburg and incidental expense: M 467.60=$1.59=7 per cent of net merchandise value.
Ocean freight: 1.068 cbm. at $3.00=$3.20=14 per cent of net merchandise value.
Insurance: 1 per cent of net merchandise value.
Entry, cartage, and incidental expenses: 10 per cent of net merchandise value.
Six per cent German export tax on merchandise value, including packing, equal to 6¼ per cent of net merchandise value.
Purchasing commission: 5 per cent of net merchandise value.
Total import expenses, exclusive of duty: 47½ per cent of net merchandise value.

THE KNY-SCHEERER CORPORATION OF AMERICA,
New York, May 22, 1922.

Import expenses on 8 cases of hollow glassware #1964–1971. S/S. "Panaman" arrived April 26th, 1922. Customs entry #8/6337–2478. Tuttlingen invoice #402 of February 9, 1922.

Value of merchandise without packing: M 16960.05 at $0.0034=$57.66.
Packing: M 1480.00=$5.03=9 per cent of net value of merchandise.
Inland freight to Hamburg and incidental expense: M 2068.40=$7.03=12½ per cent of net value of merchandise.
Ocean freight: 3.806 cbm. at $3.00=$11.42=20 per cent of net value of merchandise.
Insurance: 1 per cent of net value of merchandise.
Entry, cartage, and incidental expenses: 10 per cent of net value of merchandise.
Six per cent German export tax on merchandise value, including packing, equal to about 6½ per cent of net value of merchandise.
Purchasing commission: 5 per cent of net value of merchandise.
Total import expenses, exclusive of duty: 64 per cent of net value of merchandise.

—

THE KNY-SCHEERER CORPORATION OF AMERICA,
New York, May 22, 1922.

Import expenses on 3¼ cases of hollow glassware marked 1976–2006, 2008–2010, S/S. "Mount Clinton," arrived May 3d, 1922. Customs entry #8/9267–2481. Tuttlingen invoice #411, March 8, 1922.

Total value of merchandise without packing: Mk. 33379.75, at $0.0035=$116.83.
Packing: M. 6780=$23.73=20 per cent of net merchandise value.
Inland freight to Hamburg and incidental expenses: M. 8087.90=$28.31=24¼ per cent of net merchandise value.
Ocean freight: 17,127 cbm., at $3=$51.38=44 per cent of net merchandise value.
Insurance: 1 per cent of net merchandise value.
Entry, cartage, and incidental expenses: 10 per cent of net merchandise value.
Six per cent German export tax on merchandise, including packing, equal to about 7 per cent of net merchandise value.
Purchasing commission: 5 per cent of net merchandise value.
Total import expenses, exclusive of duty: 111½ per cent of net merchandise value.

Mr. JONES of New Mexico. Mr. President, I believe that is all I care to say at this time regarding chemical glassware.

Mr. SUTHERLAND. Mr. President, I noticed a statement made by the Senator from North Carolina [Mr. SIMMONS], and approved by the Senator from New Mexico [Mr. JONES], to the effect that the labor cost of the class of glassware which has been under discussion—namely, what is known as flint glass—is about 30 per cent. It is testified with reference to this particular industry that the value of the entire production is approximately $100,000,000. The number of skilled workmen employed in the industry is approximately 7,000. The number of unskilled help employed is approximately 30,000. The approximate wages paid to labor are about $55,000,000, or 55 per cent of the total value of the production.

Mr. SIMMONS. Mr. President——

The VICE PRESIDENT. Does the Senator from West Virginia yield to the Senator from North Carolina?

Mr. SUTHERLAND. I yield to the Senator.

Mr. SIMMONS. If those figures are correct, they must apply to some particular branch of the glass industry, and not to the whole. If they apply to the whole, they are in striking conflict with the official figures which I was quoting a little while ago.

Mr. SUTHERLAND. I will say to the Senator that of course we are discussing now not window glass or plate glass or these other varieties of glass which are machine made, and in which the labor cost is low; we are discussing flint glass, which is largely handmade, and into which labor enters much more largely than it does in the case of these other kinds of glass.

Mr. SIMMONS. I understand, and I understand the Senator to say, that the entire labor cost is 55 per cent of the total value of the production. If that be true, the Senator only wants to protect the laboring man to the extent of the difference between the cost price here and abroad, I imagine. That is the Republican theory. I never have understood them as asking for more.

Mr. SUTHERLAND. That is the theory.

Mr. SIMMONS. The duty which the Senator is advocating in the case of this industry is 75 per cent. I should be very glad if the Senator would tell why he needs 75 per cent duty if he wants to cover the entire American labor cost, which he says, is 55 per cent. A duty of 75 per cent would be 20 per cent higher than the entire labor cost. Why does the Senator insist upon a duty higher than the entire labor cost for the purpose of equalizing the difference between the labor costs here and abroad? Certainly this article costs something when it is produced in other countries.

Mr. SUTHERLAND. Mr. President, I call the Senator's attention to the fact that the materials used in this industry, a large part of the cost of which is labor, constitute the next largest item in the cost of production, of course. Sand, for instance, which is extensively used in the making of glass, costs the German manufacturers 71 cents per ton, while the American manufacturers are required to pay $5.72 per ton, a large part of which is labor.

Coal costs the German manufacturers $2.91 to $4.74 a ton, as compared with $6.35 to American manufacturers, and, of course, the labor cost is approximately 75 per cent of the cost of the production of coal. Lime costs the German manufacturers $2.19 per ton, as compared with a cost of $20.50 per ton to the American manufacturer. So that while the item of labor directly employed in this industry constitutes approximately 55 per cent of the production cost in this country, there is also a very large labor cost involved in the production of the materials used, so that the protection now sought to be given of from 50 to 75 per cent is not really sufficient and does not really mark the difference between the cost of production abroad and in this country.

Mr. SIMMONS. Mr. President, I have never heard, up to this time, any contention that there was any great difference in the cost of material as between this country and abroad.

Mr. SUTHERLAND. I have just read the figures, which are testified to by representatives of the workers and of the manufacturers who made a joint trip to Europe, and who investigated in person the costs of the materials on that side and on this side.

Mr. SIMMONS. Does the Senator mean to tell the Senate that the item of coal, which he says must be considered in this connection, is cheaper in Germany than it is in America?

Mr. SUTHERLAND. Quite a good deal cheaper, on account of the labor costs in this country, the transportation costs, and so on.

Mr. SIMMONS. I had understood that since the armistice, Germany having lost some of her coal-producing property, was in great trouble about coal, and was having to pay rather high prices for it. But let that go. Then the Senator mentioned sand. He said that was an element and that that has to be produced. The sand is not a manufactured product, is it?

Mr. SUTHERLAND. Labor enters very largely into the production of sand. It is largely the labor and transportation costs which must be considered.

Mr. SIMMONS. Does the glass manufacturer produce the sand also?

Mr. SUTHERLAND. The glass manufacturer uses the sand, and it costs money to quarry sand; it costs money to crush it, to prepare it, and to wash it for the use of the glass manufacturers. It is a very expensive product to transport, because of its weight, and the production cost is largely made up of the wages of the labor in producing it. So that the labor costs in the production of these various materials are very much higher in this country than they are in Europe.

Mr. SIMMONS. The sand, then, is one of the raw materials of the glassmaker. The glassmaker does not make the sand. It is produced by some other branch of industry. The glassmaker simply buys it as a part of his material?

Mr. SUTHERLAND. Sometimes the glass manufacturers own the glass-sand plants and sometimes they purchase the sand.

Mr. SIMMONS. By this duty the Senator wants to compensate the labor not only producing the glass but the labor which produces the raw material of the glassmaker. I assume that the laborers who are engaged in the production of the sand which the Senators says the glassmaker has to buy are protected in connection with the producing of that sand, and we do not want to protect them twice. I assume that the laborer who is producing the coal is protected in the production of the coal, there being a duty on coal, and we do not want to protect him twice.

Mr. SUTHERLAND. I call the Senator's attention to the fact that there is no duty on coal. Coal is on the free list and has been for some years.

Mr. SIMMONS. Does the Senator insist that if there is a highly specialized article in the production of which there must be used a half dozen different raw materials which have to be produced by labor we have to protect not only the glassmakers, in this instance, in the labor he has employed but we have to protect all the labor that is employed in the making of all the multitudinous articles which constitute the raw materials of the glassmaker?

Mr. SUTHERLAND. The point I make is that the costs of the labor entering into all these materials are very much higher, and the materials naturally cost our manufacturers here much more than similar articles cost the manufacturers on the other side; so that the labor cost of 55 per cent does not include all the labor that enters into the production of glass.

Mr. SIMMONS. But 55 per cent of the cost of production of the total output of the particular industry with which we are now dealing is labor, and the Senator is now asking for a duty not to equalize the difference between the labor costs here and in competing countries but he is asking for a duty 20 per cent higher than the entire labor cost of the American production; and in order to help the Senator's contention out, he says that not only must there be protection for the labor producing the glass products but for the labor also producing the various raw materials out of which the glass is made, and therefore in this duty we must protect the labor in the glass factory and also include in that protection the labor engaged in the manufacture or the production of the various raw materials of the glassmaker. That is a theory of protection I have never before heard advanced.

Mr. SUTHERLAND. I think I can make it clear that the rate of protection is not as large as it really should be in order to give ample protection merely to the workingmen directly employed in the glass industry.

Mr. McCUMBER. Mr. President, if I understand the Senator correctly he claims, first, that if the proportion of labor in the manufacture of glass is 55 per cent in the United States, and that it costs $1.50 to dig the sand and deliver it at the factory in Germany, and costs $5 to dig the sand and deliver it to the manufacturer in the United States, the difference between $1.50 and $5 becomes a very material factor in the cost of the production of the glass in this country over and above the mere cost of the labor.

Mr. SUTHERLAND. Certainly. Some analysis was made by the Senator from New Mexico showing our increases in exports and imports. Our total imports of glassware from January 1 to September 30, 1921, were $7,985,614. From January 1 to September 30, 1920, they were $5,250,824. So, for the corresponding period in 1921 the imports were $2,734,790 more than in 1920.

Our total exports of glassware from January 1 to September 30, 1920, were $21,779,826, and from January 1 to September 30, 1921, they were $12,176,914; so for the nine months in 1921 the exports had decreased below the corresponding nine months in 1920 by $9,602,912.

If you will analyze the subject of imports and exports you will learn that in the first nine months of 1921 we had a trade balance in our favor of $4,191,300, as compared with a trade balance for the same nine months in 1920 of $16,529,002. In other words, our trade balance for the first nine months of 1921 was just about 25 per cent of our trade balance for a similar period in 1920, thereby indicating a very remarkable change in the situation, to the detriment of the American manufacturer and the American workingman.

I read now from the joint brief of William P. Clarke, of the American Flint Glass Workers' Union of North America, Toledo, Ohio, and Thomas W. McCreary, superintendent Phoenix Glass Co., Monaca, Pa.:

An important fact, and one that must not be overlooked, is that the glassware that we export is made by machinery that requires but little labor, being either automatic or semi-automatic, while the glassware that is brought into our country is made by skilled workmen; consequently the imported glassware serves to displace American workmen.

The figures appearing in our reports of exportations are largely of kinds of glass which are made almost entirely by machinery, whereas the importations are of those kinds of glass into the cost of production of which labor enters much more largely.

On Monday evening before we adjourned I made some statements regarding the labor costs in connection with these various items in this country as compared with European countries, but further statements have been made regarding that subject, so that I propose to put into the record a comparison of the wages paid skilled workmen in some of those countries as affecting the various items we are now discussing.

Mr. JONES of New Mexico. Is the Senator reading from the report of the testimony?

Mr. SUTHERLAND. I am about to read again from the joint brief of William P. Clarke and Thomas W. McCreary, from which I just quoted.

Mr. JONES of New Mexico. That report was made upon data obtained in the latter part of 1920.

Mr. SUTHERLAND. In 1921.

Mr. JONES of New Mexico. From October, 1920, to March, 1921.

Mr. SUTHERLAND. The figures shown are for the year 1921; just how late in the year, it does not state.

Mr. JONES of New Mexico. The Senator will find in the first part of that report a statement as to when those people went to Europe and when they returned. They went over in October, 1920, and returned in the early part of March, 1921.

Mr. SUTHERLAND. I read:

All through Europe we learned that the glassworkers were paid a wage far less than that paid to American workmen performing a like class of work, and this may be well understood by a study of the comparative figures that follow, all of which is based on the value of the American dollar.

Electric bulbs (not lamps): Skilled labor cost per 100—Wardsley, England, $0.46; Leamington, England, $0.35; Edinburgh, Scotland (average), $0.42; Weisswasser, Germany, $0.20; Milan, Italy, $0.28; in America, $1.54.

The foregoing prices show the comparisons at the time of our visit to each locality. Money values have since changed. For example, in Germany wages have increased 30 per cent, and another 40 per cent is expected and credited in this note, while the mark has dropped in value from 0.0143 to 0.0058, leaving the present wage for skilled bulb workers in Germany approximately 15 cents per 100, as compared with 20 cents one year ago.

In other words, this report was written after they came back, and taking into account the further depreciation in exchange the situation is still more unfavorable to American labor than it was at the time these men made this study on the other side.

Thermos bottles: The comparative skilled-labor cost for producing 100 inside and 100 outside pint thermos bottles on the occasion of our visit to Weisswasser, Germany, January, 1921, was $2.41 to the American manufacturer as compared to 46 cents to the German manufacturer. The comparison at this writing is $2.05 to the American manufacturer as compared with 21 cents to the German manufacturer.

Lamp chimneys: The skilled-labor cost for producing a 10-inch duplex lamp chimney in Germany is 12 cents per 100 as compared with $2.11 in the United States. The same chimney is made in Czechoslovakia at a cost of 7 cents.

The skilled-labor cost for producing a 12-inch duplex lamp chimney in Germany is 14 cents per 100 as compared with 10 cents in Czechoslovakia and $2.96 in the United States.

The small help used in connection with shops producing chimneys costs 91 cents a week in Czechoslovakia and $1.68 in Germany and $13.75 in the United States.

Shades: A small electric shade, under 6 inches in size, costs 9 cents per 100 for skilled labor in Germany as compared with $1.87 in the United States.

A small electric shade, one end finished, costs 31 cents per 100 for skilled labor in Czechoslovakia as compared with $2.48 in the United States. The unskilled labor for the making of this article in Czechoslovakia is $2.59 per week as compared with $55 in the United States.

In Germany the skilled workmen are paid 26 cents per 100 for producing a 10-inch dome shade made from opal glass, while in the United States the skilled workmen receive $4.23 for a like number. The unskilled labor employed in making this class of ware receive $1.68 per week in Germany as compared with $55 in America.

The skilled-labor cost in Belgium for producing goblets, sherbets, cordials, egg cups, champagnes, wine glasses, and similar ware is 50 cents per 100 as compared with $2.72 in the United States. The unskilled labor in Belgium employed in producing this class of glassware is $5.64 per week as compared with $27.50 in the United States. This applies to the boys in the shop.

Our investigation justifies the statement that the wages paid to glass cutters are: Belgium, $11.46 per week; Germany, $7.14; Czechoslovakia, $8.44; United States, $30.

Mold makers are an important factor in the glass industry and their wages compare as follows: Belgium, $10.50 per week; Germany, $5.71; Czechoslovakia, $5.20; United States, $27 to $42.50.

The wages for unskilled and semiskilled workmen, such as are employed in connection with the furnaces, mixing room, and lehrs, are: Belgium, $7.50 to $9.36 per week; Germany, $3.29 to $6.43; Czechoslovakia, $5.85; United States, $19.20 to $33. In addition to this, we found that women were frequently employed doing the work that men do in America and receiving a much less wage.

I call the Senator's attention further to this fact: I made the statement the other night that the producers in this line of the glassware on the other side of the Atlantic declare that they are going to put their glassware into this country even if we impose a duty of 100 per cent. It is important to know that the consumers in this country are not getting the benefit of the great difference in the cost of production over there and on this side. These goods are put on the market in this country, but the importers are taking a very considerable profit, and the retailers are taking a very much larger profit. Our large importing department stores are among the greatest objectors to this tariff, because they are buying their goods in Europe at a very small fraction of what they are selling them for to our consumers on this side. They are not interested in our consumers. They are interested wholly in their own profits. It is from the standpoint of the importer's profit and the department store profit that Senators on the other side of the aisle seem to be discussing this matter.

Mr. JONES of New Mexico. Mr. President——

The PRESIDING OFFICER (Mr. LADD in the chair). Does the Senator from West Virginia yield to the Senator from New Mexico?

Mr. SUTHERLAND. I yield.

Mr. JONES of New Mexico. I put in the RECORD this morning a statement showing that the prices which are charged in Germany are now considerably higher than they were prior to the war.

Mr. SUTHERLAND. Higher in German marks but not in American money.

Mr. JONES of New Mexico. Oh, yes; in American money at the present rate of exchange. What the Senator is reading is the report which was made upon conditions in the latter part of 1920 and the early part of 1921, and the situation has marvelously changed since that time.

Mr. SUTHERLAND. The situation is going to change a good deal more in this way, if I may interrupt the Senator. Orders were received in Germany, I know, on the one item of electric-light bulbs for something like 50,000,000 of the bulbs. Because they had all they could do in manufacturing for their home consumption they could not take that order, although it was offered. As soon as conditions over there become more normal and they are able to increase their production and supply not only their home demands but something in addition, then the situation will very materially change. They are now beginning to catch up, and when they do they are then going to be able to flood this market with these materials. It is that danger against which we are now trying to legislate, so that within the next year or two our workmen will not be walking the street while workmen on the other side are busily engaged in filling orders from this side.

Mr. JONES of New Mexico. I recall the 50,000,000 order mentioned in the hearings, but that was before there had been any adjustment of prices in Germany with the present depreciation in exchange. But the late information is that we can not get any goods in Germany at any such prices. I doubt if there is that great difference in labor costs to-day. Of course, we know that the prices of labor in Germany have been increasing month by month, by leaps and bounds.

Mr. SUTHERLAND. Increasing in German marks, because as their money depreciates they have to give their laborers more marks, of course, but in the end they have not gotten any more or as much in American money or gold-standard money as they were getting before.

Mr. JONES of New Mexico. That is true in some lines, but in others it is not true.

Mr. SUTHERLAND. It appears to be true in this particular line.

Mr. JONES of New Mexico. I have no recent information regarding this particular line, but in some other lines wages have increased. However, if there is this great disparity in cost of labor in this country and Germany, and if that is the controlling factor, why is not this country being flooded with German goods?

Mr. SUTHERLAND. For the reason that I stated a few moments ago. It appears from the testimony before the committee that as to the particular item to which I refer, and by inference possibly in many other lines, their people are just beginning now to stock up. Their people during the war had not been engaged in productive industries. Their men were out on the battle fields. The demand for home consumption is just beginning to be felt there. They have been quite busy supplying domestic demands over there. But they have a potential producing capacity at a price so much less than we can produce for in this country that unless we give our people a fair rate of protection it will be a very short time until our factories will be closed down, or largely closed down, and our country flooded with these foreign-made materials.

Mr. JONES of New Mexico. I do not care simply to consume time in referring to the matter, but the position which the Senator takes is that under existing conditions in Germany this country is not being flooded with goods, but he thinks that at some time in the future——

Mr. SUTHERLAND. I read the figures showing that the importations were largely increasing.

Mr. JONES of New Mexico. But they are not increasing beyond the pre-war importations.

Mr. SUTHERLAND. At the same rate of increase we have had in recent months they will very largely swamp this country in a very short time.

Mr. JONES of New Mexico. So far as the general industry is concerned, I can say that our exports have been increasing very largely also compared with what they were prior to the war.

Mr. SUTHERLAND. But those are exports of the kinds of glassware which we have not under consideration at this time—plate glass, window glass, and machine-made glassware. We are exporting little or no glassware of the kind which we are now discussing, and we are importing it in increasing quantities.

Mr. JONES of New Mexico. What kind of ware?

Mr. SUTHERLAND. The kind that is called flint glass, the kind of glassware we are now engaged in discussing.

Mr. JONES of New Mexico. Not the chemical ware?

Mr. SUTHERLAND. That comes under the general term of flint glassware.

Mr. JONES of New Mexico. Yes; I know that, but the amount of it is not increasing.

Mr. SUTHERLAND. That was shut off entirely during the war, and a new industry started in this country. Of course, that is on a little different basis than some of the other branches of the flintware manufactures.

Mr. JONES of New Mexico. Prior to the war we were importing about $1,500,000 worth of it, and now our imports do not reach $200,000 worth.

Mr. SUTHERLAND. The Senator knows perfectly well that we imported all of our chemical glassware before the war. It was shut off entirely during the war and during that time this industry started up in the United States under what amounted to an embargo, fully justifying the Republican theory of protection. If we had given that industry protection years ago, we would have had that class of material made here, instead of being very greatly hampered in research work all over the country and not being able to get the kind of glassware that we needed during the war. During the war the condition of extreme protection, the most extreme that could possibly be devised, amounting practically to an embargo, permitted the industry to start up in the country and to supply the American consumer with the needed glassware, and to such a stage of perfection did it go that it now exceeds in quality the goods that were formerly obtained from Germany. Many of our institutions, those which used this glassware, fancied, as they did about a great many articles, that we could not possibly ever make the same quality on this side that was made on the other side.

Mr. JONES of New Mexico. The Senator, of course, can assign the reason which he has assigned for the industry not developing in this country prior to the war, but it is a mere matter of prophecy or guess.

Mr. SUTHERLAND. Oh, no. We know absolutely what has happened, and it is easy to figure why.

Mr. JONES of New Mexico. But we do know that it was the fact that there was none to be had from abroad that caused our people to begin its manufacture.

Mr. SUTHERLAND. We know that was the very highest degree of protection that we could possibly have.

Mr. JONES of New Mexico. There is no question about that.

Mr. SUTHERLAND. We know that under that condition this industry started up.

Mr. JONES of New Mexico. Yes; we know that, but the domestic industries were engaged in producing other things. They were making big profits, and it was no special inducement for them to undertake the production of the little amount of

chemical ware which was required in the American market. I think we may surmise one way as well as another. But the fact remains that the industry has now begun the production of such ware, and it is making a much better quality, and, as the Tariff Commission says, in its last analysis it is cheaper than any chemical ware made anywhere. Moreover, the manufacturers of this ware, as I pointed out on Monday evening, show that the present duty of 45 per cent is sufficient if they can have it applied to all of the goods used by the educational institutions of the country. If the Senator proposes to provide against the potentialities to which he has been referring, I submit that the 75 per cent rate which is proposed in the pending bill will not accomplish the purpose if the difference in the labor costs, as he has outlined them, are practically always to be taken into consideration. The manufacturers themselves say that 45 per cent is sufficient. Evidently they are not afraid of the various factors to which the Senator has been referring this morning. They do not look to have them result in anything practical in the way of competition.

Mr. SUTHERLAND. Mr. President, those who are most interested and who buy this chemical glassware in the greatest quantities appreciate now more than they ever before did the necessity of our not only keeping this industry alive but in a healthy condition; and they urge, as their statements which have been heretofore placed in the RECORD show, that a rate of duty be imposed upon its product sufficient to keep it going in order that we may make these goods on this side and never again be absolutely dependent upon the production on the other side of the water. We have learned that in reference to a great many articles.

Personally I favor the policy which will enable us to become as nearly as possible economically independent in the production of all of these articles. That is the difference between the attitude of the Senator from New Mexico and my own. The Senator from New Mexico wishes to employ men on the other side of the water in making these commodities, whereas I believe in employing them on this side.

Mr. JONES of New Mexico. Mr. President——

Mr. SUTHERLAND. If the Senator will excuse me for a moment, I desire to say that on yesterday I attended the Decoration Day exercises in one or two of the cities in my State where large quantities of glassware of different kinds are produced. It would be very illuminating to the Senator from New Mexico, as well as others who are not in favor of insuring to the American workingman proper returns for his labor by protecting the industries in which he is engaged, so that he may continue to be employed at the American scale of wages and be enabled to maintain himself and his family according to American standards of living, if they could go to those towns in my State and to other towns in other States to see the comfortable homes in which the workingmen live, talk to those men, and see what a high class of citizens they are, and how they are educating their children and bringing them up according to the best standards of American citizenship, though many of them perhaps came here one or two generations ago from the other side of the water. I am in favor of maintaining such homes in my State and in other States where this industry flourishes under normal conditions of reasonable protection and of maintaining for those people American standards of wages in order that they may rear their families and bring them up according to American standards.

Mr. JONES of New Mexico. Mr. President, the Senator from West Virginia certainly could not have been in the Chamber this morning when I stated my views regarding this very subject.

Mr. SUTHERLAND. I was in the Chamber; I have been here ever since the Senate convened, I will say to the Senator from New Mexico.

Mr. JONES of New Mexico. Then, I am sorry the Senator has placed a wrong interpretation upon what I said.

Mr. SUTHERLAND. I beg the Senator's pardon. I have no desire at all to misrepresent the Senator. What I said was an inference drawn from the general tenor of the argument on the other side of the question that, in my judgment, their theory would work out in the way I have stated. That, however, is a matter of opinion, of course.

Mr. JONES of New Mexico. I desire to state in the most emphatic terms that the Senator from West Virginia has not correctly stated my position regarding this matter.

Mr. SUTHERLAND. I beg the Senator's pardon. I certainly would not desire to misrepresent him.

Mr. JONES of New Mexico. I am not in favor of having the foreigner do the work. I am not in favor of destroying the very satisfactory conditions which the Senator from West Virginia has stated as prevailing among the workers in the glass industry of this country. I have not yet made any proposition regarding the items which are contained in the pending bill which, in my judgment, would have any such result.

Mr. SUTHERLAND. That is where the Senator from New Mexico and I differ.

Mr. JONES of New Mexico. But what I am opposed to is the placing of such excessive duties in this bill as to enable the industries of this country to monopolize the American market and to profiteer on the American people. I submit that the Senator from West Virginia has not yet shown that any such high duty as is proposed in this instance is necessary in order to maintain the prosperity of the workingmen who are employed in this industry.

Mr. SUTHERLAND. I did not interrupt the Senator at length at any time while he was making his speech. If he wishes to make another speech when I get through, he will have an opportunity to do it. I am willing to allow the Senator to interrupt me for a question, but, if the Senator will permit me, I prefer to go on. I shall yield the floor after a little while, and the Senator may then make his speech in his own time.

Mr. JONES of New Mexico. I beg pardon, but I did not want it to appear that the Senator had correctly stated my position.

Mr. SUTHERLAND. The point I am making is that it would be exceedingly difficult, and I believe impossible, to convince the Senator from New Mexico that the theory of protection is a proper theory upon which to frame a tariff law. I shall not attempt to do that; I can not hope to convince the Senator from New Mexico that the principle of protection is proper and that tariff duties should be levied against goods from foreign shores in order to build up American industry and safeguard the welfare of the American workingman.

Mr. SIMMONS. Mr. President——

Mr. SUTHERLAND. I yield to the Senator from North Carolina.

Mr. SIMMONS. I wish to ask the Senator a question. The Senator does not deny that there have been considerable exports of chemical glassware, does he?

Mr. SUTHERLAND. I understand that there have been some exportations, and I presume they have been due to the same reasons which operated in the case of bulbs and other commodities to which reference has been made—that there was a demand on the other side and that large orders coming from this side were being refused by the foreign manufacturers because at the time they had not been actively producing and the large home demand kept them going to the extent of their capacity. I presume that the production of chemical glassware in foreign countries during the war had largely fallen off; during that period it had not been used to any great extent; but now, the war having ceased, the demand for chemical glassware has become larger than their factories possibly are able to fill, so that the glassware was obtained where it could be obtained; that is, they came over here to get it.

Mr. SIMMONS. Mr. President, I notice that of chemical glassware there was exported during nine months of the year 1921 $189,000 worth. That would be at the rate, perhaps, of $225,000 worth a year.

Mr. JONES of New Mexico. The amount exported for the whole year was $231,735 worth.

Mr. SIMMONS. I only had the figures for nine months. Those exportations took place nearly three years after the war closed and the concerns in Germany manufacturing this product have probably gotten on their feet in that time as well as in Czechoslovakia, which are the countries the Senator seems to fear.

Mr. SUTHERLAND. Has the Senator the information as to where the exports went?

Mr. SIMMONS. That is exactly what I wanted to ask the Senator if he could tell us.

Mr. SUTHERLAND. I have not that information, but I will endeavor to secure it.

Mr. SIMMONS. Then I will read to the Senator what the Tariff Commission has to say about that. Speaking of these very exports it says:

> They have been largely to Canada, England, Cuba, China, Mexico, and Brazil.

I should like to ask the Senator why does he think that England and Canada and Brazil were importing these products from America if they could buy them so much cheaper from Germany or from Czechoslovaki? Would he not expect Great Britain to have gone to Germany for its supplies in 1921 instead of coming over here to America, if what he says is true, that they can make them for practically nothing over there and they do cost something over here?

Mr. SUTHERLAND. Mr. President, it has been shown from facts placed in the RECORD what the cost of the manufacture of this general class of glassware is, and we know that its production in the European countries was interrupted. I am unable to state all the reasons which compelled foreign countries to come over here, but the production of these goods in foreign manufacturing countries evidently was disturbed during the war, and the new factories which had risen here, no doubt making efforts to place their goods wherever they could, had found a market in Canada and in the other countries mentioned. We know, however, that our competitors can do in the future what they have done in the past, and produce this glassware, in proportion, as cheaply as they do the other classes of glassware for which figures have been given as to labor costs and the costs of material, and so forth. Therefore we know that, in order to protect this industry, we must give them a reasonable rate of duty, without shutting the foreign competitor out entirely.

Mr. SIMMONS. The Senator thinks we can not compete with Germany in this market in these goods, but that we can compete and do compete with Germany in the English market. In this market under the present law the manufacturer has a protection against Germany of 40 per cent, but in the English market, to which we have been exporting this product, Germany is upon an equality with us; there is no differential in the tariff, if there is any tariff on these goods at all, as applied to her and as applied to us. If we can go over to England and undersell Germany and supply the English market with this commodity, why can we not do it here in our own country, where we have under the present law a tariff wall against Germany of 40 per cent? The same thing is true with reference to Brazil, where we were underselling Germany, and of Canada, where we were underselling Germany, and of Cuba and China and Mexico, and all about. Practically all the countries, I suppose, where they do not make this particular material, are mentioned there as countries to which we are exporting this very product and were exporting it to the extent of $225,000 during the year 1921.

Mr. SUTHERLAND. Mr. President, something has been stated about profits and profiteering by our companies on this side manufacturing flint glassware. I desire to read a table from a publication printed in Brussels in December, 1920, showing the profits of Belgian flint-glass manufacturers, showing the capital and profits in francs:

Profits of Belgian flint-glass manufacturers.

[From a publication printed in Brussels, December, 1920.]

	Capital.	Profits.
	Francs.	*Francs.*
Belgian flint-glass works	1,250,000	5,355,000
Flint-glass works of Fanquez at Verg	250,000	357,000
Flint-glass works at Jumet	2,000,000	3,775,000
Flint-glass works of Pige	1,200,000	3,686,000
Glass works of Marin at Jumet	1,100,000	4,002,000
Glass works at Hamendes	2,000,000	5,870,000
Glass works of Paix	1,000,000	2,021,000
The D. Jones works of Charleroi	1,200,000	7,714,000

The total of eight glass plants, with a capital of 10,000,000 francs, had profits of 32,780,000 francs.

No great profit has been made by the flint-glass manufacturers of America. In substantiation of that statement the Tariff Commission reported the average profit made on the capital invested in tableware establishments to be about 10.34 per cent; the average profit in the blown and pressed tableware establishments to be one-tenth of 1 per cent; the average profit of plants making lighting goods to be 10.25 per cent; while the average profit in the lamp-chimney business was 4.86 per cent; all of which certainly is not an exorbitant profit when the risks of the business venture are thoroughly understood.

I think that is all I care to say at this time, Mr. President.

Mr. JONES of New Mexico. Mr. President, I want to read a statement from the Tariff Commission in this connection:

> The manufacturers that have established this new industry in the United States since 1914 are satisfied with the existing rate of duty of 45 per cent ad valorem, but urge that the provision in paragraph 573, which admitted about half of the total chemical ware imported free of duty, be repealed and that all chemical ware be made dutiable at 45 per cent ad valorem. They state that this is necessary in order to encourage and build up their new industry; that large quantities of the ware used in educational institutions are not required to be of a high grade, and therefore the cheaper ware will be imported free of duty when normal trade conditions are restored; and that while they can compete under the existing rate of 45 per cent, they can not compete with duty-free ware.

Inasmuch as it seems that the manufacturers of this product themselves are satisfied with a 45 per cent duty, I move——

Mr. SUTHERLAND. I will ask the Senator if that was not based upon American valuation.

Mr. JONES of New Mexico. It was not. It says "the existing rate of duty," which is 45 per cent on the foreign valuation.

Mr. BORAH. Mr. President, owing to the fact that we have no morning hour these days, and no opportunity is given to discuss matters which Senators may have in mind, I am going, for a short time, to ask the indulgence of the Senator who has the bill in charge while I discuss a matter which seems of some concern.

Mr. McNARY. Mr. President——

The PRESIDING OFFICER. Does the Senator from Idaho yield to the Senator from Oregon?

Mr. BORAH. I yield.

Mr. McNARY. The Senator from Idaho is going to discuss a very important subject, and I know that a great many of the Senators would like to hear what he is about to say. As there are only a few present, I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The roll was called, and the following Senators answered to their names:

Ashurst	Hale	McKinley	Shortridge
Borah	Harris	McLean	Simmons
Brandegee	Harrison	McNary	Smith
Bursum	Hitchcock	Moses	Smoot
Calder	Johnson	Nelson	Spencer
Capper	Jones, N. Mex.	New	Sterling
Caraway	Jones, Wash.	Newberry	Sutherland
Curtis	Kellogg	Nicholson	Townsend
Dial	Kendrick	Oddie	Underwood
Edge	Keyes	Page	Wadsworth
Ernst	Ladd	Poindexter	Walsh, Mass.
Fletcher	La Follette	Ransdell	Warren
France	Lenroot	Robinson	Watson, Ga.
Glass	McCumber	Sheppard	Willis

The PRESIDING OFFICER. Fifty-six Senators having answered to their names, a quorum is present.

THE RUSSIAN SITUATION.

Mr. BORAH. Mr. President, it is now near the end of the fourth year since the signing of the armistice which put an end to actual hostilities in the World War. The Genoa conference and its ignoble ending reminds us, however, that our peace is nothing but war carried on in a different way. All the old purposes and passions, the ancient animosities, the intolerance, the relentless bigotry, which characterize war were at Genoa and finally encompassed its failure. There was not in that conference—speaking of the conference as a whole—a single move or plan based upon true principles of reconstruction. Everything was conceived and carried out in the spirit of destruction and war. Although Europe, with its vast armies, its military alliances, its tax-ridden people, its hungry men and women, its crippled, its diseased, and its indescribable misery, was spread out before those assembled, this, and all this, was not sufficient to brace the conference to a single high and honorable resolve. The world has had to witness in its bloody and treacherous past many international conclaves, but none ever met with such great responsibilities confronting it, and none ever adjourned with so little to its credit.

It must be apparent to everyone that a continuance of the policies which have characterized the dominant powers of Europe since the war will either end in another world conflict or, if not in actual war, bring about such a condition of retrogression as will engulf the masses of all nations in unending peonage. The people want peace. They want to go back to work. They want to trade with each other and respect and recognize each other. But they are held back, as it were, in a leash by the policies of their political masters—policies which they are neither permitted to approve or condemn. Never was there a time when so much was being said about democracy, about unity and cooperation, and never have the people had so little to say about these things, and all things which involve liberty and life.

We have had four years of actual war—bloody and remorseless war—leaving as a legacy a debt which it is difficult for the human mind to comprehend, leaving the sick, the diseased, the blind, and the insane in every community. We have now also had four years of hate and vengeance, four years devoted to punishment and destruction. Is it not time to risk something, to venture something, in the cause of a new era, of a new order, to accept the creed, the fundamental tenet of which is live and let live? Has tolerance no part or place in postwar politics? Is every act or move of the victor Governments to be gauged solely by the question of material advantage or gain—coal or oil? Are questions of human rights and human liberties to have no weight in making up or shaping our policies? Shall we absolutely refuse to recognize those whose

form of government does not suit us or who have not something to give us in the way of advantage in matters of trade and barter? Will not recognition promote friendly relations, and may we not forego something of our views and risk something in the cause of greater amity and peace?

The Russian problem is conceded by all to be the key to a restored Europe, to a peaceful Europe. There can be no such thing as peace in Europe, or a normal condition of affairs, or disarmament, or relief from taxes and similar burdens until the Russian problem shall have been settled. That was made evident at every session of the Genoa conference. Only in proportion as they were able to deal with that subject were they able to hold sessions which seemed to have any vital motive or any ultimate purpose or object to be attained.

Not only does the Russian problem involve the prosperity of Europe but it is only less important to this country. We may pass tariff bills, but until Europe is restored and the markets of Europe again resume, we can not hope to enjoy the prosperity or the contentment in this country which we are entitled to enjoy. Until the markets of Europe shall have been opened, and the manufacturers of this country can find a market for their surplus products, it will be impossible for them to buy, as they would necessarily have to buy, of the farmer in order to insure his prosperity. While the tariff bill has its place in the consideration of affairs at this time, until there is a settlement of the European situation upon policies which permit of the return to the ordinary duties and obligations of peaceful citizenship, we can not hope to enjoy prosperity in this country. Until the markets of Europe are open and the people of Europe are buying our economic situation here will be unsatisfactory.

This is not the time, even if I were able to do so, to recount the history of the Russian people. It is as fascinating a story as has been written in the history of the world. But I do call attention very briefly to the part which Russia played in the Great War. It is a telling and at times the most controlling and determining part; a fact which, it seems to me, we ought not wholly to overlook at this time. It will enable us, it occurs to me, to form more tolerant, wiser, and sounder views concerning those people.

Lloyd-George, in his speech before the House of Commons upon his return from Genoa, used this language:

> The Russians are a gallant people, a loyal and patient people, a people capable of greater heights of unselfish devotion than almost any race in the world, as they demonstrated through the first two or three years of the Great War, when more particularly on one occasion they sacrificed themselves in order to save the Allies; but a people accustomed for generations to obey ruthless and relentless authority, and who, under the lash of despair, had been very formidable to their neighbors.

This tribute is not in excess of their deserts. At one time the Russian people mobilized 21,000,000 men in the Great War. In February, 1917, they had 14,000,000 men in arms, fighting over a front of 3,500 miles. They had arrayed against them at one time one-third of the entire German Army, two-thirds of the Austrian Army, the entire Hungarian Army, and two-thirds of the Turkish Army. They lost during the war 2,500,000 men upon the field of battle and between 3,000,000 and 3,500,000 wounded. They had prisoners taken to the number of 2,000,000, 1,000,000 of whom died in prison. They themselves captured some 400,000 German prisoners, 1,000,000 Austrians, and 300,000 Hungarians. Indeed, as the Premier of England said, at one time they sacrificed themselves in order to save the Allies.

No nation suffered more or sacrificed more in the Great War during those years than the Russian people, and the fighting which they did was never excelled on any front in the world struggle or elsewhere. As has been recounted before, being without arms, in a large measure deprived of the means of carrying on the conflict which they should have had, they stood beside their fighting comrades, seized weapons from the falling men, and continued the battle. Indeed, it is said that at times they fought the opposing forces with their bare fists. Those are matters which ought to throw some light upon what we may expect of the Russian people, as a people, when they are given an opportunity to demonstrate the qualities they actually possess.

During the war came the revolution in Russia. It has had the course of all great revolutions. It came rather unexpectedly, even among the Russian people. It took a course in some respects wholly unexpected. Indeed, human foresight can not foresee or gauge the course of these great mass movements, these revolutions which shake continents. There is no law, human or divine, by which to judge them. They are a law unto themselves. In defiance of all preconceived plans or mortal schemes they set up their own standards and map out, even as they move, their own course. Eccentric, unnatural, remorseless, some blind, inherent force seems to drive them along their bloody pathway in utter disregard of the purposes of their instigators, and exempt from all control of their supposed masters. Their end and their results no one can foresee.

The final results are often beyond all anticipation, even of their most powerful actors. If there be in human affairs such a thing as fate, imperious and inexplicable, master of the human will, transcendent over the human intellect, it is most manifest in these upheavals of human passion. We see crimes committed, with no apparent object in view; cruelty, senseless and purposeless, practiced; deeds done to the utter confusion of the perpetrators; policies, ruthless and self-destructive, urged and pursued; and yet, in the end a result obtains conducive to human progress, vital to the welfare of the human family and outweighing in good all the deplorable sacrifices by which it was achieved. In spite of all, the fateful drama goes forward, sinister and revolting figures cross and recross the stage, scenes close and the curtains fall, chaos seems to rule supreme; nevertheless, out of this woof and warp of crime and incompetency a higher life, a better people, a nobler nation, emerges. This was notably true as to the French Revolution, and I doubt not at all will be true of the Russian Revolution. In common with all who deplore human suffering and execrate those who inflict cruelty upon their fellows, I would prefer that these great changes could come about in a different way. Nevertheless, the change must come—it is a part of the law of human progress, the reason for which I am little able to understand and the justice of which it seems utterly useless to question.

One striking feature of this great movement which ought not to be overlooked, because it has had a very marked effect upon the attitude of mind of the Russian people, is that from the beginning the Allies expressed little sympathy with the revolutionary movement in Russia. With the exception of the United States, as those views were expressed by President Wilson, there was no true sympathy upon the part of the governments engaged in the war. Every move that was made seemed to have for its purpose the augmenting and sustaining of counter revolutions and, as a very great Russian has said, while the Allies seemed anxious to have Russia back in the war, there was little expression of feeling as to what the ultimate result of the struggle for free government in Russia should be.

As I have said, there was an exception to that in the expression made by this country through President Wilson, and, if I may, I take a moment to read the statement by the ex-President in his address to the Congress on January 8, 1918, in stating the war aims:

> The evacuation of all Russian territories and a settlement of all Russian questions such as to insure the best and most untrammeled cooperation of other nations of the world in order to afford Russia a clear and precise opportunity for the independent settlement of her autonomous political development and of her national policy, promising her a cordial welcome in the League of Nations under institutions of her own choice, and besides a cordial welcome, help, and assistance in all that she may need and require. The treatment meted out to Russia by the sister nations in the months to come must be a decisive proof of their good will, of their understanding of her needs as apart from their own interests and of their intelligent and disinterested sympathy.

That was, it seems to me, the true principle "under institutions of her own choice," sound and ancient American doctrine. "Afford Russia a clear and precise opportunity for independent settlement of her autonomous political development." Wiser words in regard to Russia have not been spoken. These were spoken January 8, 1918, long after the fall of Kerensky and the advent of Lenin.

The expression of that view at that time was received throughout Russia with approval, and undoubtedly created a feeling of confidence in the American policy. It is one of the unfortunate things of the war, one of the things which has left disaster and suffering in its wake, that that policy in the first instance expressed has not been undeviatingly pursued by the Government of the United States. We had nothing to gain by deviating from the most sympathetic and helpful policy toward the Russian people, and we had everything to lose by adopting a different course.

There has been in history, so far as I know, but one revolution to be compared with the Russian Revolution, and I want to draw some comparisons to-day between the French Revolution and the Russian Revolution. I want to look in upon the French Revolution during its progress, observe the issues and the principles which were raised, the questions which were presented to the outside nations, and the manner in which outside nations dealt with the subject in hand. It seems to me it establishes a precedent to which we may recur, if not for absolute guidance, yet for wise suggestion as to the present situation.

There is scarcely a principle or a proposition which has been raised by outside nations with reference to the Russian Revo-

lution which was not raised and presented and discussed and considered and determined by outside nations with reference to the French Revolution. There was scarcely a question of policy considered at that time different from that which has been presented with reference to the Russian Revolution. I am going to recur briefly, in order to secure a better statement of those issues than I can present, to the great debate between Pitt and Fox relative to what England should do in the matter of treating and trading with the French Republic and with reference to its recognition.

We should bear in mind that for 12 long years two of the ablest statesmen of the English-speaking tongue discussed the policy of England with reference to the French Revolution. Then I want you to go with me to the policy which was adopted by our own Government under the leadership of men equally distinguished in statesmanship and, to my mind, much wiser in the policy which they adopted.

We are told in these days that nothing has ever occurred like the Russian Revolution in its atrocity, its inhumanity, and its cruelties, and nothing like the questions presented by it have ever before been presented. As we go through this debate, I invite attention to the fact that the things which we are discussing now are the things which they discussed in those days.

Mr. Pitt said in the famous debate on February 3, 1800:

I consider the French Revolution as the severest trial which the visitation of Providence has ever inflicted upon the nations of the earth.

This debate was taking place during the question of treating and trading with the Government of France, Mr. Pitt urging that the system which they had set up was in contravention to all orderly governments, that it had utter disregard for the sanctity of property or for the sacredness of life, and that the people who were at the head of it could not be trusted, and for England to recognize such a system of so-called government was to encourage the spread of the doctrines which they were teaching, which would result ultimately in the destruction of all orderly forms of government.

Upon page 98, of volume 3 of these debates, it is said:

They—

The French Republic—

had issued a universal declaration of war against all the thrones of Europe; and they had, by their conduct, applied it particularly and specifically to you—

That is, the English Government.

They had passed the decree of the 19th of November, 1792, proclaiming the promise of French succor to all nations who should manifest a wish to become free; they had by all their language, as well as their example, shown what they understood to be freedom; they had sealed their principles by the deposition of their sovereign; they had applied them to England by inviting and encouraging the addresses of those seditious and traitorous societies who from the beginning favored their views, and who, encouraged by your forbearance, were even then publicly avowing French doctrines and anticipating their success in this country; who were hailing the progress of those proceedings in France, which led to the murder of its King; they were even then looking to the day when they should behold a national convention in England formed upon similar principles.

How similar to the fear of the spread of the soviet doctrine into this country at the present time. One of the main arguments against recognizing the soviet government is that this would accentuate and tend to spread and to some extent honor the doctrine which they say is inimical to all forms of order and orderly government.

Again, he said:

What would have been the effect of admitting this explanation? To suffer a nation, an armed nation, to preach to the inhabitants of all the countries in the world that themselves were slaves—

That is, the inhabitants of the other countries—

and their rulers tyrants; to encourage and invite them to revolution, by a previous promise of French support, to whatever might call itself a majority, or to whatever France might declare to be so. This was their explanation; and this, they told you, was their ultimatum.

This was the view of Mr. Pitt relative to what he called an "armed system," not a government, not a responsible political entity, but an armed system controlled and directed by men who had no regard for property, for life, or for established order.

Upon page 105 it is said:

These terms should be—

That is, these are the terms which it was proposed should be made to France—

That these terms should be the withdrawing their arms within the limits of the French territory; the abandoning their conquests; the rescinding any acts injurious to the sovereignty or rights of any other nations; and the giving in some public and unequivocal manner a pledge of their intention no longer to foment troubles or to exite disturbances against other Governments.

Mr. President, very similar, indeed, to the request which the Premier of England thought essential, and the idea which seems to be uppermost in the mind of the Government at Washington, a request which seems to be understood as necessary to be granted before any recognition of the soviet government can be had.

I call attention to this that we may understand that these questions have been met, and met by American leaders and American statesmen, as we shall see in a few moments. Before I go to that I want to read a paragraph or two in the reply from Mr. Fox. The reply was made on the same evening, and to my mind the greatest piece of debating of which history gives a record.

Fox, who was contending for the recognition of the French Republic and for treating and trading with the French Republic, said:

Gracious God! Were we not told, five years ago, that France was not only on the brink but that she was actually in the gulf of bankruptcy? Were we not told, as an unanswerable argument against treating, that she could not hold out another campaign; that nothing but peace could save her; that she wanted only time to recruit her exhausted finances; that to grant her repose was to grant her the means of again molesting this country; and that we had nothing to do but persevere for a short time, in order to save ourselves forever from the consequences of her ambition and her Jacobinism? What! After having gone on from year to year upon assurances like these, and after having seen the repeated refutations of every prediction, are we again to be seriously told that we have the same prospect of success on the same identical grounds?

For five years, Mr. President, there has appeared in a large portion of the press of this country and from the lips of high officials the statement that within 30 days or 60 days, or at most within a brief period, the soviet government would collapse; that all we had to do was persist in the policy of nonrecognition or nonaid, either one way or the other, and it must inevitably follow. For five years the soviet government has been meeting every test which can be applied to a government from without and from within. At the present time it seems to be conceded upon all hands that it is much stronger than it has been at any time during those five years. Notwithstanding that fact, the prophecy is still put forth—for the consolation of those, I suppose, who put it forth—that within a short time the soviet government is to fail, and to recognize it is to aid in its maintenance a little longer.

Further on Mr. Fox said:

Look back to the proclamations with which they set out. Read the declarations which they made themselves to justify their appeal to arms. They did not pretend to fear their ambition, their conquests, their troubling their neighbors; but they accused them of new modeling their own Government. They said nothing of their aggressions abroad; they spoke only of their clubs and societies at Paris.

Sir, in all this, I am not justifying the French—I am not striving to absolve them from blame, either in their internal or external policy.

Again he said:

I therefore contend, that as we never scrupled to treat with the princes of the house of Bourbon on account of their rapacity, their thirst of conquest, their violation of treaties, their perfidy, and their restless spirit, so we ought not to refuse to treat with their republican imitators.

Mr. President, when the whole story of all the cruelties and the atrocities of the soviet government shall have been told, it will not exceed or excel in brutality, in inhumanity, in cruelty those of a government which we have recognized ever since we have been in existence. My friend, the able Senator from New Jersey [Mr. EDGE], said the other day that to recognize the soviet government with its present policies would be infamous. We recognized the czar government at a time when the peasantry of Russia was tied to the land, whipped and sold and treated as common chattels. Is there anything in the present situation more infamous, more intolerable? Human language is inadequate to tell the story of the wrongs which have been heaped upon the peasantry of Russia these 300 years—who said during these years we should withdraw recognition of Russia? It is said that we should not recognize Russia because the rights of property are not respected. Did we not recognize the old government when life was not respected; when human beings were ranked in dignity with the land?

Further on he said:

No man regrets, sir, more than I do the enormities that France has committed; but how do they bear upon the question as it now stands? Are we forever to deprive ourselves of the benefits of peace because France has perpetrated acts of injustice?

Mr. STERLING. Mr. President, may I ask the Senator from whom he is quoting?

Mr. BORAH. Charles James Fox in reply to Pitt. I will pause to say that history has justified beyond peradventure the speech of Charles James Fox. It has been said that no man ever lost so many motions in the House of Commons as Fox and no man was so often right. There are those who find consolation in that fact.

Now we come, Mr. President, to the doctrine upon which America proceeded, although this is stated by Mr. Fox. Said Fox:

I think the people of France, as well as every other people, ought to have the government which they like best themselves; and the form of that government, or the persons who hold it in their hands, should never be an obstacle with me to treat with the nation for peace, or to live with them in amity.

Let us turn now, Mr. President, from the great debate between two great English statesmen, which continued off and on for 12 years. During its continuance there continued war, conflict, the sacrifice of human life, and continued deepening misery. Upon this side of the water the same question arose as to whether or not we should recognize the Republic of France.

I invite the attention of those who profoundly respect the Father of Our Country and the Cabinet which surrounded him to some of the views which they expressed, the action which they took, and the result of policies which they pursued. Upon the 18th day of April, 1793, seven years prior to the debate when Pitt and Fox were still discussing the question, President Washington sent a letter to Mr. Hamilton, and, as I remember, to all other members of the Cabinet, and in that letter was this question:

Question 2. Shall a minister from the Republic of France be received?

Question 3. If received, shall it be absolutely or with qualifications; and, if with qualifications, of what kind?

That, Mr. President, was on the 18th day of April, 1793. On the 6th day of April, 1793, there was established in Paris what was known as the Committee of Public Safety, 12 days before the writing of this Cabinet letter. That Committee of Public Safety held within its control and its unlimited discretion the life of every man, woman, and child within the confines of France. At the head of that Committee of Public Safety was Barere, of whom Macaulay could say he "tasted blood and felt no loathing; he tasted it again and liked it well." But the dominant and controlling figure of that committee was Danton. That committee was without law save the discretion of those who sat—nine of them—and the property and the lives and the destiny of France were absolutely within its control. The power of Lenin could not be greater, nor more arbitrarily or cruelly used.

What happened? This letter was sent out on the 18th day of April, 1793. On the 19th day of April, 1793, the Cabinet met and they unanimously decided to receive the minister from the French Republic. There was no dissenting voice among the members of the Cabinet. Shortly thereafter, on the 18th of May, 1793, Washington recognized Genet as minister of the French Republic in pursuance of the policy which had been outlined at a Cabinet meeting and agreed to unanimously by the Cabinet.

I call attention, Mr. President, to the fact that this recognition took place at a time when I have said that Barere and Danton were at the head of the Committee of Public Safety. They continued until the 6th day of April, 1794, a year to a day subsequent. Upon the 6th day of April, 1794, Robespierre reorganized the Committee of Public Safety and became its controlling spirit; and there has not been in all the history of the world such austere depravity as characterized the reign of terror under the last months of Danton and until the 28th day of July, 1794, when Robespierre died under the guillotine which he himself had been using in such a marked and ruthless way. During that time the wise, the farseeing Washington continued to recognize the French Republic.

Mr. President, let us ascertain, if we can, upon what principles Washington and his Cabinet acted. However, before I proceed to that I will go a little further into some of the details of the organization of the French Republic during those days. On June 20, 1789, the representatives of France, finding the great hall closed, adjourned to the tennis court, and there took solemn oath that they would not adjourn until France should have a new constitution. If any particular and single event may be considered as the beginning of the French Revolution, I presume this might be so considered.

On July 14, 1789, the Bastille fell and the mob took control of Paris. In August, 1789, the assembly issued its declaration of the rights of man, which was a general statement of principles and the basis of civil society. The declaration of rights as made at that time was just as obnoxious, quite as much despised, and quite as much feared by the established order which then prevailed in Europe as is any enunciation which has come from the soviet government. It was regarded as inimical to all forms of government. Men were sent to prison in England for even advocating it; much more would they have been punished for practicing it.

In August, 1789, the assembly abolished all orders of nobility—the peerage, hereditary distinctions of all kinds and prerogatives of all kinds. On January 17, 1790, the Jacobin Club became the real political power in Paris and throughout France. It was a case of mob rule for a time.

In June, 1790, France was geographically redistricted and rearranged; her whole judicial system was revised; the power of the National Assembly was enlarged; church lands were confiscated; and all the old landmarks of government were obliterated. The guillotine was set up, and daily did its bloody work, and hundreds were executed.

In June, 1791, the King and Queen undertook to escape from France; were captured and brought back, and thereafter to all practical purposes were prisoners. On April 20, 1792, France declared war on Austria, and the long wars growing out of the French Republic began. Belgium was shortly thereafter invaded. On June 20, 1792, the mobs of Paris overawed the assembly and forced their way into the King's palace.

On August 10, 1792, Danton, at the head of a vast mob, swept over the assembly and the monarchy, overpowering everything. The streets of Paris ran red with blood, and other cities were laid bare to the mob. About this time took place what is known as the fearful massacre of the prisoners in the different jails. On September 21, 1792, the convention abolished royalty and proclaimed a Republic. In November, 1792, began the trial of the King and shortly thereafter of the Queen. On November 19, 1792, the French Assembly issued what Pitt called a universal declaration of war, of which we have read in his speeches. On December 15, 1792, they issued another general proclamation of the same nature, declaring that the French Army would go to the assistance of all peoples who wished to abolish their governments and establish governments in harmony with the principles of the French Republic. On January 21, 1793, Louis XVI was executed, and thus the revolution threw down the glove to all Europe. On October 16, 1793, the Queen was executed. So, Mr. President, within three months after execution of the King and prior to the execution of the Queen, Washington and his compeers saw fit to recognize the existence of the French Republic. Between the time of the execution of the King and the execution of the Queen occurred what was known in France as the reign of terror or mob rule. No language, Mr. President, which has been used, or which could be used in the description of the atrocities of the soviet government could exceed the atrocities which were practiced during those months. There must have been a deep, a profound reason for the recognition of that Government in France, to which we will come in a few moments.

On June 2, 1793, Lyon, by decree of the convention, was doomed to destruction; its name was to be blotted out; 3,500 were arrested, and half of them thrown into prison and massacred. Toulon and Marseille suffered likewise. This was the condition, Mr. President, in France at the time of the action of Washington's Cabinet.

Now, who composed that Cabinet? Excepting always, of course, living Cabinets, it was undoubtedly the greatest in all history, not only of our country but of all the world. They were not only administrators but they were builders of government; they were constructors; they were the carpenters who set up the fabric. There have not been in the history of mankind two men who better understood the science of government than Alexander Hamilton and Thomas Jefferson. The wide-ranging genius of Jefferson surveyed every possible activity within the political world, and Hamilton's constructive genius has never been excelled in the history of mankind. With them sat Washington, and these men, none of them in sympathy with the things which were being practiced in France, for reasons of peace, of stability, and the fundamental principle that a people have the right to set up their own government, recognized the existence of the French Republic and continued to do business with it from the 18th day of May, 1793 on, and the relationship was never broken.

I digress to quote a few words from Alexander Hamilton upon the French Revolution. It is one of the arguments, or rather one of the statements, made by those opposed to the recognition of soviet Russia that all who favor it are Bolsheviks and more or less in sympathy with the practices which have prevailed in Russia. I presume the same arguments would have been made in that day against Hamilton and Jefferson had there been living at that time those with such barren processes of thinking as seem to prevail upon the part of those who put forth these assertions now. Of course those who make such assertions well know them to be false, but falsehood is the handy weapon of the intellectual bankrupt.

Hamilton said, speaking of the French Revolution:

A league has at length been cemented between the apostles and disciples of irreligion and of anarchy. * * * The practical development of this pernicious system has been seen in France. It has seemed as an engine to subvert all her ancient institutions, civil and religious, with all the checks that seemed to mitigate the rigor of authority; it has hurried her headlong through a rapid succession of dreadful revolutions which have laid waste property, made havoc among the arts, overthrown cities, desolated provinces, unpeopled regions, crimsoned her soil with blood, and deluged it in crime, poverty, and wretchedness; and all this as yet for no better purpose than to erect on the ruins of former things a despotism unlimited and uncontrolled, leaving to a deluded, an abused, a plundered, a scourged, and an oppressed people not even the shadow of liberty to console them for a long train of substantial misfortunes, of bitter suffering.

George Washington, in a letter written later, quoting from page 140 of Lodge's Life of Washington, says:

My conduct in public and private life, as it relates to the important struggle [of the French Revolution] in which the latter [France] is engaged, has been uniform from the commencement of it, and may be summed up in a few words: That I have always wished well to the French Revolution; that I have always given it as my decided opinion that no nation has a right to intermeddle in the internal concerns of another; that every one had a right to form and adopt whatever government they liked best to live under themselves.

Notwithstanding the conditions which prevailed in France—the confiscation of property, the disregard of established institutions, the repudiation of debts, and the atrocities which were practiced—Washington was not willing to deviate from the proposition that a people have the right to set up whatever form of government they wish to live under and that it is the business of outside nations to recognize whatever form of government they may themselves see fit to establish. He talked little or not at all of trade, of safety of investments, of Bourbon debts—these matters he wisely supposed could be better handled after cordial relations were established. Time proved he was correct in his view. It was upon the basis of this policy, and in due regard for these principles, that the wise men sitting about the Cabinet table in 1793 concluded to recognize the French Republic. What was the result of it? Instead of the propaganda going forward in this country which seems to have been feared then from some sources, and is now feared with reference to Soviet Russia, it ceased almost entirely. The American Republic was a friend to the French people. There was no occasion to continue acts of enmity to our institutions or disregard of our wishes. The policy which Washington pointed out in 1793 and established was the policy to which England had to come, and to which Pitt, supported by Fox, had to accede after they had brought Europe to turmoil and destruction and war for 15 long years.

Who can doubt in the light of history that had it been within the mind of Pitt to have accepted the policy of the wise leader of the western Republic the great war between France and England would have terminated 10 years before it did? And just so surely as the policy which is now being pursued is pursued with reference to Soviet Russia it will inevitably continue and prolong the misery, the turmoil, and the discontent of Europe.

Mr. President, it may be possible, by reason of the policies which are being pursued, to break down the soviet government. It may be possible that it will fall. I do not pretend to say that it will not. But suppose the soviet government falls. What then? What takes its place? Here are 170,000,000 people in distress and in turmoil. There is only one directing force in it, and, as Lloyd-George said at Genoa, there they sit, representing this 170,000,000 people. Suppose we destroy it, break it down, and plant chaos in the midst of Russia. What then? What government takes it place? What power will control and bring order? Who will speak to the warring forces and say: "Be still"? Are we willing to break down the only semblance of authority, the only semblance of order, which prevails in that country and leave it to utter chaos? What do we propose to give them instead? Shall we hunt out some representative of the old régime and force him upon the Russians? That would be infamous. Or shall we connive at the destruction of their present government and leave them to bloody chaos?

Mr. President, this is, as I might say, preliminary to the discussion of the practical questions, the vital questions, which will necessarily arise in connection with recognition. I am not going to-day to undertake to discuss them, but shall do so very shortly. I wanted to say this much as a preliminary to the discussion of the more practical propositions. There is the practical proposition of commercial relations, debts, and property. I shall discuss those things, I hope, very soon. I want to say in closing that I make no concealment of the fact that I have sympathized from the beginning with the revolutionary movement in Russia. I expressed that opinion early in 1917, and I entertain the same feeling now.

No people, with whose history I am familiar, had been scourged and tortured as the Russian people. They had suffered much and they suffered long at the hands of their corrupt and merciless masters. The unrelenting and sanguinary rule of the Romanoffs has no parallel in all the annals of crime. If ever a people had ample justification for overthrowing their government and seeking surcease of sorrow in a new life, these people were more than justified. The Great War, destroying, as it did, the rooted institutions of centuries, also broke some fetters. In Russia, at least, they heard and believed that this war was being fought in the interest of the people, of democratic government. With this gospel of a new life ringing in their ears, the tragic year of 1917 was ushered in. It found the whole social and economic fabric of Russia in collapse; a court mildewed with the stupid superstitions and loathsome lechery of Rasputin; venal public ministers bartering their influence in the highest market; millions cold and hungry in the streets with bacchanalian debauchery in the places of power. Then came the breaking up of the great deep.

The elemental forces of human nature, crazed with hunger, wild with the hope of liberty, were released and the Russian Revolution was born. The reign of the Romanoffs was in any event to have an end. In that stupendous fact certainly all lovers of humanity may rejoice. The manner of their going, could it have been controlled, all would have had different, but that this dynasty should end once and for all is one of the compensations of the war. It had cursed and encumbered the earth long enough. And those who believe as I do in that kind of human progress which is initiated and sustained, not alone by great personages or dominant figures, nor guided by select groups of men, but which comes forward by reason of the great dumb forces of oppressed and outraged and downtrodden humanity, still believe that "the judgments of the Lord are true and righteous altogether."

Some will say such reasoning is to approve and commend these things done in the name of revolution. You might as well charge me with approving the atrocities of the French Revolution because I believe such revolution was unavoidable, that it marked the beginning of a new and far better era in France. I do not regret the Russian Revolution, but I do deplore its cruelties. Humanity seems sometimes to get into a trap from which there is no escape except to hew its way out. I regret the method, but I would not have humanity eternally entrapped. In these great social upheavals kings and lords and leaders are of but little concern and criticism is of no avail. The people are patient and long suffering before they are cruel. I do not know of a revolution in all history, a revolution which had its roots deep down in the sufferings and the sorrows and sacrifices of the people, but was amply justified and in the end altogether for the betterment and the advancement of mankind. I venture to believe the Russian Revolution will be no exception. In the end there will emerge a freer, a more released, a more democratic Russia. Untrained in the affairs of self-government, untutored in the duties and obligations of a free people, schooled alone by 300 years of oppression and venal mastery, they are nevertheless a great people, a patient, kindly people, and from this fearful ordeal they will come forth a peaceful, home-loving, and self-governing people.

Ever since the Russian soldier carried back from France in the Napoleonic wars the seeds of democracy, a higher conception of liberty, there has been among them an unquenchable desire, an unconquerable purpose to be unchained and free. Now, belated but inevitable and upon the most stupendous and bewildering scale ever presented to the consideration of mankind, through blood and travail, through unspeakable suffering and infinite misery, they are working out their salvation. I make no apology for the awful mistakes committed on the way, but in the words of the leader of our own revolution, the father of our own country, I take the liberty to say:

Born in a land of liberty, my anxious recollections, my sympathetic feelings, my best wishes are irresistibly excited whensoever in any country I see an oppressed nation unfold the banners of freedom.

I believe the recognition of the de facto government of Russia would be in the interests of world peace, of the economic rehabilitation of Europe, and of the ultimate triumph of democracy throughout Russia. It would also be in harmony with the best traditions of our Republic and the high precedent established by one whose poise no political storm could disturb and whose intellectual vision neither political bigotry nor personal prejudices could cloud.

I am going to close my remarks by a quotation from Mr. Root when he was in Russia as a representative of this Government. In an address to the Russian provisional government Mr. Root said:

As we look across the sea we distinguish no party, no class. We see great Russia, as a whole, as one mighty, striving, aspiring democracy. We know the self-control, essential kindness, strong common sense,

courage, and noble idealism of the Russian character. We have faith in you all. We pray for God's blessing upon you all. We believe you will solve your problems, that you will march side by side in the triumphant progress of democracy until the old order everywhere has passed away and the world is free.

Why can not we live up to that doctrine? Shall we forever pay lip service only to the great principles of humanity, to the great truths of international amity? I care less for the teachings and the doctrine now prevailing to some extent in Russia than many who decry them most. My ideal of government is that of a government of law—orderly, regulated liberty. I care nothing for theories or doctrines over there; I see only 170,000,000 Russian people, a great people, ultimately to be a powerful people, struggling in almost blinded madness to be free of the inhumanities and the cruelties of the past. It is with those people as a people that we should sympathize, and of them as a people we should think when forming our policies and mapping out our program. To say that the people do not want the present government of Russia is not borne out by the facts. It has stood for five years against conspiracies from within and conspiracies from without. The people have fought and sacrificed for it because they believed that it is the way to a better government and a freer democracy. It is their government. It is better for the world, better for peace, better for humanity, and better for the Russians that we recognize it and seek through friendly intercourse to modify those provisions which conflict not only with their interests but, as we believe, with the interests of all nations.

Mr. EDGE. Mr. President, I have listened with great interest to the very able presentation of the Senator's viewpoint, and his conviction that the recognition of the soviet government is necessary, as he stated almost at the close of his address, in order to bring about world peace. I am just as firmly convinced that the recognition of the soviet government by our Government would have just the opposite effect, and that world peace will be absolutely impossible if the American Government subscribes to the doctrines of the soviet government, as is demonstrated by the happenings almost every day and every week on the other side of the ocean.

The Senator from Idaho drew a very interesting parallel between the French Revolution and the Russian Revolution, and what followed in each case. I am not going to discuss the question of the justification of the Russians or of the French in starting their separate revolutions. I believe in many ways the people of both countries were undoubtedly eminently justified; but it is not a question of drawing a parallel, as I view it, between the fact that the Russian Revolution occurred and that the French Revolution occurred as they did, but it is a question of drawing a comparison between what followed those revolutions in the way of policy of government. Following the French Revolution was the establishment of a great republic, founded on the principles of liberty and justice, the recognition of contracts, and the sanctity of business understandings very similar to our own. What followed the Russian Revolution was, first, not the bolshevistic régime, as I recall it without refreshing my knowledge of the history, but the Kerensky régime, which was a constitutional government, and which was duly recognized by our Government; and following that the bolshevistic, soviet government.

So, when the parallelism between the two revolutions is drawn, or when the justification for those revolutions is discussed, it seems to me it is apart from the situation as we must face it. It is entirely a question of the kind of a government we are called upon and requested to recognize.

Even Lloyd-George, before the speech delivered in the House of Commons which has been quoted by the Senator from Idaho, in addressing the conference before he left Genoa, among other things, stated as follows:

> It is no use concealing facts from ourselves, because they have an unpleasant habit of coming up again after you have buried them. The real fact is that there have been such divergences of opinion upon questions of vital principle that it has been found impossible to reconcile them. There is no doubt at all that the two systems are quite irreconcilable—the system in Russia and that obtaining in other parts of the world.

I think America's traditions and America's position are splendidly put in these few lines from the last letter of our great Secretary of State, Mr. Hughes, which in principle follows the plain policy contemplated by the previous administration. Secretary Hughes stated as follows, in part:

> Business intercourse consists in the making of contracts and the acquisition of property rights. Nations may adopt what policies they please for the future conduct of their local affairs. If these policies are not enlightened, production will languish and trade will shrivel up; still, they will be within their rights in determining their future policy in local affairs. But if they seek international intercourse they must perform international obligations. When they have invited intercourse with other nations, they put themselves outside the pale if they enter upon a policy of confiscation. No State is entitled to a place within the family of nations if it destroys the foundation of honorable intercourse by resort to confiscation or repudiation, and fails to maintain an adequate system of government through which valid rights and valid engagements are recognized and enforced.

The Senator did not to-day touch upon the practical side of this. He did so briefly in a colloquy with the Senator from New Jersey a few days ago, and, as I recall his statement then, he advanced the thought that because the Russian representative at Genoa had agreed to recognize the previous debt of the United States, a hundred and eighty odd million dollars loaned to the Kerensky government, but had agreed to recognize that debt only providing we would assist other nations of the world to advance a billion dollars to Russia, therefore we could not say that the Russian Government was maintaining a policy of repudiation of that debt.

If I follow correctly the Senator's line of reasoning—and I do not want to state any thought as his which he did not utter—it appeals to me that Russia is approaching us, then, for nothing more nor less than an unadulterated bribe. In other words, if we will help loan them $1,000,000,000, they will recognize a previous debt which they have continuously refused to recognize. But we did not do it, since which time Russia, as I understand, has practically withdrawn any such proposition.

Much stress has been placed upon the German-Russian treaty for commercial exchange. The Senator from Idaho, I think, stated the other day that 14 countries had entered into commercial relations with Germany, not a full recognition of the Government, but simply commercial understandings. Of course, as the Senator himself admitted a week ago, there is nothing in the world to prevent an American business man doing business in Russia at the present time.

I understand that a large volume of business is being done by American business men with Russia without any false sense of security from our Government, which, it seems to me, would be the result of a recognition by our Government of the soviet government. In other words, they are doing it absolutely at their own risk.

As to the Russo-German commercial treaty, which was rather looked upon by other nations of the world as a sort of a coup on the part of Germany from an industrial and commercial standpoint, I read recently in a metropolitan newspaper that this is the way the business men of Germany, with that apparently very favorable treaty in existence, view commercial intercourse with Russia under the present policy of the Russian Government.

The Russo-German Association, which is an association for the promotion of mutual trade relations between countries, represents 1,200 industrial firms, 50 chambers of commerce, and 50 other affiliated bodies.

> This association of Berlin business men concerned in trade with Russia has voted that no trade with Russia is possible so long as the Bolshevik government remains in control or until four conditions are fulfilled: Restoration of security of life, property, and contracts, and complete freedom of action.

That is apparently a large, representative commercial organization in Germany. Despite the ground-floor understanding that their Government apparently has obtained with Russia, they stand stronger for national honor than they do for possible commercial advantage.

I fear that the recognition of the soviet government by our Government would simply deceive the business men of America. As stated, they can do business now with Russia if they elect to do so, but when we recognize another government, with that is supposed to go the protection of American nationals in that country, or any other country so recognized.

How are we able to protect the American business man doing business in a country which claims at the outset that they will not guarantee property rights, and who have maintained a policy of confiscation?

I appreciate, as the Senator has said, that there was confiscation in the French Revolution; that there was confiscation in all revolutions as a part of the war; but I can differentiate between that kind of confiscation and the policy of a government following a war and following a proclamation of peace which still continues to maintain that property rights and the sanctity of contracts have no part in that government.

No; Mr. President, while I sympathize, as the Senator from Idaho does, with the people of Russia and have no brief for the czarist government which went before, still they are following false gods, and I believe we will be doing an injury and continue to foment and encourage strife and uncertainty, through recognition, carrying with it certain approval. This strong Nation, now looked upon for world leadership, with all desire to help the oppressed, must help them along consistent

lines only which insure honorable government and honorable transactions.

Mr. FLETCHER. Mr. President, on this subject I think it might be well to refer to some facts not so much as bearing upon the question of whether we should officially recognize soviet Russia or not, but upon the actual conditions as they exist. This is after all a practical and not a theoretical matter. I do not say what position I shall take when the resolution is presented for the recognition of soviet Russia. I do want to say, however, that my sympathies all along have been and are with the Russian people. I have always regarded them as well meaning, law-abiding, excellent people. I am in accord with the Senator from Idaho [Mr. BORAH] on the proposition that people everywhere ought to select their own form of government.

The question here is whether the government now in operation and in power in Russia is a government of the Russian people at all or not. Certainly it has not any of the features of a democracy. It is communism and socialism combined, in a sort of way sui generis. It surely is not a government of the Russian people, for the Russian people, or by the Russian people. However, there are certain forces operating there, certain people in power, Lenin and Trotski, and they and their supporters and followers are exercising a degree of governmental authority. Whether we shall recognize them or not, as I said, is a question we can deal with a little later.

The trouble with the Russian situation to-day is on the inside. The trouble is there is no productivity in Russia. There is no progress being made in Russia, and there can not be any progress until there is some sort of readjustment along the lines indicated by our Government over a year ago; not that we want to dictate to Russia, but we suggested a plan and a way whereby Russia could move forward. But that problem must be solved in Russia and not by us or by any other country. It must be determined in Russia and by Russian people what they will do to plant themselves upon a foundation, the only basis upon which any government can succeed and any people become prosperous.

A very interesting article appears in the Manufacturers' News of May 25, 1922, by Secretary of Commerce Herbert Hoover. I believe Mr. Hoover is as thoroughly acquainted with the Russian situation and the Russian problem as any man in this country or perhaps any other country. I want to refer to the facts stated by him as showing the actual conditions there, and, if I may, for the moment suggest something by way of response to the implication at least that America has not done her part toward Russia and that a solution of the difficulties could be found in our recognition of the soviet government. Mr. Hoover points out that—

> During the last two years there has been no ban on any merchant sending in his goods or any investor lending his savings for development of industry if he felt so inclined. No practical advantage has been taken of this situation, and the productivity and industrial machinery of Russia have continued to degenerate steadily.

Mr. BORAH. Mr. President——

Mr. FLETCHER. I yield to the Senator from Idaho.

Mr. BORAH. What evidence is there that conditions in Russia continue to degenerate?

Mr. FLETCHER. I submit, in the language of Mr. Hoover, that—

> The proof that access to Russia alone was not the solution is evident, for if we subtract the goods that have been moved into Russia by the charity of America and the two or three hundred million dollars of goods imported with the old gold reserve, the supplies moving in the course of normal trade have been pitiable, and the people were starving even before the drouth. The export of goods from Russia—

That is, under the Government in Russia. The movement has been pitiable even though the doors have been open for the last two years. As to the exports, let me continue the statement of Secretary Hoover:

> The export of goods from Russia for 1921 was less than $10,000,000, as compared with $700,000,000 before the war.

These are the facts.

Mr. BORAH. Mr. President, I have very profound respect for anything Mr. Hoover may say upon the subject, but, as I said, it is not my purpose to-day to discuss that phase of it. I am going to do so in a day or two, and I think I can demonstrate to a certainty that there is an error as to those figures.

Mr. KING. Mr. President, will the Senator yield?

Mr. FLETCHER. Certainly.

Mr. KING. If the Senator will examine the Pravda, the official organ of the soviet government, published in Moscow, he will find confirmation in part, at least, of the statements made by Mr. Hoover. As a matter of fact, the exports from Russia have been diminishing constantly, and the imports into Russia have been diminishing, as shown by the records in the ports of Revel and Esthonia and those in the Black Sea. The imports are pitifully small. That the exports are but a fraction of those in pre-war time conditions revealed by Tchitcherin and his associates at the Genoa Conference, and the reports there made demonstrate beyond peradventure the catastrophic condition, industrially and economically, of the Russian people to-day.

Mr. FLETCHER. I think there is no doubt about it.

Mr. BORAH. I have examined all those things, and I shall be glad to debate that feature of the matter.

Mr. KING. At this time I would be glad to debate it with the Senator.

Mr. FLETCHER. That fact is further indicated by the condition as to the enormous inflation of money in Russia. To-day 4,000,000 rubles make $1 of our money. It takes a million rubles to get a shave, and that is perhaps the reason why not many of them get shaved.

But as to what we have done for the Russian people, Mr. Hoover says very properly:

> America has not been remiss. Before the next harvest the American Relief Administration, under my direction, will have expended more than fifty million dollars in American charity on the saving of Russian people from starvation and in providing seed for the next harvest. This operation will perhaps do more than save 10,000,000 of humanity from death. It will through this act of charity have saved the soul of the Russian people from an abyss of depair too terrible for human expression.

Mr. BORAH. I agree that our charity has perhaps saved 10,000,000 people, but our policy has starved 20,000,000.

Mr. FLETCHER. I shall get to that in a moment. We are providing charity for Russia to-day, as Mr. Hoover said, in a measure ten times greater than all the rest of the world. We are saving the lives of 10,000,000 of their people. But the solution can not be found in charity. I quite agree with that. That is in accord, perhaps, with the Senator's suggestion. Charity will not solve their problems. This is only a temporary relief, founded upon their most urgent and pressing necessities, to save human life, but it shows that America has been doing her part.

> Really, the lasting help—

Said Mr. Hoover—

> must be based upon cold economics, or it will bring no real reconstruction or relief to Russia.

There can be no question about that. A recognition of the Russian Government is not going to solve the problem there. What good will it do for us to admit an ambassador from Russia and set him up on Sixteenth Street or somewhere in Washington as a representative of the Russian Government and thus recognize Russia? Where does that lead? As the Senator from New Jersey [Mr. EDGE] suggested, it may be rather misleading than otherwise. That alone is not going to solve their problem, and it may not even contribute to that end. They must work that out at home, among themselves, on the inside. Their political, industrial, and economic problems can not be solved by outside interference or effort.

Mr. Hoover further said on that point very forcefully:

> Some people believe that if we would establish in Washington a soviet ambassador then goods would begin to flow; but goods do not move in an economic vacuum. More political officials will not solve this issue; it requires the restoration of the dynamic forces of productivity and the establishment of security for investment. The foundation of these things must be laid in Russia; it can not arise in the United States.

That, it seems to me, very largely answers the question about the great importance of recognizing soviet Russia. We laid down the principles, as I have mentioned, upon which recovery and the required productivity could be based. Mr. Hoover says with respect to that:

> Our Government stated these standards one year ago, as follows: "No lasting good can result so long as the present causes of progressive impoverishment continue to operate. It is only in the productivity of Russia that there is any hope for the Russian people, and it is idle to expect resumption of trade until the economic bases of production are securely established. Production is conditioned upon the safety of life, the recognition by firm guaranties of private property, the sanctity of contract, and the rights of free labor."

There is the actual situation. We must face the facts as they exist. Russia can do what is needful; and until she does plant herself upon those sound economic principles and adopt something of that kind as a standard and firmly fix her course accordingly, the mere recognition of the Government will not benefit her very greatly.

Mr. President, I shall ask to have inserted in the RECORD this article by Mr. Hoover, appearing in the Manufacturers' News, and it will speak for itself. It impresses me strongly and answers, it seems to me, the criticism of our policy and our conduct toward Russia.

The VICE PRESIDENT. Is there objection? The Chair hears none, and it is so ordered.

The article referred to is as follows:

WHY WE CAN HAVE NO TRADE WITH RUSSIA.

(By Herbert Hoover, Secretary of Commerce.)

The Russian people are being destroyed from inside by the destruction of productivity. Communism has been abandoned for a cross breed of individualism and milder but equally unworkable forms of socialism. Nor must communism or socialism be confused with the Russian people, for to-day the adherents to those beliefs in Russia have diminished to a very small minority. But whether the adherents are small or large, Russia must work out her own political and economic system.

Our relationship to this problem must be predicated upon one basis only—what will bring real assistance to the Russian people in this time of their greatest need. We are providing charity in Russia to-day in a measure ten times all the rest of the world and we are saving the lives of 10,000,000 of their people. The solution can not be found in charity, for unless productivity is restored charity will be overwhelmed. Real and lasting help must be based upon cold economics or it will bring no real reconstruction or relief to Russia.

Some officials in Russia and their followers in the United States seek to blame the responsibility for this situation upon our continuation of the blockade after the war was won. This blockade, imposed as a war measure against the cooperation of Russia with Germany, was continued for a year after peace. I strongly advocated that this should not be done, because I felt that whatever goods could filter to Russia would relieve just that much individual misery, and that it would be well for the world to lift the curtain on this experiment in economics. We know now, however, that it would not have made one jot of economic difference in the real situation of the Russian people had the blockade never been imposed.

During the last two years there has been no ban on any merchant sending in his goods or any investor lending his savings for development of industry if he felt so inclined. No practical advantage has been taken of this situation and the productivity and industrial machinery of Russia have continued to degenerate steadily. The proof that access to Russia alone was not the solution is evident, for if we subtract the goods that have been moved into Russia by the charity of America and the two or three hundred million dollars of goods imported with the old gold reserve, the supplies moving in the course of normal trade have been pitiable, and the people were starving even before the drought. The export of goods from Russia for 1921 was less than $10,000,000, as compared with $700,000,000 before the war. Some people believe that if we would establish in Washington a soviet ambassador, then goods would begin to flow—but goods do not move in an economic vacuum. More political officials will not solve this issue; it requires the restoration of the dynamic forces of productivity and the establishment of security for investment. The foundation of these things must be laid in Russia; it can not arise in the United States.

Some Russian officials have held out promises of great advantage to us if we would reestablish ambassadors and would come to her economic assistance. It is a constantly reiterated statement that here is a vast field for the sale of American goods, for the employment of millions of American workmen, and for large profits to those straw men called capitalists. These statements have the same degree of inflation as the Bolshevik ruble, which now stands 4,000,000 to the dollar.

When Russia was running full blast previous to the war, she took 1 per cent of the exports of the United States which, when reduced into terms of working time of our workmen and farmers, meant, roughly, the employment of say 30,000 Americans. We are therefore not, nor ever will, be dependent upon Russia for the physical welfare of our people.

Russia is bankrupt. She has no productivity; her factories and mines, even where founded on Russian raw material and repairs, are producing but from 2 to 25 per cent; her railways are transporting less than 7 per cent of their pre-war capacity; her agricultural production is below her own needs instead of the great normal surplus; she has eaten up her entire fat, and can for a long time have nothing to exchange for the services of our workmen or the savings of our investors. Therefore if we would supply work, capital, and talent to the reconstruction of productivity in Russia, they must be given upon credit of charity.

When our people are called upon to place their savings in such investments, they will be likely to ask for security for repayment and evidence that there will be a return to productivity in order that payment may be made. We arrive at once at the primary consideration of those economic essentials that will make productivity possible and that will give security to investment.

Our Government stated these standards one year ago as follows: "No lasting good can result so long as the present causes of progressive impoverishment continue to operate. It is only in the productivity of Russia that there is any hope for the Russian people, and it is idle to expect resumption of trade until the economic bases of production are securely established. Production is conditioned upon the safety of life, the recognition by firm guaranties of private property, the sanctity of contract, and the rights of free labor."

This statement sets no moral or political standards; it is but the hard, cold, economic fact. Since this statement Russia has made some progress toward these primary essentials. But the fatal difficulty is that under even the present somewhat modified system both security and promise of productivity are insufficiently certain, and this certainty has to be made clear, not to the American Government, which is not a money lender, nor to the American banker, who is but a broker, but to the American investor whose savings are at stake and to the American merchant whose goods are to be contracted for.

Unless the confidence of these merchants and investors can be secured there will be no credits extended other than the minor sums of the greedy speculator. Our citizens in considering these things naturally raise the question of the treatment of our fellow countrymen who have already invested their savings in Russia, not alone because of any solicitude for the comparatively small amount of such investment, but because their treatment will be the index of confidence to others, and far beyond this, because there lies here a principle to which the American people must needs take heed, for that principle lies at the root of the whole basis of international commerce. Our only course is to decline relationships until these things are maintained. Upon confidence in the good faith in these principles among nations rests the whole fabric of international life.

While Russia slowly swings toward the standards that we believe are vital to her recovery and to the point where it is possible to undertake her rebuilding America has not been remiss. Before the next harvest the American Relief Administration under my direction will have expended more than $50,000,000 in American charity on the saving of Russian people from starvation and in providing seed for the next harvest. This operation will perhaps do more than save 10,000,000 of humanity from death. It will through this act of charity have saved the soul of the Russian people from an abyss of despair, too terrible for human expression.

PRIMARY CAMPAIGN EXPENDITURES.

Mr. HARRISON. Mr. President, some weeks ago the Senate consumed much time in the consideration of the corruption that was alleged, and which the jury in Michigan said was proven, in the so-called Newberry case. The majority of Senators voted not to unseat the sitting Member. Some of us thought when the action was taken that seeds were being sown that might grow into bad fruit in adjoining States and that that action would be accepted as a license for certain candidates for office in the future to expend money without respect to law or morals. I desire to have read from the morning Washington Post an editorial entitled "High cost of politics."

The VICE PRESIDENT. Without objection, the Secretary will read as requested.

The Assistant Secretary read as follows:

HIGH COST OF POLITICS.

Compared to some State primary election contests that have attracted national attention, the cost of the Gifford Pinchot campaign for the gubernatorial nomination in Pennsylvania, $121,705, does not seem excessive. However, it doubtless has surprised many persons to learn that Mr. Pinchot personally was put to an expense of $93,562 in waging his fight, while his wife's contribution of $29,500 brought the family campaign account to a total of $123,662. It simply shows that the use of money in primary campaigns is not necessarily limited to the perpetuation of so-called reactionary control and the advancement of candidacies backed by despised political machines. Even the reformer appreciates the power of the dollar when strongly fortified by its kind, and without qualms adapts it to practical use in the furtherance of his ambition to serve the public for the greater public weal.

But the successfully conducted Pinchot fight against the Republican State machine in Pennsylvania also offers further proof that the direct primary is not a poor man's game. Mr. Pinchot won by a narrow margin, considering the total vote cast at the primary; had he not been a rich man, able to contribute liberally of his wealth as well as his ardor for the cause and what he believes to be better State government, he could not in all probability have made his ideals prevail. His opponent in the gubernatorial nomination race, Attorney General Alter, who had the "organization" backing, filed a campaign-expense account amounting to the modest sum of $1,131.80. Had the latter had more money to contribute in his own behalf, or had Mr. Pinchot met his opponent on terms of financial equality—well, the result, as hinted, might have been different.

Mr. HARRISON. Mr. President, in that connection, I shall not ask to have read to the Senate but shall incorporate in my remarks, if consent is given, an editorial which appeared in a morning newspaper, the Philadelphia Record, headed "Pinchot's cash victory."

The VICE PRESIDENT. Without objection, the editorial will be printed in the RECORD.

The editorial referred to is as follows:

PINCHOT'S CASH VICTORY.

Gifford Pinchot and members of his family paid $124,000 to win the Republican nomination for governor of Pennsylvania. They admit it.

The Pinchot committee supposed to have managed the ex-forester's primary campaign, and, obliged to file a sworn statement of the amount expended, is quoted as reporting the cost of the campaign at $121,705.51.

The Record is willing to take the statement of Mr. Pinchot that the contributions of himself, his wife, and another relative were $124,000 as the truth; and in its opinion the use of this enormous amount of money for such a purpose is a scandalous thing, a brazen employment of the funds of a rich man with an itch for office which no man fit to be governor should be permitted to contribute in an effort to secure his election.

As to the other statement, which seems to be intended to create the impression that only $133,000 was contributed and expended in the Pinchot campaign, the Record challenges its truth. It is clearly not a veracious statement of the total cost of the Pinchot primary campaign. If it is intended to create the impression that only that much money was expended in the State in behalf of Pinchot it is not stating the facts.

The attorney general of Pennsylvania, though an unsuccessful opponent of Mr. Pinchot for the G. O. P. nomination, is nevertheless the attorney general of Pennsylvania. He should immediately appoint a commission to investigate the Pinchot campaign contributions, and in the interest of public morality, expose the contributors to the fund whose offerings to the cause of the politicians opposed to other politicians were used in the recent primary fight and are not accounted for.

The charge against Senator NEWBERRY, of Michigan, was that his relatives contributed and there was expended in his primary campaign about $175,000. But the candidate himself did not give any considerable amount to this fund. That scandalous use of boodle, which has been denounced from one end of the country to the other, hardly compares with the brazen admission of Mr. Pinchot that he parted with over $93,000 of his own money; that his wife gave $29,500, and another relative contributed $1,500 to help make Mr. Pinchot the Republican candidate for governor of Pennsylvania.

This adds an issue to the contest for governor of Pennsylvania this year.

Is the election to be bought? Having put up $124,000 for the primary victory, how much are the Pinchots going to spend between now and the November election?

Is there not some way to halt the purchase of the governorship of Pennsylvania?

There is. The majority of the people of Pennsylvania have the power to stop it by voting for John A. McSparran. The Democratic candidate for governor has no boodle to buy the election. But the people are

powerful enough to elect a man who has not a few hundred thousand dollars to spend in an effort to occupy the executive mansion at Harrisburg.

If there were no other reason why Gifford Pinchot should not be elected governor of Pennsylvania or of any other State, he has furnished one sufficient to preclude the probability of his selection by the enormous amount of money he admits having spent to secure the Republican nomination.

Mr. HARRISON. Then, I notice in the Philadelphia Inquirer:

Large sums spent in primary contest. Pinchot report shows expenditures of more than $122,000. Combine campaign for Alter probably cost nearly half a million dollars.

I am sorry there are not more Republicans in their seats. It seems that they can not be prevailed upon to stay here when we are talking about the results of recent elections and enormous campaign contributions and expenditures. There are now on the other side of the aisle only three Republican Senators, there being 57 vacant seats over there. If that number of them were coming up for reelection in the approaching campaign there would be more than that number absent after the 4th of March next, in view of the revelations that are constantly coming to the front. This article continues:

HARRISBURG, PA., May 29.—Gifford Pinchot, Republican nominee for governor of Pennsylvania at the recent primary, to-day filed his expense account, showing he had expended $93,562.14, including $82,253.97 which he contributed to the Pinchot-for-governor campaign committee, which certified to expenditures of $117,013.08 and unpaid bills of $4,692.43.

That reads like the testimony in the Newberry case.

The only personal contribution made to Mr. Pinchot was $3,750 from William Flynn.

Mr. Pinchot's personal account shows a contribution of $82,253.97 to the committee, $11,163.02 spent for copies of voters' lists, and $145.15 personally expended for traveling. The Flynn contribution was reported as made to him.

The State-wide committee accounted for $118,033.27 received from all sources, including what Mr. Pinchot gave; $29,500 from Mrs. Gifford Pinchot; $1,500 from Mrs. C. B. Wood, Simsbury, Conn., an aunt of Mr. Pinchot; $500 each from Dr. M. Carey Thomas, Dr. C. I. King, and Frank P. Williams; $1,000 each from Mrs. Barclay H. Warburton and Dr. Henry S. Drinker; $240.83 refunded from the Philadelphia and Forest County committees; $990 from small contributions, and $48.47 interest earned on daily deposits.

The expenditure account shows $41,037.35 as the big item, it being for the postcard campaign, which reached 2,000,000 voters, and for which Mr. Pinchot secured the voters' list; other expenditures being, for Philadelphia County committee, $5,000—

Probably they got that as Goldstein got his out in St. Louis from the Lowden slush fund—

Twenty-second ward committee, Philadelphia, $3,000; Erie County committee, $2,000; Dauphin County committee, $3,000; Lackawanna committee, $3,000; Pittsburgh committee, $3,000; and 22 counties, $7,175; organization expenses and dissemination of information, $5,221.66; copies of newspapers distributed, $4,717.09; office help, $5,695.89; office furniture, rent, etc., $1,588.30; mailing, $8,283.34; telephone and telegraph, $2,360.72; printing, $15,126.22; traveling expenses, $5,127.97; advertising paid for, $1,779.54.

The unpaid bills are chiefly for advertising.

ALL ALTER ACCOUNT NOT FILED.

Attorney General George E. Alter, candidate for the Republican gubernatorial nomination, filed his expense account showing he had spent $1,131.80, of which $1,000 was contributed to John H. Montgomery, chairman of the Alter committee, at Pittsburgh. He received no contributions and owes nothing.

It is estimated that nearly half a million of dollars was spent through various county organizations in the campaign to nominate Alter for governor.

The Alter committee of Potter County received $500 from Frank E. Baldwin and spent it. Other counties have yet to be heard from.

Congressman WILLIAM J. BURKE'S statement of his expenditures for Senator showed he had received $1,900 and spent $2,089. Among his contributors were A. Moore, $1,200; and J. Mulvehill, $200.

The statement of James J. Walters, chairman of the Burke committee, shows $8,894 received, $4,297.57 spent, and $4,563.60 owed. The big item of expense was advertising. John Douglas, jr., contributed $4,500; M. F. Boyle and W. F. Hughes each $500. A $500 contribution from a Pittsburgh labor union was noted.

Mr. President, recently the eyes of the country have been focused on two primary contests. One was in Indiana between Senator NEW and Mr. Beveridge. The attention of the country was concentrated on that contest because the administration was strongly supporting Senator NEW, and his friends made the most of that support. He had stood by the administration in this Chamber as perhaps no other Senator had, and he was entitled, in the State of Indiana, as would any other sitting Republican Senator have been in his State who had been servile to the wishes of the administration, to the support of the friends of the administration in that State. The night before the election in Indiana Mr. King—I believe that was his name—the campaign manager of Senator NEW, gave out a statement in which he said that in no speech of Mr. Beveridge had he praised the work of the Harding administration. So the country interpreted the result in Indiana as a repudiation of the administration and as an indication that some spark of progressivism was still left in at least a part of the Republican Party.

The other contest that was waged was in Pennsylvania, and there the result was received by the country as "glad tidings of good news," for they thought that Pinchot had smashed the old reactionary political machine of Pennsylvania, the old guard which had so long dominated the politics of that State. They knew, too, that Pinchot was not pleasing to the present administration, and they accepted it in a way as a victory for progressivism in Pennsylvania. It pains those of us who believe in progressive principles, who believe in the great masses having a voice in the running of the Government, to read the revelations of these reports of expenditures and to realize that one who has been known as one of the chief apostles of progressivism, although he was termed by the late Senator Penrose as a "tree doctor," should have forgotten the teachings of progressivism and expended some $93,000 of his own money and $29,500 more of money contributed by his wife.

The Newberry case sinks into insignificance when we analyze this campaign for nomination of a governor in Pennsylvania. Of course, Senators who voted to indorse the manner in which Senator NEWBERRY was nominated in Michigan and who voted to seat him here can have no complaint; they can find no fault with the expenditure of a large sum in Pennsylvania because when they seated Senator NEWBERRY they placed their stamp of approval upon the manner in which he had been nominated. Of course, under the leadership of the junior Senator from Missouri [Mr. SPENCER] and under the authorship of the junior Senator from Ohio [Mr. WILLIS] they did get themselves into somewhat of a mess and relieved their consciences to some extent by adopting a condition to the resolution that seated the Senator from Michigan; but every line of that condition, which was placed there by the majority side, condemns the enormous expenditure of Pinchot in his campaign for governor of Pennsylvania.

Here is what you said. I suppose that Pinchot did not believe you meant what you said in this condition, but at any rate you said:

That whether the amount expended in this primary—

The Newberry primary—

was $195,000, as was fully reported or openly acknowledged, or whether there were some few thousand dollars in excess, the amount expended was in either case too large—

And yet, in the sworn statement of Mr. Pinchot, he said that he spent $93,000 of his own money and $29,500 of his wife's money, and spent some other contributions from other sources. By this resolution, the Willis proviso—it ought to go down in history as the Willis proviso—you said:

The amount expended was in either case too large, much larger than ought to have been expended.

The expenditure of such excessive sums in behalf of a candidate, either with or without his knowledge and consent, being contrary to sound public policy—

The Senator from Michigan said that that expenditure was made without his knowledge. Pinchot, the so-called Progressive, says under his oath that he contributed $93,000 and his wife $29,500; so the only difference—at that is small—is in the amounts that were expended by these two gentlemen—one in a primary in Michigan for the Republican nomination for Senator, the other in a primary in Pennsylvania for the Republican nomination for governor. The amount in Michigan was spent, as the Senator from Michigan says, without his knowledge. The amount in Pennsylvania was spent, as Pinchot says, with his knowledge and out of his pocket or out of the purse of his wife.

They go further in this resolution and say:

The expenditure of such excessive sums in behalf of a candidate, either with or without his knowledge and consent, being contrary to sound public policy, harmful to the honor and dignity of the Senate—

So says the Willis proviso. I suppose that the Senator from Ohio and some other Senators over there who voted for this resolution would say that that did not apply to the governorship out in Pennsylvania; that they had gotten into the habit there in that State, and they were just keeping up the custom. We find that some so-called Progressives are willing to reform only along their certain lines. They reform up to a certain point, but when it comes down to the expenditure of large sums to be elected to office they are not such reformers.

Out in Indiana, where ex-Senator Beveridge won, he did not file any account at all. He perhaps thought—and he was no better in that respect than the Senator from Indiana [Mr. NEW]—that in view of the decision of the Supreme Court in the Newberry case it was not necessary to file any account, and they did not file any. Nobody knows how much Beveridge, the so-called Progressive, spent in Indiana; but we do know in the

case of Pinchot, because Pinchot was not running for a Federal office, and under the laws of Pennsylvania he had to make his report; and we do know that Pinchot, the so-called once Progressive, who is now willing to vote for the nomination of Harding, the reactionary, for another term as President, spent $93,000 of his own money and $29,500 of his wife's money, and other money in addition thereto, to win the gubernatorial nomination.

This Willis proviso goes further:

The expenditure of such excessive sums in behalf of a candidate, either with or without his knowledge and consent, being contrary to sound public policy, harmful to the honor and dignity of the Senate, and dangerous to the perpetuity of a free government—

If it is dangerous to spend such excessive sums to elect men to the United States Senate, why is it not dangerous to the perpetuity of a free government to expend such enormous sums to nominate men to State offices?

And it goes further:

Such excessive expenditures are hereby severely condemned and disapproved.

And yet I read in the morning papers that one of the distinguished Senators who calls himself a Progressive when the reactionary bunch does not need his vote to put over reactionary legislation visited the home of Mr. Pinchot yesterday, and there they confabed together over "progressive" measures that are to be taken up in the future; and yet he knew, doubtless, at that time that Mr. Pinchot had won the nomination for governor in Pennsylvania through the expenditure of approximately $135,000, and he had assisted in drafting the Willis proviso—which many Senators claimed as coauthors at the time but which all of them now disclaim having had anything to do with—in which resolution he had said that excessive expenditures "are hereby severely condemned and disapproved." So we have about come to the point of believing that a Progressive Republican has about as little respect for limiting his expenditures to be elected to office as a reactionary Republican has.

Mr. KING. Mr. President, will the Senator yield?

Mr. HARRISON. Yes.

Mr. KING. I do not see why the Senator calls Mr. Pinchot and Mr. Beveridge Progressives.

Mr. HARRISON. I did not; I said "so-called Progressives."

Mr. KING. I think they are something like Bevo near beer—about one-half of 1 per cent of progressivism.

Mr. HARRISON. Mr. President, these large expenditures must stop. If a man, because he is enormously wealthy, runs in a primary for the nomination and expends over an eighth of a million dollars, how much will he expend when it comes down to making the real fight for the election? The gentleman who is nominated for the Democratic ticket in Pennsylvania, although most worthy and able, is a poor man. He is a farmer. He is the head of the grange, as I understand, in that State. He will never be able to get around the first heat if Pinchot, because of his wealth, is to continue to pour out lavishly these large expenditures as he did for his nomination.

Mr. President, I have merely called the attention of the Senate to this matter so that something will be done—and we have, of course, no jurisdiction of the situation in the State of Pennsylvania—but something should be done to prevent wealth polluting elections and controlling the nomination and election of public servants to office.

LETTER FROM SECRETARY HOOVER.

Mr. WATSON of Georgia. Mr. President, this morning, while I was signing up some letters at my desk, I was very much surprised to hear my name brought into the debate by the junior Senator from Wisconsin [Mr. LENROOT]. In the course of his brief remarks introducing a letter from Secretary Hoover, he several times in parliamentary language called me a liar. It seems that I am accused of having spoken untruthfully of Mr. Hoover's management of the vast sums of money that had been intrusted to him both by the Government and by charitable societies and individuals. That statement was made by me first during the debate in this Chamber which sprang up on the subject of the $20,000,000 donation to the Russian people, whose government we do not recognize. As Senators present will remember, the bill passed last December, in order that we might make, as the newspapers stated, a Christmas gift to the Russian people, whose government we ignore.

Why did not Mr. Hoover take notice of my statement then, last December? Why did he wait until nearly the 1st of June? If he is a gentleman, why could he not have addressed his letter to me?

Usually, Mr. President, when a Senator here representing a great sovereign State—in my case one of the original thirteen, of whose record I am intensely proud, and whose good name I mean to maintain on this floor against all comers—usually when a Senator makes a statement here which is inaccurate, the person who feels aggrieved addresses that Senator, calls his attention to his error, and asks him to correct it on the floor of the Senate, so that the correction shall go to the country in as public a manner as the error was committed. Mr. Hoover did not address me last December, and did not address me this month.

What is the misstatement which he says was made to his injury? It was that he had not published his statement of accounts and his vouchers showing the disposition which he had made of these many, many millions of dollars. He says in his letter that his accounts have been published in the CONGRESSIONAL RECORD. He does not state when and he does not state where. Therefore I could not find them without giving the subject more attention and more time than perhaps it deserves. He says they have been repeatedly published in the newspapers. What newspapers? Of what date? How could anyone possibly run down information of that sort, when his own citation does not give you the data upon which you can proceed? Why did he not attach to his letter, as an exhibit, a copy? Why does he not tell what men and women are on his pay rolls, and what salaries they are getting? He does not do so. I invite him to do so. The country would like to know.

Does he deny that his agents were so neglectful of their work that 2,000 tons of flour rotted on the wharves at Trieste when the citizens of Vienna were dropping from exhaustion on the streets of that capital, this flour having been bought in America, and having been intended to feed those starving Viennese? Does he deny that some of the provisions bought with the money which Congress appropriated here in December rotted on the Sea of Azof because there had been no proper allowance made for the shallowness of the water across the bar of the Volga River, piercing the interior of the destitute region of Russia? My understanding is that the water on the bar is about 16 feet, whereas the steamers in which the food was sent drew something like 26 feet, and the steamers not being able to cross the bar, it is said that the food was ruined. If that is not true, let him deny it.

Who is Hoover, anyway? In Who's Who, the British publication, he was listed among the British, his office was given as in London, and his residence was given as in London. This was shortly before the World War.

What was the secret influence which suddenly put him at the head of things in this country? Who sent him here? Who appointed him? What credentials did he bear? What testimonials did he bring? Why was he received here as a man to be trusted, and to be given almost unlimited sums of money to dispose of as he saw fit?

At the opening of the presidential campaign of 1920, Herbert Hoover was reported as saying that he did not know whether he was a Democrat or a Republican. Does he know now? Does anybody know? He is a "Hooverite"; that is what he is. He ran for President, he got a few votes in California, and they are said to have cost him as much as the votes about which the Senator from Mississippi [Mr. HARRISON] has been talking this afternoon.

Mr. President, if I have done injustice to Mr. Hoover or to anybody else, I will be only too glad to set matters right, but I want to be approached in the right manner myself.

I wonder how he got into the Cabinet of President Harding. Was there a dearth of strong men in the Republican Party of the East, North, and West? Why did they have to pick up this Englishman and put him in the Cabinet and give him such vast powers? Let him explain that. Let him write another letter to the Senator from Wisconsin.

ATTORNEY GENERAL DAUGHERTY.

Mr. President, coming down to another matter, in the Washington Herald of this morning there appears an article by Mr. Mark Sullivan, the gist of which is that the charges against Attorney General Daugherty are too old to deserve attention at this time. There is no statute of limitations running against treason. If the Attorney General is guilty, as charged in the Morse case and in some other cases which are not old, then he is guilty of moral treason to the administration of which he is a member, and he is guilty of treason to one of the noblest professions that a man ever embraced. As a lawyer, I have always been proud of the profession, jealous of its reputation and of its honor. Some of the grandest men of the Old World and of the New have been lawyers. Some of the greatest men of antiquity and of modern times have been lawyers. There has hardly been a great fight for civil liberty in France, Italy, England, America that was not led by a member of the legal pro-

fession. With the banner in their hands they have moved along the forefront of the battle for human progress. With the torch uplifted, they strode from generation to generation and from century to century, carrying the light of civilization. But perhaps the meanest man on earth is the lawyer who possesses no high sense of honor and who prostitutes a noble profession to ignoble ends.

The Morse case is not quite so old. Mr. Morse himself is not so old; but apparently he is going to get away with the frauds he committed on the Government, because the statute of limitations will be pleaded, after a while, and all of these cases will be barred. Are these premeditated delays being had for that purpose, to let the time for prosecution expire? It looks that way.

I will not speak further about the Morse case, but I will call attention once more to those matters which I mentioned here in the Senate last week and about which the whole country is speaking. I read:

Add to what you have already said that the district attorney's office in New York recommended criminal prosecution and confiscation of cargo, yet Daugherty wired to release ship. J. M. Young is a matter of record in the district attorney's office, and it might be a good idea to ask Major Clark, who is handling the case in the district attorney's office, for the facts in the congressional inquiry.

Mr. President, there has been ample time to get a telegraphic denial from New York if that specific statement is not true. If it is true, then there is a great scandal, which will besmirch the whole administration of President Harding. The matter can not be brazened out. It must be met. The American people demand it. If the very fountain of justice is impure, what will be the *state* of the stream below? I read again:

2. Wine seizure. The case referred to is the Continental Wine Co., of which Nathan Musher has been indicted only last Saturday in Philadelphia for conspiracy to violate the national prohibition act. Why did Mr. Daugherty cause the $200,000 worth of wine to be released?

Did he cause it to be released? Can he not write a denial here, as Hoover has done? Do they think the people are going to be silent and inactive while charges like that are repeated here on the floor of the Senate? Should he not have enough regard for his honor and for the honor of the administration to make some denial, if denial can be made? If the facts are true, then he ought to be impeached. No man guilty of things like that ought to be the Attorney General of the United States. I read again:

3. Director Harold H. Hart, Thomas Ready, and Michall Lynch in New York, in the Federal prohibition department there, were indicted last November for a conspiracy to violate the Volstead Act. They released illegally 2,000,000 gallons of liquor. When they were arraigned in court Felder appeared for them. Since this time there has been nothing heard of the case and criminal prosecution has come to a stop.

What is the mystery of Felder's influence with the Department of Justice? Two million gallons of whisky seized under the law of the land, and released illegally! Surely, that is as large a transaction as came to light in the "Whisky Fraud" cases, which gave so much trouble to the administration of President Grant. Surely, that is as great a fraud as those which were hurled against Ballinger and forced him out of President Taft's Cabinet. I read further:

4. There seems to be a good bit of discussion about the George Myers pardon, multimillionaire of Ohio, who was sent to Atlanta for violation of the Mann Act. After the judge and district attorney recommended that he be kept in jail, Daugherty recommended to the President that he be pardoned.

Why? This man of many millions was 50 years old, according to my information, and the child whom he debauched was a girl of 15. Upon what ground was the recommendation for clemency based? What were the reasons for opening the prison door to a man so vile as that? The very man who opened the prison door to such a man as that, because he has millions, refused to open it to those political prisoners, who merely said some indiscreet things during the war, and thereby came within the scope of the espionage act. They have served, year in and year out. Some of them have been sick; their wives have lost the support of their labor; their children have begged for bread, and yet no pleadings for them can touch the official heart.

Why the difference between these poor men and this rich millionaire who ran with and ruined a little girl of 15? The American people want to know, and if they are not told there will be an avalanche of condemnation at every election that takes place hereafter in which the Republicans are pitted against the Democrats.

Mr. President, in the morning's New York World the leading editorial is headed "Mr. Harding's Ballinger." I ask unanimous consent that the Secretary may read it and that it may appear as a part of my remarks in 8-point type.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. LENROOT. Mr. President——

Mr. WATSON of Georgia. Mr. President, I want the editorial read at the desk.

Mr. LENROOT. I understood the Senator from Georgia had yielded the floor.

Mr. WATSON of Georgia. I yielded with that understanding. I supposed the Secretary would rise and read the article as I requested; if not, I shall do it myself.

The PRESIDING OFFICER. The Senator requested that the article be printed in the RECORD in eight-point type, and that request has been granted.

Mr. WATSON of Georgia. And I asked that the Secretary read it.

The PRESIDING OFFICER. Is there objection to having the article read?

Mr. LENROOT. How long is it?

Mr. WATSON of Georgia. I will read it myself if it can not be read at the desk.

The PRESIDING OFFICER. Is there objection to the reading of the article?

Mr. LENROOT. Of what length is it?

The PRESIDING OFFICER. It is about a half a column in length. Is there objection to the reading of the article? The Chair hears none, and the Secretary will read as requested.

The reading clerk read as follows:

MR. HARDING'S BALLINGER.

[From the World, Wednesday, May 31, 1922.]

Under the headline "Clear up the war-fraud scandals" the strongly Republican Chicago Tribune supports the "legitimate challenge" of Senator CARAWAY to Attorney General Daugherty to "bring about a Senate investigation of the charges that the Attorney General has sought to protect men guilty of war frauds from prosecution by the Government." The Tribune supplements its demand with the warning that neither Mr. Daugherty nor the Republican Party "can afford to carry the burden of such charges as have developed in this matter."

The Philadelphia North American is even more emphatic than its Republican contemporary in Chicago. It declares flatly that "if Attorney General Daugherty retains a shred of regard for the President and the administration, he will resign without delay an office which has been put under a cloud by his incumbency."

The Attorney General has already become the Ballinger of the Harding administration. Like Mr. Harding, Mr. Taft was a kindly disposed President, loyal to his friends and willing to assume all the responsibility. When the Ballinger scandal became notorious Mr. Taft thought it did not amount to much and would blow over if he gave it time. It did not blow over. On the contrary, it was the chief influence in wrecking the Taft administration.

Earlier still, President Grant was stubbornly loyal to friends who did not deserve loyalty, and the record of some of them would have irredeemably ruined a lesser reputation than that of the hero of Appomattox.

Except for Mr. Harding's intervention, Congress would already have acted on the resolution for an investigation of the Department of Justice. With a congressional election in the fall, it is certain that the leaders of the House and Senate have not blocked it because of their high personal regard for the Attorney General. That is a responsibility they would not assume voluntarily.

In trying to hush up the Daugherty matter they are doing the will of the President, and Mr. Harding is making the most serious blunder of his administration. Mr. Daugherty may be fit to be Attorney General of the United States, but his fitness has been impeached in a manner that can not be ignored. If there is to be public confidence in the Department of Justice and in the administration of justice under that department, either the charges against the Attorney General must be disproved or there must be a new Attorney General.

If this were merely a partisan attack by Democrats, the President might be justified in his attempt to smother the case, but some of the most serious charges against Mr. Daugherty have been made by Republican Members of Congress, and Republican newspapers are among his severest critics. Mr. Harding may be able to protect his Ballinger for a time, but soon or late the issue is bound to come to a head. Thus far Mr. Harding has apparently learned nothing from the fatal mistake that was made by Mr. Taft.

LETTER FROM SECRETARY HOOVER.

Mr. LENROOT. Mr. President, the Senator from Georgia [Mr. WATSON] complains because I did not exhibit to him the letter of Mr. Hoover to me before presenting it for the record. I will very frankly say that I did not do so, as I ordinarily

would have done, because of an incident which happened on the floor of the Senate on the 11th day of last April, when the Senator from Georgia in the course of a speech undertook to state the contents of a certain letter written by Mr. Wheeler, of the Anti-Saloon League, to the senior Senator from Tennessee [Mr. SHIELDS]. It so happened that the Senator from Georgia was mistaken as to the contents of the letter. I asked him upon the floor of the Senate whether he would not examine the letter, which had already been put in the RECORD, and, if he found that he was mistaken, whether he would not make a correction upon the floor of the Senate. I sent the letter over to the Senator from Georgia by a page. The Senator from Georgia after reading the letter again asserted the statement which he had previously made. I then asked unanimous consent to put that letter in the RECORD, and the Senator from Georgia objected. I then stated, Mr. President, as follows:

Mr. LENROOT. Mr. President, the Senator from Georgia [Mr. WATSON] this afternoon stated that Mr. Wheeler, counsel of the Anti-Saloon League, had written a letter to the Senator from Tennessee [Mr. SHIELDS], offering, if the Anti-Saloon League might name the judge, to assist in securing an additional judge in Tennessee. I called the attention of the Senator from Georgia to Mr. Wheeler's letter, and I stated that I did not believe the Senator from Georgia would intentionally misrepresent anybody. We all make our mistakes, Mr. President, in the heat of debate, and I make my share of them, but I had supposed that every Senator upon this floor, when his attention was called to a misstatement which involved a gross injustice to any individual, would be willing to correct the statement. The Senator from Georgia read the letter, but the Senator from Georgia refuses to correct the statement. It is not for me to judge of the conduct of any Senator, but I ask unanimous consent to have the letter of Mr. Wheeler to the Senator from Tennessee printed in the RECORD at this point.

The PRESIDING OFFICER. Is there objection?

Mr. WATSON of Georgia. I object, unless the remarks of the Senator from Tennessee [Mr. SHIELDS], at the point where I took them up, also go into the RECORD.

I then read the letter in the record, exactly as I was compelled this morning to read the letter of Mr. Hoover into the record, because of the objection of the Senator from Georgia.

Mr. President, I do not question that the Senator from Georgia believed it, when he made the statement that Mr. Hoover had never made public any of the accounts of the expenditures of the money that had come into his hands. However, there are many things that I do not know with reference to facts which have taken place, but because I do not happen to know that a thing has been done I would not feel warranted in rising to my feet on the floor of the Senate and charging that it had not been done. The Senator from Georgia may. Of course, he is the judge of his own conduct.

But what are the facts? He questions the accuracy of the statement of Secretary Hoover. After the Senator concluded his speech this afternoon, I remembered that I had in my office a considerable number of such reports, which had come to me from time to time as they were published and issued. I sent word to my secretary to bring over whatever he could lay his hands upon. I hold in my hand now a bunch of the reports which the Senator from Georgia states were never published and which he repeats to-day were never published. One of them is entitled:

COMMISSION FOR RELIEF IN BELGIUM.

Herbert Hoover, chairman. Executive personnel. Balance sheet and accounts. French Government accounts. Belgian Government accounts. Supporting schedules. Statistical data. Covering six years from commencement of operations, October, 1914, to September 30, 1920.

Another is entitled:

Interim report of European Relief Council, including statement of contributions by States, and auditors' preliminary report on accounts. May 31, 1921.

Another is entitled:

American Relief Administration. Herbert Hoover, chairman. Audited accounts fiscal year ending June 30, 1921.

The next is entitled:

American Relief Administration. Herbert Hoover, chairman. Audited accounts to June 30, 1920, and supporting statistical tables.

The next is entitled:

American Relief Administration. Fiscal report and audit of $100,000,000 appropriation submitted to the President of the United States by United States Grain Corporation, fiscal agent of the American Relief Administration. September 25, 1920.

I send these reports to the Senator from Georgia by a page, and the Senator from Georgia will, of course, use his own judgment as to whether he will correct his statement.

Mr. WATSON of Georgia. Mr. President, I wish to say, with reference to the Wayne B. Wheeler letter, that the Senator from Tennessee [Mr. SHIELDS], in the course of his long and able speech against the new judgeship bill, referred to a letter that Mr. Wheeler had written him, and I gathered from what the Senator said that he understood Mr. Wheeler to want to come to some kind of an understanding with him about the creation of a new district in Tennessee and the appointment of the judge to fill it. My recollection is that Mr. Wheeler stated in that letter that he had always been in favor of a new judge from that district, and would gladly aid the Senator from Tennessee in getting one. The Senator from Tennessee read to the Senate his reply to Mr. Wheeler, and my recollection of it is that he rather curtly rebuffed Mr. Wheeler, spurning his cooperation, and said in effect that Tennessee was represented by two Senators who could take care of her affairs without any assistance from Mr. Wayne B. Wheeler. That is the substance of his statement as I recall it, though my memory may not be accurate.

The fact that Mr. Wayne B. Wheeler immediately lost all interest in the new judgeship for Tennessee, and that Tennessee did not get a new judgeship would seem to indicate that he had wished to come to some understanding with the Senator from Tennessee, and failing in that effort, he ceased to be in favor of a new judgeship for Tennessee.

In regard to Mr. Hoover, I said that he did not refer to any page of the CONGRESSIONAL RECORD. He said in his letter that his reports, his accounts, and his vouchers were in the CONGRESSIONAL RECORD, as I recall the letter. The documents sent to me by the Senator from Wisconsin are not in the CONGRESSIONAL RECORD. They may be official. I shall examine them at my leisure. As I remember it, Mr. Hoover not only handled Government funds but he handled vast sums taken up by societies and contributed by individuals. These reports would not cover those sums. But, as I said in my statement to the Senator a few moments ago——

Mr. LENROOT. Mr. President, will the Senator yield?

Mr. WATSON of Georgia. I yield.

Mr. LENROOT. The reports are not confined to Government contributions.

Mr. WATSON of Georgia. As I said, I shall be glad to examine them, and if I have done Mr. Hoover an injustice, I will correct the statement.

THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

Mr. HARRISON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. EDGE in the chair). The Senator from Mississippi suggests the absence of a quorum. The Secretary will call the roll.

The reading clerk called the roll and the following Senators answered to their names:

Ashurst	Frelinghuysen	McLean	Smith
Ball	Gerry	McNary	Smoot
Borah	Gooding	Moses	Spencer
Brandegee	Hale	New	Sterling
Broussard	Harris	Newberry	Sutherland
Bursum	Harrison	Norbeck	Townsend
Calder	Jones, N. Mex.	Norris	Underwood
Capper	Jones, Wash.	Oddie	Wadsworth
Caraway	Kellogg	Page	Walsh, Mass.
Curtis	Kendrick	Pittman	Warren
Dial	Ladd	Poindexter	Watson, Ga.
du Pont	La Follette	Ransdell	Watson, Ind.
Edge	Lenroot	Rawson	Willis

France	McKinley	Simmons	

The PRESIDING OFFICER. Sixty-one Senators having answered to their names, there is a quorum present. The question is upon agreeing to the committee amendment.

Mr. MCCUMBER. What is the pending amendment, Mr. President?

The PRESIDING OFFICER. The Secretary will state the pending amendment.

The ASSISTANT SECRETARY. The pending amendment is the amendment of the Committee on Finance, on page 39, beginning in line 19, where the committee proposes to strike out paragraph 218 as printed in the House bill and to insert a new paragraph 218.

The PRESIDING OFFICER. The question is on the adoption of the committee amendment.

Mr. JONES of New Mexico. Mr. President, on page 40, line 18, in the committee amendment, I move to strike out the numerals "75" and to insert the numerals "45." If no Senator desires to discuss the matter further, I ask for the yeas and nays on the amendment to the committee amendment.

The PRESIDING OFFICER. The question is on the amendment proposed by the Senator from New Mexico [Mr. JONES] to the committee amendment, on which he asks for the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. DIAL (when his name was called). I am paired with the Senator from Colorado [Mr. PHIPPS]. I transfer that pair to the Senator from Texas [Mr. CULBERSON] and vote "yea."

The PRESIDING OFFICER (when Mr. EDGE's name was called). The present occupant of the chair transfers his pair with the senior Senator from Oklahoma [Mr. OWEN] to the junior Senator from Oklahoma [Mr. HARRELD] and votes "nay."

Mr. JONES of New Mexico (when his name was called). I desire to announce the transfer of my pair with the Senator from Maine [Mr. FERNALD] to the Senator from Missouri [Mr. REED]. I ask that this announcement may stand for the day. I vote "yea."

Mr. JONES of Washington (when his name was called). I have a pair with the Senator from Virginia [Mr. SWANSON], who is necessarily absent for the day. I promised to pair with him, and I therefore withhold my vote. If at liberty to vote, I should vote "nay."

Mr. NEW (when his name was called). I transfer my pair with the junior Senator from Tennessee [Mr. MCKELLAR] to the senior Senator from Pennsylvania [Mr. CROW] and vote "nay."

Mr. SIMMONS (when Mr. OVERMAN's name was called). I wish to announce the unavoidable absence of my colleague [Mr. OVERMAN] from the Chamber. If he were present, my colleague would vote "yea."

Mr. WARREN (when his name was called). I have a general pair with the Senator from North Carolina [Mr. OVERMAN], which I transfer to the junior Senator from Pennsylvania [Mr. PEPPER] and vote "nay."

Mr. WATSON of Georgia (when his name was called). I transfer my general pair with the Senator from Arizona [Mr. CAMERON] to the junior Senator from Alabama [Mr. HEFLIN] and vote "yea."

The roll call was concluded.

Mr. HALE. Transferring my pair with the senior Senator from Tennessee [Mr. SHIELDS] to the junior Senator from Maryland [Mr. WELLER], I vote "nay."

Mr. GLASS. I desire to inquire if the senior Senator from Vermont [Mr. DILLINGHAM] has voted?

The PRESIDING OFFICER. He has not voted.

Mr. GLASS. I have a general pair with that Senator, and in his absence I withhold my vote.

Mr. HARRISON. I transfer my pair with the junior Senator from West Virginia [Mr. ELKINS] to the senior Senator from Nebraska [Mr. HITCHCOCK] and vote "yea."

Mr. CURTIS. I desire to announce that the Senator from Rhode Island [Mr. COLT] is paired with the Senator from Florida [Mr. TRAMMELL].

Mr. WILLIS (after having voted in the affirmative). I observe that my regular pair, the senior Senator from Ohio [Mr. POMERENE], is not in the Chamber; but I am advised that, if present, he would vote as I have voted. I therefore feel justified in permitting my vote to stand.

Mr. ERNST (after having voted in the negative. I transfer my pair with the senior Senator from Kentucky [Mr. STANLEY] to the junior Senator from Oregon [Mr. STANFIELD] and allow my vote to stand.

Mr. CURTIS. I desire to announce that the senior Senator from Minnesota [Mr. NELSON] is absent on official business.

The result was announced—yeas 26, nays 40, as follows:

YEAS—26.

Ashurst	Harrison	Norris	Walsh, Mass.
Borah	Jones, N. Mex.	Pittman	Walsh, Mont.
Caraway	Keyes	Robinson	Watson, Ga.
Dial	King	Sheppard	Williams
Fletcher	La Follette	Simmons	Willis
Gerry	Moses	Smith	
Harris	Myers	Underwood	

NAYS—40.

Fernald	McCormick	Pomerene	
Glass	McKellar	Reed	

So the amendment of Mr. JONES of New Mexico to the committee amendment was rejected.

The PRESIDING OFFICER. The question now recurs on the amendment offered by the committee.

Mr. JONES of New Mexico. Mr. President, we have thus far discussed only one item of this paragraph in detail. That was done because that item had been separately treated in the investigation of the subject. The remainder of the paragraph is by far more important than the item which we have considered. I expect, however, simply to discuss that in a very general way and hope we may get a vote on it before a very great while. I wish, however, to read the remainder of the paragraph, and call attention to the changes in rates which are proposed. We are dealing now with commodities which affect every household in the land, and the duties will be enormously increased if the proposal of the committee is adopted.

Beginning on line 19 of page 40 of the bill, I find this statement—

illuminating articles of every description, including chimneys, globes, shades, and prisms, incandescent electric light bulbs, with or without filaments, for use in connection with artificial illumination, all of the foregoing, finished or unfinished, composed wholly or in chief value of glass or paste, or a combination of glass and paste, 70 per cent ad valorem.

Under existing law the duty varies. This amendment proposes a new classification. It puts under this one clause articles which have been dutiable at 30 per cent. The other articles were dutiable at 45 per cent under existing law.

The paragraph proceeds—

all glassware commercially known as plated or cased glass, composed of two or more layers of clear, opaque, colored, or semitranslucent glass, or combinations of the same, 70 per cent ad valorem.

Under existing law, the duty is 45 per cent.

The paragraph continues—

table and kitchen articles and utensils, and all articles of every description not specially provided for, composed wholly or in chief value of glass or paste, or combinations of glass and paste, blown or partly blown in the mold or otherwise, or colored, cut, engraved, etched, frosted, gilded, ground (except such grinding as is necessary for fitting stoppers or for purposes other than ornamentation), painted, printed in any manner, sand-blasted, silvered, stained, or decorated or ornamented in any manner, whether filled or unfilled, or whether their contents be dutiable or free, 65 per cent ad valorem—

The present rate of duty is 45 per cent, and the proposed rate is higher than any ever known on any of the articles in this paragraph—

table and kitchen articles and utensils, composed wholly or in chief value of glass or paste, or a combination of glass and paste, when pressed and unpolished, whether or not decorated or ornamented in any manner or ground (except such grinding as is necessary for fitting stoppers or for other purposes other than ornamentation), whether filled or unfilled, or whether their contents be dutiable or free, 50 per cent ad valorem.

The present rate of duty is 45 per cent. The proviso is one which has been common in legislation on this subject heretofore. It makes the containers bear the same rate of duty as the articles imported, but not less than the rate provided for in this paragraph.

Mr. SMOOT. The Senator means the contents, not the containers.

Mr. JONES of New Mexico. I will read it:

Provided, That any of the articles specified in this paragraph, if containers of merchandise subject to an ad valorem rate of duty or to a rate of duty based in whole or in part upon the value thereof, shall be dutiable at the rate applicable to their contents, but not less than the rate provided for in this paragraph: *Provided further*, That for the purposes of this act bottles with cut-glass stoppers shall with their stoppers be deemed entireties.

Mr. President, it seems to me that we ought in the first place to be content here with the reading of one paragraph from the report of the Tariff Commission as to tariff considerations.

All these articles are either blown or pressed glassware, and the Tariff Commission makes a short statement which I will read. I do not intend, however, to content myself with the mere reading of that, but it should be sufficient for anyone to realize that the present state of the industry is satisfactory, and that there is no necessity for disturbing it.

I read:

The figures of production, imports, and exports for the blown and pressed ware branch of the industry for the fiscal year ending June 30, 1914, show that there was little foreign competition in the domestic market in many lines. American factory production amounted to $30,279,290.

This is in 1914.

Domestic producers exported $2,671,164, or 8.8 per cent, while the imports amounted to $2,216,021, or 7.3 per cent of the value of domestic production. The great expansion in the production of the different groups of articles in the period 1904 to 1914 is a further indication of healthy domestic conditions. The production of stem ware and blown tumblers increased 81 per cent, that of cut-glass ware 255 per cent, gas and electrical lighting ware 129 and 450 per cent, respectively, jellies, tumblers, and goblets, 125 per cent. Tableware, with no competitive importations, increased 21 per cent. Lamp chimneys and lantern globes used in the burning of kerosene oil decreased in volume during the period, owing to diminished demand for them.

Mr. President, this paragraph, involving as it does this great variety of glassware, demonstrates that this paragraph of the

bill at least can not be founded upon any theory except that of preventing any importation of any one of these commodities. As to a number of them, there is no competition now. As to the others, there are some importations, but they are inconsequential; but we are increasing this duty higher than has ever been suggested before in any law, and at a time when the industry has been growing, growing in almost geometrical progression, under existing conditions, and the Tariff Commission tells us that existing conditions are healthy.

Mr. President, in order to show what has happened since 1914 I quote from the next page, where I have supplemented the figures with some more recent ones that are now available. This production of $30,000,000 in 1914 had increased in 1919 to more than $70,000,000. That enormous production, mind you, involves many different items. It involves decorated ware; it involves peculiar designs; and, of course, we have been importing some of these various items, but the tariff on them has cut very little figure for the reason that the people of the country wanted the designs, and were not particular about the price. The importations are of that kind, but they have not amounted to much. As stated over here, our importations amounted to only 7.3 per cent of our domestic production in 1914, and our exports were greater, 8.8 per cent; and so I find that since 1914 the importations decreased, of course, all during the war, and while in 1921 they increased somewhat in value, the quantity which was being imported prior to the war is not coming in here now.

Under the heading "Domestic production and consumption" the Tariff Commission say:

The production of pressed and blown ware was valued at $30,279,290 in 1914. This was an increase of 37.9 per cent over 1904, and was 24.6 per cent of the total production of glass of all kinds in 1914.

So, mark you, under this paragraph we are dealing with about one-fourth of all the pressed and blown glassware. It is an item of great consequence. It involves so many different kinds of glassware, nearly every one of which is essential to the comforts of every home in the land, from the common goblet to the most valuable cut-glass ware. Those are all involved in this.

In the 10-year period 1904 to 1914 there was a slight falling off in the production of lamp chimneys, less than 1 per cent, and in that of lantern globes a decrease of 22.7 per cent—

Of course, we all understand why there was that decrease. There was a decrease in the demand. The electric light has been supplanting the kerosene lamp—

but in electrical and gas lighting ware there were increases of 450.3 per cent and 129.7 per cent, respectively. Tableware production increased 21 per cent; goblets, tumblers, and jelly glasses, 145.6 per cent; opal ware, 324.9 per cent; and cut-glass ware, 255.8 per cent—

Showing an enormous increase in this production, and if existing law had not been sufficient to protect the industry, how can anyone account for these enormous increases in production?

The imports of pressed and blown ware from 1911 to 1914, inclusive, were a little over 1,250,000 annually—

That is, of the pressed and blown ware generally—

the maximum being in 1911, $1,313,457. The production of general tableware, lighting ware, and lamp chimneys is sufficient to supply domestic consumption.

As I stated a moment ago—

The severest competition has been on thin blown ware such as stem ware, goblets, tumblers, etc.

As to the exports, it says:

The value of the exports of tableware, cut glass, lighting ware, etc., in 1914, was $2,671,164—

Nearly twice the importations. Further, as to the nature of these importations:

Very little pressed tableware has been imported; in fact, considerable quantities were exported before the war began. Imported pressed ware consists largely of door knobs. There have been considerable importations of fine grades of blown ware and decorated blown ware. Most of this is stem ware. Many plain goblets come from France. Ornamental tumblers, etched, cut, or colored, and also highly decorated and colored articles, such as oil and vinegar cruets, sugars and creams, salts and peppers, and cologne bottles, used to come from Austria. Some also came from Germany.

For the fiscal year 1913, under the tariff act of 1909, the value of the imports of blown and pressed ware (including ware dutiable in paragraphs other than par. 84) was $3,006,621; and for the fiscal year 1914, mainly under the tariff act of 1913, the value of the imports of the ware was $3,387,853, including the interim imports from July 1 to October 1, 1913, of $670,839.

Nearly 70 per cent of the imports of 1913, and 65 per cent of those of 1914, were blown ware or decorated blown and pressed ware, dutiable in 1913 at 60 per cent and in 1914 at 45 per cent ad valorem. Incandescent lamps with metal filament constituted the bulk of the remainder in both years.

In regard to the prices, if there was a great deal of this ware coming in here, there could not have been any great increase, but—

the increases in the average net selling prices f. o. b. factory of staple articles of pressed and blown ware from 1913 to 1917 were as follows: Blown tumblers, 132 per cent; pressed goblets, 120 per cent; plain nappy, 70 per cent; packers' jelly, 40 per cent; pitcher, common, one-half gallon, 37 per cent; nappy, 4-inch, 60 per cent; tumblers, common, one-half pint, 17 per cent.

The Tariff Commission then gives the various rates which have existed from back in 1883, varying from 40 per cent up to 60 per cent, and remarks:

The fluctuations in rates of duty apparently did not affect imports, which have been uniform as a rule.

We are also given a table showing the production of these different kinds of ware in the United States between the years 1904 and 1914, together with the percentage of increases of production at that time under these different tariff laws, varying, as I say, from 40 per cent up to 60 per cent. That table is as follows:

Blown and pressed ware—Production in the United States.
[From Federal census.]

Glass production.	1904	1914	Per cent of increase.
Pressed and blown, value	$21,956,158	$30,279,290	37.91
Tableware, 100 pieces	1,283,974	1,554,056	21.03
Jellies, tumblers, and goblets, dozen	7,346,214	18,030,243	145.44
Lamps, do	487,017	580,196	19.14
Chimneys, do	7,039,756	6,989,624	.72
Lantern globes, do	1,765,247	1,363,562	22.74
Globes and other electrical goods, do	1,901,415	10,461,843	450.33
Shades, globes, and other gas goods, dozen	878,244	2,016,800	129.65
Blown tumblers, stem ware, and bar goods, dozen	6,282,606	11,377,310	81.08
Opal ware, do	1,091,208	4,636,051	324.94
Cut ware, do	83,736	297,957	255.81
Decorated glassware, do	.....	1,158,077	.....

I should like to call attention to a table which gives the names of the countries to which we are exporting these wares and the amount to the country. I find that we are exporting to France, Germany, Netherlands, Russia, Sweden, United Kingdom, Canada, Central America, Mexico, Cuba, South America, China, British India, Japan, Australia, New Zealand, Philippines, British South Africa, and then small amounts to other countries, the table showing that our exports back in 1912 were $3,329,290 to those various countries. Of course, the greatest amount went to Canada, but to the United Kingdom we sent a great deal, to Germany we sent this ware to the value of $149,439, and to France we sent these commodities. Up until the war we were increasing our exports to those countries. In 1916 the exports were nearly five and a half million dollars, and about the same amount in 1917 and 1918.

Of the cut or engraved glassware we were exporting considerable amounts to Europe since the war. Most of it was during the war, in 1918, but we have given here the figures for the year 1919—after the war—when our exports of cut glass were $269,125.

Of electric lamps, in 1913 we exported $622,980 worth, most of them to the Western Hemisphere but some of them to Europe, Asia, Oceania, and Africa, and in 1919 we exported to South America $1,715,180 worth of electric lamps.

Then, under the head of "All other domestic exports," an assortment of different wares, I see we sent to Europe in 1919 wares to the value of $1,479,413; we sent to Canada $2,271,861 worth; and to a number of different countries in South America, Asia, Australia, the Philippines, and to Africa.

I do not care to discuss this matter at any great length, but I am going to move to keep those duties just where they are at the present time. The Tariff Commission has reported that the present conditions are healthy in the domestic production, and what more do we want than that? We have brought into one new paragraph a vast number of these different items, many of which are not imported here at all, all of them in common use in the country.

Do we want deliberately to build up monopolies here in these necessaries of life, to put a tax upon every table in the land for the benefit of a few manufacturers who want to profiteer? As I read this morning they are making profits higher than ever before known. In 1920 they paid income taxes on average earnings of 28 per cent.

That would be the effect of making these rates what the committee proposes they should be made. I submit there can be no reasonable justification for it, and therefore, without attempting to put any of these items back to 30 per cent, where some of them are now, on line 24, page 40, I move to strike out "70" and to insert in lieu thereof "45."

Mr. McCUMBER. Mr. President, I wish it were possible for all Senators to read the report made by a committee of workingmen who were sent across the ocean to investigate the cost of making glassware in Europe, and who also determined the cost of making glassware in this country. The purpose was to

demonstrate what the American manufacturers could possibly pay their men and continue in business in the United States. There are a good many pages of the report, in which they give the cost of almost every article of glassware. It covers, I think, very close to 100 pages. It is a very full report. Of course, in a discussion of the matter here it would be impossible even to give a summary of that report, but I want to call the attention of Senators to the report of the Tariff Commission read by the Senator from New Mexico. The body of that report was made in 1918, and then it was continued with supplemental data of imports, and so forth, to 1921, I think.

We all understand the condition in 1918, before the war had really been closed. We understand what a poor index that necessarily is in the determination of what should be the tariff rates to-day. There were practically no importations at that time. War conditions were such, of course, that there could be no importations. But the testimony we have here, to which I have referred, was from a committee which investigated the subject a short time ago. Then we have the Reynolds report, which would indicate to some extent the difference in the selling price of the product abroad and at home, which will give us, of course, some relation between the probable cost abroad and at home.

I want to call attention to a few of the common articles of importation. I will take, for instance, blown-glass tumblers. The Reynolds report shows that the unit is the dozen. The foreign value in the United States was 69 cents a dozen. The landing cost was 8 cents. The present duty is 45 per cent. The American selling price of a like article is $1.48, as against 69 cents, or 250 per cent above the foreign valuation. Thus we can get some idea of the amount of tariff which would be necessary to equalize the rates.

I will take the next item, which is blown-glass pitchers. These come by the hundred unit. The foreign value of 100 of them was $18.74. The American selling price of a comparable article was $93.33. So we have here $18.74, the cost in the foreign market, as against $93.33, or almost five times as much, in the United States, or a difference of about 500 per cent. We are giving a duty of 70 per cent ad valorem. Those articles which cost $18.74 are sold in this country at $46.16, a very fine profit. I believe that the importers could afford to pay the duty and still have a reasonable profit upon their importing price.

I could go through all the rest of like articles and get about the same results. I think that in the matter of the ordinary glassware it costs about three to five times as much to produce it in this country as it does in the foreign countries. While, as has been suggested, I expect the prices in the foreign country to go up, and I expect the prices in this country to go down, the cost of production in the foreign country to increase and the cost of production in this country to decrease, yet after making all of these allowances up to date I think that 70 per cent will not be more than a proper protective basis.

Mr. JONES of New Mexico. Mr. President, of course we have listened to the same statement before in connection with other matters. I think the first part of the Senator's statement referring to labor and cost and indicating a desire to protect labor is taking a very good name in vain. I do not believe that the good name of labor should be prostituted in this fashion.

It is apparent that all of these conditions have changed. The data for the report to which the Senator refers were gathered in the year 1920, about a year and a half ago, beginning in October of that year and during the following three months. The prices to which he has referred are the Reynolds commission, secured as of last August, and they are based upon German ware in great measure. He has said nothing, however, about electric-light bulbs, not a word so far as I can recall, but that item is put in the bill dutiable at 70 per cent. I want to read a very short statement from a letter which was put in the RECORD on May 25, coming from Mr. Untermyer, of New York, regarding electric-light bulbs. It is a letter addressed to the senior Senator from Wisconsin [Mr. LA FOLLETTE], dated May 24, 1922. I read:

MY DEAR SENATOR: As counsel for the joint legislative committee on housing of the State of New York, I desire to have promptly placed before Congress, with a view of securing such action as Congress may deem appropriate, the following state of facts with respect to the General Electric Co. and my comments thereon:

The company has a virtual monopoly in the manufacture and sale of electric-light bulbs in the United States. It manufactures and sells upward of 97 per cent of all such bulbs. The manufacturers of the remaining 3 per cent of bulbs are financially so weak and are being so harassed with lawsuits by the General Electric Co. that they are on the verge of extermination and are continuing their precarious existence subject to the will of the General Electric Co. A limited part of the product is manufactured and sold under licenses from the General Electric Co.

The distribution system employed in order to maintain this monopoly provides for two classes of selling agents known as class "A," located in the large distributing centers, and class "B," who are supplied by the jobbers, the latter in turn making distribution to the consumer. Prior to the entry in the Federal court at Toledo of the decree, to which reference will hereafter be made, the General Electric Co. sold its product outright through these distributing agencies, but since that decree the sales have been made under cover of a pretended consignment plan whereby the bulbs remain the property of the General Electric Co. The latter, after allowing itself a clear profit of over 50 per cent above the cost of production and overhead charges, requires the distributing agencies to exact from the consumer retail prices that add at least another 70 per cent over the selling price of the manufacturer, which the consumer is required to pay.

The prices charged the latter throughout the United States are shown to be grossly extortionate, but a large part of the profit is hidden under fictitious or exaggerated depreciation, overhead, and other illegitimate charges.

The situation can best be illustrated by a few figures. The total business of the General Electric Co. in all lines for the year 1920 was $268,000,000, of which $60,000,000 of its total sales—which excludes those of its chief licensee, the Westinghouse Co.—consisted of electric-light bulbs, from which it will be noted that about 22 per cent of its total sales consisted of bulbs. Its total net profits for that year were about $25,000,000, of which it is forced to admit that about 80 per cent was derived from the manufacture and sale of bulbs, so that 22 per cent of its total business yielded 80 per cent of its total profits.

This does not take into account the added burden of 70 per cent allowed to its distributing agents, which is at least twice what it should be, and is more than double the cost of distributing the various other lines in which it deals. These other products, which are largely competitive, are practically "carried" on the back of the extortionate profits allowed to the agents on bulbs.

As one of the many evidences of the concealment of profits in the bulb business the following figures for the year 1920 are instructive: The total plant account of the company on which $182,271,111.59 had been expended up to the end of that year stands on the books at $66,536,682.23, as of December 31, 1920, which is less than the actual cost of new construction for the four years next preceding that time. There was deducted in that year the sum of $15,577,359.92 by way of depreciation on the plant account; for the year 1919, $7,688,893.68; for the year 1918, $15,224,162.54. Similar deductions have been made in other accounts in order to make it appear that the company is earning only about 31 per cent upon the manufacture of bulbs in addition to the arbitrary allowances made to its distributing agents.

It is believed that a legitimate system of bookkeeping would show a manufacturing profit of 100 per cent or more on bulbs. Since the investigation by our committee there has been slight reductions in price; the cost of current has been materially cheapened by improvements in the manufacture of bulbs under patents taken out or acquired by the General Electric Co.; but the effect of this intolerable monopoly has been and is to paralyze and render impossible any independent effort to cheapen such cost.

Mr. President, that is the concern in whose interest the committee proposes to legislate. The present tariff upon bulbs is 30 per cent, if my memory serves me aright. It is now proposed to increase that to 70 per cent. In the face of the statement which I have just read, coming from the attorney of a commission which has been investigating housing and construction problems in New York, I wonder if the chairman of the Committee on Finance feels like going further with the proposal to impose a duty of 70 per cent upon bulbs?

Mr. DIAL. Mr. President, I have not had the pleasure of hearing the Senator from New Mexico during his entire speech, but I desire to say that a great quantity of this glass is made by machinery, and the employment of that method of production is increasing all the time. Hence the labor employed is not particularly expert labor. Machines made for this purpose are being improved and the hand labor in connection with the manufacture of this article has been reduced very greatly during the last few years.

Mr. JONES of New Mexico. I am very glad to have the Senator from South Carolina make that contribution to the discussion at this particular time. I have referred to the matter which he has suggested in connection with other paragraphs of the bill, but I am glad to have it referred to in this instance. It is a very important consideration. The truth is that no industry in the country has made such improvements and advancements in production as has the glassware industry, if I have been able to comprehend my reading upon the subject. The one great problem in connection with the industry now in some lines is as to whether human labor, or so-called skilled labor, in the blowing of glass is to be entirely eliminated through machine production.

Mr. DIAL. Even in the South human labor in connection with glass manufacture has been very much curtailed.

Mr. JONES of New Mexico. In connection with another paragraph, I expect to call more particular attention to that matter, but in this kind of ware machinery is largely being used; and the use of it is increasing in the manufacture of various classes of glassware. The cost of labor does not cut nearly so much figure as Senators would want us to believe, for the labor cost in many of these articles is comparatively nominal. Of course, in the production of some articles skilled labor is almost all there is to it except the raw material; but I do not want Senators to profane the name of labor as is being constantly done in the discussion of this bill.

Mr. SIMMONS. Mr. President, just one word about this matter. The letter which the Senator from New Mexico has just read from Mr. Untermyer is exceedingly valuable in connection with this discussion. That letter starts out with the statement that the General Electric Co. produces 97 per cent of these bulbs. The other 3 per cent are produced by some independent concerns, which have been practically driven out of business by the vexatious litigation against them by the General Electric Co. Mr. Untermyer says:

The manufacturers of the remaining 3 per cent of bulbs are financially so weak and are being so harassed with lawsuits by the General Electric Co. that they are on the verge of extermination and are continuing their precarious existence subject to the will of the General Electric Co.

So we have here the case of one great overshadowing trust, that manufactures practically all of this product. According to Mr. Untermyer the General Electric Co.'s total business in 1920 was $268,000,000, and $60,000,000 of its total sales consisted of electric bulbs. It will be noted that upon 22 per cent of its total sales 80 per cent of its profits were made; that is to say, these bulbs constitute but 22 per cent of its total sales; its entire profits amounted to $25,000,000, and 80 per cent of that $25,000,000 was made from these bulbs; so that $20,000,000 represents the profit of the General Electric Co. upon its sales of $60,000,000 worth of bulbs.

This trust, making these enormous profits, is so far protected from foreign competition under the present law that during nine months of 1921 there was imported into the United States only $21,770 worth of these bulbs, and it is now proposed further to protect this admitted monopoly, which is making 80 per cent of its profits on the sale of 22 per cent of its products, that 22 per cent being bulbs, by giving it a protection amounting to 70 per cent; or, in other words, increasing its present protection of 30 per cent by 40 per cent more. I presume that is not for the purpose of excluding the $21,770 worth of foreign bulbs that are imported here, for the General Electric Co. would care nothing about that, but it is for the purpose of putting the General Electric Co. in a position so that, if it shall see fit to raise its present extortionate charges against the public, it may do so without running the risk of foreign competition. In other words, Mr. President, their profits are now up to the full level of the 30 per cent protection; they are enormous; but the General Electric Co. in its greed wants to raise them higher. If they are raised higher, then competition from abroad will come in, and so it wants more protection, in order that it may raise its rates even still higher and be safe against foreign competition.

A Senator on the other side says that this product can be made in Germany for $8—I suppose by that is meant $8 a unit—and I presume it can be made here for less than $8 a unit. He says this product when it comes from abroad is sold in this market for $47. If it is sold in this market for $47, it is because the General Electric Co., a trust, able to fix its prices at what it pleases, has raised the price so high that the foreigner can come here and get the benefit of the high prices which the General Electric Co. has established. They were not charging the high prices in this market which the Senator on the other side mentioned when they bought in the $22,000 worth of bulbs, because of the high cost of production in Germany; they were charging it simply because they wanted the benefit of this market, and the prices of the bulbs were so high in this market that they could charge two or three times as much as it cost in Germany to produce them, and, in my opinion, two or three times as much probably as it cost in this country.

We ought to have some evidence from the committee, under the circumstances, as to what it costs to produce bulbs in this country; but we have none. If the Senator from North Dakota will now tell me what it costs to produce the bulbs in this country, I can reach some idea of the profit the General Electric Co. is charging the people of the country for bulbs. All I know about it now is that they made a profit of $20,000,000 on $60,000,000 of sales of bulbs in this country.

Mr. McCUMBER. Mr. President, does the Senator desire me to answer now?

Mr. SIMMONS. If the Senator has the information, I should be very glad to have it.

Mr. McCUMBER. I will quote from an epitomized statement of the witness, Mr. William P. Clarke, representing the American Flint Glass Workers' Union, who went to Europe for the purpose of investigating the subject.

Mr. SIMMONS. I am not asking the Senator about the European cost; I am asking about the cost of producing bulbs by the General Electric Co. in this country.

Mr. McCUMBER. Mr. Clarke tells what the American cost is of producing bulbs, and that is all I can go by. I do not know whether the bulbs referred to were produced by the General Electric Co.; but he gives the cost of the bulbs in the United States.

Mr. SIMMONS. The General Electric Co. produce all except 3 per cent.

Mr. McCUMBER. Then, perhaps that is the cost to which he is referring, although I am not certain as to that. I will, however, give the figures to the Senator if he wishes them.

Mr. SIMMONS. I should like to have them.

Mr. McCUMBER. I shall have to read his statement, which is an epitomized statement:

In 1914, to the best of the witness's knowledge, the wages of German glassware workers averaged $10.71 a week, based upon the American standard. The wages of American glassworkers at that time were $16.23 a week—

That was back in 1914—

At the present time skilled men are paid $5.27 a week in Germany, as a maximum, in American money—

Only about half of what was paid them in 1914.

The cost of production in the United States as compared to the cost in Germany—

I assume he means the labor cost—

is 8 to 1. The relative cost of production is also much lower in Czechoslovakia, Belgium, and France.

American glassworkers have never, in more than 40 years, been paid in excess of $35.02 a week, and are not getting a living wage at the present time. The cost of skilled labor in the production of electric bulbs (glass only, without the filament) is not over 15 cents a hundred in Germany, while the domestic labor costs for the same article are $1.54 a hundred, or ten times as much.

The selling price of the American-made electric bulbs is $27 a thousand. The witness was informed by a dealer in German electric bulbs that they were laid down in the United States at from $19 to $22 a thousand.

Now, this is the point:

The American cost for these bulbs is $15.40 a thousand for the skilled labor only, not taking into consideration overhead, fuel, and other expenses. Electric bulbs sold for $18 or $19 a thousand in 1911 in the United States. American-made lamp chimneys sell for $1.35 per dozen in Chicago, Ill., and a German substitute, practically as good, is selling for 30 cents per dozen.

Ninety per cent of American glassworkers work on a piecework basis, unlimited production, and in no instance do they work less than eight hours a day; in most instances eight and a half hours.

Remember that the American cost for these bulbs is $15.40 a thousand for the skilled labor only, and in another section of the testimony it is claimed that the labor alone is more than 50 per cent; but averaging it at 50 per cent the cost would be $30.80 in the United States, while the Germans are able to sell at from $19 to $22 a thousand as compared with our cost of more than $30 per thousand in the United States, without taking into account the overhead expenses, and so forth.

Mr. SIMMONS. Mr. President, I understood the Senator in his first statement to say that certain bulbs which could be produced in Germany for $8 a thousand were sold in this market for $47.

Mr. McCUMBER. Oh, no; I stated that this witness was informed by a dealer in German electric bulbs that they were laid down in the United States at from $19 to $22 a thousand, and the American cost for these bulbs in labor alone is $15.40. I understand that that cost is about 50 per cent of the cost, which would make, with the material added, about $30.80; and that does not take into consideration the overhead expenses, cost of selling, and so forth.

Mr. SIMMONS. Mr. President, I know nothing about the labor cost of producing these products in Germany or in the United States; but I shall not accept, because I do not believe, the statement that the labor cost of this product can be eight times as much in the United States as it is in Germany. That seems to me wholly incredible, especially in view of the statement that I read into the record this morning from a gentleman who has just been over in Germany investigating the industries in that country, in which he said that the labor costs over there were at a very much higher level than they were before the war. Some products may have been produced in Germany immediately after the war closed at a very inadequate labor cost because of a general feeling among the German people at that time that it was their patriotic duty to aid the Empire—the Republic, as it is now—in its scheme of capturing world markets by working for very low wages, just as there was a sentiment among the manufacturers to contribute their mite to the same general scheme by accepting small profits; but I think all the testimony tends to show that to-day the workmen are insisting in Germany, as they are in all the countries in the world, upon the international scale of wage, just as the German manufacturers are insisting upon full profits.

It is incredible to me that in the country next to our own of the greatest industrial development, with the most thorough organization, both as to labor and as to manufacturers, it should cost only one-eighth as much for a man to make a given

product as it costs in this country. If you were to tell me a story of that sort with regard to the labor in Haiti or with regard to the labor in Africa as compared with that in America, I would believe it; but when you tell me that in Germany, a country distinguished throughout the world for its intelligence and its efficiency in production, a country which, by reason of its intelligence and its efficiency, was gradually acquiring the commercial ascendency of the world, with the same kind of machinery a German laborer can produce eight times as much as an American laborer can produce, I say it is incredible.

Mr. President, so far as the cost of this product in this country is concerned, I do not know whether it is properly represented or not, but I do know that a large part of this work is done to-day by machinery, and improved machinery, as the Senator from South Carolina has just stated; and wherever we are introducing these improved machines the labor cost constitutes a constantly diminishing factor in production. I read the other day of a machine which, operated by a single man, could make 150 pairs of shoes in one day. Undoubtedly this great American trust that dominates the industry absolutely is employing the finest machinery in the world, the most up-to-date machinery in the world; and if this product can be made in Germany for $8 labor cost, or $18 total cost, I have but little doubt that it can be made in this country for practically the same cost.

Mr. NORRIS. Mr. President, may I interrupt the Senator?

Mr. SIMMONS. Certainly.

Mr. NORRIS. If those figures are correct, that it costs eight times as much to manufacture these bulbs here in the United States as it does abroad, I am very much interested to know why they are not imported.

Mr. SIMMONS. I thank the Senator for the suggestion. I was just reaching it as the Senator made the point.

Here we have this situation: We have a trust here in this country, and it is now claimed that that trust is not charging extortionate prices, that its cost of production is very high, that it is higher than the German cost of production by eight times so far as the labor element is concerned, and that the total cost of production of this article abroad is, I believe the witness said, $18 as against $30, more than a third less than it is in this country; and yet, Mr. President, in the face of that fact, with a tariff of only 30 per cent, we are advised that the entire German importation for the last year, 1921, was of the value of less than $25,000. What does any reasonable man suppose would happen if that were true?

Mr. President, we talk about things here, it seems to me, in an illogical and unreasoning way. This great body is supposed to have some common sense, and we ought to look at these questions from a common-sense standpoint. We ought not to be accepting any juggling of figures that may be brought to us here by people who are seeking to get more protection, people who are seeking to bring about a condition which will enable them to increase their already swollen profits.

As a matter of common sense, Mr. President, if the figures of the Senator from North Dakota are correct, if Germany is alert, if Germany wants trade, and we have the most inviting market upon the face of the earth, we have a trust here that raises the price of this product well up toward the sky, and affords the finest opportunity of exploitation upon the face of the earth, provided Germany is able to meet American competition, and we are told that she can meet it because she can make her product at two-thirds of what it costs us to make it, and if these labor-cost figures are correct, she can make it for very much less than two-thirds of what it costs us to make it. If those figures are correct, she ought to be able to make this product for at least one-fourth of what it costs us to make it. Indeed, I might even reduce those figures, and say she ought to be able to make it at one-eighth of what it costs us to make it. If the labor cost is only one-eighth of the labor cost here, and the labor cost is 55 per cent of the total cost of this product, then tell me why Germany can not make it for one-fourth of what we are making it here? She can send her product over here, and she can get the benefit of these high trust prices, established by the General Electric Co. The cost, they say, is $30 a thousand. I suppose they are selling the product for about $47 or $48 a thousand, judging from the profits they make. So the field is open to Germany at prices anywhere below $47 a thousand.

It is said the manufacturers in Germany can produce these commodities at one-eighth the American labor cost. If we can make them for $30, and the labor cost in Germany is one-eighth ours, you can lop off $27.25 for difference in labor costs, and you can lop off more for the other differences which it is contended exist, and if these figures are correct this product can be made by Germans and sold in the American market for probably one-third the prices which are now charged by the General Electric Co. and the manufacturers of Germany make money.

Then, in the name of high heaven, under those conditions, why does Germany permit the General Electric Co. to command the whole market in the United States? Why does she not come in and take charge of it? Why does she content herself with sending only $22,000 worth of this ware here in nine months? What is to prevent her from doing it? Nothing but that 30 per cent tariff. It is likely that the 30 per cent tariff does keep her out right now. I think it is very likely that the German cost is very much nearer the American cost, and that the 30 per cent keeps them out and protects the trust.

The trust would probably be satisfied with these conditions. They already have a high enough tariff to keep the German product out. They already have a tariff that has kept the Germans out. Every sensible man knows that that 30 per cent would not have kept the Germans out if they could make this ware at one-eighth the labor cost at which it is made in this country.

Why does the General Electric Co. ask for a higher rate? They have a profit which gives them command of the whole market. Of the 60,000,000 bulbs consumed in this country the General Electric supplied in nine months in 1921 all except $22,000 worth, or at the rate of about $25,000 worth in a year. They ought to be content with that. That is true not only of this year but it has been true of the years which have passed. Why, in that situation, does the General Electric Co. want more? There is but one reason in the world for it, and that applies not only to this case but to many cases where industries which now are not confronted with any foreign competition to speak of are still asking for much higher rates of duty.

They are not satisfied with the profits they are now making. They want to increase their profits. They want to advance their prices. The present law protects them only to the extent of their present profits. If they go above those profits, then the foreigner can get over the wall of protection and bring his products in here. They want the opportunity to increase their prices and their profits without the risk of foreign competition.

The General Electric is already amply protected by this 30 per cent rate. It is already secure with its 30 per cent duty against foreign competition, and if we give them 40 per cent more they can increase their prices 40 per cent over the present prices, if they want to, and still be as secure and protected against German competition as they are now.

This bill reeks with that sort of thing. It is written not by a committee of the Congress of the United States; it is written by the industries which are here seeking higher and higher protection in order that they may exploit and rob the people to a greater extent than they are now robbing them. They have written these rates, and they are asking the American Senate to indorse them.

For one, I say that rates like these are an insult to my intelligence and my common sense, and the bill is full of them.

Mr. KING. Mr. President, I have just come into the Senate, and I ask the Senator whether the articles embraced in the paragraph under consideration are made largely by the electric company which is generally known as the Electric Trust?

Mr. SIMMONS. The letter of Mr. Untermyer, who has just investigated this matter thoroughly, is to the effect that the General Electric Co., which is a trust, produces 97 per cent of the entire amount consumed in the United States.

Mr. KING. Mr. President, some months ago I was in New York and I made some investigation in regard to this so-called trust. The proof before the Lockwood committee, as well as other extraneous facts which came to the attention of the public, quite clearly established that the company or organization referred to is a trust.

Why the Department of Justice has not proceeded against it for the purpose of dissolving it, or why criminal proceedings have not been commenced for violations of the Sherman antitrust law, I am not able to understand. There is some criticism of the Department of Justice because of its failure to prosecute combinations and conspiracies which are violators of the Sherman Act, and I have hoped that it would vigorously attack some of these gigantic monopolies that are preying upon the people.

The Carbide Trust is one. Under the last administration the Federal Trade Commission made an investigation of this last-named organization and, I feel sure, found that it came within the denouncements of the statute. Mr. Myron T. Herrick, ambassador to France, is one of the leading officials of this trust. There is no indictment of the Carbide Trust; no steps taken to secure the dissolution of that illegal organiza-

tion; no indictment of the Electric Trust; and no proceedings, as I am advised, to secure the dissolution of that illegal organization.

We have made very liberal appropriations to the Department of Justice for the purpose of enforcing the Sherman antitrust law and the Clayton Act. So far as I can learn the prosecutions instituted have been few, and the actions to secure dissolution of trusts have been infrequent not only by this administration but also by former administrations. Many of the people seem to regard the Sherman Act as a joke; I am afraid that this mental attitude has been the product of either the incompetency or the indifference of some of the prosecuting officers of the Government. However, during the last two years of the former administration there was a genuine effort to enforce the law, and the results of the investigations made would have become universally known if the same officials had been continued for a short time. There is a feeling that both parties have failed to attack illegal combinations with that earnestness which should characterize the enforcement of the law. I have felt that the Sherman law has been often flouted by big business interests, and that the officials who should have proceeded against them were too indifferent to such violations.

District attorneys, I am told, have been slow to proceed because of the policy of the Department of Justice, which seemed to proceed upon the theory that no suit could be brought under the Sherman or Clayton Acts without the authorities at Washington directed, no matter how conclusive the evidence seemed to be against defendants. In other words, while local district attorneys have felt authorized to initiate prosecutions for the violation of the Federal statutes for homicide, for instance, counterfeiting, violation of the narcotic drugs act, and the violation of a multitude of other penal statutes, when it came to enforcing the Sherman antitrust law they had to get the consent of Washington.

Without specially declaring the cause, it is apparent that there has grown up in the United States a multitude of oppressive industrial organizations. They are trusts or monopolies, and defy the laws of competition or, rather, they destroy them. They have existed for years under both administrations, and they are now prosperous and potential under the Republican administration. The result will be that if those laws are not enforced against such organizations the people will ultimately demand that corporations engaged in interstate commerce shall obtain a Federal license to do business or be subjected to some sort of Federal control, the effect of which will be to destroy initiative, retard the development of legitimate business, and arrest that proper industrial progress which should characterize this the greatest Nation in the world.

I am not opposed to big business. Through the policies of integration, there are of necessity great organizations. Perhaps Mr. Roosevelt, as much as any statesman in modern times, appreciated that fact, but he, rather inclined to follow the school of philosophy expounded by some of the professors in the University of Wisconsin, felt constrained to advocate the control of these corporations by Federal regulation. I would regard that as mischievous, impolitic, and unwise for many reasons, and particularly for the good of the people; but Federal control of these great industrial organizations is bound to come unless the law of competition is observed in the United States.

Mr. CUMMINS. Mr. President——

The VICE PRESIDENT. Does the Senator from Utah yield to the Senator from Iowa?

Mr. KING. I yield.

Mr. CUMMINS. While I suppose this discussion is not very material to a tariff law, yet it is a very interesting one, and the subject appeals very strongly to the chairman of the Committee on Interstate Commerce.

I suppose the Senator from Utah will concede the general purpose of the antitrust law was to secure and maintain a helpful competition among the industries and productions of the country——

Mr. KING. I agree with the Senator.

Mr. CUMMINS. A competition which would result in fixing reasonable prices for the commodities which those industries produce. The Senator from Utah knows that the Standard Oil Co. was successfully prosecuted, and I am wondering why he is including in his criticism the Supreme Court of the United States as well as the Department of Justice. I pause for answer to that inquiry.

Mr. KING. Mr. President, it is embarrassing for a lawyer to speak in a disparaging or critical way of the courts, especially the Supreme Court of the United States, a court which we all respect. Yet I may say, with all due deference to the court, that in my opinion a number of its decisions construing or applying the Sherman antitrust law have tended to weaken that law and deprive it of some of the potency which the legislators who framed the law believed that it possessed.

Mr. CUMMINS. But the Senator from Utah will remember that the Supreme Court held that the Standard Oil Co. was in violation of the antitrust law, and proceeded to render the decree or the judgment which it believed to be necessary in order to dissolve it and to bring in the competition which theretofore had been suppressed.

Mr. KING. I did not have in mind particularly, I may say to the Senator, when I made that reply, the Standard Oil case. I had in mind the steel case, for instance, and others, particularly where the so-called rule of reason was applied.

Mr. CUMMINS. I am not myself thinking of those cases in which the defendants have been held not guilty. I am thinking of the cases in which the defendants have been pronounced guilty. Has there been any more competition among the oil companies since the decree in that case was rendered than before?

Mr. KING. No; I think there has been and is, if the Senator will pardon me, a head to the Standard Oil Co. yet, though there appear to be a number of parts which seem to be entirely independent of each other. There seems to be some central, powerful, and integrating force which guides all the parts and directs their efforts to a common end.

Mr. CUMMINS. The Senator will remember that the American Tobacco Co. was dissolved by a decree finally affirmed and, indeed, rendered by the Supreme Court of the United States. Does the Senator think that there has been any more competition among the manufacturers of tobacco in its various forms than before?

Mr. KING. I am not able to answer the question because of the conflicting testimony which has been brought to my attention.

Mr. CUMMINS. The Senator remembers, because it happened in his own country, that a railroad combination, of which the Southern Pacific Railroad Co. was a part, was found to be in violation of the antitrust law and dissolved. Has there been any marked advantage to the people noticed by the Senator since that dissolution took place?

Mr. KING. Let me say to the Senator that we can easily differentiate transportation companies interstate in character from the industrial corporation, because the former are amenable to the Interstate Commerce Commission in the question of rates and such regulations as the commission by law has promulgated or may hereafter promulgate.

Mr. CUMMINS. Nevertheless those companies were found to be guilty of a violation of the antitrust law, and probably very righteously so. I am asking these questions to put up to the Senator from Utah the consideration of some more effective way in which to deal with these things. It is of very little account, from my standpoint at any rate, to have the Attorney General proceed toward the dissolution of some trust or alleged trust, and after it is all over, after he has won a victory and has accomplished his purpose, to discover that we have just as little competition, or possibly less competition, than we had before.

Mr. KING. Let me see if I understand the Senator. His conclusion would seem to be that the Sherman antitrust law, even where it has been applied, has been wholly ineffectual to remove the wrongs of which complaint was made, and, therefore, I would assume from the Senator's position, if I understand it correctly, that he thinks the Sherman antitrust law ought to be repealed.

Mr. CUMMINS. I do not think so, but I think the Senator from Utah could employ his great talents even to better advantage in considering how it can be rendered more effective than in challenging the fidelity of the various Attorneys General in enforcing it. I am in entire sympathy with the object to be accomplished, but I think it is hardly fair to say in this public way that the Attorney General, either under the previous administration or under this administration, has failed to recognize and perform the duties which that law imposes upon him. I really think they have done the best they could and have proceeded in every case in which they have believed that anything could be accomplished for the benefit of the people by prosecution. I hope the Senator from Utah will find some measure of constructive legislation that will enable us to bring back and to maintain that competition upon which alone, as I believe, the safety of the American people depends.

Mr. KING. Mr. President, the Senator's statement concerning the importance of maintaining competition I regard as profoundly wise and opportune. I think unless we do preserve the law of competition we will destroy our industrial system, and

when we destroy our industrial and economic system our political system will be destroyed or radically changed, because, whether we will or not, there is such intimate relation between the industrial and economic life of the people and their political system that when the foundation of the industrial system is broken down or greatly disturbed the political system will react to such changes. History proves this statement. It finds corroboration in the situation in Russia during the past five years.

Mr. HARRIS. Mr. President——

Mr. KING. I yield to the Senator from Georgia.

Mr. HARRIS. The Senator from Iowa has referred to the Standard Oil decision. The Senator does not remember, I suppose, that two years ago the Senate passed a bill I introduced which would have corrected that matter. Under the dissolution decree of the Standard Oil Co. they did not change the stockholders; they dissolved the one big company and formed several, about 20, and divided the territory. The same stockholders own the same interest practically in all the companies, and of course those companies are run, as the Senator from Utah says, just as one company. About 70 per cent of all the stock in all the 16 or 20 different Standard Oil companies is owned by the same people; about 53 per cent of all the stock is owned by 16 persons. They are to-day, as investigation by the Federal Trade Commission shows, operated as one company, and there is no competition. The Senate passed a bill which would have prevented that and prevented the stock from being sold or transferred to the same people who now own a majority of the stock. For instance, in the case of the death of a present stockholder or the sale of any of the stock owned by the stockholders they would not be allowed to sell that stock to one of the present stockholders of the company.

As long as the same stockholders control a majority of the stock in all the companies, of course there will never be any competition. Since the Clayton antitrust law was enacted preventing price discrimination the Supreme Court dissolution decree was a good thing for the different Standard Oil companies. If there was only one company on the same commodity they could not discriminate in prices, except as to difference in the cost of selling or transportation; but as there are several companies, they can discriminate in price and not violate the law, even though most of the stock of all the companies is owned by a few persons. That is a condition that has existed in a number of instances in the past. The Standard of Ohio has sold gasoline at one price in the State of Ohio, and the Standard of Indiana sold at another price in Indiana, just across an imaginary State line, and they were not violating the law because they were different corporations. If they were all one corporation they could not violate the law, and they would have to sell at one price and not discriminate.

The dissolution of the Standard Oil Co. was the very thing they would have preferred. As I have stated, under the Clayton Act, preventing discrimination in price, the Standard Oil Co. can now discriminate in price in different territory without violating the law, because there are a number of the companies, and they have divided the territory, giving to each Standard Oil Co. a certain territory which does not conflict or interfere with any of the other several companies.

Mr. CUMMINS. I do not want to be misunderstood or leave any opportunity for misunderstanding. I think the Supreme Court of the United States did everything that it could do in the dissolution of the Standard Oil Co. I can not imagine any power that it had that it did not exercise in the rendition of its decree. There are opportunities for amending the law, possibly.

I doubt, though, whether the position of the Senator from Georgia is correct in that if the Standard Oil Co. were a single organization instead of 22 or 23 or 30—I do not remember just how many there are—that condition would prevent the Standard Oil Co. from selling at one price in Indiana and another price in Illinois and at still another price in Ohio. I do not know of any law that prohibits any discrimination with regard to selling price in different localities.

Mr. HARRIS. I think under section 2 of the Clayton Act that would be against the law. I would state that the Senate passed a bill which I introduced which I believe would correct these abuses, but the House declined to pass it. Bills of a similar nature are before the Senate now, but we have not had any action on them yet, and I am afraid we will not get any action on them at this session.

Mr. KING. I repeat what I was stating when I yielded to the Senator from Georgia, that the views of the Senator from Iowa I regard as eminently sound. There is such an intimate relation between the industrial life and the political life of the country that unless we have industrial prosperity and industrial progress and development we will witness great mutations in our political life and conditions. The Senator is familiar with the French economists, who have pointed out that the struggles of the past to get civil liberty, political liberty, and religious liberty were followed by struggles for industrial freedom. There must be industrial freedom as well as political freedom and civil liberty. Indeed, I might say these can not long exist—civil and political liberty—unless there be industrial liberty.

As I said a moment ago, I have no objection to big business per se, but it must be honest business, it must be fair business, it must be competitive business. The Senator paid me the compliment to say that I might employ my talents to better advantage in suggesting in a constructive way some emendations of the law instead of criticising some who are charged with the enforcement of the law.

Mr. President, I do not want to do any person or party an injustice, but I have felt that there has not been as vigorous an enforcement of the Sherman law as was necessary or proper for the interests of the country. There has been uncertainty as to what it meant or what the courts would do and many obstacles have been interposed to prevent its execution. Officials have at times been discouraged with the results which had followed their efforts. In my opinion, the criminal features of the law have not been invoked as often as they should have been. I believe the American people want that law enforced. They want trusts dissolved; they are opposed to industrial organizations which prevent competition and devour the smaller business enterprises. They are not opposed to big business per se. It is only when corporations become criminal and destructive of competition that the people feel that corporations ought to be proceeded against and their power curbed or destroyed.

Let me say to the Senator that I introduced a bill some time ago which is now pending before his committee; it may not be a constructive contribution to the law, yet I think that it would improve the Sherman antitrust law to some extent. I ask the attention of the Senator, when the committee meets, to the measure which I introduced some months ago.

However, Mr. President, I rose merely to say that the evidence, I think, shows that the electric trust dominates the domestic field as to the products embraced within the paragraph under consideration; and we are now not only condoning its crimes, its exploitations, its profiteering, but we are licensing its predatory activities. I can not conceive of any justification for this paragraph and for the enormous duty which is placed upon the products therein referred to.

In conclusion let me again say, Mr. President, that we must have either a free and fair competitive system in the United States, in which there is an open field for the humblest and the smallest capitalist, or it is going to be governmental regulation, and the big business interests must understand it.

They have got to treat the public fairly; they have got to be satisfied with reasonable profits. If they reach out in a ruthless way for the purpose of destroying competition and drawing into a few huge, colossal industrial organizations the business of the United States, then an irresistible demand will be made for Federal control of interstate commerce, the licensing of corporations, or the regulation of all corporations which are engaged in interstate commerce. That I should regard as a calamity.

It is, Mr. President, because I believe in business organizations, in the right of men to organize and to make fair profits, even large profits, that I am pleading for corporations and for the great industries to deal fairly with the people. I am a better friend of big business which is honest and legitimate than are some of the Republicans on the other side of the Chamber who are proposing to give big business a bigger club with which it may beat down the masses of the people. If Republican Senators license corporations and domestic producers to exploit the people, they are enemies not only to the people but to business itself. We want a prosperous and a contented people. Contentment will bring prosperity. There will be contentment and peace and progress in our land when we practice justice and when all interests perceive their close relationship—indeed their interdependence. Let business men have a fair field—unhampered by foolish and obsolete laws and regulations; but do not enact laws to give them special privileges or license them to plunder the people.

Mr. SMOOT. Mr. President, incandescent electric-light bulbs were provided for in paragraph 229 as the pending bill came from the other House. I wish to say to the Senate that the General Electric Co. had nothing whatever to do with the transference of that item from paragraph 229 to paragraph 218. That transfer was based upon a statement made by Mr. William P. Clarke, national president of the American Flint Glass

Workers' Union, of Toledo, Ohio, who had just returned from a visit to Germany, and who testified before the committee after the hearings had been closed. He was accompanied by Mr. P. W. McCreary, the superintendent of the Phoenix Glass Co., of Pittsburgh, Pa., who had also accompanied Mr. Clarke to Germany.

The statement was made there—I think it has already been referred to in the Senate to-day, and I do not wish to repeat it; it will be found on pages 5190 and 5191 of the hearings—that so far as the electric bulbs are concerned—and Mr. Clarke pointed to the bulbs in the chandelier in the committee room—it costs a little more than ten times as much to make those bulbs in this country as it costs to make them in Germany.

Mr. DIAL. Mr. President, I should like to ask the Senator whether he thinks the witness was unbiased? Is it not to the interest of those he represented to keep up the cost?

Mr. SMOOT. I rather think the laboring man desires to keep the costs up, if possible, in order that he may continue to receive the wages he is receiving to-day. I will say to the Senator now that if Mr. Clarke's testimony is correct, and the latest report I have from the Department of Commerce is also correct, the worker in Germany hardly receives any more for a month's work than is paid in this country for a day's work on this class of commodity.

Mr. DIAL. If that is true, I do not see how they can live at all.

Mr. SMOOT. I am not discussing the question as to how they can live, but I have here a report which, when the proper time comes, I am going to put in the RECORD, showing exactly what the foreign labor receives, according to the findings of the Department of Commerce.

Mr. DIAL. Personally, I have not much faith in either one of the reports.

Mr. SMOOT. The Senator has a perfect right to have no faith in them or to have all the faith possible, but that does not change the testimony given. The majority of the committee decided to put bulbs under paragraph 218——

Mr. HITCHCOCK. Mr. President, did I understand the Senator to say that labor in the United States costs 10 times as much as labor in Germany?

Mr. SMOOT. Yes; and more than that, if this report is correct.

Mr. HITCHCOCK. When was that?

Mr. SMOOT. That was at the end of 1921. I have a copy of the report to which I have referred. It is just out, and has not been printed as yet.

Mr. HITCHCOCK. Such a condition would enable the German manufacturers to drive our manufacturers out of our home market.

Mr. SMOOT. I do not know how soon they will do that; I can not say anything about what Germany is going to sell her products for; and that is not what I rose to discuss at this time.

Mr. HITCHCOCK. The Senator states that the figures he has given are for last year?

Mr. SMOOT. They are brought up to December, 1921.

Mr. HITCHCOCK. Of course, the foreign producers, then, must have taken possession of our market by this time?

Mr. SMOOT. No; they have not done so as yet.

Mr. HITCHCOCK. Can the Senator state what the imports are?

Mr. SMOOT. Those figures have already been given.

Mr. HITCHCOCK. The imports are merely nominal, are they not?

Mr. SMOOT. They are.

Mr. HITCHCOCK. They amounted to about $21,000 as against millions of dollars of production in this country?

Mr. SMOOT. They are nominal so far as electric light bulbs are concerned.

Mr. HITCHCOCK. Let me ask the Senator another question: Did the Senator believe the statement that labor was 10 times more expensive in the United States than in Germany?

Mr. SMOOT. Well, I do not believe the statement that was made by Mr. Clarke; but I am at a loss to know what position I will take since I received the report to which I have referred from our own Department of Commerce.

Mr. HITCHCOCK. The Senator would not like to have us believe that labor is 10 times more expensive in this country than it is in Germany, would he?

Mr. SMOOT. I do not ask the Senator to believe anything. I do not propose to say that the figures are absolutely correct because I have not made a personal investigation, but I do not propose to quote anything here unless I have the evidence for it, and then I shall give the source of the information.

Mr. CUMMINS. Mr. President, may I ask the Senator a question?

Mr. SMOOT. Yes.

Mr. CUMMINS. Is the statement that the Senator has just made the probable basis for the action of the House in fixing the duty upon electric light bulbs at 35 per cent?

Mr. SMOOT. I will say to the Senator that Mr. Clarke's testimony was not given before the House, nor was it given in the regular hearings of the Senate Finance Committee, but it is in the appendix to the hearings. He appeared before the committee after the regular hearings had closed upon this schedule—in fact, when we had almost concluded the hearings on the whole bill—and his testimony appears in connection with the administrative features of the bill.

Mr. CUMMINS. If we frame a tariff bill upon any basis of that kind the rate proposed is a perfectly inadequate rate, and we shall have to put a duty of 1,000 per cent upon electric-light bulbs, even if we were to introduce the competitive basis. Does the Senator from Utah think we ought to do that?

Mr. SMOOT. No; and the Senator from Utah did not even vote to transfer this item to this paragraph.

Mr. CUMMINS. I am glad to hear that.

Mr. HITCHCOCK. I suggest that if the particular testimony referred to is in the appendix, that appendix ought to be treated like the vermiform appendix of a human being, and be taken out.

Mr. SMOOT. Mr. President, I am simply calling attention to what was the moving force—if I may so call it—which induced the committee to strike out paragraph 229 and transfer electric-light bulbs to paragraph 218.

What I rose to say, Mr. President——

Mr. McCUMBER. Mr. President, may I suggest to the Senator from Utah that the witness, according to the testimony I read, said the cost was as 1 to 8. The Senator says as 1 to 10.

Mr. SMOOT. I will read it.

Mr. McCUMBER. Just a moment. The Senator has said that the American laborer gets about as much for a day's work as the German does for a month's work. I have a statement that came from Germany only yesterday, giving the wages in this industry and other mechanical industries, in which it is shown that the German wage is $8 a month, while we are paying from $45 to $50 a week. So the figures are not very far off. The standard German wage was 12 marks per hour, and Senators can figure out the number of marks it takes to make a dollar and see that the statement made by the witness is not so far out of the way as to the actual facts. I will say further the testimony of the witness is not subject to the criticism that is aimed against it, and it is not unbelievable.

Mr. SMOOT. I will say frankly that the testimony before the committee is that we are paying laborers for this identical work from $8 to $9 a day. Mr. Clarke said the American wage was not eight times greater than the German wage, but ten times greater, as I stated. I quote from the testimony of Mr. Clarke as follows:

> Senator JONES. Is that agency under the direction to any extent of the Reparations Commission appointed under the Versailles treaty?
> Mr. CLARKE. Not to my knowledge; no.
> I was going to say there is an electric bulb in that bracket [indicating chandelier in the committee room]. The cost of the skilled glass-worker producing that in Germany to-day is not in excess of 15 cents a hundred—that is, for producing the glass bulb, not the lamp—while to-day in America the price of producing that bulb amounts to $1.54.
> Senator JONES. Ten times as much?
> Mr. CLARKE. Ten times as much.

Mr. NORRIS. Mr. President——

Mr. SMOOT. I yield to the Senator.

Mr. NORRIS. It seems to me that this discussion ought to take place in secret executive session. It is quite evident that the Germans have not found out about America using electricity. They would be importing these bulbs which they are making at this low price, and we would have the General Electric Co. driven out of business, which would be a calamity that none of us would stand for a moment. If we carry on this discussion much longer, even though it is only printed in the graveyard known as the CONGRESSIONAL RECORD, some enterprising sympathizer with Germany will find it out, some pro-German left over from the war may get hold of it, and he will publish it in Germany, and the result will be that we will be covered up with electric-light bulbs here and will not be able to get out before the election next November. This debate, Mr. President, will have a tendency to let it leak out and get to the German. He does not know about it now. He does not know that our electric-light bulbs are costing ten times as much as the German bulbs cost; and if he finds it out, notwithstanding we have a duty of 70 per cent in this bill, it will not make

any difference. We might just as well have it 100 per cent, but it would not do any more good. We are gone; there is no show for us.

Mr. SMOOT. Mr. President, I did not rise to discuss the question of bulbs at all. I rose to discuss the other items in this paragraph, although I will say to the Senator that there is a reason why they have not shipped them into this country if our information from the Tariff Commission is correct, and, in passing, I may state just what that is.

The world, as far as glassware is concerned, has been rather bare of products outside of the United States. I think Germany has found a market even better than or as good as the market of the United States, and has sold those bulbs. That is what is reported.

Mr. SIMMONS. There is no better market than this, judging from the prices that are paid in this market.

Mr. SMOOT. Mr. President, I want to call particular attention to the other items in this schedule.

Mr. JONES of New Mexico. Mr. President——

The VICE PRESIDENT. Does the Senator from Utah yield to the Senator from New Mexico?

Mr. SMOOT. I want to get through.

Mr. JONES of New Mexico. I understand that the Senator does, but just a word. I want to suggest a possible explanation of this difficulty. In the summary of the Tariff Commission's report under paragraph 229, in speaking of the production of incandescent lamps and bulbs, I find this statement:

> In 1916 the bulbs were made by five plants, with an estimated production of 20,000,000 per month. The bulbs are blown into iron molds coated with carbonaceous paste. A high polish is effected by rotating the blank in the mold during the blowing. Mechanical processes simulating the hand method of blowing have been devised.

I wonder if that is not the reason why we are not swamped in this country with bulbs—that they are made by machinery, and that this hand labor that we have all been talking about here cuts very little figure in the transaction?

Mr. SMOOT. No; I will say to the Senator that I think he is wrong in that.

Mr. JONES of New Mexico. There are mechanical devices for blowing different kinds of glassware. They have the glassware put into tubes, and have the molds for them, and they have a little air machine that blows into the tubes and makes the glass take the shape of the molds; and I think this question of German labor does not cut any figure here, because, if these witnesses were at all correct, as the Senator from Nebraska says, we would be swamped with bulbs.

Mr. SMOOT. I think Mr. Clarke, the head of the union, knows what he is talking about. Whether he does or whether he does not, that is what he testified before the committee as to the bulbs; and, of course, the cost of the glass bulb itself is only about half of the cost of the finished bulb. That is only the cost as far as the glass is concerned. But, Mr. President, 26 manufacturers of illuminating glass were represented in the tariff hearings before the Finance Committee, and they reported that they had operated their plants at less than 30 per cent of capacity since January 1, 1921, and that since July 1, 1921, more than 90 per cent of their workers had been idle.

Mr. LA FOLLETTE. That was not on account of the importations.

Mr. WALSH of Montana. Mr. President, let me inquire of the Senator from Utah if they attributed that to the lower cost of labor.

Mr. SMOOT. Only partly. The greater part of it was because of the lesser demand for the article; but if the Senator will take the importations he will find that the importations have been increasing right along under this paragraph. I am not speaking of the bulbs; I am speaking now of the rest of the items that fall under the 70 per cent ad valorem duty that we are discussing at this time.

Mr. WALSH of Montana. Mr. President, let me say, if the Senator will permit me, with reference to the importance of this matter of low wages in Germany, that there is a brief note here in the Commerce Reports, being a weekly survey of foreign trade published by the Department of Commerce, in its issue of April 17, which, with the permission of the Senator, I should like to read, as follows:

> AMERICAN FIRMS WIN BRIDGE CONTRACTS IN ARGENTINA.
>
> During the past few months American fabricators have been successful in securing some attractive bridge construction contracts from the Argentine State Railways, in keen competition with German and Belgian concerns.

Mr. SMOOT. This is not bridge material, this is not steel that we are talking about.

Mr. WALSH of Montana. No; but the same labor problem is involved.

Mr. SMOOT. There is quite a difference between making steel, as far as labor is concerned, and making the items that fall under this paragraph.

Mr. WALSH of Montana. If the Senator will permit me, I continue:

> It appears that the local officials are not satisfied with the workmanship turned out by European shops, and preference was given to American bidders at prices which are really higher, considering that it is the practice of nearly all domestic companies to provide for payment in United States gold.
>
> American bridge-shop practice has been developed to a far higher degree than in the case of European manufacturers of like materials. This has been necessary because of the higher grade labor used in the United States. Multiple punch machines and spacing tables, such as are common in first-class shops in the United States are almost unknown in Europe, where practically all work is drilled at a much higher cost of production, in spite of the lower wages paid to labor. American exporters, realizing that there is attractive business to be had in Argentina, are pursuing this market with a willingness to conform to local requirements, which, they state, are by no means unreasonable.

So, Mr. President, when we establish the fact that the rate of wages in a particular industry is lower in Germany than it is in this country, we have not advanced anywhere of consequence toward determining which country can produce at the less cost.

Mr. SMOOT. Oh, well, the labor required in producing structural steel is infinitesimal compared with the labor that is required in making illuminating articles. There is no comparison at all.

Mr. President, I simply wanted to say that much at this time. I do not know that it is necessary to say anything further, because we have thrashed this matter over and over again here.

Mr. JONES of New Mexico. I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. JONES of Washington in the chair). The Senator from New Mexico suggests the absence of a quorum. The Secretary will call the roll.

The roll was called, and the following Senators answered to their names:

Ball	Hale	McCumber	Shortridge
Borah	Harris	McKinley	Simmons
Brandegee	Harrison	McLean	Smith
Bursum	Hitchcock	McNary	Smoot
Calder	Jones, N. Mex.	New	Spencer
Capper	Jones, Wash.	Newberry	Sterling
Cummins	Kellogg	Nicholson	Sutherland
Curtis	Kendrick	Norris	Townsend
Dial	Keyes	Oddie	Wadsworth
Edge	King	Page	Walsh, Mont.
Ernst	Ladd	Poindexter	Warren
France	La Follette	Rawson	Watson, Ind.
Frelinghuysen	Lenroot	Robinson	Williams
Gooding	Lodge	Sheppard	Willis

The PRESIDING OFFICER. Fifty-six Senators having answered to their names, a quorum is present. The question is on agreeing to the amendment offered by the Senator from New Mexico to the committee amendment.

Mr. JONES of New Mexico. Let the amendment to the amendment be stated.

The PRESIDING OFFICER. The Secretary will state the amendment to the amendment.

The PRINCIPAL LEGISLATIVE CLERK. On page 40, line 24, the Senator from New Mexico moves to strike out "70" in the committee amendment and to insert in lieu thereof "45," so as to read:

> Illuminating articles of every description, including chimneys, globes, shades, and prisms, incandescent electric light bulbs, with or without filaments, for use in connection with artificial illumination, all of the foregoing, finished or unfinished, composed wholly or in chief value of glass or paste, or a combination of glass and paste, 45 per cent ad valorem.

Mr. JONES of New Mexico. Mr. President, I will modify my amendment to the amendment. At the present time some of the articles, for instance, electric-light bulbs, are dutiable at 30 per cent under existing law, while other articles, such as lamp chimneys, globes, and that sort of thing, are dutiable at 45 per cent. If we are going to keep all those different items together in this paragraph, I am inclined to believe that my amendment should be 40 per cent rather than 45 per cent; at any rate, I will first make the amendment for the bracket at 40 per cent instead of 70. Therefore I ask leave to change my amendment so that it will read 40 per cent instead of 45.

The PRESIDING OFFICER. The Senator has a right to do that.

Mr. JONES of New Mexico. And upon that I ask for the yeas and nays.

The yeas and nays were ordered, and the principal legislative clerk proceeded to call the roll.

Mr. EDGE (when his name was called). Making the same announcement as to the transfer of my pair as before, I vote "nay."

Mr. FRELINGHUYSEN (when his name was called). Making the same announcement as before, I vote "nay."

Mr. HALE (when his name was called). Making the same announcement as before, I vote "nay."

Mr. HARRISON (when his name was called). I transfer my pair with the Senator from West Virginia [Mr. ELKINS] to the Senator from Alabama [Mr. HEFLIN] and vote "yea."

The PRESIDING OFFICER (when the name of Mr. JONES of Washington was called). Making the same announcement as to my pair as on a previous vote, I withhold my vote.

Mr. KENDRICK (when his name was called). I transfer my pair with the Senator from Illinois [Mr. MCCORMICK] to the Senator from Louisiana [Mr. RANSDELL] and vote "yea."

Mr. LODGE (when his name was called). I transfer my pair with the senior Senator from Alabama [Mr. UNDERWOOD] to the senior Senator from Pennsylvania [Mr. CROW] and vote "nay."

Mr. NEW (when his name was called). I transfer my pair with the junior Senator from Tennessee [Mr. MCKELLAR] to the senior Senator from Minnesota [Mr. NELSON] and vote "nay."

Mr. WARREN (when his name was called). Making the same announcement that I made earlier in the day as to the transfer of my pair, I vote "nay."

Mr. WILLIS (when his name was called). I am paired with my colleague, the senior Senator from Ohio [Mr. POMERENE]. I am unable to obtain a transfer, and therefore I am obliged to withhold my vote.

Mr. BALL. I transfer my pair with the senior Senator from Florida [Mr. FLETCHER] to the senior Senator from California [Mr. JOHNSON] and vote "nay."

Mr. ERNST. I transfer my general pair with the senior Senator from Kentucky [Mr. STANLEY] to the junior Senator from Oregon [Mr. STANFIELD] and vote "nay."

Mr. DIAL. I transfer my pair with the senior Senator from Colorado [Mr. PHIPPS] to the senior Senator from Texas [Mr. CULBERSON] and vote "yea."

Mr. CURTIS. I desire to announce the following pairs:

The Senator from Rhode Island [Mr. COLT] with the Senator from Florida [Mr. TRAMMELL];

The Senator from Arizona [Mr. CAMERON] with the Senator from Georgia [Mr. WATSON]; and

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Virginia [Mr. GLASS].

The result was announced—years 27, nays 29, not voting 40, as follows:

YEAS—27.

Borah	Hitchcock	Lenroot	Simmons
Capper	Jones, N. Mex.	McNary	Smith
Caraway	Kellogg	Norbeck	Sterling
Cummins	Kendrick	Norris	Townsend
Dial	King	Rawson	Walsh, Mont.
Harris	Ladd	Robinson	Williams
Harrison	La Follette	Sheppard	

NAYS—29.

Ball	France	New	Spencer
Brandegee	Frelinghuysen	Newberry	Sutherland
Bursum	Gooding	Nicholson	Wadsworth
Calder	Hale	Oddie	Warren
Curtis	Lodge	Page	Watson, Ind.
du Pont	McCumber	Poindexter	
Edge	McKinley	Shortridge	
Ernst	McLean	Smoot	

NOT VOTING—40.

Ashurst	Gerry	Myers	Shields
Broussard	Glass	Nelson	Stanfield
Cameron	Harreld	Overman	Stanley
Colt	Heflin	Owen	Swanson
Crow	Johnson	Pepper	Trammell
Culberson	Jones, Wash.	Phipps	Underwood
Dillingham	Keyes	Pittman	Walsh, Mass.
Elkins	McCormick	Pomerene	Watson, Ga.
Fernald	McKellar	Ransdell	Weller
Fletcher	Moses	Reed	Willis

So the amendment of Mr. JONES of New Mexico to the committee amendment was rejected.

Mr. JONES of New Mexico. I move, at the same place in the committee amendment, to strike out "70" and insert in lieu thereof "45." That is the highest duty at present on any of the items in that bracket.

The PRESIDING OFFICER. The Senator from New Mexico proposes an amendment to the committee amendment, which the Secretary will state.

The READING CLERK. On page 40, line 24, strike out "70" and insert in lieu thereof "45."

Mr. JONES of New Mexico. Mr. President, I do not care to discuss this item further, but I will say just a word of explanation to some Senators who were not here when this matter was being discussed.

The committee has stricken out paragraph 229, which dealt with incandescent electric-light bulbs and lamps, with or without filaments, and there the House put a duty of 35 per cent. The whole of paragraph 229 has been stricken out, and electric-light bulbs have been put in here.

It has developed in the course of the discussion, I believe, that at least 95 per cent of these bulbs are made by one concern which is harassing the two or three other concerns now making a few of the bulbs. It does not clearly appear as to how those bulbs are made, but my judgment is, from the circumstances of the case, that they must be made by machinery. They have been put in this bracket with lamp chimneys, lantern globes, and things of that sort, which are manufactured, I think, largely by human labor, by mouth blowing. In my judgment they should not have been put in here at all.

There are no importations of any consequence. The whole industry was gone into carefully in a letter written by Mr. Untermyer addressed to the senior Senator from Wisconsin [Mr. LA FOLLETTE], and which was put in the RECORD on May 25. According to all of the testimony it is not only a monopoly but an oppressive monopoly, one which has forced out of business a number of concerns, either by buying them out or making some other arrangement. The statement is made that it is harassing the few remaining concerns producing the 3 per cent.

There are no importations of any consequence. The production is over 20,000,000 a month, and less than $21,000 worth of those bulbs are being imported into the United States. We do not know just what kind of bulbs they are, but in all probability they are some novelty in the line, because it is impossible to think of competition in the ordinary white glass bulb. They must be novelties in design, decorated, or something of that sort, or peculiarly ground bulbs, but clearly there is no competition now.

The Tariff Commission reports that the industry is in a flourishing condition under existing circumstances and that its condition is healthy. I do not believe that any excuse has been offered for the increase in duty. No explanation has been given why the separate paragraph in which it was previously found has been stricken out and the article put in here with some special articles produced by human labor. Some one must have exercised Machiavellian skill in framing this paragraph. It is a new paragraph entirely. It is a rewriting of the paragraph as it came over from the House. They have taken out paragraph 229 altogether and combined it with this paragraph. Of course, I do not know, because I was not present at the writing of the paragraph, but it looks to me very much as if there had been a very deft hand at work in the framing of the new paragraph.

Mr. SMOOT rose.

Mr. JONES of New Mexico. I do not apply that to any member of the Finance Committee.

Mr. SMOOT. I will say to the Senator that the reason why it was rewritten was for administrative purposes. It was rewritten by the department. The department, however, did not put in bulbs, but the balance of the paragraph was rewritten by the department.

Mr. JONES of New Mexico. I have reference to the transfer of bulbs from paragraph 229 to this paragraph.

Mr. ROBINSON. May I ask the Senator from Utah why the bulbs were transferred in that way?

Mr. SMOOT. The rates were changed and the bulbs were transferred here because they come under this paragraph, anyhow, ordinarily. They are glassware. That is not the reason why they were transferred from paragraph 229 to this paragraph. I have already stated that that was done on the testimony of Mr. Clarke, the representative of the labor union.

Mr. DIAL. Mr. President, may I ask the Senator from New Mexico if the manufacturers asked for this protection?

Mr. JONES of New Mexico. I do not know. The Senator from Utah just stated that it was done upon the testimony of the representative of one of the organized unions. I remember that Mr. Clarke appeared before the committee, representing union labor in these industries. I recall that he did particularly refer to glass bulbs, but there was no discussion at the time as to whether the bulbs were produced by machinery or not. We are in the dark, or at any rate I am. I simply make the suggestion about their being produced by machinery upon this statement in the summary of the Tariff Commission:

> The bulbs are blown into iron molds coated with carbonaceous paste. A high polish is effected by rotating the blank in the mold during the blowing. Mechanical processes simulating the hand method of blowing have been devised.

Mr. DIAL. I was trying to ascertain whether or not the manufacturers are satisfied with the present tariff or whether the manufacturers themselves have asked for the increase.

Mr. JONES of New Mexico. So far as I know, none of the manufacturers appeared and asked for this increase in duty.

Mr. DIAL. Then, we are giving more than they want?

Mr. JONES of New Mexico. Whether Mr. Clarke represented some of the independent concerns producing the 3 per cent of these bulbs, and they were producing them by mouth blowing, I do not know. There was not anything stated upon that subject. I remember very well when Mr. Clarke appeared before the committee. I remember very well his statement about the difference in the cost of labor in this country and in Germany. So far as equalizing any cost of labor at the figures which Mr. Clarke presented to us, of course, it could not be done at all. We either had to ignore that cost or assume that labor of that value was not being used in the production of bulbs. I do not see how we can justify increasing the present rate.

Bear in mind that the present rate upon these bulbs is 30 per cent. The amendment proposed by the committee would increase that to 70 per cent. That is considerably more than 100 per cent increase. The importations at the present time are merely nominal. I am quite sure that they consist solely of novelties of one kind or another.

Mr. HITCHCOCK. Mr. President——

Mr. JONES of New Mexico. I yield to the Senator from Nebraska.

Mr. HITCHCOCK. If the Senate Committee on Finance were guided by that fairy tale about labor on these articles being ten times as high in the United States as in Germany, it is no wonder they have increased the rate to this extent. If that is the sort of testimony the Senate Finance Committee has been listening to, it is no wonder they have brought in these preposterous schedules. Between making a schedule based on such fairy tales as that and making a schedule based on prophesies of what may happen two or three years from now, it is no wonder we are confronted with these prodigious increases in the rates. There is really nothing to be surprised at. The only surprise is that instead of making this rate 70 per cent, they did not make it 600 or 700 per cent or even a thousand per cent.

Mr. JONES of New Mexico. The witness, Mr. Clarke, stated that the price of labor in this country was ten times that in the foreign countries, and for the whole glass industry he said he could safely say it was eight times as much. Discussing in committee particularly the cost of labor in the production of these bulbs, he declined to state that the labor in this country was ten times as high as that in Germany for the whole glass industry, but he said he could safely make it 8 to 1 for the whole glass industry.

Mr. ROBINSON. Mr. President, will the Senator from New Mexico yield to me to make a brief statement?

Mr. JONES of New Mexico. Certainly.

Mr. ROBINSON. It is almost impossible to make a reliable comparison between the cost of labor in Germany and the cost of labor in the United States entering into this product. Everyone knows the German mark is greatly depreciated and has been for a long period. The German mark, for instance, during September of last year was worth about 1 cent. Since that time it has gone much lower.

Mr. JONES of New Mexico. For nearly six months it has been about 3 marks for 1 cent.

Mr. ROBINSON. Yes. The statement by Mr. Clarke does not take into account fully the difference in the value of German money and American money, nor does it take into account, what is more important in this connection, the difference in the cost of living.

I make the statement, based upon information obtained personally during last summer, information that I believe to be reliable, and I think perhaps the Senator from Montana [Mr. WALSH] will confirm the statement, that German labor now is paid relatively more than it was prior to the war. The depreciation of the German mark has undoubtedly resulted in a decline in values of everything that Germany produces, when stated in German money. That is true of labor. But the German laborer is receiving better compensation now, compared with other classes of citizens, and was during last summer, than he received prior to the war. Persons who are employed on salaries, like clerks and, for instance, many government employees, are suffering by reason of the depreciation of the mark more than the German laborer is suffering.

A year ago the cost of living in Germany was approximately one-fifth what it cost to live in the United States. I state that from personal experience.

Mr. DIAL. Mr. President——

Mr. ROBINSON. If the Senator will let me pursue this question a little further, I will then yield to him.

For instance, the price of a first-class room, a large room with bath, in the Adlon Hotel in Berlin during September and October of last year was 145 marks, or $1.45 in American money. That hotel is comparable to the Willard Hotel in the city of Washington and other hotels of the same class.

Mr. DIAL. The Senator from Arkansas is referring to the price per day of the room?

Mr. ROBINSON. I am referring to the price per day. The charge for a similar room in the Atlantic Hotel, in the city of Hamburg—and the Atlantic Hotel is the principal hotel there—a large room without a bath was 90 marks, which was the equivalent of 90 cents a day. The same room in a first-class Washington hotel would cost between $5 and $7.50 per day. A room in a Washington hotel of the same class as the room I have referred to in the Adlon Hotel, which cost last summer 145 marks, the equivalent of $1.45 then, would cost from $8 to $12.50 per day in the United States. Not only is the relative cost of living in Germany and the United States as I have stated it true of hotel rooms and similar accommodations, but it is also true of meals served a la carte; and it is likewise true of nearly all other commodities of common use and consumption.

So, after all, even though the value of the German day wage is much less than the value of the American day wage, stated in American money, its purchasing power in Germany is not much less than the purchasing value of the day wage of the American laborer. Therein lies the fallacy in the conclusions drawn from the testimony of Mr. Clarke. If German laborers received approximately what American laborers receive when stated in American money, and then purchased the commodities that they consume in their daily life at one-fifth or one-sixth of what American laborers pay, it can readily be seen what an advantage the German laborer would have over the American laborer. German labor has never been paid as much as American labor. It is a mental impossibility, therefore, to state with any degree of accuracy what the equivalent of the German wage is in American wages. Now I yield to the Senator from South Carolina.

Mr. DIAL. The discussion has been very interesting. The Senator from Arkansas has answered a part of the question which I intended to ask, to wit, The mark must buy a good deal or else the Germans must not eat much?

Mr. ROBINSON. Mr. President, I saw men working in large department stores in the city of Berlin who are receiving approximately the same number of marks which they were paid when the mark was at its normal value. I recollect a visit with some other Senators to a famous cutlery store in the city of Berlin, one of the largest in the world. I saw there men of apparently superior intelligence who stated that they were eating but two meals a day and were not adequately supplied with food for those two meals. There was quite general complaint that the laborer had the best of it, in that he had been able to force an increase in his wages, whereas salaried persons and persons who were working for stated sums, who did not belong to the labor organizations in Germany, were working approximately for the same number of marks that they received before the war. German labor is decreasing in efficiency because of the decline in standards of living.

I make that statement to reinforce the first proposition I asserted when I arose, that it is difficult if not impossible accurately to compare the value of the German wage with the American wage, and accurately to state the relative purchasing power of the two; but if the Finance Committee proposes to place a tariff on electric light bulbs on the basis of a wage scale that will enable the German laborer to receive in American money approximately the equivalent of what the American laborer receives, it would be true that they would have to impose a tariff of several hundred per cent. I think that is all I desire to say on that subject.

Mr. McCUMBER. Mr. President, the Senator from Nebraska [Mr. HITCHCOCK] a short time ago ridiculed the idea that the wages in the United States were ten times as high as wages in Germany. I am very glad to have the Senator from Arkansas reinforce the statements of witnesses and members of the committee that that is about the ratio.

Mr. ROBINSON. Mr. President, I do not want the Senator from North Dakota to understand me to say that the German laborer is paid only one-tenth of the amount that the American laborer is paid, or approximately that. What I actually said, or what I intended to say, was that unquestionably the American laborer is paid much more than the German laborer—several times more—but it is a mental impossibility for me to

work out the difference between the purchasing power of the German wage and the purchasing power of the American wage. In my judgment, however, when those two elements are taken into consideration the respective wages are not so different as would at first appear.

Mr. McCUMBER. Admitting that, Mr. President, we are not concerned as much as to what the German with his wage can purchase in Germany; what we are interested in is the wage the German receives in making the goods that are imported into the United States and what the American laborer is paid for producing the same kind of goods. That is the real crux of the situation.

Mr. ROBINSON. Will my friend yield for a question?

Mr. McCUMBER. Certainly.

Mr. ROBINSON. Does the Senator from North Dakota think that the American laborer producing this product is underpaid now?

Mr. McCUMBER. Oh, no; I think he is highly paid.

Mr. ROBINSON. Does the Senator expect if the proposed tariff rate of 70 per cent is provided that his wages will be increased?

Mr. McCUMBER. In the United States?

Mr. ROBINSON. Yes.

Mr. McCUMBER. I do not; on the contrary I think all wages in the United States ultimately will go down. I have stated that several times. Furthermore, I think that German wages will go up. I can not believe, no matter how hard the German Government may try to retrench along other lines, that they can let their laborers live on one-tenth or one-fifth or one-third of what they had before the war. I believe that any such effort will fail in the end and that wages for German labor are bound to increase.

Mr. ROBINSON. Mr. President, no such thing is happening in Germany now. I tried to make that clear. Perhaps I am unfortunate in expressing myself or incapable of making my meaning clear——

Mr. McCUMBER. Wages are going up in Germany, I think.

Mr. ROBINSON. I understand that; but the fact is, when the price that the laborer is now paying for the things which he consumes is compared with the value of the wage which he is receiving, he is better off than a large number of other classes of German citizens, and he is receiving in many instances more than he received before the war.

Mr. McCUMBER. I am willing to concede that the wages of labor have increased in Germany away out of proportion to wages of the average salaried individual. That is also true in the United States. In 1920 many a college professor could well have resigned and become a janitor, for then he would have received better pay. What I say in this respect applies to many salaried individuals in the United States. But, Mr. President, that does not meet the question. The Senator says that the salaried man in Germany is not receiving any more in the depreciated mark than he received before the war, and, admitting that the mark is now worth 1 cent instead of 24 cents, he is only receiving, measured by the gold standard, one twenty-fourth as much money as he received in 1914. But remember that the goods that are produced, not by salaried men but by the German laborer, must come in competition with goods produced here; and the point that I rose to suggest was that the Senator from Arkansas has reinforced the statement which had been made here that the German wage is immeasurably below that of the American wage.

Now, let me call the Senator's attention to another fact: In 1921 the Tariff Commission sent one of their very best experts over to Europe for the purpose of making a comparison of the labor wage of the German with the labor wage of the American. He reported that in the skilled-labor class, measured by American dollars, the average wage of the German was from 8 to 9 cents per hour. The average American wage was about from $8 to $10 per day. There is quite a difference between the two. In other words, the German wage was from 80 to 90 cents a day and the American wage of the same skilled labor was from $8 to $9 a day. So the American wage was exactly ten times the German wage. There is no use of Senators sneering at facts. That is the report of the Tariff Commission based on the conclusions of an expert who was sent over there in 1921 to investigate conditions. While I think the American wage has gone down 15 to 20 per cent since then, and I think within the last two or three months the German wage has gone up, I should say to-day that the American wage is at least six times the amount of the German wage.

Mr. ROBINSON. Now will the Senator yield?

Mr. McCUMBER. Certainly.

Mr. ROBINSON. The Senator has said that he expects the German wage to continue to go up.

Mr. McCUMBER. Certainly higher than it is now.

Mr. ROBINSON. And he expects the American wage to go down?

Mr. McCUMBER. Yes; somewhat.

Mr. ROBINSON. Under existing conditions, with a tariff of 45 per cent, the importations are small. We have no overflow supply being imported.

Mr. McCUMBER. There is no overflow supply to be imported as it is now, either.

Mr. ROBINSON. What is the necessity for increasing the tariff if under present conditions importations are small and the admitted disparity between German wages and American wages is constantly diminishing—that is, the German wage is constantly going up and the American wage constantly going down?

Mr. McCUMBER. Mr. President, suppose that every bushel of wheat in Canada had been sold, and we were to put a tariff upon wheat. It would not answer to say, "Why, they are not importing any." They can not import any until the next crop is raised. If the Germans have sold their entire surplus—and the records show that not 4 per cent of their product came to the United States—they will have to take some time to accumulate a surplus in order to bring it here, will they not? I assume that they can increase their product to almost any extent they desire as soon as they get really established.

Mr. ROBINSON. If the Germans have sold their product elsewhere than in the United States, it was probably because they found a more profitable sale elsewhere than in the United States under existing tariffs. Is not that true? The Germans have been doing business in the United States since the war, and the presumption is that if we afforded the most profitable market, they would have sold to us rather than to some one else. Now, in that connection, does the Senator say that the failure of Germany to export to the United States electric bulbs is due to the fact that her entire output, or practically her entire output, has been consumed elsewhere?

Mr. McCUMBER. Yes. There has been an exceedingly big demand in the last year or two for electric-light bulbs and everything in that line throughout the other countries. That is the report of the Tariff Commission; and, remember, with all of Germany's output—and it was heavy—we took only about 4 per cent, which is a very small part. But when once you admit, as you must admit, that the wages here are from five to six times as great as those in Germany, and that the wage element is about 50 per cent of the cost of the product, and then you remember that before the war our wages were only about twice as much instead of being five or six times as much, it must necessarily follow that if we allow the old rate of tariff to prevail the time is not far distant when they can drive our product out of the market.

Mr. ROBINSON. Mr. President, when you remember, as I have repeatedly tried to say in another form, that in Germany the German laborers are paid in marks, and that German marks have a purchasing power there out of proportion to and in excess of their value in American money, you will see that with German wages constantly going up and American wages constantly going down, and with importations now very small, there can be but little necessity for an increase in the tariff.

Mr. McCUMBER. Of course the Senator understands that we have not attempted to make a tariff that will measure the difference between what might be fairly said to be the present cost of production in Germany and that in the United States.

Mr. ROBINSON. Yes.

Mr. McCUMBER. We have made the tariff only a small percentage of the real difference to-day; but I believe——

Mr. ROBINSON. If the Senator will pardon an interruption, therein, I think, lies an inconsistency in the position which the committee occupies. It is claimed that in order to protect the American industry against the cheap labor of Germany it is necessary to levy a tariff of 1,000 per cent.

Mr. McCUMBER. Yes; but no one claims it.

Mr. ROBINSON. Now, if that be true, or approximately that, I want to ask the Senator how he expects to protect American industry by simply levying a tariff of 70 per cent?

Mr. McCUMBER. No one has claimed that, Mr. President.

Mr. ROBINSON. The object of your tariff is protective; is it not?

Mr. McCUMBER. Yes.

Mr. ROBINSON. It is not intended as a revenue tariff?

Mr. McCUMBER. But does the Senator think for a moment that just the labor element, even though it be 10 times as great here, means that you have to have 1,000 per cent tariff in order to meet the difference?

Mr. ROBINSON. No. The Senator has stated that the labor cost is 50 per cent. That would make 500 per cent tariff neces-

sary under the protective theory; but I am not particular about the exact figures. The point I am trying to make clear to the Senator is that from my viewpoint there is an inconsistency in levying a tariff of 70 per cent when a protective tariff would require a rate of 500 per cent; that you accomplish nothing except to enable the home manufacturer to put up his price.

Mr. McCUMBER. No, Mr. President; I do not think we can escape the proposition that even though the price of labor, instead of being 10 to 1, should drop down to being 3 to 1, still the German could produce and sell in reasonable competition. I do not say that he would take away our own manufacture entirely, but I do say that we would have to have a good protection, even if the ratio was only 3 to 1.

There is nothing about the American laborer that makes him so greatly superior to the German laborer. If Hans Heideman labors 10 hours a day in a mill in Germany, he does not, when he comes to the United States, change his nature. He is the same industrious individual when he comes to the United States that he was when he left Germany. He is not a bit more skillful than he was when he was in Germany. He is exactly the same individual, and if you give him the same machinery in Germany that he has in the United States he will make just as good use of it. I hear so much about the superiority of the American workman, as if Ole Olesen when he was in Norway could not produce more than one-third as much work as he could produce when he landed upon American soil. He is the same Ole Olesen, and he has not changed in character or industry or anything else. Let us get away from that feature of it.

Mr. ROBINSON. Will the Senator yield?

The PRESIDING OFFICER (Mr. SPENCER in the chair). Does the Senator from North Dakota yield to the Senator from Arkansas?

Mr. McCUMBER. I yield, Mr. President, to my good-natured friend.

Mr. ROBINSON. If anything I have said warrants this outburst of fine sarcasm on the part of my friend from North Dakota, I am totally unconscious of it. There is, however, a suggestion that I want to make to the Senator from North Dakota. He has referred to the efficiency of German labor. All classes of German labor, in my judgment, from observation and reading, are efficient. They work full time. They work skillfully.

I am not so sure, if it amounts to anything in this controversy, that a German laborer in the United States would manifest the same industry and energy and devotion to his duty that he manifests in his home land. I have never seen anything more amazing than the application of the German laborer to his toil. I do not speak now particularly of skilled labor; but when I was in Germany last summer, almost every man that I saw was going about his labor disheartened, it is true, half discouraged and undernourished, but he was working full time, working hard, and working efficiently. Nowhere else in the world, in my judgment, is more efficient labor to be found than in Germany, even now, although it is much less efficient now than formerly; but how are you going to protect this helpless American industry by levying any rate of tariff adequate in the mind and conscience of the Finance Committee? To justify a tariff of 70 per cent they argue that a tariff of 500 per cent is necessary. If you will study the history of the manufacture of electric-light bulbs in the United States during the last few years, you will find that it has prospered beyond the power of the mind to grasp; and I am not afraid that with a tariff of 45 per cent on its products the General Electric Co. will be driven out of business.

Mr. McCUMBER. Mr. President, I do not know that there is any necessity of carrying this discussion on any further; but I want to call the Senator's attention to a fact, just a simple little fact, that still stares us in the face, and we can not very well avoid it.

Under the Payne-Aldrich law in 1909 we had a duty of 60 per cent on these things. With a duty of 60 per cent, and when wages in the United States were about twice what they were in Germany, there were imported into the United States from two to four million dollars' worth of this product annually. If the Germans could import into this country from two to four million dollars' worth annually of blown glassware, with a duty of 60 per cent, when their wages were at least half those of the American wage earner engaged in the same class of work, then if we add 10 per cent more to that and make it 70 per cent when the American wage is to 5 to 6 to 10 times as much as the German wage, can not the German product still come in, and come in in large quantities?

Mr. ROBINSON. Yes; and if it is true that an exorbitant price and an excessive profit is now being charged for this commodity in America there is no reason why competition should be shut off and the public deprived of the benefit of it. The Lockwood committee made an investigation of this subject and made an extensive report.

Mr. McCUMBER. Mr. President, I think both the Senator and I have spoken several times upon this amendment.

Mr. ROBINSON. Yes; but, if the Senator will permit me, I will conclude in a single paragraph what I desire to say.

The Lockwood committee found that "the prices at which lamps are sold still appear to allow a margin of from 150 per cent to 300 per cent between the manufacturing cost and the price paid by the consumers. About 70 per cent of this profit is absorbed by methods in the distribution of lamps to which the company insists on clinging in order to throttle competition between the jobbers and retailers to whom it sells these lamps under the pretext of consignment contracts accompanied by limitations on the resale prices, which it fixes, we believe, in violation of the terms of the decree, to which reference has been made."

I have not personally investigated the accuracy of that finding. It was made by a legislative committee of the State of New York, which went into the subject very fully. At the time of the report the margin of profit of this business ranged from 150 to 300 per cent, and I submit, in view of those circumstances and other facts developed during the course of the investigation, that the General Electric Co. is not in immediate danger of having its business destroyed.

Mr. McCUMBER. In conclusion, let me say that if I considered that any tariff bill was enacted for the purpose of destroying every company we thought had grown too large, or if it was to be used for the purpose of destroying companies which had made combinations with other companies, or had committed some offense, of course that would be one thing; but inasmuch as I have not regarded that as the real reason for levying a tariff, but rather regarded it as an attempt to measure, as nearly as we can, the difference between what the article could be produced for in the foreign country and what it could be produced for in this country with reasonable wages, it has not occurred to me that I should take into consideration the Lockwood report or any other report of the wickedness of any of these great corporations, but rather the simple question, in the end, whether we would be able to compete, not to-day, not necessarily to-morrow, but two or three or four years from now, with a country whose labor wages are about from one-fifth to one-tenth of the labor wages here in the United States.

Mr. ROBINSON. I am making no attack upon the General Electric Co. I have not gone into the question in detail of the manner in which that company does business, and I do not desire to do so, but under a tariff which provides 45 per cent ad valorem there is a finding of the Lockwood committee that a profit on lamps ranging between 150 and 300 per cent is being realized, and I cited that finding of fact to the Senator from North Dakota as proof that no additional tariff is required.

Mr. McCUMBER. That does not agree with the testimony we have here as to the difference between the cost of production at home and abroad, and that is really what we have to go on in fixing a tariff duty.

Mr. WALSH of Montana. Mr. President, in the debate on this particular paragraph the prominence given to the alleged low cost of labor in Germany moved me to put into the record a short time ago a brief article from the journal issued by our own Department of Commerce, a publication, I think, originating with the present administration. It is a weekly bulletin for the information of our people interested in foreign commerce. It tells us that the manufacturers of American structural iron were able successfully to compete with German and Belgian firms for large contracts in the Argentine Republic, notwithstanding the higher rate of wages in this country and a higher grade of labor in this country, because machinery was used in this country and effectively used, which was not employed beyond the seas.

The Senator from Utah [Mr. SMOOT] endeavored to break the force of that statement thus put out by the Department of Commerce by saying that there is no such quantity of labor employed in the manufacture of structural steel as there is in the manufacture of the commodities now under consideration. Whatever truth there may be in that, and doubtless it is true, it is a matter of no consequence, because the comparison must be between the labor used in the production of structural steel in Germany and the labor employed in the production of structural steel in this country, and notwithstanding the fact that labor in that industry cost less in Germany, we are still able to compete in the markets of the world.

But that fact does not deter the framers of this bill from imposing a duty of from 30 to 40 per cent on structural steel,

as will be found by reference to paragraph 313 of the bill. Of course, there is nothing peculiar about that. We are producing this commodity of enormous value in this country, selling it in competition with the world in the markets of the world, and yet a tariff wall is put up so as to enable the manufacturers of structural steel in this country to charge consumers here 30 to 40 per cent more than they could buy it for from the foreign manufacturer.

As the discussion has been renewed, I embrace the opportunity to put in another article from the same source, found in the last issue of the Commerce Reports which has just come to hand, the issue of May 29, 1922. From it I read as follows:

German industrial production and general business are stagnant. Labor costs are rising, larger proportions of raw materials must be imported, and the production of fuel is decreasing slightly. The productivity of German labor is less by 20 or 25 per cent than before the war, on account of the lowering of the standard of living.

The Senator from Arkansas has just told us about representative Germans living upon two meals a day, and that they have been doing so for several years past, as I can attest myself. I repeat:

The productivity of German labor is less by 20 or 25 per cent than before the war, on account of the lowering of the standard of living.

All these and other factors have apparently brought present German production in general down to about 60 per cent of the pre-war standard. German industry, especially manufacture for export, has for some time been materially aided by the spread between the internal and the external value of the falling mark. This element is now becoming less active, through the decline in the internal value of the mark and the removal of several other factors which tended to keep down artificially production and labor costs, among which may be mentioned low rents, low public utility rates, artificially low rate of coal, and various food subsidies.

So, Mr. President, the contention that these rates are necessary simply because the rate of wages in Germany is less than the rate of wages in this country is altogether inconclusive to anybody who attends to the question even in a superficial way.

Reference has been made here to the export trade. The export trade obviously will be handicapped to a very high degree by this bill, not alone by reason of the high duties placed upon commodities entering into the composition of the articles of export but by reason of the fact that our market being closed to the producers abroad, naturally their markets are correspondingly closed to the exports of commodities from this country.

I invited attention the other day to the fact that although the State of Montana is protected by this bill upon hides and upon wool and one thing or another of that kind, 15 cents a bushel on corn and 30 cents a bushel on wheat, the fact about the matter is that these tariffs are of no benefit to us, generally speaking, and whatever benefit does accrue to us by reason of the duty on wool and some things of that kind is many times more than offset by the fact that the foreign markets for our exports is to a large extent closed.

I invited attention to the fact that copper, in the production of which my State stands second, is on the free list and has no protection at all. A duty upon copper would be useless, because we export 60 per cent of the production of this country. Notwithstanding what anyone may say about the matter, I insist that the duty upon wheat is absolutely of no value to us, when we export 250,000,000 bushels of that commodity every year.

It is not only as to the commodities to which I have referred that this bill, if it should become a law, will operate to restrict and paralyze our export trade, but it is, as I have pointed out, operative in exactly the same way in respect to a multitude of our manufactured products the surplus of which must go abroad for markets.

That is illustrated in some opinions which I find published in the magazine called Drug and Chemical Markets, printed for the information of those engaged in the drug and chemical trade. I read from the issue of April 26, 1922. Apparently the magazine sought expressions of opinion from various parties engaged in the production and manufacture of drugs and chemicals. I read as follows:

R. H. de Greeff, R. W. Greeff & Co., New York: Generally speaking, I do not consider the proposed tariff drawn on scientific lines as a tariff should be. The rates in many instances appear to me needlessly prohibitive, as after a recent survey of conditions in Europe I am of the opinion that the cost of production in all countries, including Germany, particularly on technical chemicals, has risen to such an extent that competition from Europe is likely to be much less active than before 1914. I am therefore inclined to believe that the effect of the proposed tariff will be to raise prices in this market considerably, in many cases to several times pre-war levels, and that the result as regards revenue will be very disappointing. Speaking from the exporter's point of view, in which I am principally interested, I am afraid that as chemicals are in many instances raw materials increased prices here will handicap us in export business in such materials as might still be shipped from here. I admit that adequate protection is justified on many pharmaceutical products and on dyestuffs.

I invite attention to this particularly, because the writer is evidently wedded to the theory of a protective tariff. He wants a protective tariff upon his commodities, but he insists that these high, these exorbitant, these unjustifiable rates are going to operate to the destruction of the export business of the United States and are therefore indefensible.

I invite particular attention to what he says concerning Germany:

I am of the opinion that the cost of production in all countries, including Germany, particularly on technical chemicals, has risen to such an extent that competition from Europe is likely to be much less active than before 1914.

It is quite likely, indeed I think we can not resist the conclusion, that the same conditions will operate to make competition in electrical bulbs less formidable hereafter than it was prior to 1914, and therefore there is no reason for an increase in the present rate upon that particular commodity.

Another gentleman interested in the drug and chemical business gave his views as follows:

C. P. Gulick, National Oil Products Co., Harrison, N. J.: It is our opinion that the schedules proposed on imported fats, oils, and waxes, such as are noncompetitive with domestic goods of the same character, are somewhat high and that the result will be that these important raw materials will be diverted to European consumers to the detriment of American concerns. Such a result would be inevitably followed by a serious falling off of American export business. The time is rapidly approaching, if not already here, when the United States must be considered a first-class producing country and be allowed access to the world's raw materials in the freest possible exchange in order to be in a competitive position with world producers and manufacturers, as we are now confronted with the necessity of disposing of our exportable surplus of manufactured goods. Our industries can not thrive upon a basis of domestic consumption, and therefore, unless we are placed squarely upon a basis that will enable us to compete for world markets, our industries have already reached their limit of expansion.

Another gentleman, Paul G. Kayser, of the Meteor Products Co., of New York, said:

While we appreciate the necessity of protecting the chemical industry in this country, we feel that the proposed rates on many of the products are ridiculous and simply act as a barrier to further importations. If the gentlemen in Washington wish to build a wall around the United States and prohibit importations of chemical products, competition, which creates efficiency, will be entirely eliminated. When once competition is eliminated, we seriously doubt that prices will decline. If our tariff-making bodies were composed of business men who understood the needs of each particular industry instead of politicians who were being directed to protect the interests of large finance, our tariff problems would be much more satisfactorily solved.

I repeat that I put these statements in the record because they emanate from gentlemen who are wedded to the principle of protection. I submit them in connection with a statement made by me a few evenings ago in the colloquy with my distinguished neighbor, the Senator from Idaho [Mr. GOODING], who thinks that the issue here is the life or death of the protection principle. I submit that issue is not here at all. This is a protection measure. It must be discussed upon that basis. The question is, discussing it upon that basis, are the rates which are fixed by the bill defensible at all?

The PRESIDING OFFICER. The question is upon the amendment offered by the Senator from New Mexico [Mr. JONES] to the amendment of the committee.

Mr. WALSH of Montana. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The absence of a quorum is suggested. The Secretary will call the roll.

The Assistant Secretary called the roll, and the following Senators answered to their names:

Ashurst	Harrison	McNary	Smoot
Ball	Hitchcock	Myers	Spencer
Borah	Johnson	Newberry	Sterling
Brandegee	Jones, N. Mex.	Nicholson	Sutherland
Calder	Jones, Wash.	Norbeck	Townsend
Capper	Kellogg	Norris	Underwood
Cummins	Kendrick	Oddie	Wadsworth
Curtis	Keyes	Page	Walsh, Mass.
Dial	King	Pittman	Walsh, Mont.
du Pont	Ladd	Ransdell	Warren
Edge	La Follette	Rawson	Watson, Ga.
Ernst	Lenroot	Robinson	Watson, Ind.
France	Lodge	Sheppard	Willis
Frelinghuysen	McCumber	Shortridge	
Hale	McKinley	Simmons	
Harris	McLean	Smith	

The PRESIDING OFFICER. Sixty-one Senators having answered to their names, a quorum is present. The question is upon the amendment offered by the Senator from New Mexico [Mr. JONES] to the amendment of the committee.

Mr. JONES of New Mexico. I ask for the yeas and nays.

The yeas and nays were ordered, and the Assistant Secretary proceeded to call the roll.

Mr. DIAL (when his name was called). Making the same announcement as on the former vote as to my pair and transfer, I vote "yea."

Mr. EDGE (when his name was called). Making the same announcement as to the transfer of my pair, I vote "nay."

Mr. HALE (when his name was called). Making the same announcement as before, I vote "nay."

Mr. HARRISON (when his name was called). Making the same announcement as before, I vote "yea."

Mr. JONES of Washington (when his name was called). The senior Senator from Virginia [Mr. SWANSON] is necessarily absent. I am paired with him for the day. Therefore I withhold my vote.

Mr. KENDRICK (when his name was called). I have a general pair with the senior Senator from Illinois [Mr. MCCORMICK]. Being unable to secure a transfer, I am compelled to withhold my vote. If permitted to vote I would vote "yea."

Mr. MCKINLEY (when his name was called). I have a pair with the junior Senator from Arkansas [Mr. CARAWAY]. I transfer that pair to the junior Senator from Washington [Mr. POINDEXTER], and vote "nay."

Mr. NEW (when his name was called). Repeating the announcement made on the previous votes as to the transfer of my pair, I vote "nay."

Mr. WARREN (when his name was called). Making the same announcement as before with reference to my pair and its transfer, I vote "nay."

Mr. WATSON of Georgia (when his name was called). Transferring my general pair with the Senator from Arizona [Mr. CAMERON] to the Senator from Rhode Island [Mr. GERRY] I vote "yea."

Mr. WATSON of Indiana (when his name was called). Transferring my general pair with the senior Senator from Mississippi [Mr. WILLIAMS] to the Senator from New Hampshire [Mr. MOSES] I vote "nay."

Mr. WILLIS (when his name was called). I am paired with my colleague, the senior Senator from Ohio [Mr. POMERENE]. I am unable to obtain a transfer and therefore withhold my vote. If permitted to vote, I should vote "yea."

The roll call was concluded.

Mr. BALL. I have a general pair with the senior Senator from Florida [Mr. FLETCHER], who, I understand, has not voted.

The PRESIDING OFFICER. The senior Senator from Florida has not voted.

Mr. BALL. I transfer my pair with the Senator from Florida to the senior Senator from Pennsylvania [Mr. CROW] and vote "nay."

Mr. ERNST. I transfer my general pair with the senior Senator from Kentucky [Mr. STANLEY] to the junior Senator from Oregon [Mr. STANFIELD] and vote "nay."

Mr. SIMMONS. I wish to announce the unavoidable absence of my colleague [Mr. OVERMAN]. He is paired with the Senator from Wyoming [Mr. WARREN]. If present and permitted to vote, my colleague would vote "yea."

Mr. UNDERWOOD. The senior Senator from Ohio [Mr. POMERENE] is unavoidably absent from the city. I wish to announce that if he were present on this question he would vote "yea." As has been stated, he is paired with his colleague, the junior Senator from Ohio [Mr. WILLIS].

Mr. CURTIS. I am requested to announce the following pairs:

The Senator from Rhode Island [Mr. COLT] with the Senator from Florida [Mr. TRAMMELL]; and

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Virginia [Mr. GLASS].

The result was announced—yeas 31, nays 30, as follows:

YEAS—31.

Ashurst	Jones, N. Mex.	Myers	Smith
Borah	Kellogg	Newberry	Sterling
Capper	Keyes	Norbeck	Townsend
Cummins	King	Norris	Underwood
Dial	Ladd	Pittman	Walsh, Mass.
Harris	La Follette	Robinson	Walsh, Mont.
Harrison	Lenroot	Sheppard	Watson, Ga.
Hitchcock	McNary	Simmons	

NAYS—30.

Ball	Ernst	McLean	Smoot
Brandegee	France	New	Spencer
Broussard	Frelinghuysen	Nicholson	Sutherland
Bursum	Hale	Oddie	Wadsworth
Calder	Johnson	Page	Warren
Curtis	Lodge	Ransdell	Watson, Ind.
du Pont	McCumber	Rawson	
Edge	McKinley	Shortridge	

NOT VOTING—35.

Cameron	Gerry	Moses	Shields
Caraway	Glass	Nelson	Stanfield
Colt	Gooding	Overman	Stanley
Crow	Harreld	Owen	Swanson
Culberson	Heflin	Pepper	Trammell
Dillingham	Jones, Wash.	Phipps	Weller
Elkins	Kendrick	Poindexter	Williams
Fernald	McCormick	Pomerene	Willis
Fletcher	McKellar	Reed	

So the amendment of Mr. JONES of New Mexico to the committee amendment was agreed to.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment as amended.

Mr. JONES of New Mexico. Mr. President, following the bracket on which we have just voted is another bracket or series of items put together, which reads—

all glassware commercially known as plated or cased glass, composed of two or more layers of clear, opaque, colored, or semitranslucent glass, or combinations of the same, 70 per cent ad valorem.

The present duty on those items is 45 per cent. It is proposed by the committee to be increased to 70 per cent. I have been unable to find anything in the evidence bearing upon that particular kind of glassware. There may be some such evidence, but I have not found it. If some Senator has any evidence on the subject I think the Senate is entitled to have it.

Mr. McCUMBER. Mr. President, the plated or cased glass industry is a comparatively new industry in the United States. Part of the products are used in the illuminating industry, but the cased glass is also used in signal lights and various kinds of decorated tableware. It is manufactured by the fusing of a thin section of colored glass into a piece of clear glass. The operation is a most delicate one, calling for a considerable degree of skill on the part of the operator. A highly trained personnel was developed in this country during the war, and the committee placed the rate at 70 per cent ad valorem on these commodities in the hope that it might suffice to maintain the industry in the United States. Of course, I appreciate the fact that if the duty on the other article should be placed at 40 per cent, it may be that 70 per cent is too much of a differential between the two.

Mr. UNDERWOOD. Mr. President, I merely wish to say a word in reference to this item. Of course, as to a new industry that is growing up in this country it is difficult to obtain figures as to what it can do and what it has done. It is therefore most difficult to make a comparison. All through the framework of this bill, whenever it is necessary to increase a rate of duty and the figures are not satisfactory, we are told that the industry started during the war, and that now that the war is over it is likely to be put out of commission. Therefore, we are asked to vote for a much higher rate of duty.

That line of reasoning, Mr. President, does not seem to me to be sound. This is not a war industry. I can readily see that during a war a man may invest his money in the manufacture of powder or shells, either for patriotic purposes or with the hope of great profit, with the expectation of going out of business when the war is over. I can not see, however, how a man engaged in such an industry as the manufacture of this kind of ornamental glass, in no way connected with war preparations and which the demands of war can not develop, should build up his industry, knowing that the tariff rate that protected him from foreign competition amounted to 45 per cent and that the war would be over some day, and then that his industry must rely alone on the 45 per cent rate, could gamble his business on the expectation of having the rate increased to 70 per cent in order to save his business after the war was over; and especially when at the time that he went into the business during the war the party which had written the present law was in power in all branches of the Government.

Mr. President, the psychology of that argument may seem sound to some people, but it does not seem sound to me. It appears to me to be self-evident that a man who would employ his money in a new enterprise, knowing what the rate of tariff taxation was and was likely to continue to be, must have been satisfied that he could prosper under that tariff tax, and he did not take the extreme risk of putting his money into a business which, in order that it might survive foreign competition, would compel him to come to the Congress of the United States and ask that the rate be nearly doubled.

Mr. JONES of New Mexico. Mr. President, the only way in which we can get an opportunity even to vote for a lower rate is to offer an amendment at this time, because it is all a part of this general committee amendment. I therefore move to strike out, on page 41, line 4, the numerals "70" and insert "45."

The PRESIDING OFFICER. The question is upon the amendment offered by the Senator from New Mexico to the amendment of the committee.

The amendment to the amendment was rejected.

Mr. JONES of New Mexico. Mr. President, the next item is one of the most important in this whole paragraph. It includes—

table and kitchen articles and utensils, and all articles of every description not specially provided for, composed wholly or in chief value of glass or paste, or combinations of glass and paste, blown or partly blown in the mold or otherwise, or colored, cut, engraved, etched, frosted, gilded, ground (except such grinding as is necessary for fitting

stoppers or for purposes other than ornamentation), painted, printed in any manner, sand-blasted, silvered, stained, or decorated or ornamented in any manner, whether filled or unfilled, or whether their contents be dutiable or free, 65 per cent ad valorem.

The present rate on those items is 45 per cent. That includes all of the kitchen articles and tableware not specially provided for in other paragraphs. I have discussed at considerable length the industry and the competition in glassware, and I do not believe that the proposed rate of duty is justified.

I move, on page 41, line 14, to strike out the numerals "65" and to insert "45."

Mr. HARRISON. Mr. President, what did I understand the Senator from New Mexico to say was the rate on kitchen utensils and table articles?

Mr. JONES of New Mexico. The present rate is 45 per cent, and the committee propose to increase it to 65 per cent.

Mr. HARRISON. They propose to increase the rate 20 per cent on kitchen utensils?

Mr. JONES of New Mexico. It amounts to an increase of nearly 50 per cent. It is an increase from 45 per cent to 65 per cent.

Mr. HARRISON. And the Senator proposes to reduce it to the present rate?

Mr. JONES of New Mexico. I propose to reduce it to the present rate.

Mr. SMOOT. Mr. President, I simply want to say that this is principally champagne glasses and what is called stem-ware glassware. It is blown with a small stem, like a champagne glass, and the very finest glass that is made falls under this paragraph.

The Senator talks about kitchen articles and utensils. There is nothing in this paragraph outside of this specially made glass. I do not know of any greater luxury in the United States than falls under this very paragraph.

Mr. HARRISON. How does the Senator get champagne glasses in table and kitchen articles? The Senator may use champagne glasses out in Utah under the name of kitchen utensils, but I never before heard champagne glasses included in kitchen articles or utensils.

Mr. NORRIS. This was before the eighteenth amendment was adopted.

Mr. SMOOT. I am telling the Senator the kind of ware that falls under this paragraph. The wording was prepared by the Tariff Commission, and that is why we rewrote this paragraph. Of course, it is for the Senate to say whether they want to reduce the rate on this class of goods or not. When the Senator from Mississippi goes out to dinner—no doubt he goes very often—he will find that grapefruit is served in one of these glasses, called stem ware, and the glass itself is the very finest glass, perhaps etched, and the most costly glass there is. If the Senator wants that to come in at 45 per cent, well and good. Those are about the only goods that come in under this particular paragraph.

Mr. HARRISON. May I ask the Senator, before he takes his seat, whether this includes frying pans and all kitchen utensils? I can not understand why the wording of the paragraph should be "kitchen utensils and table articles" and yet champagne glasses should be included in it, and frying pans and such articles as that that generally go as kitchen utensils are excluded.

Mr. TOWNSEND. We are talking about glass.

Mr. SMOOT. We are talking about glass now. We are not talking about iron or steel or tin. We are talking about glass and table articles, and that is what they are.

Mr. JONES of New Mexico. Mr. President, I should like to be advised where the Senator gets his information as to the class of tableware included in this paragraph, and the amount of imports, if he can furnish it.

Mr. SMOOT. I will say to the Senator that I get my information from the Tariff Commission, the members of the Tariff Commission that handle these very goods, and the examiners at the port of entry.

Mr. JONES of New Mexico. I will state to the Senator that this is the bracket in which falls practically all the table glassware, if I am correctly advised.

Mr. McCUMBER. Mr. President, if the Senator will allow me, he will notice that there are two kinds of table and kitchen ware. It is rather difficult to say that a particular kind of glass will or will not be used on the table or in the kitchen; but it describes the character of the glass—

and all articles of every description not specially provided for.

Now, you will observe that it says:

Composed wholly or in chief value of glass or paste, or combinations of glass and paste.

Now, notice the next clause:

Blown or partly blown in the mold or otherwise, or colored, cut, engraved, etched, frosted, gilded, ground, * * * painted, printed in any manner, sand blasted, silvered, stained, or decorated or ornamented in any manner, whether filled or unfilled, or whether their contents be dutiable or free.

You will notice that that describes, generally, a special kind of glass which is blown, and for the most part is etched or is painted or decorated in some manner. Now, if the Senator will turn to line 15, just below, he will find—

Table and kitchen articles and utensils, composed wholly or in chief value of glass or paste, or a combination of glass and paste, when pressed and unpolished—

Not the blown articles, but those that are pressed in molds, comprising the ordinary cheaper tumblers and kitchen ware that I think the Senator has in mind, and not these more expensive articles. It is impossible to describe even the higher-class articles without using the words "kitchen" or "table," because they may be so used; but these are the higher-class articles as distinguished from the very much cheaper class mentioned immediately below.

Mr. JONES of New Mexico. Mr. President, I can not entirely agree with the Senator from North Dakota. The mold-made glass is a machine product, made by machinery, as is the pressed glass.

Mr. SMOOT. No; not when it is blown into a mold, and this is blown into a mold. That is the difference.

Mr. JONES of New Mexico. This says "whether blown into a mold or not."

Mr. SMOOT. No; it does not say that. It says "blown in the mold or otherwise," which means this——

Mr. LA FOLLETTE. "Blown or partly blown."

Mr. JONES of New Mexico. Here is the information we have about it. It is a machine product.

Mr. SMOOT. I can not understand why the Senator says it is a machine product.

Mr. JONES of New Mexico. Because I am told this, speaking of tableware:

Tableware is made in large quantities by a pressing process; the article takes its form from a mold under the pressure of a plunger, the exterior surface being modeled by the mold and the interior surface by the plunger. A large proportion of tableware is also blown or made in paste mold machines.

Mr. SMOOT. Certainly; but the Senator is reading about the next paragraph.

Mr. JONES of New Mexico. I understand, but I am reading now about the other ware that comes within this bracket that we are talking about.

Mr. SMOOT. No blown ware falls in the bracket that we are talking about now.

Mr. JONES of New Mexico. It is blown in a mold.

Mr. SMOOT. Of course it is blown in a mold. That is why it is blown, and, therefore, it is not pressed.

Mr. JONES of New Mexico. I am not talking about pressed ware. I realize that the pressed ware comes down in the next bracket, but here is the language that we are considering:

Table and kitchen articles and utensils, and all articles of every description not specially provided for, composed wholly or in chief value of glass or paste, or combinations of glass and paste, blown or partly blown in the mold or otherwise, or colored, cut—

And so on.

Mr. SMOOT. Yes; it is all blown.

Mr. JONES of New Mexico. It is blown but not necessarily by the mouth.

Here is the kind of machinery that they use:

A paste mold is made of iron, and is coated inside with a paste of carbon. The blower gathers the molten glass and blows it in the mold which he opens and closes with his foot. Only ware of a round shape, which can be rotated in the mold, can be made in a paste mold.

There they have the machinery which they operate making that glassware, and it is not the ordinary process of blowing by the mouth.

Mr. SMOOT. That is the accessory apparatus, after the thing is blown into the mold.

Mr. JONES of New Mexico. The statistics upon the subject do not show that any of it of any great consequence is being imported into this country now, but they show that what is coming in of this high class ware is ornamented ware, coming in because of the selection of the ornamentation. All the information bears out that statement, and I do not see any reason for an increase of that duty. I therefore move to strike out "65" and insert "45," on line 14.

The amendment to the amendment was rejected.

Mr. JONES of New Mexico. On page 41, line 21, I move to strike out "50" and insert in lieu thereof "45," so as to read:

table and kitchen articles and utensils, composed wholly or in chief value of glass or paste, or a combination of glass and paste, when pressed and unpolished, whether or not decorated or ornamented in

any manner or ground (except such grinding as is necessary for fitting stoppers or for purposes other than ornamentation), whether filled or unfilled, or whether their contents be dutiable or free, 45 per cent ad valorem.

That is the cheapest kind of glassware.

Mr. McCUMBER. Why does the Senator make such a small cut in that rate, when he asked for such a large cut in the first one, reducing it from 70 to 40? Why does the Senator ask for 45 per cent in this case?

Mr. JONES of New Mexico. I wanted to be certain that the industry is getting enough protection to live on. The bill is being framed on that theory. The present rate of duty is 45 per cent, and, from all the data which we can get upon the subject, it seems that the industry is prospering at the present time. It is not only prospering but making large profits. Therefore, no one, it seems to me, can justify an increase in this rate. But I do not know just what it should be. I am satisfied the industry would thrive with a rate very much lower; but it so happens that we have a 45 per cent rate now. The industry is thriving now, and the duty certainly should not be increased. I do not want to injure the industry, or take any chances of injuring it, so I am simply moving to substitute the rate in existing law for that which has been recommended by the committee.

Mr. McCUMBER. It seems to me that the Senator moved to make it 45 per cent simply because the Underwood law, the Democratic tariff law, made it 45 per cent, rather than upon any conviction of his own as to whether it ought to be 45 per cent or 35 per cent or 25 per cent.

Mr. JONES of New Mexico. Mr. President, the Senator is making a decidedly unkind remark, when I have explained to him just why I moved to make the rate 35 per cent, and I did not give the reason which the Senator has stated. What I said was that I did it because that is the present rate, that the industry is thriving under the existing law, and I did not want to take any chance of injuring the industry; but certainly nothing has been shown to justify an increase in the duty. May I ask the Senator why the committee proposes to increase the rate from 45 to 50?

Mr. McCUMBER. I can give the reasons. We did it because the cost of production in this country has greatly increased, compared with the cost of production in foreign countries, and we considered 50 per cent to be necessary. The Senator has not given any reason why he considers 45 per cent necessary, but he considers that 50 per cent is too much.

Mr. JONES of New Mexico. The Senator can not give a reason as to why he made it 50 rather than 75, based on anything which he has stated. He might have guessed anything above the present rate, or up to 150 per cent, based on the statement which he has just made. If he is talking about wages in Germany again, if he has those figures in his mind, he could make it almost any amount and still be within the reasoning he has stated.

Mr. McCUMBER. I simply wanted to know why, inasmuch as we have reduced another rate from 70 to 40, there should not be a corresponding reduction in this case. I could see no particular difference.

Mr. JONES of New Mexico. The reason was very apparent why the majority of the Senate reduced the other rate. It was not reduced to 40, however; it was reduced to 45. There were special reasons for it, of course. The majority of the Senate were not willing to increase a duty in favor of a monopoly, established to be such by all the testimony which has been presented here. If that is what the Senator is piqued about, I can only express to him my most profound sympathy.

Mr. McCUMBER. I was not aware that I would appear to be piqued by simply asking a very straightforward question, to which I thought the Senator would give me a straightforward answer. I did not know that I had shown any evidence of being piqued in asking the question. I think the Senator is entirely mistaken if he assumes anything of the kind.

Mr. JONES of New Mexico. Very well. As I said, I moved to make the rate 45 per cent instead of 50 per cent because 45 per cent is the existing rate, and under that rate the industry is prospering at least as greatly as ever in its history. Under that rate it has prospered and grown. I presented to the Senate to-day the statistics showing its marvelous growth, and the cost of production is decreasing in this country. I mean by that that the use of machinery is becoming more and more the means of production and taking the place of human labor, and this product is the product produced by machinery.

I hardly want at this time to make a statement regarding the competition between machine products and human-labor products, but this is the very cheapest kind of tableware, and why the rate should be increased at all I do not believe appears. Therefore, Mr. President, I move to strike out "50" and insert in lieu thereof "45."

The amendment to the amendment was rejected.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee as amended.

The amendment as amended was agreed to.

The next amendment of the committee was, in paragraph 219, cylinder, crown, and sheet glass, unpolished, page 42, line 18, to strike out "35" and insert "50," so as to make the proviso read:

Provided, That none of the foregoing shall pay less duty than 50 per cent ad valorem.

Mr. McCUMBER. The committee intends to recommend some change in that paragraph, and I ask that it may go over. We did not have time to consider it this morning.

The PRESIDING OFFICER. Without objection, it will be passed over.

Mr. JONES of New Mexico. I may state to the Senator that paragraph 217 has not been disposed of yet.

Mr. McCUMBER. There is a further matter with regard to paragraph 217 I desire to consider in the committee, and I hope the Senator will allow that paragraph to go over also.

Mr. JONES of New Mexico. Very well.

The PRESIDING OFFICER. Without objection, it will be passed over.

Mr. McCUMBER. Let us proceed with paragraph 220.

The next amendment of the committee was in paragraph 220, page 42, line 25, before the word "cents," to strike out "5" and insert "4," so as to read:

Cylinder, crown, and sheet glass, by whatever process made, polished, not exceeding 384 square inches, 4 cents per square foot.

Mr. JONES of New Mexico. Mr. President, I merely want to make the statement that that is an increase of 33⅓ per cent over existing law.

Mr. SMOOT. It is a decrease of 20 per cent in the rate fixed by the House.

Mr. JONES of New Mexico. The Senator is right about that, but the committee amendment is an increase of 33⅓ per cent over existing law.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The next amendment was, in paragraph 222, page 43, line 19, to strike out "11" and insert in lieu thereof "12½," so as to read:

Cast polished plate glass, finished or unfinished, and unsilvered, not exceeding 384 square inches, 12½ cents per square foot.

Mr. JONES of New Mexico. Mr. President, I wish to call attention to just what is meant by paragraph 222. The increase on line 19 from 11 to 12½ cents is more than a hundred per cent increase over the present rate, as the present rate is 6 cents per square foot. On line 21 a rate is proposed of 15 cents per square foot, and the present rate for that item is 8 cents. On line 22 the proposed amendment of 17½ cents is considerably above the existing rate, which is 12 cents per square foot. The provision at the bottom of the page is something new, as I have said. It reads:

Plate glass described in this paragraph, containing a wire netting within itself, not exceeding 384 square inches, 15 cents per square foot.

That is a new, separate item. I think that wire-netting glass fell in a basket clause in the existing law. The same thing may be said regarding the next two items. They are new, and I have not had an opportunity to find out just what the present rate is. I hope the Senator from Utah will find from the expert just what the existing rate is.

This paragraph furnishes us some very interesting thoughts. It will be observed that the large increases are on the smaller sizes, and there is a very good inducement for that. I do not think it can be justified, but there is a very great and strong inducement for that discrimination.

In the first place, I wish to make some observations regarding the cast plate-glass industry. Over 60,000,000 square feet of polished plate glass was produced in 1914. The 1914 output in square feet was 11.6 per cent of the total of all building glass. The output of window glass was 77 per cent of the total. In value, however, plate glass was 40.1 per cent of the value of all building glass as compared with 48.2 per cent in value for window glass. In 1917 the domestic output of polished plate glass was about 75,000,000 square feet.

In 1913 seventy-one and a fraction per cent of the polished plate-glass imports were of the sizes not exceeding 720 square inches. In 1914 this class of imports was 63.64 per cent of the total imports. The imports of glass 384 square inches or less in size were 2.8 per cent of the total in 1914. The imports of all

sizes of plate glass in 1899 were 5.48 per cent of the domestic production of that year, and the imports during the fiscal year 1914 were 4.67 per cent of the domestic product of 1914.

American mirror manufacturers have been importing for years 75 per cent of all the plate glass they use on account of the superior quality of the foreign product. Under the higher duties of the act of 1897 during the five years 1903 to 1907 there were annual average imports of 4,000,000 square feet of glass not exceeding 5 square feet in size, and the imports of these small sizes were also larger in the years 1910–11, following the enactment of the act of 1909, than those following the reduction of the rates of duty in the act of 1913.

Apparently, therefore, the imports of much of the plate glass were in response to the requirements of American mirror manufacturers for the higher grades made in foreign countries. They also were influenced by market conditions here and abroad, and these were governed by domestic shortage of supply at times.

A plate-glass syndicate or trust has been in existence in Belgium which carefully regulates the production of its manufacturing members, following the world's markets closely for the purpose of preventing overproduction and of giving stability to selling prices.

In 1914 the kind of glass we are considering now, cast polished plate glass, unsilvered, the domestic production was $14,773,787, while the imports for consumption were only $631,618. We exported at that time a small amount. Since then the imports have been diminishing. There are no large quantities of imports coming in now, but we will reach more definite figures a little later.

In 1917 there were nine companies operating 15 plate-glass factories in those States, producing approximately 75,000,000 square feet of polished plate glass. The production of polished plate glass in 1914 was 60,000,000 square feet, valued at $14,000,000. That would be only a little over 20 cents a square foot, as I roughly figure it. That was an increase of 12.2 per cent in quantity and 85.2 per cent in value over the production of 1904.

As to the earnings of some of these corporations, in six plate-glass establishments the amount of capital employed in 1915 was $9,720,629 and the net sales were $4,930,141. The total value of the land, buildings, and equipment was $6,176,867. The average profit on capital invested was 4.14 per cent and the highest 6.6 per cent. The factories included above are independent plate-glass manufactories. The most important plate-glass company is not included in the above data. This concern operates seven plate-glass and two window-glass factories. It produces about 47 per cent of all plate glass manufactured in the United States. It owns a plate-glass factory in Belgium and operated it before the war. Since 1913 its output (to 1918) increased nearly 29 per cent. Its capitalization (1916) was $25,000,000. About 45 per cent of the assets of the company are invested in the production of plate glass, and the company states that its profits have to a much greater extent been realized from its other investments, which are both commercial and in other lines of manufacture. The printed annual report of the company states that for the year 1916 its total sales (plate glass and other) amounted to $31,580,255.74. The earnings were $6,886,188.57.

The usual dividends of 12 per cent on the preferred stock and 1¾ per cent quarterly on the common stock were paid during the year, and the sum of $915,957.51 was charged for depreciation, leaving a balance of $4,381,231.16, which was added to the surplus account. So it would seem that the one concern producing about one-half of the plate glass is not only doing a large business but it is the dominant factor in the industry and making enormous profits.

The imports of plate glass are given at a very small figure. The polished plate glass, unsilvered, produced in 1914, was valued at $14,753,787. The imports of 1913 were valued at $321,605, or 2.18 per cent of the production of 1914, while the value of the imports for 1914 was 4.93 per cent of the domestic production. The plate glass imported was mainly of the finer and more expensive grades and used for mirrors.

As to prices, the Tariff Commission says:

> The table on page 125 of the average wholesale prices since 1905 for polished plate glass for glazing having an area of from 3 to 5 square feet, shows some surprising fluctuations. The average price per square foot for the year 1905 was 19.75 cents; the next year the average was 22.67 cents. In 1908 it dropped to 17.33 cents, but two years later it jumped to 24.92 cents. In 1913, the year before the war, it was 23 67, or 24 per cent higher than in 1905. In 1915 it dropped to 18.67 cents and the next year it soared to 29.17 cents, due to foreign demand, which led to an export trade in American plate glass for the first time in the history of the industry.

The duties upon the different kinds of glass have varied from time to time, but I shall not take the trouble to go into that matter at this time. After discussing the subject of competitive conditions and tariff considerations, the Tariff Commission states:

> It would appear that the changes in tariff rates in the different tariff acts did not affect the importation of the small sizes of plate glass and that they were governed by other market conditions.

Aside from the ordinary plate glass, the finer grades are being imported. It would seem that the smaller sizes of the ordinary plate glass are what are also being imported into this country. There is a very peculiar situation at this time. The smaller sizes of glass are generally known as wind-shield glasses and are used in automobile wind shields. The prices of these smaller sizes have enormously increased. The way they are represented in the trade indicates that the industry is dominated by some central controlling power.

I call attention to a few facts. I have here some price lists, and here is what has occurred with respect to the smaller sizes used in the automobile industry.

Under the old discount rate there was a reduction of 90 per cent from the list price of the ordinary sizes of this plate glass. That has now been reduced to 85 per cent, which, in effect, is an increase of 50 per cent in the prices at the present time as compared with the pre-war price. The pre-war price was practically the same by the different producing concerns. I have here three price lists of different concerns, and they quote the same price for the various sizes of glass of the same quality. One concern, however, quoted to the writer of this letter which I hold in my hand an 86 per cent discount. That seems to have been a special discount rate, because the dealer who wrote this letter evidently understood something about the trade which the general trade probably did not understand. They have a special price on what are called "automobile sizes." It is the same kind of ware, the same kind of glass, and comes in the same sizes; but they choose to call it automobile glass, and make a special discount for that of only 60 per cent off the price stated for automobile plate glass. I read from this letter:

> I have measured some windshields in various cars, and find some of them measure 8 by 36, which in the automobile bracket lists for $3.72, less 60 per cent discount, leaving a value of $1.488 each net. In the regular schedule the 8 by 36 inches lists for $7, less 86 per cent discount, which would leave a net price of 98 cents. In 1914 this listed $5.50, with 90 per cent discount, which would be a net price of 55 cents.

So we have to-day this one size glass, measuring 8 by 36 inches, which in 1914 was sold to the trade generally for 55 cents, but is now selling to the general trade at 98 cents and to the automobile trade at practically $1.49, an increase in price over the regular 1914 listed price of almost 200 per cent. That is the kind of prices they are maintaining to-day in that industry as related to those smaller sizes.

Another wind shield measured 14 by 36 inches, which, in the automobile bracket, lists at $7.56, with 60 per cent discount, making a net price of $3.02. In the regular schedule of plate glass it lists for $14.90, with an 86 per cent discount, which would be a little over $2.08 net. In the 1914 list it was quoted at $11.40, with a 90 per cent discount, making a net price of $1.14. Thus to-day as against the 1914 price of $1.14, for the ordinary trade we have a price of practically $2.09, and for the automobile trade of practically $3.02.

> In hospital furniture we use a variety of sizes, on which I will quote you 1913 and 1922 list prices in 1913.

In 1913 on the 16 by 20 inch size, which falls within paragraph 222 which we are now considering, not exceeding 384 square inches, or 2⅔ square feet, in the list price was $7; in 1922, $8.35; the 16 by 30 inches in 1913 was $11, in 1922 it was $14.50. Remember that for the 1913 price the discount was 90 per cent, so that the net price on the first article listed at $7 would be 70 cents; in 1922, with a list price of $8.75, and only 86 per cent discount, the net price would be pretty nearly twice the 1913 price.

In the same way the net cost of the article listed at $11 in 1913, with 90 per cent discount, would be only $1.10, but with a price of $14.50 in 1922, with approximately an 85 per cent discount, leaving 15 per cent of the $14.50, the net cost would be increased more than 100 per cent over the 1913 price. So the price of the 18 by 33 inch size in 1913 was $17, and in 1922 it was $19.15; and of the 20 by 36 inch size in 1913 the list price was $21.25, and the 1922 price was $22.50. The 20 by 36 inch size is listed in the automobile bracket at $11.10; net, $4.40; and in the regular schedule, as noted above, at $22.50 less 86 per cent; net, $3.15; and in the old schedule with 90 per cent, or $2.125. So we have these prices on the same size plate glass and the same quality jumping from $2.125 in 1913 to $4.40 net at the present time. The writer of the letter says:

> It might be interesting for you to note that the various jobbers use this same price list, and to substantiate this I am sending you the plate-glass list of three of the principal concerns in the country.

I may say that I have checked them over and they corroborate what is stated in the letter.

Mr. President, I do not care to discuss this matter further. I am anxious to get rid of these schedules, but the only purpose of increasing these duties at the present time is to maintain the enormously increased prices. The importations are comparatively small; they constitute but a slight percentage of the production. The commodity is machine made and the prices are more than 100 per cent higher than they were before the war.

The concerns manufacturing glass are making large profits—that is, the dominant interest is making large profits—and to increase these duties, as is now proposed, will simply add more profit to the concern and make the product more expensive to the trade.

The importations have been very small, and since the war are practically negligible. I may add that since the war we have been exporting large quantities and importing very little. In the last month of 1921 of the sizes not exceeding 384 square inches—that is, the smaller sizes—there were only 363,605 square feet imported, and of the size above that not exceeding 720 square inches, just about a half a million square feet; and above 720 square inches only 806,000 square feet. In 1914 we exported $35,767 worth; in 1917 we increased that to practically $2,250,000; in 1918 we exported $3,155,627 worth; in 1919 we exported about four and a quarter million dollars' worth; in 1920, nearly $3,000,000 worth; and in the nine months of 1921 we exported $1,125,854 worth. The country is not being overrun with these importations, and the prices now are twice what they were prior to the war; and to increase these duties will simply be deliberately to undertake to maintain existing prices.

Mr. McCUMBER. Mr. President, 12½ cents a square foot is equivalent now to about 18 per cent ad valorem.

The second bracket of 15 cents per square foot is also equivalent to 18 per cent ad valorem.

The third bracket of 17½ cents per square foot also amounts to about 18 per cent ad valorem.

I am not certain, but my remembrance is that the duties on the glass containing wire netting range about the same equivalent ad valorem of 18 per cent.

Mr. President, before voting on this amendment, and while I am on my feet, I ask unanimous consent that when the Senate closes its work on this calendar day it recess until to-morrow at 11 o'clock.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. SMOOT. Mr. President, I just want the RECORD to show these facts:

In 1909 it cost a great deal more to make large glass per square foot than it did to make small glass. Another thing: Whenever a large plate was broken it was cut into smaller sizes. At that time it was almost impossible to get rid of the smaller sizes; but the way they make glass to-day they can make a large plate just as cheaply as they can make a small plate, taking the price of the article into consideration. It is true, as the Senator from New Mexico says, that there is a larger demand for the small plates than there was in 1909, or even in 1913. Therefore, the rates in 1909 were made to protect the larger sizes, on account of the excessive cost of making the larger sizes over the small sizes. That to-day has been overcome in the making of plate glass to a large extent.

Mr. President, we increased the rates on the smaller sizes and we decreased the rates on the larger sizes. That was to meet the changed situation existing in the industry. The Senator will find that none of the ad valorem rates in paragraph 222 will be any more than 18 per cent; and I think in the case of the plate glass described in the last clause, containing wire netting within itself, the equivalent ad valorem will be less than in the case of the other items in the paragraph.

Mr. JONES of New Mexico. Mr. President, I just want to make this statement about the rate to which the Senator from Utah has referred: It depends entirely on the price. These are specific duties, and, of course, when you raise the price of the thing, if the duty is specific, that lowers the rate; and I want to call attention to just what this increase means on the different prices.

Under the existing law the duty of 6 cents per square foot amounted to 18.6 per cent. Under the Payne-Aldrich rate, which was 10 cents per square foot, it amounted to 44 per cent. Under the Senate amendment it is proposed to make that rate 12½ cents per square foot, which would be an average of 50 per cent. The rate of 15 cents per square foot amounts to an average of 60 per cent. The rate of 17½ cents per square foot amounts to 20 per cent on the 1921 import price and 70 per cent on the pre-war normal price.

So that is what these duties mean. Owing to the increased prices of these articles now, as compared with the prices prior to the war, we find that this rate here, which amounts to only 20 per cent on the present price, the high price which has been built up, if applied to the pre-war price, would be equivalent to 70 per cent. So, I take it, that you can not measure these increases by percentages. The fact is that in the first bracket you are raising the duty from 6 cents to 12½ cents per square foot, or over 100 per cent, and in the next item you are raising it from 8 cents to 15 cents, which is nearly 100 per cent.

In the next item you are raising it from 12 cents to 17½ cents, and on the other items here I have not ascertained just what the present duty is; but they are increased, I suppose, in about the same ratio. I do not know; I have not had an opportunity to look up what the present rate is on the item at the bottom of page 43, or the two items on page 44.

Mr. President, on page 43, line 19, I move to strike out the numerals "12½" and insert "6."

The PRESIDING OFFICER. The question is upon agreeing to the amendment offered by the Senator from New Mexico to the amendment of the committee.

The amendment to the amendment was rejected.

The PRESIDING OFFICER. The question now is on agreeing to the committee amendment on line 19.

The amendment was agreed to.

Mr. JONES of New Mexico. On page 43, line 21, I move to strike out the numerals "15" and insert "8."

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from New Mexico to the committee amendment.

The amendment to the amendment was rejected.

The PRESIDING OFFICER. The question is upon agreeing to the amendment of the committee.

The amendment was agreed to.

Mr. JONES of New Mexico. On line 22, I move to strike out the numerals "17½" and insert "12."

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from New Mexico to the committee amendment.

The amendment to the amendment was rejected.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee on line 22.

The amendment was agreed to.

Mr. JONES of New Mexico. In the case of the remainder of the items in that paragraph I shall not offer any amendments, but shall content myself with voting against the committee amendments.

The PRESIDING OFFICER. The next amendment of the committee will be stated.

The ASSISTANT SECRETARY. On line 25 the committee proposes to strike out "12" and insert "15," so as to read:

Plate glass described in this paragraph containing a wire netting within itself, not exceeding 384 square inches, 15 cents per square foot.

The amendment was agreed to.

The ASSISTANT SECRETARY. On the next page, page 44, line 1, the committee proposes to strike out "15" and to insert in lieu thereof "17½," so as to read:

Above that, and not exceeding 720 square inches, 17½ cents per square foot.

The amendment was agreed to.

The ASSISTANT SECRETARY. On line 2 the committee proposes to strike out "25" and to insert "20," so as to read:

All above that, 20 cents per square foot.

The amendment was agreed to.

The ASSISTANT SECRETARY. In paragraph 223, line 7, the committee proposes to strike out "11" and to insert "13½," so as to read:

Cast polished plate glass, silvered, cylinder and crown glass, silvered, and looking-glass plates, exceeding in size 144 square inches and not exceeding 384 square inches, 13½ cents per square foot.

The amendment was agreed to.

The ASSISTANT SECRETARY. On line 8 it is proposed to strike out "13" and insert "16," so as to read:

Above that, and not exceeding 720 square inches, 16 cents per square foot.

The amendment was agreed to.

The ASSISTANT SECRETARY. On line 9 it is proposed to strike out "22½" and insert "21," so as to read:

All above that, 21 cents per square foot.

The amendment was agreed to.

The ASSISTANT SECRETARY. At the end of line 9, after the words "per square foot" and the colon, it is proposed to insert:

Provided, That none of the foregoing shall pay less duty than 35 per cent ad valorem—

and a colon.

The amendment was agreed to.

Mr. SUTHERLAND. I call the attention of the clerks at the desk to the fact that they omitted to approve the two words "Provided further" in line 11.

The PRESIDING OFFICER. Those are in the original bill.

Mr. SUTHERLAND. They are in italics.

The PRESIDING OFFICER. They are always in italics.

Mr. SUTHERLAND. "Provided" was in the original bill, but not "Provided further."

The ASSISTANT SECRETARY. The word "further" is added to the word "provided" on line 11.

The PRESIDING OFFICER. Without objection, the amendment will be agreed to.

Mr. SMOOT. Paragraph 229 is the next.

The ASSISTANT SECRETARY. In paragraph 229, on page 46, beginning with line 5, the committee proposes to strike out that paragraph, or the two lines 5 and 6, in the following words:

Incandescent electric-light bulbs and lamps, with or without filaments, 35 per cent ad valorem.

Mr. SIMMONS. Mr. President, let me ask the Senator from Utah, if we strike that out, does it appear anywhere else in the bill?

Mr. McCUMBER. It has already been voted on.

Mr. SMOOT. That was included in paragraph 218, so this amendment is necessary to conform to that.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

EXECUTIVE SESSION.

Mr. McCUMBER. Mr. President, I think that completes the glass schedule, with the exception of what we have passed over. That being the case, I think we will not try to go on with the others to-night, unless Senators so desire.

I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After three minutes spent in executive session the doors were reopened, and (at 9 o'clock and 45 minutes p. m.) the Senate, under the order previously made, took a recess until to-morrow, Thursday, June 1, 1922, at 11 o'clock a. m.

CONFIRMATIONS.

Executive nominations confirmed by the Senate May 31 (legislative day of April 20), 1922.

UNITED STATES MARSHAL.

W. H. King to be United States marshal, district of South Dakota.

REGISTER OF THE LAND OFFICE.

George C. Jackman to be register of the land office, Marquette, Mich.

POSTMASTERS.

ILLINOIS.

Menno Vandervliet, Danforth.

KANSAS.

Anna L. January, Osawatomie.

MICHIGAN.

William Florian, Grand Junction.

NEBRASKA.

Andrew E. Stanley, Loomis.
Mamie L. Reams, Naponee.

NEW HAMPSHIRE.

Ervin W. Hodsdon, Center Ossipee (late Mountainview).

NORTH DAKOTA.

George H. Dickey, Esmond.
Fred Fercho, Lehr.

PENNSYLVANIA.

Donald C. Mapel, Greensboro.
Arthur B. Winter, Jermyn.

WYOMING.

Ralph R. Long, Gillette.

HOUSE OF REPRESENTATIVES.

WEDNESDAY, *May 31, 1922.*

The House met at 12 o'clock noon and was called to order by the Speaker.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Hear us, O God, our Father. Thou art merciful and gracious, long-suffering, slow to anger, and of great love! Our expectation is from Thee. Be with us again in the exercise of our duties. Mercifully grant that Thy Holy Spirit may in all things direct and rule our hearts. Help us to accept Thy claims and conform our lives to them. We thank Thee for the good things our eyes have seen and our ears heard and which our souls have welcomed. Out of the hallowed lessons and associations of our National Memorial Day may there come a rededication to public service. May our citizens everywhere, in unfaltering terms, renew their devotion to the Republic, and may there be a new birth of Divine strength and enthusiasm for the things noble, just, and good. Through Jesus Christ, our Lord. Amen.

The Journal of the proceedings of Saturday, May 27, 1922, and of Sunday, May 28, 1922, was read and approved.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Crockett, one of its clerks, announced that the Senate had passed without amendment bills of the following titles:

H. R. 11408. An act granting the consent of Congress to the county of Winnebago and the town of Rockton, in said county, in the State of Illinois, to construct, maintain, and operate a bridge and approaches thereto across the Rock River, in said town of Rockton; and

H. R. 11409. An act granting the consent of Congress to the city of Ottawa and the county of La Salle, in the State of Illinois, to construct, maintain, and operate a bridge and approaches thereto across the Fox River.

The message also announced that the Senate had passed with amendments the bill (H. R. 9344) providing for the appropriation of funds for acquiring additional water rights for Indians on the Crow Reservation in Montana, whose lands are irrigable under the Two Leggins Irrigation Canal, in which the concurrence of the House of Representatives was requested.

The message also announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 10972) to readjust the pay and allowances of the commissioned and enlisted personnel of the Army, Navy, Marine Corps, Coast Guard, Coast and Geodetic Survey, and Public Health Service.

The message also announced that the Senate had passed bills of the following titles; in which the concurrence of the House of Representatives was requested:

S. 3425. An act to continue certain land offices, and for other purposes;

S. 2753. An act for the relief of José Louzau; and

S. 3396. An act creating the positions of Second Assistant Secretary and private secretary in the Department of Labor.

SENATE BILLS REFERRED.

Under clause 2, Rule XXIV, Senate bills of the following titles were taken from the Speaker's table and referred to their appropriate committees as indicated below:

S. 3425. An act to continue certain land offices, and for other purposes; to the Committee on the Public Lands; and

S. 2753. An act for the relief of José Louzau; to the Committee on Claims.

ENROLLED BILLS PRESENTED TO THE PRESIDENT FOR HIS APPROVAL.

Mr. RICKETTS, from the Committee on Enrolled Bills, reported that this day they had presented to the President of the United States, for his approval, the following bills:

H. R. 11065. An act making appropriations for the Departments of State and Justice and for the judiciary for the fiscal year ending June 30, 1923, and for other purposes;

H. R. 10442. An act to amend an act entitled "An act to declare the purpose of the people of the United States as to the future political status of the people of the Philippine Islands, and to provide a more autonomous government for these islands," approved August 29, 1916, as amended by an act to amend said act approved July 21, 1921;

H. R. 6523. An act for the relief of John Burke, former Treasurer of the United States, for lost bonds without the fault or negligence on the part of said former Treasurer; and

H. R. 6524. An act to permit the correction of the general account of John Burke, former Treasurer of the United States.

ADJOURNMENT.

Mr. MONDELL. Mr. Speaker, in accordance with the previous announcement, I move that the House do now adjourn.

The SPEAKER. The gentleman from Wyoming moves that the House do now adjourn. The question is on agreeing to that motion.

The question was taken, and the Speaker announced that the ayes appeared to have it.

Mr. JOHNSON of South Dakota. A division, Mr. Speaker.

The SPEAKER. A division is asked for.

The House divided; and there were—ayes 47, noes 44.

Mr. JOHNSON of South Dakota. I ask for the yeas and nays, Mr. Speaker.

The SPEAKER. The gentleman from South Dakota asks for the yeas and nays.

The yeas and nays were ordered.

The SPEAKER. As many as favor the motion to adjourn will, when their names are called, answer "yea." Those opposed will answer "nay."

The question was taken; and there were—yeas 101, nays 86, not voting 244, as follows:

YEAS—101.

So the motion to adjourn was agreed to.

The Clerk announced the following pairs:

Until further notice:

Mr. Treadway with Mr. Cockran.

Mr. Langley with Mr. Clark of Florida.

Mr. Paige with Mr. Sullivan.

Mr. Hutchinson with Mr. Bell.

Mr. Jefferies with Mr. Rayburn.

Mr. Fitzgerald with Mr. Driver.

Mr. Ansorge with Mr. Kindred.

Mr. Johnson of Washington with Mr. Tague.

Mr. Anthony with Mr. Aswell.

Mr. Connolly of Pennsylvania with Mr. Jones of Texas.

Mr. Arentz with Mr. Bankhead.

Mr. Jones of Pennsylvania with Mr. Logan.

Mr. Atkeson with Mr. Mansfield.

Mr. McArthur with Mr. Oliver.

Mr. Bacharach with Mr. McClintic.

Mr. Kelly of Pennsylvania with Mr. Kitchin.

Mr. French with Mr. Harrison.

Mr. Beck with Mr. Riordan.

Mr. Frothingham with Mr. Black.

Mr. Kendall with Mr. Lee of Georgia.

Mr. Beedy with Mr. Woods of Virginia.

Mr. Michaelson with Mr. Kunz.

Mr. Burtness with Mr. Deal.

Mr. Henry with Mr. O'Brien.

Mr. Mott with Mr. Padgett.

Mr. Goodykoontz with Mr. Smithwick.

Mr. Patterson of New Jersey with Mr. Larsen of Georgia.

Mr. Volk with Mr. London.

Mr. Crago with Mr. Montague.

Mr. Kiess with Mr. Collins.

Mr. Snyder with Mr. Gallivan.

Mr. Kennedy with Mr. Kincheloe.

Mr. Cramton with Mr. Tucker.

Mr. Moore of Ohio with Mr. Sears.

Mr. Bland of Indiana with Mr. O'Connor.

Mr. Siegel with Mr. Jacoway.

Mr. Boise with Mr. Parks of Arkansas.

Mr. Vare with Mr. Mead.

Mr. Bond with Mr. Drane.

Mr. Graham of Pennsylvania with Mr. Rainey of Illinois.

Mr. Radcliffe with Mr. Fields.

Mr. Griest with Mr. Weaver.

Mr. Dickinson with Mr. Barkley.

Mr. Knutson with Mr. Griffin.

Mr. Bowers with Mr. Hooker.

Mr. Sanders of Indiana with Mr. Favrot.

Mr. Stiness with Mr. Carew.

Mr. Krieder with Mr. Brand.

Mr. Chandler of Oklahoma with Mr. Taylor of Arkansas.

Mr. Lehlbach with Mr. Cullen.

Mr. A. P. Nelson with Mr. Stoll.

Mr. Nolan with Mr. Hudspeth.

Mr. Kissel with Mr. Carter.

Mr. Newton of Minnesota with Mr. Taylor of Colorado.

Mr. Dowell with Mr. Cantrill.

Mr. Crowther with Mr. Ten Eyck.

Mr. Fess with Mr. Goldsborough.

Mr. Newton of Missouri with Mr. Hawes.
Mr. Olpp with Mr. Rainey of Alabama.
The result of the vote was announced as above recorded.
Accordingly (at 12 'oclock and 33 minutes p. m.) the House adjourned until Thursday, June 1, 1922, at 12 o'clock noon.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. FISH: Committee on Foreign Affairs. H. J. Res. 322. A joint resolution favoring the establishment in Palestine of a national home for the Jewish people; without amendment (Rept. No. 1038). Referred to the House Calendar.

Mr. CHANDLER of New York: Committee on the Judiciary. H. J. Res. 337. A joint resolution granting consent of Congress and authority to the Port of New York Authority to execute the comprehensive plan approved by the States of New York and New Jersey by chapter 43, Laws of New York, 1922, and chapter 9, Laws of New Jersey, 1922; without amendment (Rept. No. 1039). Referred to the House Calendar.

Mr. JOHNSON of Mississippi: Committee on Interstate and Foreign Commerce. H. R. 11626. A bill to extend the time for constructing a bridge across the Mississippi River at or near the city of Baton Rouge, La.; without amendment (Rept. No. 1048). Referred to the House Calendar.

Mr. JOHNSON of Mississippi: Committee on Interstate and Foreign Commerce. H. R. 11362. A bill declaring Tchula Lake, Holmes County, Miss., to be a nonnavigable stream; with an amendment (Rept. No. 1049). Referred to the House Calendar.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. STEPHENS: Committee on Naval Affairs. H. J. Res. 47. A joint resolution authorizing the Secretary of the Navy to receive for instruction at the United States Naval Academy, at Annapolis, Mr. Jose A. de la Torriente, a citizen of Cuba; without amendment (Rept. No. 1040). Referred to the Committee of the Whole House.

Mr. STEPHENS: Committee on Naval Affairs. H. J. Res. 281. A joint resolution authorizing the Secretary of the Navy to receive for instruction at the United States Naval Academy, at Annapolis, Md., Willem van Doorn, a subject of the Netherlands; without amendment (Rept. No. 1041). Referred to the Committee of the Whole House.

Mr. VINSON: Committee on Naval Affairs. H. R. 6538. A bill for the relief of Grey Skipwith; without amendment (Rept. No. 1042). Referred to the Committee of the Whole House.

Mr. VINSON: Committee on Naval Affairs. H. R. 8046. A bill for the relief of Themis Christ; without amendment (Rept. No. 1043). Referred to the Committee of the Whole House.

Mr. KRAUS: Committee on Naval Affairs. H. R. 6358. A bill authorizing the accounting officers of the Treasury to pay to A. E. Ackerman the pay and allowances of his rank for services performed prior to the approval of his bond by the Secretary of the Navy; without amendment (Rept. No. 1044). Referred to the Committee of the Whole House.

Mr. SWING: Committee on Naval Affairs. H. R. 7921. A bill granting six months' pay to Alice P. Dewey; without amendment (Rept. No. 1045). Referred to the Committee of the Whole House.

Mr. BURDICK: Committee on Naval Affairs. H. R. 6832. A bill granting six months' pay to Anton Kunz, father of Joseph Anthony Kunz, deceased, machinist's mate, first class, United States Navy, in active service; without amendment (Rept. No. 1046). Referred to the Committee of the Whole House.

Mr. BURDICK: Committee on Naval Affairs. H. R. 855. A bill for the relief of Fred G. Leith, United States Navy; without amendment (Rept. No. 1047). Referred to the Committee of the Whole House.

Mr. DARROW: Committee on Naval Affairs. H. R. 8921. A bill for the relief of Ellen McNamara; without amendment (Rept. No. 1050). Referred to the Committee of the Whole House.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, the Committee on the Public Lands was discharged from the consideration of the bill (H. R. 6204) to grant the military target range of Lincoln County, Okla., to the city of Chandler, Okla., and reserving the right to use for military and aviation purposes, and the same was referred to the Committee on Military Affairs.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. GENSMAN: A bill (H. R. 11826) to regulate air navigation within the District of Columbia; to the Committee on the District of Columbia.

By Mr. PATTERSON of Missouri: A bill (H. R. 11827) granting the consent of Congress to the county courts of Howard and Saline Counties, in the State of Missouri, to construct a bridge across the Missouri River; to the Committee on Interstate and Foreign Commerce.

By Mr. RAINEY of Illinois: A bill (H. R. 11828) for the enlargement and extension of the post office building at Chicago, Ill.; to the Committee on Public Buildings and Grounds.

By Mr. VESTAL: A bill (H. R. 11829) to regulate and control the manufacture, sale, and use of weights and measures and of weighing and measuring devices; to the Committee on Coinage, Weights, and Measures.

By Mr. TAGUE: Joint resolution (H. J. Res. 340) proposing an amendment to the Constitution of the United States; to the Committee on the Judiciary.

By Mr. RAKER: Joint resolution (H. J. Res. 341) proposing an amendment to the Constitution of the United States; to the Committee on the Judiciary.

By Mr. SWING: Joint resolution (H. J. Res. 342) appropriating $50,000 for protecting the lands and property in the Palo Verde Valley and elsewhere along the Colorado River within the limits of the United States; to the Committee on Appropriations.

By Mr. BRAND: Resolution (H. Res. 357) directing the United States Department of Agriculture and the Post Office Department to investigate the feasibility of furnishing market prices of cotton, corn, wheat, live stock, and dairy products to the farmers by radiophone; to the Committee on Agriculture.

By the SPEAKER (by request): Memorial of the Legislature of the State of Louisiana, relating to the Mississippi River floods, and requesting appropriations for the relief of those living within the flooded areas; to the Committee on Appropriations.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. HAWLEY: A bill (H. R. 11830) authorizing the Secretary of the Interior to grant a patent of certain lands to Truman H. Ide; to the Committee on Public Lands.

Also, a bill (H. R. 11831) granting an increase of pension to Rachel Killin Garrett; to the Committee on Pensions.

By Mr. KRAUS: A bill (H. R. 11832) for the relief of Charles E. Reyburn; to the Committee on Claims.

By Mr. McSWAIN: A bill (H. R. 11833) for the relief of Rev. S. T. Matthews; to the Committee on Claims.

By Mr. MONTAGUE: A bill (H. R. 11834) granting a pension to Jannie E. Bell; to the Committee on Invalid Pensions.

By Mr. SHAW: A bill (H. R. 11835) granting a pension to Ellen McFarland; to the Committee on Pensions.

Also, a bill (H. R. 11836) granting a pension to William S. Harrell; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11837) granting an increase of pension to Mary J. Lawson; to the Committee on Invalid Pensions.

By Mr. TAYLOR of Tennessee: A bill (H. R. 11838) granting an increase of pension to Barbara E. Rhea; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11839) granting an increase of pension to Sarah White; to the Committee on Pensions.

By Mr. VESTAL: A bill (H. R. 11840) granting a pension to Reuben R. Romey; to the Committee on Pensions.

By Mr. WURZBACH: A bill (H. R. 11841) granting an increase of pension to Mary J. Martin; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

5831. By the SPEAKER (by request): Petition of Mid-City Citizens' Association, of Washington, D. C., favoring the passage of Senate Concurrent Resolution 23; to the Committee on Rules.

5832. Also (by request), petition of Presbytery of Springfield, at Jacksonville, Ill., indorsing House bill 9753, to secure Sunday as a day of rest in the District of Columbia; to the Committee on the District of Columbia.

5833. By Mr. CAREW: Petition of a mass meeting of citizens of the city of New York, favoring the maintaining of the Republic of Ireland; to the Committee on Foreign Affairs.

5834. By Mr. CHALMERS: Petition of Toledo Circle Ladies G. A. R., urging favorable action on Morgan-Bursum pension bill; to the Committee on Invalid Pensions.

5835. By Mr. HAWLEY: Petition of sundry citizens of the State of Oregon, protesting against the passage of House bill 9753; to the Committee on the District of Columbia.

5836. By Mr. KISSEL: Petition of National Cloak & Suit Co., of New York City, N. Y., relating to the reappointment of William P. G. Harding to the Federal Reserve Board; to the Committee on Banking and Currency.

5837. Also, petition of New York Produce Exchange, New York City, N. Y., protesting against the passage of Stevenson bill; to the Committee on Agriculture.

5838. By Mr. LINEBERGER: Petition from 270 citizens of South Pasadena, Eagle Rock, San Bernardino, and Los Angeles, Calif., asking that protection and help may be extended to make Armenia a self-supporting and self-protecting nation; to the Committee on Foreign Affairs.

5839. Also, petition of citizens of St. Paul, Minn., favoring the Towner-Sterling bill (H. R. 7); to the Committee on Education.

5840. Also, petition of Los Angeles Presbytery of the United Presbyterian Church of Long Beach, Calif., indorsing House Joint Resolution 131, prohibiting polygamy and polygamous cohabitation in the United States; to the Committee on the Judiciary.

5841. Petition of Los Angeles Presbytery of the United Presbyterian churches at Long Beach, Calif., indorsing Senate Joint Resolution 31, proposing a constitutional amendment authorizing Congress to enact uniform laws on the subject of marriage and divorce; to the Committee on the Judiciary.

5842. Also, petition of Los Angeles Presbytery of the United Presbyterian Church of Long Beach, Calif., indorsing House bill 9753, to secure Sunday as a day of rest in the District of Columbia; to the Committee on the District of Columbia.

5843. By Mr. YOUNG: Petition of 27 widows and dependents of Civil War veterans, of Velva, N. Dak., urging support of the Bursum-Morgan bill; to the Committee on Invalid Pensions.

SENATE.

THURSDAY, *June 1, 1922.*

(Legislative day of Thursday, April 20, 1922.)

The Senate met at 11 o'clock a. m., on the expiration of the recess.

Mr. ROBINSON. Mr. President, I think we ought to have a quorum.

Mr. STERLING. I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ball	Gooding	New	Smoot
Borah	Hale	Newberry	Spencer
Brandegee	Harris	Norbeck	Sterling
Calder	Johnson	Oddie	Sutherland
Capper	Jones, N. Mex.	Page	Townsend
Caraway	Jones, Wash.	Pepper	Underwood
Culberson	Kellogg	Pittman	Wadsworth
Curtis	La Follette	Poindexter	Walsh, Mass.
Dial	Lenroot	Pomerene	Walsh, Mont.
du Pont	Lodge	Ransdell	Watson, Ga.
Edge	McCumber	Rawson	Watson, Ind.
Frelinghuysen	McNary	Robinson	Willis
Gerry	Myers	Sheppard	
Glass	Nelson	Simmons	

Mr. RANSDELL. I was requested to announce that the several Senators, whose names I shall state, are detained at a hearing before the Committee on Agriculture and Forestry: The Senator from Nebraska [Mr. NORRIS], the Senator from New Hampshire [Mr. KEYES], the Senator from North Dakota [Mr. LADD], the Senator from Illinois [Mr. MCKINLEY], the Senator from South Carolina [Mr. SMITH], the Senator from Wyoming [Mr. KENDRICK], and the Senator from Mississippi [Mr. HARRISON].

The VICE PRESIDENT. Fifty-four Senators have answered to their names. A quorum is present.

INVESTMENT AND PROFIT IN SOFT COAL INDUSTRY (S. DOC. 207).

The VICE PRESIDENT laid before the Senate a communication from the chairman of the Federal Trade Commission, transmitting, pursuant to law, a preliminary report of the commission on investment and profit in soft coal mining covering the period 1916 to 1921, inclusive, which was referred to the Committee on Education and Labor and ordered to be printed.

PETITIONS AND MEMORIALS.

Mr. CAPPER presented a resolution adopted by the congregation of the Chelsea Congressional Church, at Kansas City, Kans., favoring the enactment of legislation creating a department of education, which was referred to the Committee on Education and Labor.

Mr. McLEAN presented a memorial of the Fairfield County Farm Bureau, of Danbury, Conn., remonstrating against the appropriation of public funds for the purpose of free seed distribution, which was referred to the Committee on Agriculture and Forestry.

He also presented telegrams in the nature of petitions from Anthony Safranik, chairman of employees of Frank Parizek, manufacturer of pearl buttons, of West Willington; Charles H. Ruha, chairman of employees of B. Schwanda & Sons, of Stafford Springs; Prichal Bros., manufacturers of ocean pearl shell, of Higganum; and Havlin & Pokorney, manufacturers of ocean pearl shells, of Higganum; all in the State of Connecticut, praying for the prompt passage of the pending tariff bill and stating they do not understand the reason for delay in the Senate, which were referred to the Committee on Finance.

He also presented letters in the nature of petitions from Rev. Richard D. Hatch, rector, and the congregation of Trinity Church, of Southport; Rev. Reginald R. Parker, of Hartford; Rev. Robert C. Whitehead, Stratford Congregational Church, of Stratford; Rev. W. S. Woolworth, of Chestnut Hill; and Rev. Herbert L. Wilber, of Jewett City; all in the State of Connecticut, praying that relief be granted the suffering peoples of Armenia, which were referred to the Committee on Foreign Relations.

Mr. TOWNSEND presented petitions numerously signed by sundry citizens in the State of Michigan, praying for the imposition in the pending tariff bill of only a moderate duty on kid gloves, which were referred to the Committee on Finance.

He also presented petitions of sundry citizens in the State of Michigan, praying for the imposition in the pending tariff bill of an adequate protective duty on agricultural products, particularly grains, cattle, sheep, hogs, and sugar, which were referred to the Committee on Finance.

He also presented petitions of sundry citizens of Memphis, Armada, Mount Clemens, Detroit, Swartz Creek, Clayton Township, and Bay City, all in the State of Michigan, praying for inclusion in the pending tariff bill of a duty of $2 per 100 pounds on Cuban sugar, and also adequate protection on farm products, which were referred to the Committee on Finance.

Mr. LADD presented a resolution adopted by the eleventh annual convention, North Dakota State Federation of Labor, at Bismarck, N. Dak., favoring payment of the so-called soldiers' bonus solely from funds derived from war and excess-profits taxes, which was referred to the Committee on Finance.

He also presented a resolution adopted by the pastors of the Episcopal, the Congregational, the First Lutheran, the Trinity Lutheran, and the Methodist Episcopal Churches of Williston, N. Dak., favoring the granting of relief to the suffering peoples of Armenia, which was referred to the Committee on Foreign Relations.

REPORT OF THE COMMITTEE ON BANKING AND CURRENCY.

Mr. McLEAN, from the Committee on Banking and Currency to which was referred the bill (S. 3633) to authorize the coinage of a 50-cent piece in commemoration of the one hundredth anniversary of the birth of the late President Rutherford Birchard Hayes at Delaware, in the State of Ohio, reported it with an amendment.

JOHN G. SESSIONS.

Mr. ROBINSON, from the Committee on Claims, to which was referred the bill (S. 3157) for the relief of John G. Sessions, reported it with an amendment and submitted a report (No. 730) thereon.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. RANSDELL:

A bill (S. 3665) providing additional funds to continue in effect the act providing for the care and treatment of persons afflicted with leprosy and to prevent the spread of leprosy in the United States; to the Committee on Appropriations.

By Mr. PEPPER:

A bill (S. 3666) granting a pension to Matilda A. Swift; to the Committee on Pensions.

A bill (S. 3667) for the relief of the estate of David B. Landis, deceased, and the estate of Jacob F. Sheaffer, deceased; to the Committee on Claims.

By Mr. WADSWORTH:

A bill (S. 3668) for the relief of Gertrude Lustig; to the Committee on Claims.

By Mr. EDGE:

A bill (S. 3669) for the advancement of certain retired officers of the United States Army; to the Committee on Military Affairs.

THE MUSCLE SHOALS PROJECT.

Mr. NORRIS. I ask unanimous consent to present an amendment to House bill 10871, being the War Department appropriation bill. I ask to have the amendment printed and lie on the table.

Mr. UNDERWOOD. I should like to ask the Senator from Nebraska to what his amendment relates?

Mr. NORRIS. It relates to the Muscle Shoals proposition.

Mr. UNDERWOOD. For curiosity I wanted to know; that was all.

Mr. NORRIS. I ought to state that in offering the amendment I do so under instructions from and by the authority of the Committee on Agriculture and Forestry. I think that ought to be shown in the RECORD.

The amendment was ordered to be printed and to lie on the table, as follows:

On page 132, after line 5, insert the following:

MUSCLE SHOALS.

For the continuation of the work on Dam No. 2 on the Tennessee River at Muscle Shoals, Ala., to be immediately available, $7,500,000.

AMENDMENT TO HOUSE RIVER AND HARBOR BILL.

Mr. ROBINSON submitted an amendment providing that the jurisdiction of the Mississippi River Commission be extended from St. Paul to the head of the passes, and to the tributaries and outlets of the Mississippi River in so far as they are affected by the flood waters of the Mississippi River, intended to be proposed by him to the bill (H. R. 10766) authorizing appropriations for the prosecution and maintenance of public works on canals, rivers, and harbors, and for other purposes, which was referred to the Committee on Commerce and ordered to be printed.

RECLASSIFICATION OF GOVERNMENT EMPLOYEES.

Mr. STERLING. Mr. President, I hope to be allowed to proceed without interruption in the few remarks that I have to make. I desire to speak of certain phases of the reclassification problem. My remarks are made necessary, I think, by reason of certain articles which have appeared of late in the press.

In the Washington Star of May 29 appeared an article from which I read first the headlines:

Executive order on reclassifying expected July 1. President considers making it effective for 60,000 United States employees. All details completed. Appropriation awaited. Many becoming impatient over further delay as bonus issue comes up again.

I wish to say that the contents of the article are not quite so portentous as the headlines would lead us to believe, but they are bad enough. I desire to call attention to just a few quotations from the article:

President Harding is considering putting reclassification of the nearly 60,000 Federal employees in the District of Columbia into effect July 1 by Executive order. The reclassification schedules, necessary to fix up the pay rolls promptly on that date, have been actually prepared by the United States Bureau of Efficiency, in cooperation with the administrative officers in each of the Government establishments, in compliance with an Executive order of President Harding on October 24, 1921.

All that is necessary to establish the new salaries on July 1 is for Congress to appropriate the money necessary to pay them.

Then again:

Because the tariff bill has been occupying the center of the stage, and probably will continue to do so for several months, many Senators who are opposed to passing another bonus bill, and still more who are opposed to the Sterling-Lehlbach bill, are impatient over further delay, since it would junk all the work that has been done by the Bureau of Efficiency and would require the study to be made all over again by the Civil Service Commission. This would entail an additional appropriation for the employment of "experts" and take a year's time for another "investigation."

The Sterling-Lehlbach bill, carrying schedules for reclassification of the Government employees, passed the House six months ago and has been hanging fire in the Senate while debate drags on over the tariff.

Further on in the article it is said:

The real friends of the Government employees in both the House and the Senate are impatient over the proposed delay, even more than over the new appropriation that would be required. Because they believe that the short cut is to put through the reclassification schedules worked out by the Bureau of Efficiency and the administrative officers, pressure is being brought to bear on President Harding to issue an Executive order under which the army of Government workers would start the new fiscal year with a new statutory salary schedule carrying substantial increases.

Again the article states that—

The reclassification schedule promulgated by the Bureau of Efficiency under President Harding's Executive order of October 24, 1921, which is the same as the schedule in the bill introduced in the House and Senate, respectively, by Representative WILL R. WOOD of Indiana and Senator REED SMOOT, of Utah, can be put into effect July 1 without any further investigation or any further expense.

So, Mr. President, it would appear that under guise of an efficiency rating system the Bureau of Efficiency is to-day, at great expense to the Government, putting into the Federal departments a classification of positions that has not only not received the approval of Congress but in so far as it has been considered by Congress has been rejected. In the form of S. 1079 and H. R. 2021 it was before the Committees on Civil Service of the present Congress. These committees held hearings on this proposal and others that had been worked out and reached the conclusion that the Bureau of Efficiency plan as embodied in the two bills referred to was the inferior. The House committee favorably reported a bill drafted along radically different lines. The Representative from Indiana [Mr. WOOD], the House sponsor for the classification scheme of the Bureau of Efficiency, offered on the floor of the House to have that bureau's scheme substituted for the committee's bill as an amendment. The amendment was overwhelmingly rejected and House bill 8928, embodying the other plan, was passed.

The Senate Committee on Civil Service, to whom the House bill was referred, reported unanimously in favor of its passage with amendments. It went to the Appropriations Committee of the Senate under an agreement which limited the Appropriations Committee to a consideration only of the salary rates proposed. It has not yet been reported by that committee, although the bill was referred to the committee, Mr. President, when I reported it on behalf of the Committee on Civil Service to the Senate on February 6 last.

To go back somewhat further in the history of these measures and of the activities of the Bureau of Efficiency, this bureau on March 3, 1917, was directed by Congress in the legislative appropriation act to investigate the classification, salary, and efficiency of the employees of the departments and independent establishments and report fully or partially to Congress by January 1, 1918, as to needed equalizations or reclassification. It was further instructed to ascertain the rates of pay of various States and municipal governments and commercial institutions in different parts of the United States and to submit to Congress at its next regular session a report showing how such rates compare with the rates of pay of employees of the Federal Government performing similar services.

The Bureau of Efficiency became so busy demonstrating how the Bureau of War Risk Insurance should not be run and in other of its war-time activities that it failed to carry out the mandates of Congress regarding classification and salary standardization. On March 1, 1919, Congress established a Congressional Joint Commission on Reclassification of Salaries to take up this entire subject.

The joint commission started with the idea that the United States Bureau of Efficiency would be of great assistance, a laboratory, as it were, for the detailed work involved, and that its chief, Mr. Herbert D. Brown, would be its technical adviser, but it was not so to be; trouble arose. According to the view of the Bureau of Efficiency, the chief difficulty was that the reclassification commission wanted to give the employees an opportunity to prepare a statement of their duties to be considered in classifying the positions. The commission, it seems, wanted to work on the basis of a statement of facts agreed upon by the employee and his superior. The Bureau of Efficiency did not consider it necessary to have the employees in on the matter at all; it could not see why the employee should have his day in court before the verdict was rendered.

The Bureau of Efficiency has apparently not given publicity to another phase of the differences. The commission had two members literally and six figuratively from Missouri; they had to be shown; and it did not propose to do just as Mr. Brown said without inquiry and investigation. It summoned for conference and advice specialists in this field from outside the service, and it discovered, through its own inquiries and from information received from this outside help, that Mr. Brown was proposing not a modern, up-to-date classification, such as is being made the basis of modern personnel administration, both in public and private employment, but a halfway salary classification such as had been proposed many years ago by the old Keep Commission, made up of Government administrators. Such a classification well administered would have been perhaps an improvement over existing conditions, but it would not have furnished the basis for an effective reform in general personnel administration.

Some inspection, I am informed, was made of the material the Bureau of Efficiency had collected regarding the salaries paid outside the service; but, to make a long story short, the commission decided that it would not get its expert advice from Mr. Herbert D. Brown. He and the commission parted company. Thus Mr. Brown's scheme has been three times con-

sidered and rejected; once by a congressional joint commission, again by the two Committees on Civil Service of the present Congress, and then by a most decisive vote on the floor of the House.

Having been excused as not the best-qualified man for technical leadership in reclassification and salary standardization, Mr. Brown began a campaign against the work of the congressional commission. Examination of the printed reports of his testimony before the Appropriations Committees discloses that in this campaign, intentionally or unintentionally, he grossly misrepresented the facts. He made several statements which any fair-minded investigator who looks into the matter will have to admit are absolutely incorrect. In his public addresses he has again and again reiterated these incorrect statements; and no one can tell how far he and his assistants have gone in their private attacks on the work of the congressional commission and the bills that grew out of it.

Again and again he or his assistants have sought to create the impression that the congressional commission classified employees on the basis of their titles and not on the basis of the actual duties of their positions. Nothing could be further from the fact. In all the literature regarding the Federal civil service with which I am familiar there is no clearer exposition of the worthlessness of existing titles of positions than is contained in the report of the congressional commission. It is a conclusive statement. That commission never for one moment gave any consideration to an existing title in determining the proper classification of a position. As it reiterates time and time again, so that any fair-minded reader of ordinary intelligence can grasp the point, it classified positions on the basis of the duties and responsibilities involved and the qualifications that an employee would have to possess in order satisfactorily to enter upon the performance of those duties. It classified the position and not the incumbent. What qualifications the incumbent may have had that were not required for the job had nothing to do with the classification of the position he occupied; my understanding is that the congressional commission did not even inquire into these purely personal qualifications. When a member of the House Appropriations Committee got the erroneous impression that they did so inquire and so classify and asked the representative of the Bureau of Efficiency if his impression was not correct, it was the duty of the Bureau of Efficiency to correct that false impression and not to confirm it, as was done.

The truth is that the classification proposed by the congressional commission, as provided for in H. R. 8928, being the bill now before the Appropriations Committee, is based on the actual duties and responsibilities of and the qualifications for the positions. The Bureau of Efficiency scheme is a classification on the basis of the Bureau of Efficiency's idea of the value of the duties and not on the duties themselves.

Mr. KELLOGG. Mr. President, will the Senator yield?

Mr. STERLING. I announced at the beginning, if the Senator will excuse me, that I should like to proceed without interruption.

One more word regarding titles. The congressional commission realized that short titles are necessary, so that all concerned with positions can have a standard terminology in speaking of them. It wanted employees, administrators, Civil Service Commissioners, Budget authorities, Appropriations Committees, and Congress, all to have an agreed and standardized terminology, so that we may all use a common language. It proposed to substitute good titles for the existing bad titles. It appears that the Bureau of Efficiency does not want titles. It gives the impression that it prefers to work in the dark and not to let the world know what it is doing. Possibly it objects to titles because titles when properly applied let in the light.

Mr. Brown testified that in so far as he knew positions had not been allocated to classes under the general plan that has received the indorsement of the committees and the House and that no reliable estimates had been made regarding cost. Had he read intelligently and carefully the report of the congressional commission and familiarized himself with the procedure being followed by it he would have been better informed. The congressional commission tentatively allocated to classes practically all the positions in the District of Columbia which came under its jurisdiction, and it compiled elaborate statistical tables giving full information on the subject. Its printed report contained its estimates of cost on a percentage basis. The detailed tables it prepared were submitted to the committees but were not printed.

Subsequently new estimates were based on the figures compiled by the congressional commission as revisions were made in the bill, and these figures were checked by reports submitted by the department heads. No attempt has been made to have these estimates final and precise to the last figure. It has been assumed that Congress should act before the final steps are taken and that Congress should indicate its wishes respecting details. I am of the opinion that the whole matter of fixing Government salaries and dealing fairly with the Government and with the employees should not be delegated to Mr. Herbert D. Brown as Government autocrat.

A favorite assertion of Mr. Brown is that a dictionary classification, as he has been pleased facetiously to call it, has failed wherever it has been tried. The congressional commission, when it investigated the matter, did not find this to be the fact. It learned that progressive large employers, both public and private, were in increasing numbers adopting detailed duties classifications as the corner stone of good personnel administration.

At the joint hearings of the two Committees on the Civil Service this point was gone into, and witnesses familiar with the practice in other jurisdictions testified that such classifications were increasing in number. Such a classification is now recognized generally as a first step in modernizing employment procedure and general personnel administration. Curiously, Mr. Brown's own report on the Civil Service Commission abounds in evidence to show the imperative need of just such a classification as the congressional commission proposed. The improvements that have been made by the Civil Service Commission in the last few months are due largely to the publication of the classification made by the congressional commission and are mere forerunners of what we may expect when a good duties classification with uniform titles becomes operative in the service, provided Mr. Herbert D. Brown does not exercise his veto power and insist on his own classification whatever may be the wishes of Congress.

My information is that after Mr. Brown had been eliminated from the work of the congressional commission he desisted for a time from prosecuting his own scheme of classification. Possibly he had some doubts whether the appointment of a congressional commission to do the work did not by necessary implication repeal the authority given to him by earlier legislation, especially as he had failed to comply with the time elements of that authorization. Later, according to his statement before the Appropriations Committee of the House, a member of that committee authorized him to go ahead, and he began, directly and indirectly, spending thousands of dollars, his own organization's time and the time of the department officials and employees in furthering his own scheme, which would be run by the Bureau of Efficiency and thus give it an excuse for being and keep it from absorption into the Budget Bureau.

To avoid a too obvious duplication of the ground covered by the congressional commission and to get the greatest possible sanction of law for his expenditures, he has worked under the guise of establishing a system of efficiency ratings. His authority for that is in a rider on an appropriation bill. His whole bureau was brought into existence on a rider to an appropriation bill, it has been nurtured through riders, and it has no basic fundamental law covering its existence that has been carefully considered by the Congress. Mr. Good, when chairman of the Appropriations Committee of the House, after having brought about a reduction in Mr. Brown's salary from $10,000 to $7,500, his salary prior to the increase to $10,000 having been $6,000, gave it as his parting advice to the House that the Bureau of Efficiency should be merged into the Budget Bureau, thereby saving a good deal of money and wasted energy. The Congress has never had proper opportunity to consider this proposal, and if Mr. Brown can prevent it the Congress probably never will.

In passing, I should perhaps say that Mr. Good at one time was a supporter of the bureau on the floor of the House, but somehow his affections were alienated. He seemed to think that Mr. Brown had misrepresented to the Appropriations Committee the facts regarding his increase in salary. The House under Mr. Good's leadership was very insistent that the salary of the Chief of the Bureau of Efficiency should be definitely fixed, because at the rate it was rising it was threatening soon to pass out of sight. A little of the inflation was let out by Congress, and the salary was anchored at $7,500.

To come now to his efficiency scheme, as I interpret it, it embraces classification, allocation, salary standardization, and efficiency ratings—all of them. Under a rider to an appropriation act he is planning to perform administratively what some of us have had the temerity to believe were functions that properly belonged to Congress.

His classification scheme on its face, without investigation, seems like simplicity itself. He establishes 18 grades and at-

taches to each grade a salary range. Under each grade he gives a few illustrations of positions he regards as typical of that grade. When he gets an idea of the duties of a position, he puts the position into a grade. If it exactly fits the illustration, well and good. If it does not, he classifies it by analogy. He seeks the agreement of the administration, and if he gets it he is satisfied. There are those who say that he sometimes asserts he has the agreement of the administration, when in fact he has not, and from his record that does not seem entirely impossible.

Classification by analogy presents wonderful opportunities to a skillful manipulator. I understand that the accepted word is "adjustment." When things become uncomfortable in any respect, "analogy" permits "adjustment." Some critics seem to be of the opinion that "adjustments" are already more frequent in cases of upper administrative officers in a position to make vigorous objections and cause trouble than they are among the rank and file in the routine clerkships and labor positions. Inspection of the salary scale and of the administrative positions of the proposal, too, has led some people to an opinion that there has been a deliberate attempt to secure the support of upper administrative officers at the expense of the routine workers. Now, I do not allege that this is the fact, but I assert that it is entirely possible under a scheme that establishes no fundamental definition of grades and which permits classification by analogy. I would go further and say that with human nature as it is and the Government service what it is, a one-man classification by analogy is likely to result in "adjustments." If this system goes into effect it is easy to predict for the word "adjustment" a future in the public service which will be second only to that enjoyed by "influence," and there will then be the two partners, "influence" and "adjustment." Consider the "influence" that could be exerted for "adjustment" by the persons whose backing should enable the one-man Bureau of Efficiency to put through such a device. A bipartisan commission of three, with a reputation for judicial procedure and integrity, would not ordinarily be intrusted with such power, but would be bound by fundamental controlling definitions. To permit such a scheme as the Bureau of Efficiency proposes to put in practice would be indefensible, regardless of the personality and reputation of the man at the head of the bureau that is to administer it.

The salary scale in the Bureau of Efficiency proposal is its own handiwork. The Reclassification Commission proposed to show the Congress what the salary would be for each of the more than 1,700 classes of positions it found in the service and to get congressional approval for them. The Bureau of Efficiency proposes to go to the other extreme, and not to bother Congress about the salaries at all. It will fix the whole matter up quietly, without any fuss and feathers by "adjustments" with administrative officers; and all this, Mr. President, plainly appears from the quotation I made from the article in the Washington Star at the beginning of my remarks. Why let Congress as a whole pass on such an item, all-important though it be, when entire authority over the whole matter can be vested in the United States Bureau of Efficiency, at least so long as it is continued under its present head?

The salary scale on its face appears reasonably generous to upper administrative officers, but somewhat niggardly in dealing with the rank and file. We say "on its face," because the Brown efficiency rating system has a joker in it whereby for the rank and file of employees the upper salary rates in his salary scale are for bait rather than for realization.

Under his efficiency scheme an employee's salary rate within the range prescribed for the grade to which his position is allocated will depend on his efficiency rating; but, Mr. President, there is a distinction. It will not necessarily depend on his efficiency. It is here that the extreme ingenuity of the Chief of the United States Bureau of Efficiency becomes apparent. He has devised a three-cup game of "now you see it and now you don't," whereby while we are all talking about rewarding the efficient Government employee according to his efficiency Mr. Brown gets our eye on an efficiency rating and ends up with the average employee of the lower ranks at or below the middle of his grade, regardless of the efficiency of the average employee. We are mesmerized for a moment in a sort of haze of quantity, quality, percentages, and standards; but we come to at the end when on further study we are aroused to the fact that Mr. Brown has safely kept the average salary from rising, regardless of the efficiency of the employees.

The trick is done by having the standard for measuring the quantity of work done by employees, working in groups of five or more of one grade under a single supervisor, made out of rubber or any other sufficiently elastic material so that it will stretch. If the employees begin to get so efficient that there is some danger of the average salary for the group getting above the middle rate for the average, all you have to do is to stretch the standard and they are safely back where they started. Now and then one employee peculiarly efficient may be permitted to reach the upper rates, but it will be at the expense of others in the group, who will fall a corresponding distance below the average.

Figures, percentages, averages in the hands of so experienced an efficiency expert as the Chief of the United States Bureau of Efficiency furnish, of course, the necessary elastic medium for a standard. In his book of rules for the system, circular No. 4—a pamphlet which was referred to the Committee on Civil Service for consideration along with Executive orders and legislation relating to the Bureau of Efficiency and for consideration also in connection with reclassification but a few days ago—in his book of rules for the system, in paragraph 30, he provides for an appropriate test to determine that the standard has been stretched to just the proper length so that the average quantity rating for the group will not exceed 100 per cent. The quality rating can not exceed 100 per cent, and therefore the product of the two can not give an efficiency rating over a hundred, and a rating of 100 puts the employees at the middle salary for the grade.

Mr. President, some of us seem to belong to a school of thought or of ethics very different from the one of which Mr. Brown is an exponent. To us a standard is something fixed and uniform and not something which will vary from department to department, from bureau to bureau, from office to office, and from time to time. To us the ideals of equal pay for equal work, payment on the basis of efficiency, and justice alike to the Government and to the employees are something more than mere phrases.

Mr. President, I am unable to sit quietly by while a scheme is established without consulting Congress which provides for classification by analogy, allocation by adjustment, and efficiency measurement by a variable instead of a standard. As chairman of the Civil Service Committee, a committee that has worked faithfully in the consideration of the various reclassification measures that have been referred to it, that has been in close touch with the Civil Service Committee of the House and its able chairman, Mr. LEHLBACH; that has given attention to the work and the report of the Joint Reclassification Commission; that has consulted well-recognized experts in reclassification and personnel problems, and having no other interest than the good of the service at heart, and feeling, I think, the full weight of my responsibility in this most important matter, I most earnestly protest against these or any further attempts upon the part of the head of the Bureau of Efficiency to carry out a scheme which, I believe, is bound to prove unsatisfactory to the Government, the heads of departments, and unjust to employees—and, so proving, it will be detrimental to the public welfare.

Mr. President, I send to the desk a resolution which I ask to have read, and then I shall ask unanimous consent for its present consideration.

The VICE PRESIDENT. The Secretary will read the resolution.

The reading clerk read the resolution (S. Res. 297), as follows:

Resolved, That the Senate Committee on Civil Service be, and it is hereby, authorized and directed to investigate and report upon the activities, methods, and procedure of the United States Bureau of Efficiency in devising and installing a system or systems of classification of positions, salary standardization, and efficiency rating in the Federal service, and upon the activities of said bureau, its chief, or any of his assistants, in opposing pending legislation on these subjects (H. R. 8928), which has passed the House of Representatives, has been favorably reported with amendments by the Senate Committee on Civil Service, and has been referred to the Committee on Appropriations.

Mr. STERLING. I ask unanimous consent for the immediate consideration of the resolution just read.

The VICE PRESIDENT. Is there objection?

Mr. SMOOT. I object to its present consideration.

Mr. STERLING. Then, I ask that it may lie on the table.

The VICE PRESIDENT. The resolution will go over, under the rule.

THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

Mr. McCUMBER. Mr. President, I ask that we return to page 39, paragraph 217, for the purpose of acting upon some committee amendments.

Mr. CALDER. Mr. President, will the Senator from North Dakota yield so that I may call up House bill 9527, providing for the extension of bank charters?

Mr. McCUMBER. Let us dispose of this paragraph first, if the Senator will allow me to proceed.

Mr. CALDER. Very well.

The VICE PRESIDENT. The Secretary will state the amendment.

The READING CLERK. In paragraph 217, on page 39, line 11, the committee proposes to strike out "28" and insert in lieu thereof "50," so as to make the proviso read:

Provided, That none of the above articles shall pay a less rate of duty than 50 per cent ad valorem.

Mr. McCUMBER. The committee amendment proposes to raise the limit from 28 per cent ad valorem to 50 per cent ad valorem. I ask that the Senate shall disagree to the committee amendment, and then I shall ask that the lines including the words "that none of the above articles shall pay a less rate of duty than 28 per cent ad valorem" be stricken out.

Mr. SIMMONS. Mr. President, I was temporarily out of the Chamber when the consideration of the tariff bill was resumed. I would like to inquire of the Senator what paragraph he is referring to?

Mr. McCUMBER. It will be found on page 39 of the bill, paragraph 217.

Mr. SIMMONS. The Senator desires to recede from the committee amendment making the rate 50 per cent?

Mr. McCUMBER. First, I shall ask that the Senate disagree to the committee amendment proposed on line 11, whereby 28 per cent is changed to 50 per cent. That will leave the rate 28 per cent. If that amendment is disagreed to, as I request, I shall then ask that the entire provision be stricken out, so that there will be no limitation.

Mr. SIMMONS. I have no objection at all to changing the rate from 50 to 28.

Mr. WATSON of Georgia and Mr. JONES of New Mexico rose.

Mr. McCUMBER. I think Senators will have no objection to reducing the rate from 50 to 28. Then I shall move to strike out the entire proviso.

Mr. SIMMONS. After the rate is reduced from 50 to 28, of course there will be a vote on whether we shall adopt 28 per cent?

Mr. McCUMBER. Yes; but I think no one will object to my suggestion.

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was rejected.

Mr. McCUMBER. That leaves the proviso to read:

Provided, That none of the above articles shall bear a less rate of duty than 28 per cent ad valorem.

We have fixed the rate by specific duties, and that action will cut out the provision that it shall not be less than 28 per cent. So if the specific duty is less than 28 per cent, the specific duty, of course, will govern.

Mr. SIMMONS. What is the specific duty?

Mr. McCUMBER. There are several of them. I read:

Plain green or colored, molded or pressed, and flint, lime, or lead glass bottles, vials, jars, and covered or uncovered demijohns, and carboys, any of the foregoing, filled or unfilled, not specially provided for, and whether their contents be dutiable or free (except such as contain merchandise subject to an ad valorem rate of duty, or to a rate of duty based in whole or in part upon the value thereof, which shall be dutiable at the rate applicable to their contents), shall pay duty as follows: If holding more than one pint, 1 cent per pound; if holding not more than one pint and not less than one-fourth of a pint, 1½ cents per pound; if holding less than one-fourth of a pint, 50 cents per gross.

Mr. SIMMONS. I now understand what the Senator's proposition is. I did not at first. The Senator proposes to cut the ad valorem rate out and leave the specific rate.

Mr. McCUMBER. That is correct.

The VICE PRESIDENT. The question is on agreeing to the amendment striking out the proviso as amended.

The amendment was agreed to.

The VICE PRESIDENT. The Secretary will state the next amendment of the committee to paragraph 217.

The next amendment was, on page 39, line 14, to strike out the word "as" after the word "use."

The amendment was agreed to.

The next amendment was, on page 39, line 15, after the word "employed," to strike out the words "as containers."

The amendment was agreed to.

The next amendment was, on page 39, line 17, to strike out the word "operations" and to insert the words "operations, and not to include bottles for table service and thermostatic bottles."

The amendment was agreed to.

Mr. WATSON of Georgia. Mr. President, some weeks ago——

Mr. McLEAN. Mr. President, I wonder if the Senator from Georgia heard the request of the Senator from New York [Mr. CALDER] that he be allowed to call up House bill 9527, extending bank charters?

Mr. WATSON of Georgia. I have just been in conference with the Senator from New York, and he very courteously agreed to give way to me for a few moments.

Mr. McLEAN. Very well.

EUROPEAN RELIEF EXPENDITURES.

Mr. WATSON of Georgia. Mr. President, some weeks ago, while we were debating the new judgeship bill, the senior Senator from Tennessee [Mr. SHIELDS] read into the record a letter he had received from Mr. Wayne B. Wheeler, of the Anti-Saloon League. The Senator also read his reply to it, and proceeded to make some comments of an explanatory or interpretative character.

When subsequently a request was made by the junior Senator from Wisconsin [Mr. LENROOT] to place the Wayne B. Wheeler letter in the RECORD, I thought it was simply a matter of fairness to the Senator from Tennessee and to myself that Senator SHIELDS's answer to Mr. Wheeler's letters, together with his comment, should all go in together, so that the RECORD would present to the country exactly what had happened and the people could see whether or not the construction placed on the letter by me, and apparently by Senator SHIELDS, was justified.

I did not unconditionally object to the putting in of the letter of Mr. Wheeler. I have never in any case made an objection purely obstructive. My objection was conditional, and my consent would have been given had the Senator from Wisconsin been willing that Senator SHIELDS's reply to Mr. Wheeler's letter, and his comment upon it, should also have gone into the RECORD, so that the whole thing would have been connectedly presented. So much for that.

My conduct on that occasion was alleged as an excuse for what I took to be a discourtesy yesterday in reading into the record a letter from Mr. Herbert Hoover. In that letter Mr. Hoover said:

Wherever these asssociations have handled funds belonging to the United States Government, the whole of the accounts and vouchers have of necessity been deposited in the United States Treasury in order to obtain payment of appropriations. As a matter of fact, a large part of these accounts have actually been reprinted in the CONGRESSIONAL RECORD itself.

I made objection to the publication of that letter until I could make some comment upon it myself. My statement had been as follows:

Herbert Hoover has never published in America the vouchers and statements of the vast sums of money that he has been handling.

It will be noticed that I used the words "statements and vouchers," and every lawyer and layman who heard me must have been conscious of the fact that I was taking the legal view of it and was speaking of such a statement as would be rendered by a guardian, an administrator, an executor, a trustee, a receiver, an assignee. In fact, almost every person intrusted with funds belonging to others is required by law to publish an itemized statement accompanied by vouchers sustaining it. That is exactly what I had in mind, and that is why I said that no such statement and vouchers had ever been published by Mr. Hoover.

With a supreme air of triumph the Senator from Wisconsin [Mr. LENROOT] held in his hands certain documents which he said proved that Mr. Hoover had done what I said he had not done, and he sent them to my desk asking that if upon examination I found that my statement was incorrect I would make the correction. That I promised to do.

Last night I examined these documents, and I must say that I feel some doubt now as to whether they have been examined by the Senator from Wisconsin [Mr. LENROOT].

They do not at all contradict my statement. There are no itemized statements. There are no vouchers here. There are no pay rolls or salary lists. Only one person out of all of the great numbers employed is mentioned by official designation and his salary given. These documents form no part of the CONGRESSIONAL RECORD. As yet no one has cited that part of the CONGRESSIONAL RECORD which contains any statements or vouchers or itemized accounts of Mr. Hoover. As yet no one has mentioned any newspaper that has published such statements, accounts, or vouchers which any lawyer would know ought to be itemized.

These statements, however, do contain astonishing information. They show that Mr. Hoover had the handling of the vastest sums of money ever handled by any one man in the history of the world. The sums are almost incredible. No emperor, no king, no Crœsus, no King Solomon, no bonanza king, no American millionaire, ever handled such vast sums

as were put in the hands of Mr. Hoover. I crave the indulgence of the Senate while I recite a few of the facts appearing in these reports.

Administration and general expenses to the 17th of June, 1920: London, $665,000; New York, $1,778,000; Rotterdam, $553,000; Brussels, $524,000; National Committee for Relief in Belgium, expenses and cash advances, $211,000; Lille, $28,000; Antwerp, $84,000; making the expense account of administration nearly $4,000,000, and no reference is made as to where the items or the vouchers could be found. The loss on furniture, fittings, and motor cars is put at $25,000—no items given.

I did not say that he has no vouchers. My statement was that he had not published any. I did not say that he had no itemized statement. What I said was that he had not published any. As yet my statement has not been disproved.

This account seems to show that Mr. Hoover had from $400,000,000 to $600,000,00 every year during the whole period of time he was in charge of the European work. The sums are simply staggering.

Here is the summary of the expenses of administration and general expense:

London office	$665,400.28
New York office	1,778,460.69
Rotterdam	553,223.35
Brussels	524,376.00
Paris	36,121.00
National committee	211,539.00
Lille	28,192.00
Antwerp	84,156.00

Who got the salaries? Who were on the pay roll, what men and what women? What did each get and what services did they render? Have the American people no right to know? Have the charitable individuals, societies, State and Federal Governments no right to know?

Here is a statement on page 62:

Transport expenditures, $165,239,023.32.

In London:

Accountants' charges	$81,274
Printing and stationery	78,313
Cables and postage	77,426
Office rent	38,597
Traveling expenses	26,988
General expenses	56,470
Press salaries and expenses	3,291
Salaries and wages	293,978
Clothing expenses	2,131

Making total expenses of the London office, $665,400.28.

Now, Mr. President, how did they expend $78,000 in printing? What did they print? Who got all these salaries, and what is meant by "press salaries"? Should not the people who gave this money know where it went and how such a large sum was expended in London as $665,000?

Here is New York City:

Clothing and campaign expenses.

What is meant by campaign expenses? We have no information, but the campaign to get clothing for the European needy cost this fund $882,572. Who got the money, and what service was rendered? In what sort of work did the campaign consist? Who were the campaigners? Who were the men and women who got the salaries, and how much did each get?

Here is the next item:

Salaries and wages, $490,878.

Adding these two together we have considerably more than $1,300,000 for salaries, wages, and campaign expenses. Then:

General expenses not itemized	$139,513
Cables, telegrams, and postage	74,609
Press expenses	40,783

What were those press expenses? What is meant by that?

Accountants' and auditors' fees	$35,250
Traveling expenses	35,427
Stationery and printing	20,689

Then I come again to Belgium, at Rotterdam:

Salaries and wages	$287,722
Clothing department	76,000
Traveling expenses	44,552
General expenses	35,696
Motor-car expenses	9,515
Press expenses	1,011

What is meant by press expenses?

Then we come to Brussels, Belgium:

Delegates' expenses	$219,936.79

What is meant by that, Mr. President? I would really like information on the subject. What delegates were these, and why did they have to have expenses and salaries out of these charity funds?

Motor-car expenses	$153,316.00
Salaries	63,400.00
Traveling expenses	24,694.77
General expenses	28,000.00
Printing and stationery	10,529.00
Telegrams and cables	895.00

Now, let us take page 98:

Circulars, stationery, and printing	$93,434
Secretary's salary, 31st of May, 1919	23,377

As I said, he is the only officer designated in these accounts and even his name is not given, although I suppose it could be found by examining some other part of the report.

Secretary's traveling expenses	$3,847
Clerical assistance	7,597
Flags, etc	2,760
Cables	1,470
Sundries	1,257
Telephone	1,019
Press cuttings	904

For clippings out of newspapers—eulogistic of Mr. Hoover and his work, no doubt—$904 is charged up to the charity fund.

Under the heading "Lille office working account," I quote the following:

Delegates	$6,176.62
Motor car	6,066.04
Office salaries and wages	5,636.99
General expenses	1,617.45
Traveling and hotel	3,277.17

Staff house—

Whatever that may mean—

$2,177.60; office expenses, $1,365.23.

Under the heading "Antwerp office expenses" appear the following items:

Salaries	$34,431.08
Clothing department expenses	22,706.48
Auto expenses	7,907.30
Delegate's allowances	5,686.38
Stationery and printing	5,109.52
General expenses	5,359.78
Traveling expenses	1,430.59

At Rotterdam there is an item for motor cars of $16,586.15, and so on throughout the report. There is not a single itemized statement, not a single voucher; and no reference is made, so far as I can see, to where one could find either the itemized statements or the vouchers.

I have read enough, Mr. President, to accomplish my purpose, which was to show that no such statement, accompanied with vouchers, as the law invariably requires of those acting in a fiduciary capacity and handling trust funds, has been filed in connection with these accounts.

EXTENSION OF CHARTERS OF NATIONAL BANKS.

Mr. CALDER obtained the floor.

Mr. McCUMBER. Mr. President, the Senator from New York [Mr. CALDER] is a member of the Finance Committee, and I am going to leave it to his own good judgment as to whether he thinks we ought to sandwich in between these extraneous matters a little consideration of the tariff bill.

Mr. CALDER. The bill for which I desire to ask consideration will, I think, meet with no objection. I think we can complete its consideration in a moment or two.

Mr. President, the Committee on Banking and Currency on May 27 reported unanimously House bill 9527, which proposes to extend the charters of national banks. I ask unanimous consent for the present consideration of the bill.

The PRESIDING OFFICER (Mr. WILLIS in the chair). The Senator from New York asks unanimous consent for the present consideration of a bill, the title of which will be stated by the Secretary.

The ASSISTANT SECRETARY. A bill (H. R. 9527) to amend section 5136, Revised Statutes of the United States, relating to corporate powers of associations, so as to provide succession thereof until dissolved, and to apply said section as so amended to all national banking associations.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

Mr. WATSON of Georgia. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The absence of a quorum being suggested, the Secretary will call the roll.

The roll was called, and the following Senators answered to their names:

Borah	Harris	Newberry	Spencer
Broussard	Harrison	Norris	Sterling
Calder	Jones, N. Mex.	Oddie	Sutherland
Capper	Jones, Wash.	Page	Townsend
Caraway	Kellogg	Pepper	Underwood
Culberson	Kendrick	Poindexter	Wadsworth
Curtis	Keyes	Pomerene	Walsh, Mass.
Dial	Ladd	Ransdell	Warren
du Pont	La Follette	Rawson	Watson, Ga.
Edge	McCumber	Robinson	Watson, Ind.
France	McKinley	Sheppard	Williams
Frelinghuysen	McLean	Shortridge	Willis
Gerry	McNary	Simmons	
Glass	Nelson	Smith	
Hale	New	Smoot	

Mr. UNDERWOOD. I desire to take this opportunity to announce the absence of the senior Senator from Florida [Mr. FLETCHER] on account of sickness, and to say that he is paired with the Senator from Delaware [Mr. BALL]. I ask that this announcement may stand for the day.

The PRESIDING OFFICER. Fifty-seven Senators having answered to their names, a quorum of the Senate is present. Is there objection to the request of the Senator from New York for the present consideration of the bill named by him?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 9527) to amend section 5136, Revised Statutes of the United States, relating to corporate powers of associations, so as provide succession thereof until dissolved, and to apply said section as so amended to all national banking associations, which had been reported from the Committee on Banking and Currency with amendments, in line 6, after the word "have," to strike out "perpetual"; in the same line, after the word "until," to insert "99 years from July 1, 1922, or from the date of its organization if organized after July 1, 1922, unless"; in line 9, before the word "dissolved," to insert the word "sooner"; in line 10, after the word "stock," to insert the word "or"; on page 2, line 1, after the word "by," to strike out "the provision of"; and in the same line, after the word "Congress," to strike out "hereinafter" and insert "hereafter"; so as to make the bill read:

Be it enacted, etc., That section 5136 of the Revised Statutes of the United States be amended so that the paragraph therein designated as "Second" shall read as follows:

"Second. To have succession until 99 years from July 1, 1922, or from the date of its organization if organized after July 1, 1922, unless it shall be sooner dissolved by the act of its shareholders owning two-thirds of its stock, or unless its franchise shall become forfeited by reason of violation of law, or unless it shall be terminated by act of Congress hereafter enacted."

SEC. 2. That all acts or parts of acts providing for the extension of the period of succession of national banking associations for 20 years are hereby repealed, and the provisions of paragraph 2 of section 5136, Revised Statutes, as herein amended shall apply to all national banking associations now organized and operating under any law of the United States.

The amendments were agreed to.

The bill was reported to the Senate as amended and the amendments were concurred in.

The amendments were ordered to be engrossed, and the bill to be read a third time.

The bill was read the third time and passed.

The title was amended so as to read: "An act to amend section 5136, Revised Statutes of the United States, relating to corporate powers of associations, so as to provide succession thereof for a period of 99 years or until dissolved, and to apply said section as so amended to all national banking associations."

NEW YORK-NEW JERSEY PLAN OF PORT DEVELOPMENT.

Mr. EDGE. Mr. President, in order that the States of New York and New Jersey may be permitted to carry out a very large and comprehensive plan for port development, it becomes necessary for Congress to adopt a permissive act giving them that privilege. I ask unanimous consent for the immediate consideration of Senate Joint Resolution 171, which has been favorably reported by the Committee on the Judiciary, with three slight amendments.

The PRESIDING OFFICER. Is there objection to the present consideration of the joint resolution which the Secretary will report?

Mr. HARRISON. Let it be reported.

The ASSISTANT SECRETARY. Senate Joint Resolution 171, granting consent of Congress and authority to the Port of New York Authority to execute the comprehensive plan approved by the States of New York and New Jersey by chapter 43, Laws of New York, 1922, and chapter 9, Laws of New Jersey, 1922.

The PRESIDING OFFICER. Is there objection to the present consideration of the joint resolution?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the joint resolution, which had been reported from the Committee on the Judiciary with amendments.

The amendments were, on page 10, line 6, to strike out "subject matter" and insert "matters"; on the same line to strike out "of" and insert "covered by"; on line 9 to strike out "and any modifications thereof"; and on line 15, after the word "agreement," to insert: "*Provided further*, That no bridges, tunnels, or other structures shall be built across, under, or in any of the waters of the United States, and no change shall be made in the navigable capacity or condition of any of such waters until the plans therefor have been approved by the Chief of Engineers and the Secretary of War," so as to make the joint resolution read:

Whereas, pursuant to the agreement or compact entered into by the States of New York and New Jersey under date of April 30, 1921, and consented to by the Congress of the United States by resolution signed by the President on the 23d day of August, 1921, the two States have agreed upon a comprehensive plan for the development of the port of New York, embraced in statutes duly enacted by the two States in form following, that is to say:

"SECTION 1. Principles to govern the development:

"First. That terminal operations within the port district, so far as economically practicable, should be unified.

"Second. That there should be consolidation of shipments at proper classification points so as to eliminate duplication of effort, inefficient loading of equipment, and realize reduction in expenses.

"Third. That there should be the most direct routing of all commodities, so as to avoid centers of congestion, conflicting currents, and long truck hauls.

"Fourth. That terminal stations established under the comprehensive plan should be union stations, so far as practicable.

"Fifth. That the process of coordinating facilities should, so far as practicable, adapt existing facilities as integral parts of the new system, so as to avoid needless destruction of existing capital investment and reduce so far as may be possible the requirements for new capital; and endeavor should be made to obtain the consent of local municipalities within the port district for the coordination of their present and contemplated port and terminal facilities with the whole plan.

"Sixth. That freight from all railroads must be brought to all parts of the port wherever practicable without cars breaking bulk, and this necessitates tunnel connection between New Jersey and Long Island, and tunnel or bridge connections between other parts of the port.

"Seventh. That there should be urged upon the Federal authorities improvement of channels, so as to give access for that type of waterborne commerce adapted to the various forms of development which the respective shore fronts and adjacent lands of the port would best lend themselves to.

"Eighth. That highways for motor-truck traffic should be laid out so as to permit the most efficient interrelation between terminals, piers, and industrial establishments not equipped with railroad sidings and for the distribution of building materials and many other commodities which must be handled by trucks; these highways to connect with existing or projected bridges, tunnels, and ferries.

"Ninth. That definite methods for prompt relief should be devised which can be applied for the better coordination and operation of existing facilities while larger and more comprehensive plans for future development are being carried out.

"SEC. 2. The bridges, tunnels, and belt lines forming the comprehensive plan are generally and in outline indicated on maps filed by the Port of New York Authority in the offices of the secretaries of the States of New York and New Jersey, and are hereinafter described in outline.

"SEC. 3. Tunnels and bridges to form part of the plan: (a) A tunnel or tunnels connecting the New Jersey shore and the Brooklyn shore of New York to provide through-line connection between the transcontinental railroads now having their terminals in New Jersey with the Long Island Railroad and the New York connecting railroad on Long Island, and with the New York Central and Hudson River Railroad and the New York, New Haven & Hartford Railroad in the Bronx, and to provide continuous transportation of freight between the Queens, Brooklyn, and Bronx sections of the port to and from all parts of the westerly section of the port for all of the transcontinental railroads. (b) A bridge and/or tunnel across or under the Arthur Kill, and/or the existing bridge enlarged to provide direct freight carriage between New Jersey and Staten Island. (c) The location of all such tunnels or bridges to be at the shortest, most accessible, and most economical points practicable, taking account of existing facilities now located within the port district and providing for and taking account of all reasonably foreseeable future growth in all parts of the district.

"SEC. 4. Manhattan service: The island of Manhattan to be connected with New Jersey by bridge or tunnel, or both, and freight destined to and from Manhattan to be carried underground, so far as practicable by such system, automatic electric as hereinafter described or otherwise, as will furnish the most expeditious, economical, and practicable transportation of freight, especially meat, produce, milk, and other commodities comprising the daily needs of the people. Suitable markets, union inland terminal stations, and warehouses to be laid out at points most convenient to the homes and industries upon the island, the said system to be connected with all the transcontinental railroads terminating in New Jersey and by appropriate connection with the New York Central & Hudson River Railroad, the New York, New Haven & Hartford, and the Long Island Railroads.

"SEC. 5. Belt lines: The numbers hereinafter used correspond with the numbers which have been placed on the map of the comprehensive plan to identify the various belt lines and marginal railroads.

"No. 1, middle belt line: Connects New Jersey and Staten Island and the railroads on the westerly side of the port with Brooklyn, Queens, the Bronx, and the railroads on the easterly side of the port. Connects with the New York Central Railroad in the Bronx; with the New York, New Haven & Hartford Railroad in the Bronx; with the Long Island Railroad in Queens and Brooklyn; with the Baltimore & Ohio Railroad near Elizabethport and in Staten Island; with the Central Railroad Co. of New Jersey at Elizabethport and at points in Newark and Jersey City; with the Pennsylvania Railroad in Newark and Jersey City; with the Lehigh Valley Railroad in Newark and Jersey City; with the Delaware, Lackawanna & Western Railroad in Jersey City and the Secaucus meadows; with the Erie Railroad in Jersey City and the Secaucus meadows; with the New York, Susquehanna & Western, the New York, Ontario & Western, and the West Shore Railroads on the westerly side of the Palisades above the Weehawken Tunnel.

"The route of the middle belt line, as shown on said map, is in general as follows: Commencing at the Hudson River at Spuyten Duyvil, running easterly and southerly generally along the easterly side of the Harlem River, utilizing existing lines so far as practicable and improving and adding where necessary, to a connection with Hell Gate Bridge and the New Haven Railroad, a distance of approximately 7 miles; thence continuing in a general southerly direction, utilizing existing lines and improving and adding where necessary, to a point near Bay Ridge, a distance of approximately 18½ miles; thence by a new tunnel under New York Bay in a northwesterly direction to a portal in Jersey City or Bayonne, a distance of approximately 5 miles, to a connection with the tracks of the Pennsylvania and Lehigh Valley Railroads; thence in a generally northerly direction along the easterly side of Newark Bay and the Hackensack River at the westerly foot of the Palisades, utilizing existing tracks and improving and adding where necessary, making connections with the Jersey Central; Pennsylvania; Lehigh Valley; Delaware, Lackawanna & Western; Erie; New York, Susquehanna & Western; New York, Ontario & Western; and West Shore Railroads, a distance of approximately 10 miles. From the westerly portal of the Bay Tunnel and from the line along the easterly side of

Newark Bay by the bridges of the Central Railroad of New Jersey (crossing the Hackensack and Passaic Rivers) and of the Pennsylvania and Lehigh Valley Railroads (crossing Newark Bay) to the line of the Central Railroad of New Jersey, running along the westerly side of Newark Bay, and thence southerly along this line to a connection with the Baltimore & Ohio Railroad south of Elizabethport, utilizing existing lines so far as practicable and improving and adding where necessary, a distance of approximately 12 miles; thence in an easterly direction crossing the Arthur Kill, utilizing lines so far as practicable and improving and adding where necessary, along the northerly and easterly shores of Staten Island to the new city piers and to a connection, if the city of New York consent thereto, with the tunnel under the Narrows to Brooklyn, provided for under chapter 700 of the laws of the State of New York for 1921.

"No. 2: A marginal railroad to The Bronx extending along the shore of the East River and Westchester Creek, connecting with the middle belt line (No. 1) and with the New York, New Haven & Hartford Railroad in the vicinity of Westchester.

"No. 3: A marginal railroad in Queens and Brooklyn extending along Flushing Creek, Flushing Bay, the East River, and the upper New York Bay. Connects with the middle belt line (No. 1) by lines No. 4, No. 5, No. 6, and directly at the southerly end at Bay Ridge. Existing lines to be utilized and improved and added to and new lines built where lines do not now exist.

"No. 4: An existing line to be improved and added to where necessary. Connects the middle belt line (No. 1) with the marginal railroad (No. 3) near its northeasterly end.

"No. 5: An existing line to be improved and added to where necessary. Connects the middle belt line (No. 1) with the marginal railroad (No. 3) in Long Island City.

"No. 6: Connects the middle belt line (No. 1) with the marginal railroad (No. 3) in the Greenpoint section of Brooklyn. The existing portion to be improved and added to where necessary.

"No. 7: A marginal railroad surrounding the northerly and westerly shores of Jamaica Bay. A new line. Connects with the middle belt line (No. 1).

"No. 8: An existing line to be improved and added to where necessary. Extends along the southeasterly shore of Staten Island. Connects with middle belt line (No. 1).

"No. 9: A marginal railroad extending along the westerly shore of Staten Island and a branch connection with No. 8. Connects with the middle belt line (No. 1) and with a branch from the outer belt line (No. 15).

"No. 10: A line made up mainly of existing lines, to be improved and added to where necessary. Connects with the middle belt line (No. 1) by way of marginal railroad No. 11. Extends along the southerly shore of Raritan Bay and through the territory south of the Raritan River reaching New Brunswick.

"No. 11: A marginal railroad extending from a connection with the proposed outer belt line (No. 15) near New Brunswick along the northerly shore of the Raritan River to Perth Amboy; thence northerly along the westerly side of the Arthur Kill to a connection with the middle belt line (No. 1) south of Elizabethport. The portion of this line which exists to be improved and added to where necessary.

"No. 12: A marginal railroad extending along the easterly shore of Newark Bay and the Hackensack River and connects with the middle belt line (No. 1). A new line.

"No. 13: A marginal railroad extending along the westerly side of the Hudson River and the upper New York Bay. Made up mainly of existing lines—the Erie Terminals, Jersey Junction, Hoboken Shore, and National Dock Railroads. To be improved and added to where necessary. To be connected with middle belt line (No. 1).

"No. 14: A marginal railroad connecting with the middle belt line (No. 1) and extending through the Hackensack and Secaucus Meadows.

"No. 15: An outer belt line extending around the westerly limits of the port district beyond the congested section. Northerly terminus on the Hudson River at Piermont. Connects by marginal railroads at the southerly end with the harbor waters below the congested section. By spurs connects with the middle belt line (No. 1) on the westerly shore of Newark Bay and with the marginal railroad on the westerly shore of Staten Island (No. 9).

"No. 16: The automatic electric system for serving Manhattan Island. Its yards to connect with the middle belt line and with all the railroads of the port district. A standard-gauge underground railroad deep enough in Manhattan to permit of two levels of rapid-transit subways to pass over it. Standard railroad cars to be brought through to Manhattan terminals for perishables and food products in refrigerator cars. Cars with merchandise freight to be stopped at its yards. Freight from standard cars to be transferred onto wheeled containers, thence to special electrically propelled cars, which will bear it to Manhattan. Freight to be kept on wheels between the door of the standard freight car at the transfer point and the tailboard of the truck at the Manhattan terminal or the store door, as may be elected by the shipper or consignee, eliminating extra handling. Union terminal stations to be located on Manhattan in zones as far as practicable of equal trucking distance, as to pickups and deliveries, to be served by this system. Terminals to contain storage space and space for other facilities, the system to bring all the railroads of the port to Manhattan.

"SEC. 6. The determination of the exact location, system, and character of each of the said tunnels, bridges, belt lines, approaches, classification yards, warehouses, terminals, or other improvements shall be made by the port authority after public hearings and further study, but in general the location thereof shall be as indicated upon said map, and as herein described.

"SEC. 7. The right to add to, modify, or change any part of the foregoing comprehensive plan is reserved by each State, with the concurrence of the other."

Whereas the carrying out and executing of the said plan will the better promote and facilitate commerce between the States and between the States and foreign nations and provide better and cheaper transportation of property and aid in providing better postal, military, and other services of value to the Nation: Therefore be it

Resolved, etc., That subject always to the approval of the officers and agents of the United States as required by acts of Congress touching the jurisdiction and control of the United States over the matters, or any part thereof, covered by this resolution, the consent of Congress is hereby given to the carrying out and effectuation of said comprehensive plan, and the said Port of New York Authority is authorized and empowered to carry out and effectuate the same: *Provided*, That nothing herein contained shall be construed as impairing or in any manner affecting any right or jurisdiction of the United States in and over the region which forms the subject of said agreement: *Provided further* That no bridges, tunnels, or other structures shall be built across, under, or in any of the waters of the United States, and no change shall be made in the navigable capacity or condition of any such waters until the plans therefor have been approved by the Chief of Engineers and the Secretary of War.

SEC. 2. That the right to alter, amend, or repeal this resolution is hereby expressly reserved.

Mr. ROBINSON. Mr. President, this seems to be quite a voluminous measure, and I think the Senate ought to be given an opportunity to understand its purposes and effect. There are several pages of preamble.

Mr. EDGE. If the Senator from Arkansas will permit me, I did not want to take the time of the Senate from the consideration of the tariff bill.

Mr. ROBINSON. But, Mr. President, the Senator has taken the time of the Senate from the consideration of the tariff bill by asking unanimous consent for the consideration of this measure; and I do not think anyone here, except, perhaps, the Senator from New Jersey and some other Senators who may have had an opportunity of familiarizing themselves with it, understands the purposes of this joint resolution. There are nine pages of preamble to the joint resolution, appearing to present a large number of facts which make its passage necessary. What I want to know is the purposes and effect of the joint resolution. I have not had an opportunity of reading it, and it has not been read.

Mr. EDGE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Arkansas yield to the Senator from New Jersey?

Mr. ROBINSON. Certainly.

Mr. EDGE. I shall be very glad to explain the joint resolution in a very few moments.

The recitals to which the Senator refers are the recitals of the projects which the two States hope to carry out. The joint resolution provides for absolutely no appropriation from the Government. It does not contemplate any appropriation from the Government. Under Federal laws, the War Department must give permission for the improvement of navigable waters. They have gone over this joint resolution very carefully and have suggested two or three slight amendments, and the Committee on the Judiciary have reported the measure favorably with those slight amendments. The long joint resolution is merely, as stated, a recital of what these two States hope to put into effect; and the Senator will notice that at the end of the joint resolution it is provided that if in any way, at any time, any of these projects do not meet the approval of the Government, the two States are prohibited from carrying them out. It means the expenditure of eight or ten million dollars to try to enlarge and increase the facilities of the port of New York, not only for the benefit of that section of the country, but, I think it will be agreed, for the benefit of the entire country.

The coming to Congress is merely a perfunctory matter growing out of the fact that the States are prohibited from going into any interstate development without congressional permission. That is all that the joint resolution contemplates. The Committee on the Judiciary have undoubtedly investigated, as their responsibility entails, any privilege that might be granted by the passage of this joint resolution; and, as I have stated, the War Department has sent in its report in every way approving the joint resolution, with slight amendments.

Mr. ROBINSON. The joint resolution appears to be designed to carry out an agreement entered into between the States of New Jersey and New York for a comprehensive scheme of development and improvement in which the States are jointly interested.

Mr. EDGE. That is it exactly. The two States have entered into a treaty already, which has been ratified by the legislature of each State.

Mr. ROBINSON. I have no objection to the passage of the measure.

The PRESIDING OFFICER. The question is on agreeing to the amendments of the committee.

The amendments were agreed to.

The joint resolution was reported to the Senate as amended, and the amendments were concurred in.

The joint resolution was ordered to be engrossed for a third reading, read the third time, and passed.

The preamble was agreed to.

POTEAU RIVER DAM, ARK.

Mr. CARAWAY. I ask unanimous consent, out of order, to report back favorably from the Committee on Commerce Senate bill 3416, to permit the city of Fort Smith, Sebastian County, Ark., to erect or cause to be erected a dam across the Poteau River, and I submit a report (No. 729) thereon. I ask unanimous consent for the immediate consideration of the bill. It

will take only a moment. It grants to the city of Fort Smith the right to construct a dam across a river to protect the city water supply.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on Commerce, with amendments.

The amendments were, on page 2, line 1, after the word "dam," to insert "for water-supply purposes"; at the end of line 4 to strike out the period and to insert a comma and the words "at such location and in accordance with such plans as may be approved by the Chief of Engineers and the Secretary of War: *Provided*, That this act shall not be construed to authorize the use of such dam to develop water power or generate electricity"; after line 4 to strike out section 2, as follows:

SEC. 2. That the right is hereby reserved to alter, amend, or repeal this act—

and in lieu thereof to insert:

SEC. 2. That this act shall be null and void unless the actual construction of the dam hereby authorized is commenced within one year and completed within three years from the date hereof—

and to insert a new section, as follows:

SEC. 3. That the right to alter, amend, or repeal this act is hereby expressly reserved—

so as to make the bill read:

Whereas the city of Fort Smith, Sebastian County, Ark., a duly organized and incorporated city in said county and State, is dependent for its water supply upon the Poteau River, a stream originating in the State of Oklahoma and emptying into the Arkansas River just east of the State line between the States of Arkansas and Oklahoma; and

Whereas it is necessary for a dam to be constructed in order to preserve the purity of the water supply of the said city of Fort Smith: Therefore

Be it enacted, etc., That the city of Fort Smith, a duly incorporated city, of Sebastian County, Ark., is hereby granted permission to erect or cause to be erected a dam for water-supply purposes across the Poteau River at or near a point just west of the State line dividing the States of Arkansas and Oklahoma, and near or just above the mouth of Mill Creek, at such location and in accordance with such plans as may be approved by the Chief of Engineers and the Secretary of War: *Provided*, That this act shall not be construed to authorize the use of such dam to develop water power or generate electricity.

SEC. 2. That this act shall be null and void unless the actual construction of the dam hereby authorized is commenced within one year and completed within three years from the date hereof.

SEC. 3. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The preamble was agreed to.

THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

Mr. McCUMBER. Mr. President, I ask that we return to paragraph 219 of the bill.

The ASSISTANT SECRETARY. Paragraph 219 is on page 42, and relates to cylinder, crown, and sheet glass, by whatever process made, unpolished.

Mr. McCUMBER. I desire to suggest several committee changes in the paragraph. It is the paragraph that relates to cylinder, crown, and sheet glass, generally known as window glass, and that character of glass.

I wish to say at this time that the committee in its first hearings gave so much time to the paragraphs of the bill on which there were contests that it may be that in some instances where there was no contest it did not give the consideration that ought to have been given to the amendment of some of the House provisions. It was understood that the committee should be in session every morning for the purpose of looking further into any of these matters as they arose.

The committee has carefully gone over paragraph 219 and will suggest an amendment to each one of these rates, with the exception of the first one, namely: To leave the "1¼" as it is; to change the "1⅜" to "1⅝"; to change the next item of "2¼" to "1⅝"; to change the next item of "2¾" to "1¾"; to change the next item of "3¼" to "2"; to change the next item of "3¾" to "2¼"; to change the item on line 17, of "4 cents," to "2½ cents"; and then to strike out the proviso "That none of the foregoing shall pay a less duty than 50 per cent ad valorem."

Taking them in their order as committee amendments, I move to strike out, on line 10, "1¾" and to insert in lieu thereof "1⅝"; but before that is voted upon I wish to make a little explanation of what would be the equivalent ad valorem duties, taking the average, of each one of these items for the first nine months of 1921.

The duty on the first item, which is left unchanged, would amount to 20 per cent ad valorem. The duty on the second item, glass exceeding 150 and not exceeding 384 square inches, 1⅜ cents, would be equivalent to 28 per cent ad valorem. The duty on glass exceeding 384 and not exceeding 720 square inches, as proposed to be modified, would be equivalent to 33 per cent. The duty on glass exceeding 720 and not exceeding 864 square inches, 1¾ cents per pound, would be equivalent to 29 per cent. The duty on glass exceeding 864 and not exceeding 1,200 square inches, reducing the rate to 2 cents per pound, would be equivalent to 33 per cent ad valorem. The duty on glass exceeding 1,200 square inches and not exceeding 2,400 square inches, 4 cents per pound, would be equivalent to 38 per cent ad valorem. The duty on glass above 2,400 square inches, 2½ cents per pound, would be equivalent to 42 per cent ad valorem. The ordinary glass used for window glass, as stated here, would bear a duty equivalent to about 20 per cent ad valorem.

Therefore, I move to strike out, in line 10, "1¾," and to insert in lieu thereof "1⅝," so as to read:

Above that, and not exceeding 384 square inches, 1⅝ cents per pound.

Mr. JONES of New Mexico. Mr. President, this paragraph and the one which was dealt with earlier in the morning session present some very interesting features. The modified rates proposed by the Senator from North Dakota are considerably higher than those in the present law, and while we all agreed to the amendment proposed this morning by the committee in paragraph 217, yet, when we come to consider the original text of the bill, which remains unchanged by any Senate committee amendment, there will be amendments offered to that provision.

In this connection I desire to reserve for separate votes in the Senate paragraphs 218 and 222.

Paragraph 219, as has been stated by the chairman of the committee, includes common window glass, and the industry presents a most interesting situation. I prefer to read just what the Tariff Commission has said about it rather than to state in my own language what the facts are, and I think it important to get something of a picture before the Senate as to the processes of this industry, as to how it is controlled, and the arrangement which exists now parceling out not only the market of the United States but of the world.

We have in the report of the Tariff Commission a statement of some comparative costs in this country and Belgium for hand-blown glass, but we have no comparison of costs of the handmade and the machinemade glass. In fact, we have no data whatsoever regarding that cost, but we do find the most interesting statement as to the American cost of production of the handmade glass, and I will read just what the commission has to say about it:

The American cost of production in the foregoing—

That is the American data, which has been considered and compared with the Belgian cost—

The American cost of production in the foregoing is based mainly on the skill of the hand blower who limits his own production to nine cylinders of glass per hour, his labor to 40 hours per week, and his period of employment per year to six months. This hand blower makes a cylinder of glass about 5 feet long and 12 to 15 inches in diameter, or about 2,800 square inches, and it takes him longer to make it than it takes a machine to blow a cylinder over 39 feet long and 22 inches in diameter containing about 32,000 square inches. The machine tender operates three to five machines at the same time, and produces this immense quantity of glass and receives 25 per cent less wages than the hand blower. The high rate of earnings of the hand blower ($50 per week in 1917) is charged into the labor cost of his restricted output of nine small cylinders a day, while the lesser earnings of the machine operator ($40 per week in 1917) when distributed as labor cost over his great quantity of production make a relatively small labor cost in a 50-foot box. As machine production is 60 per cent of the total production, the ability of machine factories to compete with the handmade glass of European countries is a reasonable conclusion.

Mr. HITCHCOCK. Mr. President, why is it that under those circumstances machine production is only 60 per cent?

Mr. JONES of New Mexico. It is by reason of an understanding between the makers of this glass.

Mr. HITCHCOCK. It would seem to be very much to their advantage to use machines for all of it.

Mr. JONES of New Mexico. There is no question about the economic advantage, but it seems to be a psychological as well as an economic situation which is presented, and that is one of the complexities of this problem. But I want to present it to the Senate. The Tariff Commission states some tariff considerations, as follows:

TARIFF CONSIDERATIONS.

The tariff problem centers around the small sizes of window glass, up to and including glass 16 by 24 inches in size, or 384 square inches. The tariff on the larger sizes is satisfactory to manufacturers.

Notwithstanding that, the chairman of the committee this morning, in his reduction of these duties, increased the present rate to a very considerable extent, when the Tariff Commission report that the present rates of duty upon the larger sizes are satisfactory to the manufacturers. They say further:

The consumers of window glass in the United States require from 50 to 55 per cent of the single strength in the small sizes up to 16 by 24. Single strength measures approximately 12 lights to the inch in thickness and weighs about 16 ounces to the square foot; double strength, about 9 lights to the inch and weighs about 24 ounces to the square foot.

Then the present rates of duty are given, both under the act of 1909 and the present law.

The rates of duty in the tariff act of 1909 on the small sizes were reduced in the tariff act of 1913 from 1¼ cents, 1⅝ cents, 1⅞ cents, and 1¼ cents per pound to seven-eighths cent and 1 cent per pound, according to value and surface area.

This morning, in suggesting its rates, the committee practically readopted the rates under the act of 1909, which were materially reduced by the act of 1913, but notwithstanding that reduction in the act of 1913 the manufacturers themselves say that on the larger sizes the existing rates are satisfactory.

In addition to that, "some window-glass manufacturers have stated (1916) that without material injury to the industry the duties on the larger brackets might be reduced."

But instead of reducing them, as the manufacturers say might be done, the committee proposes to increase them, and, so far as the investigation of the Tariff Commission is concerned, no manufacturer has said that they should be increased.

Mr. HITCHCOCK. The committee not only proposes to increase the specific duties over existing law, but it also provides that those specific duties must constitute at least a 50 per cent ad valorem?

Mr. JONES of New Mexico. The committee this morning receded from that proposal and struck out the whole proviso, so that is no longer in the bill.

Mr. HITCHCOCK. That is abandoned?

Mr. JONES of New Mexico. Upon their motion this morning that proviso was stricken out.

The Senator from North Dakota this morning gave to us the percentages of duty which his modified rates would amount to. I want to call attention to the fact, however, that his percentages are based upon the prices of 1921, as he stated, and those prices are at least 100 per cent higher than the pre-war prices. If we get our percentages on the pre-war prices, the equivalent ad valorem rates would be just about twice the ad valorem rates which were given to us by the Senator from North Dakota. Of course, based upon the value which he used, his figures are correct, but the prices on which he based his calculations ranged from 100 per cent to even higher than 100 per cent above the pre-war prices.

This very kind of glass, the common window glass, which was selling before the war for $4.50 a box, is now selling for $9 a box, just 100 per cent higher, and other kinds are selling for more than 100 per cent higher.

Mr. SIMMONS. Does the Senator mean the foreign price?

Mr. JONES of New Mexico. I am giving the American price as the basis for my statement as to these increased prices, but I feel certain that the foreign price has also advanced. It may be I am in error in making that statement as the basis of the calculation of the Senator from North Dakota, but without definite information I do not believe it possible for me to be.

Mr. SIMMONS. I am quite certain the Senator is right. Of course, to test the rate we would have to take the foreign price and not the American price.

Mr. JONES of New Mexico. In this connection I will have to refer to some data which I have, and which will probably clear up the matter. I find the statement here that the landed cost of the Belgian glass is $8 per box. Of course, that includes the duty of 70 per cent under the present rate, but does not include any importer's profit or overhead expenses and costs. The domestic manufacturers are charging $9 per box for that article. Prior to the war the domestic manufacturers were selling the same article for $4.50 per box. So the Belgian price is really above a parity with the domestic manufacturers' price.

Mr. SIMMONS. The Senator adds profits?

Mr. JONES of New Mexico. Yes; that is when we add the necessary overhead and profits of the importers. On window glass the profit is a little higher than the average, I think, on account of the breakage and transportation.

Mr. SIMMONS. The Senator, I think, is absolutely right, so far as importation from Belgium is concerned. On the foreign price he would add the overhead and profits. That is what is ordinarily allowed for overhead and profits. If they were added to the foreign price it would exceed the present domestic price, but I understood that the Senator from North Dakota in giving his ad valorem equivalent was probably estimating it upon a much lower foreign price than indicated in the statement of the Senator from New Mexico. If the Senator from New Mexico will pardon me, I would like to inquire of the Senator from North Dakota what was the foreign price upon which he made his calculation in making his statement a little while ago as to what would be the ad valorem equivalent of the specific rates under paragraph 219?

Mr. McCUMBER. I have the data here if the Senator from New Mexico will yield to me.

Mr. JONES of New Mexico. I am glad to yield to the Senator.

Mr. McCUMBER. It will also correct to a considerable extent the misapprehension as to the foreign values being double. I have also the foreign values. I did not read the entire table, but I will state some of them at this time.

On not exceeding 150 square inches; that is, a 10 by 15 glass. The present valuation is 6 cents a pound, and the pre-war price was about 4 cents. So that was about two-thirds of the present valuation, or one-third less than the present valuation.

The next one is exceeding 150 and not exceeding 384 square inches. The present valuation is 5 cents per pound, and the pre-war valuation was 2.6. That comes nearer doubling than any of them.

Now I will take the next one, exceeding 384 and not exceeding 720 square inches. The present price—and what I mean by the present price is the price for the first nine months of 1921—was 5 cents per pound. The pre-war price seems to range from 3 to 4½ cents per pound. So on that there is very little difference.

Exceeding 720 and not exceeding 864. The present price is 6 cents per pound, and the pre-war price was 6 cents per pound. So the ad valorem would be just the same as the pre-war.

Exceeding 864 and not exceeding 1,200 square inches. The present price is 6 cents, and the pre-war was from 5½ to 5.9. So it is very close to the same price.

I have not yet had time to go over the last two in the comparison, but I think in the larger glass we have gotten down very close to the pre-war basis, and on the others they would average, I would say, about one-fourth greater than the pre-war prices.

Mr. SIMMONS. The Senator is giving the price of those articles by the pound?

Mr. McCUMBER. Yes; that is what I was giving.

Mr. SIMMONS. Will the Senator please tell me where he gets the prices that he has presented?

Mr. McCUMBER. As I stated, we took the best data we had. It is not right up to date. We took the first nine months of 1921. That is as far as we have been able to get complete records. Taking the first nine months of 1921 as our basis, it would give us 6 cents per pound upon the first, 5 cents on the second, 5.5 on the third, 6 on the fourth, 6 on the fifth, 6 on the sixth, and 6 on the seventh bracket.

Mr. SIMMONS. Where are those prices quoted?

Mr. McCUMBER. They are quoted in the reports of the importations for 1921. We have not all the months, but we have a completed report for the first nine months of 1921. I have an idea that at the present rate possibly it may be a little lower, although I have no definite figures.

While I am on my feet, may I call the attention of Senators to the fact that the difference in the rates is not so very much. They are not very much higher on the valuation than under the present law. For instance, where we have a rate of 1¼ cents per pound, the Underwood law was seven-eighths. There was quite a little difference there, but where the House proposes 1⅜, and we have changed it to 1⅝, the present law is 1 cent per pound. Where we have 1⅝, the present law is 1⅛, a difference of one-half. Where we have 1¾, the present law is 1½. Where we have 2—and I am speaking of what we now propose—the present law is 1½. Where we have 2¼, the present law is 1⅞. Where we have 2½, the present law is 2. So there is only a very slight increase in percentages above the present law. Of course, the ad valorem rates make more difference because they are based upon the price in 1921.

Mr. JONES of New Mexico. But I call attention to the fact that the increase in the first item, which is not modified by the committee, from seven-eighths of 1 cent to 1¼ cents, is an increase of three-eighths of a cent above the seven-eighths of 1 cent, which I should say would amount to about 40 per cent.

Mr. McCUMBER. I gave that as 1¼ and 1⅜, and the reason why we did not lower it was that it only amounts to 20 per

cent ad valorem, and we considered that a very reasonable rate.

Mr. JONES of New Mexico. Twenty per cent ad valorem on the 1921 prices?

Mr. McCUMBER. Yes.

Mr. JONES of New Mexico. In the next bracket it is changed from 1 cent, as it is under the existing law, to 1⅜. That would be an increase of three-eighths, which would amount to about 37½ per cent, as I roughly figure it.

Mr. McCUMBER. That is, it would amount to that much over the present law?

Mr. JONES of New Mexico. Yes; 37½ per cent above the present law. In the next line, where the rate is 1¼, it is proposed to change it to 1⅝, an increase of four-eighths above nine-eighths, which would be, as I roughly figure it, about 40 to 50 per cent increase over the present duty.

The next item is a new bracket not found in the present law, but the sizes would fall within the 1¼ cent bracket. That proposes a change to 1⅞. That would be an increase of five-eighths in that bracket on the sizes above 720 square inches and not exceeding 864 square inches. The present rate is 1¼, and they increase that to 1⅞.

Mr. SIMMONS. Mr. President——

The PRESIDING OFFICER (Mr. EDGE in the chair). Does the Senator from New Mexico yield to the Senator from North Carolina?

Mr. JONES of New Mexico. I yield.

Mr. SIMMONS. As I understood the Senator from North Dakota, he said that the ad valorem equivalent would be, I think, 29 per cent. I may be mistaken.

Mr. JONES of New Mexico. That is the ad valorem equivalent of the rate, based upon 1921 prices.

Mr. SIMMONS. The ad valorem equivalent under the present law in 1920 was 11.66.

Mr. JONES of New Mexico. An increase of nearly three times.

Mr. McCUMBER. Let me correct the Senator in his last statement on this bracket. It is true there is one more bracket in the pending bill than there is in the present law. The Senator is correct in that statement. Where we have the two brackets together, in lines 13 and 15, we propose 1⅞ cents, and in the next one we propose 2 cents. The present rate of duty is 1¼ cents on all that are included in that bracket, so it is one-half of 1 cent above the one and one-fourth of 1 cent above the other per pound.

Mr. JONES of New Mexico. I may possibly have made the wrong figures here. I think the Senator is right about it, and that I made a miscalculation.

Mr. SIMMONS. I wish to ask the Senator from North Dakota what is his estimate as to the ad valorem equivalent with the bracket that reads:

Above that, and not exceeding 864 square inches, 2⅜ cents per pound.

Mr. McCUMBER. Twenty-nine per cent is the equivalent ad valorem.

Mr. SIMMONS. The Senator said that was very little higher than the present law. The present ad valorem equivalent for 1920, which is the last year given, was 11.66.

Mr. McCUMBER. Of course, if we have a quarter of a cent per pound and increase it to one-half cent per pound, we have increased 100 per cent. That is true if you measure by percentage increases. I was speaking simply of the difference in the amount per pound between the Underwood-Simmons law and the pending bill; and then, of course, I gave the ad valorem equivalent under the bill we propose in case the rates are the same as the average for the first nine months of 1021. That is as close as I could get it.

Mr. SIMMONS. Of course, where we are dealing with fractions and fractional increases in a specific rate, it appears small, but when we reduce those fractions to ad valorem percentages, it makes quite a difference. Taking that particular bracket, reading practically the same in both cases, the ad valorem equivalent of the rate now proposed by the Senator from North Dakota would be 29 per cent as against 11.66 per cent.

Mr. McCUMBER. That is on glass exceeding 720 and not exceeding 864.

Mr. SIMMONS. Yes; above 720 and not exceeding 864.

Mr. McCUMBER. Will the Senator get the exact one? I can give him the ad valorem rate upon it if I know which one he refers to.

Mr. SIMMONS. This is above 384 and not exceeding 720.

Mr. McCUMBER. On that the equivalent ad valorem duty, as I stated, is 33 per cent. The price in 1921, taking the average for the nine months, was 5 cents per pound. The pre-war price ranged from 3 to 4½ cents per pound. Of course, if we take the price of 3 cents per pound and put a duty of 1⅜ cents on it, the equivalent ad valorem would be very much above 33 per cent, but if we take the 4½ cents per pound price, it would only be a very little above the 33 per cent.

Mr. SIMMONS. But, of course, we have to take the price for the same year for the purpose of making the comparison.

Mr. McCUMBER. The average pre-war price was in the neighborhood of 3¾ cents, as against 5 cents, the average for 1921.

Mr. SIMMONS. For the purpose of comparison, would not the Senator have to get the average price to-day and apply the rate of the Underwood law and the rate of the pending bill?

Mr. McCUMBER. Not having the importers' figures except for the nine months of 1921, we had to accept them as the proper basis for making our calculations; and I understand the prices are about the same now. They are very much lower, of course, than they were in 1920, for the price that year was the peak price.

Mr. SIMMONS. That is true.

Mr. JONES of New Mexico. Mr. President, I call attention to the fact that in the Payne-Aldrich law there was a limitation upon prices also. That is left out of the present law and also from the bill as it comes from the committee. The act of 1909 read, in part, as follows:

PAR. 99. Unpolished, cylinder, crown, and common window glass, not exceeding 150 square inches, valued at not more than 1½ cents per pound, 1½ cents per pound; valued at more than 1½ cents per pound, 1⅞ cents per pound; above that, and not exceeding 384 square inches, valued at not more than 1⅞ cents per pound, 1⅞ cents per pound; valued at more than 1⅞ cents per pound, 1⅞ cents per pound.

Above that the Payne-Aldrich law simply fixed the rates based upon the sizes.

Mr. SIMMONS. I desire to ask the Senator a question. The Senator is entirely right; it would not be quite fair to make a comparison based on the prices in 1920, because those prices were, in the main, very high, and, of course, when the prices are high the ad valorem goes down. Now, the Senator is making the point that prices have gone down since then, and that would necessarily increase the tariff ad valorem equivalent. He is right about that. I want to inquire of the Senator if his investigation has disclosed whether there has been any fall in the prices of this character of glass. I know there has been a fall in many prices, but I was under the impression that the decline in prices had not reached glass as yet either here or abroad.

Mr. JONES of New Mexico. The Senator is right, so far as any information I have is concerned, that prices of glass to-day are just about 100 per cent higher in this country than they were prior to the war.

Mr. SIMMONS. Have those prices fallen any since 1920?

Mr. JONES of New Mexico. There has been some reduction from actual war prices. For instance, the kind of glass to which I referred a while ago as selling at $9 a box now and $4.50 prior to the war did sell at one time during the war for $13.50. So there has been something of a reduction since the peak of the war prices. I find in the Tariff Information Survey a comparison of the rates in the Payne-Aldrich law and the existing law, and, inasmuch as the rates now suggested by the committee are practically the same as the Payne-Aldrich rates, not taking into consideration, however, the limitation upon prices in the Payne-Aldrich law—and I do not know just what effect that will have upon the bracket—I shall refer to that table. Upon the first two brackets the Payne-Aldrich law rates ranged from 92.1 per cent to 34 per cent, whereas the present law rate is 20.77 per cent. I would judge that, on the average, one would be at least twice as high as the other. The table to which I am referring is found on page 76 of the Tariff Information Survey, B-9.

In the next bracket, above 150 but not exceeding 384 square inches, there were two valuations given, which made a difference in the rate of duty under the Payne-Aldrich law, the duty in the one case being 107.51 per cent and in the other 54.23 per cent. Those two items were thrown together in the present law, and the rate of duty was 31.51 per cent.

In the next size, above 384 and not exceeding 720 square inches, where two different valuations also are given, we find that the rate on the lower value amounted to 107.94 per cent and on the other to 58.66 per cent, while under the present law the rate is 32.71 per cent.

The two brackets, including glass above 720 and not exceeding 864 square inches and above 864 and not exceeding 1,200 square inches, which were found in the Payne-Aldrich law, are revived in this proposal by the Senate committee. Under the present law the two were combined, and the average rate was 42.83 per cent.

Above 1,200 and not exceeding 2,400 square inches the 1909 act imposed a duty of 64.27 per cent, as against the duty in the present law of 47.74 per cent.

Above 2,400 square inches, the Payne-Aldrich law imposed a duty of 119.76 per cent and the present law 28.33 per cent.

As I take it, the committee has practically gone back to the Payne-Aldrich rates, except in the very highest brackets.

Mr. McCUMBER. Mr. President, I wish to say to the Senator that we did not have the Payne-Aldrich provision before us at all in considering this paragraph. We simply took the House rates as they were, the prices, and so forth, and made the changes; but paid no attention to the Payne-Aldrich Act. If we have come close to the Payne-Aldrich rates in any particular, it is not because of any attempt to use them as a guide.

Mr. JONES of New Mexico. It is merely a coincidence, then.

Mr. SMOOT. No; there is not any coincidence.

Mr. JONES of New Mexico. Let us see as to that.

Mr. SMOOT. The Senator is speaking of window glass, is he not?

Mr. JONES of New Mexico. I am; and if the Senator will turn to the paragraph he will find that in the first bracket of the Payne-Aldrich law the rate was 1¼ cents, and that is just what it is in this bill, and in the next bracket it was 1⅝ cents, and that is just what it is here.

Mr. SMOOT. Of course, that is what the rates are in the House bill; but it is not the rate to be proposed by the Senate committee.

Mr. JONES of New Mexico. Yes it is; that is precisely the rate. I have the figures here. It is merely a coincidence, and I am not complaining about that at all.

Mr. SMOOT. I thought the Senator said that all the rates in paragraph 219 were the rates of the Payne-Aldrich Act.

Mr. JONES of New Mexico. Oh, no; I said that the proposal of the committee this morning practically duplicated the Payne-Aldrich rates. As I remarked, however, there is no point to that; it is merely a coincidence.

Mr. SMOOT. The Senator will notice, for instance, there is a duty of 4 cents a pound——

Mr. JONES of New Mexico. I said in the highest brackets there was a change, and it is a considerable change.

Mr. SMOOT. I misunderstood the Senator. I understood him to say that the rates reported by the committee were practically the same as the Payne-Aldrich rates.

Mr. JONES of New Mexico. I did, except as to the highest brackets.

Mr. SMOOT. I did not hear the Senator make that observation.

Mr. JONES of New Mexico. But, of course, that does not alter the situation at all. We are considering the rates of duty as proposed.

Mr. President, I was reading something about the organization of this industry and the difference between hand-blown and machine-made glass. I do not remember just how far I read about the methods of production, but it is important, I think, to get it all together in one picture, so I may repeat to some extent regarding the methods of production.

With an iron blowpipe the hand blower, in a surprisingly skillful manner, makes a cylinder of single-strength glass about 5 feet in length and from 12 to 15 inches in diameter. The most successful machine draws, hoists, and blows cylinders of glass nearly 39 feet in length and about 22 inches in diameter. From the cylinder made by machine more than eight times as much glass is obtained as from the cylinder made by hand. The large machine cylinder is made in less time. The machine blower operates from three to five machines at a time. The processes of flattening, annealing, cutting, and boxing are the same for machine and hand-made glass. A method of drawing the glass in a continuous flat sheet is still in an experimental stage in the United States, but is said to be successfully employed in Belgium.

Now, as to the organization:

The principal machine company operates 118 machines and 6 factories, and is the largest window-glass producer in the world. Its productive capacity, organization, and facilities enabled it to export 80 per cent of all the window glass exported in 1916, an exceptional year, the total amounting to over $3,000,000 in value. This one company could produce nearly all the window glass needed in the American market. It curtails production, however, and with other machine factories divides the domestic market with the 55 small hand-blown glass factories, which operate about six months of each year and produce 40 per cent of the total window glass. Prior to the war and notwithstanding the great advantages of machine production, there were practically no sales of machine glass in foreign countries, the price understandings limiting the trade to our domestic market, and all the factories remaining idle for half of each year. A wider and a larger market appears obtainable through greater machine production and better selling facilities.

In the discussion of glass making in connection with the bottle and jar paragraph it was stated that these glass-making machines were of American invention, and that they did not sell those machines to operators in Europe, but leased them, with the understanding that none of their commodities should be sent over to the United States, and the producer of the machine agreed to limit his product to the domestic market. We have not just that statement regarding these machines which make window glass, but from this statement I infer that there must be some such understanding as that. At any rate, it is perfectly clear that the American market is absolutely controlled and dominated by these machine operators. Through their graciousness, they permit the handmade factories to operate to the extent of 40 per cent of the domestic consumption, and the hand makers—I do not know whether this was done deliberately for the purpose of having high profits for a certain period of the year or not—but the hand makers work only six months in the year, and evidently the prices have been raised up high enough so that the hand factories can make a sufficient profit in six months of the year to compensate them for what would be ordinarily considered a year's effort. These manufacturers have stated that they were satisfied with the present rates, and some of them thought that the present rates on the larger sizes might be reduced below the present law.

That is the situation we are dealing with; and the Finance Committee proposes to increase these duties from about 25 to 35 per cent above existing law. It may be that that will be satisfactory to the country; but where you have an industry supplying the American market, where the one great dominating producer is not complaining, where it is evidently making profits beyond the dreams of a Crœsus, manufacturing its share, which is 60 per cent, of American consumption by machinery, and where that machine turns out the glass eight times as fast as a man can make it, and when they all sell at the same price, it seems to me to be a very satisfactory arrangement to turn over to the machine producer 60 per cent of the American market, let him make that product for one-eighth what it costs the hand producer, and sell it at the same price.

That is the situation as I gather it from the information furnished by the Tariff Commission.

I read a little comment from the Tariff Commission:

While the American people have not as yet secured the expected results of machine production, the revolution in the production of window glass began when the cylinder-blowing machine produced glass commercially in 1905. The unrest then created culminated some years later in a bitter war of prices between the producers of handmade and machine-made glass.

It was feared that if the machines were a commercial success it would not be possible to produce handmade glass on a profitable basis. The entire industry became demoralized. Hand glass manufacturers sold the product for any price they could obtain. The skilled hand workers agreed to a sliding scale based on selling prices, and during the years 1912 and 1913 the average wage of single-strength blowers went down from 45 cents per 50-foot box to 15 cents per 50-foot box, or from upward of $6 per day down to $15 per week, or less than Belgian wages. The price war ended in a compromise, the machine company, after serious losses, reaching the conclusion, as stated by its general manager, that "from a business standpoint we thought it was much more profitable for us to be satisfied with a reasonable share of the country's business rather than to drive out operatives from an industry that had existed as long as this one had existed."

In 1914 a little over 8,000,000 boxes of window glass of 50 square feet each were manufactured in the United States and in 1916–17 about 9,000,000 boxes. About 60 per cent of this product was blown by machine and 40 per cent by the hand method. In Belgium window glass blown by hand is the rule. A machine blower in the most efficient American factories can blow five cylinders of window glass simultaneously, each nearly 39 feet long and 22 inches in diameter, in less time than an American or Belgian hand blower can blow a cylinder 5 feet long and 15 inches in diameter. The American machine blower is paid about $40 a week (1917), while American hand blowers average about $50 a week (1917). The Belgian hand blower does not receive half the wages of the American machine blower. The great advantage in the cost of production of American machine blowing over that of American hand blowing is apparent The machine factories could drive hand-blowing factories out of the business and they could readily produce all the window glass needed. Fear of a price war prevents the machine factories from operating to their full capacity. This was explained by the principal machine company in 1916 in its annual report (see p. 47, Glass Report of Tariff Commission):

"That so long as the company was securing what we considered a satisfactory portion of the going business it would be far more profitable to curtail its operations to the extent we did rather than attempt to operate to capacity and possibly precipitate a price war in the midst of the greatest export business we have ever had."

The effectiveness of machine production in the domestic and foreign market is practically nullified by the policy of restricting output to suit the requirements of hand production. Machine production is marketed under conditions that encourage the continuation of antiquated methods. Profits of machine production are based on the costs of production of handmade glass, selling prices being practically the same.

Mr. President, with such examination as I have been able to make of this question I would not try to destroy the existing condition. I think it would require a very much more careful study of the subject than I have been able to make; but it does seem to me that we are justified, under all the circumstances, in letting the industry so far as taxation is concerned remain where it is to-day. We have no competition from abroad, under existing law, to amount to very much. There is an importation of some of the smaller sizes of glass, but

what importations there are constitute, it seems to me, a healthy competition.

At any rate, it is apparent that with this industry controlled as it is now, with agreements existing as to the output, with the factories operating only six months in the year for the specific purpose of curtailing production, we know that one result and only one result can follow the increasing of this duty, and that is that the people who now control the industry would raise their prices high enough to prevent any competition which would affect their interests. There is no escape from that conclusion, and the manufacturers have said, what I desire to repeat, especially as regards the larger sizes, that the tariff on the larger sizes is satisfactory to the manufacturers. Some window-glass manufacturers have stated that without material injury to the industry the duties on the larger brackets might be reduced. Of course, that applies to the larger sizes, but instead of reducing the rates in those brackets the committee proposes to increase them.

In these smaller sizes it does not seem to me that there is any undue competition. At any rate, it does not appear that the American operators, either by machine or hand, are exerting themselves to avoid competition even in the smaller sizes and under existing law. When they can afford to operate all these factories, machine and hand, only six months in the year, how can anyone try to justify shutting out the small amount of importations which, if allowed to enter, would create healthy competition?

Mr. President, as I said, I do not want to disturb this industry. There is a great problem here, an economic problem, which ought to be solved in some manner; but I do not think this is the place to try to solve it. I do not want to injure the industry or interfere with existing conditions, but it does seem to me that all parties concerned should be satisfied with existing conditions, and I shall therefore move to amend these rates so that they will conform to existing law.

On page 42, line 10, I move to amend the proposed committee amendment by striking out "1⅛" and inserting "1."

Mr. SMOOT. Mr. President, when this paragraph was reached the Finance Committee asked that it go over. Certain members of the committee were not satisfied even with the House provisions, although they were reported to the Senate. A minority of the Republicans of the Finance Committee were bitterly opposed to the proviso put in by the House; that is, that "none of the foregoing shall pay less duty than 35 per cent ad valorem." It was reported to the Senate, and that 35 per cent was increased to 50 per cent, but upon consideration of it, after I had requested that it go over, the committee decided to strike out the proviso entirely. They have also reduced the House specific rates, with the exception of the first bracket.

The first bracket is on window glass not exceeding 150 inches. The value of that to-day is 6 cents a pound. The equivalent ad valorem of the 1¼-cent rate is 20 per cent.

Mr. POMERENE. The Senator speaks of it as being worth 6 cents a pound. Does he mean according to the American valuation?

Mr. SMOOT. No; the foreign valuation. Last year it was worth 10 cents a pound; but it has been reduced from 10 cents a pound to 6 cents, and that is the foreign valuation to-day.

Mr. POMERENE. In what countries?

Mr. SMOOT. In Belgium. Belgium is the great glass-producing country outside of America, and all our competition virtually comes from Belgium.

The next bracket we propose to reduce to 1¼ cents. The equivalent ad valorem is 28 per cent. The price of that glass is 6 cents per pound also.

The next bracket we propose to reduce to 1⅛ cents. The price of that glass is lower than the price of any other glass offered in Belgium to-day, and I think the pre-war price of this glass was lower than that of any other glass. I can not state why that is, but it is the fact. I take it, though, that it comes about because there is so much of it used that the competition is very keen. I think more than likely that is the cause, although I am not positive. The equivalent ad valorem for the 1⅛ cents is 33 per cent.

The next bracket we reduce to 1¾ cents. The present price of that glass is 6 cents and the ad valorem equivalent is 29 per cent.

The next bracket we reduce to 2 cents from the House rate, which is 3⅛ cents. The equivalent ad valorem is 33 per cent.

The next bracket we reduce to 2¼ cents. The value is 6 cents and the ad valorem rate is 38 per cent.

The rates provided for in the House text are the rates which were in the Payne-Aldrich law. They are altogether too high, and the committee recognized that and proposed an amendment, which the chairman of the committee has already suggested, to equalize as nearly as possible the relative cost in the production of the different sizes of glass falling under this paragraph.

I think myself we can make the machine-made window glass as cheaply in this country as it can be made anywhere in the world, but Belgium has an advantage of from 50 to 75 per cent in the wage scale alone. They make the glass in the same way we make ours. Their raw material is at hand, just as the raw material in this country is at hand, and it is a great deal cheaper there because of the cheaper labor. The manufacturers there have a freight rate from Belgium to the coast cities of the United States which is about one-third the freight rate from where the glass is manufactured in this country to the same cities.

Those are the only two reasons why there should be any duty at all on this glass, and that is the position the committee takes. The rates which the committee reports are the rates they think and believe will equalize the advantage which Belgium has over the American manufacturer, as far as this market is concerned. Does the Senator desire to offer his amendments now?

Mr. JONES of New Mexico. My attention has just been called to the fact that the committee amendments have not been acted upon.

Mr. SMOOT. That is what I was about to say, and I was going to suggest that if the Senator insisted on it I would ask that the committee amendments be withdrawn so that he might offer his amendments; but I think the best way would be to offer the committee amendments now.

Mr. JONES of New Mexico. In lieu of the proposed amendment I move to strike out, on line 10, "1⅛" and insert "1."

Mr. SMOOT. That would be in the second degree.

The PRESIDING OFFICER. The committee amendment has not yet been formally presented.

Mr. SMOOT. If the Senator will allow the committee amendments to be offered, and then offer his amendment as an amendment to the committee amendment, I think that would be the best way.

Mr. JONES of New Mexico. I think that would be the better parliamentary way to handle it.

Mr. SMOOT. I now move, on page 42, line 7, after the word "made," to insert "and for whatever purpose used." I suppose the Senator will not have any objection to that; but, by way of explanation, I want to say that those words are by way of amendment, put in here to overcome a ruling which has been made by the customs department that wherever glass has been cut it does not fall under this paragraph, but falls under the manufactures of glass and carries a rate of 60 per cent; that if a pane of glass 10 by 20 is cut in two and made 10 by 10 it takes the 60 per cent rate. This is to cure that situation.

Mr. JONES of New Mexico. The amendment is very appropriate.

The PRESIDING OFFICER. The Senator from Utah offers the following amendment on behalf of the committee.

The READING CLERK. On page 42, line 7, after the word "made" and before the comma, insert the words "and for whatever purpose used" and a comma.

The PRESIDING OFFICER. Without objection, the amendment is agreed to.

ATTORNEY GENERAL DAUGHERTY—THE MORSE CASE.

Mr. CARAWAY. Mr. President, in the interest of historical accuracy, I want to make a statement with reference to the Attorney General's connection with the Morse case. It becomes particularly necessary that I should do it now, because at the other end of the Capitol an investigation has just been denied. An article also which appeared in the Evening Star paper yesterday afternoon, written by a special news writer whom I do not have the honor to know, but who I am sure intended to be fair, makes it desirable that I shall make this statement.

Yesterday afternoon the Star carried the following statement:

President retains faith in integrity of Mr. Daugherty. Belief held Attorney General merely made poor defense.

In this statement appears, among others, this paragraph:

Senator WATSON—

Which refers to Senator WATSON of Indiana—

had communicated by telephone the fact that Senator CARAWAY had revived the Morse case. Mr. Daugherty, who had been hearing about the Morse case for 11 years, was not perturbed by it. In Ohio politics Mr. Daugherty has some violent opponents as well as stanch friends.

The skeleton of the Morse case has been rattled every time Mr. Daugherty has been in the public eye. When Mr. WATSON of Indiana told him it was up again, the Attorney General told him not to worry as he hadn't received a cent from Morse. Mr. Daugherty imagined that the conversation related to whether he had received any money, and he authorized Mr. WATSON to deny it. During the

course of the debate Senator WATSON went a step further and indicated that the Attorney General had denied his connection with the case altogether.

CALLED ERROR IN JUDGMENT.

In support of the contention that the Attorney General could not have claimed any such thing, administration supporters insist that Mr. Daugherty would never deny what had been common knowledge and what had been printed in the newspapers at the time of his connection with the Morse pardon. The error in judgment which Mr. Daugherty made in ignoring the Senate proceedings for nearly three weeks before issuing a statement of explanation is now freely admitted by the administration group, but this was due as much to Harry Daugherty's own feeling that nothing new had been developed and nothing injurious, as it was to the feeling of others in the administration circle who believed the whole thing a tempest in a teapot which would blow over if let alone.

There is reason to believe that the criticism which has swept the country because of Mr. Daugherty's belated explanation has not penetrated very deeply here. The view prevails that the incident soon will be passed by, and that the continued confidence of President Harding in Attorney General Daugherty will be demonstration enough that he does not think his friend did anything ethically unwise or morally wrong.

After reading that paragraph I shall read part of another:

There is something more than personal friendship and loyalty in Mr. Harding's attitude toward his lifetime associate and political mentor. It is true that to Harry Daugherty, more than anyone else, Mr. Harding owes his nomination at Chicago in 1920, which was equivalent to an election. It is true that Mr. Harding is under obligation to Mr. Daugherty, but it is also a fact that Mr. Harding knew in the fall of 1920 everything about the part Harry Daugherty played in obtaining a pardon for Morse under the Taft administration, and that he did not consider it a bar to the appointment of Mr. Daugherty.

The first statement on which I want to comment is the last one read. There is internal evidence in this article that it comes from an inspired source. It is the defense of the Attorney General by the Attorney General and the President of the United States. In it it is said that President Harding in 1920 knew all the relations of Daugherty to the Morse case, and, knowing it, he does not regard that as a disqualification for Mr. Daugherty to be Attorney General.

In the light of what is now known, if that statement is inspired, and I believe it to be, it means that the President knew when he named Mr. Daugherty as Attorney General that Daugherty and Felder perpetrated a fraud upon Taft when he was President and had procured a commutation by fraud from Taft of Morse's sentence. I say "if he knew." This paper was published yesterday, and it is the last defense of Daugherty and the administration, in which the statement is made that the President knew all the facts. If he did, he knew that Morse was doped in order to give the impression, when doctors should examine him, that he had Bright's disease when he did not have it.

If the President of these United States thinks that it is perfectly legitimate and ethical that an attorney shall practice a fraud upon the Executive of the Nation in order to procure a commutation of a criminal sentence, it is well that the country should know it. This article appearing in the Star, with every evidence of inspiration, says that the President knew all these things when he named Daugherty as Attorney General, and that he does not think it is at all to his discredit and does not think he has done anything unethical.

Let us read another paragraph from this inspired article:

If Harry Daugherty had come out immediately after his connection with the Morse case was mentioned in Senate debate by Mr. CARAWAY, of Arkansas, and said, "Yes; I was an attorney for Morse and helped get him a pardon—I was a private lawyer then and had a right to defend my client," no one would have thought any more about the incident. But in a telephone conversation between Harry Daugherty and Senator WATSON of Indiana a misunderstanding occurred.

But before commenting on that statement let me read another paragraph and comment on it.

But in a telephone conversation between Harry Daugherty and Senator WATSON of Indiana a misunderstanding occurred. This correspondent is presenting the version of the conversation which is told by friends of Mr. Daugherty.

In that statement is not a word of truth, but I do not think that the news writer who wrote it is responsible. He says this is a version that Daugherty's friends give out. He means to say, "This is what Daugherty told me to say to the country, that the Senator from Indiana, in a telephonic conversation with me, said 'CARAWAY has mentioned the Morse case, and we misunderstood each other in the telephonic conversation.'"

That is not what happened. I am not falling out with Mr. Lawrence, who wrote the article. I am sure that he wrote what the Attorney General told him, because the article carries every evidence of inspiration. It is coming from the Attorney General. It is intended to put the Attorney General's construction of the matter before the country in order to soften the matter for the Senator from Indiana, whose reputation for veracity stands destroyed if Daugherty be believed. It is therefore here asserted it was a telephonic conversation.

Let us see what the RECORD shows. It was not a telephonic conversation at all. I read from the CONGRESSIONAL RECORD of May 2, page 6175. I had mentioned in a speech I was making the Attorney General as having received a fee for procuring a pardon. I was talking about the President refusing to see some little children and said that they had no money to employ expensive counsel and therefore got no hearing. The Senator from Kentucky [Mr. STANLEY] interrupted me and said:

Mr. President, I am amazed at the statement of the Senator from Arkansas.

Then the Senator from Indiana [Mr. WATSON] said:

Mr. President, will the Senator permit an interruption?

I shall not read it all, but I said:

I have the floor and will permit an interruption, although I do not intend to lose the floor.

Then the Senator from Kentucky said:

If the Senator from Indiana will permit me—

After he had finished his statement and I said:

Mr. President, I am proud to say that the kind of lawyers we license to practice in my State do not have to be penalized to prevent them from doing a thing like that.

Mr. WATSON of Indiana then said:

Will the Senator permit an interruption?

I said that I would. Then the RECORD proceeds:

Mr. WATSON of Indiana. We did not hear over on this side what it was that the Senator said about the Attorney General. Will he kindly repeat it?

Mr. CARAWAY. I know the Senator did not hear it, because all the Senators over there got busy in order not to hear what was being said. I said that I understood that the greatest achievement of the Attorney General was that he got a pardon for a criminal, and got a fee of $25,000 for doing it.

Mr. WATSON of Indiana. Does the Senator mean since he became Attorney General?

Mr. CARAWAY. Oh, no.

Mr. WATSON of Indiana. May I further question the Senator?

Mr. CARAWAY. Yes, sir.

Mr. WATSON of Indiana. To what case does the Senator refer?

Mr. CARAWAY. The Morse case.

Mr. WATSON of Indiana. Does the Senator charge on his responsibility as a Senator that Mr. Daugherty, even before he was Attorney General, received a fee for helping to get Mr. Morse out of the penitentiary?

Mr. CARAWAY. I charge that that was a matter of public information. I was not, of course, present when any contract was made. I will say that I have heard it so often that I think it is true, without question.

Mr. WATSON of Indiana. The Senator, then, accepts a rumor as true, and charges it on the floor of the Senate?

Mr. CARAWAY. Does the Senator from Indiana say that it is not true?

Mr. WATSON of Indiana. I do.

Mr. CARAWAY. On the Senator's own personal knowledge?

Mr. WATSON of Indiana. I do.

Mr. CARAWAY. That Mr. Daugherty did not represent Morse?

Mr. WATSON of Indiana. I did not say that he did not represent Morse; but I say on my knowledge of the situation that he received no fee for the service rendered, nor did he represent Morse directly, according to my understanding.

Mr. CARAWAY. Did he indirectly represent him?

Mr. WATSON of Indiana. No.

Mr. CARAWAY. Why did the Senator say, then, that he did not directly represent him?

Mr. WATSON of Indiana. I meant by that that my understanding of the situation is that he was representing his client, and that the testimony of Mr. Morse was necessary, and that in that way he had contact with Mr. Morse; but he did not get him out of the penitentiary; he had not anything to do with getting him out of the penitentiary; and he received no fee for getting him out of the penitentiary.

Mr. CARAWAY. How does the Senator know that?

Mr. WATSON of Indiana. I know it from the language of the Attorney General.

Mr. CARAWAY. Did he tell the Senator that he did not?

Mr. WATSON of Indiana. He did.

Mr. CARAWAY. That he never got a cent for it?

Mr. WATSON of Indiana. Not for that.

Now, that disposes of the statement that the Attorney General now makes that the reason they misunderstood each other was that they were having a telephonic conversation or that he was told that I had "mentioned the Morse case," and then Senator WATSON of Indiana had gone to the telephone and called up the Attorney General and said: "CARAWAY is talking about the Morse case again," or that the Attorney General then said, "I did not get anything out of it," or that the Senator from Indiana had then made his statement. There was no telephonic conversation.

Oh, Mr. President, it goes a bit further than that. The Attorney General, when he wants to put his "side" of this controversy to the country, ought not to deceive the newspaper men as he had deceived the Senator from Indiana. He caused the Senator from Indiana to make a statement here on the floor of the Senate that subsequent events show was entirely untrue, although I am sure the Senator from Indiana believed it was true when he repeated the assurance given him by the Attorney General that he had nothing to do with the Morse case—I know that he did, because he is an honest man. Now the Attorney General has caused a newspaper man to say "there was a telephonic conversation" and the misunderstanding arose in that way. He ought to be candid with his friends when they are trying to "set him right."

But to show how wholly absurd that statement is, reading on down in the colloquy, I asked the Senator from Indiana [Mr. WATSON] this question, all this being in the same colloquy:

When did the Senator discuss this matter with the Attorney General?
Mr. WATSON of Indiana. On various occasions.

Not one time, not over the telephone, but on various occasions. Then I asked the question:

How came the Senator to discuss it with the Attorney General?
Mr. WATSON of Indiana. Because I had heard the rumor.
Mr. CARAWAY. Did the Senator believe it?
Mr. WATSON of Indiana. The rumor?
Mr. CARAWAY. Yes.
Mr. WATSON of Indiana. I did not.
Mr. CARAWAY. Then why did the Senator go to the Attorney General with it, if he did not believe it?
Mr. WATSON of Indiana. Because I am the kind of a man that if anyone of my friends is involved in any trouble I go and talk to my friend about it.
Mr. CARAWAY. And the Attorney General told the Senator it was not true?
Mr. WATSON of Indiana. It was not true.

Now, that is one more hoax laid to rest until to-morrow. A Representative from Kansas gave out an interview in the Daily News the other day in which he impugned my motives in this matter. I had no objection to his doing so. He is the man who pulls his forelock down between his ears and insults the memory of Bobbie Burns by pretending he resembles that great poet. He is the man who put in his pocket the rule to investigate Daugherty, which his committee had ordered him to report, and refused to report it. Of course, his statement was absolutely untrue and he doubtless knew it at the time he made it, but that does not detract from his reputation, as it is established.

I am going to say this, and I am saying it without heat or feeling because it is not worth that—that when anyone says that any information I have used in this matter came from anyone who was or is interested in anyone who was indicted or that is about to be indicted, either one of two things is true—he is absolutely without information or is telling a willful falsehood, because not a line of it came from that source. That will not, however, keep some folks from repeating it. I am conscious of that. But I shall say it just as plainly as I know how on any occasion.

This article from which I read says that this misunderstanding between the Attorney General and the Senator from Indiana [Mr. WATSON] came about because the Senator from Indiana had a telephonic conversation with Daugherty and had misunderstood or misconstrued his remarks. Those are two statements, and in each one there is something that is not true. First, the Senator from Indiana, as I have repeated over and over again, did not go to the telephone and call the Attorney General and advise him that the Morse case was up.

The Senator from Indiana was on the floor when I mentioned the Morse case. He rose and had to ask what case I was talking about. I told him the Morse case. Then he immediately entered his positive denial that the Attorney General had anything to do with the Morse case, and based his reason for the denial upon repeated conversations he and the Attorney General had had about the matter. Therefore, there is not any use now to offer that explanation further.

The Attorney General, I want to repeat, ought to be candid. He has apologists in the Senate and out who want to condone his offense, who rush to his defense when he is mentioned. He ought, in God's name, to tell them the truth one time, so that every time they offer a defense for him they may not utter a statement that is not true.

This article, as I have said, makes a statement that is not true; and yet I am as sure as I am of anything that the Attorney General told the writer of the article that it was true, and he, the writer, believed it. I am not impugning the writer's wish to tell the truth, because I am sure that he was repeating what the Attorney General told him was the truth. He was quoting Daugherty's explanation by way of apology to the Senator from Indiana. It says:

During the course of the debate Senator WATSON went a step further and indicated that the Attorney General had denied his connection with the case altogether.

The Senator from Indiana did not indicate it; he stated it positively.

Now, here are two statements. The Attorney General said he had nothing to do with the Morse case and that he did not get a cent out of it. In his letter of the 26th of May the Attorney General repeats that part of the statement. It happens to be as incorrect as the other statements he has made about this matter, as I shall show in a minute. I read now from a letter that the Senator from Wisconsin [Mr. LENROOT] put into the RECORD from H. M. Daugherty, Attorney General, of May 26. It appears on page 7710 of the RECORD of that date. The last paragraph reads:

As for compensation, I never received anything from Mr. Morse personally. All I ever received from anybody in connection with the Morse case, both civil and criminal, was about $4,000 advanced to me by Mr. Felder, and was about half enough to pay my necessary expenses and disbursements connected with over a year's active investigation, preparation, and service in the cases.

I have here what purports to be an interview with Thomas B. Felder, in which it is stated:

Flat and unequivocal denial that Attorney General Harry M. Daugherty "ever received one penny" of compensation for his efforts in behalf of getting Charles W. Morse released from Federal prison was made here to-day by Col. Thomas B. Felder, Georgia attorney, the Attorney General's partner in the famous proceedings.

Felder admitted that he (Felder) received a retainer of $5,000 and $1,000 expense money from Morse, "but this was paid," he said, "long before H. M. Daugherty had any knowledge of or connection with the case."

Colonel Felder declared he made several unsuccessful attempts to persuade the Attorney General to accept some compensation in the Morse case—chiefly stocks in one of Morse's enterprises—but each time the Attorney General refused to accept it.

The Attorney General wrote a letter which has been referred to before, but from which I am going to quote again. It may be a little more informative to lawyers than to other people, because lawyers know what a retainer means. Every lawyer knows that a retainer is not a part of the fee that he is to get for actual services rendered, but is the earnest money that is given him in order to induce him to accept the case of the litigant or to refrain from engaging on the other side of the litigation. Here is Daugherty's letter. It is authentic, and it is dated April 30, 1913:

I inclose you herewith copy of the letter setting forth the contract you made of August 4, 1911, with Mr. Felder for his services and mine. You will observe that I was correct in the statement that there was a balance due of $25,000 when you were commuted.

Everybody knows that "a balance" means that some part of a debt has been paid; that something has been received. Mr. Daugherty does not say that "the entire fee and compensation that you promised to pay yet remains unpaid," but, "you will observe that I was correct when I stated that there is yet a balance due. Over and above what you have paid you still owe $25,000."

Now, in the face of that statement, for Attorney General Daugherty now to say that he got nothing from Morse, and for Felder to say that the Attorney General got nothing from Morse borders upon the ridiculous; and certainly it is not a candid statement.

But let us see what was contained after the preliminary sentence in the letter of August 4, 1911, which Felder wrote to Morse and which Daugherty inclosed in his letter to Morse of April 30, 1913. Following the opening paragraph appears this statement by Felder to Morse:

1. You are to pay Hon. H. M. Daugherty a retainer of $5,000, and the actual expenses incurred by him in looking after your matters. Expenses not to exceed $1,000.

That would make $6,000.

2. I will pay such expenses as I may incur in connection therewith.
3. You are to direct counsel—

I will skip that and go down to the next paragraph.

4. We are to receive, in the event we secure an unconditional pardon or commutation for you, the sum of $25,000, which is to be in full compensation for services rendered in connection with your application for a pardon.

So they had this contract with Morse: First, "you are to pay Harry Daugherty $5,000 as a retainer"—that is, he must receive that before he acts at all—and $1,000 which is to be expense money, and then, if we get you commuted, you are to pay both of us $25,000, which is to be the fee. Felder then says, "I am to pay my own expenses."

In view of the circumstance for Daugherty now to say that he got no compensation in the case compels the statement that he lacks candor.

I have here the CONGRESSIONAL RECORD of May 22, 1922, on page 7378 of which appears a letter written by Colonel Felder, to which I desire to refer. The colonel, as we know, is a very free letter writer; he has written several letters to me. In his interview already quoted by me he says the $5,000 retainer fee and $1,000 for expense money were paid to him in advance of Daugherty coming into the case, but here is his contract that Morse signed on the 4th day of August, 1911, from which it appears that he was to pay Hon. H. M. Daugherty a retainer of $5,000 and the actual expenses incurred by him in looking after your matters. Expenses not to exceed $1,000. That makes $6,000.

2. I will pay such expenses as I may incur in connection therewith.

Felder was not to get any retainer; he was not to get any expense money; he was to get his half of the $25,000 contingent

upon getting a commutation or pardon for Morse. Daugherty was to get $6,000; $5,000 as a retainer and $1,000 expense money. I now quote from the letter which Colonel Felder wrote to Leon O. Bailey, Hanover National Bank Building, New York, N. Y., dated October 12, 1917, and which was written from Washington, D. C.:

This decision was communicated—

He had been referring to the refusal of the President to grant a pardon—

This decision was communicated by Mr. H. M. Daugherty and myself to Mr. Morse, who had agreed to pay $6,000 cash to cover expenses—

That indicates he is mixing the two accounts, for there was a $5,000 contingent fee and $1,000 expense money—

to cover expenses (this sum was paid)—

That is what Felder said—

and $25,000 conditional upon our obtaining his release from the penitentiary.

In view of Daugherty's letter in which he said that Morse would observe that he was correct that only $6,000 had been paid, because the balance due was $25,000. That is what it means—"You owe us $25,000, and you will see from this contract that I was right." He could see that from the contract only in this way—I refer again to Felder's letter to Morse—

1. You are to pay Hon. H. M. Daugherty a retainer of $5,000 and the actual expenses incurred by him in looking after your matters. Expenses not to exceed $1,000.

* * * * * * *

4. We are to receive, in the event we secure an unconditional pardon or commutation for you, the sum of $25,000, which is to be in full compensation for services rendered in connection with your application for pardon.

That was the contract, and Daugherty says:

You will observe that I was correct in the statement that there was a balance due of $25,000 when you were commuted.

The only way he could observe that was from the contract and from the fact that he had paid the retainer of $5,000 and the expense money of $1,000. That is the payment Harry Daugherty got—$6,000—because it will be seen from the contract which Felder sent to him that Morse was to pay $6,000, $5,000 as a retainer, $1,000 expense money, and $25,000 as a fee.

Now, for the Attorney General to say that he got nothing is absolutely futile, because everybody who can read will know it is not true.

But that is not all. I recall, further, that Mr. Daugherty now says, as I read a few moments ago from his letter, that he never got a penny from Morse personally, that all he got was $4,000 from Felder, but Felder in this interview says:

Colonel Felder declared he made several unsuccessful attempts to persuade the Attorney General to accept some compensation in the Morse case—chiefly stocks in one of Morse's enterprises—but each time the Attorney General refused to accept it.

Further along in this interview, which, if I may be permitted, I desire to put in the RECORD, Felder says that Daugherty never got a penny out of it. In 1917 he says they got $6,000, and Daugherty in 1922 says he got $4,000 from Felder, and Felder says Daugherty refused every time he offered anything to him. Well, at least they would do well to hold a conference before they give out their next statement.

Mr. President, I think that matter has been so thoroughly gone over that it is settled. The Attorney General and his apologists must fall back upon some other statement with reference to whether Daugherty got anything out of the Morse case. In this connection it is amusing to note the statement of the Senator from Indiana—and I believe he was telling the truth about it—that not only did Daugherty not get anything out of this case but that he was not even promised anything. I asked him this question:

Let me ask the Senator—

That is, the Senator from Indiana—

whether this was the truth then—that he tried to get that fee, and it was so large that the prisoner would not pay it?

Mr. WATSON of Indiana. Oh, no; nothing of that kind, of course.

And yet here is Daugherty's letter dunning Morse for exactly $25,000, and here is Felder's letter in 1917 saying that Morse would not pay it, and Daugherty cussed him out for everything he could think of, and denounced him because he would not pay it; and yet the Senator from Indiana, reporting what the Attorney General had told him, says that there is not anything in the statement that he ever tried to get a fee out of the Morse case.

Let me, however, call attention to another phase of the Attorney General's and Felder's connection, Mr. President. Here is a letter that came to me on the 26th of last month. It was handed to me on the floor of the Senate, and its significance did not dawn on me at the time. I want to read two paragraphs from it. It is written by Col. T. B. Felder. The letterhead is—

FELDER, CHOROSH & M'CROSSIN.

Thomas B. Felder, William H. Chorosh, Edward J. McCrossin, Benjamin Shapiro, Counselors at Law, 165 Broadway, New York. Cable address, "Felderlaw." Phone, Cortland 7986.

He says:

I note that from day to day you continue your attacks upon the Attorney General and myself.

The Attorney General holds a public office, and I assume that you have a right to attack him as often and as viciously as you see fit. I am a private citizen engaged in the practice of law. I have been so engaged since I was 18½ years old. I have endeavored from the date of my admission to the bar to live up to the high standards and ideals of my profession. I can truthfully say that I have never, under any temptation, committed consciously an unprofessional act.

And so on. I just want you to know how highly he speaks of himself; and then he says that in view of that fact he does not see how I can say these cruel things about a gentleman. I want to assure him that I did not; but here is the important thing:

H. L. Scaife was employed in the Department of Justice. He resigned. The Senator from Ohio [Mr. WILLIS] and I fell into the error of thinking he had been discharged, and the Senator from Ohio said he, Scaife, had that bitterness that came from being discharged. He was not discharged. He resigned because the Attorney General would not prosecute certain cases that he had been set to investigate, and he believed they were to be whitewashed, so he resigned. He then furnished information on which WOODRUFF and JOHNSON, two Republican Members of the House, made speeches. Then later Colonel Felder came to Washington. He sent an agent to hunt up Captain Scaife, and asked him to call on him, Felder, in his room in the Shoreham Hotel. Scaife went, and Felder said: "I come to you at the request of the Attorney General. I represent the Bosch Magneto people—not the people that now own it, the American people, but the Germans who owned it before it was seized by the Alien Property Custodian. I represent them, and the Attorney General wants me to hire you to act with me to recover this property for them, and therefore I have come to employ you." Scaife was offered a substantial sum to engage in this matter. He evaded the offer. Felder said: "I have already had a talk with the Attorney General. We agree. I have talked for an hour and a half with Colonel Goff, who is handling this Bosch Magneto matter, and we agree. The Attorney General only wants me to hire you in this matter, and then it is all right."

Captain Scaife, I want to repeat, was the man who made the investigation, or one of them. He was the man that the Attorney General must rely upon if he successfully resisted a suit by the German claimants of this property; and at the request of the Attorney General Felder tried to hire away from the Government the man who could have been most helpful to the Government or most hurtful to it.

That statement never was denied. It went into the RECORD on the 5th day of May, 1922, and is there until to-day undenied. Neither the Attorney General nor Felder ever denied it. Felder wrote me this letter, and it contains his plea of guilty and avoidance. He says:

It is inconceivable to me—

And I beg the pardon of the Senator from Georgia for putting it into the RECORD—

that in the light of the facts that any United States Senator, save and except TOM WATSON, could make the charges against a gentleman that you made against me in connection with both the Morse and Scaife matters.

As I remarked awhile ago, I never talked about a gentleman in this case at all.

As to both matters I feel that I have not only clean hands but a clear conscience. I have fully discussed the Morse situation heretofore—

That is true. He has given out four different statements, every one of them false and neither one of them true.

I have fully discussed the Morse situation heretofore, and I now desire to take up with you the charges in relation to the Bosch Magneto case. You charge that I had been employed by the conspirators to protect them against punishment.

I never made any such charge. I said that he and the Attorney General had gone into an agreement to defraud the Government.

As a matter of fact, I was employed not by the American Bosch Magneto Co., the company that bought the seized property, but by the Bosch Magneto Co., the victim of the alleged conspiracy—

That is, he does not represent the company which has the property, but he is employed by the German owners who did own it prior to the time the Alien Property Custodian seized it

because it was the property of alien enemies. He represents these foreign owners—

the victim of the alleged conspiracy by the company—

That is, by the German company—

in connection with whose affairs it was charged on the floor of both the Senate and House—and I think the charges are correct—that the Government had been defrauded. The interest of my client and of the Government is in complete harmony and accord. If you entertain the slightest doubt as to this, I would suggest that you send for Major Scaife and get the facts from him at first hand. I am also ready to have the client to whom I referred in my letter to Congressman WOODRUFF call upon you and explain the full facts.

That is, he claims that he can show by his client that it would be to the Government's interest to let the German owners of the property regain it. The Government having sold it, and therefore being unable to deliver it, would be compelled to pay to these aliens whatever it is worth. I saw Major Scaife yesterday, and he said, "Why, the statement of Felder is absolutely untrue." He said that if the people that Felder now says he represents, the old German owners, were to recover, it would mean that the Government would have to pay anywhere from two to five million dollars, and the former German owners would be the profit takers and the American taxpayers would be the victims; and yet Felder does not deny, nor has the Attorney General denied, that they entered into an agreement whereby Felder was to represent these alien enemy owners whose property had been seized because they were alien enemies and sold to an American company; that he and the Attorney General had entered into an agreement whereby Felder was to represent one side, and of course the Attorney General was representing the other, and the taxpayers were to pay whatever the judgment might be; and he says now that there is no incompatibility between his interest and the Government's position.

I rather think he meant to say that there was no incompatibility between the interest of the Attorney General and himself, that they would profit, but, of course, the American people would pay the bill, whatever it was.

I overlooked the significance of that letter, because it opened with a plea and closed with a threat. He said this in his conclusion:

The only motive that I have is to leave to my young son the name that I bear as unsullied and as untarnished as I received it. I do not propose to be further vilified or slandered by you or any other man under Senatorial immunity. I am requesting man to man that you immediately cease your vilification of me. I make this request in seriousness and sincerity.

I am,

Very truly yours, THOMAS B. FELDER.

I did not refer to that before, because I did not want to make my friends uneasy for fear I was going to die prematurely, and, therefore, when I saw that threat I threw the letter in the desk and waited to see what would happen. I am not talking under Senatorial immunity, because, to satisfy this punctilious gentleman who has a colonel's prefix—though whether he got it by marriage or like he got into the Morse case, I do not know—I said some time ago, in order to get rid of answering letters, that I would waive all personal immunity. I do not intend to waive a legal right and be sued by a blackmailer, but personally I waived quite a long time ago any immunity that Mr. Felder thought I had, and that waiver stands now, and I am still talking about him, and he has not called on me yet, and is not coming. That is settled. But the reason why I read that letter is to show that here is one party to that agreement who has the effrontery to say that while he and the Attorney General had entered into the conspiracy as Scaife said he told him they had, yet that there was nothing incompatible in their relationship one with the other; that the Attorney General, representing the Government, and he, who was to sue the Government for the alien owners of this Bosch magneto, were representing the same interest, and, therefore, they could conspire together and hire each other's witnesses away from one another without any impropriety.

This inspired article says that the President thinks that this is a tempest in a teapot and will soon blow over, that the American people will soon forget, and that the President has the utmost confidence in his friend, who made him President, and does not think he [Daugherty] did anything ethically unwise or morally wrong. The article then says:

The paradox of the situation which is as much a mystery to the administration as people outside of it is why the Attorney General should be attacked to-day for helping to free Morse a decade ago when to-day the Department of Justice is doing everything in its power to put Morse back in jail.

I do not believe that there is anything paradoxical about it. Morse never paid his fee, so why should he not go to jail? He got out under a false representation that he was sick, and the Attorney General helped him perpetrate the fraud, and then he, Morse, perpetrated a fraud on the Attorney General, and would not pay his fee. I do not blame the Attorney General for wanting to put him back in jail, and I do not know why it should be said that it seems paradoxical that the Attorney General is pursuing him now. He is the only man the Attorney General is pursuing that I know anything about.

Then the article makes this further statement:

All sorts of conflicting rumors are afloat as to the purpose of the attack. Senator CARAWAY is held immune from any connection with the influences at work to discredit Mr. Daugherty, but it is charged again and again that information is being furnished Democratic Senators in the hope that they will keep up such a bombardment of the Department of Justice as to stave off possible prosecutions of persons prominent in a previous administration.

Whoever told the writer that silly falsehood ought to apologize to a reputable newspaperman for having him repeat it. He says "Democratic Senators." I do not know what has been furnished to other Democratic Senators. Not a line has come to me from anybody interested; and I want to call attention to the silliness of that kind of a smoke screen. The Attorney General was not doing a thing on earth but sitting up and drawing his salary and rewarding his friends and giving out interviews that the Civil Service ought to be abolished in order to help his friends into office. He was not prosecuting anybody. He was not investigating anybody. Everything was as serene as a spring day until this fight on the Attorney General commenced, and the papers to-day say that the Attorney General has 40 rooms to hold the lawyers that he had gotten together to prosecute the criminals. If any persons are trying to shield criminals by stirring up the Attorney General, they exercise no more intelligence than the Attorney General did when he gave out his interview about not having a thing to do with Morse, because if anybody goes to jail it will be because people have attacked the Attorney General and made him get busy.

He was not doing a thing. He was not threatening to do anything. Since the attack came he got $500,000, using part of it to hire a man away from a local paper here to be his publicity agent, and give out these big scare heads about Democrats going to jail. He took part of it to investigate Members of Congress who talked about it. I presume that is where the money came from; I do not know where he got the funds if they did not come from that source. That is his investigating fund. But up until this attack commenced he was not prosecuting anybody anywhere, and that silly statement that somebody is trying to throw up a smoke screen does not do credit to their intelligence. I have a 6-year-old boy, and if he would believe a thing like that I would send him to a school for the feeble-minded. He could not learn anywhere else.

Mr. President, I ask unanimous consent to incorporate in the RECORD the article in yesterday evening's Star, from which I read, and the article from the Times containing the conflicting statements of Felder and Daugherty, if there is no objection.

The VICE PRESIDENT. Without objection, it is so ordered.

The articles referred to are as follows:

PRESIDENT RETAINS FAITH IN INTEGRITY OF MR. DAUGHERTY—BELIEF HELD ATTORNEY GENERAL MERELY MADE POOR DEFENSE—KNEW OF MORSE CASE BEFORE APPOINTMENT—RUMORS CREDIT ATTACKS TO PERSONS DESIROUS OF HAMPERING WAR FRAUD PROBES.

(By David Lawrence.)

Attorney General Daugherty will not resign. President Harding has not asked him to do so and he never will. Mr. Harding has unlimited confidence in the integrity of his Attorney General and does not believe him guilty of anything wrong in the Morse case.

This is the inflexible attitude of the administration as revealed to-day after the President and his advisers returned from a cruise on the Mayflower, where the impression caused by the attacks in the Senate against the Attorney General was the subject of informal discussion.

Practically everybody in the administration group admits that Mr. Daugherty handled his own defense poorly and that the mix up between him and Senator WATSON of Indiana was most unfortunate. But on the basis of what has happened to date the administration feels no less confidence in Mr. Daugherty, nor does it feel that when all the facts and influences attempting to injure the Attorney General are exposed in the forthcoming war prosecutions the public will have an unfavorable impression of the man at the head of the Department of Justice.

PRESIDENT KNEW OF MORSE CASE.

There is something more than personal friendship and loyalty in Mr. Harding's attitude toward his lifetime associate and political mentor. It's true that to Harry Daugherty more than anyone else Mr. Harding owes his nomination at Chicago in 1920, which was equivalent to an election. It's true that Mr. Harding is under obligation to Mr. Daugherty, but it is also a fact that Mr. Harding knew in the fall of 1920 everything about the part Harry Daugherty played in obtaining a pardon for Morse under the Taft administration and that he did not consider it a bar to the appointment of Mr. Daugherty.

If Harry Daugherty had come out immediately after his connection with the Morse case was mentioned in Senate debate by Mr. CARAWAY, of Arkansas, and said: "Yes; I was an attorney for Morse and helped get him a pardon—I was a private lawyer then and had a right to defend my client"; no one would have thought any more about the incident. But in a telephone conversation between Harry Daugherty and Senator WATSON of Indiana, a misunderstanding occurred. This correspondent is presenting the version of that conversation which is told by friends of Mr. Daugherty.

Senator WATSON had communicated by telephone the fact that Senator CARAWAY had revived the Morse case. Mr. Daugherty, who had been hearing about the Morse case for 11 years, was not perturbed by it. In Ohio politics Mr. Daugherty has some violent opponents as well as stanch friends. The skeleton of the Morse case has been rattled every time Mr. Daugherty has been in the public eye. When Mr. WATSON of Indiana told him it was up again the Attorney General told him not to worry, as he hadn't received a cent from Morse. Mr. Daugherty imagined that the conversation related to whether he had received any money, and he authorized Mr. WATSON to deny it. During the course of the debate Senator WATSON went a step further and indicated that the Attorney General had denied his connection with the case altogether.

CALLED ERROR IN JUDGMENT.

In support of the contention that the Attorney General could not have claimed any such thing, administration supporters insist that Mr. Daugherty would never deny what had been common knowledge, and what had been printed in the newspapers at the time of his connection with the Morse pardon. The error in judgment which Mr. Daugherty made in ignoring the Senate proceedings for nearly three weeks before issuing a statement of explanation is now freely admitted by the administration group, but this was due as much to Harry Daugherty's own feeling that nothing new had been developed, and nothing injurious, as it was to the feeling of others in the administration circle who believed the whole thing a tempest in a teapot which would blow over if let alone.

There is reason to believe that the criticism which has swept the country because of Mr. Daugherty's belated explanation has not penetrated very deeply here. The view prevails that the incident soon will be passed by, and that the continued confidence of President Harding in Attorney General Daugherty will be demonstration enough that he doesn't think his friend did anything ethically unwise or morally wrong.

The paradox of the situation which is as much a mystery to the administration as people outside of it is why the Attorney General should be attacked to-day for helping to free Morse a decade ago when to-day the Department of Justice is doing everything in its power to put Morse back in jail. It is a fact that when the Shipping Board developed its case against Morse and asked the Attorney General about it he unhesitatingly told the Shipping Board to go ahead and then and there mentioned his early connection with the Morse case and the possibility of misunderstanding if he himself were to undertake the prosecution personally. He authorized, however, the appointment of a special Assistant Attorney General to handle the prosecution of Morse, and it was not until several weeks after this was done that the attack came in the Senate.

All sorts of conflicting rumors are afloat as to the purpose of the attack. Senator CARAWAY is held immune from any connection with the influences at work to discredit Mr. Daugherty, but it is charged again and again that information is being furnished Democratic Senators in the hope that they will keep up such a bombardment of the Department of Justice as to stave off possible prosecutions of persons prominent in a previous administration. The air is full of these charges and countercharges, but the answer of the administration is a decision to go ahead with the prosecution of Morse and everybody else who is now indicted or may be for connection with war contracts.

—

T. B. FELDER SEES PLOT TO INJURE ATTORNEY GENERAL—GEORGIA ATTORNEY SAYS HE GOT ONLY FEE PAID BY BANKER FOR HIS RELEASE.

The names of 23 men were drawn to-day by the jury commission to serve as an additional grand jury which will hear and investigate the evidence to be laid before them by Attorney General Daugherty concerning alleged fraudulent war contracts. The talesmen summoned will appear before Chief Justice McCoy in the District Supreme Court at 9 o'clock Thursday morning, when they will be examined for qualification.

[By International News Service.]

NEW YORK, May 23.—Flat and unequivocal denial that Attorney General Harry M. Daugherty "ever received one penny" of compensation for his efforts in behalf of getting Charles W. Morse released from Federal prison was made here to-day by Col. Thomas B. Felder, Georgia attorney, the Attorney General's partner in the famous proceedings.

RETAINER WENT TO FELDER.

Felder admitted that he [Felder] received a retainer of $5,000 and $1,000 expense money from Morse, "but this was paid," he said, "long before H. M. Daugherty had any knowledge of or connection with the case."

Colonel Felder declared he made several unsuccessful attempts to persuade the Attorney General to accept some compensation in the Morse case—chiefly stocks in one of Morse's enterprises—but each time the Attorney General refused to accept it.

Neither did Daugherty sign the contract of August 4, read in the Senate by Senator CARAWAY (Democrat), of Arkansas, under which Morse agreed to pay $25,000 to Felder and Daugherty for procuring his release, Felder said to-day.

"I sent a duplicate copy of the contract to Daugherty with a request that he sign it," Felder said, "but so far as I know he never considered he was a party to this contract, and from time to time he declined to accept anything to which I thought he was entitled."

TELLS OF NEW YORK CONFERENCE.

Felder said his files showed that he came to New York on April 13, 1913, at Daugherty's request, for a conference with Morse over the litigation of the Metropolitan Steamship Co., one of Morse's enterprises.

"The day after this conference," Felder said, "I called at the office of Charles W. Morse and demanded payment in my own behalf of the $25,000 contingent fee. Morse said he did not have the money, but offered me a block of stock in the Morse Securities Co., which I accepted. I was assured the stock was valuable and dividends were being paid, but none were paid.

"Some time later, realizing the stock was useless, I again called on Morse and demanded that he take back the stock and pay my fee. He admitted the stock I held was worthless, and turned over to me 2,000 shares of stocks that had a par value of $10,000 a share. From this stock I secured some dividends, but the stock began to decline soon and is now worthless.

"Several times I offered one-half of what I secured to Mr. Daugherty, and each time he refused to accept it.

"I make the assertion boldly that this groundless assault on Daugherty is the result of a deliberate conspiracy entered into by people who have plundered the Government to discredit him."

WRITES LETTER TO WATSON.

Felder to-day set forth his position exonerating the Attorney General in a letter to Senator JAMES E. WATSON, Republican, of Indiana, who was the first to deny on the Senate floor that Daugherty had ever received any compensation in the Morse case.

Colonel Felder further charged that the effort "to get Daugherty" is connected with the Government's investigation of the notorious Bosch Magneto case.

In a statement to-day Felder said:

"Martin E. Kern, of Allentown, Pa., a German alien who served three terms in the penitentiary, bought this property, and he and his assistants benefited millions of dollars.

"The Department of Justice actively took up investigation of this case, and failing to deter the Department of Justice, the people behind that case have inaugurated a campaign with Senator CARAWAY and Senator TOM WATSON, of Georgia, to discredit and stigmatize the Attorney General.

"Senator CARAWAY stated on the floor of the Senate that I was employed in the Bosch Magneto case to protect conspirators. This statement was absolutely false."

—

WICKERSHAM, PALMER, AND MCADOO LINKED IN DAUGHERTY EXPOSE.

[By William K. Hutchinson, International News Service.]

Four Cabinet officers from three successive administrations were linked up to-day with the Morse case, which already has aroused political Washington to fever heat.

Three Attorney Generals and a Secretary of the Treasury—Wickersham, Palmer, Daugherty, and McAdoo—named already on the floor of the Senate, are facing systematic delving into their records by political opponents. Threats of future developments in the ever-widening circles of the case are rivaled only by the records already made public.

CARAWAY "JUST STARTING."

Senator CARAWAY, Democrat, of Arkansas, announced to-day his attacks on Harry M. Daugherty, Attorney General in Harding's Cabinet, and George W. Wickersham, Attorney General in Taft's Cabinet, were "just starting."

On the other hand, Senator MOSES, Republican, of New Hampshire, declared developments in the case would "seriously embarrass" William Gibbs McAdoo, Secretary of the Treasury, and A. Mitchell Palmer, Attorney General in the Wilson Cabinet.

The revelations to date involved these Cabinet officers as follows:

Attorney General Daugherty, charged with knowledge of fraud perpetrated upon President Taft in the procuring of a pardon for Charles W. Morse, New York banker, in 1911, charged with having accepted a $5,000 retainer from Morse for his work in procuring the pardon. Charged with signing a contract to obtain Morse's release for $25,000.

Attorney General Wickersham, charged with knowledge of fraud in the procuring of a pardon for Morse.

Former Secretary of the Treasury McAdoo, charged with accepting a fee from Morse in connection with a Shipping Board case during the war.

Former Attorney General Palmer, charged with "embarrassing deeds" in connection with the sale of the Bosch Magneto Co., in which Morse was interested.

REPUBLICANS ARE WORRIED.

Born of a denouement in the Senate by Senator CARAWAY, the Morse case has usurped all talk in Senate corridors. Republicans to-day were plainly worried, awaiting the "next blow" from CARAWAY. On the Democratic side the threat of Senator MOSES that the publishing of certain records in the Morse and Bosch Magneto cases "would seriously embarrass and impugn the records" of Palmer and McAdoo had a disheartening effect.

CARAWAY first charged that Daugherty had conspired with Thomas B. Felder, an Atlanta pardon attorney, to obtain Morse's release. Denials, by Republican Senators, resulted in CARAWAY producing a "photostatic copy" of the purported "pardon contract" signed by Daugherty, Felder, and Morse. CARAWAY continued his attack by charging Daugherty and Felder knew that Morse's release had been obtained through the "injection of poisonous chemicals" to fool examining physicians who decided he was suffering from Bright's disease.

Going further, CARAWAY charged Daugherty and Felder knew of this purported "fraud" and had conferred with Attorney General Wickersham, impelling him to refrain from asking Taft to revoke the pardon. Wickersham, CARAWAY said, also knew of the alleged fraud.

Both sides in the Senate to-day were anxiously awaiting further developments.

Attorney General Daugherty remained silent to-day concerning his connection with the Morse case, and it was announced at the Department of Justice that he would not hold his usual conference with newspaper correspondents this afternoon.

THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

Mr. UNDERWOOD. Mr. President, before the vote comes on paragraph 219, I wish to say a few words in reference to it. As I have stated several times in the course of this debate, when the present law was written one of the purposes of the committee in drafting the law, and I presume the purpose of the Congress in passing it, was to remove taxation from that class of articles which were largely necessities of human life, and from that class of articles which went into the construction of homes in America. I have already pointed out what was done in the framing of the present law in the matter of the removal of taxes or the reduction of taxes on lumber, on cement, and on many other articles which go into the home.

We now reach the paragraph which covers window glass. A home could hardly be a home unless it had windows to allow the sunlight of heaven to pour in upon the rich and the poor alike. Paragraph 219 was rather a remarkable paragraph, as reported by the committee, when this bill first came before the Senate. I am glad to congratulate the committee on the fact that this morning they modified their views and reduced to some extent the burden of taxation which they intended to levy.

They have also changed the form of classification. I do not blame the committee for changing the form of classification under the original excessive taxes which they proposed to levy. Under the tariff laws which have heretofore been passed in reference to this article this paragraph read:

Unpolished, cylinder, crown, and common window glass.

That is in the present law, and that language was also in the Payne-Aldrich act of 1909. But the committee changed the classification by making it read:

Cylinder, crown, and sheet glass.

Of course, sheet glass means common window glass. I suppose that if the committee had not put a 50 per cent ad valorem tax on all the glass in this particular paragraph, there would have been no particular reason for striking out the words "common window glass" and inserting in place thereof "sheet glass."

As the paragraph was originally reported to the Senate it fixed specific rates on the various sizes of glass, so many cents a square foot, and then wound up by providing that "None of the foregoing shall pay a duty of less than 50 per cent." As there was none of this class which paid a duty before of anything like 50 per cent, and not much of it would have paid a duty of as much as 50 per cent if this specific rate had been left, when the committee reported the bill to the Senate it practically amounted to providing a rate which would require the rich, who have the great plate-glass windows, and the poor, who have the common window glass, alike to pay a tax of 50 per cent. In other words, on every dollar they pay for their window panes they were to add at least a half a dollar more in the shape of a tax, to go to the Government if the glass was imported, and if bought at home, a tax to go to the manufacturer of glass. But I am glad that the committee has had a change of heart, and has concluded at least to go back to the rates which in the lower brackets approximate the Payne-Aldrich rates, which were cut in two under the present law.

This paragraph provides for the making of window and plate glass that is unpolished. The next paragraph provides a higher tax on the glass when it is polished. But the proposition is the same. I will not apply my statement to all the glass that is made for windows, but, practically speaking, this is the condition which confronts the importation and the manufacture of glass:

The bigger the plate of glass is, the more inches it extends in length and breadth, the higher the price; the smaller it is in length and breadth, the lower the price is; and that is why the man who lives in a humble house has small window panes in his house.

Of course, as the price of glass is higher when the width and breadth are greater, the manufacturer endeavors to make his glass as wide and long as possible, whether it is made by machinery or whether it is made by hand. But glass is brittle. Glass is difficult to keep in large shapes, and it breaks, and when it breaks the manufacturer takes the broken pieces, cuts them into smaller sizes, and sells them in smaller sizes, because he has lost the opportunity to make the greater plate. This applies particularly to the next paragraph, covering polished glass, because, of course, a great deal of the breakage comes in the polishing of the glass; but it also applies to this paragraph.

This breakage produces the culls of this industry. It is what you might call a by-product. It is something that happens when the real objective of manufacture is not obtained, to wit, the making of the larger piece of glass. Of course, when you come to the by-product, the cull that is thrown off, that is something which must be disposed of, and all manufacturers want to get rid of it. Their prime object in manufacturing is the great sheet of glass. The smaller glass, which comes from the culls, must be disposed of, and the competition on glass coming from abroad is in that class. This I have gotten from witnesses who came before the Ways and Means Committee of the House of Representatives when the present law was written and when the Payne-Aldrich bill was before the House, that the main competition does not lie in the great sheets of glass. This book giving the information published by the Tariff Commission makes the same statement, that the active competition which the manufacturer desires protection against is not in the broad window panes, but is in the culls, and although the committee cut the rates in the balance of the lines in changing this schedule, they made no cut in the rate on the culls, in which the real competition is found, in the very first bracket as the bill was originally reported.

The bill provides:

Cylinder, crown, and sheet glass, by whatever process made, unpolished, not exceeding 150 square inches.

"Sheet glass" should read "common window glass."

A plate of glass measuring 150 square inches, if it was square, would be a little above 12 inches square, so this bracket covers all the glass from a foot square down. There is no question about whose houses glass a foot square goes into. It goes into the houses of the people of this country who are least able to pay this tax, and yet the committee in making this reduction from its first proposal this morning reduced every rate except the first rate.

The present law put a tax of seven-eighths of 1 cent on this plain glass. The committee, in reporting the bill, increased that rate to 1¼ cents a pound. The chairman of the committee—and I have not verified his figures, but I will assume they are correct, for the sake of this argument—states that under this tax of 1¼ cents a pound on glass from 12 inches square down, the present rate would amount to about 20 per cent ad valorem.

I have not worked it out for 1921—that is, nine months, and it is not given in this bill—but I am reading from the Summary of Tariff Information as furnished by the Tariff Commission, and for the year 1918, under the present law, the Tariff Commission says that the ad valorem rate on the goods imported was 8.84 per cent, less than 9 per cent.

Mr. SMOOT. The price at that time was 10 cents a pound, and to-day it is 6 cents.

Mr. UNDERWOOD. I am not talking about the price. Of course, the price varies. If we go back and take the present rate it will not change the prices that we shall probably have after war prices have ceased.

Mr. SMOOT. Some of these articles, I will say to the Senator, are cheaper now than they actually were before the war.

Mr. UNDERWOOD. I am not responsible for the figures, as I said in the beginning, which the chairman of the Committee on Finance announced to the Senate. I have not had a chance to work them out. I am assuming that he is correct, and I am sure that he did not overstate them.

In 1919 the imports of this particular article of glass embraced in the first bracket were 4,443 pounds, valued at $50,708. According to the way the Tariff Commission worked it out, they say that is equal to an ad valorem tax of 6.98, or just a little below 7 per cent. In 1920 they tell us the imports amounted to 3,190,492 pounds, valued at $319,395, and that the ad valorem rate amounted to 8.74 per cent, a little less than 9 per cent. I assume that the Tariff Commission are correct in working out the ad valorem equivalent on this glass that is 12 inches, or under, square. If that is true for 1918, 1919, and 1920, the three years that are worked out in the report, there was not an equivalent ad valorem rate on one of the articles, for the three years where the Tariff Commission worked it out, of as much as 9 per cent ad valorem.

Mr. SMOOT. That is true.

Mr. UNDERWOOD. It can not be otherwise. It is here. It is the record.

Mr. SMOOT. There is no doubt of that; but at the same prices it could not be more than 12 per cent under the rates we have reported here. It is only the difference between seven-eighths of a cent and 1¼ cents per pound.

Mr. UNDERWOOD. The Senator from Utah is always very pleasing in his explanations, but I will say——

Mr. SMOOT. Does the Senator from Alabama deny that?

Mr. UNDERWOOD. Just let me tell the Senator this: The Senator from North Dakota said he based this 20 per cent on the imports of 1921.

Mr. SMOOT. Oh, no; Mr. President——

Mr. UNDERWOOD. Of course the Senator from Utah was not present when the Senator from North Dakota said that, and if he wants to deny what the Senator from North Dakota said in his absence he can do so. I listened to the Senator from North Dakota and I understood him to say that the basis of his figures was the imports of 1921. If I am incorrect, I want to know it.

Mr. McCUMBER. Mr. President, I can make that definite now. I gave the figures as based on the first nine months of 1921, the average import price. Taking the first bracket, the average import price value was 6 cents a pound, and, of course, at 1¼ cents per pound we would have an equivalent ad valorem of 20 per cent. At seven-eighths of a cent per pound on the same basis it would be an ad valorem equivalent of 15 per cent. So the difference between the Underwood law and the

pending bill upon the first bracket would be 5 per cent ad valorem.

But may I correct the Senator from Alabama in one statement he made, and that is that if we would take the pre-war prices, the equivalent ad valorem would be about 40 per cent, or double. The pre-war price in 1914 was 4 cents as compared with our 6 cents. Therefore, it was two-thirds as high as it is at the present time, or a difference of 2 cents per pound. I do not know whether the Senator was here, but I gave the different prices on the pre-war basis as compared with the prices on which we are basing our ad valorem rates, namely, the first nine months of 1921. On the fourth bracket they are just the same as pre-war, and on the other brackets below they are very close to the same.

Mr. UNDERWOOD. I understand that, and that is just the logic of my argument. I am glad the Senator from North Dakota has set the Senator from Utah right.

Mr. SMOOT. The Senator from Utah understood that the Senator from Alabama was talking about the year 1920.

Mr. UNDERWOOD. Oh, no; the Senator can refer to the RECORD and see that I did not say that.

Mr. SMOOT. I say the Senator from Utah understood that that is what the Senator from Alabama said. I may have been mistaken. I said the price for 1920 was 10 cents, and the Senator will find that that is the case if he will look at the figures.

Mr. UNDERWOOD. But I did not say that.

Mr. SMOOT. Then I misunderstood the Senator.

Mr. UNDERWOOD. I said the Senator from North Dakota based the statement I read on the figures of 1921, and making the comparison, I read what the Tariff Commission said in reference to 1918, 1919, and 1920. They have not followed the figures out and made an estimate for 1921, but I read what they said for those three years, and then I said that the Senator from North Dakota had said that this rate, based on the figures for 1921, would be equal to 20 per cent.

Mr. SMOOT. That is what I said.

Mr. UNDERWOOD. Then there was no occasion for the Senator to interrupt me in my statement, because it is perfectly clear.

Mr. SMOOT. I misunderstood the Senator.

Mr. UNDERWOOD. Of course, we all sometimes misunderstand each other.

Mr. President, of course, as the Senator from North Dakota has said, when they get to the higher brackets they do not increase the ad valorem rate so much. I knew that when I started, because the high brackets of this glass show it. For instance, the last sizes of glass are 2,400 square inches. That is something like——

Mr. SMOOT. Four by five feet.

Mr. UNDERWOOD. Yes. That is the last bracket and includes anything above 2,400 square inches. It covers the great plate-glass windows of luxuriant department stores or of the luxuriant homes.

Mr. SMOOT. It is unpolished.

Mr. UNDERWOOD. I mean when it becomes polished. Of course, this is the base on which the polished glass is made. I am speaking of the raw material now, because when you get the raw material then you increase the tax on the finished product. But this is the base on which you put the glass in the fashionable stores and the plate-glass window of the palace, and you do not make such a very great increase when you come to that. You make the same discrimination when you come to the next paragraph, 220, polished glass, the finished product.

The last product that you tax are the great windows of luxury, which you tax at 2½ cents per pound. The article that must go into every little home of America you tax at 1¼ cents per pound, and yet this broken glass, this refuse of manufacture, is taxed. Of course not all of it is of that character, some of it being made for that purpose, and that is where the competition comes in. Competition in glass comes from the smaller pieces which are made where the manufacturer fails to accomplish his objective and make the larger piece of glass. I have had that detailed before committees time and time again. In other words, you are going to take the culls of manufacture and put your burden of taxation on them in order that you may increase the cost of building the home.

This is nothing new. You have done it in reference to lumber, you have done it in reference to cement, and you have done it in pretty nearly every article that goes to build a home. You are not going to get much revenue out of it. It is not productive of much taxation at the customhouse, because these people are perfectly capable of meeting the competition in the great proposition of manufacture. Where this glass is not made of the culls or broken glass, it is manufactured by machinery, and the Tariff Commission itself says that for machine-made glass the American manufacturer stands on an even basis with the manufacturer abroad.

More than that, the glass industry in America has a natural protection of its own that many other commodities do not have. Freight rates are high on glass. It is bulky and difficult to handle. The rates are much higher than on other commodities. Therefore to carry glass from abroad to the domestic market in the United States the freight rate is an item of consequence. Insurance is a serious matter. Men who ship glass insure the cargo against the danger of breakage and that costs money. So there is a very considerable item of transportation on all glassware moving from a foreign market before it enters the domestic market, which is to the benefit of the local manufacturer.

Of course, I know that the committee will answer, when I read them the figures of importation, that it may be true now, but that the war is over and that it is going to vastly increase in the near future, as every other article is going to increase in the imagination until the pending bill is passed. In 1914 the production of glass amounted to 400,000,000 pounds. That was when the industry had full competition from Belgium. Belgium was the principal manufacturer of glass that came in competition with the American producer in the American market. But during the war the Belgian mills were closed because Belgium was occupied by the German Army. After the war was over Belgium was back in possession of her own, and by the beginning of the year 1919 the production was increasing. The production in 1919 was 368,912,209 pounds, valued at $41,000,000. I thought I had in my hand the imports for 1919 summarized, but I do not find them. However, for 1919, in the first bracket, they amounted to 404,443 pounds; in the second bracket they amounted to 112,811 pounds; and so on down. I shall not take the time of the Senate to read them, because I have not added them up, but I will make a comparison of the imports in 1914, for which I have the figures in hand.

I stated awhile ago the production in 1914, when Belgium was in full blast and the rates under the present law were in effect. The Senator from Utah [Mr. SMOOT], however, suggests to me that Belgium was being shot to pieces in 1914, and so I will go back and take 1913. I have not the production for 1913, but the imports into this country in 1913 were 20,458,970 pounds, as compared to a production in 1914 of 400,000,000 pounds—20,000,000 pounds as against 400,000,000 pounds. So the imports amounted to about 5 per cent of the American production. Those figures may not be absolutely accurate, but they are substantially correct; and it appears that when commerce was unimpeded, importations coming from Europe were unobstructed, and the rates of the present law were in force, the imports amounted to only about 5 per cent of the American production, and, of course, less than 5 per cent of the American consumption. If anybody can say that when the industries of America have 95 per cent of the control of the American market they are going to be destroyed because somebody imports 5 per cent of the glass that America consumes, I think he has a vivid imagination.

Of course, the manufacturer wants the entire market in his own line; but what are we going to do for the Government? It is said by the majority party that they are going to levy taxes in order to collect revenue at the customhouse; but until we let some of these articles flow through the customhouse we can not collect any revenue, because nothing will come in upon which to levy the tax. Is 5 per cent too much for the Government's share, leaving 95 per cent upon which the manufacturer may charge increased prices behind an adamant tariff wall?

I think that under any fair adjustment of tariff taxes the Government should be allowed to have some opportunity; but if we increase the rates we are going to make them so high that we shall shut out importations, as will undoubtedly be the case in these lower brackets, if this paragraph is permitted to stand as reported to the Senate, proposing to levy a tax of 50 per cent ad valorem. Importations will be reduced to a certain extent even by raising the present rates as now proposed by the committee amendment, and the American people will be compelled to pay that additional tax to the manufacturer without, so far as I can see, any justification whatever.

Mr. KELLOGG. Mr. President, will the Senator from Alabama yield to me?

The VICE PRESIDENT. Does the Senator from Alabama yield to the Senator from Minnesota?

Mr. UNDERWOOD. I yield.

Mr. KELLOGG. Did I understand the Senator from Alabama to say that this bill carries a duty on ordinary building lumber?

Mr. UNDERWOOD. No. I said that under the present law, as it was written when I was chairman of the Ways and Means Committee, lumber was placed on the free list.

Mr. KELLOGG. And it is on the free list in the pending bill also, is it not?

Mr. UNDERWOOD. In some respects, I am free to say that the committee was wise enough to follow the example set for them in the present law, undoubtedly; but on other grades of lumber they have increased the rate of duty as to most articles that go into the building of homes; they have largely increased the duty over what it is in the present law.

Mr. KELLOGG. Building lumber and shingles by this bill are placed on the free list, are they not?

Mr. UNDERWOOD. The Senator from Minnesota means that the Republicans have continued lumber on the free list?

Mr. KELLOGG. Yes.

Mr. UNDERWOOD. Those articles are continued on the free list; but they were not on the free list under the Dingley Republican law and they were not on the free list under the Payne-Aldrich law, which was a Republican law. The Democrats, as I have stated, placed the ordinary grades of lumber, shingles, and many other articles on the free list in order that the builders of homes might have an opportunity, and in some few instances the Republicans have allowed them to stay where we placed them; but in numbers of other instances, as well as in this particular paragraph, they are raising the rates on building material, and in my opinion without any justification.

I do not care to take the time of the Senate in discussing all these items; there is no use of my doing that. Unpolished glass is the raw material; the next paragraph takes up the finished product, covering the glass after it is polished; and the next paragraph embraces a higher class of glass, which is more or less a luxury or a necessity for great buildings. But here is the crux of the glass schedule; here is the common glass. I realize that there are men who write tariff bills on the theory that the protection of an industry is more important for the Nation than the food and clothing and housing of the masses of the people. I do not say that in a spirit of demagoguery; I do not say it as an appeal because there are more poor people who vote than there are rich people; I have not invoked a spirit of that kind during my career in this Chamber; but I do say that the great mass of the American people in order to be good citizens, in order to love and honor their country, to live happy lives and raise their children properly, must have an opportunity to buy their food cheaply, to buy their clothes at reasonable prices, to build their own homes and not to be exploited by landlords exacting exorbitant rents. There is nothing that will make this Nation greater and more independent and insure a more patriotic and conservative citizenry than to allow every man in the Nation to own his own home. I say that when you pursue a deliberate policy, as is done in this bill, of raising the tax on food, raising the tax on clothes, raising the tax on the materials with which to build the homes, you are pursuing a policy that is in direct contravention of the best interests of our United States.

Mr. HEFLIN. Mr. President, before a vote is taken upon the pending item I merely wish to say a word concerning a thought which has been suggested by the speech of my colleague [Mr. UNDERWOOD]. I think it well for the country to know just what the program here is; just what is going on day after day with regard to this tariff bill. A few days ago the Republican Senate placed a tax upon sand from which glass is made. Nobody ever dreamed that any party would do that, but the Republican Party in the Senate has actually laid a tax upon sand. It has increased the price of the raw material, white sand, out of which glass is made. That is No. 1. They have not stopped at that, as my colleague has pointed out, but they have laid a tax upon unpolished glass, which is made from sand. That is No. 2. Then they have laid a tax upon the polished glass or finished glass, and that is No. 3.

So every fellow who uses glass in any form must pay all these taxes, because the consumer pays all the tax. Whenever the article is handed to him over the counter he pays every tax that is connected with it. I do not care what theorists may say about it; it is all put in the cost that the consumer pays when the article is handed over the counter to him.

I was just thinking while my colleague was speaking, Mr. President, about the fellow who buys a bottle in which to have milk delivered to his home for his baby, or several bottles bringing milk for the family. He has to pay a tax under this provision and under all these provisions—sand, unpolished glass, and polished glass. The more glass he buys the greater his tax. I got to thinking of some of the uses to which we put glass. I will mention just one or two, because I do not want to detain the Senate, for you seem to desire to vote on this item. I thought of fruit jars. The housewives of America, when fruit is here in abundance, want to preserve some of it for use in the winter, and they will cook up some of this fruit and will preserve it by putting it away in glass jars. The other side has made it more difficult for them to do that, because of the tax that they are laying on sand, unpolished glass, and polished glass. When they get ready to serve these luscious and delightful preserves in a glass bowl the tax proposition rises again, and when they go to drink this milk that comes in the glass bottle, from the drinking glass upon the table, here comes this Republican tariff tax upon sand, unpolished glass, and polished glass to stare them in the face with increased prices. You have taxed the windowpanes that let God's light of day into the homes of the people, and when the citizen needs glasses to enable him to read the pages of the Blessed Book you have taxed the spectacles that he must use. Verily, there is no escape from the taxgatherers of the Republican Party.

Mr. UNDERWOOD. I ask to have the pending amendment stated.

The VICE PRESIDENT. The amendment will be stated.

The ASSISTANT SECRETARY. On line 7, after the word "made," it is proposed to insert a comma and the words "and for whatever purpose used."

Mr. UNDERWOOD. I do not care to take any issue on that. I understand that that is merely a technical provision.

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. SMOOT. Now, on page 42, line 10, I move to strike out "1¾," and insert in lieu thereof "1⅞."

The VICE PRESIDENT. The question is on agreeing to the amendment offered by the Senator from Utah.

Mr. UNDERWOOD. Before this increase is voted over the present rate, although it is a reduction from the rate printed in the bill, I think the Senator from New Mexico [Mr. JONES], in charge of this schedule, desires to propose an amendment. I therefore make the point of no quorum, in order that he may be here.

The VICE PRESIDENT. The Secretary will call the roll.

The roll was called, and the following Senators answered to their names:

Ball	Harris	Nelson	Simmons
Brandegee	Heflin	New	Smoot
Broussard	Johnson	Newberry	Spencer
Bursum	Jones, N. Mex.	Nicholson	Sterling
Calder	Jones, Wash.	Norbeck	Sutherland
Capper	Kellogg	Norris	Townsend
Caraway	Kendrick	Oddie	Underwood
Curtis	Keyes	Page	Wadsworth
Dial	Ladd	Pepper	Walsh, Mont.
du Pont	La Follette	Poindexter	Warren
Edge	Lenroot	Pomerene	Watson, Ga.
Frelinghuysen	Lodge	Ransdell	Watson, Ind.
Gerry	McCumber	Rawson	Williams
Glass	McKinley	Robinson	Willis
Gooding	McLean	Sheppard	
Hale	McNary	Shortridge	

The PRESIDING OFFICER (Mr. LADD in the chair). Sixty-two Senators having answered to their names, a quorum is present. The question is on the amendment offered by the Senator from Utah.

Mr. JONES of New Mexico. Mr. President, I move to amend the amendment of the Senator from Utah by inserting, instead of "1⅞ cents," in line 10, page 42, "1 cent"; and before proceeding to a vote I desire to make just a little statement.

We were in some confusion earlier in the day as to prices. I have just been handed a list of prices, coming from official sources, of certain sizes of glass manufactured in this country for domestic consumption, and the prices of the same glass for export, and the landed cost of the Belgian glass. There is quite a table of these prices, but they are decidedly interesting.

I find that the American export price is in most cases considerably less than the American price to the American consumer, and that the Belgian price landed in New York is greater than the American price in New York. They are given in brackets here. I will not read the numbers of the brackets, because I will ask to have this table inserted in the RECORD; but the first domestic price of the American glass is $2.77, and the export price of the same article is $2.76, about the same, and the net price of the Belgian glass is $2.65. The Belgian price is on the basis of 25 per cent discount from the list price, and 8 cents per franc.

The franc is worth more than that now. These were January, 1922, prices. The comparative prices as to the other brackets are as follows:

Single thickness.	Net domestic price American glass.	Net export price American glass.	Net Belgian glass at 25 per cent discount from list at 8 cents per franc.
34-inch bracket	$3.22	$2.98	$3.17
40-inch bracket	3.36	2.98	3.17
50-inch bracket	3.69	3.25	3.54
54-inch bracket	3.98	3.33	3.69
60-inch bracket	4.09	3.33	3.89
70-inch bracket	4.38	3.54	4.04
80-inch bracket	4.88	4.15	4.53
84-inch bracket	5.26	4.46	4.84

It will thus be seen that the price of the Belgian ware in the New York market is in every instance, I believe, higher than the export price of the domestic product. That is for single-thickness glass. For duplicate thickness the figures are:

Double thickness.	Net domestic price American glass.	Net export price American glass.	Net Belgian glass at 25 per cent discount from list at 8 cents per franc.
25-inch bracket	$3.76	$3.08	$3.95
34-inch bracket	4.06	3.49	4.74
40-inch bracket	4.30	3.49	4.74
50-inch bracket	4.92	3.93	5.29
54-inch bracket	4.98	4.05	5.52
60-inch bracket	5.04	4.05	5.82
70-inch bracket	5.34	4.24	6.04
80-inch bracket	5.76	4.81	6.80
84-inch bracket	5.88	4.88	7.25

So it appears that we are not threatened with importations from Belgium. In every case I believe the Belgian price is greater than the export price of the American product, and in most cases the Belgian price in New York is greater than the New York price of the American product. So it would seem that there is very little danger of our markets being flooded with Belgian ware, and when I called attention this morning to the fact that this industry is closely held, that under an agreement between the machine producers and the hand producers the factories of this country of all kinds are working only six months in the year, under an agreement that 60 per cent of the whole market shall belong to the machine producers and 40 per cent to the hand producers; with the market so closely held as that and with the manufacturers themselves saying that upon the higher brackets they need no further duty, one of them saying that the present duty could be reduced—in the face of that condition the committee proposes to increase materially the duties under existing law, and all I am seeking to do by the amendment which I suggest is to retain the rates found in the existing law.

The industry is prospering as it has never prospered before. We are exporting this glass now, and Belgium is our competitor, if we have any; and nobody has had much to say about the low cost of production in Belgium. This industry especially is struggling to get on its feet again in Belgium.

Mr. President, I ask to have inserted in the RECORD a copy of the price list to which I referred a while ago.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

PARAGRAPH 219.

Prices of window glass January, 1922, 50 feet per box, f. o. b. New York.

"B" QUALITY.

	Net domestic price American glass.	Net export price American glass.	Net Belgian glass at 25 per cent discount from list at 8 cents per franc.
Single thickness:			
25-inch bracket	$2.77	$2.76	$2.65
34-inch bracket	3.22	2.98	3.17
40-inch bracket	3.36	2.98	3.17
50-inch bracket	3.69	3.25	3.54
54-inch bracket	3.98	3.33	3.69
60-inch bracket	4.09	3.33	3.89

Prices of window glass January, 1922, etc.—Continued.

	Net domestic price American glass.	Net export price American glass.	Net Belgian glass at 25 per cent discount from list at 8 cents per franc.
Single thickness—Continued:			
70-inch bracket	$4.38	$3.54	$4.04
80-inch bracket	4.88	4.15	4.53
84-inch bracket	5.26	4.46	4.84
Double thickness:			
25-inch bracket	3.76	3.08	3.95
34-inch bracket	4.06	3.49	4.74
40-inch bracket	4.30	3.49	4.74
50-inch bracket	4.92	3.93	5.29
54-inch bracket	4.98	4.05	5.52
60-inch bracket	5.04	4.05	5.82
70-inch bracket	5.34	4.24	6.04
80-inch bracket	5.76	4.81	6.80
84-inch bracket	5.88	4.88	7.25

Mr. SIMMONS. Mr. President, the Senator from New Mexico has made a very valuable contribution to this discussion. I stated a few days ago upon a venture that I believed that upon further investigation it would be found that our export prices were not very much above the import prices of foreign merchandise into this country. I think if the Senator will extend his investigation to other subjects along the same line he has pursued in getting the data he has just given the Senate he will find that there is practically the same difference between the domestic and export selling prices of domestic products which he has discovered with reference to the product we have been discussing.

The facts the Senator has given as to that article illustrate to my mind better than anything which has been developed in all of this discussion the cost to the American people of the proposed extortionate and prohibitory rates. They will enable the domestic producers to sell their products to the American consumers at profits far above what are reasonable, fair, and just, while selling the same products in foreign countries at a very much less price.

It is logical to argue that the difference between the domestic price of the domestic product and the export price of that product, if it will not accurately gauge the cost to the American people of these high rates which are now demanded, is at least an index of the extent to which this system enables the industries of the country to victimize the consumers of the country.

If we give the monopolized industries a protection which enables them to dominate and control the American market, and thus to fix their prices and their profits as high as they please, they will exact a big profit from the American people, while exacting of the foreigner only a moderate profit, which means, properly interpreted, that the protective system, as illustrated in this case, instead of inuring to the benefit of the American people, inures to the benefit of the foreign purchaser of our domestic products.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from New Mexico [Mr. JONES] to the amendment of the committee.

Mr. JONES of New Mexico. On that I ask for the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. DIAL (when his name was called). I have a general pair with the senior Senator from Colorado [Mr. PHIPPS], which I transfer to the senior Senator from Texas [Mr. CULBERSON], and vote "yea."

Mr. WARREN (when his name was called). I have a general pair with the junior Senator from North Carolina [Mr. OVERMAN]. I transfer that pair to the senior Senator from Pennsylvania [Mr. CROW] and vote "nay." I ask that this announcement of my pair and its transfer may stand for the day.

Mr. WATSON of Georgia (when his name was called). I have a general pair with the junior Senator from Arizona [Mr. CAMERON]. Not being able to obtain a transfer, I withhold my vote.

Mr. WATSON of Indiana (when his name was called). I transfer my pair with the senior Senator from Mississippi [Mr. WILLIAMS] to the senior Senator from Maryland [Mr. FRANCE] and vote "nay."

The roll call was concluded.

Mr. BALL. I transfer my general pair with the senior Senator from Florida [Mr. FLETCHER] to the senior Senator from New Hampshire [Mr. MOSES] and vote "nay."

Mr. EDGE. I transfer my general pair with the senior Senator from Oklahoma [Mr. OWEN] to the junior Senator from Oklahoma [Mr. HARRELD] and vote "nay."

Mr. NEW. I transfer my pair with the junior Senator from Tennessee [Mr. MCKELLAR] to the junior Senator from Oregon [Mr. STANFIELD] and vote "nay."

Mr. HALE. I transfer my pair with the senior Senator from Tennessee [Mr. SHIELDS] to the junior Senator from Maryland [Mr. WELLER] and vote "nay."

Mr. GLASS (after having voted in the affirmative). I transfer my pair with the senior Senator from Vermont [Mr. DILLINGHAM] to the senior Senator from Arizona [Mr. ASHURST] and permit my vote to stand.

Mr. SIMMONS. I wish to announce that my colleague [Mr. OVERMAN] is necessarily absent. If present, he would vote "yea."

Mr. HARRISON. I transfer my general pair with the junior Senator from West Virginia [Mr. ELKINS] to the senior Senator from Nevada [Mr. PITTMAN], and vote "yea."

Mr. STANLEY. I transfer my pair with the junior Senator from Kentucky [Mr. ERNST] to the senior Senator from Nebraska [Mr. HITCHCOCK], and vote "yea."

Mr. JONES of Washington. The senior Senator from Virginia [Mr. SWANSON] is necessarily absent for the day and I promised to take care of him with a pair. I find, however, that I can transfer that pair to the Senator from New Hampshire [Mr. KEYES], which I do, and vote "nay."

Mr. JONES of New Mexico (after having voted in the affirmative). I desire to announce the transfer of my general pair with the Senator from Maine [Mr. FERNALD] to the Senator from Missouri [Mr. REED]. I ask that this announcement may stand for the day.

Mr. CURTIS. I desire to announce that the Senator from Rhode Island [Mr. COLT] is paired with the Senator from Florida [Mr. TRAMMELL].

The result was announced—yeas 21, nays 45, as follows:

YEAS—21.

Caraway	Heflin	Pomerene	Underwood
Dial	Jones, N. Mex.	Robinson	Walsh, Mass.
Gerry	King	Sheppard	Walsh, Mont.
Glass	La Follette	Simmons	
Harris	Myers	Smith	
Harrison	Norris	Stanley	

NAYS—45.

Ball	Hale	Nelson	Smoot
Brandegee	Johnson	New	Spencer
Broussard	Jones, Wash.	Newberry	Sterling
Bursum	Kellogg	Nicholson	Sutherland
Calder	Kendrick	Norbeck	Townsend
Capper	Ladd	Oddie	Wadsworth
Cummins	Lenroot	Page	Warren
Curtis	Lodge	Pepper	Watson, Ind.
du Pont	McCumber	Poindexter	Willis
Edge	McKinley	Ransdell	
Frelinghuysen	McLean	Rawson	
Gooding	McNary	Shortridge	

NOT VOTING—30.

Ashurst	Ernst	McKellar	Stanfield
Borah	Fernald	Moses	Swanson
Cameron	Fletcher	Overman	Trammell
Colt	France	Owen	Watson, Ga.
Crow	Harreld	Phipps	Weller
Culberson	Hitchcock	Pittman	Williams
Dillingham	Keyes	Reed	
Elkins	McCormick	Shields	

So the amendment of Mr. JONES of New Mexico to the amendment was rejected.

The PRESIDING OFFICER. The question now is on the amendment offered by the Senator from Utah [Mr. SMOOT], on line 10, to strike out "1¾" and insert in lieu thereof "1⅞."

The amendment was agreed to.

Mr. SMOOT. On page 42, line 11, I move to strike out "2¼" and to insert in lieu thereof "1⅞."

Mr. JONES of New Mexico. I move to amend by inserting "1⅛" instead of "1⅞" proposed by the Senator from Utah. I will state that we have had one roll call upon this paragraph, and I assume that the vote on the other items will be just the same. So I shall not ask for a roll call on the further amendments, but I desire to reserve a vote in the Senate upon all the amendments in this paragraph.

Mr. SIMMONS. Mr. President, may I ask the Senator from New Mexico if glass of the character covered by this rate is imported from Belgium?

Mr. JONES of New Mexico. I assume that all of it is. I know of none coming from any other country.

Mr. SIMMONS. Belgium is our only competitor?

Mr. JONES of New Mexico. Belgium is our only competitor.

Mr. SIMMONS. The glass she sends us sells in New York at a higher price than the domestic glass, I understand.

Mr. JONES of New Mexico. So it appears from the official price list which I inserted in the RECORD,

Mr. SMOOT. That is the selling price, but not the cost price.

Mr. JONES of New Mexico. It is the landed price f. o. b. New York.

Mr. SMOOT. I do not want to get into any discussion about it, but——

Mr. SIMMONS. We need to have some discussion about it. If the figures given by the Senator are true, we ought to have some discussion that would enlighten the Senate.

Mr. SMOOT. All I will say is that the foreign value in the United States currency, with the landing charges, freight, and insurance added, and the duty added to that, is a lower price than that at which it is sold for here. It is said that the profit in selling that article in the United States is all the way from 60 to 80 per cent, and with that 60 to 80 per cent profit over and above the cost of the article in Belgium, together with freight and landing charges, plus the duty and the profits, it is sold in some cases a little higher than the American article and in some cases a little lower.

Mr. SIMMONS. Let me ask the Senator from New Mexico another question. When the Senator spoke of the selling price of the Belgian glass in the New York market did he include the duty?

Mr. JONES of New Mexico. It is the f. o. b. New York price, and I assume that the present duty is included.

Mr. SIMMONS. The Senator assumes that the duty is included?

Mr. JONES of New Mexico. I assume that it is, because it is the f. o. b. New York price.

Mr. SIMMONS. Has the Senator subtracted the duty to see what would be the net result?

Mr. JONES of New Mexico. I have not, but I was trying by these figures to show conditions under the existing law. It seems to me they demonstrate that there is no necessity for increasing the duty. The prices to which the Senator from Utah has just referred are the prices of August of last year, while the prices which I have are of January of this year.

Mr. SIMMONS. And they are admittedly higher, I think.

Mr. JONES of New Mexico. I imagine in some cases they are a little higher and in some cases a little lower.

Mr. SMOOT. I think they are lower to-day not only in this country but in Belgium as well.

Mr. SIMMONS. They are lower than they were last August?

Mr. SMOOT. Yes.

Mr. SIMMONS. The evidence I have is that since last August the prices of imports into this country have increased.

Mr. SMOOT. Not at all on glass.

Mr. SIMMONS. I am not speaking specifically about glass. I was speaking about general prices.

Mr. SMOOT. I think the Senator will admit that the prices quoted there are prices at which the glass is sold in the United States, and also that the prices quoted of the foreign article are f. o. b. at the mill.

Mr. SIMMONS. Then if we take that to be true, the prices at which this product is offered for sale by the foreigner in New York, after paying the duty under the present law, are a little higher than the export prices of the American product.

Mr. JONES of New Mexico. And in a great many instances they are very much higher.

Mr. SIMMONS. Yes; very much higher.

Mr. JONES of New Mexico. In the higher brackets especially the prices are much higher. I mean by that the larger sizes of the glass.

Mr. SIMMONS. That would clearly demonstrate, I think, that the present duty affords the American producer all the protection that he can possibly ask for in conscience upon this article.

Mr. SMOOT. I know the Senator wants to be perfectly fair, and I know the prices he is quoting are the cost prices in Belgium plus the landing charges and the insurance and the duty, plus 60 or 70 per cent profit, as shown by the Reynolds report. They can cut that 60 or 70 per cent profit and then it would be under the selling price in the United States.

Mr. SIMMONS. But I do not suppose it includes importers' profits.

Mr. JONES of New Mexico. I am not willing to allow that statement to go unchallenged, because I read from the official paper and I will read just what it says:

Prices of window glass January, 1922, 50 feet, per box f. o. b. New York.

Mr. SMOOT. That is exactly what I said.

Mr. JONES of New Mexico. That does not include any profit by the importer.

Mr. SMOOT. But that is f. o. b. New York. That is where the importer buys the product and lands it at New York. The Reynolds report will show that to be the case.

Mr. SIMMONS. The importer's profit is not included, because the importer is not presumed to pay himself a profit. It is clear to me that there are no profits included in the foreign prices and that it is the landed cost plus the freight and insurance and the duty, and that is all. Now, the American export price includes in it a profit to the American wholesaler, and with that profit to the American wholesaler it seems that the landed cost with the duty added on the foreign article is a little higher than the export price of the domestic article.

Mr. SMOOT. Does the Senator from North Carolina mean that the importer will bring the glass in here f. o. b. New York and sell it at just what it costs him f. o. b. New York?

Mr. SIMMONS. I mean nothing of the sort, and no one has said anything that approached that. What the Senator from New Mexico has said to the Senate, and all that he said, is that the landing cost in New York to the importer of that article was so much, duty paid. The importer's profits will not be included until the importer sells it. The article he quoted does not give the selling price of that article in New York. The selling price, of course, would include the importer's profit. The quotation speaks of the landed cost, landed in New York, invoiced to a certain importer, and that includes nothing except what the importer gives for it plus the duty and the insurance and the freight. That is all. If it had said the selling price of the article in New York it would have been different, because the selling price would have included the importer's profit, but the Senator has said that his figures only applied to the landed cost. There is a vast difference between the landed cost and the selling cost.

Mr. SMOOT. I never in my life heard of a landing cost f. o. b. If the Senator from North Carolina can imagine a landing cost f. o. b., I can not understand it. I do not know what it is. I never heard of it.

Mr. SIMMONS. I buy an article for the purpose of reselling it. It is booked to me f. o. b.

Mr. SMOOT. Oh, that is c. i. f. That is not f. o. b.

Mr SIMMONS. Yes, it is f. o. b. at the point of shipment, and landed cost included the transportation and insurance charges, and the duty is the entrance fee, so to speak.

Mr. JONES of New Mexico. Mr. President, I want to call attention to the heading of that column. It says:

Net Belgium glass at 25 per cent discount from list at 8 cents per franc.

If you put the franc at its present value, this price would be increased accordingly about 12½ to 15 per cent. But even assuming that the Senator from Utah is right about it, that these articles are on the market at those prices, still we have the Belgium glass on the market, in a great many cases with the prices higher than the American glass on the market in New York and in every case higher than the American prices for export.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from New Mexico to the amendment proposed by the Senator from Utah.

The amendment to the amendment was rejected.

The PRESIDING OFFICER. The question recurs on the amendment offered by the Senator from Utah.

The amendment was agreed to.

Mr. SMOOT. On page 42, line 13, I move to strike out the numerals "2¼" and to insert in lieu thereof the numerals "1¾."

Mr. JONES of New Mexico. I move to amend the amendment offered by the Senator from Utah by inserting the numerals "1½" instead of "1¾."

The PRESIDING OFFICER. The question is on the amendment of the Senator from New Mexico to the amendment of the Senator from Utah.

The amendment to the amendment was rejected.

The PRESIDING OFFICER. The question recurs on the amendment offered by the Senator from Utah.

The amendment was agreed to.

Mr. SMOOT. On page 42, line 15, I move to strike out the numerals "3¼" and to insert in lieu thereof the numeral "2."

Mr. JONES of New Mexico. I move to amend the amendment of the Senator from Utah by inserting the numerals "1½" instead of the numeral "2."

The PRESIDING OFFICER. The question is on the amendment of the Senator from New Mexico to the amendment of the Senator from Utah.

The amendment to the amendment was rejected.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Utah.

The amendment was agreed to.

Mr. SMOOT. On page 42, line 16, I move to strike out the numerals "3¼" and to insert in lieu thereof the numerals "2¼."

Mr. JONES of New Mexico. I move to amend the amendment proposed by the Senator from Utah by inserting the numerals "1⅞" instead of the numerals "2¼."

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from New Mexico to the amendment of the Senator from Utah.

The amendment to the amendment was rejected.

The PRESIDING OFFICER. The question recurs on the amendment offered by the Senator from Utah.

The amendment was agreed to.

Mr. SMOOT. On page 42, line 17, I move to strike out the numeral "4" and to insert in lieu thereof the numerals "2¼."

Mr. JONES of New Mexico. I move to amend the amendment of the Senator from Utah by inserting the numeral "2" instead of the numerals "2¼."

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from New Mexico to the amendment of the Senator from Utah.

The amendment to the amendment was rejected.

The PRESIDING OFFICER. The question recurs on the amendment offered by the Senator from Utah.

The amendment was agreed to.

Mr. SMOOT. On page 42, line 18, I ask that the committee amendment may be disagreed to; and if the Senate disagrees to the committee amendment, I shall then ask to strike out the proviso, which reads as follows:

Provided, That none of the foregoing shall pay less duty than 35 per cent ad valorem.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The amendment was rejected.

Mr. SMOOT. I now move, in line 17, page 42, to strike out, after the words "Provided," down to and including the word "further" in line 19.

The PRESIDING OFFICER. The amendment moved by the Senator from Utah will be stated.

The ASSISTANT SECRETARY. On page 42, line 17, after the word "Provided," is is proposed to strike out:

That none of the foregoing shall pay less duty than 50 per cent ad valorem: *Provided further*—

The PRESIDING OFFICER. The question is on the amendment of the Senator from Utah.

The amendment was agreed to.

Mr. SMOOT. Now, Mr. President, I should like to return to paragraph 25.

Mr. JONES of New Mexico. I suggest the absence of a quorum.

The PRESIDING OFFICER. The absence of a quorum being suggested, the Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ball	Harris	Nelson	Simmons
Borah	Harrison	New	Smith
Brandegee	Heflin	Newberry	Smoot
Broussard	Johnson	Nicholson	Spencer
Bursum	Jones, N. Mex.	Norris	Sterling
Capper	Jones, Wash.	Oddie	Sutherland
Caraway	Kellogg	Page	Townsend
Cummins	Kendrick	Pepper	Underwood
Curtis	King	Poindexter	Wadsworth
Dial	La Follette	Pomerene	Walsh, Mont.
du Pont	Lenroot	Ransdell	Warren
Frelinghuysen	McCumber	Rawson	Watson, Ga.
Glass	McKinley	Robinson	Willis
Hale	McNary	Sheppard	

The PRESIDING OFFICER. Fifty-five Senators have answered to their names. A quorum is present. The Secretary will state the pending amendment in paragraph 25.

The ASSISTANT SECRETARY. In paragraph 25, coal-tar products, beginning on page 8, the first committee amendment, on page 9, line 14, has been agreed to. The next amendment is, on page 9, line 25, to strike out "tar" and insert "tar,".

The amendment was agreed to.

The next amendment was, on page 10, line 17, after the numerals "1546," and before the words "per cent," to strike out "30" and insert in lieu thereof "50."

Mr. KING. Mr. President, it seems to me that paragraphs 25 and 26 are so closely interrelated that a discussion of one involves a discussion and consideration of the other. I had hoped that the able Senator from New Jersey [Mr. FRELINGHUYSEN] or some other member of the committee would present such reasons as it may be thought the Senate should be put in possession of to justify the changes in this schedule from the schedule reported in the House bill. I was about to offer an amendment, but if any member of the committee cares to discuss these provisions, I hope he will do so for our enlight-

enment, and I shall be glad to pretermit action on my part for the present.

Mr. FRELINGHUYSEN. Mr. President, I think the suggestion of the distinguished Senator from Utah that paragraphs 25 and 26 should be discussed together is a very good one, because the two paragraphs are very closely related. Paragraph 25 provides for duties on intermediates, those products which are necessary to make the finished dyes, and paragraph 26 relates to dyes, flavors, perfumes, synthetic tanning material, phenolic resin, photographic chemicals, medicines, colors, and other coal-tar products. The committee have provided for a specific duty of 7 cents per pound for these products, and in one case 60 per cent ad valorem——

Mr. NORRIS. Mr. President, will the Senator read the products, so that we may know what they are? [Laughter.]

Mr. FRELINGHUYSEN. I thank the Senator for that suggestion. I can not read them. I will try to pronounce them when the time comes.

Mr. NORRIS. I should like to hear the Senator pronounce them, so that we may vote intelligently.

Mr. FRELINGHUYSEN. The committee has provided a specific duty of 50 per cent on the articles in paragraph 25 and 7 cents a pound, and 60 per cent on the articles in paragraph 26 and 7 cents a pound. In addition to that the committee has extended for one year the selective-license system now in the emergency tariff, which forms part of another paragraph, and they have also provided that if found necessary the President may extend it for a further period of one year. These paragraphs are all closely related, and refer to the protection of the dye industry established during the war; and the consideration of these paragraphs and their passage is a question of very important national policy.

The rates fixed by the committee of 50 and 60 per cent are based upon an average of the differentials between the cost of the manufactured dyes here and some of the imported prices. I do not think they are high enough, but I want to say at this point that we have before us the survey of the Tariff Commission, which states, on page 24:

> What rate of duty would protect all branches that now show any growth and will guarantee the development of those that are missing? To this the Tariff Commission is bound to answer that this end apparently can not be accomplished by any rate of duty familiar in American tariff legislation. This conclusion is inevitable when a comparison is made of what is known of domestic costs with the pre-war prices of German dyes or even with the very recent prices at which those dyes were offered in exchange for food.

Further on in that report, we find these words:

> Again, deceptive advertising and misleading propaganda can be protracted by many shrewd devices long enough to demoralize a market in spite of any law that has thus far been enacted.

I skip part of the report.

> A law that would be effective against German dumping of dyestuffs will be difficult to draw, for the usual test of dumping can hardly be applied. A comparison of their export with their domestic prices will have little meaning, because both are fixed by a monopoly and may be adjusted at will, and because private contract prices may easily be made to vary widely from published quotations.

Mr. President, before the war we had practically no dye industry in this country. Under the extremity of war the American manufacturer created an industry which made us independent of the country that formerly supplied us, Germany. Prior to the war Germany had absolute domination in the dye industry of the world. We purchased practically all of our dyes from her. To-day we are independent; but unless there is proper protection, and unless there is a restrictive license which will allow our chemists to continue their research and experimentation, this dye industry can not live.

Later in the debate I shall introduce in the RECORD the statements of prominent men, statesmen, and those who have had an opportunity to study this question carefully, tending to show that if we are to maintain this industry it is absolutely necessary that we not only have these duties for the dyes that are admitted under the selective embargo but also that we have the selective embargo to protect our industries against the competition of those who can undersell and practically manufacture at less cost than we can.

That is the reason why the committee have placed in the bill these two provisions and fixed these rates, as well as extending the embargo.

Mr. McCUMBER. I ask unanimous consent that the Senate will agree to recess until to-morrow at 11 o'clock when it completes its session this calendar day.

The VICE PRESIDENT. Is there objection to the request of the Senator from North Dakota? The Chair hears none, and it is so ordered.

Mr. KING. Mr. President, I ask that the committee amendment be rejected.

The VICE PRESIDENT. The question is on agreeing to the amendment reported by the committee.

Mr. KING. On that I ask for the yeas and nays.

The yeas and nays were ordered, and the Assistant Secretary proceeded to call the roll.

Mr. DIAL (when his name was called). Transferring my pair with the Senator from Colorado [Mr. PHIPPS] to the Senator from Texas [Mr. CULBERSON], I vote "nay."

Mr. EDGE (when his name was called). Making the same announcement as heretofore regarding the transfer of my pair, I vote "yea."

Mr. GLASS (when his name was called). Transferring my general pair with the senior Senator from Vermont [Mr. DILLINGHAM] to the senior Senator from Arizona [Mr. ASHURST], I vote "nay."

Mr. HARRISON (when his name was called). Transferring my general pair with the junior Senator from West Virginia [Mr. ELKINS] to the senior Senator from Nevada [Mr. PITTMAN], I vote "nay."

Mr. NEW (when his name was called). Making the same announcement as to the transfer of my pair, I vote "yea."

Mr. WARREN (when his name was called). Again announcing the transfer of my pair, I vote "yea."

Mr. WATSON of Indiana (when his name was called). I transfer my pair with the Senator from Mississippi [Mr. WILLIAMS] to the Senator from Vermont [Mr. PAGE] and will vote. I vote "yea."

The roll call was concluded.

Mr. BALL. Transferring my general pair with the senior Senator from Florida [Mr. FLETCHER] to the senior Senator from New Hampshire [Mr. MOSES], I vote "yea."

Mr. HALE. Making the same announcement as before, I vote "yea."

Mr. STANLEY (after having voted in the negative). I transfer my pair with the junior Senator from Kentucky [Mr. ERNST] to the senior Senator from Nebraska [Mr. HITCHCOCK], and will allow my vote to stand.

Mr. FRELINGHUYSEN (after having voted in the affirmative). I transfer my general pair with the Senator from Montana [Mr. WALSH] to the Senator from Minnesota [Mr. NELSON] and will allow my vote to stand.

Mr. SMITH (after having voted in the negative). I have a general pair with the Senator from South Dakota [Mr. STERLING]. In his absence I transfer that pair to the Senator from Rhode Island [Mr. GERRY] and will allow my vote to stand.

Mr. CURTIS. I have been requested to announce that the Senator from Rhode Island [Mr. COLT] is paired with the Senator from Florida [Mr. TRAMMELL], and that the Senator from Arizona [Mr. CAMERON] is paired with the Senator from Georgia [Mr. WATSON].

The result was announced—yeas 37, nays 20, as follows:

YEAS—37.

Hale	Ball	New	Spencer
Brandegee	Johnson	Newberry	Sutherland
Bursum	Jones, Wash.	Nicholson	Townsend
Calder	Kellogg	Oddie	Wadsworth
Capper	Lenroot	Pepper	Warren
Curtis	Lodge	Poindexter	Watson, Ind.
Edge	McCumber	Ransdell	Willis
France	McKinley	Rawson	
Frelinghuysen	McLean	Shortridge	
Gooding	McNary	Smoot	

NAYS—20.

Caraway	Heflin	Norris	Smith
Dial	Jones, N. Mex.	Pomerene	Stanley
Glass	Keyes	Robinson	Swanson
Harris	King	Sheppard	Underwood
Harrison	La Follette	Simmons	Walsh, Mass.

NOT VOTING—39.

Ashurst	Elkins	McKellar	Reed
Borah	Ernst	Moses	Shields
Broussard	Fernald	Myers	Stanfield
Cameron	Fletcher	Nelson	Sterling
Colt	Gerry	Norbeck	Trammell
Crow	Harreld	Overman	Walsh, Mont.
Culberson	Hitchcock	Owen	Watson, Ga.
Cummins	Kendrick	Page	Weller
Dillingham	Ladd	Phipps	Williams
du Pont	McCormick	Pittman	

So the amendment of the committee was agreed to.

Mr. McCUMBER. Mr. President, I should like to return to page 31, paragraph 201. I want to offer an amendment striking out paragraph 201 entirely and substituting a paragraph for it. This is the paragraph relating to fire brick, and so forth. At the end of that paragraph, as Senators will remember, on which we had a long discussion, we added:

> All brick not specially provided for, 25 per cent ad valorem.

That addition was simply to protect a few brickmakers along the Canadian line whose product competed with a Canadian product in the near-by vicinity. On account of freight rates we did not consider at that time that there was any danger of its affecting the general price of building bricks throughout the United States. That being its purpose, I am going to ask, if we can pass it through without further delay, to offer the amendment proposed by the Senator from Utah [Mr. SMOOT]; but since the amendment which was offered by the Senator from Utah was introduced we have made a slight change in magnesite, increasing the duty from $8 to $15 per ton, and the amendment as drawn by the senior Senator from Utah provided for a duty of four-tenths of 1 cent per pound to take care of the $8 per ton on the magnesite that was used in the fire brick. Raising that rate on the magnesite from $8 a ton to $15 a ton would make a differential which would require three-fourths instead of four-tenths of 1 cent per pound in the cost of the fire brick.

The amendment which I now offer would read as follows:

Strike out all of paragraph 201, page 31, and insert in lieu thereof the following:

"PAR. 201. Bath brick, chrome brick, and fire brick not specially provided for, 25 per cent ad valorem; magnesite brick, three-fourths of 1 cent per pound and 10 per cent ad valorem."

If that is carried, as I hope it will be, then, on page 217, after line 5, we would insert a new paragraph—that is on the free list—which would read:

PAR. 1535a. Brick not specially provided for:

That would put all of building brick and brick not specially provided for on the free list, with this proviso:

Provided, That if any country, dependency, Province, or other subdivision of government imposes a duty on such brick imported from the United States, an equal duty shall be imposed upon such brick coming into the United States from such country.

That last provision would adequately protect those along the border against the Canadian importation where the Canadian Government imposes an even higher duty upon the American brick; and inasmuch as that does not come into competition except in the close vicinity, I can not believe that there will be any serious objection to it.

Mr. UNDERWOOD. Mr. President, I should like to ask the Senator about his proviso. I have not been able to read it, and therefore could only catch it from the Senator's reading. The proviso in reference to the free list is what he is discussing?

Mr. McCUMBER. Right at the bottom of the amendment.

Mr. UNDERWOOD. I will read it over, so that I can ask my question better:

Brick not specially provided for: *Provided*, That if any country, dependency, Province, or other subdivision of government imposes a duty on such brick imported from the United States an equal duty shall be imposed upon such brick coming into the United States from such country.

That would exclude, of course, the brick on the border; I realize that; but would that apply to any other country except Canada?

Mr. McCUMBER. I do not think it can. I know of none coming from Mexico. I have not heard of any, and I do not think there are any.

Mr. UNDERWOOD. If a duty was imposed on countries that are not border countries, it would not apply?

Mr. McCUMBER. It certainly would not. It would, of course, if they imposed a duty, but I know of no other country that is imposing a duty except Canada.

Mr. ROBINSON. Mr. President, I ask that the amendment offered by the Senator from North Dakota be reported.

The VICE PRESIDENT. The amendment will be stated.

The ASSISTANT SECRETARY. The amendment is in two parts——

Mr. ROBINSON. No; I did not understand that the Senator had offered the second amendment at this time. That is the reason why I asked to have the amendment reported. I understood the Senator from North Dakota to say that if the first amendment was adopted—the amendment relating to bath brick, chrome brick, and fire brick—it was then his purpose, after that had been adopted, to offer the other portion of it, to place common brick on the free list.

The Senator can not, of course, propose two amendments at once, and he has not done it. He has proposed an amendment to strike out paragraph 201 and insert certain language in lieu of it; and I ask that the pending amendment be reported.

The VICE PRESIDENT. The amendment will be stated.

The ASSISTANT SECRETARY. It is proposed to strike out all of paragraph 201, on page 31, and to insert in lieu thereof the following:

PAR. 201. Bath brick, chrome brick, and fire brick not specifically provided for, 25 per cent ad valorem; magnesite brick, three-fourths of 1 cent per pound and 10 per cent ad valorem.

Mr. ROBINSON. Mr. President, I propose the following amendment to the amendment of the Senator from North Dakota: Strike out "25" and insert "10," so that it will read:

Bath brick, chrome brick, and fire brick not specifically provided for, 10 per cent ad valorem.

The VICE PRESIDENT. The question is on the amendment offered by the Senator from Arkansas to the amendment of the Senator from North Dakota.

Mr. ROBINSON. Mr. President, the paragraph as reported by the Finance Committee segregates brick into as many as nine different classes for the purposes of imposing a tariff.

The first class is fire brick weighing not more than 10 pounds each, not glazed, enameled, ornamented, or decorated. Upon that class of fire brick the original Finance Committee amendment contemplated a tariff of 15 per cent, the House having imposed a tariff of 10 per cent.

Upon the second class, according to the Finance Committee's arrangement—glazed, enameled, ornamented, or decorated fire brick—the committee proposed to impose a tariff of 30 per cent in place of 20 per cent as proposed by the House of Representatives.

The third class embraced brick weighing more than 10 pounds each, and not specially provided for, not glazed, enameled, ornamented, or decorated in any way. The Finance Committee amendment proposed to increase the House rate of 17 per cent to 25 per cent.

On the fourth classification—glazed, enameled, ornamented, or decorated brick weighing more than 10 pounds each—the Finance Committee amendment contemplated a rate of 35 per cent, increasing the House rate, which was fixed at 20 per cent.

On magnesite brick, the fifth class, the House proposed a duty of three-fourths of 1 cent per pound and 10 per cent ad valorem. The Finance Committee proposed to reduce that to four-tenths of 1 cent per pound and 10 per cent ad valorem.

Mr. SMOOT. And now it is proposed to increase it to three-fourths of a cent.

Mr. ROBINSON. But on account of the action of the Senate a day or two ago in imposing a high rate of duty on crude magnesite it is proposed in the pending amendment to increase that rate to three-fourths of a cent a pound.

Mr. McCUMBER. To go back to the House rate.

Mr. ROBINSON. The next classification, No. 6, related to chrome brick, not glazed, enameled, painted, vitrified, ornamented, or decorated. The Finance Committee amendment proposed to increase the rate from 20 to 25 per cent ad valorem.

The seventh classification included chrome brick, glazed, enameled, painted, vitrified, ornamented, or decorated in any manner. The Finance Committee amendment proposed to increase the rate from 23 to 35 per cent ad valorem.

Bath brick constituted the eighth classification, and upon that the House imposed a rate of 23 per cent and the Senate committee proposed to increase it to 35 per cent.

The remaining classification was brick not specially provided for, which included common brick, 25 per cent ad valorem. It is now proposed by the pending amendment to make a uniform rate of 25 per cent ad valorem on all classes of fire brick except magnesite, upon which the pending amendment proposes to impose a duty of three-fourths of a cent a pound and 10 per cent ad valorem, which is the House rate.

It is apparent that there is a material reduction in the rates on many of the classes of brick embraced in paragraph 201. In my judgment, however, there is no justification for the imposition of a rate of 25 per cent ad valorem on bath brick, chrome brick, and fire brick not specially provided for.

Bath brick, the first mentioned in the amendment, is an abrasive, and is used for polishing and cleansing. The importations have never been great. They are negligible, even under existing rates. The present rate is 15 per cent, and there are substantially no importations, and I can not see any reason for increasing the rate on that class of brick.

The same is true of chrome brick and fire brick. Certainly at this time, when building and structural materials are scarce and when the prices charged for them are exorbitant, there is not justification in sound policy for imposing high rates of duty upon their importation.

The proposal of the committee to follow this amendment, to place common brick upon the free list subject to a proviso, of course, meets with my approval. I never understood why the committee wanted to tax common brick 75 per cent. There are now substantially no importations. Even along the Canadian border the importations are very slight, and I do not believe that an embargo can be justified, such as is proposed by the proviso in the second amendment which the Senator from North Dakota has stated he will offer if the first is agreed to.

The Canadian border line is in a sense an imaginary line. For almost the entire distance across the continent no natural barrier separates the United States from Canada. There are some instances, at least, where the interests of the American public along the border ought to permit them to have the opportunity of purchasing brick manufactured in Canada. Canada imposes a rate of 22½ per cent on American brick, and there is an additional charge of about 2½ per cent, which makes the Canadian rate on importations of American brick 25 per cent, and this paragraph placing common brick on the free list really means nothing, accomplishes nothing of interest to those who want to consume brick in the construction of houses in the United States, for the reason that common brick are not imported except in a few localities along the Canadian border, and if this tax is imposed those importations will be discontinued. The purpose of this proviso is to lay an embargo against the importation of all Canadian brick into the United States, and it will have that effect.

The only effect of it will be to work inconvenience to the people in the United States along the Canadian border who are nearer to Canadian manufacturing plants of brick than they are to American manufacturing plants. They will be compelled by reason of this tax of 25 per cent to buy their brick from American manufacturers, even though it may be much more inconvenient for them to secure delivery, and even though the transportation charges may be somewhat greater than they would be if the brick were purchased from the Canadian manufacturers.

No such condition exists along the border as to work a great hardship on anyone. I have here the record of the hearings before the Ways and Means Committee of the House, in which I find a letter from Mr. H. S. Wheeler, of Tacoma, Wash., who complained about the importation of Canadian brick; and there was a letter from a Member of the House of Representatives from the State of Idaho, who said that the two small brick plants in his district—and I believe he represents the entire State—are in danger of being driven out of business by the importation of large quantities of brick from Scotland and other remote points.

The Refractories Manufacturers' Association, of New York, filed a brief complaining that they were being injured very seriously by the importation of brick from Scotland and elsewhere in the form of ballast, and there is some testimony in the record to show that small numbers of brick have from time to time come to the Pacific coast as ballast in ships; but the point of the matter is that, taking all of these complaints together, under the existing rates importations of brick of any character are negligible anywhere. There is no danger that the brick manufacturing industry will suffer even if brick were placed on the free list.

The industry in the eastern part of the United States, as I attempted to show on a former occasion, is controlled by organizations which constitute the most oppressive monopoly known. The Lockwood committee went into the subject very fully, and they made a report which shows that the Association of Brick Manufacturers control absolutely the sales of brick, the use to which the same may be applied, to whom sales may be effected, and that they have literally fixed the prices at which sales may be made, and that the prices so fixed have been exorbitant beyond all reason.

I ask every Senator, Why should an industry dominated by such influences be shielded by an increase in tariff rates? There is no claim by anybody that the brick industry in the United States is an infant industry or that it is unprofitable. On the contrary, the price for the output is controlled absolutely in nearly every locality in the United States. In New York City there is not a man engaged in selling of brick, no matter how near he may be to the point of consumption, who will sell his product for any less than any other dealer in New York City. If he does he is boycotted in every imaginable way.

No man can buy brick in excess of a supply for a certain number of days, and when a purchase is made the purchaser must certify the purposes for which the brick are to be used, the job on which they are to be used, and if he uses them for any other purpose he can not buy another brick from any dealer in New York City.

No person or organization not a member of this association can buy material from any member of it. No member who is a manufacturer is permitted to sell any material to any dealer within the jurisdiction of the association unless such dealer is a member of the association. Not only was that true but the dealer who bought brick had to bind himself to purchase other building materials from members of the association, and if he failed to enter into that agreement he could not purchase brick. In other words, if he bought brick from a member of the association he must also buy cement from the same dealer, as well as lime and other products.

Mr. STANLEY. Mr. President——

Mr. ROBINSON. I yield to the Senator from Kentucky.

Mr. STANLEY. As I understand this lamentable state of affairs is not only evidenced by the Lockwood report, but the question has been tried out in the courts of New York and they have been found guilty of this atrocious profiteering. On brick alone I understand they made over 150 per cent profit. In addition to that the junior Senator from New York [Mr. CALDER] had incorporated in the RECORD a memorial from the people of New York again reciting these facts and again asking the Senate for relief. They ask for bread and we have given them a stone or a brick.

Mr. ROBINSON. On the question just raised by the Senator from Kentucky I call attention to the Lockwood intermediate report, page 88, where it was established by the testimony of Mr. Marvyn Scudder, an expert accountant employed by the committee, that for the first six months of 1920 the cost of brick delivered at the job in New York City was $11.25 per thousand, for which the company received or realized $28.75 per thousand. I need not pause to make comment upon the fact that an industry which enjoys such very large profit does not need protection.

The business was controlled absolutely by a number of organizations. There were three different branches connected with the central body. The central body was called the Dealers in Mason's Building Materials in New York City. The three different branches connected with that body were the Hudson River Brick Manufacturers' Association, the Builders' Supply Bureau of Manhattan and Bronx, and the Masons' Supply Bureau of Queens and Brooklyn. The Hudson River Brick Manufacturers' Association conducted its operations largely through an organization known as the Greater New York Brick Co. The Hudson River Brick Manufacturers' Association was composed of all the large manufacturers of brick along the Hudson River. They supplied the metropolitan district.

The magnates of the industry from time to time held informal meetings at which the general conditions of the trade were discussed and the prices of brick were agreed upon. The actual fixing of prices, however, was effected largely through the activities of the Greater New York Brick Co. The manner in which those prices were fixed is testified to by Mr. William K. Hammond, one of the manufacturers who acted as his own selling agent. This is a quotation from Mr. Hammond's testimony:

> A customer who wants a load of brick will tell me what the others supply him with bricks at, and I will call up these parties, my competitors, and they will confirm it and say "Yes." The market price is quoted usually by the agent to his manufacturers daily, and on one day the manufacturer would ask why his brick is not sold, and usually says he wants an advance in brick and up goes brick pretty generally within a few days * * * the agents quoting uniform prices.

I read a paragraph now from the report:

> Uniformity of price and monopoly were assured by scrupulous enforcement by the manufacturer and the dealer of the rule that no dealer would buy from a manufacturer and no manufacturer would supply a dealer who was not a member of the parent organization.
>
> Frank L. Holmes, who was the sales agent for the Greater New York Brick Co., was asked, in this connection, the following question by Mr. Untermyer:
>
> "What I want to know from you is the name of anybody who is not a member of the association, who you know is not a member of the association, to whom you make sales of brick?—A. I can not tell you that."
>
> The Greater New York Brick Co. is a stock corporation organized by various brick manufacturers along the Hudson River. The stock was distributed to the members in proportion of the business done by them. The President, Mr. Fowler, testified that the company developed into a sort of an exchange or selling agency for the manufacturers of the State, and that the original purpose of the company was to make uniform prices.

Referring to the Association of Dealers in Masons' Building Material, the report says at page 91:

> The power of the association continued, however, to be exercised in the enforcement of its constitution and by-laws, under which most of the dealers in New York City were forced into its membership. Article 21 of the by-laws provided that no member who was a manufacturer should sell any material to any dealer within the jurisdiction of the association unless such dealer was a member of the association.

Omitting a part of the next paragraph, I read as follows:

> Inasmuch, as before stated, it was part of its unwritten law and apparently a law enforced by arrangement with the cement manufacturers that no person could buy brick from a dealer unless cement was purchased from the same dealer, it became impossible for an outside dealer to compete with a member of the association in the sale of building material. If a builder should defy this rule by buying his brick from an outside dealer he could get no cement.

I ask leave to insert in the RECORD at the end of my remarks, commencing with the paragraph entitled "Brick," on page 88, that portion of the report down to the paragraph relating to sand, gravel, and broken stone, on page 92.

The VICE PRESIDENT. Without objection, it is so ordered.

Mr. ROBINSON. I have quoted this report to show that in one great community—and the same condition exists in all the large industrial centers—this industry is absolutely dominated by organizations within it.

Already there exists a shortage of household facilities throughout the United States because in large part of the excessive cost of building material. The industry is controlled absolutely in all the great building centers, and there is a shortage of housing facilities throughout the Nation. There is not the slightest justification for enabling this combination further to advance its prices to practice extortion on the American people. The rule that ordinarily applies in bona fide protective tariff legislation has no application in this case. There is no infant industry, there is no industry seriously menaced by competition with foreign industries. The sole effect of these exorbitant rates on this necessary building material will be to perpetuate and fasten upon the country this monopoly.

In the Lockwood report which I have put into the record, but in a part that I did not read, the statement is made that the conditions prevailing in New York are quite general throughout the country, especially in the large industrial centers. Why is it desired to put a tariff, a prohibitive tariff, that makes impossible the importation in any quantity of this necessary building material for the benefit of a combination that has outraged, robbed, and plundered the American people beyond the power of the human mind to conceive? It ought to be on the free list. There is no justification for putting a tariff of 25 per cent on it.

APPENDIX.

(3) BRICK.

The testimony of Marvyn Scudder, an expert accountant employed by the committee in relation to the cost of production to the selling price of brick, indicates the inflated prices at which these archprofiteers of the industry compel the public to pay.

Basing his conclusions on an examination of the books of the Empire Brick & Supply Co., which is the largest manufacturer of brick in the State, by direction of the committee, it appears from Mr. Scudder's figures that for the first six months of 1920 the cost of brick delivered at the job in New York City was $11.25 per thousand, for which the company realized $28.75 per thousand.

A number of the brick manufacturers were also members of the Association of Dealers in Masons' Building Materials in New York City. The membership of this association included manufacturers, jobbers, and dealers. There were three different branches connected with this central body:

(1) The Hudson River Brick Manufacturers' Association.
(2) The Builders' Supply Bureau of Manhattan and Bronx.
(3) The Masons' Supply Bureau of Queens and Brooklyn.

(a) Hudson River Brick Manufacturers' Association: The operations of the Hudson River Brick Manufacturers' Association were conducted largely through an organization known as the Greater New York Brick Co.

The Hudson River Brick Manufacturers' Association was composed of all the large manufacturers of brick along the Hudson River. They supplied the metropolitan district. These magnates of the industry from time to time held informal meetings at the Palantine Hotel, at Newburgh, N. Y., at which the general conditions of the trade were discussed and the prices of brick were agreed upon. The actual fixing of the price was, however, effected largely through the activities of the Greater New York Brick Co.

The manner in which these prices were fixed is testified to by William K. Hammond, one of the manufacturers who acted as his own selling agent:

"A customer who wants a load of brick will tell me what the others supply him with bricks at, and I will call up these parties, my competitors, and they will confirm it and say, 'Yes.' The market price is quoted usually by the agent to his manufacturers daily, and on one day the manufacturer would ask why his brick is not sold and usually says he wants an advance in brick, and up goes brick pretty generally within a few days * * * the agents quoting uniform prices."

Uniformity of price and monopoly were assured by scrupulous enforcement by the manufacturer and the dealer of the rule that no dealer would buy from a manufacturer and no manufacturer would supply a dealer who was not a member of the parent organization.

Frank L. Holmes, who was the sales agent for the Greater New York Brick Co., was asked in this connection the following question by Mr. Untermyer:

"What I want to know from you is the name of anybody who is not a member of the association, who you know is not a member of the association, to whom you make sales of brick?—A. I can't tell you that."

The Greater New York Brick Co. is a stock corporation organized by various brick manufacturers along the Hudson River. The stock was distributed to the members in proportion to the business done by them. The President, Mr. Fowler, testified that the company developed into a sort of an exchange or selling agency for the manufacturers of the State and that the original purpose of the company was to make uniform prices.

(B) Builders' Supply Bureau.—The Builders' Supply Bureau (which is said to have been dissolved since the indictment and plea of guilty of its members, including the brick manufacturers, but as to the genuineness of whose dissolution the committee entertains grave doubt) was in a sense a subsidiary of the Association of Dealers in Masons' Building Materials. Its operations extended over that part of the metropolitan district comprising Manhattan and The Bronx. It was a counterpart of the Masons' Supply Bureau which operated in Brooklyn and Queens and which claims also to have suspended its operations following the indictment and plea of guilty of its members (but as to the genuineness of which suspension the committee has not yet been able to make full inquiry). The methods of the two bureaus were identical. Both were essentially price-fixing associations.

Both bureaus embraced in their membership all of the important dealers in masons' supplies in New York City. They functioned along the following lines:

Whenever a member made a quotation on any commodity, he was required to file on that day with the bureau a card variously described as a "quotation" or "option" card. The members were then notified by the bureau of the quotations thus made.

Emma C. Schmitt, the secretary of the Brooklyn bureau, testified that as to each transaction she prepared a slip of paper on which she wrote "So and so have this day let an option on a job" and forwarded it to the other members. She stated that "it was practically a part of the routine."

The quotations of the various members having been thus divulged to all other members, the standardization of the prices became a simpler matter. In order that it might appear on record that contracts were actually closed upon the basis of these fixed or standardized prices, the rules required that each member should file with the bureau what was known as a "contract card." This card disclosed the terms on which the transaction was consummated and showed the prices charged for the material.

The evidence conclusively establishes that this card system resulted in a rigid uniformity of price. The card system was supplemented by weekly meetings of the members of the bureau. At all such meetings, and indeed at all times, the cards, both "Quotation" and "Contract," were accessible to the members of the bureau and open to their inspection.

In order to maintain a more vigilant supervision over its members to guard against infringement of the rules with respect to the filing of cards and to limit production, the members were further required to make monthly reports to the bureau showing the stock on hand of each member on the first day of the month, together with a statement of shipments made during the previous month. The methods employed by this bureau followed in a way the so-called "Eddy" system, otherwise known as the "New Competition by Open Price Associations." It placed in the hands of the dealer the most effective machinery for stifling competition and fixing prices.

(C) Association of Dealers in Masons' Building Material.—This association was composed of 42 members, and included both manufacturers and dealers in its membership. It was organized in 1900. Its jurisdiction extended over the city of New York except as to certain outlying portions of the city. Up to the year 1919 the association sent out to its members who were dealers a monthly sheet showing the prices prevailing in the market for the commodities in which the members did business, but at about the time of the investigation by the mayor's housing committee, for which the counsel for your committee acted for a short time and exposed the methods of this bureau, the practice of sending out this price sheet was discontinued.

The power of the association continued, however, to be exercised in the enforcement of its constitution and by-laws, under which most of the dealers in New York City were forced into its membership. Article 21 of the by-laws provided that no member who was a manufacturer should sell any material to any dealer within the jurisdiction of the association unless such dealer was a member of the association.

As a result of the rigid enforcement of this provision, every dealer in and about the city of New York was compelled to become a member of the association or go out of business. Although the organization seems to have discontinued its practice of directly fixing the prices of materials, it continues to maintain its vast power for evil by keeping its members solidly in line as a monopoly in masons' building material.

Inasmuch, as before stated, it was part of its unwritten law, and apparently a law enforced by arrangement with the cement manufacturers, that no person could buy brick from a dealer unless cement was purchased from the same dealer, it became impossible for an outside dealer to compete with a member of the association in the sale of building material. If a builder should defy this rule by buying his brick from an outside dealer, he could get no cement.

(D) Masons' Supply Bureau of Brooklyn: This association, as before stated, was also a member of the Association of Dealers in Masons' Building Materials. It was organized in February, 1918, at which time it had 16 members. The bureau operated on a card system identical with that of the Masons' Supply Bureau of Manhattan. Members were required to file every day in the office of the bureau a card showing the estimates made by each member on each job. This card was called the "option card." Members were also required to file in the office of the bureau what was known as a "contract card," showing the amount at which the contract was closed. They were further required to file with the bureau a monthly report showing all shipments made during the preceding month, and the amount of stock on hand on the first day of the month in which the report was filed. The option cards were open to inspection of all members.

Mr. McCUMBER. Mr. President, there were produced in the United States in 1920, 4,709,000,000 building bricks. The importations are so small, and have been, that they are not even made a note of. The report of the Tariff Commission says:

> Imports of common brick are negligible, and are confined to shipments from Canadian plants to points in the United States near the international boundary.

That is all I need to read to give the situation with reference to brick. If I thought, or if the committee thought, for one moment that this countervailing duty against a brickkiln on the Canadian side that exported its brick a few miles into the United States, it may be 100,000 a year free, while a brickkiln on the United States side would have to pay 25 per cent ad valorem to get its brick into Canada, would have the slightest effect on earth upon this great combine or help them in any way, we would have said to the little brickmaker out in Idaho, "We can not help you out against the brickkiln on the other side of the line because it would help perpetuate a great combination, and it is far better that you be killed than to have the entire country held up." But, Mr. President, everyone knows that the proposed amendment will not have the

slightest effect on the price of brick in the United States. Everyone knows that the combination about which Senators have been talking was created under the present law when bricks came in absolutely free from all countries, whether or not any other country levied a duty against our brick.

The only question is whether we should have even bothered to protect a little brick-kiln manufacturer at some place along the border who, perhaps, does not manufacture $25,000 worth of brick in a year. We thought it fair to say to the Canadian on the opposite side, "So long as your country imposes a 25 per cent ad valorem duty for making brick out of the same clay that is found across the international border, you will have to pay a similar duty for bringing your brick into the United States." It will affect only the little brickmaker along the border line and will not affect any others at all.

Mr. JONES of New Mexico. Mr. President——

Mr. McCUMBER. I yield to the Senator.

Mr. JONES of New Mexico. I have not studied the evidence regarding this particular item, but I have done so as to several other items which are produced along the Canadian border; and it is my impression that the American producers have been insisting upon a duty upon commodities from Canada, not because there is cheaper production in Canada, as a rule, but for the purpose of retaliation. Canada imposes a tariff on a number of United States products, and I have been strongly impressed with the idea that a great many of our producers are irritated because of that rather than that they are actuated by any fear that anybody can produce the commodity in Canada cheaper than it can be produced here.

I merely wonder if that is not the case regarding these brick; that some brick manufacturer has concluded that it is not fair for Canada to have a tariff against American brick and America not to have a tariff against Canadian brick. I became quite convinced that that was true regarding several other items; and I just wonder whether or not this is one of those retaliatory demands.

Mr. McCUMBER. I will say no; it is not retaliatory. I do not think that on one side or the other side of an imaginary line it is going to make any difference in the cost of producing brick.

Mr. JONES of New Mexico. It did not occur to me that it would.

Mr. McCUMBER. But the injustice is apparent when both are making their brick along the line and one can sell his brick on both sides of the line and the other can not. The proposed amendment will only affect the little territory contiguous to two brick kilns, one on each side of the line. It does not amount to anything substantial, although I am willing to admit that it will mean quite a lot to the man who is so situated that he is limited to selling his goods on one side of the line while his neighbor can sell it on both sides.

I want to say that we are putting on the free list brick from Canada or any other place in the world that imposes no duty against American brick. I do not know of anyone but the Canadian who can bring brick in in ballast under this change. The only question is whether it is worth our while to protect the few dozen brickmakers along the line.

Mr. JONES of New Mexico. I am inclined to believe that the Senator's statement rather indicates that my surmise is well founded and that the purpose of the amendment is largely for retaliation.

Mr. McCUMBER. No; it is designed to bring about equality, not retaliation.

Mr. JONES of New Mexico. Of course, the Senator may give it another name if he pleases.

Mr. McCUMBER. It has a different meaning altogether.

Mr. JONES of New Mexico. But it does not appear that there is any difference in the cost of production in Canada and in the United States, and it is a mere matter of transportation. So I just wondered if it will not be to the great injury of a number of American consumers to be compelled to transport their brick considerable distances from American brick producers when they have been getting their brick just across the border near home.

Mr. McCUMBER. It works the same on both sides, of course.

Mr. JONES of New Mexico. That is true; but it will undoubtedly inconvenience a number of people in the United States who have been getting their brick just across the border in Canada. I assume that it will not appear that there is one brick kiln on one side of the border and another brick kiln directly opposite on the other side, but it will probably be found that there is not a brick kiln on the United States side within a hundred miles of a brick kiln on the Canadian side along the border. The result will be that the transportation charge will be far more burdensome to the consumers of brick in many localities than will the slight amount of the duty.

Mr. ROBINSON. Mr. President, the serious feature of this subject is not in relation to the second amendment which the Senator from North Dakota proposes to offer if his first amendment carries, but it is the first amendment itself, imposing a duty of 25 per cent ad valorem on "bath brick, chrome brick, and fire brick, not specially provided for." In his brief filed with the committee the Representative from Idaho made this statement:

> There are two small plants producing fire brick located in my home county, Latah County, Idaho, and these plants are in competition with fire brick produced in Scotland, England, and elsewhere, where the wages and conditions are not at all adequate for the American laborer.

Of course, we all know the nature of this commodity. It is of such a nature that it is not possible for serious competition to occur between brick plants in Idaho and brick plants in England and Scotland. Idaho can not afford to manufacture brick to be sent to the Atlantic coast under any freight rate which is conceivable, and neither England nor Scotland can afford to manufacture brick and send them into the territory that Idaho could reach under any system that could be devised.

Mr. GOODING. Mr. President——

Mr. ROBINSON. I yield to the Senator from Idaho.

Mr. GOODING. I think the Senator is mistaken in that regard, because I have a letter from those owning brick kilns in Idaho, in which they state that at this time fire brick shipped direct from Scotland is piled up on the wharves of Seattle and Tacoma. Those brick have come around through the Panama Canal, carried in the holds of vessels as ballast.

Mr. ROBINSON. Small quantities have come in as ballast, but only small quantities. No considerable quantity of it can possibly reach the territory that the Idaho brick plants may reach.

Mr. GOODING. The principal market for the fire brick is in the larger towns, of course, such as Seattle and Tacoma.

I call the Senator's attention that at Claiborne, in British Columbia, there is a brickkiln that ships its product to Seattle for a freight rate $3.15 less a thousand than is charged on brick coming from the kilns in Idaho. So the British Columbia plant absorbs the market, for $3.15 on 1,000 brick, as a freight charge alone, is a good profit for anyone to make. Furthermore, Canada has a tariff of 24½ per cent against Idaho brick, and we can not ship brick into British Columbia and sell our commodity there at all.

Mr. ROBINSON. Therefore you do not want British Columbia to come over into the United States and sell her brick?

Mr. GOODING. We are willing to go 50–50 with them. Is not that fair?

Mr. ROBINSON. That is the proposition; because Canada has levied a tariff on importations of American brick we are to retaliate and levy a tariff on importations into the United States of Canadian brick.

Mr. GOODING. Canada has cheaper labor than we have in the western part of the United States; they have Chinese labor.

Mr. ROBINSON. How far is it from the brick plants in Idaho to the Canadian border?

Mr. GOODING. I think it is possibly 300 miles, or something like that.

Mr. ROBINSON. How far is it from the brick plants in Idaho to Seattle?

Mr. GOODING. I think in the neighborhood of 300 miles.

Mr. ROBINSON. To Seattle, Wash.?

Mr. GOODING. To Seattle, Wash.—300 or 400 miles—I am not quite sure of the distance, but I think it is about 300 miles.

Mr. ROBINSON. I am not prepared to controvert the Senator's figures with reference to the distance to the Canadian border, but I think the Senator will find it nearer 1,000 miles than 300 miles from Idaho to Seattle. However, that is not of controlling significance. From the conditions that surround the industry there is not the slightest possibility that material importations will occur, and the effect of the pending amendment imposing a rate of 25 per cent ad valorem will be to encourage further combination in the industry and to increase prices or to maintain prices which are already excessive.

I do not understand that there would be any serious danger of importations of brick into the United States which would be hurtful to the general interests of the country or to the brick industry even if brick were placed upon the free list, and I think it is a bad precedent and an unnecessary one to impose this high rate of duty on so necessary an article of common use.

SEVERAL SENATORS. Vote!

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from Utah.

Mr. ROBINSON. I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. STANLEY. Mr. President, I wish to be heard on the question before it is voted on. I suggest that if it is desired to have an executive session, it had better be had now, because I wish to discuss this schedule at some length, and I prefer not to proceed to-night. I can start to-night and talk for an hour and a half or two hours and then resume to-morrow, but it will add to the convenience of the Senate, as well as my own convenience, if I can surrender the floor at this time in order that the Senate may have an executive session and take up this schedule and discuss it briefly in the morning at 11 o'clock. I regard this schedule as important, and I much prefer to discuss it to-morrow than to discuss it to-night.

Mr. HARRISON. Mr. President, a parliamentary inquiry. Has unanimous consent been given to recess until 11 o'clock to-morrow?

The VICE PRESIDENT. Unanimous consent to that effect has been given.

Mr. HARRISON. I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Assistant Secretary called the roll, and the following Senators answered to their names:

Ball	Harris	McNary	Smoot
Brandegee	Harrison	New	Spencer
Bursum	Heflin	Newberry	Stanley
Calder	Jones, N. Mex.	Oddie	Sutherland
Capper	Jones, Wash.	Pepper	Swanson
Curtis	Keyes	Poindexter	Townsend
Dial	King	Rawson	Wadsworth
Edge	La Follette	Robinson	Warren
France	Lenroot	Sheppard	Watson, Ind.
Frelinghuysen	Lodge	Shortridge	Willis
Gooding	McCumber	Simmons	
Hale	McKinley	Smith	

The VICE PRESIDENT. Forty-six Senators have answered to their names. A quorum is not present. The Secretary will call the names of the absentees.

The Assistant Secretary called the names of the absent Senators.

The VICE PRESIDENT. Forty-six Senators have answered to their names. A quorum is not present.

Mr. McCUMBER. I move that the Sergeant at Arms be directed to procure the attendance of absent Senators.

The motion was agreed to.

Mr. HARRISON. A division, Mr. President.

Mr. SIMMONS. What was the motion?

Mr. McCUMBER. To bring in the absentees.

Mr. ROBINSON. I inquire of the Senator from North Dakota if he does not think we had better take a recess now?

The VICE PRESIDENT. The Sergeant at Arms will execute the order of the Senate.

Mr. ROBINSON. We have agreed by unanimous consent that when the Senate ceases its labors to-day it shall take a recess until 11 o'clock to-morrow, so that there is an order to take a recess.

Mr. SIMMONS. Mr. President, I want to say to the Senator from North Dakota that we have been operating here for some time under an understanding that we were to take a recess at 10 o'clock, and in many instances Senators have made their arrangements to go home at that hour. If the Senator wants to stay here until 12 o'clock, I think he ought to give us some little notice of it in advance, so that we will be prepared.

Mr. McCUMBER. I thought after we had discussed the brick matter for two days and finally I brought in a report to put brick on the free list, at least I would have the privilege of fixing it the way you wanted it, and put it upon the free list. I did not anticipate for a single moment that there would be any objection to that part of it.

Mr. SWANSON. Mr. President, I rise to a point of order.

The VICE PRESIDENT. The Senator will state it.

Mr. SWANSON. No quorum is present, and no discussion is in order.

The VICE PRESIDENT. The point of order is well taken.

Mr. ROBINSON. Mr. President, I move that the Senate take a recess.

Mr. McCUMBER. I raise the point of order that there is no quorum present.

Mr. ROBINSON. I move that the Senate adjourn.

Mr. McCUMBER. I raise the point of order that there is a unanimous-consent agreement that when we close our session to-day we shall recess until 11 o'clock to-morrow.

Mr. ROBINSON. Mr. President, the Senator can not make a point of order that a recess is not in order and that a motion to adjourn is not in order. A motion to adjourn is always in order. The effect of agreeing to the motion to adjourn will be to suspend the proceedings of the Senate until 11 o'clock to-morrow. Unquestionably the Senate has a right either to adjourn or to take a recess. I do not think any parliamentarian will question that fact. If the Senator wants to filibuster in that way himself, he can be given an example of the effect of such a proceeding.

Mr. McCUMBER. I believe a point of order has been made against debate at this time.

Mr. ROBINSON. Mr. President, I move that the Senate do now adjourn.

Mr. CURTIS. Will the Senator withhold that motion? I hope the Senator from North Dakota will ask that the Senate take a recess until 11 o'clock to-morrow. We can not get a quorum here to-night.

Mr. ROBINSON. I withhold my motion to adjourn, but I will state that there will be no more agreements to recess unless the Senator from North Dakota sees fit to take a recess now or to adjourn.

Mr. McCUMBER. Mr. President, if the Senator had asked me in a real nice way to do that, I would have done it; but if the Senator——

Mr. ROBINSON. No; I will not ask the Senator, and the Senator can take his own course.

Mr. McCUMBER. If the Senator puts it in the form of a threat, I will answer him right back that I shall not make any request of that kind.

Mr. ROBINSON. Very well, Mr. President; I move that the Senate adjourn.

Mr. McCUMBER. I do not care what the Senator says; he is not going to drive me into any kind of a proposition of yielding or anything else. Does the Senator understand that?

Mr. ROBINSON. I respectfully request that the Senator from North Dakota be in order.

Mr. SWANSON. Mr. President, I rise to a point of order.

Mr. ROBINSON. There is not the slightest occasion for excitement on the part of anyone.

The VICE PRESIDENT. The Senate will be in order.

Mr. ROBINSON. I repeat, there is not the slightest occasion for excitement on the part of anyone. I move that the Senate do now adjourn.

Mr. TOWNSEND. Mr. President, a parliamentary inquiry.

The VICE PRESIDENT. The Senator will state it.

Mr. ROBINSON. Mr. President, I move that the Senate do now adjourn. There is not the slightest occasion for excitement.

Mr. McCUMBER. And I hope that that motion will be opposed.

Mr. SWANSON. I ask for the yeas and nays on the motion to adjourn.

Mr. SPENCER. Mr. President, a parliamentary inquiry.

The VICE PRESIDENT. The Senator will state the inquiry.

Mr. SPENCER. The Senate has, by unanimous consent, agreed that when its proceedings to-day are ended it shall recess until 11 o'clock to-morrow. A motion to adjourn is not in order.

The VICE PRESIDENT. The point of order is well taken.

Mr. LENROOT. Mr. President——

Mr. SWANSON. Did the Chair sustain the point of order that a motion to adjourn is out of order?

The VICE PRESIDENT. It is not in order. There is a unanimous-consent agreement for a recess.

Mr. SWANSON. I rise to a point of order. No quorum has been disclosed, and under the Constitution, as I understand, no motion is now in order except a motion to adjourn, which has been made; and I ask for the yeas and nays on the motion to adjourn.

The VICE PRESIDENT. The Senate has unanimously agreed that it will take a recess. Against that unanimous-consent agreement the Chair can not entertain a motion to adjourn.

Mr. LENROOT. Mr. President, will the Chair hear me for a moment? May I suggest to the Vice President that the precedents are otherwise; that notwithstanding a unanimous-consent agreement for a recess has been entered into, a motion to adjourn nevertheless is in order. If I can have a moment, I will get the precedents for the Chair.

RECESS.

Mr. CURTIS. I ask the Senator from Arkansas to withdraw his motion, that I may ask unanimous consent that the Senate now stand in recess until 11 o'clock to-morrow.

Mr. ROBINSON. With that understanding I will withdraw the motion.

Mr. McCUMBER. With that gentle request I will consent to it, but not through a threat.

The VICE PRESIDENT. Is there objection to the request of the Senator from Kansas?

There being no objection, the Senate (at 10 o'clock and 45 minutes p. m.) took a recess until to-morrow, Friday, June 2, 1922, at 11 o'clock a. m.

HOUSE OF REPRESENTATIVES.

THURSDAY, *June 1, 1922.*

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

O God, to-day is but another announcement of Thy sovereign rule in life. It proves that Thou hast not left us but art going with us all the way. We bless Thee that the beautiful and glorious mission of Thy revelation was born in divine mercy. O Thou in whose presence our souls find release, we thank Thee for the holy ministry of the uplifted cross. May its sacrifice make us humble; may its sympathy make us social; may its love make us loving; may its charity make us benevolent; may its grace make us courageous, and may the joy of the Lord be our abiding strength. Amen.

The Journal of the proceedings of yesterday was read and approved.

READJUSTMENT OF PAY AND ALLOWANCES OF THE ARMY, NAVY, ETC.

Mr. McKENZIE. Mr. Speaker, I desire to submit a conference report on the bill (H. R. 10972) to readjust the pay and allowances of the commissioned and enlisted personnel of the Army, Navy, Marine Corps, Coast Guard, Coast and Geodetic Survey, and Public Health Service for printing under the rule.

RESIGNATION OF A MEMBER.

The SPEAKER laid before the House the following communication:

HOUSE OF REPRESENTATIVES,
May 26, 1922.

Hon. FREDERICK H. GILLETT,
House of Representatives, Washington, D. C.

DEAR MR. SPEAKER: I have transmitted to the Governor of the State of Nebraska my resignation as a Member of the House of Representatives, effective June 4, 1922.

Sincerely yours,
C. F. REAVIS.

MEMORIAL EXERCISES FOR THE LATE REPRESENTATIVE ELSTON.

Mr. BARBOUR. Mr. Speaker, I ask unanimous consent that Sunday, June 25, 1922, be designated as the day for exercises in memory of the late Congressman JOHN A. ELSTON.

The SPEAKER. The gentleman from California asks unanimous consent that Sunday, June 25, 1922, be set aside for memorial exercises for the late Representative JOHN A. ELSTON. Is there objection?

There was no objection.

The SPEAKER. To-day is Calendar Wednesday, and the Clerk will call the roll of committees.

PROTECTION OF INTERSTATE AND FOREIGN COMMERCE FROM BRIBERY.

The Clerk called the roll of committees; when the Committee on the Judiciary was reached:

Mr. VOLSTEAD. Mr. Speaker, I call up for further consideration the bill (H. R. 10159) to further protect interstate and foreign commerce agaist bribery and other corrupt trade practices. I would like to know if there is anyone who wishes to use any time against the bill.

Mr. TILLMAN. I know of no one on this side who desires to oppose the bill.

Mr. VOLSTEAD. Then, Mr. Speaker, I yield 15 minutes to the gentleman from Kansas [Mr. CAMPBELL].

Mr. CAMPBELL of Kansas. Mr. Speaker, I ask unanimous consent to proceed out of order.

The SPEAKER pro tempore (Mr. MADDEN). The gentleman from Kansas asks unanimous consent to proceed out of order. Is there objection?

There was no objection.

Mr. CAMPBELL of Kansas. Mr. Speaker, it is time to call a spade a spade. There will not be another congressional investigation now to interrupt or halt the work of the Attorney General and the Department of Justice at the moment they are presenting evidence to a grand jury and asking for indictments of conspicuous conspirators and crooks who defrauded and robbed the Government during the war. [Applause.]

The Committee on Rules to-day disposed of the pending resolutions calling for such additional congressional investigation. I am able to say to my Republican colleagues that some of the most aggravated cases of fraud and conspiracy against the Government during the period of the war that were asked by resolution to be made the subject of another congressional investigation are now in the hands of a Federal grand jury in the District of Columbia. Other cases referred to are ready for presentation to the same jury as soon as those now under consideration are acted upon.

The work of the grand jury is not sensational. The crowd is absent. Reporters are not there. The functions of the grand jury constitute a process of Anglo-Saxon judicial procedure in bringing those charged with criminal offenses to the bar of justice. In the cases now being presented, and to be presented, the Attorney General hopes to send some conspicuous crooks who conspired to defraud and rob the Government during the war to the penitentiary.

The activities of a man in the Chicago convention will not operate in his defense in the grand-jury room. The presentation of a name to the San Francisco convention will not exempt his name from presentation by the grand jury. It is not difficult to understand the reason, therefore, for the attacks that have been made upon the Attorney General ever since it has been apparent that he was taking the necessary steps to bring the crooks who defrauded the Government to the bar of justice. There was no criticism; there were no attacks; photostatic copies or original letters relating to his private practice 12 or 13 years ago were not published and heralded to the country until after he cabled Morse, the millionaire shipbuilder, who was leaving the country under an assumed name, to return at once to face a possible indictment by a Federal grand jury for defrauding and robbing the Government. Morse, with many others associated with him, has been indicted. The court sustained the indictment yesterday. Ever since the indictment a flood of abuse has been turned upon the Attorney General, and continues to flow after the manner of the mouth of a sewer. Wittingly or unwittingly, those who indulge to-day in attacks on the Attorney General are aiding present and prospective defendants charged with robbing the Government when it was at war. [Applause.]

It is said there has been delay in commencing proceedings against those charged with these offenses. It must not be forgotten that the present Attorney General did not take charge of the Department of Justice until three years after the close of the war. The work of recovering documents withheld from the files during the war, or taken from the files some time during the three years following the war; the work of securing other evidence in place of that that was stolen; the work of locating important witnesses who had left the country, some to South America, some to Europe, has all taken time, unusual ability, and patience.

The steps taken by the Attorney General to do what has been done, what is being done now, and to prepare for what is to be done in the future were not given out for a daily sensation in the press. There has been a proper precaution to keep prospective defendants in ignorance of what has been going on in the Department of Justice. No precaution or necessary action has been overlooked. Last year the Attorney General took the necessary action to secure the extension of the period of the statute of limitations on crimes committed against the Government by contractors and conspirators during the war. Congress passed an act, and the statute of limitations has been extended. Months ago the Attorney General asked Congress to provide by law for an additional grand jury in the District of Columbia, where the venue lies in most cases of the frauds against the Government. Only a few days ago Congress passed an act creating the additional grand jury asked for. It was organized on yesterday and is taking testimony to-day against those who are charged with offenses against the Government growing out of the conduct of the war. Congress has made a special appropriation for the further preparation and for the prosecution of these offenses. The Attorney General has also asked for additional judges to help clear the dockets and speed the trial of cases in the courts, and the bill is still in conference between the two Houses.

On the 25th of March of this year, weeks before the speeches made on the floor of the House charging the Attorney General with unnecessary delay in prosecuting war grafters and the introduction of resolutions calling for an investigation of those charges, the Attorney General wrote a letter to former Congressman McCullough, of Ohio, who was a Member of the Graham committee investigating war contracts, urging him to accept employment in the Department of Justice in order to speed up action against those who had defrauded the Government in cantonment cases. In his letter the Attorney General expressed impatience with the delays. He was anxious for action. Mr. McCullough is in the Department of Justice to-day because of his familiarity with these frauds against the Government and of his ability as a lawyer.

Mr. Steinbrink, who was with Mr. Hughes in the aircraft investigation, has been employed to aid in these cases. Congressman REAVIS, of Nebraska, still a Member of this House, has been induced to resign and take part in the prosecution of

these frauds. He is an able lawyer and also was a member of the committee that investigated war contracts.

Colonel Anderson, of Virginia, one of the leading lawyers of the South, has consented to enter the Department of Justice to aid in the prosecution of fraud cases. Former Senator Thomas, of Colorado, is arranging his business so he can take part in the work of these prosecutions. Other men, whose names I am not at liberty to mention, conspicuous for their ability, are to aid the Department of Justice in these matters.

I want the Attorney General to know, and I know you want the Attorney General to know, and the country to know, that the House of Representatives wants action in the courts against those who robbed and defrauded the Government during the war, and punishment for their crimes, and recovery of their loot, instead of another congressional investigation that accomplishes nothing. [Applause.] We have had three years of congressional investigations and no results. The Department of Justice wants, the country wants, and Congress wants all the crooks and conspirators who participated in robbing and defrauding the Government, whether they be big or little, rich or poor, in office or out of office, to be brought to the bar of justice and there dealt with according to their deserts.

Now, just a word to you Democrats who are barking at the heels of the Attorney General and daily railing at the Department of Justice. You stood in silence for the period of the war. You did not raise voice or hand against conspiracies to defraud and rob the Government.

Mr. GARRETT of Tennessee. Will the gentleman yield?

Mr. CAMPBELL of Kansas. Not now.

During the war and for three years immediately following you defended conspirators and crooks against charges of wrongdoing.

Mr. GARRETT of Tennessee. Will the gentleman yield?

Mr. CAMPBELL of Kansas. Not now.

During all the years of the war, and for three years after you had full control of the executive departments of the Government and of all the files in all of the offices. You offered no protest while those who had robbed the Government were filching from the files evidence of their guilt and withholding or destroying it. The conspirators who defrauded, the crooks who robbed, and the evidence of their guilt were all under your control. You did nothing to prosecute them nor to preserve the evidence of their guilt. You did not institute either civil or criminal action in behalf of the Government against them as requested by this House by resolution on April 13, 1920.

They all enjoyed the benefit of your failure to act against them and your activities in their behalf. It is not strange therefore that you attack the Attorney General. It is the only way in which you can serve war crooks at the very moment he is presenting evidence against these crooks before a grand jury with a view of their indictment and conviction and subsequent action to recover the loot they took from the Government.

Mr. GARRETT of Tennessee. Will the gentleman yield?

Mr. CAMPBELL of Kansas. Not now.

You insist upon another congressional investigation instead of indictments and convictions in the courts. Another congressional investigation would afford a few harmless sensations. You do not mind that, and those already indicted and who stand in fear of indictment would like it. Action by the grand jury may start some of those who have so long enjoyed your protection on the road to the penitentiary. You apparently dread that, and it makes the prospective defendants shudder.

Notwithstanding your criticism and abuse, the processes of the courts will go on without interruption to the end that crimes against the Government may be prosecuted and trials proceed for the recovery of money and property of which the Government was robbed. Your abuse of the Attorney General now, and during the progress of the trial of these matters, is the best aid you can give to the defendants in criminal or civil actions.

These are cases of the whole people against these defendants. Everyone in any way connected with any of the departments of the Government should give hearty support to those in charge of the prosecution. The trials of these cases will proceed to a final issue in the courts. [Applause.]

Mr. TILLMAN. Mr. Speaker, I yield 15 minutes to the gentleman from Tennessee [Mr. GARRETT].

Mr. WALSH. Mr. Speaker, if the gentleman expects to discuss this matter——

Mr. GARRETT of Tennessee. I do, and I am going to conform to the requirements and ask unanimous consent to proceed out of order.

The SPEAKER pro tempore. The gentleman from Tennessee asks unanimous consent to proceed out of order. Is there objection?

There was no objection.

Mr. GARRETT of Tennessee. Mr. Speaker, if one did not know, one would naturally suppose from the speech of the gentleman from Kansas [Mr. CAMPBELL] that he must have been suffering an intense disappointment. Three weeks ago the Committee on Rules, of which the gentleman from Kansas is chairman, adopted a resolution introduced by the gentleman from Michigan [Mr. WOODRUFF] to create a committee for an investigation of the War Department, the Department of Justice, including the Alien Property Custodian Department. The deciding vote on that resolution was cast by the gentleman from Kansas [Mr. CAMPBELL], the chairman of the committee. It did not originate with Democrats.

Here is the Democratic position about this matter: It has been stated again and again. The Democrats have not cared to initiate a congressional investigation to embarrass the administration in any way, but they have been and are now willing to acquiesce in an investigation, and the Democratic administration never at any time has resisted an investigation.

Mr. Speaker, I happen to have been through some of these investigations somewhat intimately, and I want to state now—I want it to go down into the RECORD for whatever it may be worth—that never at any time during the Democratic administration did there ever the suggestion come from any person, in a place of high responsibility, any Cabinet officer, that there ought not to be an investigation of expenditures. Nor did any such suggestion ever come from any person in that administration who had any discretion in dealing with matters. No resistance was had here when you undertook to create a committee, and did create a committee, of the most intensely partisan character for the purpose of investigation; but you have now a situation which, if I am correctly informed, is such that the Attorney General of the United States has, somehow, in some way, induced the gentleman from Kansas [Mr. CAMPBELL], chairman of the Committee on Rules, to change his vote and vote not to investigate his department. [Applause on the Democratic side.]

The gentleman from Kansas, with whom I am personally friendly, now arises here on the floor and as an excuse for his own turn-coating, for his own weakness of will, for his own lack of intellectual integrity and courage, assails the Democratic administration and refuses to yield to a courteous inquiry as to what individual he would attack.

Mr. Speaker, it is extremely painful to have to indulge in this sort of talk, but I wish it understood here and now that never at any time during the Democratic administration, or now, has there been an objection from any individual, from the former President of the United States down to every man who had any discretion in official activity, to an investigation. The gentleman from Kansas makes an assault upon the past administration. The committee that you would create, if the gentleman had stood by his vote, would investigate the past administration. It would add to the Graham investigation, if it could. The House organization is in the hands of the Republicans. The Republicans would not suffer any injustice by a committee that might be appointed, and the Democrats would be investigated and the Democratic administration would be investigated as well as the Republicans, and they are ready for it. [Applause on Democratic side.]

I have here a letter from the former Attorney General of the United States, a man who was assailed more viciously, probably, than any official in high life, except the President himself, by the Republicans, during the latter part of his administration. I can not read all of the letter because I have not the time. He knows this committee would investigate him and he invites the investigation. What does your Attorney General say? [Applause on the Democratic side.]

Mr. Speaker, I ask unanimous consent at this time to insert here this letter from the Hon. Mitchell Palmer.

The SPEAKER. The gentleman from Tennessee asks unanimous consent to extend his remarks in the RECORD by inserting the letter referred to. Is there objection?

There was no objection.

The letter referred to is as follows:

LAW OFFICES PALMER, DAVIS, AND SCOTT,
Washington, D. C., May 23, 1922.

Hon. FINIS J. GARRETT,
House of Representatives, Washington, D. C.

DEAR CONGRESSMAN: I hope that the House will pass the Woodruff resolution for the appointment of a committee to investigate "all contracts and expenditures made by the War Department, or under its directions, the Navy Department, or under its directions, and the Alien Property Custodian, or under his directions, during and since the late war with Germany." As Alien Property Custodian during the war I am particularly anxious that the American people should know the whole truth with respect to the operations of that office, and I should be very happy, indeed, if such a full and complete investigation would be made as would disclose not only all the voluminous details of the great task which fell to the Alien Property Custodian in taking over

and disposing of German property during the war but also all the plans, schemes, and propaganda now being forwarded by agents of the former German owners to undo a splendid piece of war work. The charges and insinuations now being made with respect to the Chemical Foundation and the Bosch Magneto Co. have been repeated many times and have already been fully investigated by two Senate committees, but until the final disposition of German property is made by legislation we may expect to hear them constantly reiterated. The trading-with-the-enemy act provides in section 12 that after the war the claims of enemy persons shall be disposed of as the Congress shall determine. Of course, I do not know the reason for the long delay of the Congress in legislating upon this important subject, but it occurs to me that an investigation of the character proposed in the Woodruff resolution might be very helpful to the Congress when it comes to consider such legislation. The Congress should know not only the disposition made of the German property but the character and purposes of the interests now trying to recover that property.

The Bosch Magneto Co. was German to the core. Before we entered the war its management violated our neutrality in the most infamous fashion. Its officers sought to conceal its true ownership behind a camouflage of German-American stockholders. They finally made sworn report, however, declaring all the stock to be enemy owned, and I thereupon took charge of the company. In the investigation as to its ownership Otto Heins, representing the German owners, declared its value to be $3,500,000. Its stock was finally sold through my direction at an open public auction sale, after wide advertisement, for $4,150,000 to the highest bidder, representing a syndicate of more than a hundred American bankers who organized a new corporation to make the business a 100 per cent American enterprise.

The sale was approved, after careful investigation, both as to adequacy of price and character of purchasers, by the advisory sales committee, the investigation and report having been made by two leading members of that committee—Otto T. Bannard, chairman of the board of the New York Trust Co., and George L. Ingraham, former chief justice of the appellate division of the Supreme Court of New York. The sale was regular in every respect and the intimations of fraud and crime in connection therewith do a serious injustice to many patriotic Americans who were earnestly engaged in performing a service for their country in ridding American business of the menace of German control during the war.

The Chemical Foundation is a nonprofit corporation, formed for the purpose of taking over nearly 5,000 American patents owned by Germans in the chemical industry, which patents had originally been taken out by Germans for the purpose of making it impossible for the chemical industry to develop in this country. The result of that policy was seen in the early days of the war when it became apparent to the world that the domination of the chemical industry was on the Rhine and its by-products—high explosives and poisonous gases—almost worked the wreck of civilization. To-day by reason of the Alien Property Custodian's plan of Americanizing these German patents and distributing them to American producers through a semi-public institution like the Chemical Foundation, having for its purpose only the development of the chemical science in America, it has become apparent that the world can never again be caught in the clutches of a German control of the chemical industry. I have no hesitation in saying that the biggest achievement of the Alien Property Custodian for the benefit of our country and its future welfare and security was the formation of the Chemical Foundation and the sale of these German patents to it. The Germans recognize its transcendent importance and would now resort to any device to set aside that sale and have the patents restored finally to their German owners, in the hope that they could thus again dominate the chemical industry of the world. Their present plan seems to be to discredit in the public mind by wide publicity of false charges every act of the Alien Property Custodian and thus persuade the Government of the United States, either through the Congress or through executive departments, to take such action as will restore to Germany the strangle hold upon American industry and commerce in many important lines of industry which the Alien Property Custodian loosened as a part of the Government's policy in prosecuting the war.

All the German property was taken over and the sales program was carried out during the incumbency of my successor, Hon. Francis P. Garvan, and myself. Neither of us has anything to conceal nor any apologies to offer to either the Germans or their friends in this country for the very considerable part which we took in advancing the interests of the United States in the important matters intrusted to our care. Let the investigation proceed. Let it be searching, thorough, and painstaking, so that the country may know—not the garbled half truths being broadcasted by the Germans and their friends, but the whole truth as can and will be told by all of the splendid Americans who helped in this great work.

Yours truly,

A. MITCHELL PALMER.

Mr. GARRETT of Tennessee. Mr. Speaker, the majority may do just what it pleases about this investigation. The responsibility is yours. If you do not want your officials investigated, you do not have to have them investigated; but I serve notice upon you now that you are not, with my consent, going to avoid an investigation of your own officials by attacking the officials of a former administration, who stand ready and anxious to participate in any investigation that you may desire to make. [Applause on the Democratic side.]

Mr. VOLSTEAD. Mr. Speaker, I yield five minutes to the gentleman from Wyoming [Mr. MONDELL].

Mr. MONDELL. Mr. Speaker, I ask unanimous consent that I may speak out of order.

The SPEAKER. Is there objection?

There was no objection.

Mr. MONDELL. Mr. Speaker, the gentleman from Tennessee [Mr. GARRETT] just stated that at no time did any high official, any Cabinet officer of the former administration, express any objection to or desire or purpose to avoid a congressional investigation. I am willing to accept the word of the gentleman from Tennessee, so far as he is informed. I can say that no Cabinet officer, no high official, no official of any grade under this administration has ever at any time, so far as I know, and I am fairly well informed, I think, suggested that there should not be every and all the investigations that Congress may desire to make. [Applause on the Republican side.]

The Attorney General, the Secretary of War, and the Alien Property Custodian have each and every one said to me that, so far as they are concerned, they would welcome any investigation that Congress may desire to make. In fact, these officials have expressed the opinion that a resolution for an investigating committee having been reported out by the committee, it should be adopted. I personally am glad that the Committee on Rules rescinded its former action. I have never at any time believed that this was the time for further congressional investigation. We had our investigating committees at work nearly all of the last Congress. The time for congressional investigation of matters growing out of war activities has passed. The time for legal investigation and inquiry by legal officers of the Government, the time for examinations before grand juries, the time for trial, has arrived. A congressional investigation at this time could serve no other purpose than that of delay, of muddying the waters, of preventing prompt action by grand juries and of the courts.

I am not surprised that gentlemen whose names may figure in investigations before grand juries prefer a congressional investigation to action by the grand juries and the courts. That is perfectly natural; that is their only hope; and while charging no one—I know, as does everyone within the sound of my voice, that every man who fears the outcome of legal investigation, action of grand juries and by the courts, welcomes congressional investigation, because it causes delays, tends to muddy the water, and holds out the hope of immunity. The officers of the administration have not influenced our opinion that congressional investigations at this time are unwise. None of them suggested that they should not be undertaken. We of the majority, believing that the time for loose investigation and the airing of mere sensation has passed, and that the time for legal action is here, take the responsibility of seeing to it that the Department of Justice and grand juries and the courts shall not be delayed or hampered by congressional investigations of the matters they have under consideration. [Applause on the Republican side.]

Mr. TILLMAN. Mr. Speaker, I yield five minutes to the gentleman from Virginia [Mr. MOORE].

Mr. MOORE of Virginia. Mr. Speaker, my large interest in this matter is not confined to the small questions—they seem to me—that have been suggested by the gentleman from Wyoming [Mr. MONDELL] and the gentleman from Kansas [Mr. CAMPBELL]. My large interest in this matter is the same that is beginning to be indicated by the general public, which is voicing itself quite emphatically in some of the leading newspapers of the country, including some of the great Republican organs like the New York Tribune. Those journals carry us back to the time when the country was shocked at the appointment of Mr. Daugherty as Attorney General and proclaimed it in many ways. They carry us back to the more recent time when two gallant ex-service men, members, not of the minority party but of the majority party—Messrs. WOODRUFF and JOHNSON—rose on the floor of the House and made charges against the Attorney General that shocked many Members of the House upon both sides. They introduced a resolution for an investigation of the Attorney General. That resolution went to the Committee on Rules, and the chairman of that committee was so shocked by the direct and serious charges that had been made by Messrs. WOODRUFF and JOHNSON that for the first time in my acquaintance with him on the floor of the House he showed a quality of independence, a purpose to act without partisanship.

The chairman of the committee on the 3d of May voted for the resolution, and except for his so voting it could not have been passed, and now, forsooth, the chairman stands here and says the criticisms he hears in regard to the Attorney General and in regard to this whole business, makes him think of the issue from the mouth of a sewer. Yet he is responsible for those criticisms having been deliberately considered and for the resolution to investigate having been adopted. After the Attorney General had been in the office for more than a year, listening to and considering the charges against him, the chairman of the committee was instrumental in having the resolution passed by his committee and directed to be brought before the House. The gentleman from Wyoming may not be estopped from lecturing this side of the House, the gentleman from Wyoming may not be barred from using such epithets and characterizations as the gentleman from Kansas has employed, but the gentleman from Kansas surely is subject to the bar of estoppel. He is in the attitude to-day of that rather unadmirable individual in Bunyon's Pilgrims Progress, Mr.

Facing-both-ways. [Applause.] He not only knew of pending prosecutions on the 3d of May but he knew, as a man and a lawyer, how prosecutions are conducted. He perhaps did not then know that certain prosecutions were going to be set on foot, because not until later—until he had been spurred by the charges of Messrs. WOODRUFF and JOHNSON—did the Attorney General become active, but the gentleman from Kansas was as much a lawyer on the 3d of May and had as much acquaintance with the business of the courts on the 3d of May as he has now, and he found no reason on the 3d of May to try to stifle the resolution introduced by Mr. WOODRUFF and backed by Mr. JOHNSON of South Dakota. Nevertheless, he finds great reason for doing it to-day. Now, I wish to say this—and I speak for myself, and I think I can speak for every Member on this side of the House—that anyone who directly or indirectly charges that we who favor an investigation, who favor it, among other reasons, because the sentiment of the country calls for an investigation, that we are endeavoring to prevent the prosecution and conviction of malefactors can receive but one answer. If any such assertion should be made with respect to me or any of the gentlemen who surround me upon this side it shall be answered in only one way, and that by a sharp, short word of three letters. [Applause.] No one shall be permitted to attempt to deceive the country by any such assertion as that. We are here not only to support prosecutions but we are here, as the gentleman from Kansas is not, to support an inquiry into the conduct of officials who have been publicly arraigned because of their alleged misconduct.

The SPEAKER. The time of the gentleman has expired.

Mr. TILLMAN. I yield the gentleman five additional minutes.

The SPEAKER. The Chair would suggest to the gentleman that he is proceeding out of order.

Mr. MOORE of Virginia. I ask that I may speak out of order.

The SPEAKER. The gentleman from Virginia asks unanimous consent to speak out of order.

Mr. CAMPBELL of Kansas. Mr. Speaker, I ask unanimous consent that the gentleman may proceed out of order. [Applause.]

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. MOORE of Virginia. If the gentleman was showing the same consideration and generous concern for his country as he shows for me, I would not have any cause to complain of him now. [Applause.] When I have the time and strength, not as a partisan but as an American citizen and Representative and as an American lawyer, I am going to discuss the record of the Attorney General since he took office. If the opportunity is afforded me, I shall undertake to show that his conduct is unparalleled so far in the history of the Department of Justice, and that if there ever was an official anywhere who ought to court investigation, if innocent, and, if guilty, ought to be brought to the bar of the Senate, it is the Attorney General; and when I deal with the subject I shall not confine myself altogether to the war-fraud cases, so called, but shall include cases which have arisen since the close of the war.

In April I introduced a resolution which was sent to the cemetery which is operated by the gentleman from Kansas [Mr. CAMPBELL], the chairman of the Committee on Rules—a cemetery where all Democratic measures are interred.

A MEMBER. The morgue.

Mr. MOORE of Virginia. That resolution had reference to the removal of officials of the Bureau of Engraving and Printing. In the remarks made somewhat later I said that the President had been guided and, in my opinion, wretchedly misguided by the Attorney General and by an official of the Treasury Department, and that under their guidance he had done a thing that was outrageous in its disregard of the interests and rights of a number of officials of the Government and in flouting the spirit of the civil service law. That resolution has not been considered and will not be considered. Certainly, no prosecutions can be prejudiced by having an investigation of that matter. And yet we are denied an ascertainment of the exact facts. I might make a showing here not only of the injustice that was done the country and the officials who were removed by the order of the President, but I might undertake to make clear to the men and women of the country—and there is a larger percentage of women in the Bureau of Engraving and Printing than serve any other department of this Government—that men have been placed, pursuant to the order which I believe had the Attorney General's full knowledge and active approval, at the very head of that bureau and who are to-day managing its affairs who are accounted by those who know them best as disreputable. [Applause.] I might produce a record from the Supreme Court of the District of Columbia that shows that a third man who was placed in the position that had been filled by a constituent of my friend from Tennessee [Mr. BYRNS]—his constituent was given a clean bill of health by the Treasury Department at 4.30 p. m., March 30, and dismissed at 6.30 the same day—who is under charges in a civil suit pending in the Supreme Court of the District of Columbia, one which the United States attorney of the District of Columbia and his superior, the Attorney General, should not ignore.

The SPEAKER. The time of the gentleman has expired.

Mr. TILLMAN. Mr. Speaker, I yield one more minute to the gentleman from Virginia.

Mr. MOORE of Virginia. Mr. Speaker, I had not expected to discuss this matter this morning, but I shall try to discuss it hereafter, not only with reference to the general situation in which we find ourselves with respect to the Department of Justice, but also with reference to this Bureau of Engraving situation. I do not and will not discuss it as a party man. I would scorn to take the strict partisan attitude the gentleman who faces me has taken this morning, and which is so inconsistent with his previous course on the same matter. Compared with the coat of many colors the gentleman has worn in the transaction relative to the Woodruff-Johnson resolution, the coat of Joseph would look like a mere monochrome.

I can only say one further thing this morning, that I am about to offer a resolution which will not call for the investigation of anybody or any department, but indicate how the House ought to save to itself the privilege of passing upon resolutions that are adopted by the Rules Committee and not be compelled to allow them to remain indefinitely in the pocket of the gentleman from Kansas weeks and months after his committee has directed them to be reported. [Applause.]

Mr. VOLSTEAD. I want to say that I intended to yield two minutes to the gentleman from Kansas [Mr. TINCHER], and after he concludes his speech I shall try to insist, if possible, that we keep to the bill under consideration.

Mr. TILLMAN. I wish to suggest that there have been three speakers on that side.

Mr. VOLSTEAD. I am not trying to cut off debate.

Mr. TILLMAN. If the gentleman is going to permit three speeches on that side, I insist that we have that many here.

The SPEAKER. The Chair is informed that the gentleman from Minnesota [Mr. VOLSTEAD] has used 20 minutes and the gentleman from Arkansas 21 minutes.

Mr. TILLMAN. I would suggest that if the gentleman from Kansas is to proceed out of order for two minutes, I should have the same amount of time. I understand the gentleman from Minnesota to yield five minutes more. I want the same time exactly.

Mr. VOLSTEAD. I yield five minutes to the gentleman from Kansas [Mr. TINCHER].

Mr. TINCHER. Mr. Speaker, I ask unanimous consent to proceed out of order.

Mr. TILLMAN. Mr. Speaker, reserving the right to object, I shall not object if the gentleman allows me to do the same thing over here and have the same amount of time.

The SPEAKER. The Chair will suggest that the gentleman from Minnesota is entitled to close, and if the gentleman from Arkansas uses more time, it should be used now. How much time is the gentleman from Minnesota going to yield?

Mr. VOLSTEAD. Two minutes more.

The SPEAKER. In order to equalize the time, the gentleman from Arkansas would have one minute. Will the gentleman from Minnesota use that time on this subject now and not wait until the gentleman has concluded?

Mr. VOLSTEAD. If you are going to speak out of order——

Mr. TILLMAN. All right. I bow to the decision of the chairman of the Judiciary Committee.

Mr. Speaker, I want to ask if the gentleman from South Dakota [Mr. JOHNSON] is on the floor.

The SPEAKER. The Chair does not see the gentleman.

Mr. TILLMAN. I will ask if the gentleman from Michigan is on the floor and if he desires any time?

Mr. WOODRUFF. I will state to the gentleman that I will be glad to utilize the minute he has remaining.

Mr. TILLMAN. I very gladly and cheerfully yield five minutes to the gentleman from Michigan.

The SPEAKER. The gentleman from Arkansas yields five minutes to the gentleman from Michigan [Mr. WOODRUFF].

Mr. WOODRUFF. Mr. Speaker, I ask unanimous consent to speak out of order.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. WOODRUFF. Mr. Speaker, I can not say that I was surprised this morning when the gentleman from Kansas [Mr. CAMPBELL] pulled from his pocket a document, which I first anticipated might be my resolution, and proceeded to read. In his discussion of this question he has very carefully overlooked and ignored everything that has been charged in the House upon the subject of the way the Department of Justice has handled or mishandled the war-fraud cases. If he will examine the charges I have made and the charges that have been made by my friend from South Dakota [Mr. JOHNSON], not a one of which has been denied, he will recognize the fact that the promise of the Attorney General to properly handle the war-fraud cases is precisely the same promise that the same Attorney General made to the House and to the country one long year ago. If you will recollect, about a year ago Mr. Daugherty gave an interview to the press in which he stated he was about to bring these war grafters to justice; that it was his purpose when he was going on this fishing trip to throw back the little fish and keep only the big ones. As a matter of fact, when the Attorney General started out upon that fishing trip, I take it he must have forgotten his bait, because up to date if he has hooked a minnow or a whale the country has not been able to discover it. [Applause on the Democratic side.]

Now, Mr. Speaker, I approve very heartily the appointment of Mr. McCullough and the appointment of our colleague, Mr. REAVIS, as Assistant Attorney General. I have unbounded confidence in both of these gentlemen. I believe that if the Attorney General will turn them loose on these cases and let them do as they want to do, the country will be well satisfied with the way the Department of Justice will operate. But the Members here must always bear in mind that the Attorney General, who for 14 long months has brought to the bar of justice not one single grafter, in the present reorganization of his office retains to himself at all times the right to say who shall and who shall not be prosecuted.

Mr. JEFFERS of Alabama. Will the gentleman yield for a moment?

Mr. WOODRUFF. Certainly.

Mr. JEFFERS of Alabama. I just want to say that the reason why Mr. Daugherty reserves for himself the right to say who shall or shall not be prosecuted might be found in the words of the gentleman from Kansas [Mr. CAMPBELL] himself, if I remember the words correctly. In the course of his remarks he said that when these conspicuous crooks and grafters marched off to the penitentiary Daugherty might lead them there.

Mr. WOODRUFF. I do not care to comment upon that. But I do want to call the attention of the House to this one fact, and that is that Mr. REAVIS, Mr. McCullough, and Mr. Steinbrink, or anyone else, called in by the Attorney General to assist in the prosecution of these cases will be there only in the capacity of subordinates, and as such must do as they are told.

Mr. KING. Mr. Speaker, will the gentleman yield?

Mr. WOODRUFF. Certainly.

Mr. KING. Will these two eminent gentlemen be required to proceed in their prosecutions without the aid of Captain Scaife and Major Watts?

Mr. WOODRUFF. Unquestionably they will be. Up to date I have learned of no movement on the part of the Attorney General to call into these cases the men who have, for the Department of Justice, investigated these cases.

Mr. CARTER. Mr. Speaker, will the gentleman yield?

Mr. WOODRUFF. Certainly.

Mr. CARTER. When were Mr. McCulloch and Mr. REAVIS appointed?

Mr. WOODRUFF. I learned from the statement of the gentleman from Kansas [Mr. CAMPBELL] that Mr. McCulloch was invited some time in March last. Mr. REAVIS has been retained, I understand, during the past three weeks.

Mr. CARTER. Was not that more than 12 months after the present Attorney General had qualified, and after your resolution of investigation had been presented?

Mr. WOODRUFF. Yes. Mr. McCulloch has been retained to handle the cantonment cases, and this occurred more than six months after the man in the Department of Justice, in whose hands the Attorney General had placed the handling of these contracts, had announced that these cases were closed; that there was nothing to them.

Mr. CARTER. And if the gentleman will permit, that was the first act in his defense of the Attorney General; that was the first act that the gentleman from Kansas [Mr. CAMPBELL] has cited which the Attorney General has done to prosecute the war grafters?

The SPEAKER. The time of the gentleman from Michigan has expired.

Mr. TILLMAN. Mr. Speaker, does the gentleman desire more time?

Mr. WOODRUFF. Yes; I would like to have two minutes more.

Mr. SNELL. Mr. Speaker, reserving the right to object——

A MEMBER. Oh, no!

The SPEAKER. The gentleman, of course, has the right to object to his speaking out of order.

Mr. TILLMAN. I yield to the gentleman two minutes more.

Mr. WOODRUFF. I ask unanimous consent, Mr. Speaker, to proceed out of order.

The SPEAKER. The gentleman from Michigan asks unanimous consent to speak out of order. Is there objection?

Mr. SNELL. Reserving the right to object, it seems to me this discussion should come to an end some time. Is this the last speaker?

Mr. KING. You have let everybody speak here who wanted to speak.

The SPEAKER. Is there objection?

There was no objection.

Mr. KEARNS. Mr. Speaker, will the gentleman yield?

Mr. WOODRUFF. Certainly.

Mr. KEARNS. Does the gentleman know that early in January Mr. Daugherty, as Attorney General of the United States, announced that he was preparing to prosecute these war-fraud and graft cases?

Mr. WOODRUFF. I had not known of his January announcement, but I have already mentioned the one of a year ago. I know that the Attorney General stated two weeks ago that for many months he had been trying to secure the services of able and conscientious attorneys to handle these cases, and that he had been unsuccessful. And I want to say to you now that that is the most dastardly arraignment of the American bar that has ever been made. [Applause.]

Mr. KEARNS. I will make the statement to the gentleman that early in January he was trying to surround himself with deputy attorneys general to conduct the prosecutions; and I will say this, further, that these fraud cases were already present on the 11th day of November, 1918, and no Attorney General up to the 4th of March, 1921, ever turned a hand to prosecute any of them.

Mr. WOODRUFF. I am sure the gentleman would not expect the Attorney General of the preceding administration to prosecute either himself or his friends. [Applause.]

Now, Mr. Speaker, I want to say a word further about the Attorney General and his inability to secure able assistants in this work: Three weeks ago he announced that he had been entirely unsuccessful in securing these assistants, and yet two or three weeks later he announces that he has secured the services of very eminent gentlemen throughout the country, and that in the face of the fact that three weeks previously he had announced that for months and months he has been unable to find such gentlemen. [Applause.]

Now, just a word in closing. It is probable that the action of the Committee on Rules this morning has foreclosed action by the House upon this resolution. But I want to serve notice upon every Member of this House that if the Attorney General's department does not secure the results that he now states he will secure; if the Department of Justice does not properly function in these cases, you will find me here when Congress meets again calling attention to his dereliction, and you gentlemen who will have had an opportunity to go back home and talk to your constituents will come back here singing a different song from that which some of you have been singing here to-day. [Applause.]

Mr. VOLSTEAD. Mr. Speaker, I yield five minutes to the gentleman from Kansas [Mr. TINCHER].

The SPEAKER. The gentleman from Kansas is recognized for five minutes.

Mr. TINCHER. Mr. Speaker, I ask unanimous consent to speak out of order.

The SPEAKER. Is there objection to the gentleman's request?

There was no objection.

Mr. TINCHER. Mr. Speaker, I would not have asked for any time on this question had not my friend from Virginia [Mr. MOORE], who is ordinarily so passive and has such control of himself, evinced such feeling in this matter. He served notice here that he was going to take the floor later on to denounce the Attorney General of the United States.

I can recall when we had congressional investigations, at a time when I think they were in place, and I then thought it

was proper that we should have them, because we could not have anything else. The executive departments of the Government were in charge of the "class of" people so well expressed by the gentleman from Michigan a moment ago; and I can recall, too, that when the various subcommittees brought in their reports here the distinguished gentleman from Tennessee [Mr. GARRETT], who has evinced such feeling in this matter this morning, appeared before this House and with all the oratory and force that he used this morning advocated the minority report to the majority report of that subcommitee.

But that is neither here nor there. We have an Attorney General. I thought he was all right. I did not hear a man on that side of the House raise one word against the Attorney General until a certain incident occurred, and that was the indictment, or the notice that there would be an indictment, advocated by him, and backed up by him, of this man Morse. Immediately we began to hear speeches attacking him personally, going back into his record—speeches not only in this Chamber but in the other Chamber.

Who is Morse? Where are the Morse shipyards? Why is it that certain gentlemen on every occasion rise in their places in this House to denounce the Attorney General or say something slurring of him ever since that indictment? It has been charged in that indictment, and the indictment by the grand jury has been sustained by the courts, that he filched from the Government money to build a "mansion" in the grand Old Dominion of Virginia, in a certain congressional district.

Why all this feeling? Who wants to handicap Daugherty so that he can not obtain the conviction of Morse? I have no brief for any of them. I want every profiteer and every gouger who stole from this Government during the war prosecuted. I am thankful that this morning any Member of Congress who has facts can appear before the Federal grand jury here in this District and offer those facts where we can have prosecutions, instead of majority and minority reports from a congressional committee. [Applause.] That is the effective and orderly way. I am not opposed to any investigation when any fact warrants, but I do want prosecutions. Let us not clear Morse. Oh, I have passed the Morse shipyards. I know of the unfinished ships in the Morse shipyards and of the mansions that he was constructing with Government money, and I say to you that I bid Harry Daugherty Godspeed in this prosecution whether he some time in the past favored the pardon of that man or not. No matter what the past may have contained, if Morse is guilty of the things he is indicted for, no man's voice should be raised in his behalf in either Chamber of this Congress, and no man should throw mud at Daugherty simply because he has begun proceedings against Morse. Perhaps I am wrong, but did you ever hear a Democrat in either House of Congress criticize Harry Daugherty until Morse was indicted? I thank you. [Applause.]

Mr. Speaker, I yield back the remainder of my time.

Mr. GARRETT of Tennessee. Mr. Speaker, I think the gentleman has a little time remaining. Will the gentleman yield?

Mr. TINCHER. I said I yielded it back.

Mr. GARRETT of Tennessee. Will the gentleman yield before he yields back his time?

Mr. TINCHER. No; I have yielded my time.

Mr. VOLSTEAD. Mr. Speaker, I offer an amendment.

The SPEAKER. The gentleman from Minnesota offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. VOLSTEAD: Page 3, line 15, after the word "him," strike out the word "many" and insert in lieu thereof the word "may."

Mr. VOLSTEAD. This is to correct a clerical error.

The amendment was agreed to.

Mr. VOLSTEAD. If no gentleman desires to make any further speech, I move the previous question on the bill to the final passage.

The previous question was ordered.

The SPEAKER. The question is on the amendments.

The amendments were agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was accordingly read the third time and passed.

On motion of Mr. VOLSTEAD, a motion to reconsider the vote by which the bill was passed was laid on the table.

EMPLOYMENT OF FEDERAL PRISONERS.

The SPEAKER. Has the Committee on the Judiciary any further business?

Mr. VOLSTEAD. We have. Mr. Speaker, I call up House Concurrent Resolution 53, to create a joint committee of the Senate and House of Representatives to determine what employment can be furnished Federal prisoners, and for other purposes.

The SPEAKER. This bill is on the Union Calendar and the House automatically resolves itself into the Committee of the Whole House on the state of the Union. The gentleman from New York [Mr HUSTED] will please take the chair.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the consideration of House Concurrent Resolution 53, with Mr. HUSTED in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the consideration of a concurrent resolution, which the Clerk will report.

The Clerk read as follows:

Resolved by the House of Representatives (the Senate concurring), That a special joint committee of the Senate and House of Representatives be created, composed of three members of the Committee on the Judiciary of the Senate and three members of the Committee on the Judiciary of the House of Representatives, to be designated by the President of the Senate and the Speaker of the House of Representatives, respectively, that shall investigate and report to Congress, not later than the first Monday in December, 1922, what articles it is desirable to manufacture in the United States penitentiaries at Leavenworth, Kans., and McNeil Island, Wash., the cost of erecting buildings and the equipment of such buildings with the necessary machinery for the production of any such articles, the probable cost of manufacture of such articles and the prices now paid under contract for such articles, and such other data as may be pertinent to the general inquiry. Such committee may employ clerical and stenographic assistance, and the expenses thereof and of the committee may be paid one-half out of the contingent fund of the Senate and one-half out of the contingent fund of the House of Representatives upon vouchers to be approved by the chairman of such joint committee, but such expenses shall not exceed $2,000, which sum may be appropriated therefor.

With the following committee amendments:

Page 1, line 10, after the figures "1922" insert "as to employment of prisoners and."

Page 1, line 11, after the word "to" insert the words "produce or."

Page 2, line 11, after the figures "$2,000" strike out the words "which sum may be appropriated therefor."

Mr. VOLSTEAD. Mr. Chairman, this legislation was suggested by the prison authorities and by the Attorney General. We have two prisons, one at Leavenworth, Kans., and another at McNeil Island, Wash., where at present there is no adequate provision for prisoners to do any sort of labor. The original proposition as I introduced it at the request of the Department of Justice was to create a commission consisting of members of the Appropriations Committees of the two Houses and the various prison authorities. When it came before the Judiciary Committee we concluded that it would be better to have a joint committee appointed from the membership of the Judiciary Committees of the two Houses, for the reason that those committees have jurisdiction of this sort of legislation. It would seem apparent that it would be better to have members of these two committees functioning in making this investigation in connection with the Department of Justice and the prison authorities than members of the Appropriations Committees, that have no power to report the necessary legislation.

It is very important that action be taken in the near future. Up to within a few months there has been more or less work to do in the erection of buildings upon the prison grounds, but the buildings are about completed and something else must be provided to give the prisoners employment. Everybody who has had anything to do with prison matters realizes that the worst thing possible is to have prisoners remain in confinement without some opportunity to work.

Mr. JOHNSON of Mississippi. What kind of work are the prisoners required to do at this time?

Mr. VOLSTEAD. At this time they are simply helping to construct buildings upon the prison grounds, but the buildings, as I said, are about finished. We did provide a cotton-duck factory at Atlanta, and there we have an opportunity to employ practically the entire force. During the last year, which was the first year when the Government cotton-duck factory operated, we saved $128,000 from the products manufactured by the prisoners there. There is no question but that prisoners can in a large measure be made self-sustaining if we furnish them suitable work. We realize that it is difficult to find work against which the labor organizations will not complain, but I think such work can be provided, and if the gentleman will read the letter of the Attorney General which is attached to the report he will find that the matter has been pretty carefully considered and that there is a kind of work that can be furnished to these prisoners that will not be seriously objected to by anyone so far as I know.

Mr. RAKER. Will the gentleman yield for a question?

Mr. VOLSTEAD. Yes.

Mr. RAKER. This concurrent resolution provides for the appointment of three members from the Senate Judiciary Com-

mittee and a like number from the Judiciary Committee of the House to make this investigation and report.

Mr. VOLSTEAD. Yes.

Mr. RAKER. Have not the two committees of the Senate and the House all the assistants, and could not the two committees jointly now determine what would be a feasible industry to be placed in the two places?

Mr. VOLSTEAD. It is believed that it would be better to have a joint committee, as that might aid in having the two committees agree on what should be done, and besides that, we believe it would be better to have a smaller committee act than the entire Judiciary Committees of the House and the Senate. They would have, of course, to consult the various officers who have charge of prison work, as there is no doubt an advantage to have a joint committee of this kind.

Mr. WILLIAMSON. Will the gentleman yield?

Mr. VOLSTEAD. Certainly.

Mr. WILLIAMSON. Will it be the purpose of this committee to work out some plan later to be enacted into law whereby the prisoners will be employed in a profitable way?

Mr. VOLSTEAD. That is it.

The resolution was read for amendment.

The Clerk read the following committee amendment:

Page 1, line 10, after the figures 1922, insert "as to employment of prisoners and."

The amendment was agreed to.

The Clerk read the following committee amendment:

Page 1, line 11, after the word "to" insert the words "produce or."

The committee amendment was agreed to.

The Clerk read the following committee amendment:

Page 2, line 12, strike out the words "which sum may be appropriate therefor."

The committee amendment was agreed to.

Mr. VOLSTEAD. Mr. Chairman, I move that the committee do now rise and report the concurrent resolution to the House with the amendments, with the recommendation that the amendments be agreed to and that the concurrent resolution do pass.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. HUSTED, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration House Concurrent Resolution 53, and had directed him to report the same back with sundry amendments, with the recommendation that the amendments be agreed to and that the resolution as amended do pass.

The SPEAKER. Is a separate vote demanded on any amendment?

There was no demand for a separate vote.

The amendments were agreed to.

The concurrent resolution was agreed to.

DEVELOPMENT AND ADMINISTRATION OF THE PORT OF NEW YORK.

Mr. VOLSTEAD. Mr. Speaker, I call up House Joint Resolution 337, granting consent of Congress and authority to the Port of New York Authority to execute the comprehensive plan approved by the States of New York and New Jersey by chapter 43, Laws of New York, 1922, and chapter 9, Laws of New Jersey, 1922.

The Clerk read the joint resolution, as follows:

Whereas pursuant to the agreement or compact entered into by the States of New York and New Jersey under date of April 30, 1921, and consented to by the Congress of the United States by resolution signed by the President on the 23d day of August, 1921, the two States have agreed upon a comprehensive plan for the development of the port of New York; and

Whereas the carrying out and executing of the said plan will the better promote and facilitate commerce between the States and between the States and foreign nations and provide better and cheaper transportation of property and aid in providing better postal, military, and other services of value to the Nation: Therefore be it

Resolved, etc., That, subject always to the approval of the officers and agents of the United States as required by acts of Congress touching the jurisdiction and control of the United States over the matters, or any part thereof, covered by this resolution, the consent of Congress is hereby given to the supplemental agreement between the States of New York and New Jersey evidenced by chapter 43, Laws of New York, 1922, and chapter 9, Laws of New Jersey, 1922, covering the comprehensive plan for the development of the port of New York embraced in said statutes in form following, that is to say:

"SECTION 1. Principles to govern the development:

"First. That terminal operations within the port district, so far as economically practicable, should be unified.

"Second. That there should be consolidation of shipments at proper classification points so as to eliminate duplication of effort, inefficient loading of equipment, and realize reduction in expenses.

"Third. That there should be the most direct routing of all commodities so as to avoid centers of congestion, conflicting currents, and long truck hauls.

"Fourth. That terminal stations established under the comprehensive plan should be union stations, so far as practicable.

"Fifth. That the process of coordinating facilities should, so far as practicable, adopt casting facilities as integral parts of the new system, so as to avoid needless destruction of existing capital investment and reduce so far as may be possible the requirements for new capital; and endeavor should be made to obtain the consent of local municipalities within the port district for the coordination of their present and contemplated port and terminal facilities with the whole plan.

"Sixth. That freight from all railroads must be brought to all parts of the port wherever practicable without cars breaking bulk, and this necessitates tunnel connection between New Jersey and Long Island, and tunnel or bridge connections between other parts of the port.

"Seventh. That there should be urged upon the Federal authorities improvements of channels so as to give access for that type of waterborne commerce adapted to the various forms of development which the respective shore fronts and adjacent lands of the port would best lend themselves to.

"Eighth. That highways for motor-truck traffic should be laid out so as to permit the most efficient interrelation between terminals, piers, and industrial establishments not equipped with railroad sidings and for the distribution of building materials and many other commodities which must be handled by trucks; these highways to connect with existing or projected bridges, tunnels, and ferries.

"Ninth. That definite methods for prompt relief should be devised which can be applied for the better coordination and operation of existing facilities while larger and more comprehensive plans for future development are being carried out.

"SEC. 2. The bridges, tunnels, and belt lines forming the comprehensive plan are generally and in outline indicated on maps filed by the Port of New York Authority in the offices of the secretaries of the States of New York and New Jersey and are hereinafter described in outline.

"SEC. 3. Tunnels and bridges to form part of the plan: (a) A tunnel or tunnels connecting the New Jersey shore and the Brooklyn shore of New York to provide through-line connection between the transcontinental railroads now having their terminals in New Jersey, with the Long Island Railroad and the New York connecting railroad on Long Island and with the New York Central & Hudson River Railroad and the New York, New Haven & Hartford Railroad in the Bronx, and to provide continuous transportation of freight between the Queens, Brooklyn, and Bronx sections of the port to and from all parts of the westerly section of the port for all of the transcontinental railroads. (b) A bridge and/or tunnel across or under the Arthur Kill, and/or the existing bridge enlarged to provide direct freight carriage between New Jersey and Staten Island. (c) The location of all such tunnels or bridges to be at the shortest, most accessible, and most economical points practicable, taking account of existing facilities now located within the port district and providing for and taking account of all reasonably foreseeable future growth in all parts of the district.

"SEC. 4. Manhattan service: The island of Manhattan to be connected with New Jersey by bridge or tunnel, or both, and freight destined to and from Manhattan to be carried underground, so far as practicable by such system, automatic electric as hereinafter described or otherwise, as will furnish the most expeditious, economical, and practicable transportation of freight, especially meat, produce, milk, and other commodities comprising the daily needs of the people. Suitable markets, union inland terminal stations and warehouses to be laid out at points most convenient to the homes and industries upon the island, the said system to be connected with all the transcontinental railroads terminating in New Jersey and by appropriate connection with the New York Central & Hudson River Railroad, the New York, New Haven & Hartford, and the Long Island Railroads.

"SEC. 5. Belt lines: The numbers hereinafter used correspond with the numbers which have been placed on the map of the comprehensive plan to identify the various belt lines and marginal railroads.

"No. 1, middle belt line: Connects New Jersey and Staten Island and the railroads on the westerly side of the port with Brooklyn, Queens, The Bronx, and the railroads on the easterly side of the port. Connects with the New York Central Railroad in The Bronx; with the New York, New Haven & Hartford Railroad in The Bronx; with the Long Island Railroad in Queens and Brooklyn; with the Baltimore & Ohio Railroad near Elizabethport and in Staten Island; with the Central Railroad Co. of New Jersey at Elizabethport and at points in Newark and Jersey City; with the Pennsylvania Railroad in Newark and Jersey City; with the Lehigh Valley Railroad in Newark and Jersey City; with the Delaware, Lackawanna & Western Railroad in Jersey City and the Secaucus meadows; with the Erie Railroad in Jersey City and the Secaucus meadows; with the New York, Susquehanna & Western, the New York, Ontario & Western, and the West Shore Railroads on the westerly side of the Palisades above the Weehawken Tunnel.

"The route of the middle belt line, as shown on said map, is in general as follows: Commencing at the Hudson River at Spuyten Duyvil, running easterly and southerly generally along the easterly side of the Harlem River, utilizing existing lines so far as practicable and improving and adding where necessary, to a connection with Hell Gate Bridge and the New Haven Railroad, a distance of approximately 7 miles; thence continuing in a general southerly direction, utilizing existing lines and improving and adding where necessary, to a point near Bay Ridge, a distance of approximately 18½ miles; thence by a new tunnel under New York Bay in a northwesterly direction to a portal in Jersey City or Bayonne, a distance of approximately 5 miles, to a connection with the tracks of the Pennsylvania and Lehigh Valley Railroads; thence in a generally northerly direction along the easterly side of Newark Bay and the Hackensack River at the westerly foot of the Palisades, utilizing existing tracks and improving and adding where necessary, making connections with the Jersey Central, Pennsylvania, Lehigh Valley, Delaware, Lackawanna & Western, Erie, New York, Susquehanna & Western, New York, Ontario & Western, and West Shore Railroads, a distance of approximately 10 miles. From the westerly portal of the Bay Tunnel and from the line along the easterly side of Newark Bay by the bridges of the Central Railroad of New Jersey (crossing the Hackensack and Passaic Rivers) and of the Pennsylvania and Lehigh Valley Railroads (crossing Newark Bay) to the line of the Central Railroad of New Jersey, running along the westerly side of Newark Bay and thence southerly along this line to a connection with the Baltimore & Ohio Railroad south of Elizabethport, utilizing existing lines so far as practicable and improving and adding where necessary, a distance of approximately 12 miles; thence in an easterly direction crossing the Arthur Kill, utilizing existing lines so far as practicable and improving and adding where necessary, along the northerly and easterly shores of Staten Island to the new city piers and to a connection, if the city of New York consents thereto,

with the tunnel under the Narrows to Brooklyn, provided for under chapter 700 of the laws of the State of New York for 1921.

"No. 2: A marginal railroad to The Bronx extending along the shore of the East River and Westchester Creek, connecting with the middle belt line (No. 1) and with the New York, New Haven & Hartford Railroad in the vicinity of Westchester.

"No. 3: A marginal railroad in Queens and Brooklyn extending along Flushing Creek, Flushing Bay, the East River, and the upper New York Bay. Connects with the middle belt line (No. 1) by lines No. 4, No. 5, No. 6, and directly at the southerly end at Bay Ridge. Existing lines to be utilized and improved and added to and new lines built where lines do not now exist.

"No. 4: An existing line to be improved and added to where necessary. Connects the middle belt line (No. 1) with the marginal railroad (No. 3) near its northeasterly end.

"No. 5: An existing line to be improved and added to where necessary. Connects the middle belt line (No. 1) with the marginal railroad (No. 3) in Lond Island City.

"No. 6: Connects the middle belt line (No. 1) with the marginal railroad (No. 3) in the Greenpoint section of Brooklyn. The existing portion to be improved and added to where necessary.

"No. 7: A marginal railroad surrounding the northerly and westerly shores of Jamaica Bay. A new line. Connects with the middle belt line (No. 1).

"No. 8: An existing line to be improved and added to where necessary. Extends along the southeasterly shore of Staten Island. Connects with middle belt line (No. 1).

"No. 9: A marginal railroad extending along the westerly shore of Staten Island and a branch connection with No. 8. Connects with the middle belt line (No. 1) and with a branch from the outer belt line (No. 15).

"No. 10: A line made up mainly of existing lines, to be improved and added to where necessary. Connects with the middle belt line (No. 1) by way of marginal railroad No. 11. Extends along the southerly shore of Raritan Bay and through the territory south of the Raritan River reaching New Brunswick.

"No. 11: A marginal railroad extending from a connection with the proposed outer belt line (No. 15) near New Brunswick along the northerly shore of the Raritan River to Perth Amboy, thence northerly along the westerly side of the Arthur Kill to a connection with the middle belt line (No. 1) south of Elizabethport. The portion of this line which exists to be improved and added to where necessary.

"No. 12: A marginal railroad extending along the easterly shore of Newark Bay and the Hackensack River and connects with the middle belt line (No. 1). A new line.

"No. 13: A marginal railroad extending along the westerly side of the Hudson River and the upper New York Bay. Made up mainly of existing lines—the Erie Terminal, Jersey Junction, Hoboken Shore, and National Docks Railroads. To be improved and added to where necessary. To be connected with middle belt line (No. 1).

"No. 14: A marginal railroad connecting with the middle belt line (No. 1) and extending through the Hackensack and Secaucus meadows.

"No. 15: An outer belt line extending around the westerly limits of the port district beyond the congested section. Northerly terminus on the Hudson River at Piermont. Connects by marginal railroads at the southerly end with the harbor waters below the congested section. By spurs connects with the middle belt line (No. 1) on the westerly shore of Newark Bay and with the marginal railroad on the westerly shore of Staten Island (No. 9).

"No. 16: The automatic electric system for serving Manhattan Island. Its yards to connect with the middle belt line and with all the railroads of the port district. A standard gauge underground railroad deep enough in Manhattan to permit of two levels of rapid-transit subways to pass over it. Standard railroad cars to be brought through to Manhattan terminals for perishables and food products in refrigerator cars. Cars with merchandise freight to be stopped at its yards. Freight from standard cars to be transferred onto wheeled containers, thence to special electrically propelled cars, which will bear it to Manhattan. Freight to be kept on wheels between the door of the standard freight car at the transfer point and the tailboard of the truck at the Manhattan terminal or the store door, as may be elected by the shipper or consignee, eliminating extra handling. Union terminal stations to be located on Manhattan in zones as far as practicable of equal trucking distance, as to pick-ups and deliveries, to be served by this system. Terminals to contain storage space and space for other facilities, the system to bring all the railroads of the port to Manhattan.

"SEC. 6. The determination of the exact location, system, and character of each of the said tunnels, bridges, belt lines, approaches, classification yards, warehouses, terminals, or other improvements shall be made by the Port Authority after public hearings and further study, but in general the location thereof shall be as indicated upon said map, and as herein described.

"SEC. 7. The right to add to, modify, or change any part of the foregoing comprehensive plan is reserved by each State, with the concurrence of the other."

And the consent of Congress is hereby given to the carrying out and effectuation of said comprehensive plan, and the said Port of New York Authority is authorized and empowered to carry out and effectuate the same: *Provided*, That nothing herein contained shall be construed as impairing or in any manner affecting any right or jurisdiction of the United States in and over the region which forms the subject of said agreement: *Provided further*, That no bridges, tunnels, or other structures shall be built across, under, or in any of the waters of the United States, and no change shall be made in the navigable capacity or condition of any such waters, until the plans therefor have been approved by the Chief of Engineers and the Secretary of War.

SEC. 2. That the right to alter, amend, or repeal this resolution is hereby expressly reserved.

Mr. VOLSTEAD. Mr. Chairman, I yield 10 minutes to the gentleman from New York [Mr. ANSORGE].

Mr. ANSORGE. Mr. Speaker, on August 23, 1921, President Harding signed the bill known as the Edge-Ansorge joint resolution granting consent of Congress to the treaty between the States of New York and New Jersey, creating the port of New York district and establishing the Port of New York Authority for the comprehensive development of the port of New York.

Now, the two States have agreed upon the detailed plans for the development of the port and by the bill now before the House consent and authority of Congress is asked to the carrying out and effectuation of the comprehensive plan and that the Port of New York Authority be authorized and empowered to carry out and effectuate the same.

The detailed plans approved by this bill provide for extensive tunnels, bridges, terminals, and belt lines which will bring the transcontinental railroads into the city of New York, thereby eliminating congestion, delay, and expense of distributing foodstuffs and other commodities to the people of Greater New York and vicinity. The plans provide that terminals within the port shall be unified and consolidation of shipments shall be made at proper points to eliminate duplication of effort, congestion, and long truck hauls. Another provision calls for the laying out of highways for motor-truck traffic, for prompt and efficient distribution of building material and other commodities which must be handled by trucks, such highways to connect with existing or proposed bridges, tunnels, and ferries.

Heretofore the lack of cooperation between the two States in the development of the port of New York has been mainly responsible for the congestion which now characterizes the receipt and distribution of foodstuffs in the city of New York and adjoining territory. At the present time the terminal facilities at the port are woefully inadequate and antiquated.

It is estimated that it now costs three times as much to move foodstuffs from the meadows of New Jersey to upper Manhattan and the Bronx as it does to bring them all the way from the Middle West to the meadows of New Jersey.

For many years the States of New York and New Jersey have been endeavoring to reach an agreement whereby they could cooperate in developing New York Harbor and the contiguous waterways and ports.

Four years ago the two States by legislative enactment created a joint commission, which made a thorough study of harbor conditions. In conformance with the recommendations of that commission, which was known as the New York-New Jersey Port and Harbor Development Commission, the two States entered into an agreement or compact for the creation of the port of New York district and the establishment of the Port of New York Authority for the comprehensive development of the port of New York. That treaty or compact between the two States was signed with appropriate ceremonies at the chamber of commerce in the city of New York on April 30, 1921.

It has been said that the signing of that treaty was one of the most important events in the history of the two States and in the annals of real constructive progress in the United States.

To indicate the nonpolitical character of the Port of New York Authority it is interesting to note that the Republican governor of New York has appointed the former Democratic governor of New York as one of the members of the Port Authority to represent New York. The State platforms of both the Republican and Democratic parties in 1920 advocated the creation of a port authority with adequate powers to develop the port. There never was a project that savored less of politics and sectionalism than the proposed plan to develop the port under unified joint control.

The treaty expressly provides that no property held by any city or municipality shall be used without the consent of such city or municipality. Nor has the State of New York or the State of New Jersey parted with any of their sovereign rights nor relinquished control of any property belonging to the people of the two States. Furthermore, the joint resolution heretofore adopted and the one now before the House expressly provide that nothing therein contained shall be construed as impairing or in any manner affecting any right or jurisdiction of the United States in and over the region which forms the subject of the agreement. The Secretary of War has already passed upon the bill before the House and several provisions suggested by him have been incorporated in the bill as reintroduced by me on May 26, 1922. The principal proviso added at the suggestion of the War Department is that contained on page 13 of the bill to the effect that—

> No bridges, tunnels, or other structures shall be built across, under, or in any of the waters of the United States, and no change shall be made in the navigable capacity or condition of any such waters until the plans therefor have been approved by the Chief of Engineers and the Secretary of War.

It will be seen, therefore, that neither the treaty nor the comprehensive plan violates any principle of home rule, and that the cities, States, and the Nation are fully protected.

The adoption of the treaty and the comprehensive plan between the two States were the first real progress made by the two States to jointly develop the port of New York.

One of the reasons why the port of New York has not received its share of congressional appropriations has been that the two States were not in harmony and failed to join in any requests.

Prior to the study by the New York-New Jersey Port and Harbor Development Commission the two States had done nothing except to encourage rivalry in the port. The Army Board of Engineers was unwilling to indorse appropriations for developing the port until there was some plan for the future. At one time New Jersey sought to secure a differential in its favor against New York. In the harbor-pollution case New York actually sued New Jersey in the United States Supreme Court. Each State said the other was polluting the harbor. The United States Supreme Court told both States to go back and sit around the table and agree upon a constructive solution of the harbor-pollution problem. In the rate case the Interstate Commerce Commission told both States to sit around a table and work out a constructive plan. Now, the States, by the treaty and comprehensive plan of development, have "agreed not to disagree" and to work jointly in the development of the port of New York, which is not alone an asset of the two States but an asset of the entire Nation.

The Secretary of War, in giving his approval to the original treaty resolution, stated that any improvement to the port of New York would be of benefit to the entire Nation. President Harding, in signing the Edge-Ansorge bill, congratulated the States of New York and New Jersey upon the spirit of cooperation for the future development of the port under unified joint control. The President expressed the hope that under the authority granted by the joint resolution the port of New York would become an ever-increasing asset of the Nation. That the House and Senate took a broad view of the proposed improvement to the port is evidenced by the fact that the resolution passed both Houses last July without a dissenting vote.

To date but 3 per cent of all Federal appropriations for river and harbor improvement have been expended on New York, and this in spite of the fact that more than 51 per cent of all the commerce of the Nation passes through the port of New York. This undoubtedly looks like discrimination. But there has been reason in the past for the failure of Congress to make necessary appropriations; till now we have had no constructive plan to present to Congress. New York and New Jersey were at loggerheads and were working at cross-purposes. Since the treaty of 1834 between the two States New York and New Jersey had done nothing jointly for the constructive development of the port. There was no cooperation of any sort either within the States or between the States. If, therefore, the people within the New York part of the district are for the first time realizing their unity, and under the leadership of the Port of New York Authority are working toward a comprehensive plan, Congress is not wholly to blame if we have not secured for New York port the fair share of appropriations to which we are entitled. I am satisfied that now the comprehensive plan for the improvement of the port of New York has been adopted by the two States, we shall be able to secure adequate cooperation from Congress to make it effective. The cost of doing business at the port of New York is reflected throughout the entire country. The port of New York is not a local matter. It is distinctly national in scope and function.

The port of New York should be efficiently and constructively organized and furnished with modern methods of pier, rail, water, and freight facilities and adequately protected in time of war.

The treaty between New York and New Jersey and the comprehensive plan adopted by the legislatures, and for which consent of Congress is, I hope, about to be given, mark the culmination of the most forward step ever taken for the intelligent and comprehensive development of the greatest natural port in the world. [Applause.]

Mr. MONTAGUE. Mr. Speaker, in the interest of more accurate procedure and in more concrete conformity to the authorization of Congress, I move to amend, on page 4, line 23, by striking out the words "is authorized and empowered" and inserting after the word "the," in line 23, the words "the consent of Congress is hereby given to the."

The SPEAKER pro tempore. The gentleman from Virginia offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. MONTAGUE: Page 12, line 23, after the word "Authority," strike out the words "is authorized and empowered" and, in the same line, after the word "the," insert the words "consent of Congress is hereby given to the."

Mr. MONTAGUE. Mr. Speaker, the Constitution authorizes Congress to consent to the agreement between these States. We have given that consent. Here is language which authorizes Congress in turn to authorize and empower the city of New York to carry out a certain agreement. We can do no more than consent. The authority of the Port of New York Authority to effectuate this plan is derived from the agreement itself, to which we will give consent because there is no objection to the bill. Therefore, in the interest of better practice and to conform to the organic requirement, I think the amendment which I have suggested should be adopted.

Mr. ANSORGE. Mr. Speaker, I would like to be recognized in opposition to the amendment.

Mr. VOLSTEAD. Mr. Speaker, I yield five minutes to the gentleman from New York [Mr. ANSORGE].

Mr. ANSORGE. Mr. Speaker, I dislike very much to oppose the amendment suggested by the gentleman from Virginia [Mr. MONTAGUE]. It seems to me that if we add the words suggested by him we are in effect repeating the language of lines 21 and 22 of page 12 and not adding anything not already contained in the resolution. Furthermore, by lines 23 and 24 of page 12 the Port of New York Authority is merely authorized to proceed and carry out certain plans which it has made. The Federal Government is not surrendering any right by telling the two States to proceed and do what they have agreed to do. The proviso beginning on line 24 protects the Federal Government so that the Federal Government is not surrendering any of its rights over its navigable waters. That proviso reads as follows:

That nothing herein contained shall be construed as impairing or in any manner affecting any right or jurisdiction of the United States in and over the region which forms the subject of said agreement: *Provided further*, That no bridges, tunnels, or other structures shall be built across, under, or in any of the waters of the United States, and no change shall be made in the navigable capacity or condition of any such waters until the plans therefor have been approved by the Chief of Engineers and the Secretary of War.

Section 2 of the resolution reserves to the Federal Government the right to alter, amend, or repeal the resolution, as is usual in resolutions of this kind.

Then also, at page 2, there is the further proviso that—

Subject always to the approval of the officers and agents of the United States as required by acts of Congress touching the jurisdiction and control of the United States over the matters or any part thereof covered by this resolution the consent of Congress is hereby given, etc.

It seems to me that the Federal Government is amply protected by the resolution as now drawn.

There is another reason why we can not consent to that, even though the gentleman from Virginia might think it an immaterial change. The port authority, representing the two States, has passed on this detailed plan and the form of the resolution, and it has also been passed upon by the War Department. To make any such change as is now proposed would require us to again confer with the Secretary of War, who has already passed on this precise language. I think the Federal Government is sufficiently protected by the language as it now reads.

Mr. MONTAGUE. Mr. Speaker, will the gentleman yield?

Mr. ANSORGE. Yes.

Mr. MONTAGUE. Mr. Speaker, I do not desire to obstruct the passage of the resolution. I simply desire that the House maintain its constitutional integrity. The Congress can not authorize the States to make an agreement, and the gentleman making that statement falls into error. The Congress under the Constitution can only consent to an agreement made by the States, which is invalid without such consent. The States of New York and New Jersey have entered into an agreement to which we heretofore consented. These States now come with a supplementary or auxiliary agreement and ask us also to consent to it. But the bill not only provides for consent to that agreement but authorizes a corporate body—the Port of New York Authority—to effectuate the agreement.

Mr. SPEAKER pro tempore. The time of the gentleman from New York has expired.

Mr. VOLSTEAD. Mr. Speaker, I yield five minutes to the gentleman from Virginia [Mr. MONTAGUE].

Mr. MONTAGUE. Mr. Speaker, if the Port of New York Authority has any authority to effectuate this agreement, it must derive that authority from the agreement itself, to which the Congress must consent. So that the language in question is either surplusage or in violation of the jurisdiction of Congress. I do not think Congress should undertake by language, however impotent, to give to any corporate body an authority which must be found in an agreement to which Congress can alone consent and can not authorize.

Mr. FAIRCHILD. Mr. Speaker, will the gentleman yield?

Mr. MONTAGUE. Yes.

Mr. FAIRCHILD. Does not the gentleman think that the provisos to which my colleague has referred fully protect the United States?

Mr. MONTAGUE. I do not know but that the Government would be protected in any event—not by the provisos, because I think the courts would interpret this so-called authorization

as either a nullity or a consent; but the particular provisos to to which he alludes relate only to the subject of control of navigation. Take the subject of bridges over navigable waters. The Congress can not authorize the construction of the bridge, it consents to such construction. The clause alluded to by the gentleman from New York [Mr. ANSORGE] is inserted in order to protect navigation, which is usually done by requiring the approval of the Chief of Engineers, and so forth.

Mr. FAIRCHILD. If the gentleman will yield further, the first proviso is broader than bridges, and is as broad as any possible right the United States Government can have.

Mr. MONTAGUE. The gentleman is entirely right. If the agreement to which we are asked to consent does not confer the authorization upon the Port of New York Authority, Congress can not confer it by the language to which I object.

Mr. LAYTON. Will the gentleman yield?

Mr. MONTAGUE. I will.

Mr. LAYTON. I desire to ask the gentleman whether this would not subserve his purpose as well as the purpose of the gentleman from New York, if the section was amended as follows, "and the consent of Congress is hereby given to the carrying out and effectuation of said comprehensive plan by the said Port of New York Authority," and then stop?

Mr. MONTAGUE. Well, I doubt whether the gentleman will agree to that. He desires consent for the Port of New York Authority to do something which the agreement alone must authorize.

Mr. LAYTON. Suppose you leave out the words "authorized and empowered" and make the proviso read as follows: "and the consent of Congress is hereby given to the carrying out and effectuation of said comprehensive plan by the said Port of New York Authority."

Mr. MONTAGUE. I will say to the gentleman and the gentlemen of the committee that the Constitution of the United States confers upon the Congress in words the authority to consent to the agreement. There is a clear distinction between consenting and authorizing, and I do not think we ought to undertake to confer power when we have no authority to confer.

Mr. CHANDLER of New York. Will the gentleman yield?

Mr. MONTAGUE. I will.

Mr. CHANDLER of New York. The use of the word "authorized" there is merely a verbal way of saying that we give consent.

Mr. MONTAGUE. It is a bad way and we ought not to do such a thing.

Mr. CHANDLER of New York. Why the amendment, if it means nothing but that?

Mr. MONTAGUE. We are dodging our duty and hiding under words that we ought not to use.

The SPEAKER pro tempore. The question is on the adoption of the amendment.

The question was taken, and the amendment was rejected.

The joint resolution was ordered to be engrossed and read the third time, was read the third time, and passed.

On motion of Mr. ANSORGE, a motion to reconsider the vote by which the joint resolution was passed was laid on the table.

LARCENY OF FREIGHT IN INTERSTATE COMMERCE.

Mr. VOLSTEAD. Mr. Speaker, I call up for consideration the bill H. R. 10768.

The SPEAKER pro tempore. The Clerk will report the bill.

The Clerk read as follows:

A bill (H. R. 10768) to amend an act entitled "An act to punish the unlawful breaking of seals of railroad cars containing interstate or foreign shipments, the unlawful entering of such cars, the stealing of freight and express packages or baggage or articles in process of transportation in interstate shipment, and the felonious asportation of such freight or express packages or baggage or articles therefrom into another district of the United States, and the felonious possession or reception of the same," approved February 13, 1913 (37 Stat., p. 670).

Be it enacted, etc., That the act entitled "An act to punish the unlawful breaking of seals of railroad cars containing interstate or foreign shipments, the unlawful entering of such cars, the stealing of freight and express packages or baggage or articles in process of transportation in interstate shipment, and the felonious asportation of such freight or express packages or baggage or articles therefrom into another district of the United States, and the felonious possession or reception of the same," approved February 13, 1913 (37 Stat., p. 670), be, and the same is hereby, amended so as to read as follows:

"That whoever shall unlawfully break the seal of any railroad car containing interstate or foreign shipments of freight or express, or shall enter any such car with intent, in either case, to commit larceny therein; or whoever shall steal or unlawfully take, carry away, or conceal, or by fraud or deception obtain from any railroad car, station house, platform, depot, steamboat, vessel, or wharf, with intent to convert to his own use any goods or chattels moving as, or which are a part of or which constitute, an interstate or foreign shipment of freight or express, or shall buy, or receive, or have in his possession any such goods or chattels, knowing the same to have been stolen; or whoever shall steal or shall unlawfully take, carry away, or by fraud or deception obtain, with intent to convert to his own use, any baggage which shall have come into the possession of any common carrier for transportation from one State or Territory or the District of Columbia to another State or Territory or the District of Columbia, or to a foreign country, or from a foreign country to any State or Territory or the District of Columbia, or shall break into, steal, take, carry away, or conceal any of the contents of such baggage, or shall buy, receive, or have in his possession any such baggage or any article therefrom of whatever nature, knowing the same to have been stolen, shall in each case be fined not more than $5,000 or imprisoned not more than 10 years, or both, and prosecutions therefor may be instituted in any district wherein the crime shall have been committed. The carrying or transporting of any such freight, express, baggage, goods, or chattels from one State or Territory or the District of Columbia into another State or Territory or the District of Columbia, knowing the same to have been stolen, shall constitute a separate offense and subject the offender to the penalties above described for unlawful taking, and prosecutions therefor may be instituted in any district into which such freight, express, baggage, goods, or chattels shall have been removed or into which they shall have been brought by such offender."

SEC. 2. That nothing in this act shall be held to take away or impair the jurisdiction of the courts of the several States under the laws thereof; and a judgment of conviction or acquittal on the merits under the laws of any State shall be a bar to any prosecution hereunder for the same act or acts.

SEC. 3. That to establish the interstate or foreign commerce character of any shipment in any prosecution under this act the waybill of such shipment shall be prima facie evidence of the place from which and to which such shipment was made.

Mr. JOHNSON of Mississippi. Mr. Speaker, I make the point of order that there is no quorum present.

The SPEAKER pro tempore. The Chair will count. [After counting.] Evidently there is no quorum present.

Mr. WALSH. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

Andrew, Mass.	Dupré	Larson, Minn.	Riddick
Anthony	Evans	Lazaro	Riordan
Arentz	Faust	Lee, Ga.	Robertson
Aswell	Fenn	Lee, N. Y.	Rosenbloom

Dunn	Larsen, Ga.	Rhodes	Young

The SPEAKER. Two hundred and thirty-six Members have answered to their names, a quorum is present.

Mr. CHINDBLOM. Mr. Speaker, I move to dispense with further proceedings under the call.

The motion was agreed to.

Mr. VOLSTEAD. Mr. Speaker, this looks like a long bill, but let me call your attention to the fact that what is contained on the first, second, and third pages is present law, so that the only new feature that is sought to be added to this law is contained on page 4. I read it because it is short and will explain itself.

SEC. 3. That to establish the interstate or foreign commerce character of any shipment in any prosecution under this act the waybill of such shipment shall be prima facie evidence of the place from which and to which such shipment was made.

In prosecutions under this statute it is often necessary to bring witnesses from a long distance at a considerable expense to the Government. I received from the Attorney General a

letter calling my attention to this situation and inclosing a letter from Judge John L. Relstab, which is attached to the report of the committee. I wrote him in reference to it, and submitted to him my draft of this section, and he approved it. He called my attention to the difficulties experienced in many cases in proving the interstate character of a shipment, though he said that there was hardly ever any real dispute about the fact of such interstate character. In seeking to prosecute under this statute it is necessary to make this technical proof, and the Government is often at large expense in getting witnesses from long distances. The bill has been recommended by the Attorney General as well as by this judge, and is the unanimous report of the Judiciary Committee. I can see no real objection to it, and it seems to me it ought to become the law.

Mr. JOHNSON of Mississippi. Will the gentleman yield?

Mr. VOLSTEAD. I will.

Mr. JOHNSON of Mississippi. Under this law if a man should be charged with stealing a piece of baggage or a piece of property of any value that is placed in a depot or on an express platform, and he should be indicted and carried it to court, the waybill would be the first proof of his guilt?

Mr. VOLSTEAD. Oh, no.

Mr. JOHNSON of Mississippi. What does prima facie mean?

Mr. VOLSTEAD. It is only prima facie evidence of the fact that the article stolen was in interstate commerce.

Mr. JOHNSON of Mississippi. It means the first proof that it was taken in interstate commerce.

Mr. VOLSTEAD. It does not show that he has taken anything at all. That fact would have to be established by evidence entirely separate from the waybill. The Government would have to show the commission of the offense outside of the waybill. The only question that could be established by the waybill would be the fact that the goods stolen were in interstate commerce.

Mr. JOHNSON of Mississippi. That is the most material part of this case. Unless you can establish the fact that it was interstate commerce, the man would not be subject to enter the pains and penalties of this law.

Mr. VOLSTEAD. It is true that it may be important testimony, but only on a point that has but slight relation to the actual crime.

Mr. JOHNSON of Mississippi. Does the gentleman believe it is fair to a person on trial to take him into court and submit a paper that has been mailed to one place from another, without giving him an opportunity to investigate and to examine those who sent the waybill, and to be confronted with his witnesses as guaranteed to him by the Constitution? Does the gentleman believe it is fair or constitutional?

Mr. VOLSTEAD. If he has stolen property, that must be proven entirely outside of the waybill. He is guilty, either under the State law or United States law of larceny. The evidence of the waybill will simply show whether he should be prosecuted in a State court or in a Federal court.

Mr. JOHNSON of Mississippi. Without bringing the witness who made the waybill and allowing the man being tried to be confronted with the witness who made the waybill, you propose by this bill to submit the waybill itself as prima facie evidence that the thing stolen was interstate commerce.

Mr. VOLSTEAD. I believe so. I do not believe anybody would suffer from it that does not deserve to suffer.

Mr. JOHNSON of Mississippi. The presumption of law is that every man is innocent until he is proven guilty.

Mr. VOLSTEAD. It is only prima facie evidence, and the party charged with an offense could in almost every instance disprove the fact if not true.

Mr. JOHNSON of Mississippi. That would be sufficient under your bill here to convict a man of taking interstate commerce.

Mr. VOLSTEAD. Yes.

Mr. JOHNSON of Mississippi. I think it is a very bad bill and ought to be killed.

Mr. VOLSTEAD. I do not think so.

Mr. JOHNSON of Mississippi. Mr. Speaker, I make the point of no quorum. It is a very bad bill and ought to be killed.

The SPEAKER. The gentleman from Mississippi makes the point of no quorum. Evidently no quorum is present.

Mr. WALSH. Mr. Speaker, I move a call of the House.

The motion was agreed to.

The SPEAKER. The Doorkeeper will close the doors and the Sergeant at Arms will bring in absentees, and the Clerk will call the roll.

The roll was called, and the following Members failed to answer to their names:

Anderson	Arentz	Bankhead	Black
Andrew, Mass.	Aswell	Beck	Blakeney
Ansorge	Atkeson	Bell	Boies

French	Lehlbach	Ryan	

The SPEAKER. Two hundred and twenty-five Members have answered to their names, a quorum.

Mr. WALSH. Mr. Speaker, I move to dispense with further proceedings under the call.

CHANGE OF REFERENCE.

Mr. TOWNER. Mr. Speaker, I ask unanimous consent that the bill S. 1771, which was referred to the Committee on the Merchant Marine and Fisheries, and which is to authorize the United States Shipping Board to acquire a site for a fuel station in the Virgin Islands, be transferred from that committee to the Committee on Insular Affairs. I have consulted with the chairman of the Committee on the Merchant Marine and Fisheries, and he has no objection. I think the jurisdiction properly belongs to the Committee on Insular Affairs.

The SPEAKER. Is there objection to the request of the gentleman from Iowa? [After a pause.] The Chair hears none.

EXTENSION OF REMARKS.

Mr. MOORE of Virgina. Mr. Speaker, I ask unanimous consent that I may be permitted to revise and extend the remarks I made this morning.

The SPEAKER. The gentleman from Virginia asks unanimous consent to revise and extend his remarks made this morning. Is there objection? [After a pause.] The Chair hears none.

LARCENY OF FREIGHT IN INTERSTATE COMMERCE.

The SPEAKER. The gentleman from Minnesota [Mr. VOLSTEAD] is recognized.

Mr. VOLSTEAD. Mr. Speaker, I yield five minutes to the gentleman from Mississippi [Mr. JOHNSON].

Mr. JOHNSON of Mississippi. Mr. Speaker and gentlemen of the House, my chief objection to this bill is found in section 3, page 4. Under the Constitution every man charged with a crime is entitled to be informed of the nature and the cause of the accusation against him and to have his witnesses confront him. If this bill should be adopted in its present form, it would deny to a person charged with violation of its provisions his constitutional rights. Of course, if it should be presented to the higher courts of the land it would be held unconstitutional, but thousands of poor people who would be unable to litigate their cases to the courts of last resort would be denied the protection contemplated by the Constitution.

The chairman of the committee, the gentleman from Minnesota [Mr. VOLSTEAD], says that it is necessary to enact this law for the reason that it will save the Government the expense of bringing witnesses from one State to another; it will save them the expense of bringing a witness from the place where the waybill was made to the place where the alleged

crime was committed. But the chairman forgets that if a man is being tried for a violation of this statute, if this bill is enacted into a law, where he is entitled to be informed of the nature of the accusation against him and be confronted by his witnesses, there is no provision made whereby he could examine the man who made the waybill, or who pretended to make it. He is denied the benefit of having the witnesses before the jury that the jury in trying him may judge of the demeanor of the witness testifying, and he is denied the opportunity to cross-examine the witness who made, or claimed to have made, the waybill.

Mr. WILLIAMSON. Does the gentleman contend that this waybill under this bill can be offered without any identification at all?

Mr. JOHNSON of Mississippi. Under the law as it exists to-day the waybill can not be considered as evidence until properly identified, but section 3 undertakes to make the waybill competent without identification.

Mr. GRAHAM of Pennsylvania. Will the gentleman yield?

Mr. JOHNSON of Mississippi. Yes.

Mr. GRAHAM of Pennsylvania. Does not section 3 contemplate that the waybill shall be properly identified?

Mr. JOHNSON of Mississippi. Under the law as it exists to-day the waybill would have to be properly identified; but under this bill I doubt if it would be necessary.

Mr. RAKER. Mr. Speaker, will the gentleman yield?

Mr. JOHNSON of Mississippi. I yield.

Mr. RAKER. I know that the gentleman is experienced in these matters. Is not all that section 3 contemplates the fact that it authorizes it, when the waybill is properly proven, so as to be admissible in evidence, when admissible in evidence, to be approved by the court? The only thing that it establishes prima facie is the point from which and to which the article was shipped, thereby giving the Federal court jurisdiction instead of the State court. Is that not all?

Mr. JOHNSON of Mississippi. No. That is not all.

But, Mr. Speaker, there is not the consideration for the Constitution to-day that there was a few years ago. Many good men in legislative bodies are honest at heart, but are without moral courage to vote their convictions even when in their own judgment they are violating the Constitution of the United States; they allow political expediency to control in many cases.

A few weeks ago, while the galleries of this House were crowded to their capacity with negroes who had assembled there to make this House pass the antilynching bill, Members of this body who were afraid of the negro vote permitted themselves to vote against their own judgment as to the constitutionality of the bill in order to curry favor with the negroes.

Mr. Speaker, one of the first votes I cast when I became a Member of this body was for the law to enforce the eighteenth amendment to the Constitution. The law was passed, and since it has become a law this Congress has voted between sixteen and seventeen million dollars out of the Treasury of the United States for its enforcement. I am in favor of the strict enforcement of that law and will vote for all appropriations necessary. But, Mr. Speaker, as a prohibitionist in practice as well as in theory, I protest against the United States Government engaging in the "blind-tiger" business, when it fines and imprisons the individual citizens of the country for doing the same thing. The United States Shipping Board, through its chairman, A. D. Lasker, is permitting liquor to be sold on American ships, and it is his intention to continue this unlawful traffic. This shameful and outrageous practice should be stopped. It creates a disrespect for law. The rich as well as the poor should be made to respect the law. The law of this land follows the flag. If it does not, the law is a fraud and the Constitution is a lie.

The SPEAKER. The time of the gentleman from Mississippi has expired.

Mr. VOLSTEAD. Mr. Speaker, I yield five minutes to the gentleman from Iowa [Mr. GREEN].

The SPEAKER. The gentleman from Iowa is recognized for five minutes.

Mr. GREEN of Iowa. Mr. Speaker, I am very much in favor of the enactment of this bill. I live in a large railroad center, where eight great trunk lines come in, joining that town and Omaha. A great area of that city is covered by the switch yards of those trunk lines, a very much larger area in fact than the city proper covers. The whole police force of the city, if all went down to those switch yards and did nothing else, could not properly police them. The result is that there is going on continuously a series of thefts from the railroad companies, and the railroad companies in turn, when the goods are stolen, have to make up the loss to the shippers. I am unable at this time to give the total amounts that have been lost by the railroads of this country by thefts of that kind, but I have seen it stated, and my recollection is that it runs up to more than $100,000,000 annually that the railroads have to pay the shippers to make up the losses incurred by reason of these thefts, sometimes en route but more often in the switch yards of the various companies.

This loss is eventually saddled onto the shippers of the country as a whole. The railroad company pays it for the time being to the individual shipper, but in the long run it has to be added to the freight charge. Anyone can see that it necessarily must be added to the freight charge. The freight charge must be higher. A man engaged in a legitimate and proper business, trying to get his goods over the railroad, has to pay a larger amount because of the enormous amount of these thefts that are continually going on, and it is quite difficult to make the proper proof in certain cases.

Now I am unable, I confess—and I have had considerable experience in these matters—to see anything in the constitutional objection which was urged by the gentleman who has just spoken [Mr. JOHNSON of Mississippi]. Provisions of this kind are found in the criminal laws in nearly every State. They are found in the criminal laws of my own State with reference to other matters. The gentleman is in error when he says that the mere offering of a piece of paper, accompanied by the statement of some attorney with the waybill, will be sufficient for the court to admit the document in evidence. Under the bill the waybill must be properly identified. Just exactly what the court would hold would be proper identification I am unable at this time to say, as this measure has only come to my attention at this moment; but the court would certainly require some kind of identification such as would be required for any other document under similar circumstances. The provision under discussion does not pertain to the wrong itself which is the essence of the crime, and that is one reason why I am satisfied that the court will hold this provision to be entirely constitutional. It relates only to a preliminary fact which in itself shows no crime. It simply shows the circumstance of a fact under which a crime may or may not be committed.

I think this measure is a very important one. I think it is of the highest importance to the shippers of this country to be protected against these thefts, and I am at a loss to understand why anyone should be against this bill. [Applause.]

Mr. HERSEY. Mr. Speaker, will the gentleman yield?

Mr. GREEN of Iowa. Yes.

Mr. HERSEY. This prima facie evidence is only in the nature of making it interstate commerce?

Mr. GREEN of Iowa. Yes. The gentleman is correct, as he always is with reference to legal principles.

Mr. VOLSTEAD. I yield five minutes to the gentleman from Pennsylvania [Mr. GRAHAM].

The SPEAKER. The gentleman from Pennsylvania is recognized for five minutes.

Mr. GRAHAM of Pennsylvania. Mr. Speaker, this is a very important proposition, it seems to me. The only change that is made by this bill is the change in section 3, which provides that the waybill shall be prima facie evidence of the shipment from point to point. Judge Rellstab, a very able and accomplished judge in New Jersey, in his letter touches the pivotal point in considering this matter when he says:

> To make the waybill prima facie evidence of the character of the shipment, affecting as it does only the jurisdiction of the United States court, would in no way injure or prejudice the defendant on the question of his guilt or innocence.

It is purely jurisdictional and will not be unconstitutional. The time of the court is now wasted on the immaterial question, to wit, the question of jurisdiction. Sometimes as much as a day or two days is taken in trying to trace the goods, say, from California to New Jersey, to establish the jurisdiction of the court. Why should that be, when the waybill shows it when properly authenticated by the court? It must be properly proven. A man can not rise and say, "Here is a waybill, Your Honor; I offer it in evidence," and contend that therefore it must be received as prima facie evidence of the shipment between the two points. He must establish that it is a waybill. But once that waybill is established, what harm or injury can flow from the consequential results that it shows a shipment in interstate commerce, provided the points are beyond State lines or within the requirements of that which constitutes a shipment in interstate commerce? It seems to me that in the interest of economy and simplicity this amendment ought to be adopted, and that in adopting it we will violate no constitutional provision whatsoever.

Mr. JOHNSON of Mississippi. Will the gentleman yield?

Mr. GRAHAM of Pennsylvania. I yield to the gentleman from Mississippi.

Mr. JOHNSON of Mississippi. As the law is now the waybill properly identified is competent evidence to use against a man charged with violating the statute which is sought to be amended by this bill. The gentleman agrees to that, does he not?

Mr. GRAHAM of Pennsylvania. No. As it stands now you have got to prove the shipment from point to point.

Mr. JOHNSON of Mississippi. I say it is competent evidence, not prima facie evidence.

Mr. GRAHAM of Pennsylvania. I agree with my friend that it is one item of evidence that may be submitted, but it is not sufficient to prove the shipment.

Mr. JOHNSON of Mississippi. Now you propose by this amendment to make it prima facie evidence, first proof that the goods came from one State and went into another.

Mr. GRAHAM of Pennsylvania. Why should not that be done?

Mr. JOHNSON of Mississippi. Because a man should be given the opportunity to question the man who made the waybill.

Mr. GRAHAM of Pennsylvania. Why? That does not——

Mr. JOHNSON of Mississippi. I will answer the gentleman. The answer is in order that substantial justice be done every man charged with crime.

Mr. GRAHAM of Pennsylvania. But if the gentleman will permit me, that does not affect the question of his guilt. If a man is arrested charged with having broken into a car and stolen goods from it in the State of Ohio, and you show that that shipment was an interstate-commerce shipment, the question of his guilt or innocence rests in the proof of the material fact, did he steal from that car, and not whether it was a shipment in interstate commerce, for that is merely jurisdictional.

Mr. JOHNSON of Mississippi. Just one question. If you prove that he stole the goods, unless you prove that it was a shipment in interstate commerce, then the Federal court would have no jurisdiction, although the State courts would.

Mr. GRAHAM of Pennsylvania. That is quite true; but I submit that the question of jurisdiction is a minor question, and if decided in favor of the accused would mean only that he could not be tried in that court, but could be tried in another. The vital question with him is, Did he or did he not steal? And this amendment with reference to the waybill only makes it easy to establish the jurisdictional fact that the courts have power to try such cases.

Mr. JOHNSON of Mississippi. The question of jurisdiction may be minor to the railroads, but it is major to the man who is being tried.

Mr. Speaker, I make the point of no quorum present.

The SPEAKER. The gentleman from Mississippi makes the point of no quorum present. It is clear that there is no quorum present.

Mr. WALSH. Mr. Speaker, I move a call of the House.

The SPEAKER. The gentleman from Massachusetts moves a call of the House.

A call of the House was ordered.

The Clerk called the roll, when the following Members failed to answer to their names:

Andrew, Mass.	Colton	Gorman	Larsen, Ga.
Arentz	Connell	Gould	Larson, Minn.
Aswell	Connolly, Pa.	Graham, Ill.	Lee, Ga.

Reavis	Sinnott	Taylor, Tenn.	Young
Reber	Sisson	Temple	Zihlman
Reed, N. Y.	Slemp	Thomas	

The SPEAKER pro tempore (Mr. MAPES). Two hundred and twenty-five Members have answered to their names. A quorum is present.

Mr. WALSH. Mr. Speaker, I move to dispense with further proceedings under the call.

The motion was agreed to.

The doors were opened.

Mr. VOLSTEAD. Mr. Speaker, I yield five minutes to the gentleman from Virginia [Mr. MONTAGUE].

Mr. MONTAGUE. Mr. Speaker, the amendment in question relates only to the matter of jurisdiction in that it undertakes to make the waybill prima facie evidence that the shipment involved is interstate commerce. The bill of lading is not involved, but only the waybill is embraced by this bill.

The procedure now followed is very expensive to the Government. Proof step by step that the shipment is interstate commerce must be made at the trial for larceny. A shipment made, for example in California terminating in New Jersey or on the eastern seaboard, may involve the expenditure for witnesses of several thousand dollars. As a matter of practice the proof relates, except indirectly, to the jurisdiction, namely, the fact that the article alleged to be stolen is interstate commerce. Therefore the Government is put to enormous cost to establish, not the man's guilt or innocence, but that the shipment in question is an interstate commerce shipment.

But I did not rise to discuss the measure, I simply rose because I thought it was due to the House that it might be apprised that the committee's report was a unanimous one, the minority members of the committee agreeing fully with the majority members in reporting the bill.

Mr. VOLSTEAD. Mr. Speaker, I yield five minutes to the gentleman from California [Mr. RAKER].

Mr. RAKER. Mr. Speaker and gentlemen of the House, the language of section 3 of the bill provides that the waybill shall be prima facie evidence of the place from which and to which such shipment was made. It shall be evidence sufficient until otherwise disproved. It does not affect the introduction of the waybill as evidence, which must be proven as in every other case; the court is to receive it as competent evidence to go to the jury. When the waybill has been thus identified and proven to be competent evidence received by the court—not until then, in that instance, until otherwise proven, it establishes the one fact, namely, that this article, which must be identified as it started from the point of shipment, belongs to the party, was actually shipped, and was, as thus shown by the waybill, in interstate commerce. The waybill is prima facie evidence of the fact which, in substance and effect, shows jurisdiction in the Federal court. That is all there is to it. Then the defendant on trial has all of his rights incident to a criminal case where he is charged with either petty or grand larceny that he would have had if this legislation had not been enacted. It is but another method of establishing the jurisdiction of the Federal court on the trial in an easy and simple way to try all the cases involving goods in interstate commerce and avoiding what has been heretofore enormous expense.

Mr. WALSH. Will the gentleman yield?

Mr. RAKER. Certainly.

Mr. WALSH. Even though the waybill is introduced as prima facie evidence there will still have to be evidence to show that the goods were actually transported in interstate commerce and that they were stolen.

Mr. RAKER. No question about that. Some three years ago the House appointed me on a committee to go to East St. Louis to make an investigation relating to interstate commerce and see whether or not the laws had been violated in reference to commerce between East St. Louis, Ill., and St. Louis, Mo., regarding the traffic of persons and the shipment of goods. We found that there was a gang or regular combination of men living in East St. Louis who were making their living from stealing goods from the cars in interstate commerce and then selling them to other people. The fact that the goods were in interstate

commerce was a fact hard to prove, and nine out of ten went scott free. It was a sad state of affairs that the shipment of goods in interstate commerce should be thus handled and the criminals not prosecuted and convicted. This legislation will materially help to remedy the situation.

Mr. VOLSTEAD. Mr. Speaker, I move the previous question on the bill to final passage.

The question was taken; and on a division (demanded by Mr. JOHNSON of Mississippi) there were 67 ayes and 1 no.

Mr. JOHNSON of Mississippi. Mr. Speaker, I object to the vote, and make the point that there is no quorum present.

The SPEAKER pro tempore. Evidently there is no quorum present. The Doorkeeper will close the doors, the Sergeant at Arms will bring in the absentees, and the Clerk will call the roll.

The question was taken; and there were—yeas 214, nays 2, answered "present" 2, not voting 214, as follows:

So the previous question was ordered.

The Clerk announced the following pairs:

Until further notice:

Mr. Treadway with Mr. Cockran.

Mr. Paige with Mr. Sullivan.

Mr. Langley with Mr. Clark of Florida.

Mr. Cole of Ohio with Mr. Martin.

Mr. Rossdale with Mr. Favrot.

Mr. Cramton with Mr. Woods of Virginia.

Mr. Henry with Mr. Sears.

Mr. Davis of Minnesota with Mr. Goldsborough.

Mr. McArthur with Mr. Black.

Mr. Chandler of Oklahoma with Mr. O'Brien.

Mr. Dickinson with Mr. Garrett of Texas.

Mr. Michaelson with Mr. Rayburn.

Mr. Kiess with Mr. Drane.

Mr. Evans with Mr. Wise.

Mr. Murphy with Mr. Tague.

Mr. Frear with Mr. Aswell.

Mr. Maloney with Mr. Kindred.

Mr. Dempsey with Mr. McClintic.

Mr. A. P. Nelson with Mr. Bell.

Mr. Fordney with Mr. Tyson.

Mr. Husted with Mr. Upshaw.

Mr. McKenzie with Mr. Kunz.

Mr. Hukriede with Mr. Barkley.

Mr. Vare with Mr. Pou.

Mr. Steenerson with Mr. Dupré.

Miss Robertson with Mr. Swank.

Mr. Knight with Mr. Larsen of Georgia.

Mr. Connell with Mr. Carew.

Mr. Arentz with Mr. London.

Mr. Kahn with Mr. Overstreet.

Mr. Siegel with Mr. Linthicum.

Mr. Vestal with Mr. Collins.

Mr. Knutson with Mr. Steadman.

Mr. Perkins with Mr. Humphreys.

Mr. Bowers with Mr. Cullen.

Mr. Atkeson with Mr. Lee of Georgia.

Mr. Sanders of Indiana with Mr. Taylor of Colorado.

Mr. Coughlin with Mr. Lyon.

Mr. Lee of New York with Mr. Crisp.

Mr. Fuller with Mr. Padgett.

Mr. Beck with Mr. Gallivan.

Mr. Perlman with Mr. Smithwick.

Mr. Ransley with Mr. Weaver.

Mr. Fitzgerald with Mr. Tucker.

Mr. Johnson of Washington with Mr. Bankhead.

Mr. Bacharach with Mr. Kitchin.

Mr. Gernerd with Mr. Taylor of Arkansas.

Mr. Glynn with Mr. Brand.

Mr. Snell with Mr. Logan.

Mr. McPherson with Mr. Cantrill.

Mr. Hutchinson with Mr. Griffin.

Mr. Cooper of Ohio with Mr. Stoll.

Mr. Larson of Minnesota with Mr. Johnson of Kentucky.

Mr. Burtness with Mr. Hudspeth.

Mr. Stiness with Mr. Fields.

Mr. Reed of New York with Mr. Mead.

Mr. Fenn with Mr. Parks of Arkansas.

Mr. Kennedy with Mr. Driver.

Mr. Frothingham with Mr. Rainey of Alabama.

Mr. Moore of Ohio with Mr. Jacoway.

Mr. Snyder with Mr. Rucker.

The SPEAKER. The Clerk will call my name.

The Clerk called the name of the Speaker, and he answered "Yea."

The result of the vote was announced as above recorded.

The SPEAKER. The question now is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. VOLSTEAD, a motion to reconsider the vote by which the bill was passed was laid on the table.

ENROLLED BILLS SIGNED.

Mr. RICKETTS, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills of the following titles, when the Speaker signed the same:

H. R. 10925. An act to authorize the Secretary of War to sell real property known as the Pittsburgh Storage Supply Depot at Pittsburgh, Pa.

H. R. 241. An act to authorize the Secretary of War to grant a perpetual easement for railroad right of way and a right of way for a public highway over and upon a portion of the military reservation of Fort Sheridan, in the State of Illinois.

The Speaker announced his signature to enrolled bill of the following title:

S. 745. An act to amend section 24 and section 256 of the Judicial Code.

WOMEN'S OVERSEAS SERVICE LEAGUE.

Mr. VOLSTEAD. Mr. Speaker, I call up the bill (H. R. 7299) to incorporate the Women's Overseas Service League, which I send to the desk and ask to have read.

The Clerk read as follows:

Be it enacted, etc., That the following persons, to wit, Mrs. Larz Anderson, of Boston, Mass.; S. Elizabeth Arnold, of Pennsylvania; Mary W. Barret, of Seattle; Constance B. Bicknell, of Washington; Jennet Bigelow, of Washington; Stuart Blanton, of Virginia; Mary A. Bogart, of New York; Ethel Boyd Bowers, of New York; Zorah W. Bowman, of Toledo; Miss Brown, of New York City; Ona Camp, of Minneapolis; Pattie Carey, of Virginia; Mildred Chamberlain, of Chicago; Clara W. Chesbrough, of Toledo; Ada Knowlton Chew, of Pennsylvania; Alice Hill Chittenden, of New York; Keith Clark, of St. Paul; Annette Cull, of Toledo; Elizabeth A. Cullen, of New York; Caroline F. Davis, of Pennsylvania; Helen Day, of Washington, D. C.; Dorothea Denys, of Washington, D. C.; Florence Dickson, of Seattle; Mrs. Livingston Farrand, of Washington; Louise Welford Fleming, of Massachusetts; Laurie R. Frazeur, of Chicago; Sarah M. Gammin, of Seattle; Edith H. Gillingham, of Pennsylvania; Katherine Ginnel, of Boston; Rose Glass, of Seattle; Mary Montgomery Halsey, of Pennsylvania; Ada Dickie Hamblen, of Seattle; Miriam Heermans, of Chicago; Lesley Henshaw, of Cincinnati; Clara Hoefflin, of Minneapolis; Ruth Rose Holt, of Minneapolis; Gertrude Hussey, of Washington; Mrs. Lucile Livingston Johnson, of Cincinnati; Mary Jones, of Minneapolis; Mrs. D. Braden Kyle, of Pennsylvania; Anna Coleman Ladd, of Massachusetts; Margaret Lamble, of New York; Olive McGlasham, of Cincinnati; Mrs. James McCutcheon, of Atlanta; Estelle Martin, of Georgia; Grace Monks, of Boston; Julia Page Norton, of Toledo; Alice M. O'Brien, of Minnesota; Mary Hooper Perry, of Washington; Sybil Richards, of Massachusetts; Celia K. Robb, of Seattle; M. N. Robins, of Pennsylvania; Celia D. Shelton, of Seattle; Esther Smith, of Atlanta; Dr. Bessie Sroye, of Cincinnati; Elizabeth Starr, of Seattle; Rosanna Thorndike, of Boston; Elleigh Page Tucker, of Georgia; Amy Robbins Ware, of Minneapolis; Louise Welles, of Minneapolis; Mildred Windsor, of New York; Louise Worthington, of Cincinnati; Jennie Young, of Seattle; and such persons as may be chosen who are members of the Women's Overseas Service League, an unincorporated patriotic society of women who served overseas for the allied cause in the Great War, between August 1, 1914, and January 1, 1920, known as the Women's Overseas Service League, and their successors, are hereby created and declared to be a body corporate. The name of this corporation shall be "Women's Overseas Service League."

SEC. 2. That the same persons named in section 1, and such other persons as may be selected from among the membership of the Women's Overseas Service League, an unincorporated society of women who served overseas for the allied cause in the Great War between August 1, 1914, and January 1, 1920, are hereby authorized to meet to complete the organization of said corporation by the selection of officers, the adoption of a constitution and by-laws, and to do all other things necessary to carry into effect the provisions of this act, at which meeting any person duly accredited as a delegate from any local or State organization of the existing unincorporated organization known as the Women's Overseas Service League shall be permitted to participate in the proceedings thereof.

SEC. 3. That the purpose of this corporation shall be to keep alive and develop the spirit that prompted overseas service; to maintain the ties of comradeship born of that service, and to assist and further any patriotic work; to inculcate a sense of individual obligation to the community, State, and Nation; to work for the welfare of the Army and Navy; to assist in any way in their power men and women who served and were wounded or incapacitated in the World War; to foster and promote friendship and understanding between America and the Allies in the World War.

SEC. 4. That the corporation created by this act shall have the following powers: To have perpetual succession with power to sue and be sued in courts of law and equity; to receive, hold, own, use, and dispose of such real estate and personal property as shall be necessary for its corporate purposes; to adopt a corporate seal and alter the same at pleasure; to adopt a constitution, by-laws, and regulations to carry out its purposes, not inconsistent with the laws of the United States or of any State; to use in carrying out the purposes of the corporation such emblems and badges as it may adopt; to establish and maintain offices for the conduct of its business; to establish State, Territorial, and local subdivisions; to publish a magazine or other publications, and generally to do any and all such acts and things as may be necessary and proper in carrying into effect the purposes of the corporation.

SEC. 5. That no woman shall be a member of this corporation unless she served overseas for the allied cause in the Great War at some time during the period between August 1, 1914, and January 1, 1920, both dates inclusive.

SEC. 6. That the organization shall be nonpolitical and, as an organization, shall not promote the candidacy of any person seeking public office.

SEC. 7. That said corporation may acquire any or all the assets of the existing unincorporated national organization known as the Women's Overseas Service League upon discharging or satisfactorily providing for the payment and discharge of all its liabilities.

SEC. 8. That said corporation and its State, Territorial, and local subdivisions shall have the sole and exclusive right to have and to use in carrying out its purposes the name "Women's Overseas Service League."

SEC. 9. That the said corporation shall, on or before the 1st day of January in each year, make and transmit to the Congress a report of its proceedings for the preceding calendar year, including a full and complete report of its receipts and expenditures: *Provided, however,* That said report shall not be printed as public documents.

SEC. 10. That as a condition precedent to the exercise of any power or privilege herein granted or conferred the Women's Overseas Service League shall file in the office of the secretary of each State the name and post-office address of an authorized agent in such State upon whom legal process or demands against the Women's Overseas Service League may be served.

SEC. 11. That the right to repeal, alter, or amend this act at any time is hereby expressly reserved.

SEC. 12. That the persons duly elected at the first annual convention held in Philadelphia May 2, 1921, shall be the officers of the Women's Overseas Service League for the year beginning May 2, 1921, to serve until the next annual convention to be held at Washington, D. C., on May 1, 1922, or until their successors are duly appointed, and are the following: President, Mrs. Oswald Chew, Radnor, Pa. Vice presidents, Miss Amy Robbins Ware, Minneapolis, Minn.; Miss Esther Smith, Atlanta, Ga.; Miss Miriam Heermans, Chicago, Ill.; Miss Rose Glass, Seattle, Wash. Corresponding secretary, Miss Mary Bogart, New York. Recording secretary, Miss Dorothea Denys, Washington, D. C. Treasurer, Miss Sybil Richards, Boston. Executive committee, Miss Rosanna Thorndike, Boston, Mass.; Miss Brown, of New York City, N. Y.; Miss Margaret Robins, Philadelphia; Miss Pattie Carey, Virginia; Miss Helen Day, Washington, D. C.; Mrs. James McCutcheon, Atlanta, Ga.; Miss Keith Clark, St. Paul, Minn.; Mrs. Zorah W. Bowman, Toledo, Ohio.

Mr. GARRETT of Tennessee. Mr. Speaker, I raise the question of consideration.

The SPEAKER. The question is, Will the House consider the bill?

The question was taken; and the Chair being in doubt, the House divided, and there were—ayes 72, noes 22.

So the House determined to consider the bill.

Mr. VOLSTEAD. Mr. Speaker, I yield to the gentleman from Ohio [Mr. THOMPSON].

Mr. THOMPSON. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by printing a discussion that I have prepared upon the Ohio canals and the State and Federal laws bearing on the same.

The SPEAKER. Is there objection?

There was no objection.

INLAND WATERWAYS AND CANAL SYSTEMS OF OHIO.

Mr. THOMPSON. Mr. Speaker, in the Sixty-sixth Congress I voted for the transportation act under which the railroads are now operating. Section 500 of the act contains this language:

It is hereby declared to be the policy of Congress to promote, encourage, and develop water transportation service and facilities in connection with the commerce of the United States, and to foster and preserve in full vigor both rail and water transportation.

It shall be the duty of the Secretary of War, with the object of promoting, encouraging, and developing inland waterway transportation facilities in connection with the commerce of the United States, to investigate the appropriate types of boats suitable for different classes of such waterways; to investigate the subject of water terminals, both for inland waterway traffic and for through traffic by water and rail, including the necessary docks, warehouses, apparatus, equipment, and appliances in connection therewith, and also railroad spurs and switches connecting with such terminals, with a view to devising the types most appropriate for different locations and for the more expeditious and economical transfer or interchange of passengers or property between carriers by water and carriers by rail; to advise with communities, cities, and towns regarding the appropriate location of such terminals and to cooperate with them in the preparation of plans for suitable terminal facilities; to investigate the existing status of water transportation upon the different inland waterways of the country, with a view to determining whether such waterways are being utilized to the extent of their capacity and to what extent they are meeting the demands of traffic, and whether the water carriers utilizing such waterways are interchanging traffic with the railroads; and to investigate any other matter that may tend to encourage and promote inland water transportation. It shall also be the province and duty of the Secretary of War to compile, publish, and distribute, from time to time, such useful statistics, data, and information concerning transportation on inland waterways as he may deem to be of value to the commercial interests of the country.

From the foregoing it is seen that Congress is committed to the development of inland waterways. Yet the ink was hardly dry on the law until the Sixty-sixth Congress cut the rivers and harbors appropriation to $15,000,000. No waterways transportation representative sits on the Interstate Commerce Commission of the Nation, and it seems that influences of the big corporate interests controlling railroads are more powerful than the Government itself in this instance as they seem to be in all instances. Waterways development seems to be insidi-

ously fought and retarded by an invisible government superior to the Congress.

I want to call to the attention of the House one of the essentials of transportation, which seems to have escaped the attention of Congress when making appropriations for 1923. Heretofore it was believed that all the Government had to do was to canalize our rivers and deepen our harbors and the building of terminals would follow as a matter of consequence. The rivers and harbors act passed March 2, 1919, carried the following authorization:

The Secretary of War is hereby authorized and directed to cause preliminary examinations and surveys to be made at the following-named localities, and a sufficient sum to pay the cost thereof may be allotted from the amount provided in this section:

The Miami & Erie Canal, Ohio, including a branch canal connecting the Miami & Erie Canal with Lake Michigan, and such other routes between Lake Erie and the Ohio River as may be considered practicable by the Chief of Engineers, with a view to securing a channel of 12 feet in depth with suitable widths, or such other dimensions as may be considered practicable, including any recommendation for cooperation on the part of local interests.

After the passage of said act the General Assembly of Ohio passed a constructive measure tending to build up waterways in Ohio. The passage of the act providing for the survey of the Ohio canals was a signal of the intention of Congress to rebuild her neglected waterways in Ohio and inspired the people of my State to do something toward making the same possible.

I want to call to the attention of the House for only a few minutes provisions of this enabling act, which was passed within a year after Congress proposed to make the survey of Ohio canals with a view of giving an outlet to the coal fields of Kentucky and West Virginia and the ore fields of Michigan across the great State of Ohio.

The Ohio act, in part, provides that—

Whenever the Congress of the United States shall authorize the construction, maintenance, and operation of a canal or waterway along a definite route for the purpose of connecting the Great Lakes with the Ohio River, so as to provide a route for the passage of barges from the Great Lakes to the Ohio River, and shall make an appropriation for the construction, maintenance, and operation of the same on condition that the State of Ohio shall contribute a certain part of such cost of construction, then the lands within the canal zone described in the act may be organized into canal districts with all the rights, powers, liabilities, organization, and administration.

Section 3 of the act provides that the Governor of the State of Ohio shall, within 30 days after such authorization and appropriation by Congress, by proclamation, describe the boundaries of the zone containing lands which will be specially benefited by the construction and operation of said waterway. It further provides that the lateral boundaries of said zone shall follow a line 25 miles distant from and parallel to the median line of said proposed canal, and the terminal boundaries shall follow the arc of a circle drawn with a radius of 25 miles from each terminus of the same, except that all counties lying in whole or in part within 60 miles of either terminus of the proposed canal, and connected by navigable waterways, shall be included in said zone.

It was the intention of the general assembly to tax these lands within the zone of 25 to 60 miles from the waterway according to the benefits received. It is proposed to tax the lands nearest the canal more than the lands farther away. This law was passed in harmony with our road and ditch law. The farther away the land is located from the waterway the less tax is required from said lands, so that the lands 25 and 60 miles away from the waterway would pay only a small fraction of the cost of building these terminals.

Objections have been raised because of an arbitrary line 25 miles on each side of said canal and a 60-mile line at each terminus on the theory that it was not a local but national project. When the matter was first submitted it specifically provided a tax only for the building of terminals along the proposed canal on the theory that a waterway would be as useless without terminals as a railroad without its depots, and the general assembly concluded that the terminals were an essential part of the canal system if ever rebuilt; that when the same was being surveyed it should contain specific items for the costs of terminals, which should be included as a total cost for the construction of the canal. It is because the general assembly concluded that the terminals are a part of the cost of construction of the canal that it substituted the general term and provided—

That the State of Ohio, on any part thereof, shall contribute a certain part of such cost of construction.

Recently objection to building the terminals was made by a colleague because the cost of terminals would involve a tax on property within the 25-mile zone and a radius of 60 miles at each terminus. The theory of making it 25 miles was because trucks function best within a distance of 25 miles as the cheapest means of transportation, and hence said Ohio act provides that the cost of building these terminals should be borne according to benefits by those living within the 25-mile zone, save and except at each terminus, which is a radius of 60 miles.

The unthinking readily fall for this specious argument because it involves a tax, and of course all of us shy more or less from the payment of taxes and conclude that the other fellow should pay more. Now, let us see if it involves such a tax which the people should fear and shun, or is it one of those taxes which the people welcome because it brings immediate returns? When an ordinary taxpayer goes down in his pocket to pay his tax he seldom thinks of any returns to himself, excepting in the way of protection. Ordinarily we think of a tax only in support of our Government for the payment of the official family. But do we not also pay an indirect tax? At least when we pay for our fuel, food, and clothing. One can not mail a letter without paying for the cost of a stamp to carry that letter. These taxes we can not escape any more than the taxes in support of the Government, hence it becomes very vital to know if by improving our waterways and building our terminals the cost will bring us such returns as to justify making this improvement.

In the report of the superintendent of public works on canals of the State of New York for 1919 I find on pages 18 and 19 the following, to wit:

There can be no question as to the ability of canal transportation projects to earn a handsome profit. None dispute the tremendous potential traffic available for canal shipment, and investigation will convince even the most skeptical that the cheapest known means of transporting freight is to float it; furthermore, that the finest medium of inland water transportation in the country is the improved canals of New York State. During the 1919 season of navigation, under somewhat unfavorable conditions in that the type of boats used were not designed for Barge Canal navigation, conclusive evidence of the abnormally low cost of transportation on the improved canals was revealed. A steamer and consort carrying cargo from New York to Buffalo accomplished the trip in a little more than four days, at an operating cost of but 1.21 mills per ton-mile, or about 45 cents per ton. The cargo carried paid a rate of $1.50 per ton; thus the net earning for the trip was more than $1 per ton. Measured in terms of grain such operating costs would yield a basis of less than 1½ cents per bushel of wheat. The wheat rate at present is 9.7 cents per bushel, showing even a greater percentage of profit on the grain traffic.

Thus it will be seen, according to this report, that coal can be hauled from Cincinnati to Toledo, Ohio, a distance of 240 miles, for 29 cents per ton. Add to this the cost of mining the coal and the distance from Cincinnati, where mined, plus the overhead expenses, you will find that coal should be delivered in my district for at least $2. Thus the saving on coal will be, according to the present prices, from $4 to $6 per ton.

And what will these terminals cost after the Government rebuilds the Miami & Erie Canal? Naturally the heavy costs for terminals will be borne by Cincinnati and Toledo, because of transshipment at those points. But what will the terminals cost? I find, for instance, that three terminals will be able to serve the counties of Allen, Van Wert, and Putnam; one each at Spencerville, Delphos, and Ottoville.

The total tax value of these three counties is $222,034,880 and the average 80-acre improved farm is valued, according to the tax duplicate for these three counties, at $7,305. Placing the cost of these terminals at $50,000 for Spencerville and Delphos and $5,000 at Ottoville and distributing the tax equally within the 25-mile zone limit, each farmer owning an 80-acre improved farm would pay only $1.83 to help build these terminals. Thus the saving on 1 ton of coal would more than pay for these terminals.

The farmer in my district to-day is at a disadvantage because of the high freight rates. For instance, I find that a carload of hay in my section is sent into the coal regions of West Virginia, eastern Kentucky, and Tennessee. A hay dealer just recently informed me that he was compelled to pay $16.60 per ton freight from Delphos, Ohio, to Memphis, Tenn. According to the report of the superintendent of public works at New York, 2,000 tons of hay could be shipped from Delphos to Memphis for $1,628.60, while the railroad rate on 2,000 tons is $32,800, a difference of $31,171.34. One of my constituents recently sent a carload of hay to the Cincinnati market, and had left only $12 to harvest and market the hay and pay his commission merchant. His neighbor sent his hay to New York, but he had nothing left after paying the railroad charges. The farmer in my section is compelled to pay 32 cents per bushel to market his wheat in New York, while the rate, according to the New York official, from Buffalo to New York, a distance of 502 miles, is only 1½ cents per bushel. When the people once understood the value of waterways and that the reason business is stagnant is because of lack of transportation and distribution they will not be afraid of paying taxes equal only to the saving on 1 ton of coal.

Of course, I realize that certain railroad interests are willing to build a "ship canal"—get that word "ship canal"—out of the Federal Treasury but object to building the necessary terminals and facilities because they are afraid the people might use this form of transportation. These railroad officials care very little if merchandise and wares shipped by water are dumped on the muddy banks of our rivers and canals; but will the farmer and the merchant and the manufacturer use the waterway so long as these waterways do not have the necessary terminals and housing facilities where the products of the farm and the factory can be unloaded and housed. Only an imbecile or fanatic would use a waterway and have his merchandise dumped on the muddy banks.

The Federal Government should not appropriate one dollar for the improvement of our rivers and harbors and canals unless the local authorities agree to build the necessary and proper terminals. What could keep the traffic off the Mississippi River if we only had the necessary docks along this great natural waterway? As it is, the Government seems to be having a hard time building up the traffic in the face of the fact that the railroads are hauling freight along all our potential waterways for about 50 per cent of what they haul it away from these waterways.

I hope those interested in building up all our transportation facilities will examine the enabling act of Ohio, and that every State in the Union will pass some such enabling act so that all of our transportation facilities—the railroads, the waterways, and highways—will coordinate and work in harmony rather than continue the cutthroat competition of the past.

In northwestern Ohio is located the heart of the Maumee Valley at the confluence of two rivers which could be canalized for water transportation. According to the last Federal census the counties of the fifth district produced more than $57,000,000 of new wealth right out of the ground in the form of cereals.

This part of Ohio is now a part of the bread basket of the world and needs cheap transportation facilities. Like other portions of the country, transportation facilities have lessened rather than increased and are not in keeping with the increase of population; hence high freight rates.

As long as I remain in Congress I expect to stand for a broad policy of development of our inland waterways and the coordination of highways, railways, and waterways under one great transportation system.

The House Appropriations Committee of the present Sixty-seventh Congress, largely upon my representations, allowed a lump sum of $125,000 to start a field survey of three proposed Ohio barge canal routes to connect Lake Erie with the Ohio River. The sum to cover the expenses of the survey of such proposed routes should have been $225,000, as requested of the War Department engineers in House Document No. 188, Sixty-seventh Congress, second session. The amount of $125,000 allowed was originally named in H. R. 10615, introduced by me and intended by the Appropriations Committee for the survey of the Miami and Erie Canal route specified in the bill for a barge canal between Toledo and Cincinnati, and branching off from Defiance, Ohio, and connecting Lake Michigan; but it was finally agreed that the sum of $125,000 could be used by the engineers during the fiscal year beginning July 1, 1922, to start the work of field surveys upon any or all Ohio routes, with the assurance that the next appropriation would carry a sum sufficient to complete the surveys.

There is at present a 5-foot depth canal between Toledo and Cincinnati which has fallen into disuse except between Defiance and Toledo. The title of these canal lands reverts to the United States when no longer used by the State for canal purposes. Ohio, through its legislature, has shown its willingness, by reason of its recent act referred to in the foregoing, to cooperate with the Federal Government to the extent, at least, of building wharves and terminals whenever the Government shall see its way clear to rehabilitate any present Ohio canal or canals by translating them into more modern barge canals such as now exist in the State of New York.

Mr. VOLSTEAD. Mr. Speaker, I yield the remainder of my time to the gentleman from Pennsylvania [Mr. GRAHAM].

Mr. GARRETT of Tennessee. Mr. Speaker, before the gentleman does that, will he answer a question or two in respect to the bill?

Mr. VOLSTEAD. The gentleman from Pennsylvania drew the bill, and he will be able to answer any question. I yield to the gentleman from Pennsylvania.

Mr. GRAHAM of Pennsylvania. Mr. Speaker, this is a bill to incorporate the Women's Overseas Service League. There were upward of 24,000 women who went overseas to serve the country during the World War. They desire this incorporation for various reasons. The association can function better as a national organization than otherwise. They are coming in contact with kindred organizations on the other side of the water. They are contemplating the building of a memorial in France to the women who were injured or killed over there.

The purpose is to keep alive a friendly spirit among these women and it is to promote patriotism. Their work is to be patriotic. They are now working among the survivors of the war, doing service in hospitals and elsewhere, and aiding those who have been injured and afflicted and are still suffering. It seems to me, without taking up the time of the House and desiring to finish this matter briefly, that the object of this can be stated in a sentence. It is to grant to these women recognition. They have had no cross of honor. They have had no records of their achievement and their work, and yet, like the men who went over and engaged in the conflict on the other side, they exposed themselves and their lives in the service of their country, and this recognition of incorporation is, as it were, an act of Congress recognizing their patriotism and saying to them: You women shall receive this mark of honor at our hands. We regard the work which you did on the other side as of vastly great importance, and we want to give recognition of it by this expression of our good will toward you as an organization.

Mr. LOWREY. Will the gentleman yield?

Mr. GRAHAM of Pennsylvania. I will.

Mr. LOWREY. I ask for information. Are the Daughters of the American Revolution incorporated, if the gentleman knows?

Mr. GRAHAM of Pennsylvania. I do not know.

Mr. LOWREY. Is the American Legion incorporated?

Mr. GRAHAM of Pennsylvania. Yes; by us.

Mr. LOWREY. I wanted to get the absolute question of facts.

Mr. GARRETT of Tennessee. The bill passed the House; did it pass the Senate, incorporating the American Legion?

Mr. GRAHAM of Pennsylvania. Yes; this is simply a corollary to the recognition of the American Legion.

Mr. GARRETT of Tennessee. Will the gentleman yield?

Mr. GRAHAM of Pennsylvania. Yes, sir.

Mr. GARRETT of Tennessee. Of course, the gentleman is one of the best lawyers in the country and will recognize the distinction at once that this bill does not give this corporation a situs, and, so far as I can recall, all these special bills of incorporation have made them corporations of the District of Columbia. Does the gentleman have any objection to suggesting an amendment in line 18, page 3, after the word "corporate" to inserting the words "of the District of Columbia"?

Mr. GRAHAM of Pennsylvania. I have no objection to that.

Mr. GARRETT of Tennessee. Otherwise you are incorporating a corporation that has no situs.

Mr. GRAHAM of Pennsylvania. I think it is a perfectly legitimate amendment and we are willing to accept it.

Mr. GARRETT of Tennessee. The gentleman has control of the time.

Mr. GRAHAM of Pennsylvania. I shall make the amendment, or permit the gentleman to make it.

Mr. GARRETT of Tennessee. If the gentleman should yield he would lose the floor, and I suggest that he keep the floor and offer that amendment. I have another suggestion, if the gentleman will permit while he is kind enough to yield, in section 5 on page 5 there is a provision, "that no woman shall be a member of this corporation unless she served overseas for the allied cause." Now, that expression "allied cause" I do not think has any legal definition. In so far as the expression has been used in said papers, and in the laws which we have passed we have referred to the "allied and associated powers." I do not know just how to untangle it, but it strikes me there is something needed there. Officially, in so far as our own State papers are concerned, we were never an ally.

Mr. GRAHAM of Pennsylvania. That is true.

Mr. GARRETT of Tennessee. We were an associated power.

Mr. GRAHAM of Pennsylvania. And this is for the allied cause. Many of them went over before we were in the war and served there in the allied cause, and it is intended to make it broad and comprehensive enough; I do not think this suggestion is material like the other one the gentleman made which is material.

Mr. WATSON. Will the gentleman yield?

Mr. GRAHAM of Pennsylvania. I will.

Mr. WATSON. Is it the purpose of the association to permit members from all countries, or is it simply confined to American women?

Mr. GRAHAM of Pennsylvania. Only to American women.

Mr. WATSON. Those who went overseas, and women of other nations are not permitted to be members?

Mr. GRAHAM of Pennsylvania. No; this is purely an American organization of women of our country who served overseas.

Mr. HICKS. Will the gentleman yield?

Mr. GRAHAM of Pennsylvania. Certainly to my colleague and Representative.

Mr. HICKS. Mr. Speaker, I note in the gallery some officers of the British warship now visiting Washington, and it seems to me that we should offer to them our felicitations and express to them our sincere feeling of regard and have them know that they are welcome guests of the American Congress. [Applause.]

Mr. GRAHAM of Pennsylvania. Now, Mr. Speaker——

Mr. FESS. Will the gentleman yield for a further inquiry?

Mr. GRAHAM of Pennsylvania. Yes.

Mr. FESS. I notice in lines 23 and 24, page 2, the gentleman identifies one as being the city from which she comes and the other just the name of the State. Is not that unusual. That runs all through the bill.

Mr. GRAHAM of Pennsylvania. If the gentleman will pardon me, in the report from the committee there are a number of amendments designed to add the name of the State where it has been omitted, and I purpose to ask unanimous consent to present those amendments en bloc so they may be passed without voting on them seriatim. Now, I wish to say——

Mr. DALLINGER. Will the gentleman yield?

Mr. GRAHAM of Pennsylvania. I will.

Mr. DALLINGER. I wish to ask the gentleman from Pennsylvania if he thinks the name of a woman, Mrs., giving the name of the husband, is a legal name for a statute?

Mr. GRAHAM of Pennsylvania. Well, it is only a matter of identification. If she were to sign a deed, it would not be, but for identification in the matter of an incorporation I do not see any objection to it.

Mr. RAKER. Will the gentleman yield for just one question?

Mr. GRAHAM of Pennsylvania. Certainly.

Mr. RAKER. On August 22, 1919, this House passed an act unanimously incorporating the American Legion, did it not?

Mr. GRAHAM of Pennsylvania. Yes.

Mr. RAKER. This gives to the women who went overseas the same right it gave to the men of the American Legion?

Mr. GRAHAM of Pennsylvania. It does.

Mr. RAKER. They ought to have the right, ought they not?

Mr. GRAHAM of Pennsylvania. Yes.

Mr. DAVIS of Tennessee. What is there in this bill that confines the membership to American citizens or those who simply aided the American Army? Section 5 says:

> That no woman shall be a member of this corporation unless she served overseas for the allied cause in the Great War at some time during the period between August 1, 1914, and January 1, 1920, both dates inclusive.

It occurs to me that that would leave it open to citizens of any country who may have assisted in any of the allied powers.

Mr. GRAHAM of Pennsylvania. I do not think it would have that effect.

Mr. LINEBERGER. I note the dates between which these women shall have served in order to be eligible to this organization are August 1, 1914, to January 1, 1920. I assume, of course, that August 1 is intended for the date upon which the Great War, so called, began. Now, the armistice was signed on November 11, 1918. Why is it extended beyond that time? In the incorporation of the American Legion the term of service was from the time we entered the war, April 7, 1917, to November 11, 1918.

Mr. GRAHAM of Pennsylvania. You see that is a different question. The one regarding the Legion differs from the one brought up here.

Mr. LINEBERGER. The war ended on November 11, 1918.

Mr. GRAHAM of Pennsylvania. After the armistice was declared there were a number of these women in the service abroad, down to and including the date named here, January 1, 1920, and in order to include them that date was fixed.

Mr. LINEBERGER. Then you want to include all women who went in from November 11, 1918, to January 1, 1920?

Mr. GRAHAM of Pennsylvania. Some few went over after the armistice was declared in order to aid the wounded.

Mr. LINEBERGER. After the armistice, that was the allied cause.

Mr. GRAHAM of Pennsylvania. I think it would be practically the same as the allied cause was during the war. The cause will not die. It was simply made victorious; that is all.

Mr. LINEBERGER. It seems to me it should be amended to make it November 11, 1918.

Mr. GRAHAM of Pennsylvania. I hope the gentleman will not insist on that.

Mr. RAKER. Will the gentleman yield for a question right there?

Mr. GRAHAM of Pennsylvania. Yes.

Mr. RAKER. Is it not a fact that even after the armistice, and during 1919, a great many women went overseas for the purpose of taking care of the wounded soldiers in the hospitals and engaged in other work during that time?

Mr. GRAHAM of Pennsylvania. That is quite true, and that is the reason for fixing this latter date. Now, I want to say to my colleagues that I wish they could have been present at a meeting held here in the city of Washington within 30 days, I think, past. There was a gathering of about 1,000 American citizens, women who had worked and wrought from patriotic motives in the service of their country. That meeting was addressed by Sir Auckland Geddes, the British ambassador; by Ambassador Jusserand, of France; and by General Pershing; and I wish you could have heard the words of praise and commendation that fell from their lips in addressing these women and expatiating upon the services which they rendered, which had created a debt of gratitude on the part of both these countries, and of our armies under Pershing, to these devoted women. I hope the House will permit the amendments that have been suggested and pass this bill quickly.

Mr. FESS. Will the gentleman yield further?

Mr. GRAHAM of Pennsylvania. Yes, sir.

Mr. FESS. I note that the date is about two and one-half years before we entered the war?

Mr. GRAHAM of Pennsylvania. Yes, sir. A great many of them went over then.

Mr. FESS. It includes the women that went over and served in the allied cause before we went in?

Mr. GRAHAM of Pennsylvania. Yes.

Mr. FESS. In section 5, is it the gentleman's understanding that the term "no woman" is to be applied to American women, or will that include anybody from any country that served?

Mr. GRAHAM of Pennsylvania. It includes only those who served overseas that went from this country.

Mr. LAYTON. Would the gentleman have any objection to clearing up that point by incorporating in the bill the words "American Women's Overseas Service League"?

Mr. GRAHAM of Pennsylvania. That might make it so that it would not include women most deserving, who went over and served, but who would not be technically or legally American women, but women of this country.

Mr. GARRETT of Tennessee. Is the gentleman going to offer that amendment which I suggested?

Mr. GRAHAM of Pennsylvania. I ask unanimous consent, Mr. Speaker, to move that the amendments reported by the committee, adding the name of the State after each designated incorporator, may pass en bloc.

The SPEAKER. The Clerk will report the amendments.

The Clerk read as follows:

Committee amendments:

Page 1, line 5, after the word "Seattle," insert the word "Washington."

Page 1, line 6, after the word "Washington," insert the words "District of Columbia."

Page 1, line 7, after the word "Washington," insert the words "District of Columbia."

Page 1, line 10, at the beginning of the line, insert the word "Ohio." After the word "York," strike out the word "City."

Page 1, line 11, after the word "Minneapolis," insert the word "Minnesota."

Page 2, line 1, after the word "Chicago," insert the word "Illinois."

Page 2, line 2, after the word "Toledo," insert the word "Ohio."

Page 2, line 4, at the beginning of the line, insert the word "Minnesota." After the word "Toledo" insert the word "Ohio."

Page 2, line 8, after the word "Seattle," insert the word "Washington."

Page 2, line 9, after the word "Washington," insert the words "District of Columbia."

Page 2, line 10, after the word "Chicago," insert the word "Illinois."

Page 2, line 11, after the word "Seattle," insert the word "Washington."

Page 2, line 13, at the beginning of the line, insert the word "Minnesota." After the word "Seattle," insert the word "Washington."

Page 2, line 15, after the word "Seattle," insert the word "Washington."

Page 2, line 16, at the beginning of the line, insert the word "Illinois." After the word "Cincinnati," insert the word "Ohio."

Page 2, line 17, after the word "Minneapolis," insert the word "Minnesota."

Page 2, line 18, after the word "Minneapolis," insert the word "Minnesota."

Page 2, line 19, after the word "Cincinnati," insert the word "Ohio."

Page 2, line 20, after the word "Minneapolis," insert the word "Minnesota."

Page 2, line 23, after the word "Cincinnati," insert the word "Ohio." After the word "Atlanta," insert the word "Georgia."

Page 2, line 24, after the word "Boston," insert the word "Massachusetts."

Page 2, line 25, after the word "Toledo," insert the word "Ohio."

Page 3, line 3, at the beginning of the line, insert the word "Washington."

Page 3, line 4, after the word "Seattle," insert the word "Washington."
Page 3, line 5, at the beginning of the line, insert the word "Georgia." After the word "Cincinnati" insert the word "Ohio."
Page 3, line 6, after the word "Seattle," insert the word "Washington."
Page 3, line 7, after the word "Boston," insert the word "Massachusetts."
Page 3, line 8, after the word "Minneapolis," insert the word "Minnesota."
Page 3, line 9, after the word "Minneapolis," insert the word "Minnesota."
Page 3, line 10, after the word "Cincinnati," insert the word "Ohio."
Page 3, line 11, after the word "Seattle," insert the word "Washington."

The SPEAKER. The gentleman from Pennsylvania [Mr. GRAHAM] asks unanimous consent that these amendments be considered together. Is there objection?

There was no objection.

Mr. RAKER. Mr. Speaker, I want to ask the gentleman from Pennsylvania a question. On page 1, line 10, is it not a little indefinite, "Miss Brown, of New York"? That is the only place that occurs.

Mr. GRAHAM of Pennsylvania. I can not furnish any substitute name to put in there. It was passed without discussion in committee.

Mr. RAKER. Of course "Brown" is a very common name, and they could pick it up at any place.

Mr. BUTLER. Let the women settle it. [Laughter.]

The SPEAKER. The question is on agreeing to the committee amendments.

The committee amendments were agreed to.

Mr. LINEBERGER. Mr. Speaker, I desire to make a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. LINEBERGER. I desire to know if amendments will be permitted to be offered from the floor other than those which are offered by the chairman of the committee?

The SPEAKER. Unless the previous question is ordered the gentleman can be recognized.

Mr. DALLINGER. Mr. Speaker, will the gentleman yield?

Mr. GRAHAM of Pennsylvania. Yes.

Mr. DALLINGER. I want to ask a question. On page 3, lines 11 and 12, after enumerating the names of these incorporators, it says "and such persons as may be chosen." Chosen by whom?

Mr. GRAHAM of Pennsylvania. Chosen by the members.

Mr. BUTLER. Chosen by the association.

Mr. GRAHAM of Pennsylvania. Mr. Speaker, I yield to the gentleman from Tennessee [Mr. GARRETT] to offer an amendment.

Mr. GARRETT of Tennessee. Mr. Speaker, on page 3, line 18, after the word "corporate," I move to insert the words "of the District of Columbia."

Mr. GRAHAM of Pennsylvania. Mr. Speaker, I accept that amendment, and make the motion that it be inserted.

The SPEAKER. The gentleman from Tennessee offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. GARRETT of Tennessee: Page 3, line 18, after the word "corporate" insert the words "of the District of Columbia."

Mr. HICKS. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. HICKS. From the fact that the gentleman from Pennsylvania [Mr. GRAHAM] has yielded to the gentleman from Tennessee [Mr. GARRETT] to offer an amendment, does not the gentleman from Pennsylvania now lose the floor?

Mr. GARRETT of Tennessee. Mr. Speaker, I do not care to take any time. The gentleman can take the floor back at once. I move the previous question on the amendment.

The SPEAKER. The gentleman from Tennessee moves the previous question on the amendment.

Mr. LINEBERGER. Mr. Speaker, I have some amendments that I wish to offer, and if I am not permitted to offer them I will make the point of no quorum.

The SPEAKER. That can be settled later. The gentleman from Tennessee moves the previous question on his amendment.

The previous question was ordered.

The SPEAKER. The question is on agreeing to the amendment offered by the gentleman from Tennessee.

The amendment was agreed to.

Mr. GRAHAM of Pennsylvania. Mr. Speaker, I move to strike out section 12 of the bill.

The time has passed and the second meeting of the Women's Service League has been held in Washington within the past month, so that this section is without any object any longer.

The SPEAKER. The gentleman from Pennsylvania offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. GRAHAM of Pennsylvania: Page 6, line 16, strike out all of section 12.

The amendment was agreed to.

Mr. GRAHAM of Pennsylvania. Mr. Speaker, the gentleman from California [Mr. LINEBERGER] desires to offer some amendments, and I am perfectly willing that they may be offered, but I reserve the right to the floor.

The SPEAKER. If the gentleman yields to the gentleman from California to offer amendments, he can not retain the floor, but he can make an agreement with the gentleman from California.

Mr. DOWELL. The gentleman has already lost the floor by yielding for an amendment.

The SPEAKER. Certainly; but the Chair will recognize the gentleman again.

Mr. LINEBERGER. I will yield the floor back to the gentleman after offering this amendment which I desire to offer.

Mr. Speaker, on page 3, line 25, I move to strike out the words "January 1, 1920," and to substitute the words "November 11, 1918."

The SPEAKER. The gentleman from California offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. LINEBERGER: Page 3, line 25, strike out "January 1, 1920," and insert in lieu thereof "November 11, 1918."

Mr. LINEBERGER. Mr. Speaker and gentlemen of the House, the object of this amendment is to preclude anyone belonging to this organization who did not serve overseas between August 1, 1914, and November 11, 1918, which was the date on which the armistice was signed. All service organizations which have been organized throughout the world for persons who served in the World War have fixed the date of November 11, 1918, the day upon which the armistice was signed, as the last date upon which eligibility would be granted. We have often had men who got into the Army one day or one hour after the expiration of that date who tried to get into the American Legion. This would not preclude any nurse or any woman who served at any time during the great World War from belonging to this organization, and, inasmuch as this is purely an organization formed of women who served in the World War——

Mr. BULWINKLE. Mr. Speaker, will the gentleman yield?

Mr. LINEBERGER. I yield to the gentleman from North Carolina.

Mr. BULWINKLE. I call the attention of the gentleman to the fact that the epidemic of the flu among the troops in Europe was after the armistice was signed, and that these women incurred great danger when they nursed the soldiers at that time.

Mr. LINEBERGER. I will say to the gentleman from North Carolina that perhaps what he says is true, but no doubt these ladies were all overseas prior to that time. I do not think the records will show that any of those nurses went overseas for service after November 11, 1918, but I think that all the ladies to whom he refers had rendered service prior to that time.

Mr. RAKER. Will the gentleman yield right there?

Mr. LINEBERGER. I yield to the gentleman from California.

Mr. RAKER. Does not the gentleman know that as a matter of fact there were a great many nurses, Salvation Army women, Y. W. C. A. women, Red Cross women, Jewish welfare women, and others, who left the United States and who performed heroic duty overseas after November 11, 1918, who were sent over there and performed duty and stayed all the next year?

Mr. LINEBERGER. That may be true. At the same time there were soldiers who went overseas after November 11, 1918, and who did good service on the Rhine, who are not eligible to membership in the American Legion.

Mr. RAKER. The American Legion fixed the date for membership in their organization. Why should not these overseas nurses, Salvation Army women, Y. W. C. A. women, Red Cross women, Jewish welfare women, and others, who are forming their organization be given the right to determine what date shall fix the status of the members belonging to that organization, instead of it being fixed by members of the American Legion?

Mr. WALSH. If the gentleman will yield, this does not consist of overseas nurses. These are a lot of society women for the most part. I do not say that with any intention of reflecting upon them. A lot of women of means have organized this association; women who went over there and assisted the nurses and conducted various other activities. This does not

include the nurses' organization at all. I think the gentleman from Pennsylvania [Mr. GRAHAM] will bear me out in that statement, that this is not for the purpose of organizing the nurses. It is for these other women who had no attachment to any other organization and who were not employed in any connection with the war, but who went over there voluntarily. For the most part they are women of some means.

Mr. GRAHAM of Pennsylvania. I will say in answer to the gentleman——

Mr. LINEBERGER. Mr. Speaker, I still have the floor and I desire to reply to the gentleman from California [Mr. RAKER]. I desire to say that this is establishing a precedent of extending the time beyond the armistice, and I think it is a poor precedent. Why not have it January 1, 1922, instead of January 1, 1920? We still have American nurses overseas attending the soldiers on the Rhine, and I quite agree with the gentleman from Massachusetts [Mr. WALSH] that this could hardly be called a nurses' organization. Most of the nurses are eligible to membership in the American Legion by virtue of having rendered military service in the Army or Navy Nurse Corps. They were a part of the Military and Naval Establishments. Certain Red Cross nurses might get into this organization who could not qualify for the American Legion, also certain Y. M. C. A. workers, I suppose.

Mr. RAKER. Will the gentleman yield for another question?

Mr. LINEBERGER. If the gentleman will make it brief.

Mr. RAKER. I will make it brief and to the point. Can anyone point to the name of any women who went overseas in regard to the war who went over there for any other purpose except to assist the Army?

Mr. LINEBERGER. I am sure the gentleman does not desire to instruct me about the services of the women. I was in a hospital once there for two months, and no one has a higher regard for the women of America and the service they rendered the soldiers than I have. But I think it is a poor precedent, and I think the bill ought to be amended so as to put in the date of November 11, 1918, so as to hold this date as a precedent in granting charters to World War patriotic organizations who may come to us in the future in matters of this kind.

Mr. GRAHAM of Pennsylvania. Mr. Speaker, I desire to answer the question of the gentleman from Massachusetts. The nurses were not specially included; they can join the Legion, as I am informed. They are also members of this organization. This organization includes a multitude besides. Now, as to the question of dates for service it is a totally different question than that raised in regard to the Army, for there no enlistments were made and no men were sent over the seas after the armistice. That was the finish for the soldiers, but there were women who went overseas after the armistice and served men in the hospitals and did much benevolent work on the other side. If you make this amendment you cut those people out of the opportunity to become members of this organization, and I think it would be a rank injustice to them.

The SPEAKER. The question is on the amendment offered by the gentleman from California [Mr. LINEBERGER].

The question was taken; and on a division (demanded by Mr. LINEBERGER) there were 15 ayes and 57 noes.

So the amendment was rejected.

Mr. GRAHAM of Pennsylvania. Mr. Speaker, I move the previous question on the bill and amendments to final passage.

The previous question was ordered.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read the third time, and was read the third time.

The SPEAKER. The question now is on the passage of the bill.

The question was taken; and on a division (demanded by Mr. WALSH and Mr. GARRETT of Tennessee) there were 78 ayes and 13 noes.

So the bill was passed.

On motion of Mr. GRAHAM of Pennsylvania, a motion to reconsider the vote by which the bill was passed was laid on the table.

Mr. VOLSTEAD. Mr. Speaker, I call up the bill H. R. 4800.

Mr. WALSH Mr. Speaker, I make the point of order that no quorum is present.

ADJOURNMENT.

Mr. VOLSTEAD. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 51 minutes p. m.) the House adjourned until to-morrow, Friday, June 2, 1922, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

620. Under clause 2 of Rule XXIV, a letter from the Chairman of the Federal Trade Commission, transmitting a preliminary report of the Federal Trade Commission on investment and profit in soft-coal mining covering the period 1916 to 1921, inclusive, was taken from the Speaker's table and referred to the Committee on Interstate and Foreign Commerce.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. KRAUS: Committee on Naval Affairs. H. R. 11340. A bill to advance Maj. Ralph S. Keyser on the lineal list of officers of the United States Marine Corps, so that he will take rank next after Maj. John R. Henley; without amendment (Rept. No. 1052). Referred to the Committee of the Whole House.

Mr. BURDICK: Committee on Naval Affairs. H. R. 4723. A bill for the relief of William M. Phillipson; without amendment (Rept. No. 1053). Referred to the Committee of the Whole House.

Mr. BURDICK: Committee on Naval Affairs. H. R. 397. A bill to remove the charge of desertion against the name of Frank George Bagshaw; with an amendment (Rept. No. 1054). Referred to the Committee of the Whole House.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, committees were discharged from the consideration of the following bills, which were referred as follows:

The bill (H. R. 6411) granting a pension to Mace Williams; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

The bill (H. R. 11821) granting a pension to Dolly P. Beckner; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

The bill (H. R. 11583) granting a pension to George A. Wageck; Committee on Invalid Pensions discharged and referred to the Committee on Pensions.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. GENSMAN: A bill (H. R. 11842) for the prevention and removal of obstructions and burdens upon interstate commerce in grain by regulating transactions on grain future exchanges, and for other purposes; to the Committee on Agriculture.

By Mr. TINCHER: A bill (H. R. 11843) for the prevention and removal of obstructions and burdens upon interstate commerce in grain by regulating transactions on grain future exchanges, and for other purposes; to the Committee on Agriculture.

By Mr. MANSFIELD: A bill (H. R. 11844) authorizing the use of a special canceling stamp in the post office at Cuero, Tex.; to the Committee on the Post Office and Post Roads.

By Mr. BLAND of Indiana: Resolution (H. Res. 358) making House bill 11022 in order for consideration; to the Committee on Rules.

By Mr. WALTERS: Resolution (H. Res. 359) to provide for the services of a substitute telephone operator; to the Committee on Accounts.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BENHAM: A bill (H. R. 11845) granting an increase of pension to Nancy F. Ralston; to the Committee on Invalid Pensions.

By Mr. CHINDBLOM: A bill (H. R. 11846) for the relief of Theodore Kron; to the Committee on Claims.

Also, a bill (H. R. 11847) for the relief of Julius Laegeler; to the Committee on Claims.

Also, a bill (H. R. 11848) granting a pension to Harriet E. Blood Cantwell; to the Committee on Invalid Pensions.

By Mr. FAIRCHILD: A bill (H. R. 11849) granting a pension to Susan Kiley; to the Committee on Invalid Pensions.

By Mr. FESS: A bill (H. R. 11850) granting a pension to William Donnelly; to the Committee on Invalid Pensions.

By Mr. FOSTER: A bill (H. R. 11851) granting an increase of pension to Martha E. Leach; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11852) granting an increase of pension to Susan R. Vititoe; to the Committee on Invalid Pensions.

By Mr. GALLIVAN: A bill (H. R. 11853) for the relief of John F. Cassidy; to the Committee on Claims.

By Mr. GLYNN: A bill (H. R. 11854) granting a pension to Hannah E. Cahey; to the Committee on Invalid Pensions.

By Mr. GRAHAM of Pennsylvania: A bill (H. R. 11855) for the relief of Jacob S. Steloff; to the Committee on Claims.

By Mr. GRIEST: A bill (H. R. 11856) granting an increase of pension to William McCloud; to the Committee on Invalid Pensions.

By Mr. KELLER: A bill (H. R. 11857) granting a pension to Elizabeth Walker; to the Committee on Pensions.

By Mr. KING: A bill (H. R. 11858) granting a pension to Carrie Howell; to the Committee on Invalid Pensions.

By Mr. LAYTON: A bill (H. R. 11859) granting a pension to Laura V. Bennett; to the Committee on Invalid Pensions.

By Mr. McPHERSON: A bill (H. R. 11860) granting a pension to Tabitha E. Isbell; to the Committee on Invalid Pensions.

By Mr. MILLSPAUGH: A bill (H. R. 11861) granting a pension to Catherine Crow; to the Committee on Invalid Pensions.

By Mr. MOORE of Virginia: A bill (H. R. 11862) granting a pension to Anna R. Little; to the Committee on Pensions.

By Mr. ROACH: A bill (H. R. 11863) for the relief of Chancey F. Bartholomew; to the Committee on War Claims.

By Mr. ROGERS: A bill (H. R. 11864) granting a pension to Sarah A. Byam; to the Committee on Pensions.

By Mr. SANDERS of Indiana: A bill (H. R. 11865) granting a pension to Mary E. Gates; to the Committee on Invalid Pensions.

By Mr. SHAW: A bill (H. R. 11866) providing for preliminary examination and survey to be made of the Illinois River, Ill., and its tributaries; to the Committee on Flood Control.

By Mr. TINKHAM: A bill (H. R. 11867) for the relief of Walter P. Crowley; to the Committee on Naval Affairs.

By Mr. UPSHAW: A bill (H. R. 11868) for the relief of the widow of John Curtis Staton; to the Committee on Claims.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

5844. By Mr. BARBOUR: Petition of Grand Parlor, Native Sons of the Golden West, California, relative to Japanese immigration; to the Committee on Immigration and Naturalization.

5845. Also, petition of Grand Parlor, Native Sons of the Golden West, California, urging that all regulations permitting concessions to be granted for educational, religious, or charitable purposes, also include patriotic purposes; to the Committee on the Judiciary.

5846. Also, petition of the Tulare Fish and Game League, California, and the Tulare County Board of Trade, California, relative to the protection of game in the area which it is proposed to eliminate from the Sequoia National Park; to the Committee on Agriculture.

5847. Also, petition of residents of El Nido, Merced County, Calif., protesting against House bills 9753 and 4388 or Senate bill 1948, the so-called Sunday laws; to the Committee on the District of Columbia.

5848. By Mr. BECK: Petition of Mr. William F. Diven and others, of the town of Pine Valley, Clark County, Wis., urging legislation to protect the farmers against filled milk and butter frauds; to the Committee on Ways and Means.

5849. Also, petition of Mr. H. R. Burgdorff, of Oxford, Wis., and others, favoring legislation for the prohibition of the manufacture and sale of filled milk or any other substitute for milk or butter; to the Committee on Ways and Means.

5850. By Mr. CURRY: Petition of Grand Parlor, Native Sons of the Golden West, at its forty-fifth session, held at Oakland, Calif., April 17–21, 1922, advocating exclusion of Asiatic immigration; to the Committee on Immigration and Naturalization.

5851. By Mr. FRENCH: Petition of sundry citizens of the State of Idaho, protesting against the enactment of House bill 9753, and other Sunday bills; to the Committee on the District of Columbia.

5852. By Mr. KISSEL: Petition of International Motor Co., New York City, N. Y., regarding tariff on graphite; to the Committee on Ways and Means.

5853. Also, petition of E. Clemons Horst Co., San Francisco, Calif., regarding foreign trade and finance; to the Committee on Interstate and Foreign Commerce.

5854. By Mr. RAKER: Petition of C. C. Thomas Post, No. 244, Navy Post of the American Legion, San Francisco, Calif., urging support of the Secretary of the Navy's recommendation that $1,000,000 be appropriated to provide for the Naval Reserve Force; to the Committee on Appropriations.

5855. Also, petition of G. R. Milford, of Redding, Calif., indorsing House bill 5823, known as the public shooting ground and game refuge bill; to the Committee on Agriculture.

5856. Also, petition of Mrs. Helen Hatch, master counselor, and others, of Los Angeles Council of Sadol, International Magian Society, urging immediate action by Congress in behalf of Armenia; to the Committee on Foreign Affairs.

5857. Also, petition of Viall & Co., of Los Angeles, Calif., protesting against paragraph 1116 of House bill 7456; to the Committee on Ways and Means.

5858. By Mr. ROGERS: Evidence in support of House bill 11864, granting a pension to Sarah A. Byam; to the Committee on Pensions.

5859. By Mr. ROUSE: Petition of 17 citizens of Grant County, Ky., protesting against the schedule of freight rates issued for live stock in the territory south of the Ohio River effective June 1, 1922; to the Committee on Interstate and Foreign Commerce.

5860. By Mr. SANDERS of New York: Petition of Belus Calkins, jr., Kate Zehler, Mary A. Reiber, and Daniel W. Bump, of Varysburg, N. Y., urging the passage of the so-called Bursum-Morgan bill increasing pensions to Civil War pensioners; to the Committee on Invalid Pensions.

5861. By Mr. SNELL: Petition of Saranac Chapter, Daughters of the American Revolution, favoring the passage of the Sterling-Towner education bill; to the Committee on Education.

5862. By Mr. SUMMERS of Washington: Petition of numerous voters of College Place, Wash., protesting against the passage of House bills 4388 and 9753 and Senate bill 1948; to the Committee on the District of Columbia.

5863. By Mr. TINKHAM: Petition of Columbus Republican Club of Massachusetts, Revere, Mass., favoring the modification of the naturalization laws; to the Committee on Immigration and Naturalization.

5864. Also, petition of Boston Central Labor Union, favoring an amendment to the Constitution of the United States giving Congress the power to enact legislation to make uniform child-labor laws in the United States; to the Committee on Labor.

5865. By Mr. TOWNER: Petition of F. H. Gray, of Wiscasset, Me., and 18 other citizens of Maine, all employees of the Maine Central Railroad Co., urging the passage of the Towner-Sterling educational bill; to the Committee on Education.

5866. Also, petition of Mr. H. C. Johnson and 37 other citizens of Osnabrock, N. Dak., asking for the passage of the Towner-Sterling educational bill; to the Committee on Education.

5867. Also, petition of Mr. Emil Spiellinger, of Louisville, Ky., and 14 other citizens of the State of Kentucky, asking for the passage of the Towner-Sterling educational bill; to the Committee on Education.

SENATE.

FRIDAY, *June 2, 1922.*

(Legislative day of Thursday, April 20, 1922.)

The Senate met at 11 o'clock a. m., on the expiration of the recess.

WAR DEPARTMENT APPROPRIATIONS.

Mr. McCUMBER. Mr. President, the 30th day of June will soon arrive, and new appropriation bills, of course, will have to go into effect by the 1st day of July. It is quite apparent that we shall have to yield from time to time in the tariff discussion for the purpose of taking up the several appropriation bills. So I am going to move that the tariff bill be temporarily laid aside for the consideration of the Army appropriation bill.

The PRESIDENT pro tempore. Is there objection?

Mr. ROBINSON. Mr. President, I suggest to the Senator from North Dakota that he ask unanimous consent that the pending tariff bill be laid aside, and that the Army appropriation bill be taken up.

Mr. McCUMBER. Very well; I ask unanimous consent.

Mr. ROBINSON. I have no objection to that course, but I think there ought to be a quorum present, and I therefore suggest the absence of a quorum.

The PRESIDENT pro tempore. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ball	Harris	McLean	Smoot
Borah	Harrison	McNary	Spencer
Brandegee	Heflin	Nelson	Stanley
Bursum	Hitchcock	New	Sterling
Calder	Johnson	Newberry	Sutherland
Cameron	Jones, N. Mex.	Nicholson	Underwood
Capper	Jones, Wash.	Oddie	Wadsworth
Cummins	Kellogg	Page	Walsh, Mass.
Curtis	Kendrick	Pepper	Walsh, Mont.
Dial	Keyes	Poindexter	Warren
Dillingham	Ladd	Ransdell	Watson, Ga.
du Pont	La Follette	Rawson	Watson, Ind.
Frelinghuysen	Lenroot	Robinson	Willis
Glass	Lodge	Sheppard	
Gooding	McCumber	Simmons	
Hale	McKinley	Smith	

The PRESIDENT pro tempore. Sixty-one Senators have answered to their names. There is a quorum present.

The Senator from North Dakota asks unanimous consent that the tariff bill be temporarily laid aside and that the Senate proceed to the consideration of House bill 10871, the Army appropriation bill. Is there objection?

Mr. UNDERWOOD. I desire to ask if it is the policy of those in charge of the bill to continue the consideration of the Army appropriation bill until its conclusion?

Mr. WADSWORTH. If the question is addressed to me, I will say that so far as I am concerned I hope we can keep the Army appropriation bill before the Senate until it is disposed of.

Mr. UNDERWOOD. The reason why I asked the question is because I merely wish to know, for the benefit of those on this side of the Chamber, what the business before the Senate will be; not that I suppose there will be any delay in the consideration of the appropriation bill, but it will probably take some little time.

Mr. BORAH. Mr. President, I do not desire to object to laying aside the tariff bill. At the same time I would like to have, if those in charge of the Army appropriation bill see fit to do so, a postponement of the measure for an hour or two, until we can have time to read the bill.

Mr. WADSWORTH. I will say to the Senator that it will take a great deal longer than an hour or two to read the bill. It is a bill of one hundred and fifty odd pages.

Mr. BORAH. I presume it is the intention to waive the formal reading of the bill for the purpose of considering committee amendments.

Mr. WADSWORTH. I hope that may be done.

Mr. BORAH. That is what I assumed, and that is the reason why I asked that we may have an opportunity to read the bill. Otherwise it puts those of us who have not had an opportunity to read the report and the bill in a position where we can not make progress in determining what we want to discuss, if anything. I think, however, I shall not object, but I hope that if we need a little time later we may have it.

Mr. WADSWORTH. Let me say to the Senator from Idaho that if an item is encountered in the bill on which Senators desire more time for consideration, for one I shall be entirely willing to postpone the consideration of that item and proceed with others.

Mr. WARREN. I hope the chairman of the Committee on Military Affairs will follow that course.

The PRESIDENT pro tempore. Is there objection to the request of the Senator from North Dakota? The Chair hears none, and House bill 10871 is before the Senate as in Committee of the Whole.

Mr. WADSWORTH. A number of Senators have routine business to present, and I yield for that purpose.

PETITIONS.

The PRESIDENT pro tempore. The Chair lays before the Senate resolutions adopted by the American Chamber of Commerce of the Philippine Islands, urging Congress to decide the permanent status of the Philippine Islands, and further requesting that Congress authorize the appointment of a committee of three American citizens to represent in Washington American interests in the Philippine Islands. The resolutions will be referred to the Committee on Territories and Insular Possessions.

Mr. CURTIS presented a resolution adopted by the Twenty-fourth Annual Congress, Kansas Daughters of the American Revolution, at Pittsburg, Kans., favoring the creation of a national military park and monument at Yorktown, Va., covering the Revolutionary fortifications at that place, which was referred to the Committee on Appropriations.

Mr. CAPPER presented a resolution adopted by the National Conference of Mothers' Congress, at Tacoma, Wash., favoring the passage of the so-called Capper-Fess physical education bill, which was referred to the Committee on Education and Labor.

Mr. WILLIS presented the petition of Lawrence W. Kutsch and sundry other citizens of Curtice, Ohio, praying for the imposition in the pending tariff bill of a duty of $2 per 100 pounds on Cuban sugar, which was referred to the Committee on Finance.

Mr. TOWNSEND presented petitions of sundry citizens of Battle Creek, Mich., praying that only a moderate duty on kid gloves be imposed in the pending tariff bill, which were referred to the Committee on Finance.

He also presented a petition of sundry citizens of Ashley and Ithaca, in the State of Michigan, praying for inclusion in the pending tariff bill of a duty of $2 per 100 pounds on Cuban sugar, which was referred to the Committee on Finance.

REPORTS OF COMMITTEES.

Mr. WILLIS, from the Committee on Commerce, to which was referred the bill (S. 3611) authorizing and directing the Secretary of War to abrogate a contract lease of land and water power on the Muskingum River, reported it with amendments and submitted a report (No. 732) thereon.

Mr. ROBINSON, from the Committee on Claims, to which was referred the bill (S. 3048) for the relief of L. D. Riddell and George W. Hardin, trustees of Milligan College, Tennessee, reported it with an amendment and submitted a report (No. 733) thereon.

He also, from the same committee, to which was referred the bill (H. R. 1764) for the relief of J. A. Leslie, reported it without amendment and submitted a report (No. 734) thereon.

Mr. CAPPER, from the Committee on Claims, to which were referred the following bills, reported them severally without amendment and submitted reports thereon:

A bill (S. 3570) for the relief of the United Dredging Co. (Rept. No. 735);

A bill (H. R. 7052) for the relief of G. C. Caldwell (Rept. No. 736); and

A bill (H. R. 8374) for the relief of the estate of Frank W. Knight (Rept. No. 737).

Mr. SPENCER, from the Committee on Claims, to which was referred the bill (S. 2960) for the relief of Arthur A. Padmore, reported it without amendment and submitted a report (No. 738) thereon.

Mr. NEW, from the Committee on Military Affairs, to which was referred the bill (S. 3424) to provide for the reclamation of the United States Military Reservation, Fort De Russey, Honolulu, Hawaii, reported it with amendments and submitted a report (No. 739) thereon.

REPORT ON PHILIPPINE ISLANDS.

Mr. CAPPER. Mr. President, I report back from the Committee on Printing House Concurrent Resolution No. 47, providing for the printing of 100,000 copies of the report of the special mission to investigate the Philippine Islands, and I submit a report (No. 731) thereon. The Secretary of War is very anxious that we have the report printed at once, and I ask unanimous consent for the immediate consideration of the concurrent resolution.

The PRESIDENT pro tempore. Is there objection?

Mr. ROBINSON. I ask that the concurrent resolution may be read.

The PRESIDENT pro tempore. The Secretary will read the concurrent resolution for the information of the Senate.

The reading clerk read the concurrent resolution, as follows:

Resolved by the House of Representatives (the Senate concurring), That 100,000 copies of the report of the special mission on investigation to the Philippine Islands to the Secretary of War, without the map but with the data on the Philippines preceding and accompanying such report, be, and the same is hereby, ordered printed as a public document, to be distributed as follows: Sixty-five thousand through the document room of the House, 25,000 through the document room of the Senate, 5,000 through the Committee on Insular Affairs of the House, and 5,000 through the Committee on Territories and Insular Possessions of the Senate.

The PRESIDENT pro tempore. Is there objection to the receipt of the report or to the immediate consideration of the concurrent resolution?

Mr. ROBINSON. Pending that question I desire to ask the Senator from Kansas if this is a report from the Committee on Printing?

Mr. CAPPER. It is.

Mr. ROBINSON. A favorable report?

Mr. CAPPER. It is.

Mr. ROBINSON. A unanimous report?

Mr. CAPPER. A unanimous report.

Mr. ROBINSON. I have no objection to the adoption of the resolution.

The concurrent resolution was considered by unanimous consent and agreed to.

CONFIRMATION OF ENSIGNS IN THE NAVY.

Mr. HALE. Mr. President, I ask unanimous consent that the Senate may confirm in open executive session the following nominations.

The PRESIDENT pro tempore. Is there objection?

Mr. ROBINSON. Let the nominations be reported.

Mr. HALE. These are nominations of four members of the graduating class at Annapolis. These men had intended to retire on graduation, but have now decided to stay in the service, and the naval authorities have approved the action.

Mr. UNDERWOOD. This is confirming them the same as we confirmed the other members of the class?

Mr. HALE. Exactly the same.

The PRESIDENT pro tempore. The nominations will be reported for the information of the Senate.

The reading clerk read as follows:

The following-named midshipmen to be ensigns in the Navy from the 3d day of June, 1922:

Harold L. Fudge.
William H. Egan, jr.
Carl R. Brown.
Beverly M. Coleman.

The PRESIDENT pro tempore. Is there objection to the request of the Senator from Maine? The Chair hears none. Without objection, the nominations will be confirmed.

Mr. HALE. I ask that the President be notified.

The PRESIDENT pro tempore. The President will be notified. The Senate resumes its legislative session.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. LENROOT:

A bill (S. 3670) granting an increase of pension to Arabella Miller; to the Committee on Pensions.

By Mr. HITCHCOCK:

A bill (S. 3671) for the relief of James A. O'Dell and certain other former privates and noncommissioned officers in the military service of the United States; to the Committee on Claims.

By Mr. NEW:

A bill (S. 3672) to amend sections 34 and 40 of the organic act of the Territory of Hawaii; and

A bill (S. 3673) to provide for the transfer of the lands and buildings of the Federal leprosy investigation station at Kalawao, on the island of Molokai, in the Territory of Hawaii, to the Territory of Hawaii, and for other purposes; to the Committee on Territories and Insular Possessions.

AMENDMENTS TO HOUSE RIVER AND HARBOR BILL.

Mr. SHEPPARD (for Mr. FLETCHER) submitted amendments providing for improvement works on the inland waterway from Pensacola Bay, Fla., and Mobile Bay, Ala., in accordance with report submitted in House Document No. 610, Sixty-third Congress, second session, a channel 5 feet deep and 40 feet wide, route to be the most practicable and the most economical in final cost; St. Johns River, Fla., from Jacksonville to Palatka, with a view of giving a 20-foot channel to Palatka; St. Johns River, Fla., from Palatka to Lake Monroe, with a view of making cut-offs and improving navigation; Blackwater Bay and River, Fla., and Bayou Chico, Fla., intended to be proposed by him to the bill (H. R. 10766) authorizing appropriations for the prosecution and maintenance of public works on canals, rivers, and harbors, and for other purposes, which were referred to the Committee on Commerce and ordered to be printed.

IMPERIAL VALLEY AND VICINITY.

Mr. ASHURST submitted the following concurrent resolution (S. Con. Res. 25), which was read, referred to the Committee on Printing, and ordered to be printed:

Resolved by the Senate (the House of Representatives concurring), That there shall be printed 5,000 additional copies of Senate Document No. 142, Sixty-seventh Congress, presented by the Senator from California [Mr. JOHNSON] entitled "Problems of Imperial Valley and Vicinity," of which 3,000 copies shall be for the use of the Senate document room and 2,000 copies for the use of the House document room.

ADDRESS BY HON. D. R. CRISSINGER.

Mr. ODDIE. Mr. President, I ask unanimous consent that that portion of the very able and instructive address by Hon. D. R. Crissinger, Comptroller of the Currency, before the Pennsylvania Bankers' Association at Pittsburgh on May 26, on the maintenance of the gold standard, be printed in the RECORD in the usual RECORD type.

There being no objection, the address was ordered to be printed in the RECORD in 8-point type, as follows:

ADDRESS OF THE COMPTROLLER OF THE CURRENCY, HON. D. R. CRISSINGER, BEFORE THE PENNSYLVANIA BANKERS' ASSOCIATION, PITTSBURGH, PA., MAY 26, 1922.

Almost the last among great financial communities to commit ourselves definitely to the gold standard, we find ourselves now summoned to determine, I may say, for all the world whether that standard shall be maintained or whether we shall abandon it and allow the economic craft to struggle without chart or rudder.

I remember very well the years of the heated controversy over the gold standard. In those times we were constantly being assured that our country was the victim of the gold standard because we were a debtor nation and others controlled the world's gold. We were told that the tendency was for gold constantly to increase in value, compelling the debtor always to pay in a dearer money than that in which he had borrowed.

It was not always easy to answer, for effective answer required the consideration of economic fundamentals concerning production, exchange, and consumption. But in 1896, after a campaign of education in these fundamentals, the verdict was in favor of maintaining a gold standard. I am very sure that if to-day the verdict had to be sought again on those issues the gold standard would win again by a far greater majority.

In the quarter century since 1896 we have seen that this standard does not mean the economic enslavement of a debtor country; rather, it means the assurance of equal opportunity to develop resources and the chance to transform the debtor community into a creditor state. In 1896 we were the greatest borrowing community in the world; in 1922 we find ourselves the greatest lending community, the mainstay and reliance of business, of bankers, of nations, of civilization itself, in the effort to weather the greatest storm that ever burst over mankind.

If the gold standard meant so much of opportunity to us as the great debtor State, how much more must its maintenance mean to us, now that we have become the great creditor Nation. Every argument that could be made in 1896, with however much plausibility, against maintaining the gold standard, now applies with a thousandfold more force in favor of rigidly adhering to it.

We know how absolutely necessary is a uniform monetary standard throughout the world. We know that without it our problems of exchange and of international commerce can not be solved. We realize that the debts which are owing to us, the balances which must be paid to us or by us, must somehow be adjusted to a single, common, universal standard; and that, as these obligations have all been thus far related to or measured by gold, we can not safely depart now from that standard.

Yet with our own interest absolutely bound up in the maintenance of this system we find that our very wealth and good fortune are fast becoming a menace to this system. The security of the gold standard depends on the maintenance of a free gold market, on the comparatively unrestricted flow of gold. If the movements of commodities shall too long continue in a particular direction they must inevitably create a vacuum which can only be filled by a movement in the opposite direction.

In the last eight years the movement of commodities has been away from our shores and the movement of gold has been toward us. The result is, as has been pointed out with possibly tiresome iteration, that our side of the world tends to gather to itself more than it needs of the gold, while the other side, burdened with debts, finds its store of gold constantly reduced and its powers to maintain a gold standard correspondingly weakened. The gold standard can not be maintained by piling up all the gold in one place.

Yet there is every sign that the movement of gold to us will have to continue, unless there shall be some settlement of international debts and such adjustments in governmental finances, international fiscal relations, and the producing and consuming opportunities of the nations as will restore something like equilibrium. At the basis of the trouble we find the huge domestic and international debts of the world—the fundamental disturbance that is destroying trade and commerce and our own industrial prosperity.

Domestic debts impose enormous burdens of taxation, while the international debts interpose well-nigh insurmountable obstacles to the adjustment of exchange relations. With financial exchange in this chaos, commercial transactions are rendered well-nigh impossible, because they tend to become mere speculation in exchange fluctuations.

There must be, first, some determination of policy toward the international debts, and, second, an adjustment of government budgets that will give confidence in the power of States to pay the debts and maintain the gold basis of money.

I do not believe it is possible at this time to reach a final settlement of all the international obligations. But there is absolute necessity that some general policy shall be agreed upon among the nations with reference to these obligations. A beginning must be made, an understanding reached, for balancing budgets and adjusting international debts, so that there may be a start toward international liquidation and stabilization. In the final analysis, we shall see plainly that the preservation of the gold standard depends on bringing all these obligations into a relationship with gold and then placing money on a gold basis and setting out toward ultimate payment in gold.

This is absolutely necessary, lest the stream of gold shall continue to flow toward American shores, until other nations find it impossible to go farther with the pretense of maintaining a gold monetary standard.

I recall, at one critical epoch during the war, reading a letter from London which said—this being a considerable time before America's entry into the war—that unless American financiers should extend credit to the allied nations, then the allies would buy from us, pay in gold, send us their last resources of the yellow metal, and then abandon the gold standard—leaving us with the gold, but depriving it of its monetary value.

I recall the shiver with which I contemplated the consequence of such a policy. We would be left with a vast stock of gold, which, repudiated by other nations, would become well-nigh valueless to us.

Fortunately that crisis was not precipitated. But conditions now, despite that peace has been restored, confront us with a grave danger that this same crisis may be brought before us again. We can not go on indefinitely compelling our creditors to settle with gold, which, once it reaches us, flows inevitably into vaults and there remains, comparatively useless to business either at home or abroad.

There must be adjustments among the nations that will enable them to reckon with confidence upon their financial futures. It is not necessary, as I view it, that Europe shall forthwith begin to pay interest upon its obligations to us. Indeed, to-day that would mean that Europe must drain itself of its remaining gold and break down the gold standard. The only alternative would be for Europe to furnish us with goods, which we could only accept at the price of substituting them for goods produced by our own industries. In either case our last state would be worse than our first.

The most that can be undertaken at this time—and it must be undertaken soon if we are to avoid disaster—is to reach a workable understanding and settlement as to the future of the international debts due us and existing between other countries, and along with this there must be a serious effort to balance budgets and bring costs of government within the capacities of the nations to pay.

It has been proposed that a conference of the various national financial establishments be held to devise measures to restore and maintain the gold standard. In every such discussion it must be kept in mind that the permanency of the gold standard depends fundamentally upon some adjustment or settlement, not cancellation, of all international debts, in terms of gold, so that they can be paid by the contracting parties without sorely impoverishing the people through unbearable burdens of taxes. It is well to remember that the economic possibilities of reconstruction must be measured in units of human energy, and an overload or a lack of such units means default and disaster. In every such effort our country must obviously take a part, for we are not only the leading creditor nation but we have become custodian of the greater share of the world's gold.

Nothing short of complete frankness, understanding, confidence, can serve the purposes of such an international adjustment. There must be perfect candor about policies and programs; complete understanding as to the end sought. There must be a recognition of the fact that the alternative, if we fail to stabilize the old order, is bound to be a cataclysm. In that cataclysm the present social and economic system of the world will face the tremendous question of whether, incapable of protecting itself against its own weakness, it deserves to survive.

Always a firm advocate of the gold standard, I have never been so convinced as I am now of its absolute necessity. We must maintain it and we must bear our part in making the rest of the world maintain it, or else we must be prepared to deal with new standards in the whole field of international intercourse. No man can guess what those standards might be. But, just as faith, honor, and square dealings constitute the only standard to which human conduct can ever be universally related, so in the present state of society one feels that the gold standard of money is the only one to which we can hope to relate the money systems of the world.

I speak of these things with great earnestness, because lately there have been evidences of a revival, in unexpected places, or sentiment altogether too hospitable toward the old fallacies of cheap and unsound money. Sometimes they have been dressed up in attractive disguises. Some of them, indeed, have been so thoroughly camouflaged that it is hard to recognize them as merely the refurbished and modernized doctrines of "Coin" Harvey, Gen. James B. Weaver, and "Brick" Pomeroy.

But on examination they will be found just that; and we will be wise to stamp them out now, with the inexorable logic of truth and experience. Our country must stand for the policies that are sound and lasting. Others may be tempted into dangerous experiments. We have seen the disastrous consequences of some of these, and we must hold firm for the things we know to be deserving of our confidence.

By such unswerving adherence we will strengthen the faith of others more sorely tempted than ourselves. If we stand firm, we will make a great contribution to the rehabilitation of the world and to the establishment of the new order of things. And I believe we will do this. I believe we will, by wisdom and caution, add much to the contribution we have already made for the salvation of civilized institutions.

QUESTION OF PERSONAL PRIVILEGE—QUORUM CALLS.

Mr. EDGE. Mr. President, I rise to a question of personal privilege.

I understand that a new rule has been inaugurated to the effect that Senators arriving in the Chamber in response to a quorum call after the roll call has been concluded and a quorum of Senators have answered to their names are not permitted to be included as having been present. The Senators who are located in the far corner of the Senate Office Building, among whom I happen to be, find it absolutely impossible 50 per cent of the time at least to reach the Senate Chamber before the conclusion of such a call when a quorum is ascertained to be present. Even though they leave their offices on the sounding of the bell, being obliged to make use of various elevator services and the subway trolley, unless they happen to catch a car at the moment they arrive and an elevator as well, they find it practically impossible to reach the Chamber. This morning, although I left my office immediately when the bell rang and reached the Chamber as expeditiously as possible, the roll call had been completed, an I was unable to respond to my name. I find that one or two other Senators are in precisely the same position as am I. If the rule to which I refer is to be invoked it will mean, of course, that the RECORD will show that we were not present on the quorum call.

In these days there is so much adverse criticism of absenteeism and failure to obtain quorums in the Senate that it seems to me there should be some liberality in the application of the rule. Of course, when a second roll call is ordered it is quite possible for a Senator to get on the roll, but when a quorum is secured on the first call, as I have stated, 50 per cent of the time it is impossible for Senators situated as I am to be recorded as present.

BITUMINOUS COAL PRODUCTION.

Mr. WALSH of Massachusetts. Mr. President, I ask unanimous consent to submit the resolution which I send to the desk, and I ask for immediate action on it. The resolution ought not to provoke debate, for it merely asks for information upon a subject of great interest to the American people at the present time.

The PRESIDENT pro tempore. Is there objection to the present consideration of the resolution referred to by the Senator from Massachusetts?

Mr. WADSWORTH. May we have the resolution reported for the information of the Senate, Mr. President?

The PRESIDENT pro tempore. The Secretary will read the resolution for the information of the Senate.

The Reading Clerk read the resolution (S. Res. 298), as follows:

Whereas it has been reported that as a result of the strike of the bituminous coal miners the consumption of bituminous coal is exceeding the production and that the available surface reserve is being rapidly exhausted; and

Whereas an adequate supply of bituminous coal at reasonable prices is vital to the domestic and industrial welfare of the Nation; and

Whereas it is of utmost importance that the consuming public possess all information possible relating to the present and probable supply and prices of bituminous coal; and

Whereas it has been represented that the Secretary of Commerce has been negotiating with certain coal operators for a voluntary agreement to fix prices during the pending emergency: Therefore be it

Resolved, That the Secretary of Commerce be, and he hereby is, directed to obtain and to report to the Senate, if not incompatible with the public interests, as expeditiously as possible all available facts relating to—

(1) The present supply of mined bituminous coal;
(2) The average weekly production and consumption of such coal since April 1, 1922;
(3) The amount of bituminous coal estimated to be necessary for all uses in the United States until May 1, 1923;
(4) The effect of such strike upon present coal prices and the probable effect upon such prices if a settlement of that strike is not reached before September 1, 1922;
(5) What action, if any, has been taken by the United States through its governmental agencies to terminate the strike; and
(6) What action, if any, has been taken by the United States to protect the consumers of coal from paying exorbitant prices by reason of curtailment of production.

The PRESIDENT pro tempore. Is there objection to the present consideration of the resolution?

Mr. FRELINGHUYSEN. Mr. President, I do not intend to object to the consideration of the resolution, but I simply wish to refer to the fact that there has been upon the calendar since May 16, 1921, Order of Business 54, being Senate bill 1807, to aid in stabilizing the coal industry. That bill simply calls upon the Secretary of Commerce to procure the very facts which are asked for in the resolution now submitted by the Senator from Massachusetts. If Senators had not three different times objected to the consideration of that bill, possibly by this time it would have been passed and the Senate would have been in possession of the very valuable information which is so necessary to enable the Senate to determine what policy they shall pursue in regard to the coal strike.

I hope before Congress shall finally adjourn that Senators will change their attitude respecting the measure to which I refer and will give the power to the Secretary of Commerce to enable him to procure and report to Congress the true facts concerning the coal industry.

The resolution was considered by unanimous consent and agreed to.

AFFAIRS IN SANTO DOMINGO.

Mr. POMERENE. Mr. President, I received on yesterday a letter from a prominent American residing in the Dominican Republic inclosing an extract from an address delivered by the Governor of La Vega Province at the opening of the central highway from the capital to the north of the island, and also a translation of an editorial which appeared in Pluma y Espada, a paper published in the island. These two extracts will give the viewpoint of some gentlemen in the island who are not disposed to find fault with everything the American occupation is doing. I commend them to the attention of a few Americans who are disposed to befoul the American name and occupation in that island. I ask that, without reading, these two extracts may be inserted in the CONGRESSIONAL RECORD.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered.

The matter referred to is as follows:

[Translation of a paragraph of the address of the Governor of La Vega Province at the opening of the central highway from the capital to the north.]

You are the representative of the most democratic and most powerful Nation in the world, and you are also chief of the small Dominican State; in your first position, with a true sense of that American grandeur, you can well afford to be benevolent toward those influenced by love of their flag; in your second position as chief of the central government you can well carry out works of moral and political benefit, and this to you would be easy, dealing personally with a naturally calm Dominican people, and by common accord a solution will be found for this important national problem; with the assurance that if you do this the pages of Dominican history that record the acts of your administration will also class you as a member of the family of human benefactors—Jesus Christ, Lee, Jefferson Davis, Lincoln.

—

[Editorial from Pluma y Espada, Velasquez Party organ.]

The point of attack for the "patriots" these days is the Duarte Highway—that the work is no good; that there has not been spent on this work what they said has been spent; that the road will soon be impassable from the fact that it has been so badly constructed; and a whole lot of other things which the "dogs in the manger" are shouting about. Perhaps there is something in the fact of the money invested on the work, but with all the evils of the "carretera" it is undoubtedly a great benefit to the country. Would to God that all the money which the government of occupation spends could be spent on "carreteras." The Carretera Duarte has in reality cost many millions. But we can not complain when we compare that sum with the millions thrown away by native governments on useless works. How much have the Dominicans spent in arsenals, in generals under orders, in revolutionary expenses? How were the loans invested made under the government of Lilis? What was done with the money received in the concessions to Haiti of grand parcels of Dominican land? All these operations and others just as shameful have left a blot on our history upon which we can only look with shame. These loans were only used to buy men, to corrupt men, and to throw our nation's honor in the mud. If all the millions spent by the Dominicans in shameless works had been spent on something like the Carretera Duarte, we would have obtained advantages which result from works of that magnitude. We have nothing to complain of. All the evils from which we are suffering we have bought at an enormous price. If Lilis had not been permitted to negotiate the loans the country would not have had to celebrate later on a convention with the Government of the United States, which convention was the first thing that compromised our independence. But in the madness of the orgies of that time nothing was thought of except filling the pockets, and with no thought for the future of the Republic. And in the course of years we all suffer, particularly those whose hands are clean of those crimes against the country, from the terrible consequences of all those economical disorders. With all that has been said, we do not pretend to justify the fact that $5,000,000 has been spent on the Carretera Duarte, it appearing to us that with that amount of money and better administration the work could have been finished better. What we do wish to say, assuming all responsibility, is that for all the evils from which we are suffering we have no one to blame but ourselves. In the management of funds of the nation we have almost always been unscrupulous, not to say bandits, and, of course, we are all now suffering from this. Consequently, I repeat, that it is to be hoped that the government which succeeds the occupation will be composed of honest men, never of those dishonest ones who have placed us where we are now, which leads us to sometimes think that the only method of solution would be suicide.

ADDRESS OF HON. W. G. M'ADOO.

Mr. SIMMONS. Mr. President, on the 24th day of May Hon. W. G. McAdoo delivered at Hutchinson, Kans., a very illuminating address dealing with economic and financial questions, and to some extent with political conditions. I have read it carefully, and I think it is entitled to a place in the RECORD. I ask, without reading, unanimous consent for its insertion in the RECORD in the regular RECORD type.

There being no objection, the address was ordered to be printed in the RECORD in 8-point type, as follows:

SPEECH DELIVERED BY W. G. M'ADOO BEFORE THE KANSAS STATE DEMOCRATIC CONVENTION AT HUTCHINSON, KANS., MAY 24, 1922.

The question which most immediately concerns the American people is prosperity. The business man is weary of restricted trade and high taxes. The farmer is worn to a frazzle by heavy losses inflicted upon him through the merciless processes of so-called deflation or "normalcy." Labor is tired of unemployment and would like something else to do than hunting for a job or fighting wage reductions. The vast army of men and women of moderate salaries or small means who are dependent on good business for the opportunity to work are anxious for better times and sufficient pay to meet the cost of living. Everybody is tired of excessive railroad rates, of bad government, and, above all, of bad politics. The recent days of Democratic prosperity shine happily by contrast with these unhappy days of Republican "normalcy." How to regain prosperity persistently demands an answer. Among the most important essentials to its restoration are not alone the preservation but the increase of our foreign trade; and along with that, reduction of taxation, a more equitable distribution of the tax burden, and a tariff law that will not destroy our foreign markets.

Under our system of Government it is difficult to accomplish these ends except through political action. We are in the habit of relying in large part on political action for solution of economic problems and, so long as this continues, wise and well-administered government becomes more and more necessary to the life and prosperity of the people. Therefore, unless we are prepared to accept the evil consequences of the economic mistakes and absurdities that may follow upon the election of the wrong party or the advice of unwise leaders we should not vote blindly on political issues. We should study and understand them. When we apply the same brains to voting on political issues that we do to our business affairs we shall have better government and more prosperity.

An instance of what I mean by solving economic problems through political action is the Federal reserve system. For generations we had suffered financial panics and colossal losses because of a financial system which was both unsound and insufficient for the needs of the Nation. It could be remedied only through political action. The Republican Party, despite its claim that it alone possessed the "best minds" of the Nation, had proven itself during 50 years of power wholly incompetent to solve this problem, and was consistent in its solid opposition to this great reform. But the bill was passed and the Federal reserve system was established under a Democratic administration. The great economic problem involved in our financial system was thus solved through political action.

Why is the preservation and expansion of our foreign trade necessary to our prosperity? Because we produce, under normal conditions, more than we can consume. If this surplus is forced upon our home markets, when they are incapable of absorbing it, our producers are forced to accept ruinous prices, which affect not alone the surplus but the entire product. If the surplus can be marketed abroad at remunerative prices the value of the entire product is favorably affected and losses are turned into profits. Foreign markets are therefore of first importance to our farmers, our workingmen, and our producers generally. How are we to preserve and expand our foreign makets? Primarily through political action. If the political action of our Government is such as to close or restrict these markets business depressions are inevitable, with all of their attendant evils of unemployment, stagnation, and general distress.

Republican leaders at Washington seem to be obsessed with the idea that it is to our advantage to isolate ourselves from Europe politically and economically. They have not only refused to cooperate with other nations in establishing peace and order in Europe, but they are now engaged in passing a tariff law which will render still more difficult, if not impossible, the maintenance of our foreign trade.

From the materialistic point of view, and without dismissing the idealistic, which is of great importance, we are deeply concerned in the peace and stability of Europe and the preservation of those great markets for our surplus products. Europe has always been our best customer. Oriental and Latin-American trade, important as they are, do not compare with our interests in Europe. Not alone is European trade larger and more profitable to us than any other trade but European nations owe the United States about $12,000,000,000, which it is very much to our interest to collect some day. By cooperating, therefore, to the extent of our power in the maintenance of peace and the restoration of stable and prosperous conditions in Europe, we help ourselves in every direction.

The Democratic Party presented a plan for the preservation of European peace, the reestablishment of order, and the reduction of the vast land and naval armaments which are crushing the life out of peoples everywhere. This was embodied in the League of Nations. It would, in my judgment, have been successful had it been adopted. But the Republican Party defeated it and promised the American people, in lieu of that, some sort of organization of nations which would accomplish the same result. They have failed to organize such an association and have done nothing to preserve the peace of Europe or to lift the grinding burden of taxation through a reduction of military armaments. The only step they have taken is to make an alliance with Great Britain, France, and Japan which provides that "if any other power should threaten, by aggressive action, the rights of any of the four nations involved, they will confer with each other for the purpose of determining on the most efficient measures to be taken, jointly or separately" to meet the situation. This is the kind of an alliance which usually leads to war instead of peace, because, when any set of powers enters into such covenants they say, in effect, "We propose to maintain the policies outlined in this agreement against the rest of the world." This means that they must fight if those policies are challenged by other powers who may make a counteralliance against them or run away when the issue is presented.

But this is not its only vice. Under the exaggerated claims Republican leaders make for it, there is danger that the American people may be lulled into the belief that this is all that is required of America to preserve the peace of the world. As evidence of this, Senator LODGE, in a recent speech before the Republican members of the Massachusetts Legislature, claimed that this treaty has done more in "12 weeks for the world's peace than has been done anywhere else" in 24 years. This is, of course, a silly and preposterous claim. Was not the successful ending in 1918 of the goriest war in all history a greater immediate achievement for peace than the four-power Pacific pact of which Senator LODGE boasts? A Democratic administration did that. And could the four-power pact have been made if the war had not first been ended and if Woodrow Wilson's work at Paris had not laid the foundation for the Washington conference? It is the last Democratic administration that did more for world peace in the two years of 1918 and 1919 than had ever been done before by human effort. It is the Republican administration that has not contributed materially to world peace; it has merely postponed the realization of that boon until 1925.

The chief virtue of the four-power pact is the extent to which it may lead the administration into a genuine effort to cooperate with the rest of the world to secure peace. At best the four-power pact is a feeble step in that direction. Senator LODGE admits this in the speech to which I have referred, when he says: "The only obligation we assume is that of consultation, and when the consultation has been held, each nation that was in it is as free to do what she thinks right as she was when she entered the doors."

How can a mere agreement to hold a consultation be reasonably claimed as "more done in 12 weeks for the world's peace than has been done anywhere else in 24 years"? The disagreeable fact is that the four-power pact is no guaranty of the peaceful settlement of international disputes, even between the four powers involved, and that the United States surrenders its freedom of action in other important ways to such an extent that the advantages of consultation may be outweighed. Had the four-power pact provided for arbitration of disputes between the signatories, a method of peaceful settlement might have been provided, but it specifically leaves the settlement to force if disagreement results from the consultation. The pact, as a peace preserver, was further seriously weakened by the rejection of Senator ROBINSON'S really constructive amendment, which provided that any outside power—such, for instance, as Russia and Germany—which became engaged in a controversy between any one or more of the signatories, should be invited to the conference.

The four-power pact is an alliance. It is the very kind of entangling alliance that Washington reprehended; the very kind of an alliance which, throughout all human history, has been the fruitful cause of wars between nations. It is the very kind of an alliance which America thought she had made forever impossible when we defeated Germany and her allies during the World War. That it is such an alliance is conclusively shown by the fact that it binds the United States to act with a limited group of powers from which other powers interested in the same subject matter are excluded. For instance, it excludes Russia and Germany, each of which has important interests in the Pacific. This alliance has already provoked the inevitable counteralliance, that recently consummated at Genoa between Germany and Russia. That these powers will challenge our alliance when their national interests demand it is beyond reasonable doubt. What else could we expect Germany and Russia to do but come together when our policy and that of the other nations of the world have forced them into a position where, for mutual protection, no other course was open to them? Self-preservation among nations, as among individuals, is the first law of nature.

The peace of the world and restoration of order are of transcendent importance. To say that war can not be destroyed is to say that civilization can not be saved. War can be destroyed if the nations of the world, in good faith, organize to destroy it. The United States can take the lead and do this noble thing for mankind. The League of Nations having been defeated, the responsibility rests upon the Republican Party of providing some other effective means of securing the great boon of peace. Republican leadership is confronted with the alternative of standing on the ineffectual four-power pact and doing nothing more to preserve the peace of the world or of calling, in good faith, a meeting of the nations for the purpose of organizing some association or society of nations for the preservation of world peace. Our security as well as the restoration of the stable economic conditions which make for permanent prosperity depend upon the wisdom with which the administration meets this situation.

When we contemplate the flabby and timid diplomacy of the administration we wish for the inspiring days of "shirt-sleeve diplomacy," which made America distinctive and respected everywhere. "Shirt-sleeve diplomacy" meant that we were not afraid to take our place in the councils of the world, to define and assert American opinion and American rights, to vigorously present America's case in the style of diplomacy which the rolled up shirt sleeve implies. Instead of this heartening picture, we now have the spectacle of our ambassadors and representatives slinking about the courts of Europe, using the back stairs of international assemblages, sitting in the galleries of world conferences, looking on, spying about, observing, but accepting no responsibility. The administration has abandoned "shirt-sleeve diplomacy" for "shirt-tail diplomacy," because our envoys now sit meekly on their shirt tails and take no manly part instead of representing America with the vigor and directness which distinguished our diplomacy in more honorable days. No wonder we have gained the contempt and distrust of all the world.

As the fit mate to the Republican policy of political isolation, Republican leaders are now trying to effect our economic isolation by jamming through the Senate the most iniquitous and indefensible tariff bill ever presented to the American people. With a reckless disregard of the great economic forces which should be permitted to operate, if our own prosperity is to be restored and preserved, these leaders have determined to destroy our foreign markets and to confine American trade and intercourse within the boundaries of the United States. Nothing will do this so effectively as the pending tariff bill. That the farmers, the laboring men, and all classes of our people will pay a heavy price for this stupid policy is certain. The farmer will find inadequate markets for his products, the workingman will find insufficient employment for his labor, business men will find trade restricted and profits reduced, and all of the people, the great consuming public, will find the cost of living increased, whereas the only beneficiaries of this extraordinary piece of economic ineptitude will be the greedy monopolists and selfish interests, which will be given the

power by this bill to collect taxes in disguised form from the American people for their private benefit. The power of taxation should never be exercised by the Government except for the benefit of the Public Treasury, but under this bill the Government transfers its right of taxation to selfish interests and monopolists. It is the frankly declared purpose of the Republican leaders, as stated in the debates in Congress, to prevent, as far as possible, any foreign trade, and to confine American commercial activities to the boundaries of the United States. This bill can not help the farmer, because it will narrow the market for his products with resulting loss in values; and even where he is able to break through the tariff barriers and sell his products in foreign markets, he must meet the competition of Argentina, Canada, Australia, and other agricultural countries against which he can have no protection, whereas on every article he uses he must pay the increased prices which this new tariff bill will certainly impose. The consuming public will be forced to submit to heavier exactions than ever before from greedy profiteers and tariff barons.

And here we may draw a fundamental distinction between the Republican Party and the Democratic Party. The Republican Party is the tool of special privilege—trusts and monopolies and big business. The Democratic Party is the foe of special privilege—the foe of the trusts and greedy monopolists who are forever seeking, through control of the Government, legislation that gives them an advantage over the rest of the people.

What a curious idea it is that we can produce prosperity by imposing higher taxes on everybody and making every necessary of life more costly. That is exactly what this tariff bill will do. It puts a tax on the mouth of every baby and every adult in the land, and in like manner it puts a tax upon the body of every citizen—man, woman, and child—who wears clothes or consumes commodities. The taxes are on consumption, and nothing escapes. These taxes are skillfully concealed in the prices of the commodities, and go not into the Public Treasury for the benfit of the people but into the capacious pockets of the entrenched interests. It is impossible for the consumer to know how much he is paying in the form of concealed taxes. It is a part of the game to prevent him from knowing how much tribute he is paying for the enrichment of some already overrich but conscienceless protected-tariff baron; and when these barons get new fortunes by this illegitimate use of government they are made stronger to buy elections, to put their tools in control of the Government, and to make new raids of rapacity on a hoodwinked people.

A worse time than now for passing a tariff bill, so far as the interests of the people are concerned, could not be selected. The uncertain economic state of the world, the rapid fluctuations in exchange, and the generally unsettled conditions everywhere, make the enactment of a tariff law a wild revel of guesswork, so far as the consumer is concerned. The imposition of excessive duties on our imports is designed to destroy our import trade. If we destroy our import trade we destroy our export trade except as to those things which Europe can not buy elsewhere. That will reduce our export trade to very small proportions, and it is our farmers who will suffer most, because in normal times approximately 50 per cent of all of our exports is represented by the products of agriculture. This will reduce the farmer's buying power, and when he can not buy business suffers, factories shut down, labor is thrown out of employment, and general depression seizes the country. When labor is thrown out of employment or forced to accept less than a living wage, its buying power, like that of the farmer, is reduced; and when the farmer and the laborer are unprosperous the country is unprosperous. We never have real prosperity except when the farmer is able to sell his products at a profit and labor is employed at good wages. The margin between prosperity and depression is represented by a profitable foreign trade. It has been well said that the margin between prosperity and depression is not more than 15 to 20 per cent. It is frequently the pressure of that 15 to 20 per cent of surplus products that brings prices below the cost of production, causing great losses, whereas the absorption of that surplus at good prices establishes the value of the whole and brings prosperity to the country.

I am not so dogmatic about the tariff that I would not be willing to admit that economic conditions might arise where reasonable protection to certain home products may be justined, but in all such cases the schedule in the bill should be written upon the findings of an impartial tariff commission and not by the beneficiary himself. The creation of a nonpartisan Tariff Commission composed of the ablest economists in the country was one of the achievements of the Wilson administration, and the purpose was to secure through the investigations of that commission accurate information upon which just and scientific tariff laws could from time to time be enacted. Nothing could be fairer to those seeking protection and to the great consuming public, which must foot the bill, than a well-functioning, impartial, and nonpartisan tariff commission. Public opinion must be educated to the necessity of having our tariff bills based upon the reports and findings of this Tariff Commission. It has been thrown into the scrap heap by the Republican majority and the tariff beneficiaries have been permitted to write their own bill.

This tariff bill contains a provision which is so revolutionary and extraordinary, so pregnant with evil, that it is a new menance to the integrity and purity of our form of government. It gives the President the power, solely in his discretion, to raise rates 50 per cent, to change classifications and to embargo importations into this country. That such a law is wholly unconstitutional, I have no doubt, but until the courts so declare it will be the law of the land. It may take years before the Supreme Court can pass on this question. Meanwhile we shall have a congressional election in 1922 and a presidential election in 1924.

I do not wish to be understood as doubting the President's integrity, because I do not; but such power in his hands or in any President's hands is unwise and dangerous. That power if used for partisan ends could control elections and determine the destiny of the Nation. It is a vastly greater power than that possessed by the Congress because, under the Constitution a majority of both houses and the approval of the President are required before a change of duties or classifications can be made or an embargo can be laid. But under this bill the President alone is granted these powers—powers greater and more despotic than any autocrat of modern times has ever possessed—except the late Czar of Russia, where corruption in government, from the dispensation of tariff benefits, was one of the gravest scandals and abuses of that unhappy régime.

No matter how well meaning and honest a President may be, he can be imposed upon by selfish and designing men in the exercise of the wide discretion the proposed bill gives him. Classifications are so technical that the difference between great bounties and no bounties hangs sometimes on a word, or a punctuation mark, or a skillful phrase, and it is the predatory and selfish beneficiary who knows where to put that word or to place that punctuation mark or to phrase the skillful sentence that will give him wealth and advantage. A President, unversed in these technicalities, or careless, or unalert, or swayed unconsciously by partisan influence, may easily be imposed upon to the grave injury of the people. This law if passed makes the President a czar. It subverts our Constitution and alters our form of government, because it transfers legislative powers to the executive. It is one of the most audacious and sinister proposals yet brought forward by the predatory interests and their subservient tools.

The possession of the proposed power and discretion by the President will keep business in a state of constant uncertainty and apprehension. None of those engaged in foreign trade will be able to enter into contracts with the assurance that they can be performed. The President can at any time place an embargo on imports, or he can raise duties, or he can change classifications to the grave injury of business. Through these powers the President can put into effect the discredited and despised and unsound American valuation plan which has aroused strong opposition among business men all over the country. These things will revolutionize business as well as our customs laws. A long line of court decisions which have come down through the century establishing the principles of customs law and appraisals and forming a definite basis for the interpretation of an infinite number of scientific and technical questions of the greatest importance to trade and industry will be thrown out of gear. Business will be thrown into a state of confusion for years while awaiting decisions of the courts and claims running into millions of dollars will have to be paid by the Treasury if the courts fail to sustain the law.

What a preposterous idea this tariff bill is! Its frankly declared purpose is to destroy or restrict our foreign trade. If we destroy it, or reduce it to small proportions, what possible use is there for an American merchant marine? There will be no ocean-going trade for it to carry, and yet our "best mind" Republican leaders are gravely proposing a ship subsidy bill which will take $40,000,000 or more each year out of the already over-raided pockets of the American people to keep the American flag on the high seas! Why spend this great sum to float our flag around on ships which have no commerce to carry. It would be far more sensible to keep the flag at home along with

our goods which the new tariff bill will prevent us from shipping than to waste $40,000,000 per annum of the taxpayers' money to float it at sea on empty bottoms.

Internal taxation, like the tariff bill, is another thing that seriously affects our prosperity. The Republican platform of 1920 promised that the tax laws put upon the statute books for both war and peace purposes would be quickly repealed and a beneficent tax law, that would make everybody happy, would be put in its place. The platform said:

> But sound policy equally demands the early accomplishment of that real reduction of the tax burden, which may be achieved by substituting simple for complex laws and procedure; prompt and certain determination of the tax liability for delay and uncertainty; tax laws which do not, for tax laws which do, excessively mulct the consumer or needlessly repress enterprise and thrift.

The Republican House and Senate has been in almost continuous session at Washington since March 4, 1921, and it was not until late in that year that the Congress, laboring like the proverbial mountain, brought forth one of the most diminutive of mice in the shape of what the Republicans themselves have admitted is a fizzle and a failure as a revenue measure. It did not reduce the tax burden. Everybody is still suffering because of it. It did not substitute "simple" for "complex" tax laws and procedure. It made them more complex and difficult. It did not provide prompt and certain determination of the tax liability for delay and uncertainty. It aggravated the delays and uncertainties. The Republican "best minds" did not give us tax laws as promised which do not excessively mulct the consumer or needlessly repress enterprise and thrift. They gave us tax laws that do.

The late Senator Penrose, chairman of the Finance Committee which reported the bill, characterized it as a "temporary measure, which does not place the tax system on a suitable or scientific basis." Senator SMOOT, Republican, said it would be "condemned by the American people." The newspapers of the country denounced it, almost without exception, as a poor piece of legislation. The New York Globe, a Republican organ, said, "It is not satisfactory, even to the men who voted for it." The Journal of Commerce, organ of business, said:

> The pity of the whole situation is that, instead of giving relief to the average man, as it was expected, no doubt, by politicians that the new plan would do, the bill as drafted will hurt him. * * * Altogether it will be a sorry day for the employed man who depends upon his labor when this bill takes effect. His soi-disant friends have stabbed him in a vital spot while pretending, and perhaps really thinking, that they were helping him.

And it is a temporary measure, so they tell us, and admittedly inadequate and full of faults. The Republicans were able, after seven months of effort, in times of perfect peace, and with all the "best minds" of which they boast, to pass only a temporary measure which gives no satisfaction whatever to anybody; they promise a permanent bill later.

One of the most iniquitous features of this tax measure is that it throws into the courts a great number of new questions which must be decided before the taxpayer can know what the law really means, and it imposes upon the Treasury Department a vast number of new and complex regulations which must also stand the fire of court contests, and involves the department in an infinite amount of new and tedious administrative work which adds to the uncertainties of business transactions and keeps the taxpayer in doubt for many years as to where he stands with respect to his tax liability. The same things will be repeated when the Republicans give us the permanent tax bill they have promised.

This tax bill does, however, reduce the taxes of one class; for instance, it reduces the maximum surtax rates on very large incomes from 65 per cent to 50 per cent. President Harding and the Republican House of Representatives favored reducing the taxes on these very large incomes from 65 per cent to 32 per cent, but the violent outcry from the country at this palpable favoritism to the plutocrats forced the Senate, temporarily and reluctantly, to put the tax at 50 per cent, thus reducing the surtaxes on large incomes 15 per cent, but leaving the surtaxes on small and moderate incomes without relief. Those unfortunate taxpayers whose incomes are only $1,000,000 to $50,000,000 per annum were presented with a reduction of 15 per cent. They had to have a wider margin for contributions to the Republican war chest. But taxpayers with small and moderate incomes received little or no reduction. The Republican doctrine is to give to those who have and take everything possible from those who have not.

The administration's foreign policy—noncooperation; its tariff bill, designed to destroy or make negligible our foreign trade and raise the cost of living; its internal-revenue tax bill, which lifted no burdens from the backs of the people and favored only the wealthy classes, who needed no relief, show clearly that the administration has no sympathy with the needs of the masses of the people and has no sound conception of the vast political and economic problems which face this Nation and the world. Those policies, if maintained, can not bring permanent prosperity to the American people. The heavy speculations in the New York stock market and the slight symptoms of improved business conditions in some trades and in some localities must not be accepted as the certain indications of settled conditions or of returning prosperity. We can not expect permanent prosperity until we have entered upon an enlightened policy of international cooperation with other nations to preserve the peace of the world; until we, by wise action, secure our share of foreign markets; and until we reduce taxes upon business and upon the masses of the American people to the point where their savings will not be appropriated by the Government but left in their hands for the development of enterprise and industry.

The Democratic policy seeks international cooperation to destroy war and to permanently secure peace throughout the world; to preserve and enlarge our foreign markets, so that the farmer and the laboring man and the great masses of our people may get the largest rewards for their thrift and industry; to reduce taxes and redistribute them so that the rich shall not be favored at the expense of the poor, but that the rich and the poor shall bear their just shares of the burdens of government in proportion to their ability to pay. The Democratic Party must stand firmly for these policies. It must continue to be the party of liberalism and of progress. It must continue to be the defender of the rights of the people against the assaults of special privilege. It must never cease to fight for social justice and for equal opportunity for all.

EXTENSION OF CHARTERS OF NATIONAL BANKS.

Mr. KING. I am advised that yesterday during my absence House bill 9527 was passed, extending the charters of national banks for 99 years. I had opposed that bill and regret very much that it was brought up in my absence. I wish to enter a motion to reconsider.

Mr. ROBINSON. I desire to inquire whether the Senator has ascertained that the bill is still in possession of the Senate, or has it gone to the House?

The PRESIDENT pro tempore. The Chair is informed that the bill has gone to the House.

Mr. ROBINSON. I suggest that the Senator accompany his motion to reconsider with a motion to request the House of Representatives to return the bill to the Senate.

Mr. KING. I thank the Senator. I move that the House be requested to return the bill to the Senate.

The PRESIDENT pro tempore. Without objection, it will be so ordered, and the motion to reconsider will be entered.

LETTER FROM DAVID LAWRENCE.

Mr. CARAWAY. Mr. President, I ask unanimous consent to insert in the RECORD a letter from a gentleman who says I was mistaken about a fact, and I want to do him the courtesy of putting it in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

520 EVENING STAR BUILDING,
Washington, D. C., June 2, 1922.

DEAR SENATOR CARAWAY: I noticed in the CONGRESSIONAL RECORD this morning an extended comment by you on a story I wrote on Wednesday, May 31, about the Daugherty case. You were under the impression that this story was inspired by the Attorney General himself. This is not so. I have not talked with the Attorney General in several weeks and have never discussed the Morse case with him.

I do not mind telling you that the source of the story was as stated in the article, namely, "friends of Mr. Daugherty," who, I have reason to believe, are familiar with his side of the question. Let me add also that there was no effort on the part of Mr. Daugherty's friends to draw these matters to my attention, but that, following my usual course in controversial matters, I voluntarily sought the views of those who would know the Daugherty side. So the story was not inspired in any sense, but it was the natural result of a reporter's effort to get at both sides of a moot question.

I thank you for your statement in the RECORD that you were confident I was trying to be fair in this matter.

Sincerely yours,

DAVID LAWRENCE.

Senator T. H. CARAWAY,
The Capitol, Washington, D. C.

VIEWS OF SENATOR CULBERSON.

Mr. KING. Mr. President, I ask unanimous consent to have printed in the RECORD in 8-point type a letter by the senior Senator from Texas [Mr. CULBERSON] to Major Fisher in respect to the Ku-Klux organization, and what, if any, legislation is required with respect to it; also, another letter, which has to do with the attitude of the Senator from Texas upon the Cummins-Esch bill. It is very brief.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

UNITED STATES SENATE,
Washington, D. C., March 30, 1922.

Major H. V. FISHER,
Commercial Bank Building, Houston, Texas.

DEAR MAJOR: Your recent letter asking my position with reference to the order known as the Ku Klux Klan which is now in operation in our State was duly received and I answer at the earliest opportunity.

I have no affiliation directly or indirectly with this organization and I am unqualifiedly opposed to its operations. If not curbed, it will usurp the functions of the State and be destructive of government itself. It will indeed overthrow our Anglo-Saxon civilization in its relation to government.

Steps should be taken, therefore, at once to arrest its progress and finally to destroy it.

Appeal can not be made to the Federal Government for this purpose for it is without jurisdiction unless application is made by Texas to the United States in the manner provided by the Constitution for protection against domestic violence, and this is unthinkable.

Fortunately, however, the power of the State is ample, and if no law now exists adequate to the occasion the Legislature may be called in extra session to supply this deficiency.

Truly your friend,
C. A. CULBERSON.

—

UNITED STATES SENATE,
Washington, D. C., May 22, 1922.

Hon. ALLISON MAYFIELD, *Chairman,*
Hon. CLARENCE E. GILMORE, *Commissioner,*
Railroad Commission of Texas, Austin, Texas.

GENTLEMEN: Replying at the earliest opportunity to your recent letter regarding the Transportation Act of 1920, known as the Esch-Cummins law, I beg to say that, as you know, I voted against this legislation when it passed the Senate originally and will be very glad to support the bill to which you refer to repeal it in its entirety.

I was one of the early advocates of the establishment of a State railroad commission in Texas and have always vigorously defended the right of the State to control the rates on shipments which are wholly within its boundaries.

Very sincerely yours,
C. A. CULBERSON.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. Overhue, its enrolling clerk, announced that the House disagreed to the amendments of the Senate to the bill (H. R. 9527) to amend section 5136, Revised Statutes of the United States, relating to corporate powers of associations, so as to provide succession thereof until dissolved, and to apply said section as so amended to all national banking associations, requested a conference with the Senate on the disagreeing votes of the two Houses thereon, and that Mr. MCFADDEN, Mr. DALE, and Mr. WINGO were appointed managers on the part of the House at the conference.

The message also announced that the House had passed the following bills and a joint resolution, in which it requested the concurrence of the Senate:

H. R. 7299. An act to incorporate the Women's Overseas Service League;

H. R. 10159. An act to further protect interstate and foreign commerce against bribery and other corrupt trade practices;

H. R. 10768. An act to amend an act entitled "An act to punish the unlawful breaking of seals of railroad cars containing interstate or foreign shipments, the unlawful entering of such cars, the stealing of freight and express packages or baggage or articles in process of transportation in interstate shipment, and the felonious asportation of such freight or express packages or baggage or articles therefrom into another district of the United States, and the felonious possession or reception of the same," approved February 13, 1913 (37 Stats., p. 670); and

H. J. Res. 337. Joint resolution granting consent of Congress and authority to the Port of New York Authority to execute the comprehensive plan approved by the States of New York and New Jersey by chapter 43, Laws of New York, 1922, and chapter 9, Laws of New Jersey, 1922.

The message further announced that the House had agreed to a concurrent resolution (H. Con. Res. 53) to create a joint committee of the Senate and House of Representatives to determine what employment can be furnished Federal prisoners, and for other purposes, in which it requested the concurrence of the Senate.

ENROLLED BILLS SIGNED.

The message also announced that the Speaker of the House had signed the following enrolled bills, and they were subsequently signed by the Vice President:

S. 745. An act to amend section 24 and section 256 of the Judicial Code;

H. R. 241. An act to authorize the Secretary of War to grant a perpetual easement for railroad right of way and a right of way for a public highway over and upon a portion of the military reservation of Fort Sheridan, in the State of Illinois;

H. R. 10925. An act to authorize the Secretary of War to sell real property known as the Pittsburgh Storage Supply Depot, at Pittsburgh, Pa.;

H. R. 11408. An act granting the consent of Congress to the county of Winnebago and the town of Rockton, in said county, in the State of Illinois, to construct, maintain, and operate a bridge and approaches thereto across the Rock River, in said town of Rockton; and

H. R. 11409. An act granting the consent of Congress to the city of Ottawa and the county of La Salle, in the State of Illinois, to construct, maintain, and operate a bridge and approaches thereto across the Fox River.

HOUSE BILLS AND JOINT RESOLUTION REFERRED.

The following bills and joint resolution were severally read twice by title and referred as indicated below:

H. R. 10159. An act to further protect interstate and foreign commerce against bribery and other corrupt trade practices; and

H. R. 10768. An act to amend an act entitled "An act to punish the unlawful breaking of seals of railroad cars containing interstate or foreign shipments, the unlawful entering of such cars, the stealing of freight and express packages or baggage or articles in process of transportation in interstate shipment, and the felonious asportation of such freight or express packages or baggage or articles therefrom into another district of the United States, and the felonious possession or reception of the same," approved February 13, 1913 (37 Stat. p. 670); to the Committee on Interstate Commerce.

H. R. 7299. An act to incorporate the Women's Overseas Service League; and

H. J. Res. 337. Joint resolution granting consent of Congress and authority to the Port of New York Authority to execute the comprehensive plan approved by the States of New York and New Jersey by chapter 43, Laws of New York, 1922, and chapter 9, Laws of New Jersey, 1922; to the Committee on the Judiciary.

EMPLOYMENT OF FEDERAL PRISONERS.

The concurrent resolution (H. Con. Res. 53) to create a joint committee of the Senate and House of Representatives to determine what employment can be furnished Federal prisoners, and for other purposes, was referred to the Committee on the Judiciary.

WAR DEPARTMENT APPROPRIATIONS.

The Senate, as in Committee of the Whole, proceeded to the consideration of the bill (H. R. 10871) making appropriations for the military and nonmilitary activities of the War Department for the fiscal year ending June 30, 1923, and for other purposes, which had been reported from the Committee on Appropriations with amendments.

Mr. WADSWORTH. I ask that the formal reading of the bill be dispensed with and that it be read for amendment, the amendments of the committee to be first considered.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered.

Mr. WADSWORTH. Mr. President, as preliminary to the reading of the bill, I desire to present a comparative statement of the appropriations for the Army as recommended by the Budget, as contained in the bill as passed by the House, as reported to the Senate, and of last year's appropriation for similar purposes. I ask that it may be printed in the RECORD at this point.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The statement referred to is as follows:

Amount of bill as passed House	$287,897,731.67
Amount added by Senate (net)	45,985,120.00
Amount of bill as reported to Senate	333,882,851.67
Amount of estimates for 1923 (includes $15,180,401 added in House for rivers and harbors and not officially estimated)	374,541,318.47
Amount of appropriations, 1922	386,824,212.41
The bill as reported to the Senate is—	
Under the estimates for 1923	40,658,466.80
Under the appropriations for 1922	52,941,360.74

The President pro tempore. The Secretary will proceed to read the bill.

The reading clerk proceeded to read the bill.

The first amendment of the Committee on Appropriations was, on page 1, line 6, after the figures "1923," to insert "and for other purposes," so as to make the first clause of the bill read:

That the following sums are appropriated, out of any money in the Treasury not otherwise appropriated, for the military and nonmilitary activities of the War Department for the fiscal year ending June 30, 1923, and for other purposes.

The amendment was agreed to.

The next amendment was, under the head "Title I—Military activities and other expenses of the War Department incident thereto, Office of Secretary of War," on page 2, line 20, after the word "each," to strike out "7" and to insert "6"; in line 21, before the word "assistant," to strike out "5" and to insert "4"; and in page 3, line 2, after the words "in all," to strike out "$208,640" and to insert "$207,080," so as to make the paragraph read:

Salaries: Secretary of War, $12,000; Assistant Secretary, $10,000; Assistant and Chief Clerk, who shall sign such official papers and documents as the Secretary may direct, $4,000; private secretary to the Secretary, $2,500; clerk to the Secretary, $2,000; stenographer to the Secretary, $2,000; clerk to the Assistant Secretary, $2,400; assistant chief clerk, $2,400; disbursing clerk, $2,750; principal clerks—1 $2,500, 1 $2,250, 1 $2,000; chiefs of divisions—2 at $2,500 each, 2 at $2,200 each, 1 $2,000; deputy disbursing clerk, $2,000; chief telegrapher, $1,800; clerks—10 of class 4, 10 of class 3, 2 at $1,500 each, 19 of class 2, 2 at $1,300 each, 27 of class 1, 1 $1,100, 5 at $1,000 each; foreman, $1,400; carpenter, $1,200; engineer, $1,200; assistant engineer, $720; skilled laborer, $1,080; chief messenger, $1,000; messengers—2 at $1,000 each, 6 at $840 each; 4 assistant messengers at $720 each; telephone supervisor, $1,020; 13 telephone switchboard operators at $840 each; 5 laborers at $660 each; chauffeurs—1 $1,000, 2 at $840 each; skilled laborer, $900; 6 watchmen at $720 each; messenger boy, $480; charwoman, $240; in all, $207,080.

The amendment was agreed to.

The next amendment was, under the subhead "Contingencies of the Army," on page 4, line 19, before the word "authority," to strike out "and" and insert "or," so as to read:

For all contingent expenses of the Army not otherwise provided for and embracing all branches of the military service, including the office of the Chief of Staff; for all emergencies and extraordinary expenses, including the employment of translators and exclusive of all other personal services in the War Department or any of its subordinate bureaus or offices at Washington, D. C., or in the Army at large, but impossible to be anticipated or classified; to be expended on the approval or authority of the Secretary of War, and for such purposes as he may deem proper, including the payment of a per diem allowance not to exceed $4, in lieu of subsistence, to employees of the War Department traveling on official business outside of the District of Columbia and away from their designated posts, $95,000.

The amendment was agreed to.

The next amendment was, under the subhead "General Staff Corps. Contingencies, Military Intelligence Division," on page 6, line 15, after the word "information," to strike out "$100,000" and to insert "$225,000," so as to read:

For contingent expenses of the Military Intelligence Division, General Staff Corps, including the purchase of law books, professional books of reference; subscriptions to newspapers and periodicals; drafting, clerical, and messenger services in the Military Intelligence Division in Washington, D. C.; and of the military attachés at the United States embassies and legations abroad and rental of offices for such military attachés; the cost of special instruction at home and abroad, and in maintenance of students and attachés; for the hire of interpreters, special agents, and guides, and for such other purposes as the Secretary of War may deem proper, including $10,000 for the actual and necessary expenses of officers of the Army on duty abroad for the purpose of observing operations of armies of foreign States at war, to be paid upon certificates of the Secretary of War that the expenditures were necessary for obtaining military information, $225,000; to be expended under the direction of the Secretary of War.

The amendment was agreed to.

The next amendment was, on page 6, line 23, before the words "at $1,400 each," to strike out "18" and to insert "20"; in the same line, before the words "at $1,200 each," to strike out "20" and to insert "21"; in line 25, before the words "at $840 each," to strike out "3" and to insert "2"; in the same line, before the words "at $720 each," to strike out "9" and to insert "6"; and in line 26, after the words "in all," to strike out "$119,470" and to insert "$120,470," so as to make the paragraph read:

Clerks, messengers, and laborers, office of the Chief of Staff: Chief clerk, $2,500; clerks—1 $2,250, 4 at $2,000 each, 6 at $1,800 each, 10 at $1,600 each, 20 at $1,400 each, 21 at $1,200 each, 20 at $1,000 each; chief messenger, $1,000; messengers—2 at $840 each, 6 at $720 each; laborer, $720; in all, $120,470.

Mr. NORRIS. Mr. President, I should like the attention of the Senator from New York for a moment. I am not disposed to make objection to any of the amendments now being considered, but it has occurred to me that later on in the consideration of the bill there will be amendments which will be debated with a view to changing them. For instance, I have in mind the provisions in regard to the size of the Army. It has occurred to me that possibly the number of clerks might depend to some extent upon the size of the Army. Can we have an understanding that when we come to the consideration of the question of the size of the Army, if the committee amendment is rejected or modified, and it becomes necessary to modify any of the other amendments, there will be no objection to their reconsideration?

Mr. WADSWORTH. There will be no objection to their reconsideration. I may say to the Senate, however, that I think I can say with absolute accuracy that the number of clerks and messengers has been so severely slashed that proportionately they are far below the number which would ordinarily have been employed for an Army of 150,000 men or even for an Army of 133,000 men, which this bill provides for.

Mr. NORRIS. From the slight examination I have been able to make of the bill I think the Senator is absolutely right in that respect; but some Senators who expect to take an active part in the debate on the question of the size of the Army are not in the Chamber at the present time, and I assume, of course, that if there should be any change in the provisions respecting the size of the Army the Senator from New York would not object to reconsidering such amendments as it may be necessary to reconsider.

The PRESIDENT pro tempore. The question is on agreeing to the amendment last stated.

The amendment was agreed to.

The reading of the bill was resumed. The next amendment of the Committee on Appropriations was, under the subhead, "General service schools, Fort Leavenworth, Kans.," on page 8, line 17, before the word "services," to strike out "or special," and to insert "special and clerical," so as to make the paragraph read:

For the purchase of textbooks, books of reference, scientific and professional papers, instruments, and material for instruction; employment of temporary, technical, special and clerical services, including the services of one translator at the rate of $150 per month; and for other necessary expenses of instruction, at the School of the Line and the General Staff School, Fort Leavenworth, Kans., $35,000.

The amendment was agreed to.

The next amendment was, under the subhead "Military post exchanges," on page 9, line 8, after the word "established," to strike out "$75,000," and to insert "$200,000," so as to read:

For continuing the construction, equipment, and maintenance of suitable buildings at military posts and stations, for the conduct of the post exchange, school, library, reading, lunch, amusement rooms; for the conduct and maintenance of hostess houses, chapels, and gymnasiums, including repairs to buildings erected at private cost, in the operation of the act approved May 31, 1902; for the rental of films, purchase of slides, supplies for and making repairs to moving-picture outfits, and for similar and other recreational purposes at training and mobilization camps now established, or which may be hereafter established, $200,000.

The amendment was agreed to.

The next amendment was, on page 9, line 9, after the word "exceed," to strike out "$15,000" and to insert "$60,000," and in line 11, after the word "exceed," to strike out "$35,000" and to insert "$90,000," so as to make the proviso read:

Provided, That not to exceed $60,000 from this appropriation may be expended for the conduct and maintenance of libraries and not to exceed $90,000 may be expended for the conduct and maintenance of hostess houses.

The amendment was agreed to.

The next amendment was, under the subhead "Quartermaster supplies, equipment, etc., Reserve Officers' Training Corps," on page 10, at the end of line 24, to strike out "$2,750,000" and to insert "$3,600,000," so as to read:

For the procurement and issue, under such regulations as may be prescribed by the Secretary of War, to institutions at which one or more units of the Reserve Officers' Training Corps are maintained, of such public animals, means of transportation, supplies, tentage, equipment, and uniforms as he may deem necessary, and to forage at the expense of the United States public animals so issued, and to pay commutation in lieu of uniforms at a rate to be fixed annually by the Secretary of War; for transporting said animals and other authorized supplies and equipment from place of issue to the several institutions and training camps and return of same to place of issue when necessary; for the establishment and maintenance of camps for the further practical instruction of the members of the Reserve Officers' Training Corps, and for transporting members of such corps to and from such camps, and to subsist them while traveling to and from such camps and while remaining therein so far as appropriations will permit; or in lieu of transporting them to and from such camps and subsisting them while en route, to pay them travel allowance at the rate of 5 cents per mile for the distance by the shortest usually traveled route from the places from which they are authorized to proceed to the camp and for the return travel thereto, and to pay the return travel pay in advance of the actual performance of the travel; for pay for students attending advanced camps at the rate prescribed for soldiers of the seventh grade of the Regular Army; for the payment of commutation of subsistence to members of the senior division of the Reserve Officers' Training Corps, at a rate not exceeding the cost of the garrison ration prescribed for the Army, as authorized in the act approved June 3, 1916, as amended by the act approved June 4, 1920, $3,600,000, to remain available until December 31, 1923.

The amendment was agreed to.

The next amendment was, under the subhead "Military supplies and equipment for schools and colleges," on page 12, at the end of line 12, to strike out "$804" and to insert "$500," so as to read:

For the procurement and issue as provided in section 55–c of the act approved June 4, 1920, and in section 1225, Revised Statutes, as amended, under such regulations as may be prescribed by the Secretary of War, to schools and colleges, other than those provided for in section 40 of the act above referred to, of such arms, tentage, and equipment, including the transporting of same, and the overhauling and repair of personal equipments, machine-gun outfits, and horse equipments, as the Secretary of War shall deem necessay for proper military training in said schools and colleges, $500.

The amendment was agreed to.

The next amendment was, under the subhead "Civilian military training camps," on page 12, line 24, after the words "section 47–d" to insert "; for such expenditures as are authorized by said section 47–d as may be necessary for the establishment and maintenance of said camps," so as to read:

For furnishing, at the expense of the United States, to warrant officers, enlisted men, and civilians attending training camps maintained under the provisions of section 47–d of the national defense act of June 3, 1916, as amended by the act of June 4, 1920, uniforms, including altering, fitting, washing, and cleaning when necessary, subsistence, and transportation, or in lieu of such transportation and of subsistence for travel to and from camps, travel allowances at 5 cents per mile, as prescribed in said section 47–d; for such expenditures as are authorized by said section 47–d as may be necessary for the establishment and maintenance of said camps, $1,800,000.

The amendment was agreed to.

The next amendment was, on page 13, line 2, after "$1,800,000," to insert: "and no other funds appropriated in this act shall be available for the purposes of this paragraph."

The amendment was agreed to.

The next amendment was, on page 13, line 5, after the word "over," to strike out "35" and to insert "27," and on line 6, after the word "age," to insert "except those who received training within the fiscal year 1922 and except veterans of the war with Germany, who may be accepted if not over 30 years of age," so as to make the proviso read:

Provided, That the funds herein appropriated shall not be used for the training of any person who is over 27 years of age except those who received training within the fiscal year 1922 and except veterans of the war with Germany who may be accepted if not over 30 years of age.

The amendment was agreed to.

The next amendment was, under the subhead "Adjutant General's Office," on page 14, line 5, before the word "messengers," to strike out "21" and to insert "18"; at the end of the same line, to strike out "43" and to insert "35"; and at the beginning of line 10, to strike out "$1,156,770" and to insert "$1,148,490," so as to make the paragraph read:

Salaries: Chief clerk, $2,750; assistant chief clerk, $2,400; 5 chiefs of divisions at $2,400 each; 12 principal clerks at $2,000 each; clerks—89 of class 4, 90 of class 3, 154 of class 2, 388 of class 1, 48 at $1,000 each; engineer, $1,400; firemen—one $1,000, one $720; skilled mechanic, $1,200; typewriter repairer, $1,100; 18 messengers at $840 each; 35 assistant messengers at $720 each; 4 watchmen at $720 each; 5 skilled laborers at $840 each; 20 laborers at $660 each; 11 messenger boys at $480 each; 11 charwomen at $240 each; in all, $1,148,490; all employees provided for by this paragraph for The Adjutant General's Office of the War Department shall be exclusively engaged on the work of this office for the fiscal year 1923.

The amendment was agreed to.

The next amendment was, on page 14, line 15, after the word "States," to insert "and the District of Columbia"; in line 17, after the word "States," to insert "and the District of Columbia"; and in line 20, after the word "Army," to strike out "$202,000" and to insert "$250,000"; so as to make the paragraph read:

For expenses incident to completion of the work of furnishing to adjutants general of States and the District of Columbia statements of service of all persons from those States and the District of Columbia who entered the military service during the war with Germany, including the employment of clerical and other help in the office of The Adjutant General of the Army, $250,000, to be immediately available.

The amendment was agreed to.

The next amendment was, under the subhead "Office of the Inspector General," on page 14, line 23, after the word "clerks," to strike out "one" and to insert "two"; in line 25, after the figures "$840," to strike out "assistant messenger, $720"; and at the end of line 26, to strike out "$18,560" and to insert "$19,640"; so as to make the paragraph read:

Salaries: Chief clerk, $2,000; clerks—2 of class 4, 2 of class 3, 3 of class 2, 4 of class 1, 1 $1,000; messenger, $840; in all, $19,640.

The amendment was agreed to.

The next amendment was, under the subhead "Office of the Judge Advocate General," on page 15, line 4, before the words "of class 2," to strike out "five" and to insert "seven"; in line 5, after the figures "$840," to strike out "three assistant messengers at $720 each" and to insert "assistant messenger, $720"; and at the end of line 7 to strike out "$53,060" and to insert "$54,420"; so as to make the paragraph read:

Salaries: Chief clerk and solicitor, $2,500; patent expert, $3,600; clerks—2 of class 4, 4 of class 3, 7 of class 2, 20 of class 1, 2 at $1,000 each; messenger, $840; assistant messenger, $720; 4 charwomen at $240 each; in all, $54,420.

The amendment was agreed to.

The ASSISTANT SECRETARY. On page 16 it is proposed to strike out lines 10 to 26, both inclusive——

Mr. NORRIS. Mr. President, I desire to ask the Senator from New York if he will not pass over that amendment for the present.

Mr. WADSWORTH. I am perfectly willing to do that, Mr. President. If we pass it over, it will involve passing over from page 15 to the bottom of page 21.

I desire to ask just exactly how much the Senator from Nebraska wants passed over. The items which follow the bottom of page 21 have to do with the size of the Army. The portion to which the Senator has called attention affects only the commissioned officers. The pay of the enlisted men commences on page 24.

Mr. NORRIS. I should like to have the Senator pass over temporarily everything that pertains to the size of the Army.

Mr. ROBINSON. Mr. President, before that is done I want to ask the Senator a question about the pending amendment for information. Is this amendment so worded as to conform to the new Army pay act?

Mr. WADSWORTH. It is.

Mr. ROBINSON. It conforms to it in every particular?

Mr. WADSWORTH. It does.

Mr. ROBINSON. That is all I desired to understand.

The PRESIDENT pro tempore. The amendment beginning on page 15, line 10, will be passed over.

Mr. WADSWORTH. Mr. President, if it is the desire of the Senator from Nebraska to pass over all amendments or portions of the bill which affect directly or indirectly the size of the Army, the commissioned and enlisted strength, it will be necessary to pass over that portion of the bill commencing on line 9, page 15, to and including line 12 on page 28.

The PRESIDENT pro tempore. Does the Senator from New York suggest that all the amendments prior to line 13 on page 28 be passed over?

Mr. WADSWORTH. Yes. That, I understand, is the desire of the Senator from Nebraska, and I consent to that.

Mr. NORRIS. Yes, Mr. President.

The PRESIDENT pro tempore. All the amendments within those limits will be passed over. The Secretary will continue the reading of the bill.

The reading of the bill was resumed.

The next amendment of the Committee on Appropriations was, on page 28, line 15, after the figures "$1,500," to insert a comma and the words "and for each fiscal year hereafter a like amount during her life is permanently appropriated," so as to make the paragraph read:

For amount required to make monthly payments to Jennie Carroll, widow of James Carroll, late major, United States Army, $1,500, and for each fiscal year hereafter a like amount during her life is permanently appropriated.

The amendment was agreed to.

The next amendment was, on page 28, line 19, after the figures "$1,500," to insert a comma and the words "and for each fiscal year hereafter a like amount during her life is permanently appropriated," so as to make the paragraph read:

For amount required to make monthly payments to Mabel H. Lazear, widow of Jesse W. Lazear, late acting assistant surgeon, United States Army, $1,500, and for each fiscal year hereafter a like amount during her life is permanently appropriated.

The amendment was agreed to.

The next amendment was, on page 28, line 25, after the figures "$1,200," to insert a comma and the words "and for each fiscal year hereafter a like amount during his life is permanently appropriated," so as to make the paragraph read:

For the amount required to make monthly payments to John R. Kissinger, late of Company D, One hundred and fifty-seventh Indiana Volunteer Infantry, also late of the Hospital Corps, United States Army, $1,200, and for each fiscal year hereafter a like amount during his life is permanently appropriated.

The amendment was agreed to.

The next amendment was, on page 29, after line 2, to strike out:

For compensation of clerks and other employees of the Finance Department, $1,000,000.

The amendment was agreed to.

The next amendment was, on page 29, after line 4, to insert:

For compensation of clerks and other employees of the Finance Department, $1,617,000: *Provided*, That $500,000 of this amount shall be available only for the compensation and traveling expenses of clerks and other employees engaged on work pertaining to the audit of World War contracts, and of this amount not to exceed $25,000 shall be available for personal services, at salaries not in excess of $3,000 per annum, in the Office of the Chief of Finance, War Department.

Mr. ROBINSON. Mr. President, that amendment appears to carry a very large increase over the House item, the latter appropriating only $1,000,000, whereas the Senate amendment provides for $1,617,000, with certain express limitations upon the use. I inquire of the Senator from New York the occasion for that very large increase in the House item?

Mr. WADSWORTH. Mr. President, this amendment suggested by the committee has to do with an exceedingly important activity in the War Department—an activity which the committee believes will in all probability mean the saving of millions and millions of dollars to the Government.

The Finance Department is charged not only with the keeping of the fiscal accounts of the Army itself and the pay of officers and men, but also with the duty of auditing contracts heretofore entered into, as well as examining and approving fiscal operations upon which the War Department is about to embark.

Since the termination of the World War the finance department of the War Department has been auditing the contracts into which the War Department entered during the war. There are 150,000 of those contracts. With a very limited force of accountants in the finance department, 15,000 of those contracts have been audited, and I may say that these are contracts which have been already in a sense closed. The money has been paid. As a result of the work of the finance department audit, going back over this contract history, there has been recovered from contractors who have sent in their checks voluntarily upon being notified and convinced of errors in the way of overpayment $1,894,000. In addition to that, the finance department has turned over to the Department of Justice audits as the result of which the Department of Justice is in process of collecting from contractors by legal procedure $4,370,000. In addition to that, there is now in process of investigation by this same small auditing force of the finance department a number of contracts; and that investigation up to date, although not complete in every respect and ready to be turned over to the Attorney General, indicates the very clear possibility of recovering $26,645,000 for the Government.

Only 15,000 of these contracts have been audited thus far. There are 135,000 more of them. The Chief of Finance, General Lord—and we heard indirectly, but none the less emphatically, from the Attorney General himself—believes that this work should be expedited. At the present rate of procedure it will take 15 years or more to go over these war-time contracts with this expert audit. The committee, therefore, was thoroughly persuaded that it was the part of wise economy to give them $600,000 over the appropriation made by the House, in order to enable them to go out and cover this field with greater rapidity. They believe that with an appropriation running annually, such as the committee suggests, they can clean up this work in four or five years. If it is allowed to go beyond four or five years' time, it is the general consensus of opinion that the whole thing will get out of the hands of the Government; witnesses will disappear; papers will disappear and be destroyed; it will be impossible to make an effective audit after three or four years have gone by. We believe that this means millions of dollars recovered to the Government.

Mr. ROBINSON. Mr. President, it is undoubtedly both necessary and advisable that the work of auditing these contracts proceed as speedily as may be, with due consideration to accuracy in results. The statement of the Senator from New York has, in my judgment, justified the increase in the appropriation beyond question. The results which are being obtained and the prospective accomplishments which it is hoped will be brought about through this department support very strongly the very large increase in this item. I am curious to know whether the request for this additional amount was submitted to the House committee, and whether it passed upon the question and then refused it.

Mr. WADSWORTH. My impression is that it was not, but I would not say for certain. A supplemental budget estimate of this increase was sent in, according to my recollection. But I desire to have it understood that my recollection is not entirely clear as to whether the House committee considered it.

Mr. ROBINSON. In view of the statement which the Senator from New York has made, I do not think that would be a controlling consideration with me when I vote, anyway. I merely desired as full information respecting the subject as could possibly be obtained within a brief time. I am satisfied that the Senator from New York has fully justified the increase.

Mr. WADSWORTH. It may be permissible for me to say, just to round out the story, that this work is the foundation and the basis for all the work in the way of prosecution which the Department of Justice may carry on.

The PRESIDENT pro tempore. The question is on agreeing to the amendment.

The amendment was agreed to.

The next amendment was, on page 29, line 24, to strike out "$1,100,000" and insert "$1,689,450," so as to make the paragraph read:

MILEAGE OF THE ARMY.

For mileage to commissioned officers, warrant officers, members of the Officers' Reserve Corps when ordered to active duty, contract surgeons, expert accountant, Inspector General's Department, Army field clerks and field clerks of the Quartermaster Corps, when authorized by law, $1,689,450.

The amendment was agreed to.

Mr. WADSWORTH. I am instructed by the Committee on Appropriations to ask unanimous consent to present an amendment to be attached to this paragraph, which, frankly, is in the nature of legislation, but it is a provision which will save the Government a good deal of money.

The PRESIDENT pro tempore. The Secretary will report the amendment.

The READING CLERK. On page 29, line 24, add at the end of the paragraph the following proviso:

Provided, That hereafter the mileage allowance to members of the Officers' Reserve Corps when called into active service for training for 15 days or less shall not exceed 4 cents per mile.

Mr. WADSWORTH. That is contrasted with 8 cents per mile, which is the standing law. The committee believes that for this kind of transportation, for these short trips, for only 15-day periods, 4 cents a mile is ample compensation for the officers thus traveling. Otherwise they would receive 8 cents.

The amendment was agreed to.

The next amendment was, under the subhead "Claims for damages to and loss of private property," on page 30, line 2, after the word "exceed," to strike out "$500" and insert "$1,000," and in line 6 to strike out "$50,000" and insert "$80,000," so as to read.

For payment of claims of not to exceed $1,000 in amount for damages to and loss of private property incident to the training, practice, operation, or maintenance of the Army that have accrued, or may hereafter accrue, from time to time, $80,000.

The amendment was agreed to.

The next amendment was, on page 30, after line 11, to insert:

CLAIMS OF OFFICERS, ENLISTED MEN, AND NURSES OF THE ARMY FOR DESTRUCTION OF PRIVATE PROPERTY.

For the payment of claims of officers, enlisted men, and nurses of the Army for private property lost, destroyed, captured, abandoned, or damaged in the military service of the United States, under the provisions of an act approved March 4, 1921, $50,000.

The amendment was agreed to.

The next amendment was, on page 30, after line 18, to insert:

CLAIMS OF OFFICERS, MEMBERS OF THE NURSE CORPS, AND ENLISTED MEN FOR PAY AND ALLOWANCES, WORLD WAR.

Not exceeding $500,000 of the unexpended amount of the appropriations for pay, etc., of the Army for the fiscal years 1919 and 1920 is hereby made available for payment for the adjustment and settlement of claims of officers, members of the Nurse Corps, and enlisted men for pay and allowances growing out of service in the World War from April 6, 1917, to June 30, 1919, and from July 1, 1919, to June 30, 1920, inclusive, and shall remain upon the books of the Treasury to the credit of those appropriations until June 30, 1923.

The amendment was agreed to.

The next amendment was, on page 31, after line 6, to strike out:

TRANSPORTATION OF WOUNDED AND OTHERWISE DISABLED SOLDIERS, SAILORS, OR MARINES WHEN TRAVELING ON FURLOUGH.

For payment to railroad and steamship companies of the amount required to pay the difference between 1 cent per mile and the scheduled rate for tickets furnished to wounded or otherwise disabled soldiers, sailors, or marines under treatment at any Army, Navy, or other hospital, who are given furloughs in accordance with the provisions of the Army appropriation act of June 5, 1920, $25,000.

The amendment was agreed to.

The next amendment was, under the subhead "Office of the Chief of Finance," on page 32, line 13, before the words "of class 4," to strike out "28" and to insert "32"; in line 14, before the words "of class 3," to strike out "24" and to insert "20"; in the same line, before the words "of class 2," to strike out "40" and to insert "44"; in line 16, before the word "assistant," to strike out "4" and to insert "2"; at the beginning of line 18, to strike out "four" and to insert "two"; and at the end of line 18, to strike out "$285,810" and insert "$285,270"; so as to make the paragraph read:

Salaries: Assistant to Chief of Finance, $5,000; chief clerk, $2,750; chiefs of divisions—1 $3,000, 1 $2,750; principal clerks—1 $2,400, 1 $2,250, 4 at $2,000 each; clerks—32 of class 4, 20 of class 3, 44 of class 2, 16 at $1,300 each; 60 of class 1; 2 messengers, at $840 each; 2 assistant messengers, at $720 each; auditors for Red Cross accounts—1 $3,500, 1 $3,000, 2 at $2,750 each; in all, $285,270.

The amendment was agreed to.

The next amendment was, under the subhead "Quartermaster Corps," on page 33, line 21, after the word "ration," to strike out the comma and the words "at the rate of $0.75 per ration";

in line 22, after the word "allowances," to strike out "of commutation in lieu of rations" and to insert "for quarters and subsistence"; in line 24, after the word "men," to strike out "and male and female nurses"; on page 34, line 1, after the word "including," to strike out "warrant officers of the Mine Planter Service"; in line 7, after the word "contest," to strike out "male and female nurses on leave of absence"; in line 11, after the word "rations," to strike out "for members of the Army Nurse Corps while on duty in hospital, and"; and at the end of line 22, to strike out "$16,550,000" and to insert "$17,000,000"; so as to read:

QUARTERMASTER CORPS.

Subsistence of the Army: Purchase of subsistence supplies: For issue as rations to troops, including warrant officers of the Mine Planter Service, enlisted men of the Enlisted Reserve Corps and retired enlisted men when ordered to active duty, civil employees when entitled thereto, hospital matrons, nurses, applicants for enlistment while held under observation, general prisoners of war (including Indians held by the Army as prisoners, but for whose subsistence appropriation is not otherwise made), Indians employed with the Army as guides and scouts, and general prisoners at posts; for the subsistence of the masters, officers, crews, and employees of the vessels of the Army Transport Service; hot coffee for troops traveling when supplied with cooked or travel rations; meals for recruiting parties and applicants for enlistment while under observation; for sales to officers, including members of the Officers' Reserve Corps while on active duty, and enlisted men of the Army: *Provided*, That the sum of $12,000 is authorized to be expended for supplying meals or furnishing commutation of rations to enlisted men of the Regular Army and the National Guard who may be competitors in the national rifle match: *Provided further*, That no competitor shall be entitled to commutation of rations in excess of $1.50 per day, and when meals are furnished no greater expense than that sum per man per day for the period the contest is in progress shall be incurred. For payments: Of commutation of rations to the cadets of the United States Military Academy in lieu of the regular established ration of the regulation allowances for quarters and subsistence to enlisted men on furlough, enlisted men when stationed at places where rations in kind can not be economically issued, including enlisted men of the Enlisted Reserve Corps and retired enlisted men when ordered to active duty, and when traveling on detached duty where it is impracticable to carry rations of any kind, enlisted men selected to contest for places or prizes in department and Army rifle competitions while traveling to and from places of contest, applicants for enlistment, and general prisoners while traveling under orders. For payment of the regulation allowances of commutation in lieu of rations for enlisted men, applicants for enlistment while held under observation, civilian employees who are entitled to subsistence at public expense, and general prisoners sick therein, to be paid to the surgeon in charge; advertising; for providing prizes to be established by the Secretary of War for enlisted men of the Army who graduate from the Army schools for bakers and cooks, the total amount of such prizes at the various schools not to exceed $900 per annum; and for other necessary expenses incident to the purchase, testing, care, preservation, issue, sale, and accounting for subsistence supplies for the Army; in all, $17,000,000.

The amendment was agreed to.

The next amendment was, on page 35, at the beginning of line 1, to insert "other than in Alaska"; and in the same line, after the word "charged," to strike out "do not" and insert "are not estimated to," so as to make the paragraph read:

None of the funds appropriated in this act shall be used for the payment of expenses of operating sales commissaries other than in Alaska at which the prices charged are not estimated to include the customary overhead costs of freight, handling, storage, and delivery, notwithstanding the provisions of the act of July 5, 1884.

The amendment was agreed to.

The next amendment was, on page 35, line 8, after the word "sold," to strike out "does not" and to insert "is not estimated to," so as to make the paragraph read:

None of the funds appropriated in this act shall be used for payment of expenses of operating any utility of the War Department selling services or supplies at which the cost of the services or supplies so sold is not estimated to include all customary overhead costs of labor, rent, light, heat, and other expenses properly chargeable to the conduct of such utility.

The amendment was agreed to.

The next amendment was, on page 36, line 18, after the word "stores," to insert "except at establishments under the direct control of the Chief of Ordnance," so as to read:

Regular supplies of the Army: Regular supplies of the Quartermaster Corps, including their care and protection; construction and repair of military reservation fences; stoves and heating apparatus required for the use of the Army for heating offices, hospitals, barracks and quarters, and recruiting stations, and United States disciplinary barracks; also ranges, stoves, coffee roasters, and appliances for cooking and serving food at posts in the field and when traveling, and repair and maintenance of such heating and cooking appliances; and the necessary power for the operation of moving-picture machines; authorized issues of candles and matches; for furnishing heat and light for the authorized allowance of quarters for officers, including members of the Officers' Reserve Corps when ordered to active duty, and enlisted men, warrant officers, and field clerks, including enlisted men of the Enlisted Reserve Corps, and retired enlisted men when ordered to active duty; contract surgeons when stationed at and occupying public quarters at military posts; for officers of the National Guard attending service and garrison schools, and for recruits, guards, hospitals, storehouses, offices, the buildings erected at private cost, in the operation of the act approved May 31, 1902, and buildings for a similar purpose on military reservations authorized by War Department regulations; for sale to officers, and including also fuel and engine supplies required in the operation of modern batteries at established posts; for post bakeries, including bake ovens and apparatus pertaining thereto and the repair thereof; for ice machines and their maintenance where required for the health and comfort of the troops and for ice for issue to organizations of enlisted men and offices at such places as the Secretary of War may determine, and for preservation of stores; materials for cleaning and preserving ordnance and ordnance stores, except at establishments under the direct control of the Chief of Ordnance; for cold storage; for the construction and maintenance of laundries at military posts in the United States and its island possessions; authorized issues of soap, toilet paper, and towels; for the necessary furniture, textbooks, paper, and equipment for the post schools and libraries, and for schools for noncommissioned officers; for the purchase and issue of instruments, office furniture, stationery, and other authorized articles for the use of officers' schools at the several military posts; for purchase of relief maps for issue to organizations, commercial newspapers, market reports, etc.; for the tableware and mess furniture for kitchens and mess halls, each and all for the enlisted men, including recruits; for forage, salt, and vinegar for the horses, mules, oxen, and other draft and riding animals of the Quartermaster Corps at the several posts and stations and with the armies in the field, and for the horses of the several regiments of Cavalry and batteries of Artillery, and such companies of Infantry and Scouts as may be mounted; for remounts and for the authorized number of officers' horses, including bedding for the animals; for seeds and implements required for the raising of forage at remount depots and on military reservations in the Hawaiian and Philippine Islands, and for labor, and expenses incident thereto, including, when specifically authorized by the Secretary of War, the cost of irrigation; for straw for soldiers' bedding, stationery, typewriters and exchange of same, including blank books and blank forms for the Army, certificates for discharged soldiers, and for printing department orders and reports, $10,932,000.

The amendment was agreed to.

The next amendment was, on page 37, line 23, to increase the appropriation for regular supplies of the Quartermaster Corps from "$10,932,000" to "$12,000,000."

The amendment was agreed to.

The next amendment was, on page 38, line 9, before the words "for fuel," to strike out "$3,000,000" and insert "$3,500,000"; in the same line, after the word "exceed," to strike out "$4,000,000" and insert "$5,000,000"; and in line 12, after the word "exceed," to strike out "$175,000" and insert "$200,000," so as to make the proviso read:

Provided, That from this appropriation, not to exceed $850,000 shall be expended for the pay of civilian employees; not to exceed $1,250,000 shall be expended for power, heat, and electric current; not to exceed $57,000 shall be expended for maintenance and repair of buildings (including repair of machinery) for laundries; not to exceed $225,000 shall be expended for the maintenance and repair of heating apparatus (other than stoves); not to exceed $175,000 for maintenance and repair of electric wiring and fixtures; not to exceed $15,000 for the repair and exchange of typewriters; not to exceed $3,500,000 for fuel; not to exceed $5,000,000 for forage; including salt and vinegar and bedding for animals and straw for soldiers' bedding; not to exceed $200,000 for ice; and not to exceed $125,000 shall be expended for stationery.

The amendment was agreed to.

The next amendment was, on page 38, beginning in line 13, to strike out the following additional proviso:

Provided further, That the Secretary of War is authorized and directed to sell as soon as possible after the approval of this act, upon such terms and under such conditions as he may deem most advantageous to the best interests of the Government, such horses and mules now being held at remount stations and posts or with organizations of the National Guard or units of the Reserve Officers' Training Corps as are not in actual use.

The amendment was agreed to.

The next amendment was, on page 40, line 3, after the word "hereafter," to strike out "the issue and," and at the beginning of line 5 to strike out "including" and insert "plus," so as to read:

Clothing and equipage: For cloth, woolens, materials, and for the purchase and manufacture of clothing for the Army, including enlisted men of the Enlisted Reserve Corps and retired enlisted men when ordered to active duty, for issue and for sale; for payment of commutation of clothing due to warrant officers of the Mine Planter Service and to enlisted men; for altering and fitting clothing and washing and cleaning when necessary; for operation of laundries; for the authorized issues of laundry materials for use of general prisoners confined at military posts without pay or allowances, and for applicants for enlistment while held under observation; for equipment and repair of equipment of dry-cleaning plants, salvage and sorting storehouses, hat-repairing shops, shoe-repair shops, clothing-repair shops, and garbage-reduction works; for equipage, including authorized issues of toilet articles, barbers' and tailors' materials, for use of general prisoners confined at military posts without pay or allowances and applicants for enlistment while held under observation; issue of toilet kits to recruits upon their first enlistment, and issue of housewives to the Army; for expenses of packing and handling and similar necessaries; for a suit of citizen's outer clothing, to cost not exceeding $30, to be issued when necessary to each soldier discharged otherwise than honorably; to each enlisted man convicted by civil court for an offense resulting in confinement in a penitentiary or other civil prison; and to each enlisted man ordered interned by reason of the fact that he is an alien enemy, or, for the same reason, discharged without internment; for indemnity to officers and men of the Army for clothing and bedding, etc., destroyed since April 22, 1898, by order of medical officers of the Army for sanitary reasons, $5,000,000: *Provided*, That hereafter authorized sales of clothing and other quartermaster supplies shall be at the average current prices, plus all overhead costs, to be determined and fixed by the Secretary of War.

The amendment was agreed to.

The next amendment was, under the subhead "Transportation of the Army and its supplies," on page 42, line 2, after the word

"allowance," to insert "for payment of transportation costs for dependents of officers and enlisted men," so as to read:

For transportation of the Army and its supplies, including transportation of the troops when moving either by land or water, and of their baggage, including warrant officers, members of the Officers' Reserve Corps, enlisted men of the Enlisted Reserve Corps, and retired enlisted men when ordered to active duty, including the cost of packing and crating; for transportation of recruits and recruiting parties, of applicants for enlistment between recruiting stations and recruiting depots; for travel allowance to officers and enlisted men on discharge; for payment of travel allowance as provided in section 3 of the act approved February 28, 1919, to enlisted men of the National Guard on their discharge from the service of the United States, and to members of the National Guard who have been mustered into the service of the United States, and discharged on account of physical disability; for payment of travel pay to officers of the National Guard on their discharge from the service of the United States, as prescribed in the act approved March 2, 1901; for travel allowance to discharged prisoners and persons discharged from the Government Hospital for the Insane after transfer thereto from such barracks or place to their homes (or elsewhere, as they may elect), provided the cost in each case shall not be greater than to the place of last enlistment; of the necessary agents and other employees, including per diem allowances in lieu of subsistence not exceeding $4 for those authorized to receive the per diem allowance; for payment of transportation costs for dependents of officers and enlisted men; of clothing and equipage and other quartermaster stores from Army depots or places of purchase or delivery to the several posts and Army depots and from those depots to the troops in the field; of horse equipment; of ordnance and ordnance stores, and small arms from the foundries and armories to the arsenals, fortifications, frontier posts, and Army depots; for payment of wharfage, tolls, and ferriages; for transportation of funds of the Army; for the payment of Army transportation lawfully due such land-grant railroads as have not received aid in Government bonds (to be adjusted in accordance with the decisions of the Supreme Court in cases decided under such land-grant acts), but in no case shall more than 50 per cent of full amount of service be paid.

The amendment was agreed to.

The next amendment was, on page 44, at the end of line 12, to increase the appropriation for the transportation of the Army and its supplies from "$16,000,000" to "$18,000,000."

The amendment was agreed to.

The next amendment was, on page 45, line 14, to increase the appropriation for water and sewers at military posts from "$1,750,000" to "$2,000,000."

The amendment was agreed to.

The next amendment was, on page 45, line 15, after the word "exceed," to strike out "$10,000" and insert "$25,000," so as to make the proviso read:

Provided, That not to exceed $25,000 of this appropriation shall be expended for new construction work.

The amendment was agreed to.

The next amendment was, under the subhead "Military posts," on page 47, line 16, before the name "Benning," to strike out "Camp" and insert "Fort"; and, in line 19, after the word "at," to strike out "Camp Dix, Meade, and Lewis" and insert "Edgewood Arsenal and Camp Lewis," so as to make the paragraph read:

For the construction and enlargement at military posts of such buildings as in the judgment of the Secretary of War may be necessary, including all appurtenances thereto, $916,000, including $400,000 for continuing construction of post at Fort Benning, Ga.; $55,000 for construction of one hospital ward at Letterman General Hospital, San Francisco, Calif.; $262,000 for general construction at Edgewood Arsenal and Camp Lewis; and $198,000 for continuing construction and enlargement of barracks for guards at the United States Disciplinary Barracks, Fort Leavenworth, Kans.

The amendment was agreed to.

Mr. WADSWORTH. I am instructed by the Committee on Appropriations to propose an amendment, which is in the nature of legislation, at this point, and to ask unanimous consent for its consideration.

The VICE PRESIDENT. The Secretary will state the amendment.

The READING CLERK. On page 47, line 16, after the word "Georgia," insert the following proviso:

Provided, That apartment buildings may be constructed out of this appropriation at a cost not to exceed $150,000 each, and to provide for not less than 18 families each.

Mr. BORAH. Will the Senator explain what that is? I did not catch its full import.

Mr. WADSWORTH. The appropriation of $400,000 for continuing construction at Fort Benning, which comes from the House, impelled the committee to inquire of the officers of the War Department what sort of structures they were building at Fort Benning. We were informed that some of the buildings are to be used as quarters for officers and some for noncommissioned officers. Upon further inquiry we found that it is their plan to build apartment houses for some of the personnel, a plan with which we did not agree, but we ascertained that the apartment houses are going to cost at the rate of $10,000 per apartment. The committee thought that was a little expensive. The object of the amendment which I have offered is to limit that cost, in effect, to $8,000 per apartment. The committee thinks that is enough money to be expended for such a purpose.

The amendment was agreed to.

The next amendment was, under the subhead "Military posts, Hawaiian Islands," on page 48, after line 2, to insert:

For construction of six standard storehouses, including all appurtenances thereto, at not exceeding $9,000 each, $54,000.

The amendment was agreed to.

The next amendment was on page 49, line 17, after the name "United States," to strike out "$2,982,638" and to insert "$4,000,000"; so as to read:

For barracks, quarters, stables, storehouses, magazines, administration and office buildings, sheds, shops, and other buildings necessary for the shelter of troops, public animals, and stores, and for administration purposes, except those pertaining to the Coast Artillery; for construction of reclamations plants; for constructing and repairing public buildings at military posts; for hire of employees; for rental of the authorized allowance of quarters for offices, including members of the Officers' Reserve Corps when ordered to active duty, on duty with the troops at posts and stations where no public quarters are available; of barracks or authorized allowance of quarters for noncommissioned officers and enlisted men, men on duty, where public quarters are not available, including enlisted men of the Regular Army Reserve, retired enlisted men, and members of the enlisted Reserve Corps when ordered to active duty; for grounds for cantonments, camp sites, and other military purposes, and for buildings or portions of buildings for occupation by troops, for use as stables, storehouses, and offices, and for other military purposes; for the hire of recruiting stations and lodgings for recruits; for wall lockers in permanent barracks and refrigerators in barracks and quarters; for screen doors, window screens, storm doors and sash, and window shades for barracks and officers' quarters, and for flooring and framing for tents, and for the National Guard when called or drafted into the service of the United States, $4,000,000.

The amendment was agreed to.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. Overhue, its enrolling clerk, announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 10972) to readjust the pay and allowances of the commissioned and enlisted personnel of the Army, Navy, Marine Corps, Coast Guard, Coast and Geodetic Survey, and Public Health Service.

The message also announced that the House had passed a joint resolution (H. J. Res. 339) making available funds for repairing and restoring levees on the Mississippi River above Cairo, Ill., in which it requested the concurrence of the Senate.

ATTORNEY GENERAL DAUGHERTY—THE TARIFF.

Mr. HARRISON. Mr. President, the Public Ledger is one of the great independent Republican papers of the country. Mr. Edward G. Lowry is one of the most reputable newspaper correspondents in America. He wrote an article that appeared in yesterday morning's Public Ledger, and it is copyrighted by the Public Ledger Co. With one exception, the article has so much good advice and embodies so much wisdom that I desire to have it read.

The PRESIDING OFFICER (Mr. LENROOT in the chair). If there be no objection it will be read.

The Assistant Secretary read as follows:

MR. HARDING'S CHANCE—HE COULD PROFIT BY MR. TAFT'S EXPERIENCES THAT HURT HIM AND PARTY.

(By Edward G. Lowry. Copyright, 1922, by Public Ledger Co.)

President Harding could spend a useful and informative evening if he would invite Mr. Taft to come to the White House and tell him the real inside story of the Winona speech and the Ballinger-Pinchot case. The narrative, frankly and fully recounted, might save Mr. Harding and his party associates a hard fall. The President is facing almost the identical situation that confronted Mr. Taft. He has a Cabinet officer under fire in the person of Mr. Daugherty, and presently he will be asked to sign a tariff bill even more extortionate and oppressive in some of its rates than the short-lived Payne-Aldrich Act that proved so destructive to its makers and sponsors.

To this juncture the cases of Mr. Harding and Mr. Taft are strikingly parallel. It is for Mr. Harding to decide whether the analogy and similarity are to continue. Mr. Taft hadn't a political enemy in the world in his first year. All men spoke well of him. After the Winona speech no one spoke well. It was in that speech that he gave his blessing and praise to the Payne-Aldrich bill, which he had just signed. It did for him what "too proud to fight" did for Mr. Wilson. Mr. Taft never recovered his prestige or his popularity while he remained in the White House.

The cases of Ballinger and Daugherty as they first came up to the Executive for consideration and decision are strikingly alike, too. And they were presented to Presidents with many characteristics and qualities in common. Both Mr. Harding and Mr. Taft are essentially kindly men, with a strongly developed sense of personal loyalty to friends and associates. When the associate is also a personal friend the sense of loyalty tends to outweigh and overbalance the sense of public duty.

When the Ballinger case came up to Mr. Taft he waited too long before acting, as he, perhaps, would tell Mr. Harding if asked. Mr. Ballinger was allowed to ripen on the tree, and when he fell he spattered. Neither the public nor any party political interest was served by the delay in removing him. Out of his experience Mr. Taft could advise Mr. Harding that these things are best done quickly, and that the charges, questionings, and suspicions about Mr. Daugherty should

be promptly, thoroughly, and impartially investigated or the Attorney General permitted to "resume the practice of law," as they all say when they quit or are forced out.

The Daugherty matter can not be hushed up. It will go on day by day, assuming larger and larger proportions, if it is not taken firmly in hand now. So it was with Ballinger. When public accusation and public questioning has gone as far as it has in the present instance concerning Mr. Daugherty's fitness for office it becomes a matter for definite settlement. The public welfare is not served by inaction or by allowing the qualifications of a Cabinet member to become a "campaign issue." There are enough real problems and real issues to be settled in this country without bringing a controversy over personalities into the coming campaign.

Senator LENROOT was quite right when he said the other day while visiting Gifford Pinchot at Milford:

"There has been a feeling, whether justified or not, that the reactionaries of the party have felt that the overwhelming majority for the Republican Party made it entirely safe for them to insist upon the old methods of government."

By one of the curious recurrences in our politics the group that went out of power with Cannon in 1910 when the revolt within the Republican ranks began is now in power again. A great many shrewd persons at Washington agree with Mr. LENROOT that this "old crowd" interpreted the Harding victory as a charter to resume "the old methods of government"—the only methods they know.

Pinchot in Pennsylvania was one public denial and contradiction of this interpretation and Beveridge in Indiana was another. Will the response to inaction in the Daugherty case be a third?

The political men all agree that the country was never less radical than it is now, but that does not mean reactionary. The men who conduct and give the tone and color of policy to this Congress are reactionary, and it is known to even the dullest politician that the country does not hold the Federal Legislature in esteem. Mr. Harding does not share in this disesteem. People still speak well of him. Mr. Taft had his opportunity and did not take it. Mr. Harding can profit by his predecessor's experience if he will.

HOUSE JOINT RESOLUTION REFERRED.

The joint resolution (H. J. Res. 339) making available funds for repairing and restoring levees on the Mississippi River above Cairo, Ill., was read twice by its title and referred to the Committee on Appropriations.

WAR DEPARTMENT APPROPRIATIONS.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 10871) making appropriations for the military and nonmilitary activities of the War Department for the fiscal year ending June 30, 1923, and for other purposes.

The next amendment of the Committee on Appropriations was, on page 49, after line 19, to insert:

All the money hereinbefore designated under the titles "Regular supplies of the Army," "Water and sewers at military posts," and "Barracks and quarters," shall be disbursed and accounted for as "General appropriations, Quartermaster Corps," and for that purpose shall constitute one fund.

Mr. ROBINSON. That appears to be a legislative provision, and I take it the committee found some urgent necessity for its adoption. I wish the Senator from New York would explain why the committee propose that amendment.

Mr. WADSWORTH. Prior to two years ago, all the appropriations under the head of Quartermaster Corps were considered as of one fund, and were handled in that way. Each appropriation bill carried a provision similar to this, but including all the items.

Two years ago that provision was dropped from the bill for the first time, and last year it was also dropped from the bill, thereby compelling the Quartermaster General to follow the appropriations actually made for the several items. The War Department has always begged us to reinsert a provision of this kind covering all the items, saying that it saved them a lot of bookkeeping and the keeping of extra accounts, but Congress thus far has failed to insert the general provision.

However, the Senate committee in considering the matter at this session made up its mind that it might be well to allow these three accounts, regular supplies, water and sewers at military posts, and barracks and quarters, to be lumped together as one fund, for this reason.

For example, it is necessary to repair a barracks. We find that the money with which the plumbing is to be repaired comes out of "waters and sewers at military posts." The money with which the painting in the bathroom where the plumbing needs repair must be taken out of "barracks and quarters" or from "regular supplies." To do an ordinary repair job at any Army barracks anywhere which would include painting and papering and mending of broken plumbing, the War Department would have to go to three separate accounts. The result is a vast amount of bookkeeping which means nothing to the taxpayer one way or the other. The committee thought these three accounts, which are so closely interwoven, might well be allowed to be lumped together.

Mr. ROBINSON. I suppose the purpose of Congress in insisting upon a separate accounting as to those three items was to maintain a closer supervision over the administration of the fund. I can readily see that the War Department would experience inconvenience under the system and that it would be much more convenient both in administering and in accounting to do so under the provision which the committee has reported. I shall make no objection to the item.

The VICE PRESIDENT. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Appropriations was, under the subhead "Barracks and quarters, Philippine Islands," on page 50, line 5, after the word "rents," to insert "and rentals for United States troops in China," so as to read:

Continuing the work of providing for the proper shelter and protection of officers and enlisted men of the Army of the United States lawfully on duty in the Philippine Islands, including repairs and payment of rents and rentals for United States troops in China, the acquisition of title to building sites, and such additions to existing military reservations as may be necessary, and including also shelter for the animals and supplies, and all other buildings necessary for post administration purposes, and for shelter and repair thereof, $200,000.

The amendment was agreed to.

Mr. POMERENE. Mr. President, before the next matter is taken up I desire to say that I am compelled to be out of the Chamber for a little while, and I want to ask the chairman of the committee a few questions with respect to the appropriations for the United States Military Academy. I shall preface the question which I am about to ask by making a very brief statement.

About a year ago some question came up here about the failure of certain midshipmen to pass the examinations at the Naval Academy, and after a good deal of discussion upon the floor an arrangement was made whereby nearly all those young men who had failed to pass their examinations were readmitted in the lower class. I am happy to say that my information is that most of those midshipmen stand high in their classes now and that they are going to prove a credit to the institution.

At that same time I had information, coming not only from instructors at the academy but from at least one of the Board of Visitors at the academy, which demonstrated conclusively to me that the methods of instruction in the Naval Academy are not up to date; that so far as the naval officers are concerned who were assigned to give instruction in the academy, they were not qualified to perform the duties as they should have been; and that the best qualified instructors—I am speaking generally—in the academy are civilian instructors.

Now there is a movement afoot to dispense with the services of civilian instructors and to place in the Naval Academy a lot of naval officers who have had little or no experience in teaching. As a result, I am satisfied that so far as some of the instructors at the academy are concerned the young men would do just as well and become just as proficient in their studies if they were at home "sitting under a sour-apple tree."

In discussing this subject with a major general in the Army, who is a man who keeps in touch with conditions at the Military Academy, I was told that the same condition prevails at the Military Academy, and that there has been no advance in teaching over methods that prevailed 50 years ago.

The question I want to ask is this: Is there a movement afoot in the Military Academy to do away with civilian instructors there?

Mr. WADSWORTH. I have heard of no such movement. This is the first time the question has ever been directed to me.

Mr. POMERENE. I am convinced that the condition is such at the Military Academy that the Board of Visitors ought to inquire into conditions there to the end that the methods of instruction in the two academies may be equal to those which prevail in the great universities of the country. Anything short of that character of instruction is a discredit to the Nation itself.

I notice there have been some changes made in the appropriations as they appear in the bill as it passed the House. I have not had an opportunity to study them, and I felt that it might not be inopportune to call attention to the situation. I have not any desire to stir up any undue controversy or anything of that kind, but I am intensely interested in the proper training of these young men.

Mr. WARREN. Mr. President, I will say to the Senator from Ohio that, as was stated by the chairman of the subcommittee in charge of the bill, we have heard of no disposition to make changes at West Point Academy along the line the Senator indicates. There happens to have been some presentations made before the subcommittee in charge of the naval appropriation bill as to Annapolis, but I do not understand that any actual movement has been made that would decide otherwise than as heretofore for civilian as well as naval instructors.

Mr. POMERENE. Does the Senator mean that to be true so far as the Naval Academy is concerned?

Mr. WARREN. So far as the Naval Academy is concerned, I happened to hear witnesses before the subcommittee discussing the subject and questions propounded by members of the subcommittee, but I have no information that there has been any decision yet to carry out the idea of substituting commissioned officers in the place of civilian instructors.

Mr. POMERENE. My information comes pretty direct that the admiral in charge of the academy has already made the recommendation that a large number of the civilian instructors at the Naval Academy be dismissed. I know that the matter has been called to the attention of the Secretary of the Navy. I do not know whether he has come to a final decision about it, but I suspect that one of the reasons is to furnish places for naval officers, and so forth, a large number of whom are not qualified to teach. They may be good men in command of a ship, but it does not necessarily follow that they understand the art of teaching.

The reading of the bill was resumed.

The next amendment of the Committee on Appropriations was, on page 50, line 13, after the word "Army," to strike out "the total cost of which, including the heating and plumbing apparatus, wiring, and fixtures, shall exceed in the case of quarters of a general officer the sum of $8,000; of a colonel or officer above the rank of captain, $6,000; and of an officer of and below the rank of captain, $4,000," and to insert "except in case of emergency with the approval of the Secretary of War," so as to make the proviso read:

Provided, That no part of said sum shall be expended for the construction of quarters for officers of the Army, except in case of emergency with the approval of the Secretary of War.

The amendment was agreed to.

The next amendment was, under the subhead "Construction and repair of hospitals," on page 52, line 21, after the word "alteration," to insert "or enlargement," so as to read:

For construction and repair of hospitals at military posts already established and occupied, including all expenditures for construction and repairs required at the Army and Navy Hospital at Hot Springs, Ark., and for the construction and repair of general hospitals and expenses incident thereto, and for additions needed to meet the requirements of increased garrisons, and for temporary hospitals in standing camps and cantonments; for the alteration or enlargement of permanent buildings at posts for use as hospitals, construction and repair of temporary hospital buildings at permanent posts, construction and repair of temporary general hospitals, rental or purchase of grounds, and rental and alteration of buildings for use for hospital purposes in the District of Columbia and elsewhere, including necessary temporary quarters for hospital personnel, outbuildings, heating and laundry apparatus, plumbing, water and sewers, and electric work, cooking apparatus, and roads and walks for the same, $529,360: *Provided*, That no part of this appropriation shall be used for the construction of new hospitals.

The amendment was agreed to.

The next amendment was, on page 53, line 12, to increase the appropriation for maintenance and repair of quarters for hospital stewards at military posts already established and occupied from "$5,000" to "$10,000."

The amendment was agreed to.

The next amendment was, under the subhead "Office of the Quartermaster General," on page 54, line 2, before the word "messengers," to strike out "seven" and insert "five"; in line 3, before the words "assistant messengers," to strike out "fifteen" and insert "ten"; and at the end of line 4 to strike out "$563,060" and insert "$557,780," so as to make the paragraph read:

Salaries: Chief clerk, $2,750; principal clerks—2 at $2,400 each, 5 at $2,250 each, 4 at $2,000 each; clerks—22 of class 4, 30 of class 3, 68 of class 2, 203 of class 1, 22 at $1,000 each; draftsmen—1 $2,400, 1 $2,000, 1 $1,800, 4 at $1,600 each, 4 at $1,400 each; electrical engineer, $3,200; marine engineer, $3,500; executive assistant, $4,000; architect, $3,600; structural engineer, $3,600; mechanical engineer, $3,600; civil engineers—1 $3,600, 1 $3,000; traffic clerks—2 at $2,000 each; 1 $1,800; textile expert, $2,000; carpenter, $1,200; mimeograph operator, $1,200; 2 multigraph operators at $1,200 each; 4 photostat operators at $1,200 each; blue-print operator, $1,000; 4 blue printers at $900 each; 5 messengers at $840 each; 10 assistant messengers at $720 each; 4 laborers at $720 each; in all, $557,780.

The amendment was agreed to.

The next amendment was, on page 54, line 14, to strike out "$2,000" and insert "$3,000," so as to read:

The sum of $50,000 of the appropriation available for the fiscal year 1923 for the "Disposition of remains of officers, soldiers, and civilian employees," may be expended for personal services in the Cemeterial Division, office of the Quartermaster General, for compiling, recording, preparing, and transmitting data incident to bringing home and disposition of remains from abroad: *Provided*, That no person shall be employed under this allotment at a rate of compensation exceeding $1,800 per annum except one person at $3,000.

The amendment was agreed to.

The next amendment was, under the subhead "Signal Corps—Signal Service of the Army," on page 56, line 15, to increase the appropriation for telegraph and telephone systems from "$1,750,000" to "$1,900,000."

The amendment was agreed to.

The next amendment was, on page 56, line 18, after the word "exceed," to strike out "$375,000" and insert "$525,000," so as to make the proviso read:

Provided, That not to exceed $475,000 from this appropriation may be expended for salaries and wages of civilian employees; not to exceed $525,000 may be expended for commercial and existing Government-owned telephone and telegraph service; not to exceed $500,000 may be expended for signal equipment for organizations; not to exceed $5,000 may be expended for pigeon service; not to exceed $75,000 may be expended for photographic and cinematographic service; and not to exceed $75,000 may be expended for the operation and maintenance of Camp Alfred Vail.

The amendment was agreed to.

The next amendment was, on page 57, after line 13, to insert:

For replacing the worn-out portions of the Washington-Alaska submarine cable system, to remain available until expended, $1,500,000.

The amendment was agreed to.

The next amendment was, under the subhead "Office of the Chief Signal Officer," on page 58, line 4, before the word "messengers," to strike out "three" and insert "two," and at the end of line 5, to strike out "$41,900" and insert "$41,060," so as to read:

OFFICE OF THE CHIEF SIGNAL OFFICER.

Salaries: Chief clerk, $2,000; clerks—4 of class 4, 4 of class 3, 7 of class 2, 8 of class 1, 3 at $1,000 each; 2 messengers, at $840 each; 1 assistant messenger, $720; laborer, $660; in all $41,060.

The amendment was agreed to.

The next amendment was, on page 58, line 15, after the word "exceed," to strike out "$20,000" and insert "$40,000," so as to read:

The services of skilled draftsmen and such other services as the Secretary of War may deem necessary may be employed only in the Signal Office to carry into effect the various appropriations for fortifications and other works of defense, and for the Signal Service of the Army, to be paid from such appropriations, in addition to the foregoing employees appropriated for in the Signal Office: *Provided*, That the entire expenditures for this purpose for the fiscal year 1923 shall not exceed $40,000 and the Secretary of War shall each year in the annual estimates report to Congress the number of persons so employed, their duties, and the amount paid to each.

The amendment was agreed to.

The next amendment was, under the subhead "Air Service, Air Service, Army" on page 59, line 9, after the word "with," to insert "and the establishment of landing and take-off runways"; on page 60, line 10, after the word "therewith," to insert "for the marking of military airways where the purchase of land is not involved"; and on page 61, at the beginning of line 5, to strike out "$12,431,000" and to insert "$13,000,000," so as to read:

For creating, maintaining, and operating at established flying schools and balloon schools courses of instruction for officers, students, and enlisted men, including cost of equipment and supplies necessary for instruction, purchase of tools, equipment, materials, machines, textbooks, books of reference, scientific and professional papers, instruments, and materials for theoretical and practical instruction; for maintenance, repair, storage, and operation of airships, war balloons, and other aerial machines, including instruments, materials, gas plants, hangars, and repair shops, and appliances of every sort and description necessary for the operation, construction, or equipment of all types of aircraft, and all necessary spare parts and equipment connected therewith and the establishment of landing and take-off runways; for purchase of supplies for securing, developing, printing, and reproducing photographs in connection with aerial photography; improvement, equipment, maintenance, and operation of plants for testing and experimental work, and procuring and introducing water, electric light and power, gas and sewerage, including maintenance, operation, and repair of such utilities at such plants; for the acquisition of land or interest in land by purchase, lease, or condemnation where necessary to explore for, procure, or reserve helium gas, and also for the purchase, manufacture, construction, maintenance, and operation of plants for the production thereof and experimentation therewith; salaries and wages of civilian employees as may be necessary, and payment of their traveling and other necessary expenses as authorized by existing law; transportation of materials in connection with consolidation of Air Service activities; experimental investigation and purchase and development of new types of aircraft, accessories thereto, and aviation engines, including patents and other rights thereto, and plans, drawings, and specifications thereof; for the purchase, manufacture, and construction of airships, balloons, and other aerial machines, including instruments, gas plants, hangars, and repair shops, and appliances of every sort and description necessary for the operation, construction, or equipment of all types of aircraft, and all necessary spare parts and equipment connected therewith; for the marking of military airways where the purchase of land is not involved; for the purchase, manufacture, and issue of special clothing, wearing apparel, and similar equipment for aviation purposes; for all necessary expenses connected with the sale or disposal of surplus or obsolete aeronautical equipment, and the rental of buildings, and other facilities for the handling or storage of such equipment; for the services of such consulting engineers at experimental stations of the Air Service as the Secretary of War may deem necessary, including necessary traveling expenses; purchase of special apparatus and appliances, repairs, and replacements of same used in connection with special scientific medical research in the Air Service; for printing and binding, including supplies, equipment, and repairs for such Air Service printing plants outside of the District of Columbia as may be authorized in accordance with law; for

publications, station libraries, special furniture, supplies and equipment for offices, shops, and laboratories; for special services, including the salvaging of wrecked aircraft, $13,000,000:

The amendment was agreed to.

The next amendment was, on page 61, line 9, before the word "may," to strike out "$400,000" and insert "$300,000," so as to read:

Provided, That not to exceed $2,750,000 from this appropriation may be expended for pay and expenses of civilian employees other than those employed in experimental and research work; not exceeding $300,000 may be expended for experimentation, conservation, and production of helium.

Mr. SHEPPARD. May I ask the Senator to allow this amendment to go over for the present until I can look into it?

Mr. WADSWORTH. Very well; let the item be passed over.

Mr. SHEPPARD. I thank the Senator.

The VICE PRESIDENT. Without objection, the amendment will be passed over.

The reading of the bill was resumed.

The next amendment of the Committee on Appropriations was, on page 61, in line 11, before the word "may," to strike out "$3,250,000" and insert "$3,750,000," so as to read:

not exceeding $3,750,000 may be expended for experimental and research work with airplanes or lighter-than-air craft and their equipment, including the pay of necessary civilian employees; not exceeding $450,000 may be expended for the production of lighter-than-air equipment; and not exceeding $324,000 may be expended for improvement of stations, hangars, and gas plants for the Regular Army.

The amendment was agreed to.

The next amendment was, on page 62, after line 8, to insert:

The sum of $48,500 of the appropriation for the Air Service for the fiscal year 1920 contained in the "act making appropriations for the support of the Army for the fiscal year ending June 30, 1920, and for other purposes," approved July 11, 1919, shall remain available until June 30, 1923, for the payment of obligations incurred under contracts executed prior to June 30, 1920.

The amendment was agreed to.

The next amendment was, under the subhead "Office of the Chief of Air Service," on page 62, line 21, after the words "at $840 each," to strike out "two at $720 each" and to insert "one at $720," and in line 23, after the words "in all," to strike out "$195,720" and insert "$195,000," so as to make the paragraph read:

Salaries: Chief clerk, $2,400; principal clerks—1 at $2,400, 2 at $2,250 each, 2 at $2,000 each; clerks—6 of class 4, 10 of class 3, 38 of class 2, 80 of class 1; addressograph operator, $900; messengers—2 at $840 each, 1 at $720; 2 messenger boys, at $480 each; 2 laborers, at $720 each; in all, $195,000.

The amendment was agreed to.

The next amendment was, on page 63, line 7, after the word "exceed," to strike out "$65,000," and to insert "$90,000," so as to read:

The services of aeronautical engineers, skilled draftsmen, and such other technical services as the Secretary of War may deem necessary may be employed only in the office of the Chief of Air Service to carry into effect the various appropriations for aeronautical purposes, to be paid from such appropriations, in addition to the foregoing employees appropriated for in the office of the Chief of Air Service: *Provided*, That the entire expenditure for this purpose for the fiscal year 1923 shall not exceed $90,000, and the Secretary of War shall each year in the annual estimates report to Congress the number of persons so employed, their duties, and the amount paid to each.

The amendment was agreed to.

The next amendment was, under the subhead "Medical Department," on page 65, line 6, to increase the appropriation for the medical and hospital department from "$1,000,000" to "$1,200,000."

The amendment was agreed to.

The next amendment was, on page 65, at the beginning of line 7, to strike out "no part" and to insert "not more than $16,600"; and in line 9, after the words "of the," where they occur the second time, to strike out "World War" and to insert "war with Germany," so as to make the proviso read:

Provided, That not more than $16,600 of this appropriation shall be used for payment of any expense connected with the publication of the Medical and Surgical History of the War with Germany.

The amendment was agreed to.

The next amendment was, under the subhead "Library, Surgeon General's office," on page 66, line 4, to increase the appropriation "for the library of the Surgeon General's office, including the purchase of the necessary books of reference and periodicals," from "$10,000" to "$12,000."

The amendment was agreed to.

The next amendment was, under the subhead "Office of the Surgeon General," on page 66, line 8, after the figures "$1,800," to strike out "assistant librarian, $1,800" and to insert "2 assistant librarians, at $1,800 each"; at the beginning of line 11, to strike out "15" and to insert "16"; at the end of the same line, to strike out "34" and insert "36"; in line 12, before the words "of class one," to strike out "55" and insert "59"; in line 15, before the words "assistant messengers," to strike out "8" and to insert "6"; and at the end of line 19, to strike out "$213,520" and to insert "$223,280," so as to make the paragraph read:

Salaries: Chief clerk, $2,250; principal assistant librarian, $2,250; principal clerk, $2,000; pathologist, $1,800; microscopist, $1,800; 2 assistant librarians, at $1,800 each, anatomist, $1,600; entomologist, $1,600; photographer, $1,500; translator, $1,800; clerks—16 of class 4, 14 of class 3, 36 of class 2, 59 of class 1, 9 at $1,000 each, 2 at $900 each; multigraph operator, $1,200; engineer, $1,400; skilled mechanic, $1,000; 2 messengers, at $840 each; 6 assistant messengers, at $720 each; chauffeur, $840; 3 firemen, at $720 each; 3 watchmen, at $720 each; superintendent of building (Army Medical Museum and Library), $200; 6 laborers, at $660 each; 4 charwomen, at $240 each; in all, $223,280.

The amendment was agreed to.

The next amendment was, under the subhead "Office of Chief of Bureau of Insular Affairs," on page 67, line 10, before the word "of," to strike out "9" and to insert "10"; in line 11, before the word "of," where it occurs the third time, to strike out "14" and to insert "12"; and at the end of line 13, to strike out "$66,630" and insert "$66,030," so as to make the paragraph read:

Salaries: Chief clerk, $2,250; clerks—10 of class 4, 6 of class 3, 9 of class 2, 12 of class 1, 6 at $1,000 each; 3 messengers, at $840 each; laborer, $660; in all, $66,030.

The amendment was agreed to.

The next amendment was, under the subhead "Engineer operations in the field," on page 70, at the end of line 1, to strike out "$85,000" and to insert "$100,000," so as to read:

For expenses incident to military engineer operations in the field, including the purchase of material and a reserve of material for such operations, the rental of storehouses within and outside of the District of Columbia, the purchase, operation, maintenance, and repair of horse-drawn and motor-propelled passenger-carrying vehicles, and such expenses as are ordinarily provided for under appropriations for "Engineer depots," "Civilian assistants to engineer officers," and "Military surveys and maps," $100,000.

The amendment was agreed to.

The next amendment was, on page 71, line 25, after the word "defense," to strike out "at the following localities: Hawaiian Islands, $3,000; Philippine Islands, $3,000," and to insert "in the insular possessions, $6,000"; so as to read:

For preparation of plans for fortifications and other works of defense in the insular possessions, $6,000.

The amendment was agreed to.

Mr. BORAH. Mr. President, I ask the Senator from New York [Mr. WADSWORTH] in charge of the pending bill that when reached the amendment on page 83, line 4, under the head of "Chemical Warfare Service," proposing to strike out the appropriation of $500,000 and in lieu thereof to insert "$750,000," may be passed over.

Mr. WADSWORTH. Very well.

The reading of the bill was resumed.

The next amendment was, on page 72, line 14, after the word "wharves," to strike out the comma and the following: "at the following localities: Hawaiian Islands, $15,000; Philippine Islands, $50,000"; and in lieu thereof to insert "in the insular possessions, $55,000," so as to read:

For protection, preservation, and repair of fortifications, including structures for submarine mine defense, for which there may be no special appropriation available, and for maintaining channels for access to submarine mine wharves in the insular possessions, $55,000.

The amendment was agreed to.

The next amendment was, on page 72, line 22, after the word "operation," to strike out "at the following localities: Hawaiian Islands, $20,000; Philippine Islands, $40,000"; and in lieu thereof to insert "in the insular possessions, $60,000," so as to read:

For maintenance and repair of searchlights and electric light and power equipment for seacoast fortifications, and for tools, electrical and other supplies, and appliances to be used in their operation in the insular possessions, $60,000.

The amendment was agreed to.

The next amendment was, under the subhead "Seacoast defenses, Panama Canal," on page 73, line 16, to strike out "$30,000" and to insert "$40,000," so as to read:

For maintenance and repair of searchlights and electric light and power equipment for fortifications, and for tools, electrical and other supplies, and appliances to be used in their operation, $40,000.

The amendment was agreed to.

The next amendment was, on page 73, after line 16, to strike out:

For maintenance of clearings and trails, $20,000.

The amendment was agreed to.

The next amendment was, under the subhead "Office of Chief of Engineers," on page 73, line 22, before the word "messengers," to strike out "four" and insert "three," and at the

end of line 24, to strike out "$109,010" and to insert "108,170," so as to make the paragraph read:

Salaries: Chief clerk, $2,250; 2 chiefs of divisions at $2,000 each; clerks—8 of class 4, 12 of class 3, 17 of class 2, 26 of class 1, 6 at $1,000 each, 3 at $900 each; 3 messengers, at $840 each; 2 assistant messengers, at $720 each; laborer, $660; in all, $108,170.

The amendment was agreed to.

The next amendment was, on page 74, line 10, after the word "exceed," to strike out "$125,000" and to insert "$150,000," so as to read:

The services of skilled draftsmen, civil engineers, and such other services as the Secretary of War may deem necessary, may be employed only in the office of the Chief of Engineers to carry into effect the various appropriations for rivers and harbors, surveys, preparation for and the consideration of river and harbor estimates and bills, fortifications, engineer equipment of troops, engineer operations in the field, and other military purposes, to be paid from such appropriations: *Provided*, That the expenditures on this account for the fiscal year 1923 shall not exceed $150,000; the Secretary of War shall each year, in the annual estimates, report to Congress the number of persons so employed, their duties, and the amount paid to each.

The amendment was agreed to.

The next amendment was, on page 75, line 6, to strike out "That no money appropriated herein shall be expended for maintenance, repair, or operation of any motor-propelled passenger-carrying vehicle employed wholly or in part for personal, social, or other similar use or for any use except for military and official business: *Provided further*,"

The amendment was agreed to.

The next amendment was, on page 76, line 3, after the word "homes," to insert a semicolon and the following: "For manufacture and purchase of ammunition, targets, and other accessories for small arms, hand and machine gun target practice and instruction; and ammunition, targets, target materials, and other accessories which may be issued for small-arms target practice and instruction at the educational institutions and State soldiers and sailors orphans' homes to which issues of small arms are lawfully made, under such regulations as the Secretary of War may prescribe"; and in line 11, to strike out "$508,500" and to insert "$650,000," so as to make the paragraph read:

ORDNANCE STORES, AMMUNITION.

For the development, manufacture, purchase, and maintenance of airplane bombs; of ammunition for small arms and for hand use for reserve supply; of ammunition for burials at the National Soldiers' Home in Washington, District of Columbia, and of ammunition for firing the morning and evening gun at military posts prescribed by General Orders, No. 70, Headquarters of the Army, dated July 23, 1867, and at National Home for Disabled Volunteer Soldiers and its several branches, including National Soldiers' Home at Washington, District of Columbia, and soldiers and sailors' State homes; for manufacture and purchase of ammunition, targets, and other accessories for small arms, hand and machine gun target practice and instruction; and ammunition, targets, target materials, and other accessories which may be issued for small-arms target practice and instruction at the educational institutions and State soldiers and sailors orphans' homes to which issues of small arms are lawfully made, under such regulations as the Secretary of War may prescribe, $650,000.

The amendment was agreed to.

The next amendment was, on page 76, after line 11, to strike out:

SMALL-ARMS TARGET PRACTICE.

For manufacture and purchase of ammunition, targets, and other accessories for small arms, hand and machine-gun target practice and instruction; and ammunition, targets, target materials, and other accessories which may be issued for small-arms target practice and instruction at the educational institutions and State soldiers and sailors orphans' homes to which issues of small arms are lawfully made, under such regulations as the Secretary of War may prescribe, $400,000.

The amendment was agreed to.

Mr. NORRIS. Mr. President, I should like to inquire of the Senator from New York whether there is any specific appropriation in this bill for the maintenance of an army in Europe?

Mr. WADSWORTH. No; there is not.

Mr. NORRIS. There is no reference made to it?

Mr. WADSWORTH. None at all.

Mr. NORRIS. I noticed in the public press some time ago that the President had decided to bring home all of the American soldiers in Europe. Recently I have seen that disputed. Can the Senator tell the Senate what the facts are in regard to that matter?

Mr. WADSWORTH. The committee was informed by the Secretary of War and General Pershing and General Harbord that the troops were ordered home and were coming home.

Mr. NORRIS. All of them?

Mr. WADSWORTH. All of them, with the possible exception of a little clean-up squad, consisting of a few men.

Mr. NORRIS. How soon will they all be back?

Mr. WADSWORTH. They are supposed to start by the 1st of July. They are coming on the regular trips of the transport. Instead of sending transports over on special trips to bring them back, it is more economical to have the transport returning on its regular trip to bring back such men as it can carry.

Mr. NORRIS. What arrangements, if any, have been made in regard to the payment of the troops over there from money paid by the German Government? There was some misunderstanding in regard to that, and our troops were not paid.

Mr. WADSWORTH. The committee did not inquire into that; that is a matter with which the State Department has to do. Of course, we understand that our claim against the German Government for the payment of our troops upon the Rhine is good and must be honored.

Mr. NORRIS. But the only difficulty is that Germany was not at the time the information was furnished me allowed to use any of her money for the purpose of paying our troops, because our recent allies would not permit it; they wanted all the money for themselves.

Mr. WADSWORTH. I think, as a result of a message sent by the administration, I believe through Secretary Hughes, the Governments represented on the Reparation Commission have acknowledged the rights of the United States to secure payment for its troops on the Rhine.

Mr. NORRIS. Would the Senator have any objection to an amendment to this bill to prohibit the use of any money appropriated by the bill for the purpose of maintaining an army in Europe?

Mr. WADSWORTH. Yes; Mr. President, on general principle I would. I do not think the Congress should exercise the functions of Commander in Chief of the Army of the United States.

Mr. NORRIS. In a general way, I fully agree with the Senator, and yet I think the Congress has a definite knowledge as to why the American troops were maintained over there, and a general knowledge which, I think, everybody possesses, that the use of keeping them there has long since passed. That is particularly true if our allies are not going to permit German funds to be used for the payment of our military expenses there.

Mr. WADSWORTH. The Senator is basing his suggestion upon two assumptions, neither of which, I think, is accurate: First, that we intend to keep them there. We do not intend to keep them there; they are ordered home. Second, that the Germans do not intend or will not be permitted to pay us. They will be permitted to pay us.

Mr. NORRIS. They have not been permitted up to the time of the last information received by me.

Mr. WADSWORTH. They have not paid the expenses of the armies of occupation of any government thus far.

Mr. NORRIS. I should be very glad, indeed, to know that we were getting our share of the money from Germany to pay the expenses of our troops on the Rhine; but, Mr. President, it has been a long time since there was any use for our troops there, and a considerable time since the announcement was made that our troops were all going to be brought home, but they have not all been brought back yet. If we are going to permit the Executive branch of the Government to decide to keep them there forever, there will certainly come a time eventually when Congress will wake up enough to decline to appropriate money to keep them there. If there is any reason why they should be kept or any obligation on the United States, I certainly would not want to prohibit the payment of money to keep them there; but I have never yet heard what to my mind was a sufficient reason or, for that matter, any reason, why we should maintain a single soldier in Europe.

Mr. HARRIS. Mr. President, I should like to state to the Senator from Nebraska that I understood the last of the troops in Germany were ordered home last month; but for some reason the order was rescinded and the time of the departure of some of the troops was delayed. I think, however, that they are to leave within the next few days.

Mr. NORRIS. All of them?

Mr. HARRIS. The last of the troops remaining there; that is my understanding.

Mr. WADSWORTH. All but a clean-up squad.

The reading of the bill was resumed.

The next amendment of the Committee on Appropriations was, under the subhead "Manufacture of arms," on page 76, line 24, to reduce the appropriation for manufacturing, repairing, procuring, and issuing arms at the national armories, from "$400,000" to "$375,000."

Mr. HITCHCOCK. Mr. President, I should like to ask the chairman of the committee whether he prefers to have that amendment passed over or to consider an amendment to it at the present time.

Mr. WADSWORTH. I will suit the convenience, of course, of the Senator from Nebraska. I am perfectly willing to have it considered now.

Mr. HITCHCOCK. We have been pursuing the policy, I understand, of passing over amendments to which there is objection. I will say to the Senator that I either propose to strike out the whole paragraph or to reduce the appropriation to $75,000. The Senator will recall that the testimony before the committee indicated that 300 men are engaged in the manufacture of rifles, while we have on hand something like 2,800,000 rifles, and the Springfield armory is now in operation simply for the purpose of employing men, not because the Government needs the rifles.

Mr. WADSWORTH. The Senator from Nebraska can state that as his recollection, but the Senator from New York does not quite recall all of that.

Mr. HITCHCOCK. I think the testimony will so indicate.

Mr. WADSWORTH. Not quite.

Mr. HITCHCOCK. If the Senator from New York desires to refresh his memory of the testimony before the committee, I think it will bear out my statement.

Mr. WADSWORTH. I am perfectly willing that the amendment shall go over, if it will suit the Senator's convenience.

Mr. HITCHCOCK. Very well; let it go over with the others.

Mr. WADSWORTH. Very well.

The VICE PRESIDENT. The amendment will be passed over.

The reading of the bill was resumed.

The next amendment of the Committee on Appropriations was, under the subhead "Ordnance stores and supplies," on page 77, line 5, after the word "preserving," to insert "at places other than establishments under the direct control of the Chief of Ordnance," so as to make the paragraph read:

For overhauling, cleaning, repairing, and preserving ordnance and ordnance stores in the hands of troops and at the arsenals, posts, and depots, except material for cleaning and preserving at places other than establishments under the direct control of the Chief of Ordnance; for purchase and manufacture of ordnance stores to fill requisitions of troops, $150,000.

The amendment was agreed to.

The next amendment was, under the subhead "Tanks," on page 77, line 18, to reduce the appropriation for the purchase, manufacture, test, maintenance, and repair of tanks and other self-propelled armored vehicles, to remain available until June 30, 1924, from "$300,000" to "$200,000."

The amendment was agreed to.

The next amendment was, under the subhead "Field Artillery armament," on page 77, line 23, to reduce the appropriation for purchase, manufacture, and test of mountain, field, and siege cannon, including their carriages, sights, implements, equipments, and the machinery necessary for their manufacture, from "$750,000" to "$500,000."

The amendment was agreed to.

The next amendment was, on page 78, line 3, to reduce the appropriation for purchase, manufacture, maintenance, and test of ammunition for mountain, field, and siege cannon, including the necessary experiments in connection therewith, the machinery necessary for its manufacture, and the necessary storage facilities, from "$400,000" to "$300,000."

The amendment was agreed to.

The next amendment was, on page 78, line 7, to increase the appropriation for alteration and maintenance of the mobile artillery, including the purchase and manufacture of machinery, tools, and materials necessary for the work, and the expenses of the mechanics engaged thereon, from "$400,000" to "$500,000."

The amendment was agreed to.

The next amendment was, on page 78, line 11, to reduce the appropriation for purchase, manufacture, and test of ammunition, subcaliber guns, and other accessories for mountain, field, and siege artillery practice, including the machinery necessary for their manufacture, from "$75,000" to "$65,000."

The amendment was agreed to.

The next amendment was, under the subhead "Rock Island Bridge, Rock Island, Ill.," on page 78, after line 24, to insert:

For special repairs and strengthening of bridge, $141,000.

The amendment was agreed to.

The next amendment was, on page 79, line 14, to reduce the appropriation for repairs and improvement of arsenals and depots, etc., from "$805,000" to "$600,000."

The amendment was agreed to.

The next amendment was, on page 79, after line 14, to strike out the following subhead: "Civilian schools, ordnance reservations."

The amendment was agreed to.

The next amendment was, on page 79, after line 15, to strike out:

For the maintenance and operation of schools for children on ordnance reservations, $17,000.

The amendment was agreed to.

The next amendment was, under the subhead "Seacoast defenses, United States—armament of fortifications," on page 79, line 23, after the word "manufacture," to strike out "$450,000" and to insert "$400,000," so as to make the paragraph read:

For purchase, manufacture, and test of seacoast cannon for coast defense, including their carriages, sights, implements, equipments, and the machinery necessary for their manufacture, $400,000.

The amendment was agreed to.

The next amendment was, on page 80, line 2, after the word "manufacture," to strike out "$350,000" and to insert "$300,000," so as to make the paragraph read:

For purchase, manufacture, and test of ammunition for seacoast cannon, and for modernizing projectiles on hand, including the necessary experiments in connection therewith, and the machinery necessary for its manufacture, $300,000.

The amendment was agreed to.

The next amendment was, on page 80, at the end of line 7, to strike out "$60,000" and to insert "$50,000," so as to make the paragraph read:

For purchase, manufacture, and test of ammunition, subcaliber guns, and other accessories for seacoast artillery practice, including the machinery necessary for their manufacture, $50,000.

The amendment was agreed to.

The next amendment was, under the subhead "Seacoast defenses, insular possessions," on page 80, line 16, after the word "arsenals," to strike out "$150,000" and to insert "$125,000," so as to make the paragraph read:

For purchase, manufacture, and test of seacoast cannon for coast defenses, including their carriages, sights, implements, equipments, and the machinery necessary for their manufacture at the arsenals, $125,000.

The amendment was agreed to.

The next amendment was, on page 80, at the end of line 24, to strike out "$60,000" and to insert "$85,000," so as to make the paragraph read:

For alteration and maintenance of the seacoast artillery, including the purchase and manufacture of machinery, tools, and materials necessary for the work, and expenses of the civilian mechanics, $85,000.

The amendment was agreed to.

The next amendment was, under the subhead "Seacoast defenses, Panama Canal," on page 81, line 9, after the word "mechanics," to strike out "$55,000" and to insert "$60,000," so as to make the paragraph read:

For the alteration and maintenance and installation of the seacoast artillery, including the purchase and manufacture of machinery, tools, and materials necessary for the work, and expenses of civilian mechanics, $60,000.

The amendment was agreed to.

The next amendment was, under the subhead "Office of Chief of Ordnance," on page 81, at the end of line 14, to strike out "messengers—2 at $840 each, 2 at $780 each, 2 at $720 each," and to insert "2 messengers, at $840 each; 2 assistant messengers, at $720 each," and in line 17, after the words "in all," to strike out "$150,640" and to insert "$149,080," so as to make the paragraph read:

Salaries: Chief clerk, $2,500; chief of division, $2,000; principal clerk, $2,000; clerks—9 of class 4, 12 of class 3, 25 of class 2, 44 of class 1, 12 at $1,000 each, 4 at $900 each; 2 messengers, at $840 each; 2 assistant messengers, at $720 each; laborer, $660; in all, $149,080.

The amendment was agreed to.

The next amendment was, on page 83, line 4, to increase the appropriation for the Chemical Warfare Service from "$500,000" to "$750,000."

Mr. WADSWORTH. At the request of the Senator from Idaho [Mr. BORAH] I ask that the amendment on page 83, line 4, be passed over.

The VICE PRESIDENT. It will be passed over.

Mr. WADSWORTH. Mr. President, I am directed by the Committee on Appropriations to ask unanimous consent for the consideration of an amendment which will become a part of the paragraph headed "Office of the Chief of Chemical Warfare Service." I send the amendment to the desk.

The VICE PRESIDENT. The amendment will be stated.

The ASSISTANT SECRETARY. On page 83, after line 8, it is proposed to insert the following as a separate paragraph:

The services of skilled draftsmen, chemical engineers, chemists, and such other services as the Secretary of War may deem necessary, may be employed in the office of the chief, Chemical Warfare Service, to carry into effect the appropriations for that service, to be paid from such appropriations.

Provided, That the entire expenditure for this purpose for the fiscal year 1923 shall not exceed $21,600, and the Secretary of War shall each year in the annual estimates report to Congress the number of persons so employed, their duties, and the amount paid to each.

The VICE PRESIDENT. Is there objection to the immediate consideration of the amendment? The Chair hears none. The question is on agreeing to the amendment.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Appropriations was under the subhead "National board for promotion of rifle practice. Quartermaster supplies and services for rifle ranges for civilian instruction," on page 83, line 19, after the word "insignia," to strike out the semicolon and the following: "For the transportation of employees, instructors, and civilians to engage in practice; for the purchase of materials, supplies, and services, and for expenses incidental to instruction of citizens of the United States in marksmanship, and their participation in national and international matches, to be expended under the direction of the Secretary of War, and to remain available until expended, $89,900: *Provided*, That out of this appropriation there may be expended for the payment of transportation, and for supplying meals, or furnishing commutation of subsistence of civilian rifle teams authorized by the Secretary of War to participate in the national matches, not to exceed $80,000," and to insert "$10,000"; so as to make the paragraph read:

To establish and maintain indoor and outdoor rifle ranges for the use of all able-bodied males capable of bearing arms, under reasonable regulations to be prescribed by the National Board for the Promotion of Rifle Practice and approved by the Secretary of War; for the employment of labor in connection with the establishment of outdoor and indoor rifle ranges, including labor in operating targets; for the employment of instructors; for clerical services; for badges and other insignia, $10,000.

The amendment was agreed to.

The next amendment was, on page 84, at the end of line 20, to reduce the appropriation for national trophy and medals for rifle contests from "$10,000" to "$7,500."

The amendment was agreed to.

The next amendment was, on page 85, line 6, before the word "Benning," to strike out "Camp" and to insert "Fort," so as to make the subhead read: "Infantry School, Fort Benning, Ga."

The amendment was agreed to.

The next amendment was, on page 85, line 12, before the name "Benning," to strike out "Camp" and to insert "Fort," so as to make the paragraph read:

For the purchase of textbooks, books of reference, scientific and professional papers; instruments and material for instruction, employment of technical and special services, including the services of one translator at the rate of $150 per month, and for the necessary expenses of instruction at the Infantry School, Fort Benning, Ga., $35,000.

The amendment was agreed to.

The next amendment was, on page 89, after line 18, to strike out "In the Philippine Islands, $12,000."

The amendment was agreed to.

The next amendment was, under the subhead "Office of Chief of Coast Artillery," on page 90, line 4, after "each," to strike out "two messengers, at $720 each," and to insert "messenger, $720"; and in line 5, after the words "in all," to strike out "$19,440" and to insert "$18,720," so as to make the paragraph read:

Salaries: Chief clerk, $2,000; clerks—one of class 4, two of class 3, three of class 2, four of class 1, two at $1,000 each; messenger, $720; in all, $18,720.

The amendment was agreed to.

The next amendment was, under the subhead "Militia Bureau: Arming, equipping, and training the National Guard," on page 90, line 9, to reduce the appropriation for procurement of forage, bedding, etc., for animals, from "$1,002,800" to "$1,928,000."

The amendment was agreed to.

The next amendment was, on page 90, line 11, to increase the appropriation for compensation of help for care of matériel, animals, and equipment, from "$750,00" to "$1,910,500."

The amendment was agreed to.

The next amendment was, on page 90, line 12, to increase the appropriation for expenses, camps of instruction, from "$6,500,000" to "$9,500,000."

The amendment was agreed to.

The next amendment was, on page 90, line 17, to increase the appropriation for pay of property and disbursing officers for the United States from "$55,000" to "$60,000."

The amendment was agreed to.

The next amendment was, on page 90, line 22, to increase the appropriation for travel of officers and noncommissioned officers of the Regular Army in connection with the National Guard from "$200,000" to "$300,000."

Mr. WATSON of Georgia. Mr. President, I notice that in every one of these items there is an increase, and a very large increase. Should not the Senate have some explanation of the necessity for these very heavy increases?

Mr. WADSWORTH. Mr. President, the appropriations, as passed by the House of Representatives, with the exception of one item—the item known as "Pay of National Guard (armory drills)," which will be found on page 91, line 4—are inadequate for the support of the guard as now constituted, officers and men. There are 150,000 officers and men in the National Guard to-day, as contrasted with something like 100,000 a year ago. The guard has been growing steadily and healthily under the provisions of law. The States have joined in helping the guard very loyally and cheerfully. Several of them have built armories to house the units, have provided places where the Federal property may be taken care of, and in every way have shown a quality of teamwork with the Federal Government which is most encouraging.

The appropriations suggested by the Senate committee are just sufficient to meet the obligations imposed upon the Federal Government under the law in proportion to the present strength and prospective strength during the next fiscal year of the National Guard.

For example, it is estimated that there will be 160,000 men in the National Guard by July 1. A few new units will be admitted, federalized, and units already existing are being recruited to greater strength within the peace limitation. Those men are all entitled to go, and should go under the statute, to a summer training camp for 15 days. The House appropriation for the summer training camps would only be sufficient to send about 105,000 or 110,000 men. It would leave behind—uncared for, unrecognized, unencouraged, and contrary to the spirit of the law itself—something like 40,000 or 45,000 National Guard men. The summer training camp, of course, is the most valuable training that the guard receives in its entire year of training and instruction; so the Senate committee believed that the appropriation for the expenses of camps of instruction found on line 12 of page 90 should be increased to the amount which is actually necessary to carry out the statute and meet the spirit of the guard and the spirit of the States which have helped form the guard.

To fail to do so is merely to neglect and ignore the statute which the Congress itself passed in 1920, and, worse than that, to neglect and ignore these citizen soldiers who have enlisted in the citizen component of the Army of the United States, who want to go to the camps, who are entitled to go under the statute, and, even worse than that, it is to ignore the States themselves, who through their governors and adjutants general have joined in this work so cheerfully and loyally.

Let me say to the Senator from Georgia that every one of these increases is suggested by the committee simply and solely for the purpose of taking care of the guard as it will stand during the next fiscal year. The sum total of them is actually below the estimates made by the Budget Director, but is sufficient, in the view of the committee, to take care of the guard for the next fiscal year. The guard, it is expected, will start the fiscal year with 160,000 men. It probably will average throughout the next fiscal year in the neighborhood of 180,000 to 190,000.

This bill will permit 160,000 to go to camp this coming summer. The training camp season starts about the 1st of July. This bill will also enable the guard to keep the horses which the Federal Government has supplied to it. The Senator from Georgia will probably recollect that under the statute each troop of cavalry of the guard and each battery of field artillery is furnished with 30 horses by the Federal Government. Of course, the men in those units secure additional horses in nearly every case. The Government merely supplies the nucleus of the horses for these mounted units, and under the statute the Government is to supply the hay and grain for those horses. There are 8,000 of those Government horses in the possession of the guard to-day. The House appropriation for forage is sufficient to supply hay and grain for only 4,000 horses, so that over 4,000 Government horses will starve, or must be taken away from the guard and sent back to Federal remount stations, thereby dismounting troops of cavalry and batteries of field artillery of the National Guard, and in effect destroying the efficiency, the morale, and the enthusiasm of the fine young men who have enlisted in the mounted branches of the National Guard. That, in brief, is the feeling of the committee concerning this amendment.

Mr. BORAH. Mr. President, what is the size of the National Guard at the present time; about 175,000?

Mr. WADSWORTH. No; at present it is about 150,000, but with the units which are to be admitted and federalized in the next month, and taking into consideration also the increase in

the size of the units now recognized by ordinary recruiting, it is expected that by July 1 it will be 160,000. These appropriations will take care of that number in the camps.

Mr. BORAH. I read in the hearings that it would be increased within a certain time, I believe it was after this fiscal year, to 190,000.

Mr. WADSWORTH. It is expected that it will reach that number some time late in the fiscal year, but that number can not be reached until some time after the expiration of the training-camp period, which, of course, is in the summer.

Mr. WATSON of Georgia. Mr. President, I am entirely friendly to the organization known as the National Guard, though I very much regretted the revolution in the system that took away from State governors their discretion as to whether they would respond to the call of the President. When that proposition was offered in the House 30 years ago by General Cutting, of California, I was able to attract the attention of the chairman of the Special Judiciary Committee, Col. William C. Oates, of Alabama, and with his assistance we defeated the measure and left the law as to the State militia as it was. Some years afterwards Congress passed the Dick bill, which entirely changed the system.

The Senator from New York will doubtless recall that at the time of the whisky rebellion in Pennsylvania President Washington and Alexander Hamilton called up Governor Mifflin, of Pennsylvania, Governor Lee, of Virginia, and the Governor of Maryland, whose name at this moment I do not recall, and the Governors of Virginia and Pennsylvania led their State contingents into the field to the point of rendezvous. The Governor of Maryland, as I remember, was sick and could not go, but he sent his representative, who led the Maryland contingent. It was not until those State troops came into the field that the Federal officers took charge of them.

It has always seemed to me a very dangerous proposition for the initiative on the part of the State and the discretion on the part of the governor to be taken away and the power given to the President to arbitrarily send troops of New England into the South, or vice versa, from the South into New England; troops of the South into the West or troops of the West into the North, without any discretion on the part of the governor at all as to whether he would assign State troops to that duty. But, as we now have this system, the explanation of the Senator from New York is entirely satisfactory.

The amendment was agreed to.

The next amendment was, on page 91, at the end of line 4, to insert a colon and the following proviso:

Provided, That 25 per cent of the foregoing amounts for arming, equipping, and training the National Guard shall be available interchangeably for expenditure for the purposes named; but not more than 25 per cent shall be added to the amount appropriated for any one of such purposes.

The amendment was agreed to.

The next amendment was, on page 92, line 19, after the word "Artillery," to strike out the comma after the words "Engineer or Signal," and insert "or Engineer," so as to make the additional proviso read:

Provided further, That the Secretary of War is hereby directed to issue from surplus or reserve stores and matériel now on hand and purchased for the United States Army such articles of clothing and equipment and Field Artillery, Engineer, and Signal matériel and ammunition as may be needed by the National Guard organized under the provisions of the act entitled "An act for making further and more effectual provision for the national defense, and for other purposes," approved June 3, 1916, as amended by the act approved June 4, 1920. This issue shall be made without charge against militia appropriations. None of the funds appropriated in this paragraph shall be used for purchase of arms, Field Artillery or Engineer matériel, public animals, or chevrons.

The amendment was agreed to.

The next amendment was, on page 92, after line 21, to strike out:

The mounted, motorized, and tank units of the National Guard shall be so reduced that the appropriations made in this act shall cover the entire cost of maintenance of such units for the National Guard during the fiscal year 1923.

The amendment was agreed to.

The next amendment was at the top of page 93, to insert:

None of the funds appropriated in this act shall be available for the organization or equipment or field training of new Cavalry, motorized, tank, or air units of the National Guard presented for Federal recognition after the passage of this act.

The amendment was agreed to.

The next amendment was, under the subhead "United States Military Academy. Pay of Military Academy," on page 93, after line 13, to strike out:

Permanent establishment: For pay of seven professors, $26,500; one chaplain, $2,400; master of the sword, $3,500.
For pay of cadets, 1,300 at $780 each, $1,014,000.
The pay of cadets for the fiscal year ending June 30, 1923, shall be fixed at $780 per annum and one ration per day or commutation thereof at the rate of $0.75 per ration, to be paid from the appropriation for the subsistence of the Army.
For pay of one constructing quartermaster, in addition to his regular pay, $1,000.
For additional pay of professors and officers for length of service, $8,000.
Military Academy band: For pay of Military Academy band: One master sergeant, at $74 per month, $888.
Fifteen staff sergeants, at $45 each per month, $8,100.
Fifteen privates, first class, at $35 each per month, $6,300.
Twenty privates, at $30 each per month, $7,200.
Fifteen specialists, second class, at $20 each per month, $3,600.
Twenty specialists, third class, at $15 each per month, $3,600.
Additional pay for length of service, $4,500.
In all, Military Academy band, $34,188.
Field musicians: For pay of field musicians: One staff sergeant, at $45 per month, $540.
Two corporals, at $37 each per month, $888.
Seven privates, first class, at $35 each per month, $2,940.
Twenty-one privates, at $30 each per month, $7,560.
Twenty-eight specialists, sixth class, at $3 each per month, $1,008.
Additional pay for length of service, $990.
In all, field musicians, $13,926.
Service detachment: For pay of service detachment:
One first sergeant, at $53 per month, $636.
Forty-seven sergeants, at $45 each per month, $25,380.
Twenty corporals, at $37 each per month, $8,880.
Fifty-five privates, first class, at $35 each per month, $23,100.
One hundred and fifty-three privates, at $30 each per month, $55,080.
Forty specialists, third class, at $15 each per month, $7,200.
Fifty specialists, fourth class, at $12 each per month, $7,200.
Eighty specialists, fifth class, at $8 each per month, $7,680.
Additional pay for length of service, $23,360.
In all, service detachment, $158,516.
Cavalry detachment: For pay of Cavalry detachment:
One first sergeant, at $53 per month, $636.
Fourteen sergeants, at $45 each per month, $7,560.
Sixteen corporals, at $37 each per month, $7,104.
Sixty-five privates, first class, at $35 each per month, $27,300.
One hundred and twenty-four privates, at $30 each per month, $44,640.
Ten specialists, fourth class, at $12 each per month, $1,440.
Thirteen specialists, fifth class, at $8 each per month, $1,248.
Two specialists, sixth class, at $3 each per month, $72.
For additional pay for length of service, $14,000.
In all, Cavalry detachment, $104,000.
Artillery detachment: For pay of Artillery detachment:
One first sergeant, at $53 per month, $636.
Twenty-three sergeants, at $45 each per month, $12,420.
Twenty-one corporals, at $37 each per month, $9,324.
Seventy-five privates, first class, at $35 each per month, $31,500.
One hundred and eighteen privates, at $30 each per month, $42,480.
Eight specialists, fourth class, at $12 each per month, $1,152.
Fifteen specialists, fifth class, at $8 each per month, $1,440.
Three specialists, sixth class, at $3 each per month, $108.
For additional pay for expert first-class gunners at $5 each per month, first-class gunners at $3 each per month, and second-class gunners at $2 each per month, $6,000.
Additional pay for length of service, $9,000.
In all, Artillery detachment, $114,060.
Engineer detachment: For pay of Engineer detachment: One first sergeant, at $53 per month, $636.
Three staff sergeants, at $45 each per month, $1,620.
Nine sergeants, at $45 each per month, $4,860.
Twelve corporals, at $37 each per month, $5,328.
Thirty-nine privates, first class, at $35 each per month, $16,380.
Fifty-two privates, at $30 each per month, $18,720.
Additional pay for length of service, $5,000.
Additional pay for marksmen, sharpshooters, and expert riflemen, $2,400.
Two specialists, third class, at $15 each per month, $360.
Three specialists, fourth class, at $12 each per month, $432.
Two specialists, sixth class, at $3 each per month, $72.
In all, Engineer detachment, $55,808.
Signal Corps detachment: For pay of Signal Corps detachment: One master sergeant, at $74 per month, $888.
One technical sergeant, at $53 per month, $636.
One staff sergeant, at $45 per month, $540.
Two sergeants, at $45 each per month, $1,080.
Two corporals, at $37 each per month, $888.
Three privates, first class, at $35 each per month, $1,260.
Two privates, at $30 each per month, $720.
One specialist, fifth class (chauffeur), at $8 per month, $96.
Additional pay for length of service, $648.40.
Additional pay for expert military telegrapher, first-class military telegrapher, and military telegrapher, $324.
In all, Signal Corps detachment, $7,080.40.
Coast Artillery detachment: For pay of Coast Artillery detachment:
One first sergeant, at $53 per month, $636.
One master sergeant, at $74 per month, $888.
One technical sergeant, at $53 per month, $636.
One staff sergeant, at $45 per month, $540.
Five sergeants, at $45 each per month, $2,700.
Twenty-one privates, first class, at $35 each per month, $8,820.
Nine specialists, fifth class, at $8 each per month, $864.
For additional pay for first-class gunners, at $3 each per month, and second-class gunners, at $2 each per month, $1,080.
Additional pay for length of service, $2,000.
For additional pay of rated men (2 plotters, 1 observer, first class, 1 observer, second class, and 4 gun commanders), $744.
In all, Coast Artillery detachment, $18,908.
Miscellaneous: Travel allowance due enlisted men on discharge, $5,000.
Interest on deposits due enlisted men, $2,000.
Additional pay of enlisted men under the last proviso of section 4b of the Army reorganization act of June 4, 1920, $5,000.
For pay of one warrant officer, to be on duty in the headquarters, United States Corps of Cadets, $1,320.
For pay of two staff sergeants, to be on duty in the headquarters, United States Corps of Cadets, at $45 each per month, and additional pay for length of service, $1,296.
For pay of one master sergeant, $1,243.20.

For pay of one master sergeant, $1,154.40.
For pay of one staff sergeant, $648.
For pay of civilians:
One teacher of music, $2,000.
For pay of nine clerks in the office of the quartermaster, as follows:
One chief clerk, $1,800.
One clerk, $1,500.
Two clerks, at $1,400 each, $2,800.
Two clerks, at $1,200 each, $2,400.
Three clerks and stenographers, at $1,200 each, $3,600.
For pay of one expert architectural draftsman in office of constructing quartermaster, $2,500.
For pay of 12 clerks and stenographers employed at headquarters, United States Military Academy, in the offices of the superintendent and adjutant, as follows:
One chief clerk, $1,800.
One clerk and stenographer to superintendent, $1,500.
Three clerks, at $1,400 each, $4,200.
One clerk, $1,400.
Six clerks, at $1,000 each, $6,000.
For pay of one clerk to the treasurer, $1,800.
For pay of one clerk and stenographer in the office of the commandant of cadets, $1,200.
For pay of two civilian instructors of French, to be employed under the rules prescribed by the Secretary of War, at $2,000 each, $4,000.
For pay of two civilian instructors of Spanish, to be employed under the rules prescribed by the Secretary of War, at $2,000 each, $4,000.
For pay of two expert civilian instructors in fencing, broadsword exercises, and other military gymnastics as may be required to perfect this part of the training of cadets, at $1,500 each, $3,000.
For pay of one professional civilian instructor in military gymnastics, fencing, boxing, wrestling, and swimming, $1,500.
For pay of two expert assistant civilian instructors in military gymnastics, fencing, boxing, wrestling, and swimming, at $2,000 each, $4,000: *Provided*, That these civilian instructors employed in the department of modern languages and the department of tactics shall be entitled to public quarters and fuel and light.
For pay of one librarian, $3,000.
For pay of one assistant librarian, $1,500.
For pay of one custodian of gymnasium, $1,200.
For pay of one superintendent of gas works, $1,500.
For pay of one chief engineer of power plant, whose duties will include those of engineer of heating and ventilating apparatus, $2,700.
For pay of one assistant chief engineer of same, $1,100.
For pay of three assistant engineers of same, at $1,200 each, $3,600.
For pay of eight firemen, at $780 each, $6,240.
For pay of two oilers for power plant, at $720 each, $1,440.
For pay of one draftsman in the department of civil and military engineering, $1,200.
For pay of one mechanic and attendant skilled in the technical preparation necessary to chemical and electrical lectures and to the instruction in mineralogy and geology, $1,200.
For pay of one mechanic assistant in department of natural and experimental philosophy, $840.
For pay of one custodian of academy buildings, $1,000.
For pay of one electrician, $1,600.
For pay of one chief plumber, $1,600.
For pay of one assistant plumber, $900.
For pay of one plumber's helper, $600.
For pay of one scavenger, at $60 a month, $720.
For pay of one chapel organist and choirmaster, $1,500.
For pay of one superintendent of post cemetery, $1,200.
For pay of one engineer and janitor of Memorial Hall, $900.
For pay of one printer at headquarters, United States Military Academy, $1,600.
For pay of one assistant printer at headquarters, United States Military Academy, $1,100.
For pay of one janitress, Memorial Hall, $600.
For pay of one master mechanic, $1,800.
For pay of one clerk and photographer in the department of drawing, $1,300.
For pay of one stenographer, typewriter, and attendant in charge of the library in the department of law, $900.
For pay of one overseer of the waterworks, $720.
For pay of one engineer of steam, electric, and refrigerating apparatus for the cadets' mess, $1,200.
For pay of one copyist, stenographer, clerk, librarian, typewriter, and attendant in the department of modern languages, $1,040.
For pay of one mechanic and attendant skilled in the operation necessary for the preparation of lectures and of material in the department of drawing, $720.
For pay of one janitor for bachelor officers' quarters, $600.
For pay of one stenographer, typewriter, and attendant in the department of English and history, $840.
For pay of one bookbinder at headquarters, United States Military Academy, $1,200.
For pay of two book sewers in bindery, at $540 each, $1,080.
For pay of one skilled pressman in the printing office, headquarters, United States Military Academy, $1,100.
For pay of one charwoman, headquarters, United States Military Academy, $480.
For pay of one messenger for the Superintendent of the United States Military Academy, $720.
For pay of one skilled copyist, confidential stenographer, librarian, typewriter, and attendant in the department of mathematics, $1,000.
For pay of one stenographer, typewriter, and clerk in the medical department and department of military hygiene, $840.
For pay of one confidential stenographer, copyist, librarian, typewriter, and multigraph operator in the department of natural and experimental philosophy, $1,000.
In all, pay of civilians, $106,380.

And in lieu thereof to insert:

Permanent Establishment: For seven professors, $27,000; chaplain, $2,400; master of the sword, $3,500; constructing quartermaster, in addition to his regular pay, $1,000; additional pay of professors and officers for length of service, $11,345; subsistence allowance of professors and officers, $4,599; in all, $49,844.
For 1,300 cadets, $1,014,000.
Military Academy Band: Master sergeant; 15 staff sergeants; 15 privates, first class; 20 privates; specialists—15, second class, 20, third class; additional pay for length of service; in all, $39,882.
Field musicians: Staff sergeant; 2 corporals; 7 privates, first class; 21 privates; 28 specialists, sixth class; additional pay for length of service; in all, $13,450.
Service Detachment: First sergeant; 47 sergeants; 20 corporals; 55 privates, first class; 153 privates; specialists—40, third class, 50, fourth class, 80, fifth class; additional pay for length of service; in all, $156,648.
Cavalry detachment: First sergeant; 14 sergeants; 16 corporals; 65 privates, first class; 124 privates; specialists—10 fourth class, 13 fifth class, 2 sixth class; additional pay for length of service; in all, $99,039.
Artillery detachment: First sergeant; 23 sergeants; 21 corporals; 75 privates, first class; 118 privates; specialists—8 fourth class, 15 fifth class, 3 sixth class; additional pay for qualification in gunnery; additional pay for length of service; in all, $105,543.
Engineer detachment: First sergeant; 3 staff sergeants; 9 sergeants; 12 corporals; 39 privates, first class; 52 privates; specialists—2 third class, 3 fourth class, 2 sixth class; additional pay for length of service; additional pay for qualification in marksmanship; in all, $53,433.
Signal Corps detachment: Master sergeant; technical sergeant; staff sergeant; 2 sergeants; 2 corporals; 3 privates, first class; 2 privates; specialist, fifth class (chauffeur); additional pay for length of service; in all, $8,127.
Coast Artillery detachment: First sergeant; master sergeant; technical sergeant; staff sergeant; 5 sergeants; 21 privates, first class; 9 specialists, fifth class; additional pay for qualification in gunnery; additional pay for length of service; in all, $18,285.
Miscellaneous: Travel allowance due enlisted men on discharge; interest on deposits due enlisted men; warrant officer and 2 staff sergeants for duty in the Cadet Corps headquarters; 2 master sergeants; staff sergeant; additional pay for length of service; in all, $15,418.
Civilians: Teacher of music, $2,000; two chief clerks at $1,800 each; clerks—1 $1,500, 6 at $1,400 each, 2 at $1,200 each, 6 at $1,000 each; 4 clerks and stenographers at $1,200 each; clerk and stenographer to superintendent, $1,500; clerk to the treasurer, $1,800; expert architectural draftsman, $2,500; 2 civilian instructors of French and 2 civilian instructors of Spanish, to be employed under rules prescribed by the Secretary of War, at $2,000 each; 2 expert civilian instructors in fencing, broad-sword exercises, and other military gymnastics, at $1,500 each; professional and expert assistant civilian instructors in military gymnastics, fencing, boxing, wrestling, and swimming—2 at $2,000 each, 1 $1,500; librarian, $3,000; assistant librarian, $1,500; custodian of gymnasium, $1,200; superintendent of gas works, $1,500; chief engineer of power plant, $2,700; assistant chief engineer of power plant $1,100; 3 assistant engineers of power plant at $1,200 each; 8 firemen at $780 each; 2 oilers at $720 each; draftsman, $1,200; mechanic and attendant, $1,200; mechanic assistant, $840; custodian of academy buildings, $1,000; electrician, $1,600; chief plumber, $1,600; assistant plumber, $900; plumber's helper, $600; scavenger, $720; chapel organist and choirmaster, $2,500; superintendent of post cemetery, $1,200; engineer and janitor of Memorial Hall, $900; printer, $1,600; assistant printer, $1,100; janitress, Memorial Hall, $600; master mechanic, $1,800; clerk and photographer, $1,300; stenographers, typewriters, attendants, copyists, clerks, librarians, or multigraph operators—1 $1,040, 2 at $1,000 each, 1 $900, 2 at $840 each; overseer of waterworks, $720; engineer of steam, electric, and refrigerating apparatus, $1,200; mechanic and attendant, $720; janitor, $600; bookbinder, $1,200; 2 book sewers at $540 each; skilled pressman, $1,100; charwoman, $480; messenger, $720; in all, $107,380: *Provided*, That the civilian instructors employed in the departments of modern languages and tactics shall be entitled to public quarters, fuel, and light.

Mr. WADSWORTH. Mr. President, I think just a word of explanation of this amendment would be serviceable to Senators who have not served on the Appropriations Committee working on the bill. The amendment, while it appears to be very extensive in the number of pages it covers, makes but one or two actual changes in the Military Academy appropriations.

The purpose of the committee was to conserve space in printing. It will be noted that the bill as it reached the Senate from the House was printed in such fashion as to take up many pages of print. It is itemized, and the items are strung along in such a way as to cover something like 15 pages. Several members of the committee have discussed this in years gone by, and upon encountering it in this bill, the committee made up its mind that it would present this portion of the bill to the Congress in compact form, covering exactly the same items, but printed in such a way that, instead of using up 15 to 19 pages, it can be contracted into 4 or 5 pages. That is the object of striking out page after page of the House text, and substituting the committee amendment.

I merely want to call attention to the changes which are made in the first amendment. The pay of seven professors of the Military Academy is raised from $26,500 to $27,000, that being due to the new pay bill.

There are other changes in the total of pay of the different military detachments stationed at the academy, and those changes in the aggregate form a reduction as compared with the House text, and each of them is due to the change in the pay schedules in accordance with the new pay bill.

One salary is raised, that of a civilian—I refer to the organist and choirmaster at West Point. It is proposed that his salary should be raised from $1,500 to $2,500, for reasons which the committee believe were exceedingly good. In fact, the committee was unanimous in its belief that this man, who has made an extraordinary success at West Point, shall receive for his services at least $2,500.

So far as the paragraph "Pay, Military Academy," is concerned, I think I have pointed out the changes made by the

Senate. They result in an actual decrease of about $5,800 in the total of pay for the Military Academy.

So I ask that the amendment, commencing on line 14, page 93, striking out all of the bill down to line 4, page 104, and substituting the matter in italics commencing on line 5, page 104, and extending to line 19, page 107, be considered as one amendment, striking out and substituting practically the same text.

The amendment was agreed to.

The next amendment was, on page 107, line 20, to reduce the total appropriation for pay, Military Academy, from "$1,685,928" to "$1,681,049."

The amendment was agreed to.

The next amendment was, on page 107, after line 21, to insert:

All the moneys hereinbefore appropriated for pay of the Military Academy shall be disbursed and accounted for as pay of the Military Academy, and for that purpose shall constitute one fund.

The amendment was agreed to.

Mr. BORAH. There is a provision in the law passed at the last session of Congress with reference to inhibiting deficits. Is that in this bill?

Mr. WADSWORTH. It is in the same place in this bill. As I recollect, the Senator from Idaho was the author of it.

Mr. BORAH. It is kept in this bill?

Mr. WADSWORTH. It is kept here. I am quite sure I know what the Senator refers to, the so-called Borah amendment, which is kept in this bill.

The next amendment was, under the subhead "Maintenance, United States Military Academy," on page 108, after line 1, to strike out:

Current and ordinary expenses: For the expenses of the members of the Board of Visitors, or so much thereof as may be necessary, $750.
Contingencies for superintendent of the academy, $3,000.
Repairs and improvements, namely: Timber, plank, boards, joists, wall strips, laths, shingles, slate, tin, sheet lead, zinc, screws, nails, locks, hinges, glass, paints, turpentine, oils, labor, etc., $55,000.
For fuel and apparatus, namely: Coal, wood, etc., including labor, $60,000.
For gas pipes, gas and electric fixtures, etc., $10,000.
For fuel for cadets' mess hall, shops, and laundry, $15,000.
For postage and telegrams, $1,200.
For stationery, namely: Blank books, paper, etc., $3,500.
For transportation of materials, cadets, discharged cadets, etc., $15,000.
Printing and binding, etc., $3,000.
For department of Cavalry, Artillery, and Infantry tactics: Tan bark or other proper covering for riding hall, to be purchased in open market upon written order of the superintendent, $1,500.
For camp stools, office furniture, etc., $4,000.
For gymnasium and athletic supplies, etc., $7,500.
For the maintenance of one automobile, $300.
For repairs to saddles, bridles, etc., $500.
For the purchase of carbons and for repairs and maintenance of searchlights, etc., $250.
For the purchase of stationery and office supplies for the office of senior instructor of Coast Artillery tactics, $75.
For the purchase of machines, tools, textbooks, and material for the practical instruction of cadets in the maintenance, repair, and operation of all classes of motor transportation and automobile or internal combustion engines, $1,000.
For repair of mattresses, machines, etc., in gymnasium of Cavalry barracks, $100.
For material for hurdles, etc., riding hall, $600.
For general maintenance and repairs to the site of the cadet camp, $10,000.
For repair of obstacles on mounted drill ground, and for constructing other obstacles, etc., $100.
For the purchase of thread, wax, needles, etc., in the Cavalry stables, $200.
For the purchase of thread, wax, needles, etc., in the Artillery stables, $200
For material for preserving floors, etc., Artillery barracks and stables, $150.
For the purchase of tools, machines, etc., Artillery gun shed, $500.
For repair to mattresses, machines, etc., in drill hall and gymnasium of Artillery barracks, $100.
For the purchase of new and upkeep of worn-out rubber matting in squad rooms of Artillery barracks, $150.
For purchase of stationery and office furniture in office of senior assistant instructor of Field Artillery tactics, $100.
For material for preserving floors, etc., Cavalry barracks and stables, $100.
For repair of mattresses, machines, etc., in drill hall and gymnasium of Engineer barracks, $100.
For department of civil and military engineering: Textbooks, stationery, etc., $1,200.
For department of natural and experimental philosophy: Textbooks, apparatus, etc., $3,500.
For department of instruction in mathematics: Textbooks, stationery, etc., $1,250.
For department of chemistry, mineralogy, and geology, $2,500.
For department of drawing: Drawing materials, etc., $2,000.
For department of modern languages: Stationery, etc., $1,900.
For department of law: Books, stationery, etc., $2,000.
For department of practical military engineering: Models, books, stationery, etc., $4,500.
For department of ordnance and gunnery: Models, instruments, books, etc., $2,150.
For the purchase of machines, tools, etc., for practical instruction of cadets in wood and metal working, $500.
For department of military hygiene, $500.
For department of English and history: For purchase of stationery, books, etc., $1,000.
For department of economics and government and political history: Purchase of textbooks, stationery, etc., $1,000.
For a course of lectures for the more complete instruction of cadets, $1,200.
For the maintenance of one automobile truck, $300.
In all, current and ordinary expenses, $219,475.
Miscellaneous items and incidental expenses: For commercial periodicals, stationery, etc., for the office of the treasurer United States Military Academy, $300.
For gas coal, oil, candles, etc., for operating the gas plant, $18,000.
For water pipe, plumbing, and repairs, $8,000.
For material and labor for cleaning and policing public buildings, $6,620.
For supplies for recitation rooms not otherwise provided for and for renewing and repairing furniture in same, $1,000.
Increase and expense of library, $7,200.
For contingent funds, to be expended under the direction of the academic board: For instruments, books, repairs to apparatus, and other incidental expenses not otherwise provided for, $500: *Provided*, That all technical and scientific supplies for the departments of instruction of the Military Academy shall be purchased by contract or otherwise, as the Secretary of War may deem best.
For the purchase and repair of instruments and maintenance of the band, $1,500.
For the repair and purchase of cooking utensils, chairs, etc., cadet mess, which may be expended without advertising, to be immediately available, $3,000.
For the policing of barracks and bathhouses, $25,000.
For supplying light and plain furniture to cadets' barracks, $10,000.
For the purchase and repair of cocoa matting for the aisleways in the stables of the riding hall, $300.
For maintaining the children's school, etc., $6,500.
For purchase and repair of fire-extinguishing apparatus, $1,000.
In all, miscellaneous items and incidental expenses, $88,920.
Buildings and grounds: For cases, materials, etc., ordnance museum in headquarters building, $1,500.
For repairs to ordnance laboratory and other buildings pertaining to department of ordnance and gunnery, $150.
For general repairs to cadet laundry building, etc., to be expended without advertising, $400.
For general incidental repairs and improvements to the cadet store building, including storerooms, office, tailor shops, and shoe-repairing shops, $1,000.
For materials and labor for repairs, etc., soldiers' hospital, $165.
For repair and upkeep of quarters of the staff sergeant, Medical Department, at soldiers' hospital, $50.
For waterworks, $3,000.
For the repair and restoration of retaining walls along the line of the Poplopen pipe line, $3,000.
For carrying on the development of the general plan for improvements to roads and grounds, $3,000.
For repairs and necessary alterations and additions to the cadet hospital, as follows: For materials for radiators, piping, furniture, etc., $120.
For purchase of flowers and shrubs for hospital grounds, $100.
For repairing the cadet exchange, $1,000.
For necessary repairs and replacements in steam heating system and line in cadet mess, which may be expended without advertising, $1,000.
For repairs to the cadet mess building, which may be expended without advertising and to be immediately available, $1,000.
For repairs and improvements to the West Point Army mess building, including supplying and renewing furniture and fittings, $2,500.
Altering coal bunkers in power plant, $10,000.
For repair and maintenance of the cadet boathouse and the purchase and maintenance of boats and canoes for the instruction of cadets in rowing, $750.
For the repair and upkeep of quarters of the master sergeant, Medical Department, at the cadet hospital, $50.
For repairs to the cadet barracks, to be immediately available, $15,000.
For maintaining and improving grounds of post cemetery, $2,000.
For continuing the construction of breast-high wall in dangerous places, $1,000.
For broken stone and gravel for roads, $10,000.
For repairs of boilers, engines, dynamos, motors, etc., cadet mess, which may be expended without advertising, to be immediately available, $3,350.
For the repair and improvement of cadet polo field, $600.
For waterproofing the post headquarters, bachelor, gymnasium, and other large buildings, $2,000.
For care and maintenance of organ in cadet chapel, $250.
For general repairs to the buildings of the Coast Artillery fire-control system, $100.
For material and labor for repair of Field Artillery target range, $500.
For repair and upkeep of stable No. 4 and corral, for purchase of paint, nails, etc., $300.
For erection of steel hangar now on hand, $1,500.

And to insert in lieu thereof:

For text and reference books for instruction; increase and expense of library; office equipment and supplies; stationery, blank books, forms, printing and binding, periodicals; expenses of lectures (not to exceed $1,200); equipment, supplies, and materials for purposes of instruction and athletics and maintenance and repair thereof; musical instruments and maintenance of band; equipment for cadet mess; postage, telephones and telegrams; freight and expressage; transportation of cadets and discharged cadets; maintenance of children's school; contingencies for Superintendent of the Academy (not to exceed $3,000); expenses of the members of the Board of Visitors; contingent fund, to be expended under the direction of the academic board, for instruments, books, repairs to apparatus, and other incidental expenses not otherwise provided for (not to exceed $500); improvement, repair, and maintenance of buildings and grounds (including roads, walls, and fences), and labor, material, and equipment incident thereto; water and sewers; maintenance and repairs to cadet camp site; fire extinguishing apparatus; machinery and tools and repair of same; maintenance, repair, and operation of an automobile and one motor truck; policing buildings and grounds; furniture for official purposes at the Academy; fuel for heat, light, and power; and other necessary incidental expenses in the discretion of the superintendent; in all, $357,580, of which $7,350 shall be immediately available.
For altering coal bunkers in power plant, $10,000.
For repairs to the cadet barracks, to be immediately available, $15,000.
For erection of steel hangar now on hand, $1,500.

Mr. WADSWORTH. This is the same sort of an amendment as the one I described a few moments ago. It is to consolidate the printing of the bill, to shorten it, and thereby to save really thousands and thousands of dollars in printing bills for the Government. But I desire to perfect the committee amendment.

On page 116, line 14, after the word "power" at the end of the line and before the semicolon, I move to insert in parentheses the words "not exceeding $65,000."

The amendment to the amendment was agreed to.

Mr. WADSWORTH. I desire to offer one more perfecting amendment, to conform to the amendment which has just been adopted. On line 16, page 116, the figures "$350,580" should be stricken out, and there should be substituted the figures "$352,580."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The amendment was agreed to.

The next amendment was, on page 117, after line 12, to strike out:

In all, buildings and grounds, $65,685.

The amendment was agreed to.

The next amendment was on page 117, in line 15, to strike out "$304,080" and insert in lieu thereof "$384,080."

Mr. WADSWORTH. The amendment should be changed to read "$379,080."

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from New York to the amendment of the committee.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment of the committee was, in line 16, to strike out "$2,060,008" and insert in lieu thereof "$2,065,129," so as to read:

In all, Military Academy, $2,065,129.

Mr. WADSWORTH. That should be corrected also as a total. It should read $2,060,129.

The PRESIDING OFFICER. The question is on the amendment to the amendment.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment was, on page 117, after line 16, to strike out:

No part of the moneys appropriated in this act shall be used for paying to any civilian employee of the United States Government an hourly wage or salary larger than that customarily paid by private individuals for corresponding work in the same locality.

The amendment was agreed to.

The next amendment was, on page 118, after line 2, to strike out:

Except as expressly otherwise authorized herein, no part of the sums appropriated by this act for military purposes shall be expended in the purchase from private manufacturers of any material at a price in excess of 25 per cent more than the cost of manufacturing such material by the Government, or, where such material is not or has not been manufactured by the Government, at a price in excess of 25 per cent more than the estimated cost of manufacture by the Government.

The amendment was agreed to.

The next amendment was, on page 118, after line 11, to strike out:

Expenditures for carrying out the provisions of this act shall not be made in such manner as to prevent the operation of the Government arsenals at their most economical rate of production, except when a special exigency requires the operation of a portion of an arsenal's equipment at a different rate.

The amendment was agreed to.

The next amendment was, on page 120, line 15, after the name "New Jersey," to strike out "$93,538.69" and to insert "$92,449.23"; at the end of line 21 to strike out "radio dynamic torpedoes, $720,000"; and on page 121, at the end of line 4, to strike out "$3,694,944.95" and to insert "$2,973,855.49," so as to read:

The following unexpended balances or portions of unexpended balances or combined unexpended balances or combined portions of unexpended balances of appropriations for the support of the Military Establishment and for other purposes shall be carried to the surplus fund and be covered into the Treasury immediately upon the approval of this act: Arming and equipping the militia, $178,120.96; field artillery for Organized Militia, $549.84; temporary office building, War Department, $4,907.10; military posts, Schofield Barracks, Hawaii, $856.60; transportation for refugee American citizens from Mexico, $50,846.69; transportation to China of Chinese refugees, $31,165; memorial archway at Vicksburg, Miss., $500; National Memorial Celebration and Peace Jubilee, Vicksburg, Miss., $23,229.63; medals for officers, men, etc., of National Guard, War with Spain, and Mexican border service, $207.87; equipping Army transports with lifeboats and rafts, $2,218.08; exchange of Army cold-storage plant, Chicago, Ill., $500; supply depot, Fort Sam Houston, Tex., $1,017.49; Army supply depot, Fort Mason, Calif., $2.64; road to national cemetery, Salisbury, N. C., $235.09; Signal Service of the Army, $407.10; repair and restoration of defenses of Galveston, Tex., $1,797.81; sea walls and embankments, Panama Canal, $3,270.99; land defenses, Panama Canal, $1,165.30; terminal storage and shipping buildings, $21,440.43; armament of fortifications, act of February 28, 1920, $2,619; proving ground, Sandy Hook, N. J., $92,449.23; ordnance depot, Panama Canal, $35,980.22; storage facilities at armories and arsenals, $1.45; automatic rifles, $2,439.20; ordnance depot, Honolulu, Hawaii, $42.68; Army powder factory, $2.40; international rifle competition, Camp Perry, Ohio, $2,202.38; inland and port storage and shipping facilities, $2,000,000; Frankford Arsenal, Philadelphia, Pa., $165,777.64; Picatinny Arsenal, Dover, N. J., $92,824.11; Rock Island Arsenal, Rock Island, Ill., $243,384.04; San Antonio Arsenal, San Antonio, Tex., $3,723.31; Springfield Arsenal, Springfield, Mass., $1,945.01; Watervliet Arsenal, West Troy, N. Y., $2,237.62; Watertown Arsenal, Watertown, Mass., $5,788.58; total appropriations recovered, $2,973,855.49.

The amendment was agreed to.

The next amendment was, under Title II—Nonmilitary activities of the War Department, subhead "Quartermaster Corps—National cemeteries," on page 121, line 20, after the word "Chapel," to insert a comma and the words "and an additional sum of $15,000 for said repairs is hereby appropriated," so as to make the paragraph read:

The unobligated balance of $5,000 of the appropriation for construction of the Arlington Memorial Amphitheater and Chapel is hereby made available for expenditure under the direction of the Quartermaster General, United States Army, for repairs to the Arlington Memorial Amphitheater and Chapel, and an additional sum of $15,000 for said repairs is hereby appropriated.

The amendment was agreed to.

The next amendment was, at the top of page 122, to strike out:

For reconditioning the road from Fort Gibson, Okla., to the Fort Gibson National Cemetery, Okla., $20,000.

The amendment was agreed to.

The next amendment was, on page 123, line 5, after the figures "$70,000," to strike out the colon and the following proviso:

Provided, That no part of this appropriation shall be used for the purchase of headstones of a design different from that heretofore furnished for the graves of Union and Confederate soldiers.

The amendment was agreed to.

The next amendment was, on page 124, line 1, after the word "Academy," to strike out "acting assistant" and to insert "contract"; at the beginning of line 2 to insert "members of the Army Nurse Corps"; in line 19, after the word "list," to insert "including civilian employees of the Army in the employ of the War Department who die abroad, in Alaska, in the Canal Zone, or on Army transports, or who die while on duty in the field"; and on page 125, line 4, after the word "France," to strike out "the sum of $400,000 is hereby made available during the fiscal year 1923 from the unobligated balance of the amounts available for this purpose for the fiscal year 1922" and to insert "for the care and maintenance of graves of officers, soldiers, and civilian employees of the Army abroad, including the erection of necessary buildings and improvements at permanent American cemeteries and care and maintenance thereof; the sum of $1,143,720 of the unobligated balances of the appropriations for 'Disposition of remains of officers, soldiers, and civilian employees,' for the fiscal years 1920, 1921, and 1922 is hereby made available for the fiscal year 1923 for the purposes set forth in this paragraph," so as to make the paragraph read:

Disposition of remains of officers, soldiers, and civilian employees: For interment, cremation (only upon request from relatives of the deceased), or of preparation and transportation to their homes or to such national cemeteries as may be designated by proper authority, in the discretion of the Secretary of War, of the remains of officers, cadets, United States Military Academy, contract surgeons, members of the Army Nurse Corps, and enlisted men in active service, and accepted applicants for enlistment; for interment or preparation and transportation to their homes of the remains of civilian employees of the Army in the employ of the War Department who die abroad, in Alaska, in the Canal Zone, or on Army transports, or who die while on duty in the field; interment of military prisoners who die at military posts; for the interment and shipment to their homes of remains of enlisted men who are discharged in hospitals in the United States and continue as inmates of said hospitals to the date of their death; for interment of prisoners of war and interned alien enemies who die at prison camps in the United States; for removal of remains from abandoned posts to permanent military posts or national cemeteries, including the remains of Federal soldiers, sailors, or marines interred in fields or abandoned private and city cemeteries; and in any case where the expenses of burial or shipment of the remains of officers or enlisted men of the Army who die on the active list, including civilian employees of the Army in the employ of the War Department who die abroad, in Alaska, in the Canal Zone, or on Army transports, or who die while on duty in the field, are borne by individuals, where such expenses would have been lawful claims against the Government, reimbursement to such individuals may be made of the amount allowed by the Government for such services out of this sum, but no reimbursement shall be made of such expenses incurred prior to July 1, 1910; expenses of the segregation of bodies in permanent American cemeteries in Great Britain and France; for the care and maintenance of graves of officers, soldiers, and civilian employees of the Army abroad, including the erection of necessary buildings and improvements at permanent American cemeteries and care and maintenance thereof; the sum of $1,143,720 of the unobligated balances of the appropriations for "Disposition of remains of officers, soldiers, and civilian employees," for the fiscal years 1920, 1921, and 1922 is hereby made available for the fiscal year 1923 for the purposes set forth in this paragraph.

The amendment was agreed to.

Mr. KING. Mr. President, may I inquire of the Senator whether, if the provision for the size of the Army should be changed and it should be reduced to the limit fixed by the House or any intermediate number, the items that are being considered now would have to be reverted to and changed in any way?

Mr. WADSWORTH. No; unfortunately this item can never be changed; it affects the dead in France.

Mr. KING. I refer to the various items just passed. I am not speaking of any particular one.

Mr. WADSWORTH. We are now on the nonmilitary activities of the War Department, none of which have anything to do with the size of the Army.

Mr. KING. Have all the items been passed over which would be required to be changed if the personnel provision were changed?

Mr. WADSWORTH. There are about three of them under the general group of items of pay of the Army—subsistence, transportation, and regular supplies.

Mr. KING. The question of military posts and forts is what I had in mind. Would not the number of those which are retained be materially modified if the number of the personnel of the Army was reduced to 100,000 or 107,000?

Mr. WADSWORTH. The truth of the matter is that the permanent posts in the United States are not now sufficient to hold the Army. Some of the Army is still in temporary cantonments and they are being given up anyway. We can not reduce the number of permanent posts. This bill, in effect, provides only for the care of permanent posts, as the temporary ones are being given up, and even then the posts will be crowded.

Mr. KING. I think the Senator was of the opinion, according to my recollection, that many of the large military posts, forts, and so forth, that we had for years, should be abandoned.

Mr. WADSWORTH. I think they should be.

Mr. KING. I agree with the Senator.

Mr. WADSWORTH. But we can not abandon them until we concentrate the housing facilities into a smaller number of posts and to do that means appropriations for the building of barracks.

Mr. KING. Are not provisions contained in the bill or in some other legislation for the abandonment of many of those posts which are unnecessary?

Mr. WADSWORTH. There are provisions contained in other legislation for the abandonment of certain installations. I do not think that there are any mandatory provisions of legislation concerning Army posts, but there are for depots, docks, wharves, munitions factories, and seaboard bases, and installation of that kind, at which Army personnel and civilian employees under the War Department are now stationed, and they, I should hope, would soon be withdrawn.

Mr. KING. The Senator knows far better than I that there are a good many posts in the interior of the United States, at various parts of the United States, which were deemed to be wholly unnecessary even if we had a large Army, much larger than that fixed in the bill. I was wondering if any provisions had been made in this legislation or in any other legislation for the permanent abandonment or disposition of some of those useless and unnecessary posts.

Mr. WADSWORTH. There has not.

Mr. KING. Does the committee intend to make any recommendation concerning that matter?

Mr. WADSWORTH. We understand that the House Committee on Military Affairs are giving a great deal of study to to the whole question of War Department real estate. I have no doubt they will determine the disposition of some of the old permanent posts as well as some of the real estate and buildings which were acquired during the war. But let me remind the Senator that the permanent posts, the old-time permanent posts which we had prior to our entrance into the war against Germany, in continental United States, will only house 72,000 men.

Mr. KING. Of course, many of those, as the Senator knows, no matter whether we had a large or small Army, would never be used again.

Mr. WADSWORTH. Nearly all of them are used, but I think it is uneconomical to use as many, scattered as they are. However, the Secretary of War has been powerless. He has no right to sell or get rid of any of the posts. He can close them, or rather move the troops away, but he has to leave a caretaking detachment there. So there is hardly any economy in moving the troops away from such posts, because they still have to be taken care of.

Mr. KING. That is what I had in mind, and I was about to call the attention of the Senator to the fact that a great deal of cost is incurred in the upkeep of those posts which are unnecessary. It occurred to me that we ought to make some disposition of them. I called the Senator's attention to the matter during the consideration of the last Army appropriation bill.

Mr. WADSWORTH. If the Army is ever permitted by the Congress to reach a point where it is stable in numbers and in distribution, then the War Department and the Congress can tell what posts should be abandoned and what posts should not. But ever since April 6, 1917, the Army has been in a state of flux, and is to-day. There is not an officer in the Army from the Secretary of War down who knows how big the Army is going to be or how long it is going to stay at any particular size. I wish Congress would finally make up its mind whether or not it wants an army; and if so, how large. When we make up our minds to that then we can tell how we shall house that army.

Mr. KING. I do not think the Senator can proceed upon the theory that there will be fixed for a definite period the number of officers and personnel of the Army.

Mr. WADSWORTH. That is not the theory upon which the posts are held.

Mr. KING. I understand that.

Mr. WADSWORTH. They can not be sold.

Mr. KING. Then why should we not report some legislation authorizing the disposition of those forts and posts?

Mr. WADSWORTH. I think it would be proper, but I must again point out to the Senator that it is almost impossible for any committee of Congress to lay down a general housing plan until the general military plan is laid down first.

Mr. KING. I agree with the Senator in that, but I have talked with some members of the staff as well as others, and I think it is the consensus of opinion of the Army officers that there are a good many posts in the United States that never will be utilized, no matter how large an Army we have. It does seem to me that as to those there should be some legislation providing for their disposition. Of course, I am not a member of the committee, and I can not force the committee to make any recommendation, but it does seem to me it ought to take that matter into account and make some recommendation.

Mr. HARRIS. Mr. President——

Mr. KING. I yield to the Senator from Georgia.

Mr. HARRIS. I think the Senator from Utah is exactly right about these posts. I hope the Senator will offer an amendment to the bill giving the Secretary of War power to dispose of the old posts that are not being used. They are an expense to the Government. I think, perhaps, the committee would agree to such an amendment. The Secretary of War ought to have that power, and as long as Congress does not give it to him he is powerless to do anything to save expense. We could use the money obtained from the sale of those posts in the enlargement of other posts where the Army would be stationed and thus save a good deal of money for the Government.

Mr. WADSWORTH. Let me say that I wish Congress would do something like that, but I have not the slightest hope that Congress will do any such thing. I do not believe Congress is going to authorize the Secretary of War to sell the Army posts in his discretion, for nearly every Member of Congress who has an Army post in his State would not want the Secretary of War to sell that post and hence would not vote to give the Secretary of War power to do it. I would vote to give the Secretary of War that power to-day.

Mr. KING. So would I.

Mr. WADSWORTH. But we will find terrific opposition to any such proposition.

Mr. KING. The Senator from Georgia expressed the wish that I would offer such an amendment. I dislike to do that. I have such confidence in the chairman of the Committee on Military Affairs, and I know he has labored so industriously and faithfully to prepare a good bill, that I would dislike to do that. I had hoped that the committee itself would see the wisdom and propriety of offering in the bill a provision of that character.

Mr. WADSWORTH. Of course, it would be legislation on an appropriation bill, and the committee had made up its mind that it must not attempt legislation on this bill which would arouse contenton, and, of course, result in a point of order. Such a point of order would cause the whole bill to go back to the committee. There were three little amendments which I have offered, which the committee has picked out as three legislative suggestions to which no one could ever object, and we decided to offer them on the floor after asking unanimous consent. However, the committee discussed this matter in connection with several other matters, and made up its mind that it would not offer as a part of the bill legislative amendments

which certainly would give rise to objection, and hence to a point of order, and hence to a recommittal of the bill.

Mr. KING. Much as I would like to see that legislation, I feel that I ought not to resist the attitude of the committee, but I do regret that the committee has not reported a bill of that character. I hope it will do so at an early date, because I think it is very unfortunate that we have to maintain such a large number of posts, at considerable expense, when it is apparent they never will be used. I think the committee ought to report a bill authorizing the Secretary of War, and, of course, he would consult the Chief of Staff and military officials, to make such investigation as he may deem necessary, and then to dispose of all military land and forts and posts that are regarded as unnecessary for the future needs of the Army.

Mr. WADSWORTH. Then we can not fix the housing for any definite period.

Mr. KING. That may be true, and yet we might determine whether certain forts and posts, whether there is a big or little Army shall be retained, because it is manifest there are a great many posts which, even though we had an Army of 500,000 men, would not be utilized. It seems to me the height of folly to keep these posts upon the theory that we have yet to determine how big the Army is going to be, and therefore we must hold on to them.

If the Senator from New York would report such a bill, I am sure he would find in this Chamber almost unanimous support for it.

Mr. WALSH of Montana. Mr. President, the anticipations of the Senator from New York [Mr. WADSWORTH] are perfectly well founded. He may expect opposition to any movement of that character. In my judgment, legislation of that kind would be exceedingly unwise. I think such posts as may have no military value ought to be disposed of individually. Take the post at my home town, Fort William Henry Harrison. The original site consisted of a thousand acres of land adjacent to the city and was acquired by popular subscription by the citizens of the community and presented to the Government as a site for that post. Additional lands have since been acquired by the Government. Upon what basis of justice is the Government now going to take that property and sell it to the highest bidder for private uses?

Take Fort Assinniboine, in the northern part of my State. That is an old post which was established during the time of the Indian troubles. It was a very famous headquarters for military operations. General Miles made his headquarters there for many years. Buildings were constructed there at very great cost to the Government of the United States. Congress eventually, after the post was abandoned, deemed it wise to present the buildings, with a portion of the grounds, to the State of Montana for the purpose of an agricultural experiment station. I think it would be a most unfortunate thing if that property had been put up for sale and sold to anybody who might be willing to take the buildings for their wreckage value, whatever that might be.

I think these posts ought to be disposed of in some way or other, but there are so many peculiar conditions surrounding the various posts that I think it would be exceedingly unwise to authorize the Secretary of War to dispose of them at public auction.

Mr. KING. I suggest to the Senator from Montana that it seems to me a general bill could be so framed as that the particular cases to which he has called attention and others might be guarded and provided for. For instance, there would be no impropriety, indeed, it would be quite proper, to provide in such a bill that where, as in the case first mentioned by the Senator from Montana, the citizens had purchased the property and had given it to the Government, the Secretary of War would have authority in a case of that kind out of the proceeds derived from the sale to refund to the State or to the people the amount which they had contributed.

Mr. WALSH of Montana. Let me instance Fort Assinniboine, which comprised at one time a great reservation of some 40,000 acres. The buildings, my recollection is, with 1,000 acres were donated to the State for educational purposes. The remainder of the 40,000 acres was open to settlement under conditions stipulated in the act. I think it would be an unfortunate thing to authorize the Secretary of War to sell off the 40,000-acre reservation to somebody who would use it for a cattle preserve. So I submit that it will be found exceedingly difficult to frame, as I think, a statute generally applicable to abandoned military reservations.

Mr. KING. I concede from the statement of the Senator from Montana that there would be some very serious difficulties in providing general legislation on the subject; but that only illustrates the proposition, that if we should attempt to enact general legislation, perhaps, there ought to be a supervisory board and a good deal of latitude provided. At any rate, if a general bill is not introduced, it would seem that a committee or the Secretary of War should be authorized to make a survey and report to Congress what military posts are unnecessary, with such recommendations as they feel it proper should be made. Then, Congress, acting upon that report, should take such steps in accordance therewith as it might deem necessary.

Mr. WALSH of Montana. That would seem to be quite wise, and some definite action ought to be taken with respect to that matter. A great deal of embarrassment has ensued by reason of the fact that it is impossible to get from the War Department a declaration of its purposes with reference to many posts that are not now occupied. If I remember aright, we sought to secure the use of quite a number of them for hospitalization of ex-service men who were suffering and in need of care. We asked that they be turned over to the Public Health Service. They had not been occupied for years for military purposes, yet the War Department apparently is unwilling either to occupy them or to let them go. Perhaps Congress should bear a share of the blame for not adopting a definite policy, as indicated by the Senator from New York, concerning the size of the Army, for, perhaps, it is impossible for the War Department to tell just how many ought to be preserved until they know exactly what the size of the Army is to be.

Mr. WATSON of Georgia. Mr. President, I recognize the force of what has been said by the Senator from Montana, but it seems to me that Congress might relinquish the Government's claim to these lands, allow the Senate to take title, and then let the States in their wisdom make some disposition of them. Perhaps each abandoned post would stand on a different footing. In my State there are some useless forts which are maintained at the expense of the Government, and I know that the State would like to have them and would make wise use of them; and no doubt the same thing would be done in Montana and in various other States. If the proposition were put up to Congress that each State should make its own disposition of these useless forts and relieve the Federal Government of the expense of their maintenance, it might meet the approval of both Houses.

Mr. BORAH. Mr. President, I want to ask the Senator in charge of the bill how many Army posts there are now?

Mr. WADSWORTH. In continental United States there are 240.

Mr. BORAH. I have been absent for a few moments and do not know what the discussion has been. Has there been any concerted or systematic action on the part of the department toward reducing the number of posts and getting rid of some of them?

Mr. WADSWORTH. There has been no concerted carefully planned out action, for the simple reason that the War Department has never been able to tell during the last two or three years how much of an Army we were going to have; but it is perfectly plain that, if the Army should once reach a figure of stability, the War Department would be able to recommend the abandonment of certain posts.

Mr. BORAH. I do not suppose that we will ever have anything like a recognized and established standard as to the size of the Army.

Mr. WADSWORTH. If it would not fluctuate so violently the department would be in a better position. Last year, it will be recalled, we discharged in three months 80,000 men, which was a very violent fluctuation, and this year it is proposed by a bill introduced in the Senate to discharge 75,000 more. Of course, the War Department can not tell where it stands with legislation of that kind pending all the time.

Mr. BORAH. I do not know who introduced that bill.

Mr. WADSWORTH. The Senator from Utah [Mr. KING].

Mr. BORAH. I thought the Senator from New York was referring to me.

Mr. WADSWORTH. No; the Senator from Utah "saw it first."

Mr. BORAH. What I was going to say was that we will scarcely have an Army at any time, unless there is actual war, to require the number of posts in the United States indicated by the Senator from New York. Many of these posts would not be used under any ordinary corcumstances for any sized Army within three hundred or four hundred thousand men.

Mr. WADSWORTH. The barracks at the posts to-day will not house 100,000 men.

Mr. BORAH. I know of a number of posts so situated geographically that they can not be utilized.

Mr. WADSWORTH. That is true of some, but not of others. For example, the posts which I have named, there are 75 Coast

Artillery posts and fortifications. Only 25 of them to-day are manned, but they are all armed with guns. We would have to retain them.

Mr. BORAH. That may be true with reference to those posts; but a number of posts were established during the days of Indian warfare which are still being maintained.

Mr. WADSWORTH. Yes; and in a stand-by condition, and they ought to be given up.

Mr. BORAH. I know of several myself.

Mr. WADSWORTH. The Senator will be surprised how hard it is to give them up if the question is put to the Congress.

Mr. BORAH. I was approaching that subject. If the Army post and navy yard questions were eliminated from the Army and Navy appropriation bills, respectively, we would have vastly more desirable bills.

The reading of the bill was resumed. The next amendment of the Committee on Appropriations was, on page 125, line 22, after the word "forces," to insert the following additional proviso:

Provided further, That the funds made available by Public Resolution No. 44, Sixty-seventh Congress, for the purchase of real estate and improvement of cemeteries in Europe for American military dead shall remain available for the purposes specified in that resolution until June 30, 1923.

The amendment was agreed to.

The next amendment was, on page 126, at the beginning of line 3, to strike out "$5,600,000" and to insert "$3,000,000," so as to make the proviso read:

Provided further, That the sum of $3,000,000 of the unobligated balance of the appropriation "Disposition or remains of officers, soldiers, and civil employees," for the fiscal years 1920, 1921, and 1922, shall be carried to the surplus fund and be covered into the Treasury upon the approval of this act.

The amendment was agreed to.

The next amendment was, on page 127, line 10, to increase the appropriation for repairs and preservation of monuments, tablets, roads, fences, etc., made and constructed by the United States in Cuba and China to mark the places where American soldiers fell, from "$100" to "$1,000."

The amendment was agreed to.

The next amendment was, under the subhead "Medical and Surgical History of the World War," on page 128, line 6, after the word "illustrations," to strike out "$4,800" and to insert "$100," so as to make the paragraph read:

Toward the preparation for publication under the direction of the Secretary of War of a medical and surgical history of the war with Germany, including services of an editor, and printing and binding at the Government Printing Office and the necessary engravings and illustrations, $100: *Provided*, That the total cost of such history shall not exceed $150,000.

The amendment was agreed to.

Mr. WADSWORTH. Mr. President, I am going to take the liberty, on behalf of the committee, and I do it in the hearing of the present occupant of the chair (Mr. LENROOT in the chair), to move to strike out, in line 4, on page 128, the words "including services of an editor, and." If those words are included in the text of the paragraph and the appropriation is left at $100, it will be impossible to pay the editor at all. If the words are stricken out, the editor of this medical history will be paid under the $16,600 appropriation which is provided earlier in the bill for this purpose. I move, therefore, that the words "including services of an editor, and" be stricken from the bill. It will then read:

Toward the preparation * * * of a medical and surgical history of the war with Germany, printing and binding at the Government Printing Office, and necessary engravings—

The PRESIDING OFFICER. The question is on agreeing to the amendment proposed by the Senator from New York.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Appropriations was, on page 130, line 2, after the word "Park," to strike out "$50,000" and to insert "to be immediately available, $100,000," so as to make the paragraph read:

For completing the construction of a reflecting pool in west Potomac Park, to be immediately available, $100,000.

The amendment was agreed to.

Mr. KING. Mr. President, I should like to inquire of the Senator in charge of the bill why some of these parks and the reflecting pool in Potomac Park should be charged directly upon the Government of the United States? Why should not a part of those costs be paid by the District? They are in the District and are for the benefit of the residents of the District, as much so as any of the parks in the District; and it occurs to me that it would be wise to transfer to the District the charge of these parks and playgrounds and pools, and so forth, many of which are provided for in this bill. I will ask the Senator whether that subject has received the attention of the committee? The Senator knows that if they were transferred to the District, then 40 per cent or 50 per cent or 60 per cent of the cost, depending upon the ratio of appropriation fixed as between the Government and the District, will be paid by the District.

Mr. WADSWORTH. The maintenance of all the parks in the District of Columbia is shared between the Federal Government and the District.

There are two national monuments here—the Washington Monument and the Lincoln Memorial—which are purely national in character. Although I have never before heard the suggestion the Senator from Utah has just made, for one I think it would be exceedingly unfair to ask that half of the maintenance of the Washington Monument be assessed against the taxpayers of the District of Columbia.

Mr. KING. I did not refer to the Washington Monument.

Mr. WADSWORTH. Or the Lincoln Memorial. The reflecting pool to which the Senator refers is in a sense, and a very true sense, a portion of the Lincoln Memorial. It is part of the work that is done in connection with the erection and completion of the Lincoln Memorial. This is only for construction. I think the citizens of this District should not be called upon to pay for the reflecting pool, which never would have been built except as an adjunct of the Lincoln Memorial. Indeed, it is a part of the Lincoln Memorial.

Mr. KING. I agree with the Senator there. If this is a part of the Lincoln Memorial, then I share the views of the Senator; but I was speaking generally, and not with reference to this item alone.

Mr. WADSWORTH. The Senator will notice that there are no parks at all in this appropriation. They are found in the District bill.

Mr. KING. My understanding was that many of these parks were charged to the Government exclusively. If I am in error, then much of my criticism is inapplicable.

Mr. WADSWORTH. I think the Senator is—just those two things, the maintenance of the Washington Monument and the roads and walks immediately around it, and the maintenance of the Lincoln Memorial and the roads and walks immediately around that.

Mr. KING. Then I have no objection to that.

The PRESIDING OFFICER. The Secretary will continue the reading of the bill.

The reading of the bill was resumed.

The next amendment of the Committee on Appropriations was, on page 130, at the end of line 12, to reduce the appropriation for survey of northern and northwestern lakes, etc., from "$107,000" to "$75,000."

The amendment was agreed to.

The next amendment was, on page 131, line 17, to increase the appropriation for the construction, repair, and maintenance of military and post roads, tramways, ferries, bridges, and trails, Territory of Alaska, from "$425,000" to "$500,000."

The amendment was agreed to.

The next amendment was, under the subhead "Transportation facilities, inland and coastwise waterways," on page 132, line 21, after the figures "1920," to strike out "$30,000" and to insert "$330,000," so as to read:

For additional expense incurred in the operation of boats, barges, tugs, and other transportation facilities on the inland, canal, and coastwise waterways acquired by the United States in pursuance of the fourth paragraph of section 6 of the Federal control act of March 21, 1918, and operated in pursuance of section 201 of the transportation act approved February 28, 1920, $330,000.

The amendment was agreed to.

The next amendment was, on page 132, line 21, after the word "That," to insert "not to exceed $30,000 of"; and on page 133, line 3, to strike out "$4,500" and to insert "$4,000," so as to make the proviso read:

Provided, That not to exceed $30,000 of this appropriation may be used for the payment of experts, clerks, and other employees in the War Department in accordance with the provisions of section 201 (e) of the transportation act, 1920, approved February 28, 1920, but no person shall be employed hereunder at a rate of compensation in excess of $3,000 per annum except 1 at $4,000.

The amendment was agreed to.

Mr. KING. Mr. President, I ask for my own information, not by way of criticism, the reason for including in the military bill some items which would seem to belong to the river and harbor bill—for instance, the flood control.

Mr. WADSWORTH. The river and harbor bill is in here, too.

Mr. KING. In this bill?

Mr. WADSWORTH. Yes.

Mr. KING. I was not advised of that fact.

Mr. WADSWORTH. It would be much easier and quicker to say what is not in this bill than to recite what is in it.

Mr. KING. Then this is a military bill and a river and harbor bill?

Mr. WADSWORTH. It is. It also includes the soldiers' homes, the Panama Canal Zone, parks and cemeteries, Alaska roads, cables to Alaska, and—but, as I said, it would take too long to recite what is in it.

Mr. WARREN. Mr. President, I will say to the Senator from Utah that I presume the reason why all of these things are assembled in this bill is because the work on rivers and harbors is done under the direction of the engineers who are connected with the Army, and therefore that work is here, with all the others.

Mr. BORAH. Mr. President, I suggest to the Senator from Utah that those of us out in the West who are interested in the reclamation of arid lands had better make a move to put them under the Army engineers if we are going to get any money for the purpose.

Mr. KING. It seems to me that this is going to be an omnium gatherum bill; we had better put appropriations in it with respect to other matters of which the Government takes cognizance. I supposed this was a military appropriation bill.

Mr. WADSWORTH. It is the War Department appropriation bill. Anything that the War Department has anything to do with is covered in this bill.

Mr. ROBINSON. Mr. President, the jurisdiction of the various committees, and particularly of the Appropriations Committee, was recently revised, as the Senator from Utah will recall; and it was under that revision that all of the activities of the War Department are assembled under one bill, known as the military appropriations bill, which goes now to the Appropriations Committee instead of to the Military Affairs Committee; but three members of the Military Affairs Committee sit in conjunction with the Appropriations Committee while this particular bill is under consideration. This is a part of the result of the reorganization of the committees in both Houses of Congress intended to give effect to the Budget system.

Mr. KING. May I inquire of the Senator from Arkansas if he knows how much of an appropriation this bill carries for items which under former practice would be included in the river and harbor bill?

Mr. ROBINSON. The item carried in this bill is $42,500,000.

Mr. KING. For rivers and harbors?

Mr. ROBINSON. Yes.

The PRESIDING OFFICER. The Secretary will continue the reading of the bill.

The reading of the bill was resumed.

The next amendment of the Committee on Appropriations was, under the subhead "National Home for Disabled Volunteer Soldiers," on page 138, after line 9, to strike out:

Northwestern Branch, Milwaukee, Wis.: Current expenses, including the same objects specified under this head for the Central Branch, $38,000;
Subsistence, including the same objects specified under this head for the Central Branch, $140,000;
Household, including the same objects specified under this head for the Central Branch, $70,000;
Hospital, including the same objects specified under this head for the Central Branch, $70,000;
For transportation of members of the home, $500;
Repairs, including the same objects specified under this head for the Central Branch, $30,000;
Farm, including the same objects specified under this head for the Central Branch, $8,000;
In all, Northwestern Branch, $356,500.
Eastern Branch, Togus, Me.: Current expenses, including the same objects specified under this head for the Central Branch, $38,000;
Subsistence, including the same objects specified under this head for the Central Branch, $95,000;
Household, including the same objects specified under this head for the Central Branch, $90,000;
Hospital, including the same objects specified under this head for the Central Branch, $48,000;
Transportation of members of the home, $500;
Repairs, including the same objects specified under this head for the Central Branch, $28,000;
Farm, including the same objects specified under this head for the Central Branch, $18,000;
In all, Eastern Branch, $317,500.
Southern Branch, Hampton, Va.: Current expenses, including the same objects specified under this head for the Central Branch, and including the maintenance, repair, and operation of motor-propelled passenger vehicles, $54,000.
Subsistence, including the same objects specified under this head for the Central Branch, $195,000;
Household, including the same objects specified under this head for the Central Branch, $90,000;
Hospital, including the same objects specified under this head for the Central Branch, $80,000;
For transportation of members of the home, $1,000;
Repairs, including the same objects specified under this head for the Central Branch, $44,000;
Farm, including the same objects specified under this head for the Central Branch, $12,000;
In all, Southern Branch, $476,000.
Western Branch, Leavenworth, Kans.: Current expenses, including the same objects specified under this head for the Central Branch, $44,000;
Subsistence, including the same objects specified under this head for the Central Branch, $185,000;
Household, including the same objects specified under this head for the Central Branch, $100,000;
Hospital, including the same objects specified under this head for the Central Branch, $80,000;
For transportation of members of the home, $500;
Repairs, including the same objects specified under this head for the Central Branch, $35,000;
Farm, including the same objects specified under this head for the Central Branch, $18,000;
In all, Western Branch, $462,500.
Pacific Branch, Santa Monica, Calif.: Current expenses, including the same objects specified under this head for the Central Branch, $48,000;
Subsistence, including the same objects specified under this head for the Central Branch, $250,000;
Household, including the same objects specified under this head for the Central Branch, $100,000;
Hospital, including the same objects specified under this head for the Central Branch, $100,000;
For transportation of members of the home, $2,500;
Repairs, including the same objects specified under this head for the Central Branch, $45,000;
Farm, including the same objects specified under this head for the Central Branch, $14,000;
In all, Pacific Branch, $559,500.
Marion Branch, Marion, Ind.: Current expenses including the same objects specified under this head for the Central Branch, $25,000;
Subsistence, including the same objects specified under this head for the Central Branch, $120,000;
Household, including the same objects specified under this head for the Central Branch, $50,000;
Hospital, including the same objects specified under this head for the Central Branch, $90,000;
For transportation of members of the home, $300;
Repairs, including the same objects specified under this head for the Central Branch, $25,000;
Farm, including the same objects specified under this head for the Central Branch, $9,000;
In all, Marion Branch, $319,300.
Danville Branch, Danville, Ill.: Current expenses, including the same objects specified under this head for the Central Branch, $54,000;
Subsistence, including the same objects specified under this head for the Central Branch, $220,000;
Household, including the same objects specified under this head for the Central Branch, $100,000;
Hospital, including the same objects specified under this head for the Central Branch, $80,000;
For transportation of members of the home, $500;
Repairs, including the same objects specified under this head for the Central Branch, $30,000;
Farm, including the same objects specified under this head for the Central Branch, $11,000;
In all, Danville Branch, $495,500.
Mountain Branch, Johnson City, Tenn.: Current expenses, including the same objects specified under this head for the Central Branch, $25,000;
Subsistence, including the same objects specified under this head for the Central Branch, $120,000;
Household, including the same objects specified under this head for the Central Branch, $60,000;
Hospital, including the same objects specified under this head for the Central Branch, $80,000;
For transportation of members of the home, $1,500;
Repairs, including the same objects specified under this head for the Central Branch, $20,000;
Farm, including the same objects specified under this head for the Central Branch, $16,000;
In all, Mountain Branch, $322,500.
Battle Mountain Sanitarium, Hot Sprinks, S. Dak.: Current expenses, including the same objects specified under this head for the Central Branch, $27,000;
Subsistence, including the same objects specified under this head for the Central Branch, $70,000;
Household, including the same objects specified under this head for the Central Branch, $60,000;
Hospital, including the same objects specified under this head for the Central Branch, $40,000;
For transportation of members of the home, $2,000;
Repairs, including the same objects specified under this head for the Central Branch, $18,000;
Farm, including the same objects specified under this head for the Central Branch, $6,000;
In all, Battle Mountain Sanitarium, $223,000.

And in lieu thereof to insert:

For "Current expenses," "Subsistence," "Household," "Hospital," "Transportation," "Repairs," and "Farm," at the following branches, including the same objects respectively specified herein under each of such heads for the Central Branch, namely:

Northwestern Branch, Milwaukee, Wis.: Current expenses, $38,000; subsistence, $140,000; household, $70,000; hospital, $70,000; transportation, $500; repairs, $30,000; farm, $8,000; in all, $356,500.

Eastern Branch, Togus, Me.: Current expenses, $47,000; subsistence, $105,000; household, $90,000; hospital, $48,000; transportation, $500; repairs, $28,000; farm, $18,000; in all, $336,500.

Southern Branch, Hampton, Va.: Current expenses, including the maintenance, repair, and operation of motor-propelled passenger vehicles, $54,000; subsistence, $195,000; household, $90,000; hospital, $80,000; transportation, $1,000; repairs, $44,000; farm, $12,000; in all, $476,000.

Western Branch, Leavenworth, Kans.: Current expenses, $44,000; subsistence, $185,000; household, $100,000; hospital, $80,000; transportation, $500; repairs, $35,000; farm, $18,000; in all, $462,500.

Pacific Branch, Santa Monica, Calif.: Current expenses, $48,000; subsistence, $250,000; household, $100,000; hospital, $100,000; transportation, $2,500; repairs, $45,000; farm, $14,000; in all, $559,500.

Marion Branch, Marion, Ind.: Current expenses, $25,000; subsistence, $120,000; household, $50,000; hospital, $90,000; transportation, $300; repairs, $25,000; farm, $9,000; in all, $319,300.

Danville Branch, Danville, Ill.: Current expenses, $54,000; subsistence, $220,000; household, $110,000; hospital, $90,000; transportation, $500; repairs, $40,000; farm, $11,000; in all, $525,500.

Mountain Branch, Johnson City, Tenn.: Current expenses, $25,000; subsistence, $120,000; household, $60,000; hospital, $80,000; transportation, $1,500; repairs, $20,000; farm, $16,000; in all, $322,500.

Battle Mountain Sanitarium, Hot Springs, S. Dak.: Current expenses, $27,000; subsistence, $70,000; household, $60,000; hospital, $40,000; transportation, $2,000; repairs, $18,000; farm, $6,000; in all, $223,000.

The amendment was agreed to.

The next amendment was, on page 145, after line 16, to strike out:

Provided, That moneys allotted to the Board of Managers of the National Home for Disabled Volunteer Soldiers by the Veterans' Bureau for support, maintenance, and care of World War veterans shall not be used to augment the appropriations made herein under the heads of "Current expenses," "Repairs," and "Farm."

The amendment was agreed to.

The next amendment was, on page 146, line 18, to increase the total appropriation for National Home for Disabled Volunteer Soldiers from "$4,483,800" to "$4,532,800."

The amendment was agreed to.

The next amendment was, under the head "The Panama Canal," on page 147, after line 6, to insert:

The limitations on the expenditure of appropriations hereinbefore made in this act shall not apply to the appropriations for the Panama Canal.

The amendment was agreed to.

The next amendment was, on page 148, line 25, after the figures "$10,000." to insert a colon and the following proviso:

Provided, That not to exceed $4,000 additional may be allowed the governor for expenses for entertainment, payable from the funds of the Panama Railroad Co.

The amendment was agreed to.

The next amendment was, on page 149, line 20, after the word "officer," to strike out "$500,000" and to insert "$550,000," so as to make the paragraph read:

For sanitation, quarantine, hospitals, and medical aid and support of the insane and of lepers, and aid and support of indigent persons legally within the Canal Zone, including expenses of their deportation when practicable, and including additional compensation to any officer of the United States Public Health Service detailed with the Panama Canal as chief quarantine officer, $550,000.

The amendment was agreed to.

The next amendment was, on page 149, line 24, to increase the appropriation for civil government of the Panama Canal and Canal Zone from "$915,000" to "$950,000."

The amendment was agreed to.

The next amendment was, on page 150, line 1, to increase the total appropriation for the Panama Canal from "$4,074,434" to "$4,159,434."

The amendment was agreed to.

The next amendment was, on page 150, line 7, after the word "surplus," to strike out "or reserve stocks" and to insert "stock," so as to make the paragraph read:

The Governor of the Panama Canal, so far as the expenditure of appropriations contained in this act may be under his direction, shall, when it is more economical, purchase needed materials, supplies, and equipment from available surplus stock of the War Department.

The amendment was agreed to.

The next amendment was, on page 150, after line 7, to strike out:

No part of the foregoing appropriations for the Panama Canal shall be used to pay the salary for any position at a rate in excess of the rate in effect for such position on June 30, 1921.

The amendment was agreed to.

The next amendment was, on page 150, line 20, after the word "supplies," in line 19, to insert "and except for the permanent operating organization under which the compensation of the various positions is limited by section 4 of the Panama Canal act," so as to make the paragraph read:

Except in cases of emergency or conditions arising subsequent to and unforeseen at the time of submitting the annual estimates to Congress, and except for those employed in connection with the construction of permanent quarters, offices and other necessary buildings, dry docks, repair shops, yards, docks, wharves, warehouses, storehouses, and other necessary facilities and appurtenances for the purpose of providing coal and other materials, labor, repairs, and supplies, and except for the permanent operating organization under which the compensation of the various positions is limited by section 4 of the Panama Canal act, there shall not be employed at any time during the fiscal year 1923, under any of the foregoing appropriations for the Panama Canal, any greater number of persons than are specified in the notes submitted, respectively, in connection with the estimates for each of said appropriations in the Budget for said year, nor shall there be paid to any such person during that fiscal year any greater rate of compensation than was authorized to be paid to persons occupying the same or like positions on July 1, 1921; and all employments made or compensation increased because of emergencies or conditions so arising shall be specifically set forth, with the reasons therefor, by the governor in his report for the fiscal year 1923.

The amendment was agreed to.

Mr. WADSWORTH. Mr. President, I think that finishes the reading of the bill for amendment, except for the amendments that have been passed over.

The PRESIDING OFFICER. The Secretary will state the first amendment passed over.

Mr. WADSWORTH. The Senator from Nebraska [Mr. NORRIS] and the Senator from Idaho [Mr. BORAH] probably desire to give consideration to the first amendment that was passed over, which commences on page 15, and as that is the amendment which governs the size of the Regular Army, and perhaps will be considered of most importance by a good many Senators, I suggest the absence of a quorum.

The PRESIDING OFFICER. The absence of a quorum is suggested. The Secretary will call the roll.

The roll was called, and the following Senators answered to their names:

Ashurst	Gerry	McCumber	Robinson
Borah	Glass	McKinley	Sheppard
Brandegee	Gooding	McNary	Shortridge
Broussard	Hale	Myers	Simmons
Bursum	Harreld	Nelson	Smith
Calder	Harris	New	Smoot
Cameron	Heflin	Newberry	Spencer
Capper	Hitchcock	Nicholson	Sterling
Caraway	Johnson	Norris	Sutherland
Culberson	Jones, N. Mex.	Oddie	Swanson
Cummins	Jones, Wash.	Page	Townsend
Curtis	Kendrick	Pepper	Wadsworth
Dial	King	Phipps	Walsh, Mass.
Edge	Ladd	Poindexter	Warren
Ernst	La Follette	Pomerene	Watson, Ga.
France	Lenroot	Ransdell	Williams
Frelinghuysen	Lodge	Rawson	Willis

The PRESIDING OFFICER (Mr. WILLIS in the chair). Sixty-eight Senators having answered to their names, a quorum is present. The Secretary will state the first amendment passed over.

The READING CLERK. The first amendment passed over was, on page 15, after line 7, in the item "Finance Department, pay, etc., of the Army," to strike out and insert.

Mr. BORAH. Mr. President, I want to make some observations which relate more particularly to the item on page 83, under Chemical Warfare Service.

Mr. WADSWORTH. May we go to that item, then, Mr. President, and consider it?

Mr. BORAH. Very well.

The PRESIDING OFFICER. The Secretary will state the amendment on page 83.

The READING CLERK. On page 83, line 4, Chemical Warfare Service, the committee proposes to strike out "$500,000" and to insert in lieu thereof "$750,000."

Mr. BORAH. Mr. President, what is known in history now as the disarmament conference adjourned in Washington in the fore part of February. The object of that conference was not only to actually reduce armaments and to take some steps toward peace, but supposedly also to create an atmosphere of peace, to break the war spirit, and to give encouragement to and make progress in the direction of world peace.

The most humane and, if it could have been carried out, the most important treaty, which the conference put out, was the treaty between the powers in relation to the use of submarines and noxious gases in warfare. While there were other treaties, particularly the one dealing with the naval ratio, which received much more attention and perhaps impressed more the public mind, yet that treaty disposed largely of what, in my judgment, would have soon become obsolete instruments of naval warfare. In all probability time and economic conditions, as well as the science of naval warfare, would have accomplished what this treaty with reference to the naval ratio accomplished—that is, the reduction of the number of battleships. In my opinion they were becoming obsolete, so far as modern naval warfare is concerned. But the treaty relating to the use of submarines and the noxious gases dealt with those instruments of modern warfare which are now being perfected and developed so as to become in all probability the dominating instruments in case a war should be visited upon us again.

The conference was unable to effectuate a real control of submarines or a definite control of noxious gases. For reasons which are now well understood by everyone, upon the objections of certain powers, it seemed impossible for the conference to limit the building of submarines or to circumscribe the jurisdiction of the different powers with reference to these instruments. But they did negotiate a treaty which, if there had been good faith behind it, might have been as desirable and have brought about equally as good results, as a definite obligation, to limit building. That treaty provides, among other things:

A merchant vessel must be ordered to submit to visit and search to determine its character before it can be seized.

A merchant vessel must not be attacked unless it refuse to submit to visit and search after warning, or to proceed as directed after seizure.

A merchant vessel must not be destroyed unless the crew and passengers have been first placed in safety.

Belligerent submarines are not under any circumstances exempt from the universal rules above stated, and if a submarine can not capture a

merchant vessel in conformity with these rules the existing law of nations requires it to desist from attack and from seizure and to permit the merchant vessel to proceed unmolested.

When that treaty was put out there were some people, including myself, who had doubt as to the good faith which was behind it, a doubt which one does not like to entertain but which one is compelled to entertain by reason of the glaring facts which stare you in the face.

These powers, in other words, unwilling to limit the use of submarines undertook to prescribe and proscribe the manner in which they should be used, which if carried out in good faith would have been as effective as prohibiting the use of them, because if submarines must be used as provided in this treaty, they have been rendered largely ineffective in modern sea warfare. The very object of a submarine is and it does its best service in doing the things contrary to the rules provided for in this treaty.

So when we looked upon the situation and observed that the nations refused to go direct to the subject and deal with it directly and limit the building of the submarines, but were willing to put in a provision limiting the use of them, practically destroying them, it occurred to some of us that they never intended to carry out that treaty.

This treaty has not been ratified except by the Senate of the United States. We ratified it in great haste, because we were told that the whole world was impatiently waiting for the United States to take the first step toward world peace and that as soon as we should act the other nations of the world would be glad to follow. After we ratified the treaties they passed into the pigeonholes of the foreign nations and have never been heard from since. Neither France, Great Britain, nor Japan has seen fit to take up these treaties even for consideration.

This particular clause which I have just read has nothing to do with anything contained in this bill, of course, but there is a clause in this treaty which seems to me relevant for discussion, and that is article 5 of the same treaty:

The use in war of asphyxiating, poisonous, or other gases, and all analogous liquids, materials, or devices having been justly condemned by the general opinion of the civilized world and the prohibition of such use having been declared in treaties to which a majority of the civilized powers are parties. The signatory powers, to the end that this prohibition shall be universally accepted as a part of international law binding alike the conscience and practice of nations, declare their assent to such prohibition, agree to be bound thereby as between themselves and to invite all other civilized nations to adhere thereto.

If this meant anything at all it meant that the signatories to this treaty were determined to take the first step toward the limiting of the use of noxious gases in warfare.

Since the adjournment of the disarmament conference the movement, not only in this country but in Japan, Great Britain, and France, has been such as to practically destroy the beneficial results of the disarmament conference. I entertained no doubt at the time that some movement would be made in that direction, but I had no idea that they would move so rapidly as they have in the last few months. If you will survey the budgets of the other powers with reference to these particular instruments of warfare, you will find that they are not only in some instances violating what in my judgment is the letter but they are in a multitude of instances violating the spirit of these treaties. It is true that they have not ratified them, and I would judge from the manner in which they are dealing in their budgets with the subjects covered by the treaties that they do not propose to ratify them.

I observed in the news items some 10 days since this statement:

Nations of the world, no less than seven of them, have sought information from the United States on the manufacture of poison gas since the armament conference here drafted a treaty to outlaw chemical warfare. Information to this effect was verified yesterday at the War Department.

Five nations meet in Washington in February and solemnly sign a treaty in which they put the ban of condemnation upon the use of this instrument, poison gas, and then, within six months, seven nations meet in the same capital for the purpose of exchanging views as to how they can most expedite the perfecting of the use of this instrument of modern warfare. In other words, the city of Washington becomes the distributing bureau or the distributing depot of the best information, which information is only desirable upon the theory that this treaty is to be disregarded.

Mr. LENROOT. Mr. President——

The PRESIDING OFFICER. Does the Senator from Idaho yield to the Senator from Wisconsin?

Mr. BORAH. I yield.

Mr. LENROOT. There are many nations which were not parties to this treaty, and if those nations continue the use of poison gas, and there is no prohibition against their doing so, does the Senator think that any nation can afford not to have the latest information possible concerning it for its own safety?

Mr. BORAH. Mr. President, that shows how utterly and absolutely useless is the treaty which we have ratified. If the United States, one of the signers of the treaty, is to become the central distributing bureau or depot for the information which was condemned by the treaty, we are not only waiting for the other nations to initiate a violation, but we are conniving at it ourselves and encouraging it. Why should we have an international conference on poison gas and thereby encourage and stimulate other peoples to devote their money and their genius to perfecting this hellish means of death? In my opinion we are acting in flagrant violation of the spirit of the treaty and the whole disarmament conference.

Mr. LENROOT. On the contrary, we are waiting until the other nations adhere, until all the nations of the world adhere.

Mr. BORAH. I beg the Senator's pardon.

Mr. WADSWORTH. Does the Senator say the United States Government is the central distributing point of information on chemical-warfare gases?

Mr. BORAH. That is my understanding.

Mr. WADSWORTH. Who represented the Government and with what authority did he so represent the Government and upon what occasion?

Mr. BORAH. I will read this article again.

Mr. WADSWORTH. I would like very much to hear it.

Mr. BORAH. It reads as follows:

Nations of the world, no less than seven of them, have sought information from the United States on the manufacture of poison gas since the armament conference here drafted a treaty to outlaw chemical warfare. Information to this effect was verified yesterday at the War Department.

Mr. WADSWORTH. Is that all?

Mr. BORAH. No; that is not all, but that is subject to my comment.

Mr. WADSWORTH. Did they get the information?

Mr. BORAH. I understand so.

Mr. WADSWORTH. How does the Senator understand so?

Mr. BORAH. I understand it from the newspapers. I have much more here.

Mr. WADSWORTH. That is not entirely reliable.

Mr. BORAH. Not entirely reliable? I venture to say that they did get the information. I venture to say that if the Senator will call up the Secretary of War he will find that they did get it. It was published in the newspapers, as stated, upon the approval by the War Department, that they had no information to conceal from the representatives of the English Government upon this subject. It came as a quotation and statement from the War Department. They were assembled here for that purpose; met with representatives of the War Department, as the paper said, and I assume that is correct. It was a most important news item. It was published throughout the country. The statement as published stated specifically that its verity was confirmed by the War Department. No reputable paper would say that it was confirmed by the War Department unless it had been confirmed. I believe the report to be true.

Mr. WADSWORTH. The assumption of the Senator goes to very great length. He would apparently include the formulæ for any gas if made under the auspices of the United States Government, and I doubt very much—in fact, I do not believe—that these formulæ were given away.

Mr. BORAH. The Senator from New York does not believe it, but the Senator from Idaho does believe it. I may be mistaken.

Mr. WADSWORTH. I am certain the Senator is mistaken. Before assertions of this sort are made—this is a serious matter——

Mr. BORAH. I think it is a very serious matter.

Mr. WADSWORTH. It seems to me some inquiry might be made of the War Department before an assertion of that sort is made public, for the Senator recollects perfectly well that there was at least one chemical-warfare gas developed during the latter period of the war by American chemists under auspices of the United States Government the formula for which was secret. Not a nation on earth knew what it was, nor any American citizen knew what it was, except within a very restricted number. The assertion of the Senator from Idaho is that this formula has been given away.

Mr. BORAH. No; I do not say they gave all the information away. I do not know anything about it.

Mr. WADSWORTH. I asked the Senator what information was given away and when and by whom. The Senator said these foreigners came here from seven nations and got the information, and that it was given to them by the War Department.

Mr. BORAH. I stated it upon the publication which is found in a daily paper published here in the city and which no one representing the Government has seen fit to deny. It was not only published under the eye of the department but it has been published all over the country and editorial comment made at great length. I supposed, in view of the fact that the publication stated the news item had been confirmed at the War Department, that it was true, otherwise there would have been a denial.

Mr. WADSWORTH. If we denied all things that appear in the daily papers, we would not be doing anything else but denying.

Mr. BORAH. Whom does the Senator mean when he says "we"?

Mr. WADSWORTH. Anybody, the Senator or myself or the War Department.

Mr. BORAH. Here is a matter which the Senator well says is a very serious matter.

Mr. WADSWORTH. It is.

Mr. BORAH. It has been published, and apparently published upon the statement of the War Department. If it was a serious matter and false, it was the duty of the War Department to brand it as false. It was no ordinary statement. In fact the circumstances are quite conclusive that it is true. It is in harmony with many other things calculated, if not designed, to destroy the good results of the disarmament conference.

Mr. WADSWORTH. My criticism, if I may call it such, is that the Senator's assumption goes much further than it should go based upon the announcement of the War Department. The Senator stated earlier in his remarks that the United States Government has become the central distributing agency of the knowledge and use of chemical warfare gases. That includes everything the United States Government knows.

Mr. BORAH. I have these circumstances about which there is no doubt, that the representatives of seven nations came here. It is not to be presumed that they came without the knowledge of the War Department that they were coming. They met with the War Department. It is not to be presumed that the War Department permitted them to come to practice a fraud upon them, and yet concealed from them the purpose of their coming, to wit, to interchange views with reference to the use of poisonous gases. They were here from a distance, upon a serious errand, at expense to their Governments, representing their Governments, and meeting with our Government representatives. I assume they dealt with one another in sincerity when they met together.

Mr. WADSWORTH. I assume that, too; but that would not imply that everything they knew was told.

Mr. BORAH. If it comes down to the proposition of the War Department concealing something from them, that is a different proposition. They might have had some secrets which they did not let them have. There is no such indication here, however.

I will read a little further:

Chemical-warfare experts of the British Army, who have recently concluded a course of study at the American Army chemical-warfare headquarters at Edgewood Arsenal, Md., it is learned, make no secret of the fact that the British Government intends to continue full speed ahead its research work in connection with the use of gas in warfare, notwithstanding the treaty which already has been ratified by the United States Senate.

In view of the treaty, and if the spirit of the treaty is to be regarded, why should the experts of these nations either be invited or permitted to come here and pass within the jurisdiction of our Government works for the purpose of obtaining information? Why should we take an active part in spreading information as to how we can most brutally and effectively kill our fellow men?

France, experts here declare, is pursuing her experiments with gas and is especially developing the technique of the use of gas in connection with airplanes in anticipation of attack from Germany.

The latest development which causes surprise here is the marked tendency on the part of smaller nations of Europe to interest themselves in chemical fumes. Friends of chemical warfare assert that all such shells should be barred if the new explosive is to be prohibited.

INTERPRETATION OF TREATY.

Consideration of this problem has brought attention to the fact that since the treaty prohibits the use of all gases in warfare the employment of such harmless vapors as hydrogen and helium in balloons and dirigibles also come under the ban if the treaty were strictly interpreted.

Mr. WADSWORTH. The Senator will recollect that I called attention to that in a speech before the Senate.

Mr. BORAH. That I remember. I also called attention to the fact that I did not believe they would ever carry out the treaty.

Mr. WADSWORTH. Perhaps we can exchange recollections in the matter.

Mr. BORAH. Now, I will read further. This is from the New York Times of May 25:

Although a treaty was signed at the Washington Conference on Limitation of Armament by which the United States, Great Britain, France, Italy, and Japan bound themselves to adhere to agreements for the prohibition of the use of noxious gases in warfare, it is apparent from information received at the War Department that several Governments are continuing experiments in the preparation of poisonous chemicals for war purposes.

Brig. Gen. Amos O. Fries, Chief of the Gas Service of the Army, said to-day:

"All our information indicates that other nations are working feverishly to make the most of chemical warfare."

Interpretation of the poison-gas treaty negotiated in Washington has been brought to the front by the completion of experiments here on a new high-explosive shell. Experts say that the new explosive, with all the strength of T. N. T., generates 40 per cent of phosgene gas, a deadly chemical developed during the World War. The Washington treaty does not prohibit the use of high-explosive shells but the question has arisen as to whether the new explosive should be barred from use in warfare because it generated a considerable amount of poison gas.

It is contended by some that as all high-explosive shells generate a certain amount of deadly gases, all such shells should be barred if there is to be a prohibition placed on the use of the new explosive. It is maintained also that as the treaty covers all gases in warfare in a prohibitive way the use of harmless vapors like hydrogen and helium in aircraft would come under the ban if the treaty is to be strictly interpreted.

The United States is the only Government signatory to the poison-gas treaty which has ratified it. At the War Department to-day it was said that seven nations had sought information from this Government concerning the manufacture of poison gases since the Conference on Limitation of Armament. One of these is Great Britain. All the others are Governments not parties to the gas treaty. Chemical experts of the British Army have recently completed a course of study at the United States Army gas center at Edgewood Arsenal, Md. They are credited with having made no secret of the intention of the British Government to continue its research work in the use of gas in warfare.

I take it from the reading of these articles that at least these facts will not in all probability be successfully disputed: First, that we signed the treaty and we have ratified it. Secondly, that since the signing of the treaty two of the powers—Great Britain and the United States—have met here and have been conversing and exchanging views with reference to perfecting the use of these noxious gases. Thirdly, that, as stated at the time by an officer of the Army or representative of the War Department, no information which the United States has would be retained or concealed or kept back from the British Government. In other words, while calling upon the world in the treaty to stop the use of poison gas, we set about to perfect it, to make it more cruel and destructive, and then invite in the representatives of other nations to confer and give them the benefit of our work. It is all in violation of the spirit if not the letter of the treaty. It makes a mockery of the disarmament conference.

I am not now accentuating the proposition as to whether the United States gave up all its information. That is not my object in discussing the matter. What I say is that the United States, by permitting this conference here, encourages what must inevitably result in the complete breakdown of the gas treaty. I go further and say that the very fact that seven nations come here, confer together, interchange views—whether candidly and fully or not is another question—in reference to the use of those gases, the perfecting of them, and so forth, is in violation of the spirit of the treaty. It might be justified under the treaty, or notwithstanding the treaty, for the United States to pursue its own individual studies and individual consideration of the matter—that is a matter about which we might differ—but I look with disfavor upon the proposition that they should come here and in a conference deal with the subject which the treaty was supposed to prohibit. This whole disarmament conference and all the treaties are the sheerest hypocrisy unless the work of that conference is to be carried out in good faith. It is not treaties which count, it is the honor and the good faith of the nations. And I denounce as a betrayal of the whole fight for disarmament this encouragement of the things which are in contravention to its whole spirit and purpose.

The PRESIDING OFFICER. The question is upon agreeing to the committee amendment.

Mr. BORAH. Upon that I ask for the yeas and nays.

Mr. ASHURST. Let the amendment be stated.

The READING CLERK. On page 83, Chemical Warfare Service, strike out "$500,000" and insert in lieu thereof "$750,000."

Mr. WADSWORTH. May I simply state that the amount is merely for research work and will not permit the Chemical Warfare Service to manufacture anything in quantity? Most of its research, in fact, practically all of it, will be on the defensive side.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. HALE (when his name was called). Transferring my pair with the senior Senator from Tennessee [Mr. SHIELDS] to the junior Senator from Maryland [Mr. WELLER], I vote "yea."

Mr. NEW (when his name was called). I transfer my pair with the junior Senator from Tennessee [Mr. MCKELLAR] to the junior Senator from Oregon [Mr. STANFIELD], and vote "yea."

Mr. SIMMONS (when Mr. OVERMAN'S name was called). I wish to announce for the day the unavoidable absence of my colleague [Mr. OVERMAN].

Mr. WARREN (when his name was called). I transfer my standing pair with the Senator from North Carolina [Mr. OVERMAN] to the Senator from Pennsylvania [Mr. CROW], and vote "yea."

Mr. WATSON of Indiana (when his name was called). Transferring my pair with the senior Senator from Mississippi [Mr. WILLIAMS] to the junior Senator from South Dakota [Mr. NORBECK], I vote "yea."

The roll call was concluded.

Mr. BALL. I have a general pair with the senior Senator from Florida [Mr. FLETCHER]. I understand that Senator has not voted.

The PRESIDING OFFICER (Mr. SPENCER in the chair). The senior Senator from Florida has not voted.

Mr. BALL. I transfer my pair with the Senator from Florida to the Senator from New Hampshire [Mr. KEYES], and vote "yea."

Mr. FRELINGHUYSEN. Transferring my general pair with the Senator from Montana [Mr. WALSH] to the junior Senator from Delaware [Mr. DU PONT], I vote "yea."

Mr. BROUSSARD. I have a general pair with the Senator from New Hampshire [Mr. MOSES]. Not knowing how he would vote on this question if present, I withhold my vote.

Mr. HARRISON. I transfer my general pair with the junior Senator from West Virginia [Mr. ELKINS] to the junior Senator from Rhode Island [Mr. GERRY], and vote "nay."

Mr. KENDRICK. Transferring my general pair with the Senator from Illinois [Mr. MCCORMICK] to the Senator from Nevada [Mr. PITTMAN], I vote "nay."

Mr. JONES of New Mexico. I transfer my general pair with the Senator from Maine [Mr. FERNALD] to the Senator from Missouri [Mr. REED], and vote "nay." I ask that this announcement of the transfer of my pair may stand for the day.

Mr. JONES of Washington (after having voted in the affirmative). Has the junior Senator from Virginia [Mr. SWANSON] voted?

The PRESIDING OFFICER. He has not.

Mr. JONES of Washington. The Senator from Virginia is necessarily absent. I promised a pair with him during the day. Not being able to secure a transfer of my pair I withdraw my vote.

Mr. CURTIS. I am requested to announce that the Senator from Rhode Island [Mr. COLT] is paired with the junior Senator from Florida [Mr. TRAMMELL].

The result was announced—yeas 46, nays 22, as follows:

YEAS—46.

Ashurst	Gooding	Myers	Sheppard
Ball	Hale	Nelson	Shortridge
Brandegee	Harreld	New	Smoot
Bursum	Harris	Newberry	Spencer
Calder	Kellogg	Nicholson	Sterling
Cameron	Ladd	Oddie	Sutherland
Culberson	Lenroot	Page	Townsend
Curtis	Lodge	Pepper	Wadsworth
Dillingham	McCumber	Phipps	Warren
Ernst	McKinley	Poindexter	Watson, Ind.
France	McLean	Ransdell

So the committee amendment was agreed to.

Mr. WADSWORTH. Mr. President, I now suggest, if the Senator from Nebraska [Mr. HITCHCOCK] is willing that we should do so, that we return to the amendment on the bottom of page 76 of the bill, where the committee propose to strike out "$400,000" and to insert "$375,000."

I may say for the information of the Senate that this item is applicable alone to the Springfield Arsenal.

The PRESIDING OFFICER. The amendment of the committee referred to by the Senator from New York will be stated.

The READING CLERK. On page 76, under the subhead "Manufacture of arms," in line 24, after the word "armories," the Committee on Appropriations propose to strike out "$400,000" and to insert "$375,000," so as to make the clause read:

For manufacturing, repairing, procuring, and issuing arms at the national armories, $375,000.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee.

Mr. HITCHCOCK. Mr. President, I should like to inquire whether it would be competent for me to move as a substitute for the committee amendment to strike out the entire paragraph?

Mr. WADSWORTH. May I ask the Senator, first, if he will be good enough to tell me if his purpose is to wipe the Springfield Arsenal off the Government books?

Mr. HITCHCOCK. What I really purpose is simply to put a stop to the manufacture of rifles. I understand, however, that there is some other work there.

Mr. WADSWORTH. If the entire paragraph should be stricken out, of course, there would be no work; and, so far as the Government's accounts would be concerned, there would be no Springfield Arsenal.

Mr. HITCHCOCK. I had some doubt about it. I have been looking at the testimony, and I am inclined to think that there probably should remain an appropriation of $75,000.

Mr. WADSWORTH. It is not necessary to strike out the entire paragraph to attain the Senator's object.

Mr. HITCHCOCK. Then I move to substitute $75,000 for the committee amendment proposing to insert $375,000.

The PRESIDING OFFICER. The amendment proposed by the Senator from Nebraska to the committee amendment will be stated.

The READING CLERK. In lieu of $375,000, the amount proposed to be inserted by the committee, on page 76, line 24, it is proposed to insert $75,000.

Mr. HITCHCOCK. Mr. President, this proposed legislation involves a really important principle. The testimony of General Peirce before the committee showed conclusively that at the Springfield Arsenal we are manufacturing, at an expense of $900 a day, rifles for which we have no use. The testimony of General Peirce further showed that we have on hand at the present time 2,800,000 rifles and that we are manufacturing 30 rifles a day at that institution at an expense of $900. When asked why we were manufacturing these rifles, the general said it was done simply to keep the working force together, so as to have skilled men in that line. As I have stated, this matter now involves a question of high principle: Shall the money of the people be expended in an Army appropriation bill for supplies that are not needed in a military sense to keep a few skilled men employed, on the theory that they might some time be needed?

I do not think there can be any dispute as to the facts. I can take the time to read the testimony of General Peirce; but his testimony was, in effect, that it was necessary to have this appropriation in order to keep those men employed. The supply of 2,800,000 rifles which we now have on hand and stored, except for the few that are in the hands of the soldiers, is certainly large enough in any possible contingency that can be conceived of. We did not have use for as many rifles as that during the war, when we had 4,000,000 men under arms, and it is not conceivable that we will ever have use in our day for the number of rifles that we now have on hand; and it is for the Congress to decide whether we are going to spend $900 a day of the people's money simply for the purpose of keeping a few hundred men employed in manufacturing something that is not needed.

I therefore move to reduce the appropriation to $75,000, which will cover all of the necessary expenditures to keep the armory for storage purposes and for certain small manufacture that seems to be required there; and on that I should like to have the yeas and nays.

Mr. WADSWORTH. Mr. President——

The PRESIDING OFFICER. The Senator from New York.

Mr. WADSWORTH. I have no objection to the yeas and nays being ordered, as long as I may have an opportunity to state the position of the committee.

The PRESIDING OFFICER. The request is made for a yea-and-nay vote.

The yeas and nays were ordered.

Mr. NORRIS. Mr. President——

The PRESIDING OFFICER. The Senator from New York has the floor.

Mr. NORRIS. I did not want to interrupt. I thought we were going to have a vote, and I wanted to ask the Senator from New York to give his version of this matter.

Mr. WADSWORTH. That is what I was about to do.

Mr. President, as the Senator from Nebraska states, this matter is one which might perhaps be called one of policy. The Springfield Arsenal is the only arsenal which the Government owns. It has been the home of rifle making for generations. It is the only place in the entire United States where the art of making a military rifle is being preserved. At no other point in this country is a military rifle made.

It is perfectly true that we have 2,800,000 serviceable rifles in the hands of troops or in storage in the United States to-day. It is perfectly true that from the immediate military standpoint, or from the standpoint of the immediate future, we do not need any additional rifles. The question is, Do we need to preserve the art of making a rifle in this country? That is all that there is before the Senate.

Prior to the war the Springfield Arsenal was running at very low capacity. When we went into the war we were astounded to find out that the Springfield Arsenal had been turning out only 75 rifles a day for a year or two or three years before we went to war with Germany. We paid the penalty for that folly by having to go to private manufacturers and accept a British-designed rifle, readjust it to American ammunition, and spend millions and millions and millions before we could get rifles for our soldiers. The Springfield Arsenal had been neglected. With war staring us in the face for two years at least we dawdled along at 75 rifles per day, just a little group of men under the employ of the United States Government who knew something about making a rifle with which our men could defend themselves and their country.

The Senate committee proposes that $375,000 be appropriated to keep this arsenal going. It will permit the arsenal to manufacture 30 rifles per day; that is all. The men employed upon those rifles will be the only men in the United States preserving the art of rifle making. I think I am accurate in saying that those men are the descendants of rifle makers; that they and their families have lived in and about Springfield for generations. They are a little group of skilled artisans that can not be duplicated anywhere in this country. It is proposed under this appropriation to employ approximately 300 men in this great arsenal that employed thousands upon thousands when we had to have rifles immediately. A portion of the 300 will be used in making 30 rifles per day. The rest will be used in carrying on certain experimental construction in connection with semiautomatic rifles—an undertaking quite different from that of the manufacture of the Springfield service rifle.

The rifles are going to cost us $300,000, less than one-tenth of 1 per cent of the money carried in this bill. For one-tenth of 1 per cent of all the appropriations that it is suggested shall be made for the War Department in its military and nonmilitary activities and all the related activities, for that tiny percentage we hope to keep alive in this country and keep gathered together at one spot, at least, in this country the knowledge of how to make a military rifle.

The testimony before the committee was to the effect that a production of less than 30 rifles per day would be so grossly uneconomical as practically to forbid its being attempted. If the amendment of the Senator from Nebraska is adopted, we close practically the entire plant. The $75,000 will be largely eaten up by administrative expenses, the salaries of watchmen, and the cost of heating, lighting, and guarding the property; and we might just as well mark this great, old, historic armory off the books of the Government and abandon any attempt to maintain the art of rifle making in this country.

Mr. HITCHCOCK. Mr. President, I have not any objection to closing the Springfield Armory. I doubt whether it is a sufficiently valuable purpose, but it was at the suggestion of the Senator from New York that I merely moved to reduce the proposed appropriation $300,000, so as to leave the arsenal in operation for the minor purposes stated by General Peirce in his testimony.

If we are to continue the manufacture of rifles for the purpose of educating men in the manufacture of rifles, I do not see any reason why we should not continue the manufacture of heavy artillery, or why we should not continue the manufacture even of chemicals for chemical warfare, although we are trying to agree with the nations not to use it, or why we should not go on with the building of battleships just simply for the purpose of keeping men employed in building battleships and training them in the work. There is no more real reason why artisans should be kept manufacturing rifles that are not used and can not be used within our day than there is for keeping men employed in manufacturing armor that we do not intend to use, for the ostensible reason of keeping people educated in that art.

The United States is not the only place where rifles are manufactured. They are manufactured in all of the great nations of Europe; and these men are not the only men in the world who know anything about manufacturing rifles. It will not become a lost art simply because we stop the manufacture of the rifles. It is true that these men have been devoting themselves to that particular thing, and it is true that they are high-priced men and receive very large pay; but it is a policy that is involved. Are we justified, in an appropriation bill to supply the Army of the United States, in bringing in here and there large expenditures, amounting in this case to nearly a thousand dollars a day, year in and year out, simply for the purpose of keeping people educated in the art of warfare?

I do not care to enter upon a further discussion, but I ask to have inserted in my remarks the testimony of General Peirce on this subject before the Senate Military Affairs Committee.

The PRESIDING OFFICER. Without objection, it is so ordered.

The matter referred to is as follows:

MANUFACTURE OF SMALL ARMS AND SMALL-ARMS AMMUNITION AT FRANKFORD AND SPRINGFIELD.

General PEIRCE. There is one other consideration that I wished to explain that has entered into some of these estimates, and that is the desire to keep at the arsenals a skeleton force to preserve the art of manufacture. In those cases where this development program did not of itself afford the necessary work, and there are two instances of that: One is at Frankford Arsenal, where the small-arms ammunition is made; and the other is at the Springfield Armory, where the small arms are made.

Now, of the standard caliber .30 ammunition used in the standard service rifle, we have enough on hand for our reserve purposes and for our actual needs for the coming year; but unless we have some money to manufacture some small-arms ammunition at Frankford and some rifles at Springfield it will be necessary to close those departments down entirely and lose all the men that have any knowledge of that sort of work; so that part of this estimate is to provide a little work at those two places. The estimates provide for a little work at these places in order to keep a very small number of men there.

Senator HARRIS. You say "a little work." How does that compare with the amount before the war or last year? I remember, in the discussion before, that as a matter of fact, we simply made the appropriation for the arsenal in Pennsylvania for Senator Knox after his speech. You remember that. The showing made was that we had all the ammunition necessary. I am in sympathy with what you are trying to do now, to keep a skeleton organization, but to manufacture more ammunition when there is a large quantity on hand would not seem to me just and wise. If I am in error about that, I would like to hear you.

General PEIRCE. We have not sufficient ammunition on hand of all the different kinds of small-arms ammunition. We have enough of the ball ammunition, but there are various kinds of armor-piercing ammunition for use against tanks, and incendiary ammunition for use in the Air Service; and above all, this caliber .50 ammunition that is used in the new caliber .50 machine guns. In those cases we have not any satisfactory quantity on hand. So that we are really accomplishing two purposes with this money; we are keeping a certain small number of men employed and keeping alive a force, and at the same time we are getting ammunition that is needed.

Senator HITCHCOCK. How many men are employed?

General PEIRCE. About 700 at Frankford now. There will be less than 500 after the 1st of July on this estimate.

Senator WADSWORTH. I wanted to ask you to set me straight, at least, and perhaps it will help the other members of the committee also about these different items. Take the bill there, please. Under ordnance stores, ammunition, there is $508,500 appropriated.

General PEIRCE. Yes.

Senator WADSWORTH. That item begins on line 21, page 65, "For the development, manufacture, purchase, and maintenance of airplane bombs, of ammunition for small arms, and for hand use for reserve supply." How is that work distinguished from that under the next item, which is "For manufacture and purchase of ammunition, targets, and other accessories for small arms, hand and machine gun target practice and instruction; and ammunition, targets, target materials, and other accessories which may be issued for small-arms target practice," etc.? That also says for manufacture and purchase of ammunition.

General PEIRCE. The items under the latter appropriation are all for specific purposes of target practice, and the ammunition used in the national matches is special ammunition that is different from the service ammunition.

Senator WADSWORTH. Then you want $100,000 for target-practice ammunition?

General PEIRCE. And for everything else. I have the details here.

Senator WADSWORTH. Then the ammunition made under ordnance stores is made at Frankford?

General PEIRCE. Yes.

Senator WADSWORTH. Except, perhaps, the bombs?

General PEIRCE. The bombs, of course, are some of them made at Frankford and some at Rock Island.

Senator WADSWORTH. Then that appropriation can be said generally to be for the support of the Frankford Arsenal; or is some of it for Rock Island?

General PEIRCE. Yes.

Senator WADSWORTH. And the next one; where is that mostly spent?

General PEIRCE. The target material is either manufactured or procured by Rock Island. The ammunition that is purchased, of course, comes from private manufacturers. If manufactured, it would be at the Frankford Arsenal.

Senator WADSWORTH. Is there no service ammunition manufactured under the second item?

General PEIRCE. Under the small-arms target practice?

Senator WADSWORTH. Yes.

General PEIRCE. There is a .30-caliber gallery-practice ammunition for training of the Army and there is manufacture of .30-caliber gallery-practice ammunition for civilian training camps, and there is manufacture of special ammunition for the national matches.

Senator WADSWORTH. Special types of small-arms ammunition. It is not ordinary service type ammunition?

General PEIRCE. No, sir; there is some blank .45-caliber pistol ammunition for training purposes.

Senator WADSWORTH. Blank ammunition?

General PEIRCE. Yes.

Senator WADSWORTH. In the "manufacture of arms," the next item, that is at Springfield Arsenal, is it?

General PEIRCE. That is at Springfield; yes, sir.

Senator JONES of Washington. Generally, as to this preceding item, if we should not increase the amount of the House you would then do, then, of course, those things that you considered the most important?

General PEIRCE. Yes.

Senator JONES of Washington. Do you think that the Army would suffer any real serious injury by losing that $400,000?

General PEIRCE. I did not get those figures, Senator.

Senator JONES of Washington. There is $400,000 here for small-arms target practice. If we should leave that $400,000 out, do you think there would be any serious results?

General PEIRCE. I feel that at least $400,000 will be necessary under this item.

Senator WADSWORTH. I asked you a while ago how it was that this year's appropriation was $250,000 and next year's $400,000—why the increase? It seems that there was an unexpended balance from 1921 and available for 1922, and therefore the additional appropriation for 1922; was not that it? Have you used up that unexpended balance? I think in the House committee it was stated that there was about $35,000 carried over.

General PEIRCE. $35,000 carried over.

Senator WADSWORTH. Then there is a possible $435,000 available?

General PEIRCE. Yes.

MANUFACTURE OF ARMS.

Senator WADSWORTH. Now, what is the next item?

General PEIRCE. The next item is "Manufacture of arms."

Senator WADSWORTH. Yes; that is at the Springfield Armory. The estimate was $453,000. What had you expected to do with that?

General PEIRCE. There are a number of small items for continuation of development work in connection with the semiautomatic rifle, in connection with the receiver sight of the caliber .30 shoulder rifle, and a number of other items, one of them $4,000, and another $2,000, another $6,000, and so on; but the main item is for the manufacture of United States service rifles, $300,000. That is sufficient, it is estimated, to produce about 30 rifles a day, which is a very much smaller number than has ever been produced at Springfield, and the minimum that we figure we can operate the plant for and keep the smallest force there that has been maintained at Springfield within my recollection.

Senator SPENCER. That is, to produce 30 rifles a day you would need $450,000?

General PEIRCE. No, sir; $300,000.

Senator SPENCER. Which, with the other items, would make $450,000?

General PEIRCE. Yes, sir.

Senator HARRIS. The rifles manufactured are different from the ones used during the war?

General PEIRCE. No, sir; we used two rifles during the war, one the Springfield rifle of the model of 1903 and the other the model of 1917.

Senator HARRIS. I am referring to the Springfield now.

General PEIRCE. That is this one.

Senator HARRIS. Do you need those rifles? Have you not enough left over from the war to last?

General PEIRCE. Yes; we have a very large stock. This is simply asked for for the purpose of a continuation of the operation of the Springfield Armory; otherwise we will have to close it down.

Senator HARRIS. How many men are employed there now?

General PEIRCE. Less than 400, and it probably will go down to 300 or under.

Senator HARRIS. If we reduce that to $150,000 now, could you not hold a skeleton organization that you could build up in case of necessity?

General PEIRCE. Not all of the employees there, of course, would be engaged in the manufacture of the rifles. The armory has one other function, an issuing function, as well as a manufacturing function. But we do not figure that we could operate the manufacturing plant at a less rate than 30 rifles a day without going to a prohibitive cost; as it is, the manufacture has been concentrated in a few buildings, and a considerable part of the plant would be absolutely closed up anyway.

Senator WADSWORTH. You have a small rifle manufactory at Rock Island?

General PEIRCE. Yes.

Senator WADSWORTH. That is closed down now?

General PEIRCE. Absolutely closed down, except that they are at present doing a little repairing there. But there is no manufacturing going on.

NUMBER OF RIFLES ON HAND.

Senator HITCHCOCK. How many rifles have we on hand?

General PEIRCE. About 2,000,000 of the model of 1917 rifle, which was the modified Enfield rifle we procured during this war, and about 800,000, I should say, of the Springfield rifle.

Senator HITCHCOCK. Did you develop any difference between them as to efficiency?

Senator WADSWORTH. The Springfield rifle was always regarded as being a little better. We could not make that rifle fast enough.

General PEIRCE. There were three large factories equipped to produce the Enfield, and only Springfield and Rock Island equipped to produce the Springfield model of 1903.

Senator SPENCER. Is the ammunition interchangeable?

General PEIRCE. Yes, sir.

Senator WADSWORTH. This all comes down to the matter of policy. Of course, we do not need the 30 rifles a day that you would make?

General PEIRCE. No.

Senator WADSWORTH. It is only keeping a little organization going so that it will not perish.

Senator HARRIS. That is what I was trying to develop, Mr. Chairman. It seems to me that 150 men would be a pretty good organization. They ought to be able to build up from that. You use how many now?

General PEIRCE. There are about 400 there now.

Senator HITCHCOCK. How many of those are really manufacturing rifles?

General PEIRCE. I should say that probably 100 of those employees are engaged in other—nonmanufacturing—work.

Senator WADSWORTH. You expect to run about 200 men in the actual production?

General PEIRCE. Yes.

Senator WADSWORTH. That includes the semiautomatic rifle work?

General PEIRCE. Yes; everything in the manufacturing way.

Senator WADSWORTH. That is experimental work?

General PEIRCE. Yes. It is tool-room work, pure and simple. They are making models.

Senator WADSWORTH. Of course, that is important, that experimenting in plans?

General PEIRCE. Yes. I was at Springfield just before the war when it was at the lowest point that it had ever been, and we were turning out then 75 rifles a day. We found it difficult to see how we could go to a less number and still run the plant without the cost being prohibitive. We are figuring it down now by concentrating the machines and machine tools, and closing down a large part of the plant, thereby shutting off the heat and power and light so that we can get down to 30 a day, and still operate.

Senator HITCHCOCK. That makes a pretty expensive rifle.

General PEIRCE. Yes; it makes the rifle cost about $30.

Senator HITCHCOCK. What are other countries doing in the manufacture of rifles—Great Britain, France, and Italy?

General PEIRCE. That I have not any definite information on.

Senator HITCHCOCK. Have they not quit?

General PEIRCE. I do not think they have, sir; not any more than we have. I think they are down to as small a basis as they can run on.

Senator HITCHCOCK. Is there anything about the manufacture of this rifle that is such a specialty that men, expert machinists, could not take it up?

General PEIRCE. Yes; there is. There are things about an instrument of that sort that is almost impossible to put on paper, that the workman learns, and really carries under his hat, and we find that wherever a plant of that kind has been closed and the force has been entirely dissipated, it takes a surprisingly long time to collect a new force and get it into satisfactory production.

Senator HITCHCOCK. During the war we did succeed in making several million rifles on rather short notice, did we not?

General PEIRCE. We did, sir; but the only reason they were able to do that was that they had three very large factories, of great capacity and employing many thousands of men, who had been producing this Enfield rifle for more than a year prior to our entrance into the war. Those three factories could be thrown at once onto the production of the modified Enfield, and the modifications were so slight in character that they did not affect the production materially.

Senator HITCHCOCK. Suppose we should actually become engaged in war during the next 10 years, some time; we would have something to start with, something like 3,000,000 rifles. Would we not be able, with that great number to start with, to organize and start in the manufacture, even if we dropped it now, with ordinary good mechanics and experts, in a short time?

General PEIRCE. Of course, to begin with, we would not have the 3,000,000 rifles by that time. There is a certain wastage every year of the stock on hand. I can say that it took a year and a half—about a year and a half—for those factories that I spoke of to get really into production after they started, with all the pressure that there was upon them in the war, before we got into it. It also took us, at Springfield, almost a year to get into full production there, with the war pressure on us. So that these things are not easy. You can not make as much haste as it would seem possible to make. In those times everything makes for delay and nothing makes for acceleration.

Senator HITCHCOCK. You estimate you will make 30 rifles a day there at a cost of $30 apiece?

General PEIRCE. $30.

Senator HITCHCOCK. Is that correct?

General PEIRCE. That is 10,000 rifles.

Senator HITCHCOCK. So that it takes $900 a day really to manufacture rifles that you do not need, virtually for the purpose of keeping men trained for the purpose of manufacture?

General PEIRCE. Keeping the plant alive; yes, sir.

Senator HARRIS. Could you not arrange to have those men manufacture something else and hold your organization together, and let them be at work on something we need instead of on something we do not need? Is there not anything else that you could manufacture?

General PEIRCE. There is nothing else in the ordnance line that that plant would be equipped for making for which we have any more money, at least, than we have for rifles. That is a plant that is specially designed, laid out, and equipped for the manufacture of rifles. Not only the type of machines but the number required for the different operations are all calculated, and the location and sequence of the machines as placed is determined on that basis, so that it does not lend itself to other purposes.

Senator HITCHCOCK. Are you operating more than one plant?

General PEIRCE. No, sir.

Senator HITCHCOCK. Just that at Springfield?

General PEIRCE. Just at Springfield. The Rock Island plant is closed down.

Senator HITCHCOCK. What was the pre-war manufacture at Springfield?

General PEIRCE. As I said, the lowest that they had ever gotten, to my knowledge, was 75 rifles a day. That was just before the war.

Senator HITCHCOCK. At what cost was that?

General PEIRCE. That was around $17, Senator, at that time.

Senator WADSWORTH. Wages have gone up in the meantime. Wages have practically doubled?

Senator HITCHCOCK. You said there were 700 men manufacturing ammunition. Does that mean all kinds of ammunition for all purposes?

General PEIRCE. That was the entire activity at Frankford. For instance, there are various kinds of small-arms ammunition, and there are also made there optical instruments and fuses for field artillery. That number was the entire number.

Senator HITCHCOCK. That is, those 700 men were not working on ammunition entirely?

General PEIRCE. No, sir.
Senator HITCHCOCK. What number were working on ammunition?
General PEIRCE. I have not an estimate of that. Major Harris says there were about 300.
Senator HITCHCOCK. Does that mean—have we any other men employed in the manufacture of ammunition than the 300?
Major HARRIS. No, sir; Frankford is the only place we make the small-arms ammunition.
Senator HITCHCOCK. Then, what you had there were employed on ammunition for artillery and other purposes?
General PEIRCE. The only thing done in that line is the manufacture of some fuses, which is at Frankford, and some development work at Picatinny Arsenal in the manufacture of experimental shells and fuses. There is no artillery ammunition and there is no artillery shell being made for service.

Mr. WALSH of Montana. Mr. President, before the Senate votes upon this matter, I should like to make an inquiry for information. I had an idea that the private manufacturers of rifles in the United States—Colt, Remington, Savage, and so forth—had brought the art to a very high state of perfection. Is there so very much difference between the manufacture of an Army rifle—I mean, as a matter of the art—and the manufacture of rifles for hunting purposes, in which, perhaps, we may not lead the world, but we are certainly in the front rank of manufacturing arms of that character?

Mr. WADSWORTH. Is the question directed to me?

Mr. WALSH of Montana. I shall be very glad to have the information from any source. I had an idea that in case of necessity we might be able to get skilled labor from those who have been employed in manufacturing arms in private establishments.

Mr. HITCHCOCK. That is my judgment, Mr. President. I do not think it will take many months to take any skilled artisan engaged in rifle manufacture or arms manufacture in any private establishment and drill him into this manufacture. In fact, we did that very thing during the war.

Mr. WADSWORTH. No; Mr. President; we did not do that very thing during the war. We did almost the opposite. We found that we could not make in the United States military rifles of our own pattern, and what we had to resort to was this: We found that two companies in the United States, prior to our entrance into the war, had after two years of struggle in their shops, learned how to make the British military rifle, and we had to adopt that. We could not make our own rifle, after we went into the war, outside of the Springfield armory. There must be some difference between the manufacture of a military rifle and that of a sporting rifle, because none of the plants that make the sporting rifle could be converted into the making of the military rifle. In fact, we went to the other extreme, and asked the plants that were making a military rifle for Great Britain to stop making them for Great Britain here in the United States and make them for us. They had taken two years to build up their organizations fit to make a military rifle. We seized their organizations, as it were, and made them turn out rifles for us.

That accounts for 2,000,000 of the 2,800,000 rifles we now have on hand. Two millions of the rifles to which the Senator from Nebraska refers are British-model rifles, not Springfield rifles. They have been rechambered and recalibered to fit our ammunition, but they are a British model. They can not be made again in this country, and they can not be made anywhere else, because there is not a factory in the world that is now tooled to make those rifles. Of course, they are going to last us a long time; there is no doubt about that; but when the time comes when we shall need rifles, somewhere, some day—and I fear we shall, somewhere, some day—I hope that we shall have at least a little nucleus of men that know how to make the Springfield rifle, the best rifle in the world.

Mr. HITCHCOCK. Mr. President, it is true that of these 2,800,000 rifles we have on hand, 2,000,000 are the adapted Enfield rifle. They shoot the same ammunition, and they have the same results the old Springfield had. There are the lovers of the Springfield rifle, and the advocates of it, who think it is a little better, but the two rifles have substantially the same range, as was demonstrated during the war. They have a little better range, as I recall, than the German Army rifle. We have on hand 2,800,000 interchangeable rifles, shooting the same ammunition, whether they are called Springfields or Enfields. The testimony before the committee showed that at the time we went into the war there were three factories in the United States making this Enfield rifle. They had been making the Enfield rifle for the use of the British, but shortly after we went into the war they began manufacturing the Enfield rifle for us, using the same sized ammunition we were using in our Springfield rifle. Our soldiers used those rifles effectively, their range was found good, their accuracy was beyond any criticism, and we have them now. To say that the manufacture of Springfield rifles is likely to become a lost art, and that we could not take it up if many years from now we were involved in a war, and the present supply of rifles should fail, is to my mind unreasonable. Certainly, for the outbreak of any war we have more rifles on hand than we have of any other supply, and it is not conceivable that at the outbreak of a war we would need over the 2,800,000 we now have on hand. They might become obsolete; there may be a better rifle at that time, but those rifles are as good as now exist in the world, and that supply certainly is an ample provision for any possible war. I think, taking into account the fact that we are trying to do away with war, it probably is very excessive.

I read a few lines of the testimony before the committee:

Senator HITCHCOCK. Are you operating more than one plant?
General PEIRCE. No, sir.
Senator HITCHCOCK. Just that at Springfield?
General PEIRCE. Just at Springfield. The Rock Island plant is closed down.
Senator HITCHCOCK. What was the pre-war manufacture at Springfield?
General PEIRCE. As I said, the lowest that they had ever gotten, to my knowledge, was 75 rifles a day. That was just before the war.
Senator HITCHCOCK. At what cost was that?
General PEIRCE. That was around $17, Senator, at that time.

I call attention to the fact that they are being manufactured now at a cost of $30. Prior to that this tesimony was given:

Senator HITCHCOCK. How many rifles have we on hand?
General PEIRCE. About 2,000,000 of the model of 1917 rifle, which was the modified Enfield rifle we procured during this war, and about 800,000, I should say, of the Springfield rifle.
Senator HITCHCOCK. Did you develop any difference between them as to efficiency?
Senator WADSWORTH. The Springfield rifle was always regarded as being a little better. We could not make that rifle fast enough.
General PEIRCE. There were three large factories equipped to produce the Enfield, and only Springfield and Rock Island equipped to produce the Springfield model of 1903.
Senator SPENCER. Is the ammunition interchangeable?
General PEIRCE. Yes, sir.
Senator WADSWORTH. This all comes down to the matter of policy. Of course, we do not need the 30 rifles a day that you would make?
General PEIRCE. No.
Senator WADSWORTH. It is only keeping a little organization going so that it will not perish.

That is the issue. If the Congress feels justified, in an appropriation bill, as a matter of policy, keeping the organization of men manufacturing rifles that are not needed, those in favor of that item will support this provision.

Mr. BORAH. How many men are employed there, and in possession of this art of making rifles, how many experts?

Mr. HITCHCOCK. My recollection is that there are 300, but I am not entirely sure of that.

Mr. LODGE. I think that is correct.

Mr. BORAH. Suppose a war should come, and we should need that rifle; we would have only 300 men in the United States who knew how to make it?

Mr. HITCHCOCK. That would be the conclusion.

Mr. BORAH. That would not do us any good.

Mr. HITCHCOCK. I can not see that this is anything more than employing men to manufacture something which, after it is manufactured, might as well be thrown into the ocean.

Mr. LODGE. Mr. President, the arsenal under consideration happens to be in the State which my colleague and I represent. As the Senator from New York [Mr. WADSWORTH] has said, it is one of the oldest, perhaps the oldest arsenal in the United States, I think certainly the oldest establishment for the manufacture of fine military rifles.

I do not sympathize with the doctrine of disarmament by example, disarming the United States alone, when no other country is disarming. Nor am I in sympathy with the idea, which is, no doubt, founded in fact to a certain extent, that if we close this arsenal down and should need rifles, we could probably buy them from some other country. I think it is better to have them made here; that it is very important that we should maintain that industry in making those military rifles, which are made nowhere else in the United States. I believe it is generally regarded that the Springfield new model is the best rifle there is, and I think it very important that this industry should not be extinguished.

As the Senator from New York has pointed out, it took two years to get some of the factories which made sporting rifles into condition to make military rifles, and although 300 men may be a small number, you have there the expert knowledge which makes it possible to expand it very rapidly if you need expansion.

I think it is somewhat like saying, "We are not at war; we are not likely to be at war, and as it costs a good deal of money to fire the guns on board ship, why do it?" If anything should go wrong, it is very desirable to have some men in the United States who are not foreigners who do know how to fire the big guns on board ship.

The economy which would destroy this industry is the kind of economy from which this country has suffered frightfully

every time it has had a war. It means the abolishing of all preparation, and we know how frightfully that has cost us every time we have been unfortunately obliged to go to war. I believe it would be a great economic mistake, and no advantage to the cause of peace to break up that group of expert workingmen, just as I think it would be an intolerable mistake to break up our Army or our Marine Corps.

I hope for that reason that this arsenal, which has always done such good work, which has these trained men, will, on a very small scale, be maintained.

Mr. WALSH of Massachusetts. Mr. President, I want to ask the Senator from New York if any of the large nations of the world have abandoned the business of manufacturing military arms.

Mr. WADSWORTH. I have no information on that score; I do not know.

Mr. WALSH of Massachusetts. If we adopt this amendment, does it mean that the United States would go out of the business of manufacturing arms?

Mr. WADSWORTH. Yes; military rifles. We would make no more.

ATTORNEY GENERAL DAUGHERTY—THE MORSE CASE.

Mr. WATSON of Georgia. Mr. President, I ask unanimous consent that three editorials which I shall read may be published in the RECORD in 8-point type as a part of my remarks.

The first is from the New York World of to-day, the first column on the editorial page, under the headline, "Sharing the blame." It reads:

SHARING THE BLAME.

"Glutted with normalcy, the esteemed Tribune hysterically implores Congress to adjourn at once in order to save the November elections and protect the administration's prestige. It regards the situation as so serious that it appeals to the President to intervene long enough to get the Senators and Representatives out of Washington.

"If that were done, if the tariff and the bonus were put aside, the Tribune thinks that Republican control of the next Congress would be made secure, and the administration would be able to carry out its "future program," whatever that may be.

"But to what good? If the Republicans carry Congress in the fall the Sixty-eighth Congress will have the same leaders as the Sixty-seventh Congress, unless Republican luck should bring about the defeat of the Lodges, the McCumbers, the Fordneys, and the Mondells. Even in that event their successors would be equally dull-minded reactionaries who had achieved leadership through seniority, and the legislative branch of the Government would be in the same mess that it is now.

"Bad as Congress is, its adjournment would not transform Mr. Harding into a leader. Neither would it vindicate Attorney General Daugherty or establish public confidence in Secretary Fall or reduce taxation or whitewash NEWBERRY or change by so much as a comma the record on which the Republicans must make their appeal to the country in November.

"It is easy to abuse Congress, but Congresses differ from one another less than most people think. The average of intelligence does not change much, however majorities change. The difference between a competent Congress and an incompetent Congress is mainly a matter of leadership, and the American party system has vested the leadership in the President.

"Given a Congress of his own party, a President who knows what he wants done can usually manage to get it done. The country may not be satisfied with the achievement, but it will know what it is voting about when it goes to the polls, and the party in power will have something on which it can ask for a vote of confidence.

"The failure of the Sixty-seventh Congress has been almost wholly a failure in leadership, and the full responsibility goes further back than Mr. Harding's nomination. In order to manufacture a fictitious issue against Mr. Wilson the Senators who controlled the Republican National Convention in 1920 set up the fiction that Mr. Wilson was a tyrant and a despot who had tried to overthrow the legislative branch of the Government. In order to carry out this myth Mr. Harding abdicated all claim to leadership long in advance of his election. The President was to go his way and Congress was to go its way, but the communion of the 'best minds' would make it certain that both would be going in the same direction at the same time.

"The usurpation argument against Mr. Wilson was thoroughly dishonest, but the Republican Senators maintained it so vigorously that Mr. Harding has never dared to assert himself as leader of the party, and as a result Congress is in the worst muddle that the country has seen for a generation. The muddle will continue until Mr. Harding becomes the leader of his party in fact as well as name or there is a new administration.

"A Congress that is left to drift is bound to drift. There have been times when the leadership within Congress was strong enough to hold it to a consistent program even when the Executive was weak, but there has been no instance in which Congress was able to function with any degree of intelligence when both the Executive and congressional leadership was flabby.

"Governor Miller, of New York, has made a convincing demonstration of the capacity of a strong, capable leader to obtain extraordinary results from a mediocre legislature. If Mr. Harding had been a Nathan L. Miller the record of the Sixty-seventh Congress would have been radically different. That is the whole story, and Mr. Harding can not get rid of his own responsibilities merely by getting rid of Congress. Whatever blame there is for the record, he must share it."

From the independent Philadelphia Record editorial page of to-day I read an editorial, in the second column, appearing under the headline—

BALLINGER AND DAUGHERTY.

"When the New York World says that 'the Attorney General has already become the Ballinger of the Harding administration,' it seems to us to be doing rather an injustice to the gentleman who was President Taft's first Secretary of the Interior. Ballinger was never a person of much importance or influence, and previous to his appointment to the Cabinet was no better known to the American public than he has been since he dropped into oblivion. He was not a politician of commanding authority, and hailed from one of the smallest States of the Union—Washington—so far as prestige is concerned.

"The charge against Ballinger, and the one which drove him from office, was that he unduly favored large interests which desired to exploit the natural resources of Alaska. If there were any partisan complications in the case they have been forgotten.

"Harry M. Daugherty is a much more formidable figure in every way. He has been a leading politician of Ohio for many years, and it was through his backing that Warren G. Harding was brought out as a presidential candidate, though having little strength either in his own State or in the country at large."

Mr. STANLEY. Mr. President——

Mr. WATSON of Georgia. I yield to the Senator from Kentucky.

Mr. STANLEY. Mr. President, I dislike to interrupt the Senator, but I wish to call his attention to the rapt attention he is receiving from the other side of the Chamber at this time. The Senator from Wisconsin [Mr. LA FOLLETTE] is one who can afford to hear it without a cringe and without a blush, and for that reason he is here. But the others have gone.

There is an animal called the ostrich, who sometimes puts his head in the sand and fancies he is not seen, although in that way he makes other portions of his anatomy only the more prominent. There are those who put their fingers in their ears and fancy they have silenced the accusing voice, because having made themselves dumb they no longer hear it. Gentlemen may hide their heads in the sand and put their fingers in their ears, but along about November in thunder tones they will hear, "Daugherty!" "Daugherty!" "Daugherty!"

Mr. WATSON of Georgia. Continuing the editorial which was so pleasantly and pertinently interrupted by my brilliant friend from Kentucky, I read:

"He"—

That is, Daugherty—

"had an active part in nominating Mr. Harding at Chicago and in managing his campaign. It was in gratitude for these services and because of their long personal friendship that the President selected him for the Cabinet, despite the vigorous opposition to his choice.

"Daugherty differs from Ballinger largely in his much greater powers for mischief. With his low standards of public morality and his belief in the efficacy of practical politics he is accused of turning the Department of Justice into a political machine. If he has failed to prosecute war grafters the suspicion is that these grafters have some pull, either as prominent Republicans or in some other way, and that he is protecting them. His connection with the Morse case is unsavory because of the trickery used in persuading President Taft to pardon that notorious person. In his year and a quarter in the Department of Justice he has not a single notable achievement to his credit so far as the public is aware. This record is in striking contrast with that of his predecessors.

"Ballinger was a weakling in comparison with the sinister figure of the Attorney General, the practical political manager,

corporation agent, and wirepuller. If Mr. Harding is wise he will give heed to public sentiment on this subject. To imitate General Grant's example and stand by friends, whether good or bad, will be suicidal. Harry M. Daugherty is capable of bringing much greater discredit upon his administration than Ballinger ever did upon President Taft."

From the Baltimore Sun of to-day I read from the editorial page, as follows:

THE WHITEWASH OF SILENCE.

"To whitewash a fence in springtime is an excellent idea. It makes it look better, and if it is a bit rotten it conceals the evidence of decay. To whitewash a public official at any time of the year is a foolish thing, and it is especially foolish when an election is coming on.

"The Republican majority in the House of Representatives is making this mistake with regard to Attorney General Daugherty. The two Republicans who have been demanding an investigation of the causes of the Attorney General's delay in prosecuting war frauds and war grafters are suppressed in the interest of party repute, and the whitewash brush and the whitewash pail of discreet silence are employed to give a wholesome and attractive aspect to the Attorney General's domains.

"There may be nothing to hide, but the political friends of Mr. Daugherty are doing their best to create the impression that there is something back of the charges that will not bear investigation. One of the names that will be heard most frequently from every stump in the congressional campaign will be that of Mr. Harding's reputed mentor and close friend, Mr. Daugherty, of Ohio."

Another of these great daily papers says that among the 40 rooms which Daugherty has rented for his prosecuting staff, one ought to be devoted to himself, in order that he may be investigated as to the trickery and fraud and the perjury committed in the case of the notorious criminal, Charles W. Morse.

Mr. President, the office of Attorney General is one of the highest in importance. It ought to be filled by a lawyer who is capable and who is honest. It ought to be filled by a man who is worthy to wear the shoes of Edmund Randolph, of William Wirt, of Hugh Legare, of Reverdy Johnson, of Jeremiah Black, and many brilliant and able lawyers who have filled that office so worthily. It ought to be filled by a man who is proud of the profession that gave to the world such glorious lawyers as Ulpian and Tully, whose names come ringing down the corridor of time; such men as Sir Samuel Romilly and Thomas Erskine; such men as Daniel Webster and Henry Clay. The office ought to be filled by a man whose conception of his profession is that it is one of the noblest that ever a man embraced, giving him splendid opportunities to protect the widow in her rights and the persecuted man in his liberties.

I have heard in my life many a sweet word, but outside of my own domestic circle I have never heard sweeter words than the verdict of a jury, which gave me the right to put back into the hands of a mother the child which she was about to lose, or back in the arms of his wife the man who was being tried for a capital offense. "We, the jury, find the defendant not guilty," are words which every lawyer loves to hear, when he feels that he has been pleading the cause of the innocent.

Mr. President, this Attorney General thinks that he can draw around himself the cloak of mystery and maintain unbroken silence when almost every newspaper in the land is clamoring for him to speak, and when the voters already are on their way to the polls to pronounce their verdict.

Mr. President, the newspapers inform us that the noble efforts of Republican Congressmen JOHNSON and WOODRUFF to get an investigation of the Department of Justice have been choked down in the other House. That is another of the blunders Mr. Daugherty is making. The American people admire a man who will face his enemies and who, if he has to go down, will go down fighting, like the sailor on the battleship and the soldier on the battle line. They do not love a man who skulks, who slinks away, who will not face his enemies, who will not answer material charges when made by persons responsible, as they have been made here on the floor of the Senate by representatives of great sovereign States.

Mr. Daugherty has been charged again and again with having falsified as to the Morse case and his connection with it, and he does not answer because he can not. He has been charged with having ordered the release of the British ship *J. M. Young*, which had come into New York Harbor with a cargo of liquor, in violation of the Federal statutes. It has been charged that T. B. Felder, the unspeakably corrupt crook, came here to Washington City and prevailed upon the Attorney General to telegraph to New York to have the proceedings dismissed and the liquor restored to those who had it in charge. He has been specifically charged with having ordered the release of $200,000 worth of wine seized in up-State New York. The wine was released, although those who had it were violating the law of the land. He has been charged with having stopped the proceedings against four or five dry agents who had proven recreant to their trust, and had illegally released 2,000,000 gallons of whisky in New York.

Mr. STANLEY. Mr. President——

Mr. WATSON of Georgia. I yield to the Senator from Kentucky.

Mr. STANLEY. Has the Senator read the great and highly unctuous address of the Attorney General to the Bar Association of America at Cincinnati?

Mr. WATSON of Georgia. If the Senator from Kentucky is alluding to the most recent one, I have not read it.

Mr. STANLEY. It is a most devout address. I understand that he submitted it to the head of a great propaganda in favor of more drastic sumptuary legislation for his approval before it was given to the Associated Press. Now, in all fairness, does the Senator from Georgia believe that a multitude of dry words ought to excuse a few wet acts?

Mr. WATSON of Georgia. We are told in Holy Writ that even the devil may quote Scripture, and if he can do that, he may also preach sermons.

Mr. President, another one of these definite charges hurled at the Attorney General from this floor, whose records he says he does not read, and with whose daily paper he had better become more familiar, perhaps, is that he caused the pardon of an Ohio millionaire who had violated the Federal law known as the Mann Act, the victim being a little 15-year-old girl. What reason could any honorable lawyer give for recommending a pardon in such a case? A crime like that proceeds from deliberation, premeditation, full consciousness of guilt, full consciousness of the penalty about to be risked; and when that penalty falls upon him, as the law requires, it is the Attorney General, acting officially, who has the President pardon him. My God! what kind of reason did the Attorney General give the President of the United States for clemency in a case like that?

Mr. President, the young man who gave to me the information for which, as Senators will remember, I did not vouch when I stated it here on the floor of the Senate, but which I merely called to the attention of the Attorney General, and which he has not noticed, was so imprudent as to go to my office without looking around to see whether or not he was being shadowed.

The Senator from Arkansas [Mr. CARAWAY] says that the Attorney General has had a negro shadowing him. I do not know and I do not care whether there is anybody shadowing me. I have no secrets to hide, even if Mr. Daugherty has. I have nothing to conceal from the agents of W. J. Burns, the great detective, who left Georgia in a hurry after his nefarious conduct in the Leo Frank case. He just did get away in time.

As I was saying, Mr. President, this young man was so indiscreet as to visit my office without noticing whether or not he was being followed, but in 15 minutes after he left my office he had been nabbed by one of the Burns men and put in jail. For what? For having passed, as they allege, a bad check for $30 a year and a half ago. The sleeping dog suddenly woke up when the young man visited my office. The old case was suddenly revived, the resurrection and the life came into it. In 15 minutes after he left my office, and he is now in jail. This morning he was carried before Judge McCoy, of the District of Columbia Supreme Court. They were trying to railroad him back to Ohio, the State where the hotel is located on which he imposed, as alleged, with a $30 check a year and a half ago.

Mr. KING. Will the Senator from Georgia yield to me?

Mr. WATSON of Georgia. I yield.

Mr. KING. I should judge from what the Senator stated in his last sentence that if an offense had been committed it was against the laws of the State. If that be true, what jurisdiction did Mr. Burns or the Federal officials have over this young man?

Mr. WATSON of Georgia. None whatever, Mr. President, as I understand the law. It is merely a "strong-arm method."

Well, this young man was taken before Justice McCoy, of the District of Columbia Supreme Court. He asked the judge for a continuation of his hearing on the extradition proceedings until this morning. He believed that he was being "framed up," and most Senators will so believe. The country at large will ask why this sudden action on the old case, a year and a half old, about a little $30 check? Why the arrest of this man so soon after he had been to a Senator's office? I did not give his name away, but they must have run him down. The detectives, when they saw him go to my office, believed that he was the man who gave me the information.

He sent a request through one of the members of the press gallery urging me to come to see him this afternoon before the prison closed at 5 o'clock. I promised to go, and made ready

to go; but my latest information is that the Cleveland police authorities have decided to drop their charges against him. I am told that the Cleveland detectives returned this afternoon without him. The lawyer of the young man says that this conduct substantiates the young man's charge that he is being "framed up" to keep him from telling me and other Senators all that he knows about Felder and Daugherty.

Mr. President, can this Attorney General remain silent after an accusation like this? Do they think the country has no sense of honor? Do they think public indignation has lost the power to lash public men with its scorpion whip? Do they think that public sentiment can be defied? Are people always going to be patient when rich men who debauch little children of 15 years old are turned out and poor men are kept in jail for having said a few words which did no harm? Let them not think it. The country is aroused, and the country will be heard from in the election.

WAR DEPARTMENT APPROPRIATIONS.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 10871) making appropriations for the military and nonmilitary activities of the War Department for the fiscal year ending June 30, 1923, and for other purposes.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Nebraska [Mr. HITCHCOCK] to the amendment reported by the committee, on which the yeas and nays have been ordered. The Secretary will call the roll.

The reading clerk proceeded to call the roll.

Mr. KENDRICK (when his name was called). Making the same announcement as heretofore as to the transfer of my pair, I vote "yea."

Mr. NEW (when his name was called). Making the same announcement as to the transfer of my pair which I made on the previous vote, I vote "nay."

Mr. WARREN (when his name was called). Making the same announcement as to my pair and its transfer as on the last vote, I vote "nay."

Mr. WATSON of Indiana (when his name was called). Making the same announcement as on the last vote with reference to my pair and its transfer, I vote "nay."

The roll call was concluded.

Mr. EDGE. I transfer my general pair with the senior Senator from Oklahoma [Mr. OWEN] to the junior Senator from Delaware [Mr. DU PONT] and vote "nay."

Mr. JONES of Washington (after having voted in the negative). The senior Senator from Virginia [Mr. SWANSON] is necessarily absent, and I am paired with him for the day. I find I can transfer that pair to the junior Senator from New Hampshire [Mr. KEYES]. I do so, and allow my vote to stand.

Mr. BROUSSARD. I have a pair with the senior Senator from New Hampshire [Mr. MOSES]. Not being able to secure a transfer, I withhold my vote.

Mr. HALE. Making the same announcement as heretofore with regard to my pair and its transfer, I vote "nay."

Mr. HARRISON. I transfer my pair with the junior Senator from West Virginia [Mr. ELKINS] to the senior Senator from Texas [Mr. CULBERSON] and vote "yea."

Mr. WALSH of Montana (after having voted in the affirmative). I inquire if the senior Senator from New Jersey [Mr. FRELINGHUYSEN] has voted?

The PRESIDING OFFICER. The senior Senator from New Jersey has not voted.

Mr. WALSH of Montana. I have a general pair with that Senator, and in his absence, being unable to secure a transfer of the pair, I withdraw my vote.

Mr. STERLING (after having voted in the negative). I transfer my pair with the Senator from South Carolina [Mr. SMITH] to the Senator from Oklahoma [Mr. HARRELD], and allow my vote to stand.

Mr. CURTIS. I desire to announce the following pairs:

The Senator from Delaware [Mr. BALL] with the Senator from Florida [Mr. FLETCHER]; and

The Senator from Rhode Island [Mr. COLT] with the Senator from Florida [Mr. TRAMMELL].

The result was announced—yeas 18, nays 47, as follows:

YEAS—18.

Borah	Harrison	King	Stanley
Caraway	Heflin	La Follette	Underwood
Dial	Hitchcock	Ransdell	Watson, Ga.
Gerry	Jones, N. Mex.	Robinson	
Harris	Kendrick	Simmons	

NAYS—47.

Ashurst	Calder	Cummins	Edge
Brandegee	Cameron	Curtis	Ernst
Bursum	Capper	Dillingham	France
Hale	McLean	Pepper	Sterling
Johnson	McNary	Phipps	Sutherland
Jones, Wash.	Myers	Poindexter	Townsend
Kellogg	Nelson	Pomerene	Wadsworth
Ladd	New	Rawson	Walsh, Mass.
Lenroot	Newberry	Sheppard	Warren
Lodge	Norris	Shortridge	Watson, Ind.
McCumber	Oddie	Smoot	Willis
McKinley	Page	Spencer	

NOT VOTING—31.

Ball	Fletcher	Moses	Smith
Broussard	Frelinghuysen	Nicholson	Stanfield
Colt	Glass	Norbeck	Swanson
Crow	Gooding	Overman	Trammell
Culberson	Harreld	Owen	Walsh, Mont.
du Pont	Keyes	Pittman	Weller
Elkins	McCormick	Reed	Williams
Fernald	McKellar	Shields	

So Mr. HITCHCOCK's amendment to the amendment of the committee was rejected.

The PRESIDING OFFICER. The question is upon agreeing to the amendment of the committee.

The amendment was agreed to.

Mr. WADSWORTH. Mr. President, may we now go back to the first amendment which was passed over, commencing on page 15? It has to do with the commissioned and enlisted personnel of the Regular Army.

Mr. BORAH. Mr. President, if we can have a test vote upon the amendment on page 24, so far as I am individually concerned I shall not desire to delay the matter further. I do not know whether any other Senator desires to discuss this question or not, but the circumstances are such that I shall not undertake to discuss it this afternoon. If I can have a yea-and-nay vote upon that amendment, I shall be content to let the matter go. That will test the question of the size of the Army.

Mr. WADSWORTH. It will.

Mr. KING. Mr. President, does the Senator now refer to the item commencing on line 15?

Mr. BORAH. Line 15, page 24.

Mr. KING. May I inquire of the Senator if that amendment is rejected whether that would automatically reduce the Army to the number provided in the House bill?

Mr. BORAH. Yes; 115,000. Upon that, Mr. President, if the Senator in charge of the bill is willing that we shall have a vote at this time, I ask for the yeas and nays.

Mr. WADSWORTH. Mr. President, I have no objection, of course, to the yeas and nays. I think for the purpose of the RECORD, at least, and possibly for the information of Senators, I should make a statement concerning the enlisted strength of the Army.

The PRESIDING OFFICER. As the Chair understands, the yea-and-nay vote is desired upon the amendment on lines 15 to 21 on page 24.

Mr. WADSWORTH. The amendment is to strike out and substitute. The amendment really extends from line 5 to line 21, inclusive.

Mr. President, the House provides specifically for a Regular Army of 115,000 men. When I use the term "Regular Army" and discuss these figures, I exclude the Philippine Scouts, as they are not included in this appropriation, "Pay of enlisted men." In passing, I may say that the strength of the Philippine Scouts is 6,991 men. Let us call it 7,000 for easy figuring.

The House, as I said, provides for a strength of 115,000 American Regulars. The present authorized strength, in accordance with the terms of the Army appropriation bill passed nearly a year ago, is 150,000 American Regulars. The present actual strength of the Regulars is 134,000 men, 16,000 below the authorized strength of 150,000.

The reason for the Army having fallen so far below the strength authorized by the Congress for the fiscal year 1922, and appropriated for by the Congress for the fiscal year 1922, is that the appropriation for transportation of the Army for this fiscal year, 1922, was so drastically cut that the Army recruiting service has had to confine its efforts for the last six months or so to recruiting only in the immediate vicinity of Army posts, where the recruits, as they were picked up by the recruiting parties, could be sent on their own feet or in an Army automobile to the Army post. For several months past there has been no fund available for the transportation of recruits from the centers of population to the recruiting depots, the transportation item having been exhausted. That accounts for the decrease of the Army by 16,000 men below the authorized and appropriated for strength. This bill proposes that the average strength of the Regular Army, exclusive of the Philippine Scouts, shall be for the next fiscal year, 1923, the total of 133,000 men, 1,000 less than we actually have to-day, and 17,000 less than the Congress authorized as of to-day.

Their distribution, roughly speaking, would be somewhat as follows: Overseas, exclusive of troops on the Rhine, there would be, in round figures, 30,000 men. That includes the Porto Rico Regiment of Infantry, which is a part of the Regular Army, and, roughly, there are 1,400 men on the island of Porto Rico. It includes the garrison at Panama, which is to be fixed at 10,000 men. It includes the garrison at Hawaii, which should be 15,000 men. It includes in the Philippine Islands approximately 3,000 white Regular Americans. There are to-day in the Philippine Islands, let me say, a little over 6,500 white troops. It is the purpose of the department to bring back about half of them to continental United States, or else to Hawaii, and to reduce the Philippine white garrison to a trifle over 3,000.

There would be 570 men in China, stationed at Tientsin, guarding the railway communication between Tientsin and Peking, in accordance with an arrangement made following the Boxer troubles in 1902.

There would be 558 men as the entire garrison of Alaska. These total in the neighborhood of 30,000 men overseas, outside of the continental limits of the United States, leaving for the United States approximately 103,000 men of all arms and branches, overhead, noncombatant, nonmobile, and mobile troops of every kind and description.

Of the 102,000 or 103,000 men to be stationed in and over the United States approximately 25,000, or one-fourth of them, are stationed along or near the Mexican border, in the States of Texas, New Mexico, Arizona, and California.

Excluding the border contingents, which can not be reduced when one considers that they cover a frontier of 1,900 miles, we will have then in the United States for general purposes, to meet any kind of an emergency which may arise, and for which Federal troops may be used, about 77,000 men, including all overhead. Now I want to tell the Senate about the overhead and about the noncombatant troops, whose numbers must be deducted from this total number of available troops.

The use of chemical warfare has been denied by treaty. So the chemical-warfare contingent, numbering 403 men, not a very impressive contingent, may I say to the Senator from Idaho, must be subtracted.

The Coast Artillery Corps mans the seacoast fortifications, and can not be sent away. There are 9,088 of them in the United States.

There are 5,754 enlisted men in the Army detached from organized units and attached to the units of the National Guard, or Organized Reserves, the Reserve Officers' Training Corps in the several schools, colleges, and universities, and at the service schools, engaged directly or indirectly in these services in assisting in the teaching of citizen soldiers.

In the Finance Department, a noncombatant branch, there are 426 men.

Mr. KING. Mr. President, are the men in the item last mentioned but one, 5,754 men, enlisted men or enlisted men and officers?

Mr. WADSWORTH. They are all enlisted men. I am speaking of nothing but enlisted men.

Mr. KING. Are there not a great many officers employed in teaching in the various colleges?

Mr. WADSWORTH. There are, but not as many officers as men.

Mr. KING. Are they embraced within the 5,000?

Mr. WADSWORTH. No; I am speaking only of enlisted men. There are 5,754 enlisted men engaged upon a character of work which is of exceeding value, and which is tremendously appreciated by the citizen components of the Army of the United States, the Organized Reserves, the Reserve Officers' Training Corps, and the National Guard.

The medical department numbers 6,649 enlisted men. The Ordnance Department, a noncombatant branch, numbers 3,343 enlisted men. The Quartermaster Corps, which, generally speaking, is known as a noncombatant branch, but a portion of which, of course, accompanies combat troops into the field for purposes of supply, numbers 9,814.

The figures I am giving are the numbers in the noncombatant or nonmobile or overhead detachments or branches in the United States, and the sum total of them must be subtracted from the 77,000 men who are available all over the United States for any kind of emergency after the further deduction of 25,000 men along the border, and adding up these overhead, nonmobile, and noncombatant troops, we find that they foot up to 35,477.

Subtracting them from approximately 77,000 men, you find that you have not quite 40,000 men in the United States who can be used as a striking force outside of and in addition to the 25,000 men along the border.

Counting the men along the border, 25,000, and the other mobile, combatant, striking troops, scattered all over this great continent, under the terms of the Senate committee bill you will have only 65,000 men.

Some people say that we should disarm still further than that. I can not see it. I think we have reached rock-bottom. I would not advocate for one moment reducing the overseas garrisons below 30,000 men. The men who I have estimated will be available for use in the United States include the men now in Germany, brought back here; they include 3,500 men now in the Philippines to be brought back here. Everything is included. All subtractions are made. The last estimate is laid before you. I submit, Senators, that America should not decrease her forces any lower than they are decreased. In my judgment it would be folly to do so. Already the Regular Army finds it almost impossible to carry on the missions and functions imposed upon it by the national defense act passed by Congress itself.

Reduce it any further and it will be absolutely necessary for the War Department and the Army to come to Congress and ask the Congress to restate its mission; ask the Congress, "Do you want us to maintain the overseas garrisons at proper strength? Do you want us to detach officers and men to help the guard and the Organized Reserves? Do you want us to man the few fortifications along the seacoast that we are now manning?" We are manning to-day only 25 out of 75 in continental United States. Fifty seacoast fortifications are to-day in the hands of caretakers with the guns not manned and no drill or training taking place in connection with them.

Mr. KING. Mr. President——

The PRESIDING OFFICER. Does the Senator from New York yield to the Senator from Utah?

Mr. WADSWORTH. I yield.

Mr. KING. The statement was made during the discussion over a year or two years ago by one of the distinguished members of the Appropriations Committee, who reported the so-called fortifications bill, as I recall it, that much of the money which had been appropriated for fortifications was unnecessarily appropriated, and that a different plan ought to be adopted with respect to the fortifications. The idea which was conveyed, as I interpreted his remark, was that a different method of fortification was required, and that in view of the long-range guns, and in view of the submarines and aircraft, the present policy of maintaining the coast fortifications was somewhat impolitic and archaic. For my own information, I would like to inquire whether there has been any modification of those plans, or whether the Senator accedes to the accuracy of that view?

Mr. WADSWORTH. Mr. President, it would take a military expert, a man of long experience and most ripe judgment, to comment intelligently on the question of the Senator from Utah. I am not competent to do it. I can say, however, for the Senator's information, that we are building no fortifications now, with the exception of three. We are building a very important fortification at Rockaway Beach to protect the city of New York, and we are mounting there a very small number of 16-inch rifles, which are about completed. They will be completed this summer, mounts and all.

At the mouth of the Chesapeake Bay, at Fort Story, it is proposed to mount a couple of 16-inch rifles, and it is proposed also at Panama to strengthen the fortifications at the entrance of the canal with 16-inch rifles, it now being conceded that the rifles at present at Panama are outranged by the rifles which the treaty on the limitation of naval armament permits foreign naval vessels to carry. Aside from those, no fortifications are being built. In order to show the Senate that certainly the committee can not be charged with extravagance, I am going to dissect portions of this bill for just a moment.

The bill now contains the old Army appropriation bill, the old West Point appropriation bill, and the old fortifications bill. Those bills provided for the military activities of the War Department. If you segregate from the pending bill those items which belong to last year's Army appropriation bill, including the appropriation for West Point, for last year West Point was put in the Army appropriation bill, you will find that this bill carries a total appropriation for those purposes of $261,972,000.

Last year's appropriation for the very same and identical purpose amounted to $327,688,000. In other words, for the military activities, the support of the Regular Army, all its fortifications, supplies, transportation, subsistence, and everything, including West Point and every conceivable military operation, the bill carries $65,700,000 less than last year's bill, a direct saving in what might be termed armament or preparation for war—$65,700,000.

Mr. KING. If the Senator will permit me, during the past year it has been presumed that there has been some of the liquidation process going on, and with the return to normalcy, to use President Harding's expression, there would be a material reduction in the expenses paid for the Army and for the Navy.

Mr. WADSWORTH. Of course, the Senator can ascribe it to anything he wants to. I am stating facts. The pending bill carries $65,700,000 below last year's bill, and is that far below last year's appropriations because the committee, in the first place, has agreed to a reduction of the Army from 150,000 to 133,000, and, in the second place, the pay schedules of the Army have been revised at a substantial saving. These are the two big reasons. The other things to which the Senator refers do not amount to a snap of the finger in saving in these matters.

Mr. UNDERWOOD. Mr. President, will the Senator permit me to ask him a question?

Mr. WADSWORTH. Certainly.

Mr. UNDERWOOD. I followed the Senator's very clear statement as to the condition in the Army, but I am not sure that I got it into my head thoroughly. After eliminating staff corps—I mean those corps that can not be used for defensive or guard purposes—and eliminating the number of men in the foreign service—and I agree thoroughly with the Senator in that I do not think that force can be reduced at this time—he stated that it left us 65,000 men.

Mr. WADSWORTH. At the maximum; and may I say that that is based upon a theory that not one of them is sick at any time.

Mr. UNDERWOOD. That includes the men on the border?

Mr. WADSWORTH. It does.

Mr. UNDERWOOD. Eliminating the 25,000 men on the border from the 65,000 leaves 40,000 available men for police service in the States.

Mr. WADSWORTH. Approximately.

Mr. UNDERWOOD. That is, under the terms of the pending bill.

Mr. WADSWORTH. Yes.

Mr. UNDERWOOD. If we reduce it to the number of men provided for by the House and assume that we have the same number in the border service, how many would it leave for police service in the country?

Mr. WADSWORTH. If we take the House figures?

Mr. UNDERWOOD. Yes.

Mr. WADSWORTH. Twenty-two thousand men would be left.

Mr. UNDERWOOD. For service throughout the States?

Mr. WADSWORTH. For the entire United States outside of the border.

Mr. BORAH. What is the size of the National Guard to-day?

Mr. WADSWORTH. One hundred and fifty thousand.

Mr. BORAH. It will be increased to 190,000?

Mr. WADSWORTH. Over a course of months. As the National Guard increases the Regular Army has been decreasing, but the proportion of decrease in the Regular Army is more gradual according to these figures than the increase in the National Guard. We have reduced the Regular Army from an authorized strength of 280,000 down to 133,000, as proposed in the bill.

Last year at this time when we were talking about the size of the Army and the bill was before the Senate, the Regular Army consisted of approximately 220,000 men. We reduced it by act of Congress in the appropriation bill to 150,000. We discharged 70,000 men in four months. It was a stupid thing to do, because it cost us more money than to have let them go out naturally. We had to pay six or seven million dollars in transportation for those men to get home, at an average of $55 per man, but it had to be done for effect. So 70,000 men were thrown out and instantly the department started to recruit again. The Senate committee does not believe that is good business. We know it does not save a cent. The figures we adopt are the present approximate strength of the Army.

Mr. BORAH. It has resulted in reducing the Army to 133,000 men.

Mr. WADSWORTH. Certainly; it would have been reduced if we had stopped recruiting.

Mr. BORAH. It would not have been reduced as promptly, however.

Mr. WADSWORTH. The method, however, was not a good one.

Mr. BORAH. It had the effect, however.

Mr. WADSWORTH. From a dollar and cents standpoint it was not a good method.

Mr. KING. Mr. President, will the Senator permit an inquiry?

Mr. WADSWORTH. Certainly.

Mr. KING. I am interested in the number of troops which will be available for striking purposes, as I understood the Senator's expression.

Mr. WADSWORTH. The mobile force.

Mr. KING. The actual troops. It seems from the Senator's figures that it needs one man extra for every soldier put in the field.

Mr. WADSWORTH. Not at all.

Mr. KING. Practically that.

Mr. WADSWORTH. Oh, no.

Mr. KING. I think so.

Mr. WADSWORTH. The Senator forgets the figures.

Mr. KING. Oh, no; I do not forget the figures.

Mr. WADSWORTH. The Senator must have forgotten them.

Mr. KING. Very well, then, the Senator must have forgotten them.

Mr. WADSWORTH. I will read them again. The Senator from Utah has stated that it would require one overhead and supply man and noncombatant for each soldier.

Mr. KING. Substantially.

Mr. WADSWORTH. Now, let us see. I stated that there are 35,000 men in the overhead, noncombatant, and nonmobile troops. There are 65,000, including the men on the border, for combatant purposes and mobile purposes.

Mr. KING. How many combatant troops will there be out of the 150,000, or whatever number is provided for in the bill?

Mr. WADSWORTH. One hundred and thirty-three thousand is the average strength provided in the bill.

Mr. KING. Of course, that does not include officers?

Mr. WADSWORTH. No.

Mr. KING. What proportion of those will be available for strictly military purposes? And when I say strictly military purposes I do not include the commissary department, the medical department, and so on.

Mr. WADSWORTH. About 65,000 men.

Mr. KING. Then we would get about one-half of the number for strictly military purposes?

Mr. WADSWORTH. In the United States, and there are 30,000 overseas.

Mr. KING. We have how many in the United States in the Medical Corps?

Mr. WADSWORTH. In the Medical Corps?

Mr. KING. Yes. My recollection is that there are 6,000 privates in the Medical Corps. That does not take into account the officers.

Mr. WADSWORTH. In the Medical Corps there are 6,649.

Mr. KING. In continental America?

Mr. WADSWORTH. Of course some medical troops, some commissary troops, and so forth, go with the mobile troops in the field, but the great bulk are on the line of communication, to use a military term, and are not a part of the combat or striking forces.

Mr. KING. Does the Senator know how many civilians are employed in the War Department?

Mr. WADSWORTH. Yes.

Mr. KING. In all branches of the military service, to be available for utilization in the military strength provided in the bill?

Mr. WADSWORTH. I can give the exact number of people of civilian status under the War Department in and out of Washington compared with the number before the war and at the high peak.

Mr. KING. I am asking for the present number under the pending bill.

Mr. WADSWORTH. It will be somewhat less than the figures which I presented to the Senate. As I said, the committee has reduced the net number of civilian employees. The Senator from Missouri [Mr. SPENCER] can probably give some information about the reduction in the number of men.

Civilian employees in Washington at the time of the armistice were 37,406, and over the entire country, including Washington, there were 251,634. To-day there are in Washington, instead of 37,406, only 5,648.

Mr. KING. At the time of the armistice there were 4,000,000 men in the service.

Mr. WADSWORTH. The Senator need not interrupt me. I understand that perfectly well.

Mr. KING. The Senator is furnishing information which I did not ask for and with which I am perfectly familiar. I am asking for the number of civilian employees.

Mr. WADSWORTH. I understand that I have the floor, and I am endeavoring to furnish information which might be of interest perhaps to others than the Senator from Utah.

Mr. KING. If the Senator desires to give information to others, I have no objection.

Mr. WADSWORTH. That is what I am trying to do.

Mr. KING. I shall be glad if the Senator will give the information I asked for.

Mr. WADSWORTH. I think if the Senator will be patient he will get it.

Mr. KING. I shall wait with supreme patience for the learned Senator to furnish the information I asked for.

Mr. WADSWORTH. I was stating the number of civilian employees of the War Department. I thought it might be of interest to show how that number has been reduced. At present in the city of Washington there are 5,648 civilian employees, and over the entire country, including Washington, there are 48,691. Before we entered the war in 1916 there were all over the country, including Washington, 45,911. In other words, we are down now in the matter of civilian employees to within less than 3,000 of the number we had in 1916 in spite of the fact that since 1916 two branches have been added to the Army, each necessitating a number of civilian employees or clerks, namely, the Chemical Warfare Service and the Air Service. Those two services taken together account for 5,340 civilian employees in the War Department to-day. If they are subtracted and the calculation made upon the basis of the Army as it existed as to branches and tactical organization in 1916, we find that Secretary of War Weeks and the War Department are actually employing fewer clerks than were employed in 1916.

I think myself it is a most astonishing achievement, considering that much of the aftermath of the war itself is still on the hands of the War Department. We have still immense installations which have not been sold or realized on, which require watchmen to guard and clerks to take care of in the matter of accounts and fiscal operations. The bill will reduce the number still further, and I verily believe when the bill passes, if it should pass in the form even as proposed by the Senate committee, we shall have fewer civilian employees in the War Department than we had in 1916, and yet our Army will be 25,000 or 30,000 larger than in 1916, and twice as good an Army.

Mr. WARREN. It should be remembered, in making the reduction from last year's Army strength, that all the civilian employees were carried in other appropriation bills than the Army appropriation bill, so that the figures given awhile ago by the Senator from New York hardly do justice to the real shrinkage in the cost of the Army as stated.

Mr. WADSWORTH. That is very true.

Mr. KENDRICK. Mr. President——

Mr. WADSWORTH. I yield to the Senator from Wyoming.

Mr. KENDRICK. I have listened very carefully to the very clear and comprehensive statement made by the Senator from New York, but on one point I am not quite certain that I understood him fully. The Senator stated, as I understood him, that the authorized Army strength at present is 150,000 men?

Mr. WADSWORTH. Yes; that is the authorized strength.

Mr. KENDRICK. But owing to a lack of appropriation or other causes, it is short of that number in the present quota by 16,000?

Mr. WADSWORTH. It is.

Mr. KENDRICK. Did I correctly understand the Senator to say that by some provision in the pending bill or other authorized provision the Army will be arbitrarily fixed at 133,000 after the passage of this bill?

Mr. WADSWORTH. Not fixed at that number, but the appropriation for pay of enlisted men, which is stated in the face of the bill itself, shall be used and shall be sufficient for paying an Army averaging in strength throughout the year 133,000. The authorized maximum strength would be 140,000. That provision is put in to give some leeway to the recruiting service, but throughout the entire year the average strength must not be over 133,000. If it goes up to 140,000 at one time during the year, it must go an equal distance below 133,000 for an equal portion of the year.

Mr. KENDRICK. Which has the same effect as fixing it arbitrarily at 133,000?

Mr. WADSWORTH. Yes; it has that effect.

Mr. KING. Mr. President, I should like to ask the Senator from New York a question. If I understood him correctly, the number of civilian employees under this bill will be approximately 54,000 in the United States and elsewhere?

Mr. WADSWORTH. Oh, no. The present number is 48,691. That includes all the civilian employees of the department wherever stationed—overseas, in continental United States, Germany, anywhere.

Mr. KING. What will be the number of civilian employees under this bill?

Mr. WADSWORTH. I can not give the Senator an exact estimate as to that. It certainly will be less, because certain restrictions are in the bill which are applicable to the employment of civilian employees in certain branches.

Mr. KING. Does the Senator think that the number will be reduced to 40,000?

Mr. WADSWORTH. I could not say.

Mr. KING. Well, assuming that the number is reduced to 40,000—and the Senator from Nebraska [Mr. HITCHCOCK] sotto voce says he does not think it will be reduced so low as that, if I understand him correctly—does not the Senator from New York think that it is a rather large number of civilian employees for the Army which is provided for in this bill?

Mr. WADSWORTH. Mr. President, if the number were merely for the Army alone, I would say yes, but unfortunately the War Department is saddled with many activities which have nothing to do with the Army. It has to take care of the national cemeteries; it has to run a cable to Alaska and to man it; it has to build roads and trails in Alaska; and it is necessary to have a clerical force to keep track of the accounts. It carries on river and harbor works, and, of course, it requires a clerical staff in the office of the Chief of Engineers and a clerical staff in the field with the Army officers who are supervising the work. The War Department conducts other similar activities that have nothing to do with the Army.

Mr. KING. Then this number would include the clerical civilian force for all those activities to which the Senator from New York has just referred?

Mr. WADSWORTH. It includes everybody who is employed by the War Department.

Mr. KING. May I suggest to the Senator, with a view of obtaining information, that some criticisms have been made in my hearing and to me by persons who are somewhat acquainted with the Army, to the effect that civilian employees are pressed into service to do work which, perhaps, the officers or soldiers might perform. Does the Senator from New York know to what extent that criticism is warranted?

Mr. WADSWORTH. No; I do not. It has not reached my ears. Of course, however, if we go on reducing the civilian employees and go on reducing the number of soldiers, both at the same time, the criticism could not stand; and that is what we have been doing.

Mr. NORRIS. I wish to ask the Senator from New York two questions. How much larger is the Army as provided for in the Senate committee amendment than the Army was in 1916?

Mr. WADSWORTH. My recollection is that in 1916 the Army numbered in the neighborhood of 102,000 men. At that time, however, we had no Air Service and we had no Motor Transport Corps, both of which, of course, are absolutely essential. It may be of interest to note also that at that time we had no machine-gun battalions whatsoever in the Army of the United States. Those agencies, which are positively essential, have been added since that time by statute and by regulation, in order to meet the requirements of an army which is expected to be able to take the field, and they more than account for the difference in size between about 102,000 and 133,000 men.

Mr. NORRIS. That is the question I was leading up to. Taking the enlisted men of the Regular Army under the Senate committee amendment, will there be more or less than we had of enlisted men in 1916?

Mr. WADSWORTH. There will be more.

Mr. NORRIS. How many more?

Mr. WADSWORTH. Approximately the difference between 102,000 and 133,000.

Mr. NORRIS. How did the size of the Army in 1916 compare, for instance, with the size of the Army in 1914? Was not the Army in 1916 increased considerably in size over the Army which existed before the breaking out of the war in Europe?

Mr. WADSWORTH. No. The first increase which occurred in the Army occurred as the result of the act of June 3, 1916, which was known as the national defense act. That act, as I recollect, found the Army numbering about 102,000 men. The act provided that for five years thereafter, to wit, from June 3, 1916, there should be annual increments to the Regular Army until its strength at the end of the five years—which would have been in 1921—would have been in the neighborhood of 225,000 men. That was the military policy which was laid down in 1916, a year before we went into the war; but that policy has been abandoned. We have now gone back and have suggested an Army of 133,000 enlisted men.

Mr. NORRIS. That does not quite answer my question.

Mr. WADSWORTH. That was the first increment.

Mr. NORRIS. How large was the Army just before that increase?

Mr. WADSWORTH. The Army numbered 102,000 men.

Mr. NORRIS. Before 1916?

Mr. WADSWORTH. I have not the figures before me, but my recollection is that the Army had varied between 88,000 and 102,000 for several years, but the old method of computation upon which 88,000 was based did not include the Medical or Quartermaster Corps; they were not counted as troops.

Mr. NORRIS. What conditions, in the Senator's judgment, exist now that did not exist before the war which require more troops in the Regular Army? Does the Senator think there were not enough in the Army at that time?

Mr. WADSWORTH. There certainly were not, according to my judgment.

Mr. NORRIS. It is not the Senator's idea, then, so far as the Army is concerned, to ever get it back to its pre-war size?

Mr. WADSWORTH. I should hope it would not be allowed to go that low. I do not think it should; I do not think it would be safe.

Mr. NORRIS. The House bill reduced the enlisted strength of the Army to 115,000 men. That number is still about 13,000 more than were in the Army before the war, is it not?

Mr. WADSWORTH. Yes. If the Army is to be reduced to that level, we might as well be perfectly frank about it. In that event we shall be compelled to withdraw from the National Guard and the Reserve Officers' Training Corps in the colleges those splendid sergeants and corporals and some privates, first class, who have been assisting in training those boys and who have been exceedingly successful in their work. If we continue to reduce we have got to withdraw officers and men, wherever the reduction takes place, from these educational activities upon which the whole military policy of this country is founded. If in time of peace we are not to train citizens so that they shall have a decent chance for themselves and for the country in time of war, if war shall overtake us, then we have no military policy at all and no defense, because the Regular Army can never be a large army.

Mr. NORRIS. I should like to inquire upon what the Senator bases his assertion that we should have to withdraw those instructors. As I understand his statement, outside of those acting as instructors and the men on the border and men overseas, we still have stationed at different places throughout the continental United States an Army much larger than the Army we had before the war, and an Army which has not any particular duty to perform except as emergency may arise here and there over the country, when it may be found necessary to send a few Regular troops into various communities.

Mr. WADSWORTH. It depends, of course, upon what the Senator means by "duty to perform." I consider that the Regular Army has a duty to perform.

Mr. NORRIS. We would still have left somewhere in the neighborhood of 40,000 men.

Mr. WADSWORTH. Yes; 40,000 men. Of course it may be said that we will get along all right with 40,000 men as long as there is no trouble.

Mr. NORRIS. We did get along——

Mr. WADSWORTH. Yes; until the war came.

Mr. NORRIS. We got along with much less than the number proposed, and of course if war came 40,000 would not be a drop in the bucket, so far as that is concerned.

Mr. WADSWORTH. They are merely a nucleus.

Mr. NORRIS. Yes.

Mr. WADSWORTH. But if you keep on reducing the nucleus there will be practically nothing left.

Mr. NORRIS. But for instruction of the National Guard, and so forth, it seems to me that there was no necessity before the war, and I do not understand why there should be now the necessity of using such a large Army. I never remember a time in the days before the war when we were short of the United States troops to quell any disturbance that might arise or that there was any complaint that there was a shortage of troops. Now, we are practically doubling the Army.

Mr. WADSWORTH. Oh, no; we are not anywhere near doubling it. We had 102,000 before the war, and the committee suggests an Army of 133,000.

Mr. NORRIS. When I say doubling I am referring to the portion of the Army that is still left after making allowance for all the officers and men on special duty.

Mr. WADSWORTH. Of course, in 1916 there was no provision of law for training the Reserve Officers' Training Corps and no provisions of law for the Organized Reserves, involving the detail of officers and men from the Regular Army as instructors. We had no special-service schools at all; but we learned a lesson from the war, and I hope it will never be necessary again for American officers and soldiers to have to go to French schools and British schools to learn the tactics of their respective branches. We have now established tactical schools—schools of a very special character, such as Camps Benning, Riley, Knox, Bragg, and Eustis, all part of the system of instruction—to which National Guard officers and National Guard enlisted men go on their own volition to take the various courses, and where they are taught by officers and enlisted men of the Regular Army. All of that, of course, takes personnel.

Mr. NORRIS. We had none of that prior to the war?

Mr. WADSWORTH. We had none of that prior to the war. At that time a National Guard man was not allowed to go to a Regular Army school.

Mr. NORRIS. Mr. President, the training of the National Guard and of civilians constitutes one reason, it seems to me, why we do not need such a large standing Army. We have developed all those activities which we did not have before the war, when we had a much less number of soldiers in the Regular Army than we have now.

Mr. WADSWORTH. But those activities have to be carried on by soldiers of the Regular Army.

Mr. NORRIS. Oh, yes; I understand that.

Mr. WADSWORTH. That is one reason for a part of the increase.

Mr. NORRIS. The Senator has taken all those out, and I have excluded them from my calculations. It seems to me that with the number of officers and men that have been detailed, amounting to several thousand—the Senator gave the figures a short while ago—for educational and instruction purposes in schools and for training National Guard officers, and all that, instead of demanding an increase in the standing army it ought to bring about a decrease, because that means that we will not be under the necessity, as the Senator said we previously were, of sending our officers and men to foreign schools, although, so far as that is concerned, foreign governments send their men to our schools. We have soldiers here from practically all the nations in the world studying in various localities in the United States, and I suppose we send our men to other countries. We are giving military instruction to civilians, and we have developed the National Guard until its present organization far surpasses its organization before the war, so that the old National Guard can not be compared in its ability to perform military duty on short notice with the National Guard as at present organized. If that means anything, if it has any value whatever, it seems to me that the value is that it will be unnecessary to maintain so large a standing army, because we have military information and training given to the ordinary citizen and provided in the various schools and in the National Guard. Such activities are used as a reason why we should have a larger Army; the fact that they were not carried on prior to the war and that we got into trouble is used as an argument by the Senator from New York why our Army should be increased now. As a matter of fact, it is an argument for a smaller standing army, because, in case of difficulty, we would be able to rely upon the instruction, upon the information, and upon the training that has been given to the National Guard and to civilians through these very activities. Hence if the training amounts to anything—and I think it does—it would mean that we could equip an army of trained soldiers a great deal quicker than we ever did before; and, so far as time is concerned, we did it very quickly during the recent war.

There can be no argument made for a large standing army because we need a large standing army to do the fighting in case of war. If that were so, then we must maintain a million men. It is not intended to have a standing army that will be equipped as fighting men during time of peace, but only a nucleus. Now it is proposed to increase the number of enlisted men provided by the House bill by 22,000 men.

Mr. WADSWORTH. By 18,000.

Mr. NORRIS. By 18,000; I stand corrected. It is proposed to increase it by 18,000, when as a matter of fact the House bill itself provides an increase of 13,000 over the number of men in the Regular Army before the war. Then, in addition to that, we now have the National Guard in a condition that the Senator himself says is far superior to anything that ever existed before the war, so that the reason for a larger standing army falls.

I should like to call upon any Senator here to point to the occasion or the time before the great World War when we were ever handicapped by not having a standing army that was large enough to meet every contingency and every emer-

gency that ever arose in time of peace. Have we any reason to believe now that it will be different, especially when we take into consideration the fact that we have a National Guard and a citizen soldiery equipped with military knowledge such as we never had before, such as we never had even an indication of, away beyond anything that ever existed? And now, on top of all that, it is said that we must increase the standing army!

It seems to me that not a single argument has been produced to show that the standing army should be greater than before the war. In fact, the argument is that it should be, and could be without any risk whatever, less, because of these other activities that the Senator from New York has so well mentioned and described.

Mr. President, it was said when the last Army bill was here, and shown conclusively, that practically the only place where we could get any material reduction in the way of taxation was through reducing the Army and the Navy appropriation bills. Now, at a time when no argument is shown for an increase of the standing army, but the argument is the other way, coupled with the fact that the American people are bowed down to the earth with the burdens of taxation, and here is a place where we can cut it off by the millions without any injury or risk, it seems to me that we shall fall far short of performing our duty if we do not apply the pruning knife.

Mr. MYERS. Mr. President, after cessation of the hostilities of the World War, and while he was still President, Woodrow Wilson urged that the United States maintain a standing army of 300,000 men. At the same time Newton D. Baker, then Secretary of War, urged that the United States maintain a standing army of 300,000 men; and as a parting admonition, before those eminent officials retired from public office, they urged very strongly that Congress should not, under any circumstances, reduce the strength of the standing army below 200,000 men.

I do not believe that anybody could properly accuse either one of those worthy gentlemen of being a militarist. I do not think there is anything in the record or career of Woodrow Wilson to show that he is or ever was a militarist. He is, I think, admittedly one of the most world-renowned and eminent advocates of world peace, one of the most ardent and passionate devotees of peace that the world has ever known. With him, love and advocacy of peace are a passion. He devoted some of the best and most precious years of his life to a supreme effort to establish permanent world-wide peace. He sacrificed his health and almost sacrificed his life in an effort to establish world peace, and I know that nobody can justly accuse him of wanting to see the world an armed military camp.

All of his ideas and ideals are those of a man of peace. A just, world-wide peace has been the ambition of his life. Hon. Newton D. Baker is cast very much in the same mold, and yet they both insisted after the end of the World War that the needs of this country required a standing army of 300,000 men. I think their first figures, looking back at them now, may have been rather liberal; they may not have been entirely justified; but when they said that the country should always have a standing army of at least 200,000 men I think they were well within the bounds of reason.

General Pershing has always argued that this country, under the reorganized scheme of maintaining an Army which Congress has enacted and provided for, required a standing army of at least 200,000 men and has pleaded very strongly that it should not be reduced below that number; and yet the tendency of the times has been, undoubtedly owing to the great expense of the World War and the enormous burden of taxation under which the people of this country are staggering, to reduce the size of the Army below what many thought it should be maintained at when the World War closed. There may be some semblance of reason in favor of that contention, but I think we should be very careful not to go too far in that direction. In spite of the pleadings of President Wilson and Secretary of War Baker and General Pershing before the close of the last preceding administration, Congress reduced the size of the Army to 150,000 men. I thought then and I think now that that was and is the very lowest figure consistent with safety and prudence under the scheme of reorganization which Congress has enacted and provided for keeping up a standing army in this country; and yet we are now confronted with the proposition which comes from the House, as set forth in this bill, of reducing it to 115,000 men.

I think that is going entirely too far and wholly beyond the bounds of reason, in the direction of economy, if economy be the ground. We need to economize in this country, undoubtedly, but we should economize with prudence and in accordance with reason. I do not think we should destroy or cripple an essential branch of the Government merely for purposes of economy. That would not be wise economy.

If this great country, the greatest in the world, which possesses a larger area of the earth's surface than any other country in the world, excepting Great Britain and Russia; a country with 11,000 miles of seacoast, 10,000 cities and towns, and 1,900 miles of Mexican border; with its great rivers and numerous harbors; with great industrial centers and a vast system of railroads; with its 48 States, to which it is pledged to guarantee and maintain a republican form of government, and to each of which it owes the bounden duty to enforce and maintain within its borders law and order, if the State authorities are unable to do so; with the Philippines, Hawaii, Alaska, Porto Rico, Guam, the Panama Canal strip, and the Virgin Islands as outlying territorial possessions, where it must maintain order; I repeat, if such a country does not need a standing army of 134,000 men, then I must confess that in my opinion it does not need any at all. If 134,000 men are not reasonably necessary, then 34 men would be sufficient, or none at all. If we are going to maintain an army at all, on the plan of a reorganized and reconstructed system, the framework of which was carefully worked out by Congress and provided as a permanent basis for maintaining a standing army equal to our needs, then I think 134,000 men the least number that should be considered. If, under that plan, we are not going to maintain an army of 134,000 men, I do not think we need to undertake to maintain any at all. The truth is, in this great country of vast territory, vaster responsibilities, great stretch of seacoast, complicated industrial life; a country of more than 110,000,000 population, which is rapidly growing; in this great country, I say, the truth is a standing army of 134,000 men is a mere pittance, a trifle, only a handful of soldiery. It is insignificant. It amounts to little more than a good police force. Of course, some people are opposed to any army at all. Some people want no army. There are elements of our population that oppose having any army at all; even oppose a State militia; but in every civilized country of the world there is need for some army, and it always will be so until the coming of the millennium; and a self-governing country of law and order should have a decently adequate army. It is an essential part of governmental housekeeping.

Mr. CARAWAY. Mr. President, may I ask the Senator a question?

Mr. MYERS. I yield to the Senator from Arkansas, with pleasure.

Mr. CARAWAY. How does the Senator arrive at 134,000 as being the proper number? Why does he think that that is safe, and below that is dangerous, and above that is too many?

Mr. MYERS. The Senator is entirely mistaken. I have not said that nor anything like it. I do not think above that number is too many. I think we might well and should maintain an army of 150,000 men, as Congress provided for a year ago, and I have said so.

Mr. CARAWAY. I thought the Senator said that 134,000 was safe, but that he would not go above or below that number.

Mr. MYERS. No. I said that if we were not going to maintain an army of 134,000 I did not see any use of maintaining any at all, but that I felt that that number was the least number we should consider under our present plan of army reorganization. A year ago Congress and its committees carefully worked out the idea that 150,000 men was the least number of men that we could have to maintain even a skeleton organization of an army, in all of its essential parts, according to the plan that had been devised by Congress, and I think Congress was right when it did so, and so declared. Here, however, is a proposition to reduce the number 16,000 below that figure, and another proposition comes from the House to reduce it by 35,000. I think 150,000 needed, but as between the two propositions before us, I prefer the plan proposed by the Senate committee, the one which proposes the larger number—the one more nearly approaching our needs. I think the House proposition absurd.

The Senate proposition comes nearer to what was deliberately agreed upon by both branches of Congress a year ago as being essential for keeping up a skeleton of our reorganized Army under the plan that Congress had deliberately devised and the Executive had approved. We came to that conclusion a year ago, and I can see no reason for abandoning it if we are going to keep up an Army at all on that plan. If we are not going to keep up an Army on that plan, then I think we should devise some other plan that would call for a lesser number of troops; but as long as we adhere to that plan I think we ought to have an Army of 150,000 men or as near to it as we can get.

I realize that there are few ways in which a Member of Congress may appeal more strongly to popular favor than by "jumping on" the Army, as you might say, decrying the Army, and wanting continually to reduce it. I know that it meets with much popular favor; there is always a hue and cry against any

standing Army; but, at the same time, the Army is an essential branch of our Government. It is liable at any time to be just as essential as the lawmaking branch of the Government. Congress and the Executive make the laws of the country. The Executive must enforce them. In enforcing the laws the executive branch must rely upon the administrative officials of the Government to enforce the law. If they fail, or prove insufficient, he must call upon the posse comitatus, and if that fails him or proves insufficient he must fall back in the last resort upon the Army. Then, if the Army proves insufficient, the Government must fall. Unless we are going to have a decent-sized Army, well organized and equipped, ready to meet any emergency from without or within, I do not see any reason for undertaking to have any at all.

I am in sympathy with the figures set forth in the amendment that is recommended by the Senate Committee on Military Affairs. I think the figures are entirely within the bounds of reason, and think they come the nearest to what our military officials say we ought to have. My only objection to them is that they are too low, but they appear to be the best there is any chance of getting, and I favor the Senate committee amendment.

Mr. HITCHCOCK. Mr. President, the chairman of the Committee on Military Affairs said some time ago that we have at the present time an Army twice as good as it formerly was. I presume he referred to pre-war days. I agree with him. It is not possible to sit upon the Committee on Military Affairs and listen to the testimony of officers of the department who come before the committee without being impressed by the spirit, the discipline, and the high order of intelligence of the organization, and I unite with the Senator in paying a meed of praise to the Army of the United States. I think it has come out of the war enormously improved, and what is true of the Army is to a considerable extent true of the organization of the War Department.

I agree also that it is a matter of some difficulty for a civilian to listen to those officers pleading for military perfection in an organization and not yield to their recommendations for maintaining a large organization, and probably it is true that if we reduce the size of the Army below what it is now, there may be some deterioration as measured by perfection.

But, Mr. President, this is a matter in which the people of the United States have a right to make a decision. It is hardly within the probabilities that the American people want a perfect military machine. What they want is an adequate military machine, for protection, to preserve the science of warfare, to maintain trained officers, to teach the civilian population enough about military affairs, so that in the possible, though remote, chance of war, we would be able to go into the war with credit and with safety.

The fact is that this bill comes to us from the House of Representatives providing for a total appropriation of $287,897,000. My judgment is that that appropriation was fixed, and the limitation was made, in response to a widespread demand among the American people for a reduction of military expenditures. It is not simply because the American people are overburdened with taxes; it is because they are against excessive expenditures for military purposes. As I have said, they want adequate military protection, but they do not demand military perfection.

This bill emerges from the Senate committee with a total appropriation of $333,882,851, which is an addition of practically $46,000,000. A part of that increase in the appropriation is necessary. It is necessary, because the House in considering the bill used the rate of pay of 1908, and the Congress has already passed an act raising the pay, although leaving it below the pay of the officers and men during the war. So a part of that addition of $46,000,000 is necessary.

Another part, I believe, is justified by the action of the Senate in increasing the number of officers above what the House had provided. I believe in that increase, not because I believe in a larger Military Establishment, but because I believe in providing officers for the teaching of civilians who are unorganized, or those civilians who are organized in the National Guard. I believe in providing as many officers in our schools and our colleges as are needed. I believe in providing officers in our civilian camps, where training takes place during the summer. In other words, I believe that the increase in the number of officers is justified because of the opportunity it gives to train a limited number of the civilian population. So some increase, in my opinion, is justified by that.

However, when we come to the increase in the number of enlisted men from 115,000, as provided in the House, to 140,000, as provided in the Senate committee bill, I am disposed not to go with the committee. I know the chairman of the committee says that is a maximum; but so is 150,000 a maximum.

Mr. WADSWORTH. We actually appropriated for 150,000 for this year.

Mr. HITCHCOCK. I am coming to that now. As a matter of fact, a year ago, when the Congress insisted on reducing the limit of the Army to 150,000 men, we were met by the Secretary of War and the military officers of the War Department with a storm of protest. They said then the same thing they say now, that it would demoralize our Military Establishment; that it would make it impossible to perform the duties which Congress required of our Military Establishment, and, as I recall it, they were fully as emphatic then in opposing a limit of 150,000 as they are now determined to have 150,000.

Mr. CARAWAY. Mr. President, does the Senator remember that that amendment was condemned by the President when he signed the bill?

Mr. HITCHCOCK. I do not remember his words.

Mr. CARAWAY. In effect, was it not condemned?

Mr. HITCHCOCK. I think it was condemned by the President, and that he said he would not ask his Secretary to enforce it.

Mr. LENROOT. Mr. President, I would like to know if President Wilson did not make a like condemnation when we limited it to 175,000.

Mr. HITCHCOCK. It is quite likely.

Mr. WADSWORTH. He vetoed the bill.

Mr. HITCHCOCK. I am not criticizing President Harding for what he said. If I should hold the office of Secretary of War, as Mr. Weeks now holds it, and if I were surrounded by those military officers, who should come to me one after another and insist that any diminution of their particular departments would send the country to the bow wows, I suppose I would be influenced by them. Any civilian is influenced by them, and as a member of the Committee on Military Affairs, and as a member of the subcommittee, I confess that at times I was influenced by the positive statements of those officers, many of them young, keen, bright, alert, highly trained, and highly educated. I was influenced by what they said. I am not a radical by any means, for that reason. I can hardly be regarded as a radical.

But I say that the reduction of the Army to 150,000 men carries out the will of the people; that the will of Congress as expressed a year ago has proven a success, and that at the present time we have not 150,000 men.

We have only about 141,000 men actually enlisted, and things seem to be getting on very well. The ruin has not come; war has not been provoked, the Military Establishment has not been disjointed, and I am morally certain in my own mind that if we make a still further reduction we shall find at the end of the year that the Military Establishment will still be here. There might not be quite the military perfection in all departments which theoretically the officers think there would be if we maintained a larger number, but I believe the country will find by experience, after another reduction, that the Nation still lives, and that no material damage has been done.

I think it is of importance that Congress should respond to the demand of the American people for relief from taxation. I would not like to be forced to choose between the House limit and the limit provided by the committee of the Senate, although if I am, I believe I shall vote for the House limit. I believe that there should be a mid-position taken. I believe we should make another reduction this year, in the hope that we can make still another one next year.

I realize in saying that that men who are in close contact with military officers are, perhaps, in a better position to judge than I am, but Congress is between the demand of the people for a reduction and the financial need for a reduction and the demand of these officers for what I might call a theoretically perfect Military Establishment.

I believe that if we err at all we should err in the direction of economy. If we should find that we made a mistake, it would be very easy to retrace. So, if I am forced to choose, I shall vote for the House limitation of 115,000 men.

The VICE PRESIDENT. The question is on agreeing to the committee amendment on page 24, inserting the item "Pay of enlisted men." The yeas and nays have been ordered, and the Secretary will call the roll.

The reading clerk proceeded to call the roll.

Mr. GLASS (when his name was called). I have a general pair with the senior Senator from Vermont [Mr. DILLINGHAM]. In his absence, I withhold my vote.

Mr. KENDRICK (when his name was called). Making the same announcement as before as to the transfer of my pair, I vote "yea."

Mr. NEW (when his name was called). Making the same announcement as to the transfer of my pair as on the previous vote, I vote "yea."

Mr. WALSH of Montana (when his name was called). In the absence of the Senator from New Jersey [Mr. FRELINGHUYSEN], with whom I am paired, I withhold my vote. If permitted to vote, I would vote "nay."

Mr. WARREN (when his name was called). Again announcing the transfer of my pair, I vote "yea."

The roll call was concluded.

Mr. BALL. I transfer my pair with the Senator from Florida [Mr. FLETCHER] to the junior Senator from New Hampshire [Mr. KEYES] and vote "yea."

Mr. SMITH. Has the Senator from South Dakota [Mr. STERLING] voted?

The VICE PRESIDENT. That Senator has not voted.

Mr. SMITH. I have a general pair with that Senator. In his absence, I am compelled to withhold my vote.

Mr. HALE. Making the same announcement as before, I vote "yea."

Mr. COLT. I transfer my pair with the junior Senator from Florida [Mr. TRAMMELL] to the junior Senator from South Dakota [Mr. NORBECK] and vote "yea."

Mr. SMITH. I have just been informed that my pair [Mr. STERLING], if present, would vote as I am going to vote, and therefore I take the liberty of voting. I vote "yea."

Mr. BROUSSARD. I transfer my pair with the senior Senator from New Hampshire [Mr. MOSES] to my colleague [Mr. RANSDELL] and vote "nay."

Mr. WALSH of Montana. I transfer my pair with the senior Senator from New Jersey [Mr. FRELINGHUYSEN] to the senior Senator from Ohio [Mr. POMERENE] and vote "nay."

Mr. HARRISON. I transfer my pair with the junior Senator from West Virginia [Mr. ELKINS] to the senior Senator from Texas [Mr. CULBERSON] and vote "nay."

Mr. EDGE (after having voted in the affirmative). I transfer my pair with the senior Senator from Oklahoma [Mr. OWEN] to the junior Senator from Oklahoma [Mr. HARRELD] and allow my vote to stand.

The result was announced—yeas 49, nays 21, as follows:

YEAS—49.

Ashurst	Gerry	McNary	Smith
Ball	Gooding	Myers	Smoot
Brandegee	Hale	Nelson	Spencer
Bursum	Heflin	New	Sutherland
Calder	Johnson	Newberry	Townsend
Cameron	Jones, Wash.	Oddie	Underwood
Colt	Kellogg	Page	Wadsworth
Cummins	Kendrick	Pepper	Warren
Curtis	Lenroot	Phipps	Watson, Ind.
du Pont	Lodge	Poindexter	Williams
Edge	McCumber	Rawson	
Ernst	McKinley	Sheppard	
France	McLean	Shortridge	

NAYS—21.

Borah	Harrison	Norris	Walsh, Mont.
Broussard	Hitchcock	Robinson	Watson, Ga.
Capper	Jones, N. Mex.	Simmons	Willis
Caraway	King	Stanley	
Dial	Ladd	Swanson	
Harris	La Follette	Walsh, Mass.	

NOT VOTING—26.

Crow	Glass	Norbeck	Shields
Culberson	Harreld	Overman	Stanfield
Dillingham	Keyes	Owen	Sterling
Elkins	McCormick	Pittman	Trammell
Fernald	McKellar	Pomerene	Weller
Fletcher	Moses	Ransdell	
Frelinghuysen	Nicholson	Reed	

So the amendment of the committee was agreed to.

Mr. WADSWORTH. I ask that we now return to the committee amendment which commences on page 15, "Pay of officers," and which was passed over.

The ASSISTANT SECRETARY. The committee report, on page 15, after line 9, to strike out:

Pay of officers: For pay of officers of the line and staff, $26,896,200: *Provided*, That the sum herein appropriated for the pay of officers shall not be used for the pay of more than 11,000 commissioned officers on the active list, of which number there shall be not to exceed 1 general, 21 major generals, and 46 brigadier generals of the line; the general officers authorized by law for chiefs and assistant chiefs of branches; the number of officers of the Medical Corps now authorized by law of six and one-half for every thousand enlisted men, the number of officers of the Medical Administrative Corps now authorized by law of 1 for every 2,000 enlisted men, the number of officers of the Dental Corps now authorized by law of one for every thousand officers and enlisted men of the Regular Army; not to exceed 109 commissioned officers of the Veterinary Corps; 1 chaplain as now authorized by law for every 1,200 officers and enlisted men of the Regular Army, exclusive of the Philippine Scouts; professors at the United States Military Academy; the military storekeeper; and those belonging to branches whose names are carried on the promotion list to be distributed in grades as follows: Not to exceed 4 per cent in the grade of colonel, or 389; not to exceed 4.5 per cent in the grade of lieutenant colonel, or 437; not to exceed 15 per cent in the grade of major, or 1,458; not to exceed 30 per cent in the grade of captain, or 2,915; not to exceed 28.5 per cent in the grade of first lieutenant, or 2,769; and the remainder in the grade of second lieutenant: *Provided further*, That officers found surplus may be recommissioned in the next lower grade in accordance with their standing on the promotion list, or on the relative list if their names are not on the promotion list, or those of less than 10 years' commissioned service in the Regular Army may be discharged with one year's pay, or those of more than 10 years' commissioned service and less than 20 years' service may be placed on the unlimited retired list with pay at the rate of 2½ per cent of their active pay multiplied by the number of complete years of such commissioned service, or those of more than 20 years' commissioned service in the Regular Army may be placed upon the unlimited retired list with pay at the rate of 3 per cent of their active pay multiplied by the number of complete years of such commissioned service, not exceeding 75 per cent; all under such regulations as the President may prescribe.

And in lieu thereof to insert:

Pay of officers: For pay of officers of the line and staff, $35,390,438: *Provided*, That after five months from the date of approval of this act no part of the sum herein appropriated for pay of officers shall be used for the pay of more than 13,000 commissioned officers of the active list of the Regular Army: *Provided further*, That hereafter there shall be officers as now authorized by law except that there shall be 494 colonels, 555 lieutenant colonels, 1,850 majors, 3,700 captains, 5,735 lieutenants, including first and second lieutenants of whom not to exceed 3,515 may be first lieutenants and of whom no officer shall be promoted to the grade of first lieutenant until he shall have served at least three years in the grade of second lieutenant, 1,053 officers of the Medical Corps, 177 officers of the Dental Corps, 144 officers of the Veterinary Corps, 81 officers of the Medical Administrative Corps, 136 chaplains, and the number of officers of the Medical Department and chaplains shall be as prescribed herein notwithstanding changes that may occur in the authorized enlisted or commissioned strength of the Army: *Provided further*, That for five months after the date of approval of this act there shall be no promotions to grades below brigadier general of officers of the Regular Army except of officers of the Medical Department and chaplains and thereafter there shall be no promotions to any grade that would cause the numbers hereinbefore authorized for each grade to be exceeded, and vacancies now existing in any grade below brigadier general not actually filled by the acceptance of an appointment tendered prior to the date of approval of this act shall not be filled and there shall be no appointments of officers of the Medical Department that will cause the total number thereof to exceed 1,455: *Provided further*, That within five months of the date of approval of this act the number of officers shall be reduced to such number in each grade and in the branches of the Medical Department and chaplains as the President may direct, not exceeding the numbers hereinbefore authorized except that there may be retained until absorbed not to exceed 194 additional majors, 395 additional captains, 32 additional officers of the Dental Corps, 40 additional officers of the Medical Administrative Corps, and 22 additional chaplains: *Provided further*, That the Secretary of War shall convene a board of five general officers who, under regulations prescribed by him, shall recommend to the President such officers for retirement or discharge as may be necessary, in addition to the reduction in numbers accomplished by other means, to complete the reduction to be made within five months of the date of approval of this act: *Provided further*, That hereafter the President may, in his discretion, place upon the retired list any officer who, under existing law, may be retired on his own application, and within five months of the date of approval of this act the President may, in his discretion, place upon the retired list or discharge the officers recommended to him by the board of general officers under the preceding proviso and such other officers as may apply for retirement or discharge, the total in any grade or branch so retired or discharged not exceeding in number the reduction to be made within five months, the retirements and discharges herein authorized within five months to be under the following conditions: Officers of more than 10 years' service may be placed upon the unlimited retired list with retired pay at the rate of 3 per cent of their active pay multiplied by the number of complete years of their service, not exceeding in any case 75 per cent; officers of not more than 10 years' service may be honorably discharged with one year's pay unless they shall have had more than seven and one-half years' service, in which case they shall be discharged with two years' pay: *Provided further*, That the term "service" as used in the preceding proviso shall include all service credited to commissioned officers for retirement or for increased pay for length of service; and any officer whose name is carried on the promotion list and who was originally appointed in a grade above second lieutenant shall be credited with a length of service that shall be the same as the commissioned service in the Regular Army of the officer next above him on the promotion list who was originally appointed in the grade of second lieutenant; and any officer of the Medical Corps, Dental Corps, Veterinary Corps, or any chaplain, originally appointed in a grade above the lowest authorized grade of the branch in which commissioned, shall be credited with a length of service that shall be the same as the commissioned service in the Regular Army of the officer of the same branch next senior in rank who was originally appointed in such authorized lowest grade; and any colonel, except of the Medical Department, whose name is not borne on the promotion list, and who was originally appointed in a grade above second lieutenant, shall be credited with a length of service that shall be the same as the commissioned service in the Regular Army of the colonel, exclusive of colonels of the Medical Department, next senior in rank who was originally appointed in the grade of second lieutenant: *Provided further*, That any officer whose actual length of service as hereinbefore defined is greater than the service with which he would be credited under the foregoing proviso shall be credited with his actual length of service: *Provided further*, That so much of section 24 of the act approved June 4, 1920, as provides that any person originally appointed under the provisions of said act at an age greater than 45 years shall, when retired, receive retired pay at the rate of 4 per cent of active pay for each year of commissioned service shall not be construed as applicable to said officers when retired under the provisions of this act or when retired for physical disability incident to the service: *Provided further*, That officers shall be assigned to the several branches of the Army so that the number assigned to any branch, except of the Medical Department and chaplains, shall be 82⅛ per cent of the number prescribed for such branch by the act of June 4, 1920, but the President may increase or diminish the number of officers assigned to any branch by not more than a total of 30 per cent.

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. WADSWORTH. Mr. President, I shall have to ask the Senate to reconsider the vote by which the amendment just

agreed to was adopted, as I want to offer two perfecting amendments to it, which, however, make no real difference in the meaning of the amendment.

The VICE PRESIDENT. Without objection the vote whereby the amendment was agreed to will be reconsidered.

Mr. WADSWORTH. On page 17, line 10, after the words "commissioned officers" I move to insert the words "plus emergency officers in hospitals undergoing physical reconstruction." That amendment is for the purpose of making it perfectly certain that 40 or 50 unfortunate emergency officers who are still in hospitals, who are crippled from wounds in the World War, shall continue to be paid.

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from New York to the amendment of the committee.

The amendment to the amendment was agreed to.

Mr. WADSWORTH. On page 18, line 16, after the word "Medical," I move to strike out the word "Department" and to insert the word "Corps"; so that it will read:

There shall be no appointments of officers of the Medical Corps that will cause the total number thereof to exceed—

And so forth.

Then, in line 17, I move to strike out the words "four hundred and fifty-five" and to insert the words "and fifty-three"; so as to read "that will cause the total number thereof to exceed 1,053"; and then insert the words "of the Dental Corps 177, of the Veterinary Corps 144, or of the Medical Administrative Corps 81." The sum total of those is 1,453.

That completes the statement of the amendment which I propose to the committee amendment.

The VICE PRESIDENT. The amendment proposed by the Senator from New York [Mr. WADSWORTH] to the committee amendment will be stated.

The ASSISTANT SECRETARY. On page 18, line 16, after the words "Medical," it is proposed to strike out the word "Department" and to insert the word "Corps"; and in lines 17 and 18, to strike out the words "four hundred and fifty-five" and to insert the words "and fifty-three, of the Dental Corps, one hundred and seventy-seven, of the Veterinary Corps, one hundred and forty-four, or of the Medical Administrative Corps, eighty-one."

The VICE PRESIDENT. Without objection, the amendment to the amendment is agreed to.

The committee amendment as amended was agreed to.

The next amendment passed over was, on page 21, line 24, after the word "pay," to insert "and allowances," and in line 25, after the word "Corps," to strike out "$250,000" and to insert "$2,000,000," so as to read:

For pay and allowances of the officers of the Officers' Reserve Corps, $2,000,000.

The amendment was agreed to.

The next amendment passed over was, on page 22, after line 21, to strike out "For pay of warrant officers, $1,534,336: *Provided*, That the sum herein appropriated for pay of warrant officer shall not be used for the pay of more than 40 warrant officers of the Mine Planter Service: *Provided further*, That no vacancies in the grade of warrant officer shall be filled until the number in such grade is reduced to 600, and thereafter the number shall not be increased above 600," and in lieu thereof to insert:

For pay of warrant officers, $1,951,632: *Provided*, That no vacancies in the grade of warrant officer, exclusive of warrant officers in the Mine Planter Service, shall be filled until the number in such grade is reduced to 600, and thereafter the number shall not be increased above 600, and to effect such reduction warrant officers, upon their own application, may be placed on the unlimited retired list after 30 years' service and may compute for retirement such double time as they may have earned while serving as enlisted men: *Provided further*, That nothing contained herein shall prevent the appointment of qualified band leaders for authorized bands: *Provided further*, That no vacancies in the grade of warrant officer of the Army Mine Planter Service shall be filled until the number in such grade is reduced to 40, and thereafter the number shall not be increased above 40.

The amendment was agreed to.

The next amendment passed over was, on page 23, line 21, to increase the appropriation for aviation increase to officers of the Army from "$846,000" to "$1,021,840."

The amendment was agreed to.

Mr. WADSWORTH. Mr. President, I may say that the amendments following from this point are all in accordance with the new pay bill, and also in accordance with the number of officers and the number of enlisted men as just determined by the Senate. It is entirely a mathematical proposition governed by statute.

The next amendment passed over was, on page 24, line 4, to increase the appropriation for additional pay to officers for length of service from "$4,000,000" to "$5,440,317."

The amendment was agreed to.

The next amendment passed over was, on page 24, after line 4, to strike out:

Pay of enlisted men: For pay of enlisted men of the line and staff, $48,863,088. The Secretary of War is directed under such reasonable regulations as he may prescribe to grant applications for discharge of enlisted men serving in the continental United States without regard to the provisions of existing law respecting discharges until the number in the Army has been reduced to 115,000 enlisted men, not including the Philippine Scouts. The provisions of this paragraph shall take effect immediately upon the approval of this act.

And in lieu thereof to insert:

Pay of enlisted men: For pay of an average number of 133,000 enlisted men of the line and staff, not including the Philippine Scouts, $60,981,795: *Provided*, That the total authorized number of enlisted men, not including the Philippine Scouts, shall be 140,000, and this number shall not be exceeded unless in emergency.

The amendment was agreed to.

The next amendment passed over was, on page 24, line 24, to increase the appropriation for pay of enlisted men of the Enlisted Reserve Corps from "$100" to "$7,500."

The amendment was agreed to.

The next amendment passed over was, on page 25, line 2, to increase the appropriation for aviation increase to enlisted men of the Army from "$150,000" to "$216,000."

The amendment was agreed to.

The next amendment passed over was, on page 25, line 2, to strike out the following proviso:

Provided, That this appropriation shall not be available for increased pay on flying status to more than 500 enlisted men.

The amendment was agreed to.

The next amendment passed over was, on page 25, line 11, to reduce the appropriation for additional pay for length of service to enlisted men from "$4,500,000" to "$2,235,043."

The amendment was agreed to.

The next amendment passed over was, on page 25, line 13, to increase the appropriation for pay of officers on the retired list from "$5,000,000" to "$6,000,000."

The amendment was agreed to.

The next amendment passed over was, on page 25, line 15, to reduce the appropriation for increased pay to retired officers on active duty from "$207,560" to "$44,533."

The amendment was agreed to.

The next amendment passed over was, on page 25, line 16, to increase the appropriation for pay of retired enlisted men from "$4,500,000" to "$6,000,000."

The amendment was agreed to.

The next amendment passed over was, on page 25, line 18, to increase the appropriation for pay and allowances of retired enlisted men on active duty from "$2,904" to "$13,600."

The amendment was agreed to.

The next amendment passed over was, on page 26, line 3, before the words "at $2,000 each," to strike out "5" and to insert "9"; in the same line, before the words "at $1,800 each," to strike out "25" and to insert "40"; in line 4, before the words "at $1,600 each," to strike out "44" and to insert "60"; in the same line, before the words "at $1,400 each," to strike out "61" and to insert "80"; in line 5, before the words "at $1,200 each," to strike out "95" and to insert "130"; in line 6, before the word "messengers," to strike out "80" and to insert "65"; and at the end of line 6 to strike out "$382,400" and to insert "$500,800"; so as to make the paragraph read:

Pay of Army field clerks and civil service messengers at headquarters of the several territorial departments, corps areas, Army and corps headquarters, territorial districts, tactical divisions and brigades, service schools, camps and ports of embarkation and debarkation: Army field clerks—9 at $2,000 each, 40 at $1,800 each, 60 at $1,600 each, 80 at $1,400 each, 130 at $1,200 each; 65 messengers at $720 each; in all, $500,800.

The amendment was agreed to.

The next amendment passed over was, on page 26, after line 7, to strike out:

For additional pay while on foreign service, $3,000.

The amendment was agreed to.

The next amendment passed over was, on page 26, after line 8, to strike out:

For commutation of quarters and of heat and light, $97,000.

The amendment was agreed to.

The next amendment passed over was, on page 26, after line 10, to strike out:

For commutation of quarters and of heat and light for field clerks, Quartermaster Corps, $75,021: *Provided*, That said clerks, messengers, and laborers shall be employed and assigned by the Secretary of War to the offices and positions in which they are to serve: *Provided further*, That no clerk, messenger, or laborer at headquarters of tactical divisions, military departments, brigades, service schools, and office of the Chief of Staff shall be assigned to duty in any bureau of the War Department.

The amendment was agreed to.

The next amendment passed over was, on page 26, after line 19, to insert:

No clerk, messenger, or laborer at headquarters of tactical divisions, military departments, brigades, service schools, and office of the Chief of Staff shall be assigned to duty in any bureau of the War Department.

The amendment was agreed to.

The next amendment passed over was, on page 26, line 24, after the word "pay," to insert "and allowances," so as to read:

Miscellaneous: For pay and allowances of contract surgeons, $41,100.

The amendment was agreed to.

The next amendment passed over was, on page 27, line 1, to increase the appropriation for pay of nurses from "$509,280" to "$799,000."

The amendment was agreed to.

The next amendment passed over was, on page 27, line 2, to reduce the appropriation for pay of hospital matrons from "$3,000" to "$1,000."

The amendment was agreed to.

The next amendment passed over was, on page 27, after line 7, to strike out:

For commutation of quarters and heat and light to commissioned officers, warrant officers, members of the Nurse Corps, and enlisted men on duty at places where no public quarters are available, including enlisted men of the Enlisted Reserve Corps and retired enlisted men when ordered to active duty, $4,250,000.

The amendment was agreed to.

The next amendment passed over was, on page 27, after line 13, to insert:

For rental allowances, $6,097,644.

The amendment was agreed to.

The next amendment passed over was, on page 27, after line 14, to insert:

For subsistence allowances, $5,551,978.

The amendment was agreed to.

The next amendment passed over was, on page 27, after line 18, to strike out:

For additional 10 per cent increase of pay of officers on foreign service, $200,000.

The amendment was agreed to.

The next amendment passed over was, on page 27, after line 20, to strike out:

For additional 20 per cent increase of pay of enlisted men on foreign service, $700,000.

The amendment was agreed to.

The next amendment passed over was, on page 28, line 1, after the name "Alaska," to insert "or remote posts in the United States"; so as to make the paragraph read:

For payment of exchange by officers serving in foreign countries and when specially authorized by the Secretary of War, by officers disbursing funds pertaining to the War Department when serving in Alaska or remote posts in the United States, and all foreign money received shall be charged to and paid out by disbursing officers of the Army at the legal valuation fixed by the Secretary of the Treasury, $5,000.

The amendment was agreed to.

The next amendment was, on page 28, after line 8, to insert:

All the money hereinbefore appropriated for pay of the Army and miscellaneous shall be disbursed and accounted for as pay of the Army, and for that purpose shall constitute one fund.

The amendment was agreed to.

Mr. WADSWORTH. There is one very small amendment of a corrective character at the bottom of page 62.

The VICE PRESIDENT. There is an amendment on the page preceding which has been passed over.

Mr. WADSWORTH. The Senator from Texas [Mr. SHEPPARD] is interested in that amendment; it relates to the experimentations in connection with helium gas.

The VICE PRESIDENT. The amendment will be stated.

The READING CLERK. On page 61, at the beginning of line 9, it is proposed to strike out "$400,000" and to insert "$300,000," so as to read

not exceeding $300,000 may be expended for experimentation, conservation, and production of helium.

Mr. SHEPPARD. Mr. President, if I understand the situation correctly, the committee has recommended that the amount appropriated by the House, to-wit, $400,000, be reduced to $300,000.

Mr. WADSWORTH. For experimentations in connection with helium gas; yes.

Mr. SHEPPARD. Mr. President, I wish to submit to the Senate and to the Senator from New York that this is a case where it would be in the interest of economy to retain the amount appropriated by the House. The Army and the Navy share equally the expense involved in the production of helium gas. After looking into the matter thoroughly the Military Affairs Committee of the House agreed to recommend an appropriation of $400,000 and the Naval Affairs Committee of the House agreed to recommend an appropriation of a like amount, making $800,000 in all for the next fiscal year.

I wish to say that helium is a noninflammable gas, and that we have a monopoly of that kind of gas in the United States. If the *Roma*, for instance, had been so constructed that it could have been inflated with helium gas instead of the ordinary gas, it would not have been consumed by fire. It was the destruction of the *Roma* that led the House committee to increase the appropriation for helium gas in order that we might secure as great an amount as possible. This led them to favor a larger amount than that originally estimated for.

The Government has expended to date about $8,000,000 in an effort to manufacture helium gas. The principal plant for making this gas is located at Fort Worth, Tex. The source of helium is a helium-bearing gas, produced from wells at Petrolia, Tex., about 100 miles north of Fort Worth. To-day we have in storage about 2,400,000,000 feet of helium gas. This is the net result of $8,000,000 expended for plants and experimentation. It is stored in metallic cylinders and will last for 20 or 30 years.

The helium content of the gas is extracted by a certain process which was discovered two or three years ago. The ordinary gas, which contains helium, is being transported by pipe line from the wells at Petrolia to Fort Worth, Tex., and other cities for commercial uses, and every day on which the helium is not extracted from this commercial gas means its permanent loss to that extent.

To-day the Fort Worth plant, representing an investment of millions, is idle. The amount of the gas from which helium can be obtained is limited. Therefore we are constantly losing quantities of this one item of national defense, of which the United States has a monopoly, by not making proper provision for the extraction of the helium element from the commercial gas as it passes by the plant at Fort Worth.

We expended $500,000 last year in operating the plant at Fort Worth and produced about 2,000,000,000 feet of the helium gas. The representatives of the Bureau of Mines say that, with an appropriation of $800,000, which will keep the plant continuously in operation for almost a year, we can produce 10,000,000,000 feet of the helium gas. Manifestly, Mr. President, it is in the interest of economy to follow the action of the House Naval Affairs Committee and the House Military Affairs Committee in appropriating $400,000 each for the operation of this plant, and thus to produce 10,000,000,000 cubic feet of helium gas during the year to come instead of appropriating $600,000 or $700,000 and producing a far smaller amount. With $500,000 we produced a bare 2,000,000,000 feet at Fort Worth last year.

We possess a monopoly of helium, and it ought not to be allowed to go to waste. The naval appropriation bill, as it comes from the House, carries an appropriation of $400,000, the amount which is to be appropriated for the Navy's share of this noninflammable gas. The $400,000 appropriated by the House on the recommendation of the Military Affairs Committee of the House is the Army's share, and I suggest to the Senator from New York [Mr. WADSWORTH] that this arrangement ought to be carried out. I ask him if he will not agree to the restoration of the original amount.

Mr. WADSWORTH. Mr. President, I will say to the Senator from Texas that I have no authority to abandon the amendment on the part of the committee.

Mr. SHEPPARD. Then I ask for a vote, Mr. President. I believe it is in the interest of economy to restore the amount agreed to by the House Military Affairs Committee and the House itself.

Mr. LENROOT. Mr. President, is not the Senator mistaken in saying that the House Military Affairs Committee agreed to that? Was not that amount raised upon the floor of the House?

Mr. SHEPPARD. No; the House committee reported it in the House bill.

Mr. WADSWORTH. I think it was raised on the floor of the House.

Mr. LENROOT. My recollection is that it was raised upon the floor of the House, and I think the Senator will find that that is true.

Mr. SHEPPARD. If that be true, I will say to the Senator from Wisconsin it was agreed to by the House committee. The House committee did not resist it. It was after the *Roma* disaster that the House committee came to the conclusion—and the House, too, for that matter—that we ought to make every effort to conserve as much of this helium gas as possible.

Mr. LENROOT. This helium gas is not destroyed. It accumulates. It is not lost.

Mr. SHEPPARD. But it is being wasted every day that we do not extract it from the commercial gas.

Mr. LENROOT. That is true.

Mr. SHEPPARD. And there is only a limited amount of helium-bearing gas in existence.

Mr. LENROOT. Mr. President, I hope the amendment of the committee will prevail, reducing this amount $100,000. Senators realize that even with the committee amendment we are proposing to spend next year $600,000 for helium gas. It is a very serious question whether we will have use in the future for the gas that $600,000 will product in addition to what we already have. The use of these very large Zeppelins is very questionable.

Mr. SHEPPARD. Does the Senator know how much we have now?

Mr. LENROOT. About 2,000,000 feet, as I recollect.

Mr. SHEPPARD. Two million four hundred thousand feet, and that is only enough to fill a ship like the *Roma* twice.

Mr. LENROOT. Yes; and we do not know yet whether we want any ships or not. It is all an experiment thus far.

Mr. SHEPPARD. We are building one at present, and we are to get one from Germany.

Mr. LENROOT. Yes; and if we have the same experience with those that we have had with the two already purchased by the United States we will never build another.

Mr. SHEPPARD. That is the point exactly. Those were destroyed because they did not have the noninflammable gas, or at least one of them was so destroyed.

Mr. LENROOT. Oh, no; the Senator is mistaken about that. They were not destroyed because of any such reason. One was destroyed because of defective construction. The other was not destroyed because of lack of helium gas.

Mr. SHEPPARD. The disaster to the *Roma* was due, as I understand, to the ignition of the gas.

Mr. LENROOT. Oh, it burned up after it was wrecked; yes.

Mr. SHEPPARD. No; my understanding was that it was due to the fact that it was filled with inflammable gas; but the point is, if we are going to continue to operate the plant, whether it is not economy to appropriate $800,000, which will keep the plant going continuously for 10 months and produce 10,000,000 cubic feet of this gas, thereby preventing a continuous waste through failure to extract it from the commercial gas, or whether we should appropriate a smaller amount and produce a much smaller amount of gas.

Mr. LENROOT. Why does the Senator say that with $600,000 we can produce only 2,000,000 feet, while with $800,000 we can produce 10,000,000 feet?

Mr. SHEPPARD. Because that is what the testimony here shows; that with $500,000 we produced but 2,000,000 feet approximately last year.

Mr. LENROOT. What can that possibly be based upon?

Mr. SHEPPARD. It is based upon the fact that when you once get the plant going and your personnel assembled, the longer you can operate it the greater will become the production.

Mr. LENROOT. I am satisfied that there can not be any such difference. The plant is in a going condition to-day, and all that it requires is the getting together of the personnel and the operating. I think $600,000 is plenty to appropriate in a single year for helium gas, the use of which, except for balloons, is still questionable.

Mr. SHEPPARD. With an appropriation of $500,000 we only produced 2,000,000 cubic feet last year. I was basing my calculation on that fact. I believe it would be in the interest of economy to keep in the military and naval appropriation bills the amounts which were put in them by the House. The Naval Affairs Committee has recommended $400,000 for the Navy's share, and the House has put in the Army bill $400,000 for the Army's share.

I ask for a vote upon the amendment.

The PRESIDING OFFICER (Mr. BRANDEGEE in the chair). The question is on agreeing to the amendment proposed by the committee.

The amendment was agreed to.

Mr. SHEPPARD. Mr. President, I want to say to the Senator from New York that I shall endeavor to place facts before him which I believe will convince him that the $400,000 should be retained in conference.

Mr. WADSWORTH. Very well.

Mr. President, on the bottom of page 62, on line 25, I ask that the word "other" be struck out after the word "such."

The PRESIDING OFFICER. The amendment will be stated.

The READING CLERK. On page 62, line 25, after the word "such," it is proposed to strike out the word "other," so that it will read:

And such technical services as the Secretary of War—

And so forth.

The amendment was agreed to.

Mr. WADSWORTH. On the same line, after the word "technical," I ask that the words "and other" be inserted, so that it will read "and such technical and other services."

The PRESIDING OFFICER. The amendment will be stated.

The READING CLERK. On page 62, line 25, after the word "technical," it is proposed to insert "and other."

The amendment was agreed to.

Mr. WADSWORTH. Mr. President, that finishes the committee amendments to the bill.

Mr. NORRIS. Mr. President, by direction of the Committee on Agriculture and Forestry, I offer the amendment which I send to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The READING CLERK. On page 132, after line 5, it is proposed to insert the following:

MUSCLE SHOALS.

For the continuation of the work on Dam No. 2 on the Tennessee River at Muscle Shoals, Ala., to be immediately available, $7,500,000.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Nebraska.

Mr. LODGE. Mr. President, I have not considered in any way the merits of the amendment, but I should like to ask whether that is in order under the rule about amendments offered by another committee—I do not know the facts—whether or not it has been referred to the Committee on Appropriations one day before, as the rules, I think, require.

The PRESIDING OFFICER. The Chair has no information about it.

Mr. NORRIS. Mr. President, I was unable to hear the Senator from Massachusetts.

Mr. LODGE. I asked whether the amendment had been referred to the Committee on Appropriations one day before, as required by the rule.

Mr. NORRIS. Whether this amendment was so referred?

Mr. LODGE. Yes.

Mr. NORRIS. It was not.

Mr. LODGE. Section 2 of Rule XVI provides:

All amendments to general appropriation bills moved by direction of a standing or select committee of the Senate, proposing to increase an appropriation already contained in the bill, or to add new items of appropriation, shall, at least one day before they are considered, be referred to the Committee on Appropriations, and when actually proposed to the bill no amendment proposing to increase the amount stated in such amendment shall be received—

And so forth.

Mr. NORRIS. Mr. President, I think the amendment is in order by virtue of the new rule——

Mr. UNDERWOOD. Mr. President, will the Senator allow me to ask a question? Do I understand that there is a point of order pending?

Mr. NORRIS. I did not understand that the Senator from Massachusetts made a point of order.

Mr. LODGE. I made an inquiry of the Chair. I did it because I did not know the facts.

The PRESIDING OFFICER. The Senator from Massachusetts propounded a parliamentary inquiry.

Mr. UNDERWOOD. I understand, but I wanted to know if there was a point of order pending. If no point of order is made, of course——

Mr. LODGE. I will make the point of order under the rule, because I think it ought to be settled. This amendment has not complied with the rule as I read it.

Mr. UNDERWOOD. I just wanted to know whether or not there was a point of order before we started to discuss it.

The PRESIDING OFFICER. There had not been, but there now is, as the Chair understands.

Mr. NORRIS. Mr. President, on the point of order, I think this amendment is in order under the new rule adopted by the Senate. As I understand, it is not in the manual yet. I am reading from the resolution as it was agreed to by the Senate:

Resolved, That clause 1 of Rule XVI of the standing rules of the Senate be amended so as to read as follows, to wit:

1. All general appropriation bills shall be referred to the Committee on Appropriations, and no amendments shall be received to any general appropriation bill the effect of which will be to increase an appropriation already contained in the bill, or to add a new item of appropriation, unless it be made to carry out the provisions of some existing law—

This is in order under that provision, as a matter of fact.

Or treaty stipulation, or act, or resolution previously passed by the Senate during that session; or unless the same be moved by direction of a standing or select committee of the Senate or proposed in pursuance of an estimate submitted in accordance with law.

This amendment is in order under two different clauses that I have read.

The PRESIDING OFFICER. Will the Senator permit the Chair to call his attention to the fact that what he has read is the new rule to be substituted for the first clause of Rule XVI?

Mr. NORRIS. Yes.

The PRESIDING OFFICER. But the point of order made by the Senator from Massachusetts, as the Chair understands, is made under the second clause of Rule XVI.

Mr. NORRIS. If the second clause of Rule XVI conflicts with the new rule, of course the new rule will take precedence.

The PRESIDING OFFICER. But the new rule amends only the first clause.

Mr. NORRIS. I understand that; but if the first clause then conflicts with the second clause, the first clause, being the last enactment, of course prevails.

I want to say to the Chair that this amendment is in order, as I have said, under two provisions: First, the rule says that no new amendment shall be offered unless—now, what are the exceptions? One of them is unless it be made to carry out the provisions of some existing law. That is true of this amendment. Under the national defense act provision was made for the development of the necessary power to make explosives in time of war and fertilizers in time of peace.

The President, under the act, was authorized to locate the place or places in the United States where that law should be carried out. In accordance with that act, the President, by official communication, selected Muscle Shoals as one of the places. This amendment is to carry out the provisions of that law. Under that law the particular dam to which this amendment applies was partially constructed. Under the law and under the designation of the President the dam known as No. 2, to which this amendment applies, was begun. Work was carried on, and $17,000,000 were expended in carrying it on, and it is in that condition to-day, partially constructed.

It will take three years to develop it. It will take three times the amount of money that is provided by this particular amendment, if this applies to only one year. So under that provision the amendment I have offered is in order, even if it were not offered under the direction of a standing committee.

I think this rule is complete in itself, a new rule adopted after the other one was in force, and that the amendment was in order under the other provision as being moved by direction of a standing committee. The Committee on Agriculture and Forestry, which has had this matter under consideration for a great many weeks, have had very extended hearings on it and most of the committee made a personal inspection of the work itself, and after all of that consideration and deliberation unanimously directed the chairman of the committee to offer the amendment I have proposed.

It seems perfectly clear to me, therefore, that under either one of these provisions the amendment is in order. It is true I have not read the law to the Chair, but no one denies that that is the law. I had no idea that a point of order would be made against the amendment. In my office I have a copy of the official letter of President Wilson designating Muscle Shoals under the provisions of the national defense act. There can be no question about it, and therefore, Mr. President, no one will question but that the work there in contemplation, partially finished, is carrying out a provision of law directing the President of the United States to make this particular improvement.

Mr. LENROOT. Mr. President, I would like to call the Senator's attention to the language of what he says is the new rule. The part he read is merely a repetition of the old rule and does not change it in any particular.

Mr. NORRIS. Is the part I have read the same as the old rule?

Mr. LENROOT. It is a part of the old rule.

Mr. ROBINSON. I suggest to the Senator from Nebraska that while the point of order seems to be justified, it can easily be obviated if the Senate desires to do so, and I apprehend if the Senate is unwilling to do that it would not adopt the amendment upon a direct vote on it.

The provision of the rule which is invoked as rendering the amendment obnoxious at this time is as follows:

> All amendments to general appropriation bills moved by direction of a standing or select committee of the Senate, proposing to increase an appropriation already contained in the bill, or to add new items of appropriation, shall, at least one day before they are considered, be referred to the Committee on Appropriations.

If the point of order be sustained, the Senator can ask that his amendment be referred to the Committee on Appropriations, and then postpone final action upon the bill until another day, when consideration of the amendment will be in order.

Mr. NORRIS. Mr. President, I want to inquire of the Senator from Arkansas why this amendment is not in order under that provision of the rule providing that an amendment is in order if it is proposed for the purpose of carrying out something authorized by law?

Mr. ROBINSON. I do not wish to put myself in the attitude of arguing against the position taken by the Senator from Nebraska, although in frankness I have stated that I am inclined to the opinion that the amendment at this time is obnoxious to the rule; but I will answer the Senator's question.

The same language is employed in the old rule as is used under this new rule, and paragraph 2 of the old rule, as I construe it in connection with paragraph 1, provided that even in case an amendment is proposed which is intended to carry out existing law, if it is moved by direction of a standing committee of the Senate, it must be proposed one day before it is considered. The object of the rule is manifest; to give the Appropriations Committee an opportunity of considering it, and of giving the Senate an opportunity also of becoming familiar with it.

The new rule does not change that in any particular, and clause 2, in my judgment, has the same force under the new rule that it had under the old rule. But, as I have already suggested, if the Senator decides to do so—and I am in sympathy with his purpose—he can accomplish his end by having the amendment referred to the Committee on Appropriations, and then by postponing further consideration of this bill until to-morrow, when the amendment may be considered.

Mr. NORRIS. If the Chair sustains the point of order I think I shall then offer the amendment as an individual. Paragraph 2 does not apply to an amendment offered by an individual Senator, even if the Senator's argument is correct, and it would be in order under that provision of the rule which makes it in order to offer an amendment to carry out a provision of law.

Mr. ROBINSON. I think the Senator could do that.

He can offer the amendment again in his own right, but it might be again held subject to a point of order.

Mr. LODGE. It is perfectly obvious that the course which the Senator from Arkansas has suggested can be pursued. Therefore, pressing this point of order would have no effect, except to delay, and I have no desire to delay the bill—far from it—and, as far as I am concerned, I withdraw the point of order.

Mr. ROBINSON. I made the suggestion because I thought that would be the result. I thought the Senator from Massachusetts would take that view of it when that situation was presented and withdraw his suggestion, and I thank him for doing it.

Mr. NORRIS. Mr. President, I do not care to take up the time of the Senate in debate on this amendment unless it becomes necessary. As far as I know, every Senator who has investigated this question is satisfied that this amendment ought to be adopted, and that this work ought to proceed. If there are any Senators who do not agree to that or think that some further explanation ought to be made, I am prepared to go on and give in detail a statement of the conditions down there.

Mr. LENROOT. Mr. President, I have to leave the Chamber in a moment, and I would like to make a short statement.

Mr. NORRIS. I yield the floor.

Mr. LENROOT. No. The Senator need not yield the floor, as I shall take just a moment. Heretofore I have opposed this appropriation, as the Senate well knows, and I based my opposition wholly upon the ground that as the situation then existed I was satisfied the Alabama Power Co. would be the only customer for this power. I am satisfied that the situation has now changed, and if this dam is completed there will be no difficulty in securing a fair price for the power, because there will be a sufficient demand for it. I shall therefore favor the appropriation.

Mr. NORRIS. I thank the Senator. I do not care to take up the time unless some one wants to ask me a question.

Mr. JONES of Washington. Mr. President, I would like to ask the Senator a question. I have not had an opportunity to look into the proposals which have been made to Congress by Mr. Ford and others. I do not know whether Mr. Ford's proposal should be accepted or not, but I wonder what effect the adoption of this amendment, if it shall become a part of the law, would have with reference to that proposition.

Mr. NORRIS. The question asked by the Senator from Washington is a very natural one. It is one which might occur to any Senator. Permit me to say, in answer to it, that there were quite a number of propositions made. Mr. Ford has made one, the Alabama Power Co. has made one, Mr. Engstrom has made one, and there are two or three others who have submitted offers. The committee has given a great deal of consideration to them. There will be a marked difference of opinion in the committee, to some extent, as to which of the propositions should be accepted, if any. There will very likely be a lengthy

discussion by Members of the Senate as to what our permanent policy there should be. There is plenty of opportunity for disagreement. That, however, is not involved now, and the committee are unanimous in this action, even though they disagree, as I think they will, as to these proposals. This will not interfere with anybody's proposition. It will not interfere with any bid that has been made. The only difference will be that, whatever bid is accepted, there will be a slight modification because of the additional money the Government of the United States puts into it, and in connection with all the bids, practically, but one, the Government would have to do all the building, anyway.

So those who are for one proposition or those who are for another; those who think the Alabama Power Co. ought to have it or somebody else ought to have it; those who think the Government ought to retain it, can all rest at ease in the knowledge that those questions will not be determined or jeopardized by this action. The matter will still be open and the committee figures that that question being such an important one, and the tariff bill being before the Senate and likely to take up most of the time, it would probably be a physical impossibility for the Congress to determine what the permanent policy should be, or whose offer, if anyone's, should be accepted.

As I said, the Government has spent $17,000,000 there; they have a railroad clear across the river. They have all kinds of machinery there, mixing machinery, and all the necessary paraphernalia to go ahead with the work. All they need is the money to do it, and there is likely to be, and will be sooner or later, if we delay long enough, a loss of $2,000,000 or $3,000,000. The improvements there are not intended to be permanent. For instance, at one end of the dam there are 13 acres of the river bed surrounded by cofferdams. There are other places where temporary structures of that kind are made, other cofferdams, for the purpose of doing the work. If they should go out, or if the bridge on which the railroad crosses the river, only a temporary structure, of course, not intended to be permanent, should go out, a damage of perhaps $2,000,000 or $2,500,000 might occur at any time, and sooner or later will occur, because it is only temporary, and can not last very many years. It is not built to last.

So this particular appropriation, to permit the Government to go ahead, was agreed to unanimously. The officers of the Government who will have charge of the work are there now. The machinery is all there, the cars are there, the engines are there, the mixers are there, the machinery to put in the wheels and everything is stored there in sheds. It is all there, and it is really an economic crime to delay a moment in going ahead.

Mr. JONES of Washington. I understand the theory and the opinion of the Senator, and I suppose of the committee, is that this work will be done?

Mr. NORRIS. Yes.

Mr. JONES of Washington. Either by the Government, or by private parties under an arrangement with the Government, or in some other way, but that the great work there will be done and carried to completion, and that it is more economical, and in the interest of getting it done quickly, to make this appropriation and have the work go on now.

Mr. UNDERWOOD. Mr. President, I am not going to detain the Senate at this late hour. I think the situation with reference to Muscle Shoals and the testimony which has come before Congress has clearly demonstrated the fact that there is only one economical way to handle the question of that dam, and that is to finish it at the earliest possible moment. I say, without fear of contradiction, now that the testimony has been brought before the two Houses of Congress on the proposals which have been made to the Secretary of War, when we complete this dam it will be an asset in the hands of the Government worth every dollar expended, and if it is not completed there is $17,000,000 lost in the river.

This does not settle the question as to how the Muscle Shoals Dam and project shall be disposed of. As to the dam itself there is a variance of views. If Mr. Ford's proposition comes before the Senate, I shall vote for it, but that question is not involved here now. I think it would be a waste of money and a waste of time for the Government to wait until we determine what we are going to do with the dam before we finish it. I think it will be a much better asset to dispose of if we proceed to finish it at once. Therefore I hope that the amendment of the Senator from Nebraska will be agreed to.

Mr. WILLIAMS. Mr. President, I was "just thinking," as the New England home comedy says, in my irresponsible sort of way, what would have become of the Henry Ford proposition for the Government of the United States to turn over the Muscle Shoals proposition at the high price set, if Henry Ford had been a standpat Republican instead of being what he is. I am sorry that I can not even tell the Senate what he is. Sometimes I think that he is a Democrat, sometimes I think that he is a shade of Bolshevist, and sometimes I think that he does not himself know just what school of politics he belongs to. All the same, outside of his hatred of Jews, which is totally unjustified, he has been a remarkable man in his chosen occupation. No man has ever shown the genius for making money out of power and out of locomotives of one sort or another that Henry Ford has shown.

Unfortunately for him as a business proposition he happened to run against a very distinguished standpat Republican and happened to be apparently defeated by him, and there happened to be a trial in the Senate later on. The consequence was that the word passed around—I think more or less privately, somewhat spiritualistically—that whatever else happened, Henry Ford must not be allowed to make any money out of the United States Government. After that word passed around, the next argument or word from the standpatters was that Henry Ford was offering to take over an impossible proposition that would bankrupt him.

Of course, I know that the average standpatter did not have away back in the back of his head even that reason as the only reason, because I know that if he wanted to do anything in God's world it was to bankrupt Henry Ford. So all the arguments that have been made to the effect that Henry Ford could not carry out his contract and might be bankrupted are pure camouflage, not even of the scientific and coloristic variety that during the war zigzagged, but of the original variety of woodpecker that tried to hide its red head behind a green bower.

Now, Mr. President, seriously speaking, I think it is about time we quit this foolishness. Here is a proposition that the United States Government absolutely wanted to throw into the junk pile. There was expert advice to them that there was no money in it, and that the Government had better sever itself from it and divorce itself from it just as soon as possible. "No money in it, no possible money in it," no anything in it. It looked as if for a little while that the plant would be sold, like one of the transport ships built during the war, for about one-tenth the price that it cost. Then out comes a man, an excoriated man in certain circles, a man who succeeded in gaining the admiration of some men of tolerably good sense—he succeeded in gaining mine—who offers to take over the whole thing at a very high price, a price so high that part of the men who were fighting him say that it will bankrupt him and he can not make it pay. Then these two things come together and the consequence is that Henry Ford's Muscle Shoals proposition has been hanging fire for I do not know how many months—I think about 12 or 14, but I do not remember. The consequence of all that is that even a point of order was made a few moments ago.

There is something peculiar about a point of order. Nobody is sworn to observe the parliamentary law of any legislative body. A point of order in its making is within one's discretion. I have never known a point of order to be made by any body, except one fool in the House about 21 years ago who thought he was a parliamentary sharp and made a point of order in order to prove that he knew, unless the mover of it wanted to defeat the main proposition. I have never known it to be made but once by a man who did not want to defeat the main proposition.

So we stand with the point of order made by the Republican floor leader and with the arguments that have been made in the press, without much argument in the Senate of one description or another. Of course, the object of a point of order was to keep from having a trial by the jury, and then when the point of order is withdrawn it merely means that the man who by analogy put a "demurrer" in the court has thought that he discovered that the court might decide against him, and therefore he had better withdraw it and go on the issue to the jury. This explains his withdrawal of it. Now, we have the issue before the jury on the first plea of the case, not the last one. I am sorry it is not the last one.

If there ever was, this is a case where a Government had on its hands a white elephant that was worthless, as its experts told it. Experts! Of all the contemptible words in the English language the word "expert" is the most contemptible. The experts said that it was a white elephant, and that it could neither work nor sell, and its political advisers told the Government not to regard Ford's proposition because "there was politics in the proposition."

This man undertakes to take over this plant and to work it out, and to give to the Government a certain amount of money at the risk of bankrupting himself—the experts say with a certainty of bankrupting himself, some of the standpat politicians say with a certainty of bankrupting himself, and some others say with a certainty of "profiteering" to an immense

amount at the expense of the United States Government. We can leave the profiteer pleader and the bankruptcy pleader discussing the matter with each other.

Here this man makes his offer. It has been hanging here, with expense accumulating, overhead and otherwise, while the Government has been losing money, some 14 months or more just simply because that man happened to have run upon a Democratic ticket in the State of Michigan for the Senate of the United States.

That is all. If you think you can fool the country about it you are vastly mistaken. There are fools in this country, and every now and then in a general election a majority of fools temporarily. You can fool a majority of them some of the time, but you can not fool a majority of them all the time, and as a rule you can not fool them over about three or four months after they have been fooled once, whether it was at a general election or otherwise.

I remember the great French author's work "J'accuse." I am not putting myself in his place, but I "charge" that the only reason in the world why the Ford proposition has not been accepted by both Houses of Congress in its former form, or in its present form, which is still more favorable to the Government, is because a majority of this body and a majority of the other body are Republicans and Ford is not. Now, mark you, I do not even say he is a Democrat, because according to my idea of democracy, according to my school of thought, he is not quite a Democrat. But he was at least a candidate against a standpat Republican of the old style in one State of this Union. After that he still further cultivated the standpat hatred by carrying on a contest in this body, a contest in the issue of which he had nothing to hope for, only that in his opinion the man who was not entitled to the seat should not be seated. That was all.

Oh, that there could be an appeal to the conscience of the standpat Republican Party. Of course, I realize that there can not be, but if there could be, I would appeal to it to-day to do something which would bring money into the Treasury at no expense to the Government, at a time when the Treasury is not working equal to the disbursements that go out of it day by day, threatened through bonus bills and other things with irretrievable bankruptcy—and here is a proposition to put money into the Treasury and help the Government and hurt nobody except, perhaps, Henry Ford, who may go bankrupt.

Let the proposition go through. All of you remember as well as I do the time when you considered Muscle Shoals as being on the junk pile, and that we might just as well pay somebody to take it over, and the Republican official reports show that that was the condition, and that was the congressional opinion. Then comes up a wild ass in the desert, Bolshevist, in the opinion of some of you, wild ass in the opinion of others of you, intermeddler and disturber of the peace of the Senate in the opinion of others of you, and says, "I will pay you a very large sum of money for that plant"; more money than the average man in a lifetime of 70 years of hard industry could earn to save his life; earned by a man with a peculiar genius for developing the use of motive power.

He is met by all sorts of obstruction in committee of the House of Representatives, and in the Senate itself, in committee here and in the House, and by points of order here and there. He is met by a little Democratic opposition, too, now and then. Somebody avers that his son was not loyal during the war. However, if the fellow is a wild ass of the desert, if he does not know what he is doing, and if he is a bad scamp of every description, then let him have the contract and pay the money into the Treasury and bankrupt himself, and let him go at that.

Are you not capable of that amount of magnanimity, at any rate, notwithstanding the fact that he was the author, that he was the gatherer together, call it, of evidence in a lately contested and very celebrated election case?

Mr. President, of course I am not appealing to the "standpat" conscience; no man of real knowledge ever appeals to a thing that is nonexistent, but I am appealing to the memory of the time when there was a "standpat" conscience, and I am also appealing to the common sense and political wisdom of the present standpatters, who, each and all, in view of the recent primaries in Indiana and Pennsylvania, are now rushing to deny that they are or ever were standpatters.

I tell you it would be better political wisdom for you to make the most that can be made out of this situation for the Government in a businesslike way, and to surrender your hatred of Henry Ford.

Mr. HARRIS. Mr. President——

The VICE PRESIDENT. Does the Senator from Mississippi yield to the Senator from Georgia?

Mr. WILLIAMS. I yield.

Mr. HARRIS. I do not think the Senator from Mississippi understands that this is merely an appropriation for the dam; that it has nothing whatever to do with the other features of the proposition, and will not interfere with any of the offers to lease the property. I feel sure that the Senate will vote for this appropriation and make the necessary beginning of this work.

Mr. WILLIAMS. I understand that thoroughly. The Senator is often mistaken when he undertakes to give the Senator from Mississippi a bit of information about what is going on. It is a question of the completion of the dam, but, if it is defeated, it affects the entire proposition. The Senator from Georgia knows that as well as I. This is the skirmish before the battle upon the question of Ford's undertaking the Muscle Shoals development project. Is not that true?

Oh, well, if the Senator from Georgia does not think so, I know that this is the opening skirmish; this is the firing on the picket line in connection with the larger proposition of allowing Henry Ford to develop the Muscle Shoals project. I know that as well as I know any situation, and he, with average intelligence, ought to know it.

SEVERAL SENATORS. Let us vote.

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from Nebraska [Mr. NORRIS].

The amendment was agreed to.

Mr. CUMMINS. I offer the amendment which I send to the desk.

The VICE PRESIDENT. The amendment proposed by the Senator from Iowa will be stated.

The READING CLERK. On page 14 it is proposed to strike out lines 14 to 21, inclusive, and to insert the following:

For the preparation, for historical purposes, of the following documents and information concerning officers and soldiers from the several States and the District of Columbia who were in the military service of the United States during the World War; and which The Adjutant General of the Army is hereby directed to furnish to the adjutant generals of the several States and the District of Columbia, $250,000, to be immediately available.

(1) As to individuals—

(a) True and correct copies of the individual record cards of all officers and all enlisted or selected men, excepting such as have heretofore been so furnished; and

(b) A statement as to each officer or enlisted or selected man who died in the service, showing the place and date of death of such officer or man and the cause of death, whether by wounds, accident, or disease; and such statement shall be furnished in each case, irrespective of whether the individual record card of such officer or man has heretofore or is to be hereafter furnished: *Provided*, That in all such cases, if death occurred in a hospital, the name or number and location of such hospital shall appear; and if the death occurred in action or in the field, the official designation of such action, if any, together with the local designation of the place where the same occurred, shall appear.

(2) As to units—

(a) A tabulated statement showing the title of the organization; the race of the unit, white or Negro; the date it was authorized; its maximum strength; where and when mobilized or organized, and when it left the United States, if at all, for service overseas; its stations, assignments, and service, both in the United States and overseas, with the dates thereof, and appropriate remark as to combat or other service of importance; when returned to the United States; when and where demobilized, transferred, or otherwise discontinued as a distinct organization; and

(b) A tabulated statement showing the designation of each noncombat unit which formed a part of or was attached to any division or other tactical unit during the World War, and the dates of joining or relief therefrom, in such form as may be used as an addition to the histories of divisions and other tactical units heretofore furnished to the adjutant generals of the several States and the District of Columbia; *Provided*, That, for the purposes of this and the preceding paragraph, the term "overseas service" shall mean any service outside or beyond the continental limits of the United States, but in case the unit did not serve overseas its stations in the United States shall be given.

Mr. WADSWORTH. Mr. President, I am fairly familiar with the text of the amendment proposed by the Senator from Iowa, and other members of the committee have also had a view of it. If the other members of the committee do not object to the amendment, for one I am willing to accept it and see if we can thrash the matter out in conference.

The VICE PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from Iowa.

The amendment was agreed to.

Mr. WADSWORTH. I desire to offer one more amendment, and this will be my last proposal, Mr. President. I ask unanimous consent to insert on page 62, after line 15, the amendment which I send to the desk. Its effect will be to place the Aviation Service upon the same status as the other supply corps in the matter of making contracts for current needs.

The VICE PRESIDENT. The amendment proposed by the Senator from New York will be stated.

The READING CLERK. On page 62, after line 15, it is proposed to insert:

Hereafter whenever contracts which are not to be performed within six months are made on behalf of the Government by the Chief of Air Service or by officers of the Air Service authorized to make them, and are in excess of $500 in amount, such contracts shall be reduced

to writing and signed by the contracting parties. In all other cases contracts shall be entered into under such regulations as may be prescribed by the Chief of Air Service.

The VICE PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from New York.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

ORDER FOR RECESS.

Mr. LODGE. I ask unanimous consent that when the Senate concludes its session to-day it shall take a recess until 11 o'clock to-morrow morning.

The VICE PRESIDENT. Is there objection? The Chair hears none, and it is so ordered.

RECLAMATION DEVELOPMENT WORK.

Mr. ASHURST. Mr. President, I have received a telegram, which I ask may be read. It relates to a pending bill.

The VICE PRESIDENT. Without objection, the Secretary will read the telegram.

The reading clerk read as follows:

ONTARIO, OREG., *June 1, 1922.*

Senator ASHURST,
Senate Building, Washington, D. C.:

The Ontario (Oreg.) Chamber of Commerce sends you a vote of thanks for your stand in demanding that the Smith-McNary bill be passed at this session. We hope you will not let them adjourn until they do so. The following is a copy of the telegram we are sending to-day to President Harding:

"Hon. WARREN G. HARDING,
"White House, Washington, D. C.:

"The hopes of the West are centered upon the passage of the Smith-McNary bill which has been held up by Congress. May we not ask you to exert your influence with Congress to help in the passage of this bill at this session. Ten million people in the West are requesting this to be done as part of the Republican platform. The passage of this measure will mean 1,000,000 new homes in the West on lands and in towns, will stimulate business all over the United States, and give employment to thousands of men. We ask your help in getting action at this session."

ONTARIO COMMERCIAL CLUB.

Mr. ASHURST. Mr. President, in connection with the telegram I wish to say that the McNary-Smith irrigation bill has been reported favorably from the Committee on Irrigation and Reclamation. I spoke a few words upon it some days ago, but I ought to say, in view of the telegram which has just been read, that the chairman of the committee, the senior Senator from Oregon [Mr. MCNARY], has done everything within human power to advance the bill. I am sure that no one could have done more. I wish again to express the hope that the gavel will not be allowed to fall in either House, bringing about final adjournment of the present session of Congress, until that bill shall have been passed.

EXECUTIVE SESSION.

Mr. LODGE. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session the doors were reopened; and (at 6 o'clock and 25 minutes p. m.) the Senate, under the order previously entered, took a recess until to-morrow, Saturday, June 3, 1922, at 11 o'clock a. m.

NOMINATIONS.

Executive nominations received by the Senate June 2 (legislative day of April 20), 1922.

UNITED STATES ATTORNEY.

Lewis P. Summers, of Virginia, to be United States attorney, western district of Virginia, vice Thomas J. Muncey, deceased.

UNITED STATES MARSHAL.

Frank T. Newton, of Michigan, to be United States marshal, eastern district of Michigan, vice Henry Behrendt, term expired.

APPOINTMENTS BY TRANSFER IN THE REGULAR ARMY.

ADJUTANT GENERAL'S DEPARTMENT.

Col. Joseph Wheeler, jr., Coast Artillery Corps, with rank from June 22, 1920.

Col. Charles Higbee Bridges, Infantry, with rank from July 1, 1920.

Col. Ralph Brewster Parrott, Infantry, with rank from December 23, 1920.

Lieut. Col. George Luther Hicks, Coast Artillery Corps, with rank from July 1, 1920.

Lieut. Col. David Yulee Beckham, Coast Artillery Corps, with rank from July 1, 1920.

Lieut. Col. John Fleming Clapham, Infantry, with rank from November 26, 1921.

Maj. Stuart Ainslee Howard, Infantry, with rank from July 1, 1920.

Maj. Hugh Lawson Walthall, Infantry, with rank from July 1, 1920.

Maj. John Buchanan Richardson, Infantry, with rank from July 1, 1920.

Maj. Clarence Andrew Mitchell, Coast Artillery Corps, with rank from July 1, 1920.

Maj. William Torbert MacMillan, Infantry, with rank from July 1, 1920.

Maj. Henry Newbold Sumner, Coast Artillery Corps, with rank from July 1, 1920.

Maj. James Sylvester Mooney, Cavalry, with rank from July 1, 1920.

Maj. Walter Cyrus Gullion, Infantry, with rank from July 1, 1920.

Maj. Frank Cornelius Reilly, Infantry, with rank from July 1, 1920.

Capt. Charles Clement Quigley, Infantry, with rank from July 1, 1920.

POSTMASTERS.

ARKANSAS.

Nan E. De Yampert to be postmaster at Wilmot, Ark., in place of B. H. Harper, not commissioned.

CALIFORNIA.

Earl C. McWayne to be postmaster at Firebaugh, Calif. Office became presidential April 1, 1922.

COLORADO.

Thomas E. Downey to be postmaster at Ordway, Colo., in place of S. P. Ilgenfritz. Incumbent's commission expired January 17, 1920.

CONNECTICUT.

Francis W. Chaffee, jr., to be postmaster at Eagleville, Conn., in place of J. W. Green, resigned.

Walfred C. Carlson to be postmaster at Washington Depot, Conn., in place of W. C. Carlson. Incumbent's commission expired April 30, 1922.

GEORGIA.

William M. Redman to be postmaster at Jackson, Ga., in place of Bessie Waldrop. Incumbent's commission expired April 8, 1922.

ILLINOIS.

Daisy F. Lynk to be postmaster at Mokena, Ill. Office became presidential July 1, 1921.

Luella H. McCoid to be postmaster at Venice, Ill. Office became presidential July 1, 1920.

William A. Kelley to be postmaster at Jonesboro, Ill., in place of J. C. Crawford. Incumbent's commission expired August 7, 1921.

Nelson H. Webster to be postmaster at Naperville, Ill., in place of E. M. Dieter, resigned.

INDIANA.

Hugh A. Fenters to be postmaster at Macy, Ind. Office became presidential January 1, 1921.

Clarence E. Sparling to be postmaster at Osgood, Ind., in place of O. R. Jenkins, resigned.

IOWA.

Henry L. Shaffer to be postmaster at Crawfordsville, Iowa. Office became presidential January 1, 1921.

John Geiger to be postmaster at Minden, Iowa. Office became presidential January 1, 1921.

Gust A. Hall to be postmaster at Colo, Iowa, in place of W. F. Bales. Incumbent's commission expired March 16, 1921.

KENTUCKY.

Ward H. Metcalfe to be postmaster at Brooksville, Ky., in place of H. H. Poage. Incumbent's commission expired February 4, 1922.

Carl H. Boone to be postmaster at Leitchfield, Ky., in place of E. W. McClure, resigned.

Tom H. Brown to be postmaster at Millersburg, Ky., in place of J. B. Cray. Incumbent's commission expired February 14, 1922.

LOUISIANA.

John F. Basty to be postmaster at Destrehan, La. Office became presidential January 1, 1922.

David S. Leach to be postmaster at Florien, La. Office became presidential January 1, 1921.

Louis P. Bourgeois to be postmaster at Gramercy, La. Office became presidential April 1, 1921.

Claud Jones to be postmaster at Longleaf, La. Office became presidential January 1, 1921.

Weston W. Muse to be postmaster at Lottie, La. Office became presidential January 1, 1921.

Nelle Masten to be postmaster at Woodworth, La. Office became presidential January 1, 1921.

Marion H. Page to be postmaster at Fullerton, La., in place of M. H. Page, resigned.

Otis Waguespack to be postmaster at St. Patricks, La., in place of F. J. Bourgeois. Incumbent's commission expired January 31, 1922.

MINNESOTA.

Marie D. Anderson to be postmaster at Carlos, Minn. Office became presidential April 1, 1922.

MONTANA.

Rudolph P. Petersen to be postmaster at Rudyard, Mont., in place of R. P. Petersen. Incumbent's commission expired May 20, 1922.

NEW YORK.

Albert C. Stanton to be postmaster at Atlanta, N. Y. Office became presidential October 1, 1920.

NORTH CAROLINA.

Chester C. Lord to be postmaster at Montreat, N. C., in place of A. R. Bauman. Incumbent's commission expired March 16, 1921.

NORTH DAKOTA.

Jacob Omdahl to be postmaster at Galesburg, N. Dak. Office became presidential April 1, 1922.

OHIO.

Ferne V. Boone to be postmaster at Sterling, Ohio. Office became presidential October 1, 1921.

James M. Light to be postmaster at Greenville, Ohio, in place of A. H. Meeker, deceased.

OKLAHOMA.
